General College Information

THE COLLEGE
Located in Western New York, Alfred State College of Technology - State University of New York (SUNY) is in a vibrant community surrounded by scenic countryside. In the charming Village of Alfred, college students greatly outnumber permanent residents. This quintessential college town is 15 miles north of the Pennsylvania border, 70 miles south of Rochester, and 90 miles southeast of Buffalo.

Alfred State started as a state school of agriculture in 1908. Then in 1948 it was incorporated into the newly organized SUNY system. The college was authorized by SUNY to award the degree of Associate in Applied Science in 1951, the Associate in Arts and Associate in Science degrees in 1967, and the Associate in Occupational Studies in 1973. Bachelor's degrees were added in 1991.

The college enrolls more than 3,700 undergraduate students annually. There are approximately 400 teaching faculty and staff members supporting the college’s 80 programs in agriculture, allied health, applied technology, architecture, business, engineering technology, liberal arts, nursing, and sciences.

At Alfred State, we call ourselves pioneers, individuals who prove their fundamental drive, dogged determination, and ability to overcome obstacles. These admirable traits help pioneers put their skills to work to build a brighter future. The college is proud that 98 percent of our recent graduates have jobs or are continuing their education in their chosen field. Employers tell us that Alfred State students:

Hit the ground running™...

COLLEGE VISION
Alfred State will be THE premier regional college of technology, creating opportunity for our students to achieve successful careers and purposeful lives.

COLLEGE MISSION
Alfred State delivers outstanding associate and baccalaureate degree programs through hands-on learning, preparing in-demand and involved students in a caring community.

CORE VALUES
Respect - Showing that something is important, serious, etc., and should be treated appropriately.

Integrity - The quality of being honest, fair, and adhering to a code of moral values.

Service - Donating time, skills, and energy as a way to contribute to the welfare of others.

Dedication - A very strong feeling of support, loyalty, and devotion to someone or something.

PRINCIPLES OF COMMUNITY
As members of Alfred State, we choose to be part of an academic community dedicated to those principles that foster personal and professional integrity, civility, and inclusion.

We strive toward lives of personal integrity and academic excellence – We will encourage in ourselves, and in one another, those responsible actions which lead to lives of productive work, personal enrichment, and useful citizenship in an increasingly interdependent world.

We commit to treat one another with civility – Recognizing that there will be differences of opinion, we will explore these differences in a courteous and forthright manner, always acknowledging individual rights to freedom of expression and association.

We support inclusion – We encourage those of all cultures, orientations, and backgrounds to understand and respect one another in a safe and supporting educational environment.

This set of principles set forth by the college is supported by policies including the Student Code of Conduct and the Policy on Academic Integrity.

STATE UNIVERSITY OF NEW YORK (SUNY)
SUNY’s 64 geographically dispersed campuses bring educational opportunity within commuting distance of virtually all New York citizens and comprise the nation’s largest, centrally managed system of public higher education.

Nearly 400,000 students are pursuing traditional study in classrooms or are working at home, at their own pace, utilizing distance education. SUNY is governed by a board of trustees, appointed by the governor, which directly determines the policies to be followed by the state-operated campuses.

DEGREES AND ACCREDITATIONS
I. Degrees Granted by New York State Department of Education.

Authorization is granted by the Division of Higher Education of the NYS Department of Education to confer the degree of Associate in Applied Science (AAS), Associate in Science (AS), and Associate in Arts (AA). Section 5 of the Commissioner of Education’s Regulations, Paragraph 7, reads as follows:

“Courses of Study. The course of study shall cover two years of standard college work, and shall be so organized and conducted and shall be of such scope and content as to warrant acceptance with full credit upon advanced standing by degree-conferring institutions. Such terminal courses as it offers shall be distinctly of collegiate grade. All courses of study shall contain the subject matter implied by the announced objectives of the institution.”

Authorization is also granted by the Division of Higher Education to confer the degree of Bachelor of Science (BS) in engineering technology, the degree of Bachelor of Technology (BTech), and the degree of Bachelor in Business Administration (BBA).

Authorization is also granted by the Division of Higher Education to confer the degree of Associate in Occupational Studies (AOS) under Section 52.2 of the Regulations of the Commissioner of Education (Chapter II of Title 8 of the Official Compilation of Codes, Rules, and Regulations of the State of New York).

State University criteria state that “a course of study leading to the AOS degree should be an organized postsecondary lower-division program leading to occupational competence. It should have a distinct identity, independent of established Associate in Applied Science degree or certificate offered by an institution.
The program must require a minimum of 60 semester credit hours or the equivalent of completion and may consist solely of specialized course work and related subjects.”

II. The college is regionally accredited by the Middle States Commission on Higher Education [3624 Market St., Philadelphia, PA 19104; 215-662-5606]. The Commission on Higher Education is an institutional accrediting agency recognized by the US Secretary of Education and the Commission on Recognition of Postsecondary Accreditation.

III. The following Associate in Applied Science degree programs in engineering technology are accredited by the Engineering Technology Accreditation Commission of ABET, http://www.abet.org:

- Computer Engineering Technology
- Construction Engineering Technology
- Electrical Engineering Technology
- Mechanical Engineering Technology
- Surveying Engineering Technology

IV. The following Bachelor of Science degree programs in engineering technology are accredited by the Engineering Technology Accreditation Commission of ABET, http://www.abet.org:

- Computer Engineering Technology
- Electrical Engineering Technology
- Mechanical Engineering Technology
- Surveying and Geomatics Engineering Technology

V. The court and realtime reporting program is approved by the National Court Reporters Association, This approval indicates that this program has met the general requirements and minimum standards established by the Board on Approved Reporter Training of the National Court Reporters Association [8224 Old Courthouse Rd., Vienna, VA 22182-3808; 800-272-6272].

VI. The nursing associate program is accredited by the Accreditation Commission for Education in Nursing (ACEN) [3343 Peachtree Rd., NE, Suite 850, Atlanta, GA 30326; 404-975-5000]. The ACEN is responsible for the specialized accreditation of all nursing education programs and schools, both postsecondary and higher degree. Alfred State's BSN program is fully accredited by the Commission on Collegiate Nursing Education (CCNE) [One Dupont Circle, NW Suite 530, Washington, DC 20036].

VII. The health information technology program is accredited by the Commission on the Accreditation for Health Informatics and Information Management (CAHIIM) [233 N. Michigan Ave., 21st Floor, Chicago, IL 60601-5800; 312-233-1100, www.cahiim.org/]. CAHIIM is an independent accrediting organization that enforces quality accreditation standards for health informatics and health information management (HIM) educational programs through accreditation. CAHIIM accredits associate and baccalaureate degree programs in health information management, and master’s degree programs in the health informatics and health information management professions. CAHIIM is recognized by the Council for Higher Education and Accreditation (CHEA) [One Dupont Circle NW, Suite 510, Washington, DC 20036, 202-955-6126, chea@chea.org]. CHEA is a nationally recognized non-governmental higher education organization that undertakes recognition of accrediting bodies.

VIII. The following programs in applied technology are ASE Master Certified by the National Institute of Automotive Service Excellence (ASE) [13505 Dullies Technology Dr., Suite 2, Herndon, VA 20171-3421; 703-713-3800; www.asecert.org]:

- Autobody Repair
- Automotive Service Technician
- Heavy Equipment, Truck and Diesel Technician

IX. The following programs in applied technology are certified by the National Automotive Technicians Education Foundation (NATEF) [101 Blue Seal Dr., S.E. Suite 101, Leesburg, VA 20175; 703-669-6650, fax 703-669-6125; http://www.natef.org]:

- Autobody Repair
- Automotive Service Technician

X. The automotive service technician program in applied technology is certified by the National Alternative Fuels Training Consortium (NAFTC) [West Virginia University, 1100 Frederick Lane, Morgantown, WV 26508; 304-293-7882, fax 304-293-6944; http://www.naftc.wvu.edu].

XI. The heavy equipment, truck and diesel technician program is one of nine national Association of Diesel Specialists (ADS) TechSmart programs. The heavy equipment, truck and diesel technician program is the only program in New York and New England that is approved by the ADS [International Headquarters, 9140 Ward Parkway, Kansas City, MO 64114; 816-444-3500, fax 816-444-0330].

XII. The welding technology program in applied technology is certified by the American Welding Society (AWS) [8669 NW 36 St., #130, Miami, FL 33166-6672; 800-443-9353; http://www.adda.org].

XIII. The veterinary technology program is accredited by the American Veterinary Medical Association’s (AVMA) Committee on Veterinary Technician Education and Activities (CVTEA) [1931 N. Meacham Rd., Suite 100, Schaumburg, IL 60173-4360; 800-248-2862]. The AVMA CVTEA is responsible for the specialized accreditation of all veterinary technician education programs in the United States. It has also extended its accreditation to Canadian veterinary technician education programs.

XIV. The construction management (BS) program is accredited by the American Council for Construction Education (ACCE), 1717 North Loop Road 1604 East, Suite 320, San Antonio, TX 78232.

XV. The BBA financial planning program is registered with the Certified Financial Planner Board of Standards, Inc. (CFP®).

XVI. In the United States, most state registration boards require a degree from an accredited professional degree program as a prerequisite for licensure. The National Architectural Accrediting Board (NAAB), which is the sole agency authorized to accredit US professional degree programs in architecture, recognizes three types of degrees: the Bachelor of Architecture, the Master of Architecture, and the Doctor of Architecture. A program may be granted a six-year, three-year, or two-year term of accreditation, depending on the extent of its conformance with established educational standards. Doctor of Architecture and Master of Architecture degree programs may consist of a pre-professional undergraduate degree and a professional graduate degree that, when earned sequentially, constitute an accredited professional education. However, the pre-professional degree is not, by itself, recognized as an accredited degree.

Alfred State, School of Architecture, Management and Engineering Technology, Department of Architecture and Design offers the following NAAB accredited degree program: BArch (157 undergraduate credits).

The Department of Architecture and Design at Alfred State College is authorized by the New York State Office of the Professions and the New York State Department of Education to award the BArch degree.
Student Right-To-Know and Campus Security Act
On July 1, 1992, the Student Right-to-Know and Campus Security Act went into effect, requiring institutions receiving federal student aid funds to make available to prospective students information regarding graduation, retention, and attrition rates beginning in July 1993. Successful outcomes of students' academic performance are measured by graduates, transfers, persisters, and those receiving a certificate.

Information is available for review on the Alfred State website: www.alfredstate.edu/student-consumer-information or by contacting the Student Records and Financial Services Office. You may also view this information by visiting the College Navigator website: http://nces.ed.gov/collegenavigator/.

The most recent Annual Security and Fire Safety Report includes Alfred State's summaries of the college's personal safety and security procedures in addition to the three-year summary for the Campus Crime Report which is excerpted on the following pages. The information is available in its entirety for review and/or duplication on the college's website at www.alfredstate.edu. on the University Police website at www.alfredstate.edu/university-police/annual-security-and-fire-safety-report, on reserve in both the Hinkle and Applied Technology campus libraries, and from the following campus offices: Admissions, Student Life, University Police, and the Vice President for Student Affairs.

The Campus Safety Advisory Committee will provide, upon request, all campus crime statistics as reported to the US Department of Education.

You may also visit the US Department of Education's website, which contains all campus crime statistics, at http://ope.ed.gov/security to obtain more information.

Campus Crime Statistics
The Advisory Committee on Campus Safety and/or the University Police department will provide, upon request, all campus crime statistics as reported to the US Department of Education. The US Department of Education maintains campus crime statistic information on its website at http://www.ope.ed.gov/security. You may also obtain the full annual security report, which includes all campus crime statistics, through the University Police Department at 607-587-3999 or access it through the college website at www.alfredstate.edu/university-police/annual-security-and-fire-safety-report.

STUDENT RECORDS
The Family Educational Rights and Privacy Act (FERPA) is a federal law that protects the privacy of student education records. FERPA gives parents certain rights with respect to their children’s education records. These rights transfer to the student when he or she reaches the age of 18 or attends a school beyond the high school level. Parents or eligible students have:

1. The right to inspect and review the student’s education records maintained by the school;
2. The right to request that a school correct records which they believe to be inaccurate or misleading;
3. The right to consent to disclosures of personally identifiable information contained within the student’s education records, except to the extent that FERPA authorizes disclosure without consent. Schools may disclose records, without consent, to the following parties or under the following conditions:
   A. School officials with a legitimate educational interest as defined in detail on the Records Office website within the “Student Records” information;
   B. Other schools to which a student is transferring;
   C. To comply with a judicial order or lawfully issued subpoena.
4. The right to file a complaint concerning alleged failure by Alfred State to comply with the requirements of FERPA. Written complaints may be addressed to the Family Policy Compliance Office, US Department of Education, 400 Maryland Ave. SW, Washington, DC 20202-8520.
5. The right to obtain a copy of Alfred State’s student records policy. A complete copy of this policy and a complete copy of the FERPA Law are available at portal.alfredstate.edu under the links to Registration and then Student Privacy.

Directory Information
Directory information (as defined by Alfred State) includes name, Alfred State email address, address and telephone number, dates of attendance, birth, college major, expected date of graduation, degrees and awards received, photographs, enrollment status, participation in officially recognized sports and activities, and weights and heights of athletes, and most recent previous educational institution attended. The college can release this information without the student’s written request. However, under the Family Educational Rights and Privacy Act (FERPA), students have the right to refuse to permit disclosure of any or all of those items without their prior written consent. Students who prefer not to have their directory information disclosed must sign a statement so attesting. This can be done in the Student Records and Financial Services Office before 11 a.m. of the census date and to continue in effect, must be done each and every semester of the student’s attendance. Under FERPA, if the Student Records and Financial Services Office does not hear from a student by that time, the student’s directory information may be released.

Civil Rights Policy

Questions may be directed to the chief diversity officer/Title IX coordinator, or director of Human Resources, Alfred State, Alfred, NY 14802.

Policy of Nondiscrimination
Alfred State, in recognition of its educational mission, its social concern, its responsibility for the personal development of individuals, and its concern for the rights of the individual, hereby expresses the following policy of nondiscrimination. In support of this policy, the college affirms its right to take appropriate action if it or another duly constituted authority should determine that applicable federal and state nondiscrimination law and regulations have been violated or that the effect and intent of this policy have been willfully or habitually abrogated. This policy is an affirmation of the college's commitment to making nondiscrimination a reality.

All programs and services of the college are administered without discrimination on the basis of age, sex, marital or military status, race, color, creed, religion, national origin, disability, or sexual orientation. This policy of nondiscrimination extends to admission, financial aid, housing, counseling, educational programs, athletic activities, and placement, as well as to all aspects of employment.

Complaints of noncompliance with the policy may be sent to the director of Human Resources at hr@alfredstate.edu.
Admission to Alfred State

APPLICATION PROCESS
All applicants must complete an application that may be submitted online at:

www.alfredstate.edu       www.suny.edu       www.commonapp.org

Transfer students should apply at www.suny.edu.

International students should complete the international student application packet available at www.alfredstate.edu.

Current high school students who are applying using the SUNY application must also complete the SUNY supplemental application. This form can be submitted through the SUNY website or accessed by going to the Alfred State College website.

High school graduates who have not attended a postsecondary institution must submit an essay directly to the Alfred State College Admissions Office.

A high school transcript must be supplied to the Admissions Office. Students attending high school in one of the five boroughs of New York City may submit their transcript by entering their NYC DOE OSIS number on the SUNY application. This is a nine-digit number issued to all students who attend a New York City public school and can be found on the student ID card or transcript.

Applicants with previous college experience must submit an official college transcript from all institutions attended.

Additional information to explain special or extenuating circumstances is encouraged.

Applications for the next calendar year are available beginning Aug. 1. Fall semester application decisions are mailed starting mid-October and continue on a rolling basis according to space availability. Spring semester applications for those programs open for spring admission (contact the Alfred State College Admissions Office) are also considered on a rolling basis according to availability of space.

The priority application deadline for the diagnostic medical sonography and radiologic technology majors is Dec. 1; it is Jan. 1 for spaces in the Nursing I clinical course. Applications received after these dates will be evaluated on a rolling basis.

Students with disabilities should contact the Admissions Office to inquire about special accommodations to assist them with the application process and paperwork.

Consistent with college policy, any deliberate falsification or omission of data on any admissions document may result in denial of admission, revocation of acceptance decision, or administrative dismissal from the college.

INTERNATIONAL STUDENTS
Alfred State welcomes applications for admission from international students and is authorized under federal law to enroll nonimmigrant students.

International students must complete the International Student Application packet, which is available at www.alfredstate.edu. In addition to the admission application, international students must also submit official academic and financial records. For students whose native language is not English, evidence of English proficiency must be shown by taking the Test of English as a Foreign Language (TOEFL), the International English Language Testing System (IELTS) exam, or the Pearson Test of English Academic (PTE Academic) examination. Letter of academic reference or Scholastic Aptitude Test (SAT) scores (reading/writing and math) or national exam scores are required for entrance into the four-year, baccalaureate programs unless the student has successfully completed college-level course work following high school graduation. SAT scores are also required for students interested in intercollegiate athletics. All application materials must be submitted well in advance of the intended first semester at Alfred State.

Students who have completed college/university-level course work and would like to have their courses evaluated for possible transfer credit must submit to Alfred State an official college transcript and course descriptions (written in English) for courses to be evaluated. In addition, students must also provide a course-by-course credential evaluation completed by an approved credential evaluation service. The information available from Josef Silny & Associates, Inc., located at www.jsilny.com, provides information on the service we feel best meets the needs of the applicant and Alfred State. World Education Service (WES) [www.wes.org] is also a good resource. However, we will accept a course-by-course credential evaluation from an approved member of the National Association of Credential Evaluation Services (NACES) [www.naces.org]. Please note that course descriptions and the course-by-course evaluation are not necessary if an articulation agreement exists between your previous college/university and Alfred State.

TRANSFER STUDENTS
Students who have attended other colleges following high school graduation, either full- or part-time, are classified as transfer students and may receive advanced standing. In addition to completing the SUNY application and providing an official high school transcript, transfer students must submit official transcripts from all institutions. These transcripts should be sent to the Alfred State College Admissions Office at the time of application. It is recommended that students who have completed college-level course work during high school submit official transcripts so that appropriate transfer credit may be awarded.

Parallel and equivalent courses will be reviewed and transferred in accordance with academic regulation 305. Only credit hours and honor points earned at this college will be considered when computing a student's index.

HOME-SCHOoled STUDENTS
Alfred State College admits as matriculated students only persons who have a high school diploma or its recognized equivalent. Because of this requirement, Alfred State has established a specific admission policy with respect to home-schooled students. The purpose of the policy is to ensure that home-schooled students are treated fairly yet in accordance with the requirements set forth by the college. The policy deals exclusively with the criteria for eligibility to be considered as an applicant for admission. Once eligibility for consideration is established, the applicant must also meet both campus and curriculum-specific admissions requirements.

Applicants 16 years of age or over (i.e. beyond the age of compulsory attendance)
These home-schooled students will be eligible for further consideration as an applicant to matriculated status if they can provide one of the following: (1) a passing score on the general comprehensive examination for the state high school equivalency diploma (TASC/GED) and the diploma itself if the student is eligible to receive one; (2) a statement from the superintendent of the school district in which the student resides, attesting to the student's completion of a program of home instruction that is substantially equivalent to a four-year high school program meeting the requirements of Section 100.10 of the Regulations of the Commissioner of Education - please note that this option cannot be used if the student completed an online high school program of instruction; (3) official verification
of successful completion (a grade of "C" or better) of 24 college credit hours in the distribution of 6 credits in English language arts, 3 credits in natural science, 3 credits in humanities, 3 credits in mathematics, 3 credits in social science, and 6 credits in approved general education courses - please note that students admitted through this option are not eligible for federal financial aid unless the TASC/GED diploma has been earned; (4) official verification of having earned a degree from an accredited college or university; (5) evidence of having passed with a grade of 65 or better the New York State regents exams for English language arts, mathematics, U.S. history, a science, and global history - please note that students admitted through this option are not eligible for state or federal financial aid.

Applicants under the age of compulsory attendance (i.e. below 16 years of age)

These home-schooled students will be eligible for consideration as applicants for admission to a matriculated status only if the student can provide a statement from the superintendent of the school district in which the student resides, attesting to the student’s completion of a program of home instruction that is substantially equivalent to a four-year high school program meeting the requirements of Section 100.10 of the Regulations of the Commissioner of Education - please note that this option cannot be used if the student completed an online high school program of instruction.

TRANSFER AGREEMENTS

Agreements have been established between Alfred State College and two-year colleges, which permit a student to complete an associate degree at the two-year college and transfer to Alfred State College to complete a baccalaureate degree. Transfer is guaranteed if the student successfully completes, in accordance with the specific articulation agreement, the prescribed schedule of courses. Any questions regarding transfer of courses should be directed to the transfer advisor within the Student Records and Financial Services Office at Alfred State College. The student must provide an official transcript from the two-year college to Alfred State. Refer to www.alfredstate.edu/transfer-students/articulation-agreements for a listing of articulation agreements.

JOINT ADMISSIONS

Alfred State has established Joint Admission Agreements from several of our associate degree programs into our baccalaureate degree programs as well as from our certificate programs into our own associate degree programs. Alfred State students interested in pursuing a sequential advanced degree should complete a SUNY Joint Admissions/Intent to Enroll form, available at the Alfred State College Admissions Office. This form should be filed during the final semester of the student’s associate degree or certificate program.

ACCES-VR (FORMERLY VESID)

Students who may be working through ACCES-VR should contact their ACCES-VR counselor prior to beginning the application process at Alfred State.

CONCURRENT ADMISSIONS PROGRAM (CON AP)

The Concurrent Admissions Program (CON AP) is conducted by colleges and universities that are members of the Service Members Opportunity Colleges (SOC). Concurrent with their enlistment in the Army, new soldiers are encouraged to express an interest in attending Alfred State following completion of their military obligation.

After completing a two-, three-, or four-year enlistment, the new veteran will be encouraged to enroll at Alfred State. This program also applies to soldiers enlisting in the Army Reserve.

Those interested in the CON AP program are encouraged to contact their military recruiter.

READMISSION

Students who have not yet graduated from the college and wish to apply for readmission must complete a readmission application available from the Alfred State College website. The completed application, as well as official transcripts from any colleges attended since enrollment at Alfred State College, must be submitted to the Admissions Office. Applicants who are or will be graduates of the college and wish to apply to return for a non-sequential major must complete the SUNY Application and process it through the SUNY Application Processing Center for a new program of study. The new program must be significantly different from the program from which the student graduated. Please contact the Admissions Office for further information on this requirement.

DISCIPLINARY APPLICANTS

Applicants must affirm a prior disciplinary dismissal from another institution on their application for admission. Individuals who has been previously dismissed for disciplinary reasons will have their application reviewed under college policy established through the Admissions Office and the Office of Judicial Affairs. Copies of disciplinary reasons will have their application reviewed under college policy established through the Admissions Office and the Office of Judicial Affairs. Copies of disciplinary reasons will have their application reviewed under college policy established through the Admissions Office and the Office of Judicial Affairs.

Applicants must possess a recognized high school diploma or its equivalent (please note that distance learning degrees/diplomas do not satisfy this requirement for New York State residents). Verification must be supplied to the Admissions Office. Applicants with a CDOS commencement credential or IEP certificate/diploma will not be accepted. These students are advised to take the TASC or GED exam. A score of 2700 or better on the TASC exam or a 2500 on the GED exam is needed for consideration.

Applicants are evaluated individually using a "holistic review" to make the best decision for both the applicant and the college. A variety of factors are considered (e.g., individual program requirements, standardized test scores, letters of recommendation, strength of academic program, and extracurricular activities).

To be considered for admission into programs taught on the Alfred campus, the recommended overall high school average is a 75. For programs taught in the School of Applied Technology (Wellsville campus), the recommended overall average is 72. Applicants for programs taught on the Alfred campus who do not meet specified program requirements but who show potential for success may be considered for admission through the Alfred State Opportunity Program (ASOP) or the Educational Opportunity Program (EOP).

In addition to meeting individual program requirements, it is recommended that transfer applicants have a 2.0 cumulative grade point average as well as a grade of "C" or better in each course taken during the most recent semester of attendance.

Financial need is not considered as part of the admission process.

Note: Alfred State is test optional for the spring 2021, fall 2021, and spring 2022 semesters.
### PROGRAMS OF STUDY

Applications are filed for admission into one of the following programs rather than a general freshman-year program. Enrollment in other than registered or otherwise approved programs may jeopardize a student's eligibility for student aid awards. In addition to course entrance requirements listed, it is recommended that students have an overall high school average of 75 for Alfred campus programs and a 72 for Wellsville campus programs to be considered for admission. It is recommended that transfer students have a 2.0 cumulative grade point average as well as a grade of "C" or better in each course taken during the most recent semester of attendance.

Students graduating from any two-year associate degree program (AAS, AA, AS, and AOS) may enter directly into the corresponding baccalaureate degree program(s) or the technology management Bachelor of Business Administration degree program.

### Notes for the Programs of Study Chart:

* Portfolio is required to enter junior-year studio courses.

**It is recommended that students have knowledge of basic math skills.

***Letters of recommendation, a personal essay, and a resume indicating related work experience and/or knowledge of field are required.

</table>
The Alfred State Athletic Department is an NCAA Division III member. With the move to the NCAA, incoming freshmen students who wish to participate in intercollegiate athletics must be admitted into a four-year program OR have a 75 or 2.1/4.0 high school average to be immediately eligible their first semester. Incoming transfer students who wish to participate in intercollegiate athletics must have a 2.0 cumulative GPA for consideration.

Educational Opportunity Program (EOP)
The Educational Opportunity Program (EOP) offers higher education opportunities to high school graduates or to holders of high school equivalency diplomas who do not meet normally applied admission criteria but who have the potential for college success. Students must also meet family income guidelines printed in the SUNY Viewbook and must complete the EOP financial information form, which is available on the Alfred State website.

EOP is typically an extended program with course work paced to enhance student success. Students study full time, enrolling in at least 12 credit hours per semester. The first-year schedule will include courses in English; math; college skills and/or reading; social, physical, or life science; and/or program course(s). To comply with program requirements, EOP students may be required to repeat courses in which they have earned a grade of “D” or “D+.”

Students are required to participate in regular tutoring and academic advising sessions.

Essential to EOP is direct financial aid. For each student, a financial aid package is planned, which may include grants from EOP, Pell, and Tuition Assistance Program (TAP). All EOP students must submit the Free Application for Federal Student Aid (FAFSA).

Advanced Standing
Previous Credit
A student who has taken college-level courses after high school is considered a transfer student (See Transfer Students section).

Students who are taking college courses while in high school must submit official transcript(s) in order to receive transfer credit.

Course Challenges
Any student wishing to challenge a course is responsible for furnishing material, approved by faculty administering the exam, to be used in the challenge examination. The challenge exam fee includes a $15 recording fee and $10 per contact hour compensation fee. A student must be matriculated and cannot challenge a course he/she is currently registered for after the registration deadline.

Credit From U.S. Armed Forces
The college may grant credit, upon the recommendation of a department chair, for courses of study satisfactorily completed under this program in those cases where such courses have application to a student’s program. Credit is treated as transfer credit.

Alfred State Opportunity Program (ASOP)
The Alfred State Opportunity Program (ASOP) is a special admissions program that offers higher education to high school graduates or holders of high school equivalency diplomas who do not meet traditional admission criteria, but who possess the potential for college success. Unlike the Educational Opportunity Program (EOP), students are not required to meet financial need criteria. The program is designed to help students reach their educational goals by providing additional academic support and/or time to reach these goals. Academic success coaching, tutoring, supplemental instruction, and subject and academic skills development courses are offered.

Course work is paced to enhance student success. The first semester schedule is composed of 12 to 15 credit hours, which might include courses in English; math; reading and/or college skills; social, physical, or life science; and/or program course(s). Assistance is available for tutoring, counseling, and academic advising. To comply with program requirements, students may be required to repeat courses in which they have earned a grade of “D” or “D+.”

Registration Process
In order to finalize enrollment at Alfred State, students should refer to the following information:

Orientation
Orientation programs are designed to assist new students in adapting to the college and heightening their level of success. Positive relationships among students and faculty/staff are nurtured through numerous opportunities. Orientation is a college-wide initiative, inclusive of academics, student services, and support services of the college.

Student Health Form/Immunizations
Prior to registration, students must provide the required information to Alfred State Health and Wellness Services as stated on the Student Health Form. Accepted students receive directions for accessing this form in their acceptance materials.

Academic Advisement
Each student is assigned a faculty adviser within his/her program of study. The adviser helps students plan their program of course work, reviews interim grades with students, and answers questions about personal academic goals, requirements, and academic regulations.

Class Schedule/Course Registration
A tentative schedule, based on the students’ math/English placement recommendations, will be prepared during orientation. Final class schedules will be available for new, transfer, and readmitted students on final registration day.

Continuing students will meet with their academic adviser during a designated time each semester to discuss course selection for the next semester and to receive their Registration Authorization Code. Before meeting with their adviser, they will print their Course Selection Form found in BannerWeb under “Student Forms” within the Student Services and Financial Aid link, and begin choosing classes for the upcoming semester. Registration is done online in BannerWeb. Available classes can be accessed by going to BannerWeb and clicking on “Class Schedule” prior to entering the secure area.

Continuing students will print their own schedules from BannerWeb and adjustments to this schedule may be made during Add/Drop.

New, transfer, and readmitted students will meet with their academic faculty advisers on registration day to pick up and discuss their final schedules. These final schedules will indicate if students need to process their bills with the Student Records and Financial Services Office. Students are not considered registered until
they have picked up their final schedule and paid/processed their bill. Completed student health forms must also be returned to Health and Wellness Services at this time.

Note: Courses are dropped for students who do not process their bills by the due date.

The Honors Program at Alfred State

The Honors Program at Alfred State was created to encourage motivated, curious, academically superior students to explore some aspect of their program in greater depth and to broaden and deepen their awareness of themselves as responsible, contributing members of a larger community. Honors Program participants complete a series of seminars, as well as a substantial honors project and 10 hours of volunteer community service. The permanent college transcript of students completing program requirements will read “Honors Program Graduate.”

Application

The Honors Program coordinator reviews academic records of current and incoming freshmen and invites students with a record of strong academic achievement to apply for Honors Program status. The coordinator makes the final decision based on the application, including the required student essay, letters of recommendation from two educators, and meeting with the student. Any current Alfred State student with a GPA of 3.5 (of a possible 4.0) or better and at least one year remaining at the college is welcome to apply to the program. Students accepted into the Honors Program remain in the program of their choice for degree purposes.

Program Requirements

Honors Program participants are required to

- earn an overall 3.25 GPA by graduation, with no more than one semester’s GPA falling below 3.0;
- enroll in honors courses offered by various departments, schedules permitting;
- work with a faculty or staff member to complete an honors project, usually a technical or research project related to the student’s personal or career plans;
- participate in at least two honors seminars per semester - short, informal opportunities to interact with some of the college’s most respected teachers;
- attend and participate in the college’s speakers series, especially those sponsored by the Honors Program;
- complete 10 hours of volunteer, unpaid service of genuine benefit to the community or individuals in the community.

Program Benefits

The Honors Program coordinator will

- offer interesting, challenging, credit-bearing honors courses, informal honors seminars, and speakers of interest from the professional world;
- facilitate arrangements for the honors project and community service requirements, if requested;
- negotiate special Honors Program privileges: one-week laptop loans, “faculty” library borrowing privileges, and first-day course registration privileges;
- write letters to transfer colleges explaining the Alfred State Honors Program and recommending students to the honors program at those colleges;
- indicate “Honors Program Graduate” on the students’ permanent college transcripts.

Interested students should contact:

Assistant Professor Janice Stafford, Honors Program Coordinator
607-587-4799 staffojl@alfredstate.edu

Credit by Advanced Placement Examination (AP) and College Level Examination Program (CLEP)

Students who successfully complete either Advanced Placement (AP) or College Level Examination Program (CLEP) examinations shall be granted transfer credit, as predetermined by the respective department chairs. Students must request that an official transcript of their grades (a copy of a grade report is not acceptable) be sent to this college. Students contemplating taking an AP or CLEP examination should be aware that Alfred State requires the student to take the “Subject” examination and, if applicable, the optional essay section. Alfred State is a testing center for CLEP. For further information regarding the testing center, please contact the Center for Community Education & Training.
COMMUNITY EDUCATION & TRAINING (CCET)

Community Education & Training (CCET)

CONTINUING EDUCATION/PART-TIME STUDENTS
Credit courses are open to all who might benefit from study and are qualified by previous education or work experience. High school graduation is not required. Financial aid is not available.

The college’s refund policy is followed for all credit courses.

Students may enroll in regular day and evening courses, online, summer school, winter session, or a combination of all. Advising and referral services are available.

SUMMER SCHOOL/WINTER SESSION
Summer sessions provide students with the opportunity to take courses in preparation for entering their freshman semester, getting ahead in their program, or lightening their semester load. Courses are conducted on an accelerated schedule, allowing the student to take multiple courses.

Summer housing is available for those students from out of the area who are attending on-campus summer sessions.

Winter session provides students with the opportunity to take online courses to get ahead in their program or to lighten their semester load. Courses are conducted on an accelerated schedule.

COOPERATIVE COLLEGE-LEVEL PROGRAM FOR HIGH SCHOOL STUDENTS
This program offers high school juniors and seniors the opportunity to take college-level courses on the Alfred campus with college students. This is a collaborative program and is open only to participating high schools. Financial aid is not available.

Course availability is based on classroom seat availability.

NONCREDIT ON/OFF CAMPUS COURSES
CCET coordinates and oversees all noncredit academic, personal development, and contract programs offered by the college. These programs are open to all with no requirements of previous education or work experience.

ONLINE NONCREDIT COURSES
CCET offers noncredit online courses in RHIT/coding exam prep, essentials of anatomy and physiology, computer, writing, personal enrichment, test preparation, small business, paralegal, health care professional, large business/management, project management, and more through a Web-based delivery system. Internet access, email address, and web browser are needed.

CLEP
CCET administers College Level Examination Program (CLEP) examinations, which allow students to receive transfer credit for specific courses upon attaining the required scores.

BUSINESS/INDUSTRY PROGRAMS
The CCET provides training and consulting services to support economic and personal development throughout the Southern Tier. CCET contracts with small to large business, industry, and government agencies to provide pre-employment skills training, job skills upgrade, and programs to increase competitiveness and retain employees.

The New York State Department of Transportation (NYSDOT) and the Quality Control/Quality Assurance (QC/QA) Task Force of New York Construction Materials Association collaborate with the college through CCET to conduct the QC/QA Technician Certification Program for Hot Mix Asphalt in New York State. This program is held every spring on the Alfred State campus.

Alfred State and the Associated General Contractors of America collaborate through the CCET to conduct the New York State Hot Mix Asphalt (NYS HMA) Density Inspector Certification program. This program is scheduled multiple times per year around New York State.

Alfred State and the NYSDOT collaborate through the CCET to conduct the NYSDOT welding certification program. This program is scheduled multiple times per year in Wellsville, NY; other sessions are also scheduled around Western New York.

The college, through CCET, is a training provider for the NYS Office of Alcoholism and Substance Abuse Services. The program provides training for those who wish to maintain or begin a career in the field of alcohol and chemical dependency counseling, including the Credentialed Alcoholism and Substance Abuse Counselor (CASAC), the Credentialed Prevention Professional (CPP), and Credentialed Prevention Specialist (CPS) designations. For more information on CASAC, visit http://oasas.ny.gov/.
Financial Information

COLLEGE COSTS

Alfred State strives to keep tuition and fees at reasonable rates. Charges may vary due to different room and meal choices, program costs, and fees selected. The following chart is designed to give you an idea of the average student’s charges and expenses.

*Cost information as of Aug. 5, 2020 and is subject to change.

LATE REGISTRATION FEE***

***Students who registered or paid their bill after the initial due date are subject to this fee per term.

New York State Residency: The Student Records and Financial Services Office will determine New York State residency per SUNY guidelines. If NYS residency status is in question, the student will be charged out-of-state tuition until the student provides proof of NYS residency. Forms are available in the Student Records and Financial Services Office and online.

Certain nonresident students may be eligible for the resident tuition rate if they meet the following requirements:

1. Are not non-immigrant aliens within the meaning of 8 USC §1101(a)(15) (See Other Related Information below), and
2. Attended an approved New York State high school for two or more years, graduated from an approved New York State high school and applied for admission to the university within five years of receiving a New York State high school diploma; or
3. Attended an approved New York State program for a General Equivalency Diploma (GED) exam preparation, received a GED and applied for admission to the university within five years of receiving the GED; and
4. If the student is without lawful immigration status, the student submits to the campus a notarized affidavit stating that the student has filed an application to legalize his or her immigration status, or will file such an application as soon as he or she is eligible to do so (See NYS Education Law §355(h) (8)).
5. Effective July 1, 2014, veterans who meet eligibility requirements for educational assistance under federal GI bills, even if not actually receiving or using such benefits, are eligible for in-state tuition. Additionally, spouses and dependents who are eligible for educational assistance under federal GI bills are also eligible for in-state tuition effective July 1, 2015. In both cases, a Certificate of Eligibility from the US Department of Defense or the Veterans Administration is required to document eligibility.

### PART-TIME STUDENTS

NYS residents enrolled in day or evening programs carrying fewer than 12 credit hours are charged $295 per credit hour. Tuition for non-residents enrolled on campus is $460 per credit hour for associate degree programs or $708 per credit hour for bachelor degree programs. Tuition for non-residents online is $295 per credit hour for associate degree programs or $343 per credit hour for bachelor's degree programs. Part-time students are also charged mandatory fees (prorated per credit hour).

*Costs are based on information at the time of printing and are subject to change.

### EXPLANATION OF FEES & PAYMENT OPTIONS

**Student Comprehensive Fee** - This fee is paid by all students in order to provide quality services to everyone. The services are available to students whether or not the student chooses to take advantage of them. The fee comprises:

- **Activities Fee** - Established by students through their incorporated student government. The fee covers student activities such as student organizations, social activities, cultural events, films, and recreational programs.
- **Athletic Fee** - Supports the college’s 17 intercollegiate sports teams and entitles students to free admission to all campus sporting events.
- **College Fee** - Established by the SUNY Board of Trustees.
- **Fitness Center Fee** - Enables use of the fitness centers (located on the ground floor of Orvis and the second floor of Pioneer Center). They offer top-of-the-line selectorized weight machines, computerized fitness and aerobic equipment, and an expanded free-weight area.
- **Health Fee** - Allows students to receive medications, physician consultations, and all available health services for no additional fee.
- **Technology Fee** - Supports computer technology operations, upgrades, and improvements.
- **Transcript Fee** - Guarantees students unlimited copies of their transcripts.
- **Transportation Fee** - Supports student transportation services.

**Orientation Fee** - A $90 mandatory one-time orientation fee is billed to all full- and part-time new and transfer students to cover the cost of programs, food, and registration requirements. Internet and readmission students are not required to attend and will not be charged the orientation fee.

**Optional Fees:**

- **Graduation Fee** - Commencement Policy - All students must pay a non-refundable fee in order to participate in the commencement ceremony. This fee will be imposed per ceremony attended. The commencement ceremony is held in May of each year. Students receiving more than one degree may also be charged for additional accoutrements at the Campus Store. All students graduating from a bachelor's degree program must pay an additional cost of $30 for the bachelor hood. Students must attend the ceremony to receive diploma cover and/or honor cord. No fee is assessed for those who applied to receive their diplomas without attending the ceremony.

- **Vehicle Registration Fee** - Mandatory on all vehicles parked on campus. Vehicles must be registered online in BannerWeb or by visiting the University Police Department (located in the Theta Gamma House) where vehicle hang tags are issued.
Foreign Medical Insurance - Enrolls student in an accident and health insurance program. If you have questions about this plan, you may call the Student Records and Financial Services Office at 607-587-4253. Enrolling in the Foreign Insurance Program is mandatory when studying internationally.

Meal Plans - Students living on campus MUST have a meal plan unless living in a Townhouse or MacKenzie Quad apartment. (Student will need to contact ACES). Meal plans are also available for commuters. Carefully review your plan choice on BannerWeb and change the amount if necessary. If you have specific meal plan questions, you may call the ACES Office at 607-587-4064.

PAYMENT OPTIONS
Fall semester bills are available online July 1 (or the first business day if the 1st falls on a weekend); spring bills are available online in November. Both are given a due date well before classes begin. Payment is due on this date for the students to be pre-registered and to avoid a $50 late registration fee and cancellation of their course registration.

Temporary deferment of payment may be granted at bill-processing time for students who have proof of financial aid or scholarships that will cover the billed amounts. Balances can be paid by cash, check, MasterCard, VISA, Discover, or wire transfer. As financial payments are received by the college, they will first be applied to any outstanding balance. Refunds will be issued only when the bill is paid in full. In a continuing effort to assist our customers, Alfred State also offers monthly payment plan options. Information regarding payment plan options is available online.

Students Receiving Title IV aid need to know: Students need to authorize the use of Title IV financial aid (federal grants and loans) to pay non-institutional charges (optional fees and vehicle registration). If you choose not to provide this authorization, you will be responsible for paying your optional fees even if you have a credit balance from Title IV financial aid. You will be asked your preference for this authorization during bill processing in BannerWeb.

STUDENT CONSUMER INFORMATION
REGISTRATION
Importance of Proper Registration - Students must properly register and pay by the appropriate deadlines for all courses for which they expect to receive credit. Students are cautioned that simply attending classes and completing course requirements does not entitle anyone to register after the deadlines have passed or to claim credit for a course in which he/she has participated as an unregistered or a deregistered student. Students must resolve all problems regarding registrations with the Student Records and Financial Services Office.

De-registration/Blocking - Students who do not comply with published tuition payment deadlines or who have other major obligations to the college may be de-registered, or automatically dropped, from the courses for which they have registered prior to the new academic period. They may also be blocked from receiving college services such as official transcripts, diploma and enrollment verifications.

Deadlines - Courses may be added and dropped according to academic regulations. Please refer to www.alfredstate.edu/academics/academic-regulations. Full semester courses dropped after the first week of class will incur a liability, according to the liability policy which follows.

LIABILITY POLICY
All tuition and fee liabilities are calculated based on the date of separation as recorded in the Student Records and Financial Services Office. Students who will be separating from the college must file the appropriate paperwork with the Student Records and Financial Services Office. Following is a liability schedule based upon the "official" withdrawal date or date the class is dropped. Students begin incurring charges the first day of the semester, not the day they complete the registration process.

A student who is dismissed from Alfred State for academic or disciplinary reasons prior to the end of the academic term shall be liable for all costs for that term and shall not be eligible for a reduction of charges or a refund of payment made.

Meal Plan; Campus Spending Account: Unused portions are refunded by the ACES Office or credited to the student’s bill.
RETURN OF TITLE IV FUNDS

If a student withdraws, is dismissed, or takes a leave of absence prior to the 60 percent point of the semester, Title IV funds must be returned to the source based on federal regulations. For the purpose of the return of Title IV funds, Federal Title IV aid is PELL, SEOG, subsidized and unsubsidized Stafford Loans, and PLUS loans. Students who do not complete at least 60 percent of the semester and are receiving Title IV aid may owe a bill after funds are returned to the source. A student will be reviewed to determine if he or she is an unofficial withdrawal at the end of the semester due to receiving failing grades in all of their course work. If no last date of attendance can be determined through our attendance monitoring process, the period midpoint will be used. The student must repay funds credited to his or her account as determined by the Federal Return of Title IV Aid Calculation.

ADJUSTMENTS TO BILL

Removal of charges from a student’s bill must be made before or at the time of processing. Any student not requesting a correction to the bill prior to the end of the first week of classes will be liable for those charges.

Any appeal of a fee must be in writing, with justification, and submitted to the Student Records and Financial Services Office by the end of the first week of the semester.

Late Registration Fee: Any students who have not registered for classes, paid their bill, or processed their bill by the bill due date, will be assessed a $50 late registration fee. This fee is nonrefundable.

Penalties for Nonpayment: Nonpayment of charges will result in current semester registration being dropped. Late fees assessed, the holding of transcripts, diplomas and possible denial of future registration. Unpaid accounts will be forwarded to a collection agency or to the Office of the Attorney General.

Late Payment Fee: A monthly late payment fee of up to $50 is assessed to any account with an outstanding balance. This fee will be added to any account turned over for collection purposes.

Returned Checks: A fee of $20 will be charged for checks returned for insufficient funds.

Disbursement of Loans, Grants, Scholarships: The college may receive funds for a student from various sources. All monies are applied to the student’s account as received until the bill is satisfied. If the college receives funds that result in a refund for the student, the refund will be available for pickup in the Student Records and Financial Services Office for one week. Any remaining refund checks not picked up after one week will be mailed to the student’s home address.

FINANCIAL AID

Financial aid comes from a variety of sources. Students must file a Free Application for Federal Student Aid (FAFSA) as soon after Oct. 1 as possible for each academic year in which they want to receive federal Title IV financial aid. The FAFSA can be completed online at www.studentaid.gov. Once the form is submitted, students can print a confirmation page as receipt of the application. While on the FAFSA confirmation page, New York State residents who plan to enroll full time can apply for “TAP on the Web.” TAP can also be applied for online at www.tapweb.org. Eligible New York State residents can apply for the Excelsior Scholarship online at www.hesc.ny.gov. Alfred State’s school codes for financial aid are:

- 0002854 for the FAFSA
- 3005 for TAP associate degree programs
- 6005 for TAP baccalaureate degree programs

STUDENT LOAN COUNSELING

Entrance counseling – First-time borrowers under the Federal Stafford Loan Program are required to complete an online loan counseling session before loan funds can be disbursed. The session is designed to inform student borrowers of their rights and responsibilities under the Federal Stafford Loan program. Nursing Student Loan borrowers must also complete online student loan counseling.

Exit counseling – Students separating from the college due to graduation, withdrawal, leave of absence, dismissal, or less-than-half-time enrollment are required to complete an online loan exit counseling session. The session is designed to help students avoid the pitfalls of default by informing them of their repayment obligations as well as their deferment and forbearance rights under the loan programs from which they borrowed.

METHODS OF NOTIFICATION

Accepted students with paid deposits are provided with an active Alfred State email account. Award letters, requests for information, and changes to a financial aid package are sent to students’ Alfred State email accounts. It is the students’ responsibility to regularly check their campus email for such updates and requests. Students should also be aware that they can view the status of their financial aid and requests for information anytime using the college’s BannerWeb student information system.

INCOME VERIFICATION AND OTHER REQUESTS FOR INFORMATION

Under US Department of Education guidelines, some students who apply for Federal Title IV aid will be selected for verification. This may include household size and income. Title IV aid will not be processed until all requested documents have been received and reviewed by the Student Records and Financial Services Office.

YOUR FINANCIAL AID AWARD

All students are considered for all types of aid, and financial aid packages are made according to a student’s eligibility in each program as determined by federal and state regulations. Awards are determined by financial need based on data provided by the student on the FAFSA. The offer of financial aid is conditional based upon continuation of legislative authority and availability of appropriated funds.

Financial need is calculated using the following formula: Cost of Attendance (tuition, room, meals, fees, books, transportation) - Expected Family Contribution (EFC determined by FAFSA) = Financial Need.

Electronic financial aid award letters are sent to accepted students with paid deposits via their Alfred State email account beginning in November or those with a valid FAFSA on file with the college. Detailed instructions are provided to students on how to accept and apply for their aid. Generally, financial aid can be categorized into three types:

1. Scholarship and grant aid are considered gifts and generally do not need to be repaid. These include the Federal Pell Grant, Federal Supplemental Educational Opportunity Grant (SEOG), NYS Tuition Assistance Program (TAP) for NYS residents enrolled full-time, Aid for Part-time Study (APTS) and part-time TAP for NYS residents enrolled part-time, and the Educational Opportunity Program (EOP) for NYS residents who meet established academic
and economic guidelines. Students should contact the NYS Higher Education Services Corp. for information on scholarships for Excelsior, STEM, volunteer firefighters, victims of the World Trade Center disaster, and certain types of military and public service. The phone number is 888-697-4372. Information can also be found on the web at www.hesc.com.

- Students receiving veterans’ educational benefits through the Department of Veterans’ Affairs must provide a copy of their Certificate of Release or Discharge from Active Duty (DD214) or their certificate of eligibility for benefits to the veterans’ certifying official in the Student Records and Financial Services Office. Here students will receive required forms and enrollment certification for the completion of their application for veterans’ educational benefits. Alfred State is a participating member of the Yellow Ribbon Program.

- Campus scholarships are primarily given out by the Admissions Office. Scholarship opportunities and requirements can be viewed on the web at www.alfredstate.edu/financial-aid/scholarships. Links to outside scholarship searches are also provided. Students are encouraged to seek scholarships and grants through their local high schools, civic organizations, and employers.

2. **Loans do need to be repaid** and should be considered as serious commitments. These include the Federal Subsidized and Unsubsidized Stafford Loans, and Federal Nursing Loan. These loans are in the student’s name and eligibility is determined by financial need based on results of the FAFSA. Students are directed by the college to complete an electronic Loan Agreement (MPN). Under an MPN, students can receive subsequent loan disbursements at the same school for up to 10 years without having to complete another promissory note. Interest rates and terms are set by the federal government, and students must be enrolled a minimum of six credit hours per semester in a matriculated degree-granting program. These loans have a grace period before repayment begins once the student is no longer enrolled or drops below half-time enrollment.

- The Federal Parent PLUS Loan is taken out in the parent’s name on behalf of the student. Repayment begins 60 days after the loan is fully disbursed. Options for deferment are also available. This loan is also applied for using an electronic Loan Agreement (MPN). Interest rates and terms are set by the federal government and students must be enrolled a minimum of six credit hours per semester in a matriculated degree-granting program.

3. **Employment and Federal College Work-Study** is a way for students to earn money through a part-time job in order to contribute toward their college costs. Work-study awards are offered to students with demonstrated financial need based on FAFSA results. Students are paid at an hourly rate every two weeks for the hours worked. Work Grant is a limited funding source that is not based on financial need; however, specific skills may be required for some jobs.

**OVERAWARD POLICY**

Overawards occur when students receive financial aid resources in excess of the college’s cost of attendance. In this instance, the Student Records and Financial Services Office is required under federal student aid regulations to reduce or cancel any resources affected by the overaward.

Students receive written notification by the Student Records and Financial Services Office when an overaward is identified and are advised which funds need to be adjusted. In some cases, this could leave a student owing a balance on the semester bill. Students are encouraged to notify the Student Records and Financial Services Office in writing immediately if they receive additional funds that were not included in their original financial aid package.

**ACADEMIC CRITERIA FOR FINANCIAL AID**

Alfred State is required to monitor the academic progress of students receiving federal and state financial aid. Students who are not maintaining satisfactory academic progress (SAP) and pursuit of program (POP) according to established guidelines are not eligible for federal Title IV and/or state financial aid. In addition, students cannot receive federal and/or state financial aid for courses not applicable to the major in which they are matriculated.

**New York State Criteria/Requirements for Tuition Assistance Program (TAP)** (full-time enrollment): Reviewed at end of each semester.

**Students Receiving TAP Need to Know That:**

**TAP Aggregate** – Students enrolled in associate degree programs can receive up to six semesters of TAP (six payment points per semester) for a total of 36 payment points. Bachelor’s degree students can receive up to eight semesters of TAP or 48 payment points. Students who qualify under the Educational Opportunity Program (EOP) and approved five (5) year programs (BArch) can receive up to 10 semesters or 60 payment points. TAP payments received at other schools are still counted in the aggregate when students transfer schools.

**Repeating Courses** – Students must enroll in a minimum of 12 new credit hours each semester to qualify for TAP. Repeating a course that previously received a passing grade cannot be included as part of the required credit hours for that semester when determining TAP eligibility. However, the following exceptions apply: (1) when a failed course is repeated; (2) when a grade received is passing at the institution, but is unacceptable in a particular program as stated in the college catalog by the academic department; and (3) when a course may be repeated and credit is earned each time. The Student Records and Financial Services Office determines if students are out of SAP-POP compliance as part of the TAP certification process. Students are notified of their ineligibility by the Student Records and Financial Services Office.

**Withdrawal or Leave of Absence** – Students who received TAP for a semester from which they withdrew or took a leave of absence and did not earn any academic credit are not considered to be fulfilling the pursuit of program requirements and would be made ineligible for TAP for the next enrollment period.

**2.0 GPA** – Students having received four semesters of TAP (24 payment points) must have a 2.0 cumulative GPA (out of a possible 4.0) to continue receiving TAP. This includes students who may have received TAP payments at another college prior to enrolling at Alfred State.

**Sit-Out** – Students who become ineligible to receive state financial aid for a semester due to poor academic performance or failure to meet pursuit of program requirements may sit out for one year. Students would then be eligible to receive the state financial aid for which they qualify upon their return. Sit-out does not apply to the TAP 2.0 requirement.
Aid to Part-Time Study (APTS) – Students studying part-time may be eligible for APTS. APTS is deducted from a student’s available TAP payments. Two APTS payments (three points each) equal one TAP payment (six points).

Part-Time TAP – Similar to APTS, part-time TAP is also deducted from a student’s total available TAP payments. However, instead of using three points for each semester of part-time enrollment, points are used according to the actual number of part-time credit hours taken against the percentage of a full TAP award.

Federal Criteria/Requirements: Reviewed at the end of each semester.

Students Receiving Federal Title IV Aid Need to Know:

Degree Completion – Students must complete their degree or certificate within 150 percent of the normal credits required for completion. Students who change programs and are in good academic standing are considered to be at the semester level based on the number of transfer credits accepted by the new program. For any subsequent program changes or program changes due to poor academic standing all attempted hours will be considered. Example: If an AAS student needs 60 credit hours to complete a degree, they cannot receive aid after 90 credit hours have been attempted.

Federal Warning – Students found to be below the academic standards for federal aid eligibility will be placed on federal aid warning for one semester. Students who have not regained eligibility by the end of the warning semester will be ineligible for federal aid.

Appeal Procedures
Students who experienced extenuating circumstances that affected their academic progress resulting in the loss of their financial aid eligibility may file an appeal of SAP-POP and/or Title IV requirements. Students interested in filing an appeal are encouraged to contact the Student Records and Financial Services Office for instructions. Appeal procedures are also provided to students in writing when they receive their notice of ineligibility.

Remedial Courses
Alfred State offers credit and noncredit remedial courses which will be counted toward the number of credit hours attempted and taken for the purpose of financial aid. However, if a passing grade is not received remedial course work will not be counted in the number of credit hours earned.

Incomplete Course Work, Withdrawals, and Repeated Course Work
Course work that has not had a grade issued will not count in credit hours earned and may impact financial aid eligibility. Withdrawal from courses that will have a grade of withdrew passing/failing will be counted in hours attempted and/or earned. Courses repeated due to a failing grade will have the highest earned grade count in hours attempted and/or earned.

SELECTIVE SERVICE REGISTRATION
Prior to receiving Title IV funds, the Higher Education Act mandates that males between the ages of 18-25 register with the Selective Service System. Registration can be completed on the FAFSA or at www.sss.gov. Male students who fail to register will be ineligible for Title IV financial aid.

CROSS REGISTRATION/CONSORTIUM AGREEMENTS
Alfred State will process financial aid for its matriculated students who are also attempting course work as a visiting student at another college or university. Prior approval is required by the Alfred State Transfer Advisor to ensure that the course work will transfer into Alfred State and meet the student’s graduation requirements. Complete procedures are available at www.alfredstate.edu under “Admissions”; “Transfer Students”; “Cross Register”.

Questions
Questions in regard to any of the above information can be directed to: Alfred State Student Records and Financial Services Office, 10 Upper College Drive, Alfred, NY 14802; phone 1-800-4-ALFRED; or email sfs@alfredstate.edu.

SCHOLARSHIPS AVAILABLE AT ALFRED STATE
Alfred State is proud of its commitment to recognize outstanding students by offering numerous scholarships. Since it is the desire of Alfred State to award scholarships to as many students as possible, students do not receive more than one scholarship. If a student qualifies for more than one award, the higher-value scholarship will be awarded. Enrollment deposits must be paid by the due date in order to maintain any scholarship awards.

When multiple SAT score reports are submitted for scholarship purposes, the exams will be superscored using the highest reading/writing and math scores; ACT exams are not superscored.

The Alfred State Athletic Department is a NCAA Division III member. Therefore, no consideration of athletic ability or athletic accomplishments will be considered in determining students’ scholarship eligibility or financial aid packages.

The following scholarships are available to incoming students who have been accepted and will enroll for the fall semester into a regular program and will be studying full time on either the Alfred or Wellsville campus. Please note: students studying online are not eligible for scholarships; scholarship funding is limited and meeting qualifications is not a guarantee of an award; the financial aid package, including scholarship awards, cannot exceed the cost of attendance.

Douglas & Carol Shay Acomb Endowed Scholarship² - Awarded to an academically talented incoming student; applied to non-tuition expenses.

Agricultural Endowed Scholarship² - Awarded to student enrolling in an agriculture program.

Alfred State Merit Scholarship Program:

Alfred State Scholars¹ - up to $5,000 per year awarded to academically talented first-time, freshmen entering a baccalaureate-degree program; must be a New York State resident; specific value will be determined by strength of academic background and funding availability; applied to non-tuition expenses; preference given to students accepted by March 1; no scholarship application necessary.
Alfred State Pioneer Award\(^1\) - up to $1,800 per year awarded to academically talented first-time, freshmen entering an associate-degree program; must be a New York State resident; specific value will be determined by strength of academic background and funding availability; applied to non-tuition expenses; preference given to students accepted by March 1; no scholarship application necessary.

Alfred State Scholars--Out-of-State\(^1\) - up to $10,000 per year awarded to academically talented first-time, freshmen entering a baccalaureate-degree program; must reside and attend high school outside of New York State; specific value will be determined by strength of academic background and funding availability; preference given to students accepted by March 1; no scholarship application necessary.

Alfred State Pioneer Award-Out-of-State\(^1\) - up to $2,000 per year awarded to academically talented first-time, freshmen entering an associate-degree program; must reside and attend high school outside of New York State; specific value will be determined by strength of academic background and funding availability; preference given to students accepted by March 1; no scholarship application necessary.

Allegany County Counselors’ Association Annual Scholarship\(^3\) - Awarded to a student attending high school in Allegany County who will be enrolling in a vocational or technical program; preference given to student who attended a Career/Technical Center while in high school; applications available in high school guidance offices in early spring.

Allegany County School Food Service Association Scholarship\(^2\) - $200 awarded to a student with a financial need from an Allegany County school district who is entering the culinary arts program.

Alpha Sigma Sorority Annual Scholarship\(^4\) - Awarded to an incoming female student who demonstrates civic engagement activity and participation; letter of interest should be sent to the Admissions Office by March 1.

Alumni Scholarship\(^\) - $2,000 (total value) [$1,000 if enrolled in associate degree program] awarded to first-time freshman students who are the children or grandchildren of an Alfred State alumnus; applied to non-tuition expenses; multiple scholarships available; student must have at least an 83 high school average (through end of junior year); a letter must be sent to Admissions Office indicating student’s name as well as the alumnus’ name at the time of graduation, the year graduated from Alfred State, and the student’s relationship to the alumnus.

Alumni 1939 Endowed Scholarship\(^2\) - Awarded to academically talented incoming students.

Anderson Family Endowed Scholarship\(^2\) - Awarded to academically talented incoming student.

Baking & Culinary Arts Scholarship\(^3\) - $1,000 awarded to incoming students enrolling in culinary arts or culinary arts: baking, production and management program; scholarship application available on the Alfred State website.

Evelyn C. and Rumsey C. Billings Memorial Endowed Scholarship\(^2\) - Awarded to academically talented incoming students from Steuben and Otsego counties.

Lee Brasted Engineering Science Endowed Scholarship\(^2\) - Awarded to a student enrolling in an engineering technology program.

Anthony C. Cappadonia Endowed Scholarship\(^4\) - Awarded to an incoming student with a musical background who was in high school choir; must have an 80 or better high school average through the end of the junior year; letter of interest should be sent to Admissions by March 1.

Cross Connection Control Foundations of the Niagara Frontier, Inc., Annual Scholarship\(^2\) - Awarded to a student enrolling in the heating, ventilation, and air conditioning program.

Culinary Academic Scholarship\(^3\) - $1,200 awarded to an incoming student enrolling in culinary arts or culinary arts: baking, production and management program; must have an 80 or better high school average through the end of their junior year and be in the top 50 percent of class; scholarship application available on the Alfred State website.

Daniel DiFrancesco Memorial Endowed Scholarship\(^4\) - Awarded to an incoming student enrolling in an agriculture program who exhibits service to school and/or the community, exhibits a strong sense of responsibility to self and dedication to family, and possesses a love of the outdoors and demonstrates an appreciation of nature; letter of interest should be sent to the Admissions office by March 1.

The Drago Family Endowed Fund\(^1\) - Awarded to academically-talented incoming student; preference given to minority student who is first in family to attend college; applied to non-tuition expenses.

Dresser-Rand Endowed Scholarship\(^2\) - Awarded to an academically talented incoming student who resides in Allegany, Cattaraugus, Chautauqua, or Steuben counties in New York or from McKean, Potter, or Tioga counties in Pennsylvania.

East High School Partnership Scholarship\(^2\) - $500 awarded to graduates of East High School, Rochester, who are accepted to Alfred State by May 1 of their senior year; maximum of five awards each year; scholarship award begins second year of enrollment at Alfred State.

Max & Marian Farash Annual Scholarship\(^2\) - Awarded to student enrolling in mechanical engineering technology or the heating, ventilation, and air conditioning program.

Friendship Designated Scholarship\(^2\) - $500 awarded to graduates of Friendship Central School accepted into a regular program at Alfred State.

Genesee Valley Balloon Association Endowed Scholarship\(^2\) - Awarded to student from Western New York enrolling in an agriculture program.

Vernon Gleasman SAE Endowed Scholarship\(^2\) - Awarded to academically talented incoming student enrolling in mechanical engineering technology.

Michael K. Gowdy Memorial Endowed Scholarship\(^2\) - Awarded to academically talented students from Wellsville High School.

W.R. Grace & Company Endowed Scholarship\(^2\) - Awarded to a student enrolling in the biological science or forensic science technology program.
M.A. and C.A. Graham Nursing Memorial Endowed Scholarship - Awarded to incoming nursing students; preference given to students from LeRoy Central or Warsaw Central School districts, then to students from Wyoming County, then to students from the rest of New York State.

International Cultural Scholarship - Awards up to $3,000 to accepted international students with an overall high school or college grade point average of 2.5 or better.

International Excellence Scholarship - Awards up to $7,000 to international students who meet two of the following four criteria: 213 TOEFL exam score (79-80 on Internet-based exam, 550 on paper exam), 3.25 college cumulative grade point average (a 90 overall high school average may be substituted), 1270 combined reading/writing and math SAT, and/or a current member of Phi Theta Kappa in good standing.

International Merit Scholarship - Awards up to $3,000 to international students who meet two of the following four criteria: 195 TOEFL exam score (71 on Internet-based exam, 525 on paper exam), 3.0 college cumulative grade point average (an 88 overall high school average may be substituted), 1170 combined reading/writing and math SAT, and/or a member of Phi Theta Kappa in good standing.

Eugene Jacobs Memorial Educational Foundation Endowed Scholarship - $1,000 awarded to student enrolling in a baccalaureate degree program; student must have at least an 85 overall high school average through the junior year or a 3.0 cumulative grade point average to be considered.

Barbara & John Larsen Annual Scholarship for Excellence in Theater - Awarded to an incoming student who has an interest or has participated in theater or drama while in high school and will participate in the Drama Club while attending Alfred State; must have an 80 or better high school average through the end of the junior year; letter of interest should be sent to the Admissions Office by March 1.

Suzanne Malachesky Memorial Endowed Scholarship - Awarded to a commuter student enrolling in the nursing program.

Rudolf "Rudy" Mazourek Memorial Annual Scholarship - Awarded to incoming student enrolling in the autobody repair program; preference given to student from Newfield High School or another high school in Tompkins County.

Lawrence “Bud” McCarthy Educational Foundation Endowed Scholarship - $1,000 awarded to incoming student with demonstrated skills in a related technology area; students must have at least an 80 high school average through the end of their junior year to be considered.

Miller-Neveryett Memorial Endowed Scholarship - Awarded to an academically talented student who demonstrates potential for campus service as evidenced by previous involvement in organizations and activities; letter of interest should be sent to the Admissions Office by March 1.

Ortho-Clinical Diagnostics Endowed Scholarship - Awarded to an academically talented student entering the forensic science technology program.

Phi Theta Kappa External Transfer Scholarship - $4,000 (total value) applied to non-tuition expenses; awarded to transfer students who are members in good standing of Phi Theta Kappa and are entering a baccalaureate degree program; must provide proof of membership in Phi Theta Kappa; students who have or will earn a baccalaureate degree prior to enrolling at Alfred State are not eligible; must be accepted and provide official documentation of meeting the necessary criteria by May 1.

John Plail Work Ethic Endowed Scholarship - Awarded to student enrolling in a business program; student must have an 80 or better high school average through the end of their junior year and exhibit achievements in high school; letter of interest as well as a written document identifying student’s goals for pursuing business as a career and the importance of having a strong work ethic should be submitted to the Admissions Office by March 1.

Regional Annual and Endowed Scholarships - Awarded to academically talented incoming freshmen who reside in school districts defined as the residences of Alfred State faculty and staff.

Floyd and Eleanor Rose Endowed Scholarship - Awarded to academically talented students from Western New York and Northern Pennsylvania enrolling in either the agricultural technology or building trades: building construction programs; students must have an 85 or better high school average through their junior year to be considered.

Russo Family Endowed Scholarship - Awarded to academically talented incoming students.

Shaw Family Endowed Scholarship - Awarded to an incoming freshman in an agriculture program.

Steuben Trust Company Annual Scholarship - Awarded to academically talented students from Allegany or Steuben counties enrolling in the accounting or business administration programs.

Richard D. Stillman Memorial Endowed Scholarship - Awarded to an incoming student who was a member of their high school band or choir; must have an 80 or better high school average through the end of junior year; letter of interest should be sent to the Admissions Office by March 1.

Albert and Judith Styrcula Endowed Scholarship - Awarded to academically talented students from Dundee High School or Yates County.

Robert A. Sweeney Memorial Endowed Scholarship - Awarded to a student from Steuben County enrolling in a business program.

Transfer Scholarship - $2,000 (total value) applied to non-tuition expenses; awarded to transfer students entering a baccalaureate degree program; students must have completed at least three semesters with a 3.25 cumulative GPA and demonstrate continuous full-time college attendance since high school graduation; students who have or will earn a baccalaureate degree prior to enrolling at Alfred State are not eligible; must be accepted and provide official documentation of meeting the necessary criteria by May 1.

Hank & Evelyn Turner Recruitment Annual Scholarship for Culinary Arts - Awarded to incoming students enrolling in the culinary arts and culinary arts: baking, production and management programs; applied to non-tuition expenses.

Vocational Excellence Scholarship - $2,000 (total value) awarded to first-time freshman students entering a program taught at the School of Applied Technology on the Wellsville campus; applied to non-tuition expenses; multiple scholarships available on a selective basis; to be considered, students must have...
at least an 83 high school average through the end of their junior year and demonstrate vocational excellence through a combination of education, employment/ internships, competition, C-CAP participation, military experience, and other verifiable activities; students should submit a letter to the Admissions Office indicating how they have excelled in the vocational area, as well as two letters of recommendation from qualified individuals verifying skill level by May 1.

William & Dennis Weimer Endowed Scholarship

- Awarded to student enrolling in a science based program.

Bea L. Williams Memorial Endowed Scholarship

- Awarded to students attending high school in Western Steuben County; applications available in high school guidance offices in early spring; academics as well as school and community activities will be considered in the evaluation process; applied to non-tuition expenses.

1 No scholarship application necessary.

2 No scholarship application necessary. Awarded by specific criteria. Students must have minimum high school average of 80 through end of junior year unless otherwise noted. Scholarships awarded in March.

3 Scholarship application necessary.

4 Send letter of interest and any other information as indicated to the Admissions Office. Decisions ongoing while funding exists unless otherwise indicated.

The following scholarships are awarded by the appropriate academic department to continuing Alfred State students based on performance while at Alfred State:

Allegany County School Food Service Assoc. Annual Scholarship
Will Arlow Memorial Motorsports Annual Scholarship
Dr. Khalid Ashraf Memorial Endowed Scholarship
Automotive Service Excellence (ASE) Endowed Scholarship
BP Electrical Trades Endowed Scholarship Balfour Annual Scholarship
Doug Barber Construction Management Annual Scholarship
Kathy Barnes Honorary Guardian of Nursing Annual Award

Stephens Mills Grange Endowed Scholarship
Dr. & Mrs. T (Tezak Family) Endowed Scholarship
Evelyn Turner Excellence in Culinary Arts Annual Fund
Western NY Veterinary Medical Association Annual Scholarship
Julia O. Wells Memorial Endowment Annual Scholarship
Robert Wood Freshman English & Humanities Annual Scholarship

The following scholarships are awarded by the Student Records and Financial Services Office based on financial need. There is no application process other than completing the FAFSA.

Alfred State Retirees Annual Scholarship
Alpha Sigma Sorority Annual Scholarship
Alumni Association Advancement Endowed Scholarship
Barry Brown ’64 Annual Scholarship
Delta Chi Omega Endowed Scholarship
Educational Foundation of Alfred, Inc. Endowed Fund
James G. and Marilyn A. Ferry Endowed Scholarship
Roland D. Hale Need-Based Endowed Scholarship
Hornell Association Endowed Scholarship

Scholarships are made possible by the generosity of the Alfred State Development Fund, Inc., the Educational Foundation of Alfred, Inc., the Alumni Council, private donors, and Alfred State faculty and staff.
Student Affairs

Student experiences at Alfred State are a mix of challenging academic course work and involvement in a spectrum of diverse social, recreational, and cultural activities. Alfred State recognizes that learning and growth occurs at all hours and in many places. We recognize the importance of life inside and outside of the classroom and encourage all students to attend activities and participate in the clubs and organizations that interest them. An array of activities and opportunities are available, including 17 men’s and women’s intercollegiate athletic programs, leadership positions in the college’s residence halls, intramural sports, and employment opportunities.

At Alfred State students enjoy more than 100 clubs and organizations, movies, music and comedy concerts, cultural events, a student radio station, newspaper, band, vocal music, drama, fitness centers, swimming pool, residence hall activities, and sports - intercollegiate and intramural. There’s always something to do! In fact, there are so many options, the difficulty may be deciding what to do first!

CAREER DEVELOPMENT
Career Development offers a wide variety of services for students and alumni. These services include assistance with developing career plans and goals, resume development and critique, job/internships, interview preparation, mock interviewing, and a variety of classroom workshops. Career Development provides and maintains four major online branded services: JobLink (job postings for on-campus jobs, work study, internships and FT career jobs; on-campus recruitment; career fairs), OptimalResume (online resume, portfolio and website builder, interview prep), and CandidCareer (thousands of videos to help learn about different career paths and also videos to prepare for a successful job search and career). In addition to maintaining hundreds of job postings for full-time, part-time, and summer employment, Career Development also organizes and facilitates four to five career fairs each year.

STUDENT DISABILITY SERVICES
Academic and nonacademic assistance is provided to students with self-identified disabilities (permanent or temporary) who have provided appropriate documentation to the Office of Student Disabilities Services (Hunter Student Development Center, Alfred campus; Pioneer Student Union, Wellsville campus).

Academic services may include faculty conferencing, tutoring referrals, assistive technology, note takers, and testing accommodations. Non-academic services may include residence hall accommodations and agency referrals. Attendant care and personal assistive devices are not provided. Accommodations are decided by the counselors from Student Disabilities Services after reviewing the appropriate documentation and talking with the individual student. Please remember that self-advocacy is essential to receiving assistance.

CENTER FOR INTERCULTURAL UNITY
The Center for Intercultural Unity strives to provide an open-minded, welcoming, and safe environment for all of our Alfred State students. Through educational workshops/programs, professional trainings, advocacy and outreach, the Center for Intercultural Unity facilitates students’ self-awareness, learning, and growth regarding different cultures, viewpoints, and experiences. The center supports students in matters of academic, social, cultural, and personal well-being, and promotes all students’ understanding and appreciation of differences as well as similarities.

The Center for Intercultural Unity is committed to creating opportunities for Alfred State students to empower and educate themselves, their peers, and the community in which they live. We support and promote under-represented student organizations, including, but not limited to LGBTQ+, students of color, women, veterans and military service, international students, and faith-based groups. We are also deeply invested in the prevention, awareness, and eradication of sexual assault on college campuses and proactively provide programs, workshops, and campaigns that aim at keeping Alfred State safe from sexual violence. The Center for Intercultural Unity works closely with academic departments and Student Affairs offices on campus to create an empowering and enriching college experience here at Alfred State.

HEALTH AND WELLNESS SERVICES
Health and Wellness Centers are located on each campus. At the center, treatment of student illness, accidents, and counseling needs are provided by a doctor, mental health counselor, or registered nurse. A mandatory fee allows the student to obtain medicines and medical supplies provided by Health and Wellness Services without further cost. The Health and Wellness Services records are kept strictly confidential. Appointments can be made in person or by calling 607-587-4200. More information at: www.alfredstate.edu/student-life/health-and-wellness-services.

THE MINDSPA
This unique oasis is a quiet place for students to experience and explore on their own. Students are able to indulge in their senses, clear their minds, or simply relax and unwind while using the MindSpa. The MindSpa offers use of a full body massage chair, tea, aromatherapy, bio-feedback software, multi-spectrum light, and self-help audio library as well as many other relaxation and stress reduction aids. More information at: www.alfredstate.edu/student-life/health-and-wellness-services/mindspa.

CAMPUS SHUTTLE SERVICE
The college provides a bus service that circles the main campus continuously throughout each class day 10 minutes to the hour from 8 a.m. - 5 p.m. including traveling to the farm and Vet Tech building. The college also provides a shuttle service back and forth each day to the Wellsville campus. These buses have various morning departure times from the Alfred campus and afternoon departures from the Wellsville campus. A daily shuttle schedule is posted online for quick and easy access.

STUDENT/VISITOR MOTOR VEHICLES
All licensed motor vehicles, including automobiles, trucks, motorbikes, motorcycles, and other motor vehicles to be operated or parked on college property, must be registered at the University Police Department in the Theta Gamma house on the Alfred campus. If you are on the Wellsville campus, you must register at Student Services. Visitors must register their vehicles immediately to avoid enforcement violations. Information and assistance regarding vehicle registration can be found 24 hours a day, seven days a week at the University Police Department.

UNIVERSITY POLICE
The University Police Office is located on Lower College Drive in the Theta Gamma House on the Alfred campus. University Police is open 24 hours a day, seven days a week. University Police maintains an office in the "H" building on the Wellsville campus. The Wellsville office is staffed during the academic year Monday - Friday, 8 a.m. - 4 p.m.

Alfred State's University Police Department is a fully sworn and accredited, community-oriented and service-based police department that provides law enforcement and emergency services to all members of the Alfred State community. The University Police Department is responsible for enforcing all federal, state, and local laws on both the Alfred and Wellsville campuses.
classes are taught.

Physical education classes are also offered by the Athletic Department. Each semester, a variety of physical fitness, sport classes, and health and wellness

The Orvis Activities Center is also home to the swimming pool. Open swimming hours are also available daily for student or community use.

Alfred State has three options for students of the college, faculty/staff, and members of the community to reach their fitness goals. The Pioneer Fitness Center

The Alumnie Council exists to enhance the engagement of the college's alumni for their enjoyment through programs and services which build relationships and to

The major objectives of the Alumni Council are to:

1. Promote and increase fellowship of students and alumni of Alfred State.
2. Serve as a liaison among Alfred State, its alumni, and students in order to foster and maintain close and mutually beneficial ties.
3. Maintain and promote loyalty of the alumni of Alfred State.
4. Assist and promote the interest of Alfred State, its students, and alumni.
5. Develop programs that support the goals and objectives of the campus, including campus fundraising, in conjunction with the Office of Institutional

The Alumni Council provides a variety of programs and services to both alumni and students. Some of these include:

- Bi-annual alumni magazine
- Alumni records update service
- Annual alumni reunion – Homecoming
- Assistance with program-specific events
- Regional alumni events
- Scholarship program
- Career development assistance - posting job openings, seeking position, etc.

The Office of Alumni Relations is located on the Alfred campus in the Van Hall Alumni House. For additional information related to the above programs, please stop in, call 607-587-3931, or forward an email message to alumni@alfredstate.edu.

The libraries on the Alfred and Wellsville campuses are strongly committed to serving the information and research needs of students and faculty. The collections on both campuses encompass materials in a variety of formats - electronic, print, and visual media. To access the libraries' holdings, visit the library website at www.alfredstate.edu/hinkle-library. Materials not available locally may be requested through the interlibrary loan service.

The Walter C. Hinkle Memorial Library on the Alfred campus houses a collection of approximately 52,200 book volumes and 3,300 video titles and has print subscriptions to 12 newspapers and some 140 journals and magazines. The Wellsville campus library holds about 3,000 volumes, 30 current journal titles, and four daily newspapers. The library contains an extensive collection of automotive manuals in print and microfiche, as well as materials in a variety of audiovisual formats. Students and faculty on both campuses have access to more than 73,200 electronic journals and magazines available from 110 online databases. A good number of these are provided through SUNY Connect, an initiative to share library collections and services across most of the 64 SUNY campuses.

Also located in the Hinkle Library is the Jean B. Lang Western New York Historical Collection, a unique repository of historical and genealogical materials that focuses on Alfred, Allegany County, and western New York State. Both the Alfred and Wellsville campus libraries provide public access computers and printers. Laptop users in Alfred may take advantage of the wireless connectivity in the library, using their own laptops or those available for loan. Both the Alfred and Wellsville campus libraries are accessible to those with disabilities, and are open to the general public at no charge.

ATHLETICS, RECREATION, AND PHYSICAL EDUCATION

Alfred State Athletics offers intercollegiate sports and has great facilities for exercise or a quick game of pick-up. Whether you want to compete or just stay in shape, Alfred State has something for all Pioneers.

The Athletic Department sponsors 17 NCAA Division III intercollegiate varsity sports:

Women's sports: Basketball, Cross Country, Soccer, Softball, Swimming, Track & Field (Indoor/Outdoor), and Volleyball

Men's sports: Baseball, Basketball, Cross Country, Football, Soccer, Swimming, Track & Field (Indoor & Outdoor), and Wrestling

Alfred State is a NCAA Division III member; therefore, no consideration of athletic ability or athletic accomplishments will be considered in determining students' sponsorship eligibility or financial aid packages. With the move to NCAA, incoming first-year students who wish to participate in intercollegiate athletics must be admitted into a four-year program or have a 75 or 2.1/4.0 high school average and an 800 combined reading/writing and math SAT or a 14 composite ACT to be immediately eligible their first semester. Incoming transfer students who wish to participate in intercollegiate athletics must have a 2.0 cumulative GPA for consideration. Continuing students must achieve good standing and progress toward a degree to continue competition.

Alfred State has three options for students of the college, faculty/staff, and members of the community to reach their fitness goals. The Pioneer Fitness Center located in the Pioneer Center houses cardiovascular equipment, resistive weight equipment, and a free weight area while the Orvis Strength and Conditioning Room houses free weights and power racks. The MacKenzie Fitness Center also houses cardiovascular equipment. Managed by a full-time certified director, the centers are staffed at all times to ensure a safe and effective workout for all participants regardless of fitness level.

The Orvis Activities Center is also home to the swimming pool. Open swimming hours are also available daily for student or community use.

Physical education classes are also offered by the Athletic Department. Each semester, a variety of physical fitness, sport classes, and health and wellness classes are taught.
PERFORMING ARTS
Performing Arts at Alfred State has a long and successful history. Students have the opportunity to engage their talents in drama, instrumental music, and vocal music organizations. Each student brings unique experiences and ideas to the club, building an exciting and ever-evolving creative atmosphere. As student-run organizations, there are many opportunities to contribute to each group and to experience first-hand the rewards of your involvement and contributions.

Within each group you can find multiple ways to participate in college and community events. Members of Drama Club may participate as actors, actresses, stage managers, and technical theatre designers and operators, to name a few. Vocalists have the opportunity to participate in a large choral group setting or in a...
smaller individual setting, as well as an a capella ensemble. Instrumental music allows instrumentalists to perform in concert, jazz, brass, woodwind, percussion, and pep ensembles.

PIONEER STUDENT UNION - WELLSVILLE

The Pioneer Student Union (PSU) is a space that allows for recreation, socialization, and an opportunity for students to benefit from professional resources located within the building. Activity options available to students include: billiards, ping pong, shuffleboard, foosball, horseshoes, and many other games. There are also opportunities to improve physical and mental well-being, as the building houses a full gymnasium with six basketball hoops, a racquetball court, and weight room.

The MindSpa in PSU is a space solely dedicated to stress reduction. The spa allows for quiet relaxation in a room equipped with massage chairs and other calming amenities. Also at the PSU, students may seek out medical attention or be connected with counseling services, as the Health and Wellness Services Office is located on the first floor of the building. In addition to services housed within the PSU, professional staff there are able to provide students with linkage and referral to any of the other offices located in Wellsville or Alfred based on the needs of the student.

Students may also use the PSU as a quiet study space, as there is a separate computer lab with network-connected computer stations. The Pioneer Student Union is utilized by students across all majors on the Wellsville campus and serves as a space dedicated to providing experiences guided by Alfred State Student Affairs initiatives.

RESIDENTIAL LIFE

Residential Life believes that a student’s residence hall experience should be as individually suited to the student's needs and interests as possible. On this basis, Alfred State offers a lifestyle approach to residence hall living. Within the limits of college policy, various lifestyle areas are offered, and students may choose the area which best suits them. The following styles are located in designated areas of certain residence halls:

- **No Smoking** – All of our residential facilities are smoke-free.

- **21 and Over Lifestyle** – A student must be 21 or older at the beginning of the academic year. This lifestyle option is available in select areas.

- **24 and Over Lifestyle** – This lifestyle option was created to address the special needs of nontraditional students, e.g., self-governed quiet hours and the ability to stay in the residence hall during breaks. Available in select areas within Main Gate B only.

- **Affinity Housing** – Members of recognized clubs/organizations and athletic teams will be provided preference during returning student housing sign-ups to live together in the suite-style housing within the Townhouses, MacKenzie Complex, Main Gate A, and Main Gate B.

- **Baccalaureate Lifestyle** – Available in Peet Hall only. This lifestyle option provides an opportunity for students in the baccalaureate programs to reside together.

- **First-Year Housing** – First-year students can live in any building other than the MacKenzie Commons Apartments and The Townhouses. Braddon Hall, Burdick Hall, and Shults Hall house only first-year students.

- **Gender Inclusive Housing** – This option allows individuals who are not the same gender, who may identify outside the gender binary (male or female), who may be questioning aspects of their sexuality/gender, or who may be in the process of (or completed) a gender transition, to live in an environment that is safe and supportive. This living space, open to the entire campus community, is requested through an application process (password required), and selected on a yearly basis by a committee dedicated to the oversight of that community.

- **Substance-free Lifestyle** – This lifestyle is designed for the student interested in living within a tobacco-free and alcohol-free area. All guests and visitors are also required to abide by the substance-free lifestyle while visiting the area. Each student signs a contract pledging to remain substance free while living in this area. If you are not committed to the restrictions, this lifestyle is not for you.

- **Quiet Study** – Members of this lifestyle all agree to uphold mandatory 24-hour quiet hours. Television and music are allowed in this area, but must be kept at a minimal and respectful volume. This lifestyle is available in certain suite-style and corridor-style residence halls.

- **Townhouse Style Living** – Apartment-style living for sophomores, juniors, and seniors. Services available in the residence halls include laundry and vending machines, kitchenette, study areas, and computer labs.

Our five Living Learning Communities:

**Architectural Living and Learning Community (ALLC)** – Baccalaureate architecture students can study, live, work, and engage with their faculty, all in their own residence hall (Peet Hall). The ALLC provides access to architecture work labs, study space, and a gallery.

**Creative House, LLC (DLC)** – Designed specifically for students in the digital media and animation or graphic and media design programs, this Living Learning Community (LLC) features studio workspaces for its residents. Students live and learn with like-minded colleagues in a space made for productive and creative collaboration. With large screen monitors, a production studio, a space to screen work, and other extras, students who live in the Creative House LLC are prepared to hit the ground running on their creative projects. [Submit your application online.](#)

**Nursing Living Learning Community (NLLC)** – First-year nursing students have the opportunity to become part of a community within Burdick Hall dedicated to helping new students transition into the nursing curriculum. In addition to participating in a cohort seminar led by nursing faculty within their residence hall, the NLLC provides an atmosphere with enhanced opportunities to learn from and connect with their faculty.

**PROUD Living Learning Community** – The PROUD Living Learning Community is designed to assist underrepresented minority students with their transition into college. Through programming, academic labs, tutoring, and peer mentorship, first-year students will get the boost needed to succeed in their first year of college. If you’re interested in living in this community, [submit an online form](#) (use your Alfred State username and password to login).

**Summer Prep Academy Living and Learning Community (SPA)** – Students accepted into the EOP program will attend Summer Prep Academy four weeks throughout July and August. These first-year students will have the option of remaining in their summer housing building without the stress of relocating to another residence hall room for the fall semester. The SPA Living Learning Community will allow SPA students to continue to live with their EOP cohort and maintain regular contact with their summer SPA mentors throughout the academic year.
ON-CAMPUS HOUSING REQUIREMENTS/CAMPUS WAIVER PROCEDURES

Be advised that a prior felony conviction may impede a student’s ability to reside in campus-administered housing. Felony conviction will be considered on an individual basis. Students may be required to submit court records and other information as required by SUNY Board of Trustees Policy to be used in assessing their eligibility for on-campus housing.

SUNY – Board of Trustees’ Policy

Every student in full-time attendance at a state-operated unit of the university, other than married students or students residing with a parent(s), shall be required to live in a residence hall maintained and operated by such a unit or to have the permission under such provisions as may be made therefore by the chief administrative officer of such unit to live off campus.

Local Campus Policies

I. WAIVERS

Any full-time student who wishes to live off campus must request a waiver of the Board of Trustees’ Policy. This waiver form is available from the Office of Residential Services and/or online. All waiver requests will be considered in accordance with the SUNY policy and the Board of Trustees’ intent to maximize the educational process. Certain conditions, if met, assure an individual of permission to live off campus. These specific exceptions are as follows:

General Eligibility:

• Married students
• Students providing direct care for a legal dependent
• Students 23 years of age or older
• Students already possessing a baccalaureate degree (reviewed for verification)
• A student residing with a parent, grandparent, or court-appointed legal guardian at that person’s permanent home address who is commuting fewer than 60 miles one way (notarized statement and supplemental statement required).
• Honorably Discharged Veterans of the US Armed Forces: DD-214 must be provided as documentation.
• Meet Academic Eligibility criteria as outlined in the policies governing waiver eligibility. *Blackboard video required
• Internship – Academic adviser confirmation required. Send email to reslife@alfredstate.edu. *Blackboard video required

Academic Eligibility: Fourth-year students in baccalaureate programs are eligible for off-campus status subject to the following minimum requirements: good academic standing with at least 90 credits and minimum cumulative grade point average of 3.0 and no current disciplinary status through the time of off-campus occupancy. Or, fifth-year students in a five-year program must be in good academic standing with at least 120 credits.

Greek Organization Eligibility: Information relative to organization eligibility is available from Residential Services and Student Engagement. Individual members of eligible Greek organizations may apply for a housing waiver if all criteria are met:

• Individual members must possess a 2.50 cumulative grade point average and a 2.50 semester grade point average (prior semester) at the time a housing waiver is requested.
• Individual members may not be on any disciplinary sanction and must have completed any special conditions as a result of a past sanction (i.e., alcohol assessment, signals, community restitution projects, etc.) at the time a housing waiver is requested.
• The organization in which they are a member maintains continuing authorization for off-campus, communal residency.

All other reasons will be reviewed according to the Reasons for Waiver stated on the form and will be considered according to uniformity and intent of the Board of Trustees’ policy. Submission of false or intentionally misleading statements may result in waiver revocation, campus disciplinary sanctions, and other penalties. All waivers are granted for the academic year or the remaining portion thereof. Each student must resubmit a waiver application each year they are in attendance.

II. DETERMINATION OF FULL-TIME STUDENT STATUS

• A full-time student is an individual enrolled for 12 or more credit hours (including credit hours added after registration day).
• Students initially registered in a part-time status who add sufficient courses to attain full-time status are subject to campus housing policies unless a waiver is approved.

III. WAIVER PROCEDURE

• Waiver processing will begin April 1 or as soon as predictable thereafter for fall semester consideration. Waiver processing will begin Nov. 1 or as soon as predictable thereafter for spring semester consideration.
• The License for Residence is a full academic year agreement and takes precedence over any waiver application. Interim requests for release are processed according to current campus policy.
• At the time a housing waiver application is submitted and approved, any predetermined housing assignment is released.
• Initial Request: Any individual who wishes to live off campus must submit their request in writing to the Office of Residential Services. The request should note the basis for requesting a waiver. If the reason is not one of the three general exceptions, a detailed explanation of the reason(s) must be included.
• Decisions based upon health or psychological grounds will be reviewed through Accommodative Housing. Any student who is requesting off-campus housing based on these grounds should provide corroborating documentation through either Health and Wellness Services or email documents to accommodativehousing@alfredstate.edu for review.
• Review: The Assistant Director of College Housing or their designee will review all requests and, with the intent of the Policy of the Board of Trustees and the stated purpose of the college policy, render a decision. This decision will be given within five (5) business days, when possible. Note: Missing documentation will delay processing.
• Appeal: A denied waiver may be appealed to the Senior Director of Residential Services. The appeal must be in writing and address the reason(s) given for the denial of the initial request. The appeal must be sent within five (5) business days of receipt of the initial decision.
• Appeal Decision: All appeals will be reviewed in accordance with the intent of the Policy of the Board of Trustees and the stated purpose of the college policy. A written decision will be given within five (5) business days, when possible. There is no appeal of the Senior Director's decision.
STUDENT LEADERSHIP CENTER

The Student Leadership Center serves as a comprehensive, centralized connection point for students, staff, and faculty to access leadership opportunities on campus and in the greater Alfred community. The Student Leadership Center, located in the center of campus, is the premier place for students to gather throughout the day in a "one-of-a-kind" designed space. The Student Leadership Center places every student who enters the facility in the middle of a hub of activity that allows students from different majors, ages, and different levels of community involvement to be in direct contact with each other; an "in your face" flavor of student engagement. The Alfred State leadership experience is an interactive process that develops students who are committed to lifelong learning, community engagement, and having a positive impact on the Alfred State campus and in the greater community and beyond. We believe that every student has the potential and the capacity to serve their community through civic engagement.

WEEK OF WELCOME

Each August, new students arrive on campus up to a week before classes begin. Here at Alfred State, we can't wait to welcome them to campus with a week just for them! WOW is a week designed with new students in mind; we want this time to be fun and engaging, and more than anything, we want to help students feel at home. For more information on New Student Orientation, please visit www.alfredstate.edu/new-student-orientation.
Academic Information

Alfred State offers more than 80 majors in programs based in the arts and sciences, applied technology, and management and engineering technology.

Administratively, the college is broken down into three schools:

- School of Arts & Sciences
- School of Architecture, Management & Engineering Technology
- School of Applied Technology

Faculty and staff focus on programs within their areas of expertise. Depending on the major, each student will find most courses taught within a particular area of study. However, most students will also be required to take some courses within other disciplines.

INTERNSHIPS AND CAREER DEVELOPMENT

The time to begin thinking about your career is in your freshman year! Career development assistance begins with the identification of career goals and the development of a plan to meet those goals. Plans frequently include résumé assistance, identification of available experiential education opportunities, individual employment/career counseling, interview preparation, and workshops.

Students have the opportunity to meet with employers at fall and spring career fairs, information sessions, and on-campus interviews.

Job opportunities are posted daily for current students and alumni on the Career Development webpage.

ACADEMIC MINORS

An academic minor at Alfred State is an optional program of study available to matriculated baccalaureate students. A minor may be used to complement the major course of study, broaden and enhance career opportunities, gain expertise in an area of interdisciplinary studies, or provide an in-depth study in a subject of special interest.

A minor is described as a thematically related set of academic courses, consisting of no fewer than 15 credit hours. A minor will be officially recorded on the transcript when a student has satisfied all requirements for the major baccalaureate program and the minor, and has attained a 2.50 grade point average in the courses approved for the minor.

General Considerations: Minors will likely require courses taken in sequence, and may necessitate student planning within their first year. Financial Aid Considerations: The State of New York does not allow students to use courses that only apply to a minor to meet the 12 credit financial aid eligibility requirement. If a course applies both to the minor and meets a degree requirement (such as an elective), financial aid can be used. Minor courses can fill General Education, LAS and elective requirements within a degree program.

Alfred State has three types of minors including Field of Study, Interdisciplinary, and Program Specific.

Field of Study Minors
Field of Study minors allow students to complete a course of study in an additional content area of specialization. The course of study is primarily within a single department but may include closely related courses from another department.

Field of Study minors include:

- Animation, applications software development, business administration, computer technology, construction management, criminal justice, GIS (geographic information systems), graphic design, history, information security, information technology, interactive design, logistics and supply chain management, mathematics, media production, network administration, psychology, surveying, and web development.

Interdisciplinary Minors
These minors are developed to focus on contemporary areas of interest that will enhance students’ understanding of the world and their effectiveness in their future professional lives. These minors are usually designed by a committee of interested faculty and are often multi/interdisciplinary in scope combining courses from multiple departments. The courses in these minors may be General Education and LAS courses. Global studies is an interdisciplinary minor.

Program Specific Minors
These minors are limited to students within a specific degree program due to pre-requisite requirements for courses within the minor. The course of study can be within a single department or split between departments with the intention of allowing students within a program to demonstrate specialization in an area that enhances their degree. These minors often overlap one or more courses with a student’s core curriculum. The program specific minors include interior design.

Students wishing to pursue minors should first discuss options with their advisers and meet with the department chair where the minor resides to determine specific course requirements. Students must apply for minors on degree application forms.

EMPLOYMENT AND CONTINUING EDUCATION

The Career Development Office surveyed the 934 members of the May 2019 graduating class. A 72 percent college-wide response was realized from the survey. Alfred State Technology Services generated the statistical information utilized in the preparation of this report in May 2020:

- 73 percent employed after graduation
- 95 percent employed in their field of study
- 25 percent continued their education
- Combined employment and continuing education rate of 98 percent

CROSS-REGISTRATION

Under the SUNY policy on cross-registration and agreements with Rochester Area Colleges and Western New York Consortium, matriculated and full-time (12 credit or more) Alfred State students may take up to six credits a semester at a member institution. Students interested in cross-registration must seek the approval of their academic adviser before entering the program. Registration begins on the opening day of the term at the host institution and is on a space-available basis. Cross-registration forms are available in the Student Records and Financial Services Office.
COURSE CANCELLATION POLICY
Alfred State reserves the right to cancel any course without prior notice due to insufficient enrollment or unforeseen circumstances.

STUDENTS UNABLE TO ATTEND CLASSES
1. No person shall be expelled from or be refused admission as a student for the reason that he or she is unable, because of religious beliefs, to attend classes or to participate in any examination, study or work requirements on a particular day or days.
2. Any student who is unable, because of religious beliefs, to attend classes on a particular day or days shall, because of such absence on the particular day or days, be excused from any examination or any study or work requirements.
3. It shall be the responsibility of the faculty and of the administrative officials to make available to each student who is absent from school, because of religious beliefs, an equivalent opportunity to make up any examination, study or work requirements which may have been missed because of such absence on any particular day or days. No fees of any kind shall be charged for making available to the said student such equivalent opportunity.
4. If classes, examinations, study, or work requirements are held on Friday after 4 p.m. or on Saturday, similar or makeup classes, examinations, study or work requirements shall be made available on other days, where it is possible and practicable to do so. No special fees shall be charged to the student for these classes, examinations, study, or work requirements held on other days.
5. In enforcing the provisions of this section, it shall be the duty of the faculty and administration to exercise the fullest measure of good faith. No adverse or prejudicial effects shall result to any students who avail themselves of the provisions of this section.
6. Any student who is aggrieved by the alleged failure of any faculty or administrative officials to comply in good faith with the provisions of this section shall be entitled to maintain an action or proceeding in the county Supreme Court.

LEAVE OF ABSENCE POLICIES
Students who need to interrupt their studies during a semester already in progress or for a future semester can protect their matriculated status by applying for a leave of absence for up to one year. Leaving without officially withdrawing from college will result in the student’s receiving a grade of “F” for all his/her course work and will show on the official Status Report of the college as an academic dismissal. Complete information on applying for a leave of absence can be found at my.alfredstate.edu, then go to “Services” on the Records Office webpages.

WITHDRAWALS
Students who need to withdraw from the college before the end of an academic term must officially withdraw from classes. Leaving without officially withdrawing from college will result in the student’s receiving a grade of “F” for all their course work and will show on the official Status Report of the college as an academic dismissal. Complete information on applying for a withdrawal can be found at my.alfredstate.edu, then go to “Services” on the Records Office webpages.

CURRICULUM CHANGES
Continuing students will use a Degree Program Change Form to switch from one program to another or to include or exclude previously earned credits into a new program. Once the decision has been made to change programs, students must notify both their present department chair and the department chair of the new program. Both department chairs will sign the request and the new department chair will specify which classes to exclude from the new program. Only courses not required in the new program may be excluded. General education courses cannot be excluded. The form must be received and processed by the Student Records and Financial Services Office. Students may not process a curriculum change after the fourth week of classes for the current semester. New students who wish to change their program after applying for admission but prior to enrollment must do so in writing to the Admissions Office.

COURSE AUDITING
Course auditors must secure permission to take a class from the instructor of the class. Approval forms are available from the Student Records and Financial Services Office or can be printed from our website under “Forms” at my.alfredstate.edu/enrollment-management/records-office-forms. Return the approved form to the Student Records and Financial Services Office before the last day to register.

Course auditors will be permitted to audit courses on a space-available basis. Enrolled students receiving credit will be given priority. Auditors will not be enrolled or listed in the registrar’s rosters, will attend without credit or grade, will attend without formal recognitions, and will not be required to meet the course requirements. Audited courses are not eligible for financial aid. Auditors are responsible for all associated costs of the course. A student may retake such a course for credit in a subsequent semester.

Course auditors who are currently enrolled at the college will not be charged tuition. A nonrefundable $50 registration fee will be charged to auditors who are not enrolled at the college. Special auditors, individuals over the age of 60, are invited to audit classes with no registration fees. Texts and/or class materials are at the expense of the auditor. Contact the Student Records and Financial Services Office for more information.

ADD/DROP
Students wishing to add or drop a course after the start of classes must submit the appropriate Course Change Notice form with the required signatures to the Student Records and Financial Services Office. Courses will not be dropped by simply not attending classes. Additional information may be found on the Course Change Notice form available from the student’s adviser or department chair. If classes are not added or dropped appropriately, a grade of “F” will be received for the course. Dropping below full-time enrollment may affect current or future financial aid eligibility. Contact the Student Records and Financial Services Office for details.

BANNERWEB
Alfred State student software is BannerWeb for students. Students will use this to view and update information, as well as perform a number of functions. Students can obtain instructions by going to http://web.alfredstate.edu/banweb/. Functions and information available on BannerWeb include:

- Register for classes and add or drop courses
- View/print student schedules
- Apply to graduate
- Check to see if you have registration holds
- View interim and final grades and academic standing
- View your unofficial academic transcript
- Learn the status of your financial aid award package
- Check your personal information and learn how to change it
- View bill processing information.
DEVELOPMENTAL/REMEDIAL COURSES

SUNY policy states, “Courses designated developmental/remedial shall not be awarded academic credit (noncredit) and thus cannot be applied as credit toward a college degree.”

Developmental/remedial courses and grades in such courses are designated with an asterisk (*).

STUDENT DEMOGRAPHIC INFORMATION

Students must update their personal/demographic information electronically via BannerWeb for Students. This can be done by logging into the Secure Area of BannerWeb for Students and selecting the “Personal Information” menu. If the data reflected in the Personal Information on BannerWeb is accurate, updates need not be submitted. Only inaccurate information should be updated. Information that students should check includes mailing address, telephone number, emergency contact information, and marital status. Students who wish to change their name or correct their social security number must present legal documentation to the Student Records and Financial Services Office.

GRADUATION REQUIREMENTS

Individual programs are listed in the college catalog and these listings include both the general and technical components necessary for completion of degree requirements. All programs must meet the Middle State Commission on Higher Education (MSCHE) General Education requirements and all, except the AOS, have Alfred State College minimum requirements that must be met in the Liberal Arts and Sciences. Furthermore, with the exception of AOS and AAS degree programs, all programs have specific SUNY General Education requirements. The Alfred State General Education program allows students to develop the competence and skills necessary to become civic minded, globally aware, ethical and productive employees and citizens in today’s world. The program focuses on the MSCHE general education expectations, SUNY General Education requirements, the ASC mission/ core values/principles of community, and Institutional Student Learning Outcomes embedded within each degree program. For more information regarding the specific graduation requirements for your program, contact your adviser or department chair. Further information regarding SUNY/ASC General Education requirements as well as the list of courses approved for General Education and a list of courses approved for Liberal Arts and Sciences can be found online.

In addition, all students who plan to graduate must apply for graduation online through BannerWeb or must submit a Degree Application Form to the Student Records and Financial Services Office. Online access and forms are available to all students during restricted times throughout the semester in which they expect to graduate.

Students are expected to meet regularly with their academic advisers who will assist with academic problems and monitor progress toward satisfaction of graduation requirements for the degree. Degree evaluations can be viewed within the secure area of BannerWeb for students.

It is important for students to know the current graduation requirements for their program. Per Academic Regulation 102, “Each individual student has ultimate responsibility for understanding and adhering to each of these regulations and for meeting the requirements for graduation as stated herein.” Please see Academic Regulation 200 Graduation Requirements for complete information. Further, students who readmit must comply with degree requirements at the time of readmission. Students should direct specific questions to their advisers/department chairs.

The graduation eligibility of expected graduates is checked and finalized by academic departments. Final graduation lists are submitted to the registrar by academic departments per the published End of the Semester Timetable.

ACADEMIC TRANSCRIPTS

Students planning to attend another college after leaving Alfred State must submit a signed transcript request to the Student Records and Financial Services Office. See: www.alfredstate.edu/sites/default/files/downloads/Academic_Transcript_Request_Form.pdf. Transcripts cannot be sent without the student’s written permission each time one is requested. Transcripts can be faxed upon request but are usually considered unofficial and a second one may have to be sent. Transcripts cannot be sent for students who have financial holds. See section on holds for further information.

Alfred State cannot release copies of a student’s transcript from other institutions. These must be requested from the schools previously attended.

VETERANS INFORMATION

If you are a veteran and are eligible for the GI Bill, you should apply for your benefits online through the VA website. If you do not have web access, you should contact the Student Records and Financial Services Office for a paper form. You will need to supply a copy of your DD214 or certificate of eligibility to the Student Records and Financial Services Office. Staff will then supply the Veterans’ Administration with the enrollment certification that indicates you are a student so you can receive your monthly benefits.

The following procedures to monitor attendance have been approved by the State Education Department Bureau of Veterans’ Education:

• Veterans are required to attend classes in order to receive educational benefits.
• Veterans receiving benefits must complete the VA School Certification form each semester they wish to be certified for benefits. Furthermore, veterans must contact the certifying official in the Student Records and Financial Services Office to ensure paperwork is properly completed whenever they add or drop a course, change their major, withdraw from the college, and/or are enrolled in courses that have nonpunitive grades (“S” or “U”).

RECORDS OFFICE WEBSITE

The Student Records and Financial Services Office intranet website includes:

• Academic calendar
• Schedule of classes
• Courses approved for completing general education degree requirements
• Courses approved for completing liberal arts & science degree requirements
• Final exam schedule matrix

Tutoring Services

Alfred State offers free peer tutoring services for most courses. Peer tutors are students who have earned a grade of “A” or “B” in a course and have received special training.
Professional Writing Tutor
Professional tutoring is available in writing and grammar for any course offered at Alfred State.

Math Lab
Many student proctors and members of the Math and Physics Department volunteer in the math lab.

Professional ESL Tutor
A professional ESL tutor is available on a part-time basis.

ARTICULATION AGREEMENTS
The following is a listing of agreements which exist between Alfred State and other institutions.

Note: Alfred State graduates from any two-year associate degree program (AAS, AA, AS, and AOS) may enter directly into the corresponding baccalaureate degree program or the technology management BBA degree program.

Agreements into Alfred State:

| BOCES: Albany-Schoharie-Schenectady-Saratoga | AOS-Automotive Trades | AOS-Machine Tool, Welding |
| BOCES: Albany-Schoharie-Schenectady-Saratoga | AOS-Building Trades | AOS-Electrical Construction and Maintenance Electrician |

DEAN'S LIST

To be named to the semester dean's list, a student must have taken a minimum of 12 credit hours of course work that count toward graduation requirements and have earned at least 3.5 semester index.

HONOR SOCIETIES

PHI THETA KAPPA

To qualify for membership in this international honor society, candidates must have earned at least 24 semester hours of credit at Alfred State maintaining a GPA of 3.5 or above, or a student must have earned at least 12 semester hours of credit at Alfred State maintaining a GPA of 3.75 or above.

The goal of Phi Theta Kappa is to recognize and encourage scholarship among associate degree students by providing opportunities for leadership, fellowship, and service.

Founded in 1918, Phi Theta Kappa currently numbers some 1,000 chapters worldwide. Alfred State’s chapter was chartered in spring 1991.

PSI BETA

Since 1987, Alfred State has been a charter member of Psi Beta, the National Honor Society in Psychology for Community and Junior Colleges. Annually, the Alfred State Department of Social and Behavioral Sciences has inducted members into this society, which includes more than 130 chapters and 12,000 members nationwide.

To be eligible, candidates must possess both an interest in and have completed nine credit hours in psychology (taken at Alfred State). They must also possess a 3.0 GPA in these courses and a 3.0 GPA overall. In addition, they must also have the recommendation of a Social and Behavioral Sciences faculty member. If the inductee is transferring to a four-year college that has a sister chapter of Psi Chi, the member is usually enrolled in that society with only a letter of introduction from the Psi Beta adviser.

SIGMA TAU EPSILON

To qualify for membership in this scholastic honor society, a chapter of the National Vocational Technical Honor Society, a person must be a full-time student with a 3.5 cumulative index and be enrolled in an applied technology program. Students are elected by members of the society.

TAU ALPHA PI

The Tau Alpha Pi National Honor Society was founded in 1953 and is now chartered at 133 colleges and universities. Its purpose is to recognize desirable personal and intellectual qualities of engineering technology students. Student nominees must have 30 credit hours with at least a 3.5 quality point average index in an Engineering Technology Accreditation Commission of the Accreditation Board for Engineering and Technology (ETAC/ABET) accredited program.

ROTC

The US Army ROTC program at Alfred State is an affiliate of the Seneca Battalion program headquartered at nearby St. Bonaventure University.

REGULATIONS:

• Transfer credit procedure shall be initiated in the Student Records and Financial Services Office.*
• Evaluation of transfer credit from another institution shall be made by the course discipline department chair or designated appointee.
• Credit will be given for courses passed with a grade of "C" or better. In the evaluating of transfer credit, a grade of "S" or "P" will be considered equivalent to a grade of "C".
• Credit will be given for courses passed with a grade of "C-" or better if the overall index of the courses being transferred remains at 2.0 or higher.
• Credit hours granted will be equivalent to the corresponding course hours in this college. Partial credit may be granted with the approval of the department chair in whose department the course is offered.
• Transfer credits from other institutions will not be included in the calculations of indexes.
• Evaluation of transfer credit from one major to another within the college shall be made by the department chair or designated appointee(s) in the department to which the student transfers. Grades, including "Fs", for courses that have been taken and that are required in the new program, shall be transferred as earned.
• Transfer from one program to another requires consultation with the department chair or designee of the department in which the student is registered and approval of the department chair or designee of the department to which the student wishes to transfer.
• A student may satisfy degree requirements by taking courses at another college and transferring no more than 12 credit hours within a seven-year period after leaving this college. This transfer program shall have prior written approval by the department chair. Courses transferred in this manner may replace comparable courses already taken at this college, thereby removing such courses from the calculation of index.

* The preceding rules and regulations are listed under ACADEMIC REGULATIONS-305 on the Alfred State website: www.alfredstate.edu/academics/academic-regulations.

• To receive an associate degree, at least 30 lower-division credit hours (not including challenge credit) must be completed at this college.**
• To receive a bachelor’s degree, at least 30 upper-division credit hours (not including challenge credit) must be completed at this college.***

** The preceding regulation is listed under ACADEMIC REGULATIONS-201.7 on the Alfred State website: www.alfredstate.edu/academics/academic-regulations.

TRANSFER CREDIT MANUAL

• Courses will be transferred in per the college’s Transfer Credit Manual. All courses in the manual have been evaluated by the course discipline department chair.
• Once a student’s official transcript is received, a transfer credit evaluation is completed and students are notified through their Alfred State email account as courses are transferred in. Students can also review transfer credits on their unofficial transcript in BannerWeb for students.
• The transfer evaluation of a course within a specific discipline may be changed on an individual student basis if the discipline department chair is willing to do so.
• If the discipline department chair is not willing to change the transfer evaluation of a course on an individual student basis, that student may appeal per the transfer credit appeals process found on the website.

***The preceding regulation is listed under ACADEMIC REGULATIONS-202.4 on the Alfred State website: www.alfredstate.edu/academics/academic-regulations.
ACADEMIC DEPARTMENTS BY SCHOOL

School of Arts and Sciences

Agriculture and Veterinary Technology

Dr. Philip Schroeder, Chair
Phone: 607-587-3983
Secretary Phone: 607-587-4714
Email: schroepd@alfredstate.edu

Agriculture students participate in hands-on experiences working with crops, plants, animals, facilities, and equipment. Graduates leave our programs with a true feel for the industry they plan to enter. Veterinary technology students are prepared to sit for the Veterinary Technology National Exam (VTNE) through intensive lecture and laboratory courses. Passage of this exam is required for licensure as a veterinary technician. Veterinary technology students are also required to complete a 240-hour preceptorship (work experience), which gives them real, practical experience between completing their first year and graduation. Students have many opportunities to help tell the story of agriculture at college-hosted events for elementary and high school students, educators, and the general public. Through the agricultural and veterinary technology clubs, students help organize dairy and livestock shows, consignment sales, judging competitions, agricultural skills contests, tours, and other educational events.

MISSION

The Department of Agriculture and Veterinary Technology will facilitate learning and engage communities in the practices of sustainable food production and animal welfare. We will develop graduates who will sustainably and profitably manage animals and natural resources for a secure society.

FACILITIES

- **Agriculture Science Building** – This facility contains laboratories specializing in soils, botany, and animal anatomy and physiology. A 5,300-square-foot greenhouse produces hydroponic vegetables, edible flowers, and herbs and contains a tropical room, desert room, and plant propagation areas.
- **800-acre college farm** – The farm serves as a field laboratory to provide practical instruction in production agriculture and to produce feed for the college’s livestock. It is home to registered dairy and beef herds, horses, swine, poultry, sheep, and meat goats used for instruction in animal care and management. The farm is also used for soils, botany, feeds, and nutrition, and field and forage crops classes. Students have the opportunity to work on the farm as interns. Other facilities there focus on high-tunnel vegetable production, row crop production, and agroforestry practices.
- **Center for Organic and Sustainable Agriculture (COSA)** – The center, located at the college farm, features both an organic dairy herd, with which students gain experience in management intensive grazing and a robotic milking system. Other facilities include a 300-acre farm in Sonyea, where we produce forages.
- **Veterinary Technology Center** – This state-of-the-art facility includes surgical and radiography laboratories, a classroom area for Introduction to veterinary technology, animal health care and laboratory animal management laboratories, and animal housing facilities.

DEPARTMENT PROGRAMS

- **Agricultural Automation and Robotics (AAS)**
- **Agricultural Business (AAS)**
- **Agricultural Entrepreneurship (BTech)**
- **Agricultural Technology (AAS)**
- **Veterinary Technology (AAS)**
The Allied Health Department at Alfred State provides students with a strong education in a wide range of allied health disciplines through online and on-campus curricular offerings. Allied Health consists of a diverse range of specialized occupations that fall outside the traditional medical and healthcare professions like doctors, nurses, and dentists. Some careers involve direct care of patients, usually as a member of a multidisciplinary healthcare team, and others involve office work and administration. The faculty and staff bring a plethora of industry experience from laboratories and healthcare settings to their work with students. They share the common goal of effectively delivering the practical and theoretical foundations of disciplines through a rich blend of interactive lectures, informal discussion, meaningful laboratory inquiries, and professional practice or clinical experiences. The department offers students direct use of modern laboratory/clinical equipment in real-world or simulated settings and provides the highest-level virtual laboratory experiences.

**MISSION**

Through rigorous course work, exposure to state-of-the-art equipment, and professional practice and clinical experiences, the Allied Health Department prepares students for employment or continuing education in the technical areas of healthcare.

**FACILITIES**

**Physical & Health Sciences Building** – The Allied Health Department is partially located in the recently renovated PHS Building. Four science-ready lecture rooms are on the first floor with eight laboratories found on the second and third floors. The laboratories are outfitted with state-of-the-art equipment and instrumentation, anatomic models, and the latest application software for teaching and learning.

**Agriculture Science Building** – There are two programs located in the Bethesda Foundation Imaging Suite on the third floor. The radiologic technology program laboratories are equipped with a nonenergized X-ray unit for students to learn proper patient positioning and a digital energized X-ray unit for students to acquire proper imaging skills and shielding with skeletons and pixies. The diagnostic medical sonography program's laboratory has three ultrasound units for students to obtain competency in effective scanning. Students also have access to ultrasound pathology simulation utilizing SonoSym.

The healthcare management, health information technology, and coding and reimbursement specialist curricula are completely online programs.

**DEPARTMENT PROGRAMS**

- **Coding and Reimbursement Specialist** (Certificate)
- **Diagnostic Medical Sonography** (AAS)
- **Health Information Technology** (AAS)
- **Healthcare Management** (BTech)
- **Radiologic Technology** (AAS)
The Architecture and Design Department offers a five-year first-professional Bachelor of Architecture degree (BArch) degree, a four-year Bachelor of Science degree in architectural technology, and a two-year Associate in Applied Science degree in architectural technology. These degrees are designed to serve various professional objectives for graduates entering the practice and profession of architecture. The BArch degree is the only fully accredited first professional undergraduate degree program available in the SUNY system.

The department also offers a two-year Associate of Applied Science degree in interior design which provides graduates with fundamental knowledge and skills for entry-level positions in interior design.

The department emphasizes socially responsible design for social good. This mission is enthusiastically supported by the faculty and the students.

The primary focus of our faculty is teaching – personal instruction that makes meaningful life-long connection with students – that has a powerful professional impact. Instructors bring a diverse blend of advanced architectural education, theoretical inquiry, practical experience, and professional credentials into the studio, making our faculty uniquely qualified to mentor students in design thinking, development, and production.

All aspects of design, building technology, social responsibility, and sustainability are integrated into the program through design studio which focuses on the critical examination of the built environment and the role of the architect and designer as an agent of positive change. Students engage tectonic explorations alongside Building Information Modeling software which is situated within a broader digital fabrication continuum. This multi-faceted approach encourages students to create inspiring designs that are grounded in the realities of professional practice, better preparing graduates for the demands of the profession and workplace.

An Alfred State architectural education is a powerful platform upon which to build a career. Our students participate in hands-on opportunities to examine the regional built environment and learn through civic engagement projects in each design studio, which is the cornerstone of the Alfred State experience. Students explore their social responsibility as emerging professionals – to make the world a better place through design and professional conduct – in real-world environments from rural communities in New York’s Southern Tier, across the region and the world including the department’s signature study abroad program in Sorrento, Italy and SUNY partner programs in France, Estonia, Benin, and all points in between.

MISSION
The Department of Architecture & Design at Alfred State College offers a career-focused, project-based education integrating theory and practice with a strong multidisciplinary foundation that draws upon an institutional heritage of building and technology. Emphasizing core values of leadership, professional preparedness, and work ethic, experienced faculty offer personal instruction and guidance to students as they collaborate with real people to explore real challenges across the region and beyond.

FEATURES & FACILITIES
Most departmental facilities, workshops, the MakerSpace, and all design studios are accessible 24 hours a day by secure swipecard for student convenience. Each design studio is laptop-ready, and has customizable work stations. Studios also have networked printers, desktop scanners, white marker boards, floor-to-ceiling wallmounted pin-up/display panels, flat file storage, model storage, and high-resolution digital projectors. Students also have access to the department’s MakerSpace, digital fabrication lab, Center for Architecture and Remote Sensing, interior design product library, computer lab, and architecture library, in addition to the plotter room; HOPR, soils, concrete, and material testing lab; and energy systems and HVAC&R labs, which are maintained by other departments within the school.

Please note: All students in both the architecture and interior design programs are required to purchase a computer before the beginning of the second year in addition to other equipment. Typically the costs of these purchases can be covered using financial aid. Please consult a financial aid counselor for further details. Laptop specifications are available at [http://www.alfredstate.edu/required-laptops](http://www.alfredstate.edu/required-laptops).

DEPARTMENT PROGRAMS
- Architecture (BArch)
- Architectural Technology (AAS)
- Architectural Technology (BS)
- Interior Design (AAS)
Today, more than ever, the highly skilled automotive service technician has an increasingly important role in the efficient operation of our society. The five automotive trades areas offered by the Automotive Trades Department—automotive service technician; heavy equipment, truck & diesel technician; autobody repair; motorsports technology; and motorcycle and power sports technology—prepare technicians for the ever-expanding and highly specialized trade industry.

All programs meet stringent national standards. The automotive service technician program is master certified by the National Automotive Training Educational Foundation (NATEF); the autobody repair program is Inter-Industry Conference on Automotive Collision Repair (ICAR) certified; and the heavy equipment, truck & diesel technician program is ADS affiliated, and we are a National Alternative Fuels Training Consortium training center. Automotive Service Excellence (ASE) certification and NYS inspection exams are offered on campus as well.

MISSION
Provide instruction and practical, hands-on experience, to students interested in a variety of automotive trades, including automotive service, autobody repair, truck and diesel service, and motorsports. The education acquired will prepare the student for entry-level employment. Students will be provided opportunities to maximize their individual potential and achieve a level of competence adequate to enter the automotive field and maintain gainful employment. In addition to hands-on skills, attitudes will be developed that will help enforce sound judgment, good work habits, planning and foresight, ingenuity, efficiency, and safety as they apply to the duties and skills of the trade. We will nurture an appreciation of and a desire for craftsmanship and professionalism. We will strive to instill positive attitudes of community and leadership that will carry beyond the workplace and help our students to live productively and successfully in today’s society.

FACILITIES
- **Autobody facility** – This facility on the Wellsville campus contains down-draft bake-paint booths, paint mixing room, frame-straightening machines, computerized estimating, and computerized measuring systems.
- **Automotive service facilities** – These buildings, located on the Wellsville campus, contain the latest equipment, including computerized front-end aligners, brake equipment, computerized engine analyzers, automatic transmission dynamometer and computer specification and service information terminals in all shops.
- **Heavy equipment, truck & diesel facility** – This facility, located on the Wellsville campus, is equipped with: specialized fuel injection overhauling and test lab; engine rebuilding equipment; multispeed transmission and rear axle repair area; engine tune-up area containing computer-operated late model diesel engines; handheld diagnostic scanners; and computerized specifications and service information systems.
- **Motorsports facility** – Students perform extensive hands-on work in a newly remodeled, newly equipped facility located in the village of Alfred. First-year courses are taught at the School of Applied Technology campus in Wellsville.
- **Motorcycle and Power Sports Technology facility** – Located in the village of Alfred, this facility includes hands-on laboratories, where students work on all kinds of full-size functioning vehicles, from motorcycles to jet skis.

Please refer to the most current required tool list on the Alfred State website at [www.alfredstate.edu/tool-lists](http://www.alfredstate.edu/tool-lists).

TECHNICAL STANDARDS
Applicants for all programs in the Automotive Trades Department must meet the following physical requirements:

1. Must be able to lift 50 pounds to eye level.
2. Must be able to effectively communicate with a person six (6) to ten (10) feet away.
3. Must be able to visually decipher small images on a monitor or digital display.
4. Must be able to distinguish sounds associated with mechanical failures.
5. Must be able to comprehend written information found in service repair manuals.
6. Must have a valid motor vehicle driver’s license.

Students who believe they need a reasonable accommodation to participate in this program may contact Melanie Ryan in the Office of Accessibility Services (OAS). This office may be contacted by email at DisabilityServices@alfredstate.edu or by phone at 607-587-4506. Please keep in mind that some accommodations may take time to implement, so students seeking accommodations are encouraged to contact OAS as early as possible.

DEPARTMENT PROGRAMS
- **Autobody Repair** (AOS)
- **Automotive Service Technician** (AOS)
- **Heavy Equipment, Truck & Diesel Technician** (AOS)
- **Motorcycle and Power Sports Technology** (AOS)
- **Motorsports Technology** (AOS)

REQUIRED TOOLS/EQUIPMENT
A list of required tools, equipment, PPE, etc. for all of the programs mentioned above can be found at [http://www.alfredstate.edu/admissions/accepted-students/required-tools-supplies](http://www.alfredstate.edu/admissions/accepted-students/required-tools-supplies).
The Building Trades Department is composed of four programs: building construction; heavy equipment operations; masonry; and heating, ventilation, and air conditioning. Rewarding careers in the construction industry are open to students graduating from the building trades programs. With the continual development of new building methods and materials, the craftsperson finds it necessary to keep abreast of these developments. Construction, as in many other occupations, is becoming a field of specialists. Coupled with hands-on experience working at off-campus construction sites, the programs provide the necessary theory as well as instruction in blueprint reading, cost and materials, estimating, safety, and the use of newly developed equipment and materials.

**MISSION**

Educate students, to meet the changing needs of the construction industry by using real-world projects and utilizing the most up-to-date equipment, systems, and materials. We strive to improve the lives of our graduates by incorporating work ethics, communication skills, and developing leadership as part of their training.

**FACILITIES**

The 30,000-square-foot Workforce Development Center serves as a resource for each of the four programs within the Building Trades Department and was built specifically to support the construction industry demand for Alfred State's skilled trade graduates. Enhancing the facility are student learning projects and hands-on applications of student work that have been integrated as part of the facility. These projects serve as a showpiece and testimonial to the high level of education students receive. The program serves students with nearly every power and hand construction tool available to instruct students in every phase of the construction trade. All students participate in off-campus construction of full-scale homes and building renovations each year. This experience provides graduates with significant real-world training to apply concepts learned in the classroom.

**TECHNICAL STANDARDS**

Applicants in the Building Trades Department programs must be able to meet the following physical requirements:

1. Must be able to lift 50 pounds to shoulder height.
2. Must be able to perform safely in the laboratory.
3. Must be able to effectively communicate with a person 20 feet away.
4. Must be able to climb a ladder and/or able to climb, un-aided, onto and off equipment using three points of contact.
5. Must be able to safely respond to a backup warning alarm.

Students who believe they need a reasonable accommodation to participate in this program may contact Melanie Ryan in the Office of Accessibility Services (OAS). This office may be contacted by email at DisabilityServices@alfredstate.edu or by phone at 607-587-4506. Please keep in mind that some accommodations may take time to implement, so students seeking accommodations are encouraged to contact OAS as early as possible.

Please refer to the most current required tool list on the Alfred State website at www.alfredstate.edu/tool-lists.

**DEPARTMENT PROGRAMS**

- Building Trades: Building Construction (AOS)
- Heating, Ventilation, and Air Conditioning (AOS)
- Heavy Equipment Operations (AOS)
- Masonry (AOS)

**REQUIRED TOOLS/EQUIPMENT**

A list of required tools, equipment, PPE, etc. for all of the programs mentioned above can be found at http://www.alfredstate.edu/admissions/accepted-students/required-tools-supplies.
The department offers 10 programs for students desiring immediate employment, wishing to pursue a four-year degree, or looking to continue on with graduate studies. Courses during the first year in virtually all business programs are almost identical. This core block of courses enables students, during freshman year, to easily transfer from one business program to another with no loss of academic credit. Students may enter the programs in either the fall or spring semesters.

Technical accounting knowledge, communication and interpersonal skills, and career-related computer literacy are stressed throughout the programs. Many associate degree graduates go on to pursue bachelor’s degrees in business or business education, while graduates of the Bachelor of Business Administration (BBA) programs often go on to pursue master's degrees. Students completing virtually any Business Department two-year degree may easily transfer into one of our own bachelor’s degree programs. Students in technology management, financial planning, or sport management (BBA) programs also have the advantage of participating in a semester-long, 12-credit internship during their last semester.

The Business Department at SUNY College of Technology at Alfred has received specialized accreditation for its business programs through the International Accreditation Council for Business Education (IACBE) located at 11374 Strang Line Road in Lenexa, KS, USA. https://iacbe.org/memberpdf/SUNYAlfredStateCollege.pdf. For a list of accredited programs click here.

MISSION
Our faculty employ their real-world experiences to lead, motivate, and empower students to succeed in all aspects of business and life, and to positively impact their communities, as well as their respective disciplines.

FACILITIES
- High-tech classrooms – These settings are equipped with up-to-date electronic equipment. Computer technology has been integrated into course content.
- Court and realtime reporting laboratory – This lab is equipped with computer-aided translation equipment at every student workstation. All students receive hands-on instruction using computer-aided translation (CAT) equipment. This real-time translation skill enables the graduate to take advantage of closed-captioning employment opportunities.

DEPARTMENT PROGRAMS
- Accounting (AAS)
- Business Administration (AS)
- Business Administration (BBA)
- Court and Realtime Reporting (AAS)
- Court Reporting and Captioning (Certificate)
- Financial Planning (BBA)
- Marketing (AAS)
- Sport Management (AS)
- Sport Management (BBA)
- Technology Management (BBA)
Civil Engineering Technology
Erin Vitale, Chair

Fax: 607-587-4620
Secretary Phone: 607-587-4617
Email: vitaleem@alfredstate.edu

The Civil Engineering Technology Department offers a bachelor’s degree program in construction management, a Bachelor of Technology degree program in construction supervision, as well as an associate degree program in construction engineering technology. Additionally, it offers an associate in surveying engineering technology and a bachelor’s in surveying and geomatics engineering technology.

MISSION
Provide graduates with the skills necessary to have a successful career in their chosen field, have a better understanding of the world we live in, and improve their own lives.

FACILITIES
- Construction management laboratory – This lab is equipped with 20 computer work stations in conjunction with appropriate estimating software to digitize quantities from drawings and work up estimates electronically. Software commonly used for project scheduling and planning is also used to develop CPM charts. Construction project administration software is also used in this lab.
- Soils, concrete, and material testing laboratory – This lab provides a meaningful experience in laboratory and field testing of various construction materials and structural systems. The equipment enables students to learn procedures that meet recognized field testing procedures of the American Concrete Institute (ACI), the American Society for Testing and Materials (ASTM), and NYS Asphalt Testing Certification.
- Surveying computations laboratory – The surveying computations lab contains work stations, digitizers, and overhead projection systems. It is designed to support the ‘field-to-finish’ concept of surveying data collection, data reduction, and analysis, as well as computer-aided drafting and design. Students use this facility to work with land development and design software, geographic information system software, and the reduction of satellite data. This lab enables students to do word processing, spreadsheet analysis, programming, data analysis, networked computer-aided design and drafting, and advanced 3-D modeling.
- Surveying laboratory and equipment room – The surveying lab serves as the basic laboratory/lecture area for surveying field/design projects. Adjacent to this lab is the room housing a myriad of equipment, including electronic total stations, global positioning satellite equipment, theodolites, transits, and levels.

Please note: Students are required to have laptops. The laptops allow students wireless access to the college network from any location on campus.

DEPARTMENT PROGRAMS
Construction Engineering Technology (AAS)
Construction Management (BS)
Construction Supervision (BTech)
Surveying Engineering Technology (AAS)
Surveying and Geomatics Engineering Technology (BS)
The Computer and Information Technology Department offers associate degrees in computer information systems and computer science. Students who earn the computer information systems degree may continue in any of the department's four Bachelor of Technology (BTech) degree programs. The computer science degree program is primarily designed to allow students to transfer into a college that offers a Bachelor of Science degree program in computer science; however, after completing their first year of study, computer science students have the opportunity to transfer into either our computer information systems AAS degree or one of our four BTech degrees.

The department offers four Bachelor of Technology degree programs in network administration, applications software development, web development, and cyber security. Students may enter these programs as freshmen or transfer in as juniors from related associate degree programs. Articulation agreements have been developed with several community colleges to facilitate transfers. All of our degree programs provide our students with a solid foundation in the four core areas of information technology: application programming, web programming, network administration, and information security. At the end of their sophomore year, students are then allowed to select the BTech degree that best matches their academic interests. Our degrees incorporate the latest technology, including mobile application development, secure software development, life cycle processes, cloud computing, wireless networking, and neural programming. Our programs also stress the soft skills necessary in the working environment by requiring students to take courses in business management, technical writing, speech, business communications, project management, and business accounting.

MISSION
Provide training and education in the use of computers and computational techniques for associate and bachelor's degree programs. Technical and professional education is provided with dynamic, up-to-date topics and hardware for the rapidly changing needs of an increasingly technological society.

FACILITIES
- **Laboratories** - Students are allowed 24-hour access to labs equipped with state-of-the-art software and hardware. Our laboratories provide students with ample hands-on experience, giving them a considerable edge in the highly competitive computer and information technology job market. Our labs are constantly being updated to keep current with advancing technology.
- **Software, certifications, licenses, etc.** - The college has academic licenses for VMWare software products, all Microsoft software, a blade server with 128 gigabytes of RAM and a 12-terabyte storage array, a Cisco Certified Academy, three Cisco-certified instructors, Cisco Adaptive Security firewalls, Juniper application firewalls, Juniper routers, Juniper SSL VPN concentrators and an Oracle blade server, a certified Juniper academy and VMWare IT academy, an academic license with Oracle, Adobe Creative Suite 6.0, a dedicated systems lab used for microcomputer configuration, and a Pearson VUE, Prometric and Certified Internet Web Professional certification testing center.

Please note: All entering students are required to purchase a laptop computer. The laptop enables students to have access to program-specific software via the wireless network on campus.

DEPARTMENT PROGRAMS
- **Computer Information Systems** (AAS)
- **Computer Science** (AS)
- **Cyber Security** (BTech)
- **Information Technology: Applications Software Development** (BTech)
- **Information Technology: Network Administration** (BTech)
- **Information Technology: Web Development** (BTech)
The culinary industry offers a wide range of career opportunities; the list is endless, from health care to management positions in large companies. The department includes two programs: culinary arts - focusing on food production and management; and baking, production and management - focusing on retail baking production. The department also offers a three-year dual degree program, along with an opportunity to obtain a baccalaureate degree in technology management in the following two years.

**MISSION**
The Culinary Arts Department is focused on developing skills needed for competent culinary professionals for an evolving industry.

**TECHNICAL STANDARDS**
Applicants to the Culinary Arts Department programs must meet the following curriculum requirements:

1. Perform all lab functions.
2. Capability to lift 50 pounds.
3. Identify degree of product doneness.
4. Operate all kitchen equipment, including knives.

Students who believe they need a reasonable accommodation to participate in this program may contact Melanie Ryan in the Office of Accessibility Services (OAS). This office may be contacted by email at DisabilityServices@alfredstate.edu or by phone at 607-587-4506. Please keep in mind that some accommodations may take time to implement, so students seeking accommodations are encouraged to contact OAS as early as possible.

Please refer to the most current required uniform list on the Alfred State website at www.alfredstate.edu/tool-lists.

**FACILITIES**
- **Production lab** – This lab gives students the opportunity to learn quantity food production and service through the preparation and service of 700 institutional meals for customers daily.
- **The Refinery Restaurant lab** – A well-equipped dining room and kitchen, this lab has virtually all the equipment used in commercial restaurants. Students prepare and serve meals to order for patrons daily.
- **Bakery lab** – This is reputed to be the best-equipped training facility of its kind in the state. The student has access to many types of baking equipment used commercially to produce baked goods for the Wellsville campus student dining hall (The Rig) and The Refinery Restaurant. Students produce baked goods in freshman and senior labs, which are sold and served to many. In addition, the preparation and presentation of elaborate creations, common in upscale restaurants, offers students the opportunity to develop their talents.

**DEPARTMENT PROGRAMS**
- Culinary Arts (AOS)
- Culinary Arts: Baking, Production & Management (AOS)

**REQUIRED TOOLS/EQUIPMENT**
A list of required tools, equipment, PPE, etc. for all of the programs mentioned above can be found at [http://www.alfredstate.edu/admissions/accepted-students/required-tools-supplies](http://www.alfredstate.edu/admissions/accepted-students/required-tools-supplies).
The Digital Media and Animation Department offers Associate of Applied Science and Bachelor of Science degrees in digital media and animation, Associate of Science and Bachelor of Science degrees in graphic and media design, and Associate of Science and Bachelor of Science degrees in game and interactive design.

**MISSION**

Prepares graduates for immediate employment or continued educational opportunities in a range of design and technology-related disciplines. The department provides quality technical education that integrates theory and practice with a foundation in the arts and sciences.

**FACILITIES**

- **Studios** – Students in DMA programs have access to a large traditional studio space for foundations in traditional materials, figure drawing, and 2D and 3D design. They also have access to a highly sophisticated computer lab that provides industry-standard capability in 2D graphics, web design, interactive media, motion graphics, 2D and 3D animation, screen printing, large format printing, laser engraving/cutting, and 3D printing. Students enrolled in a DMA degree program have 24-hour access to these studios.
- **Video and sound production studio** – This studio contains industry-standard hardware and software.
- **Virtual reality and 3D sculpting studio** – This studio utilizes the latest virtual reality technology for interactive design and 3D modeling.
- **Other equipment and software** – Digital cameras, production light kits, microphones, digital audio recorders, HD video cameras, drawing tablets, and other pieces of high-end equipment are available for students to sign out.

Please note: All entering students in the Digital Media and Animation Department programs are required to purchase a laptop computer.

**DEPARTMENT PROGRAMS**

- Digital Media and Animation (AAS)
- Digital Media and Animation (BS)
- Game and Interactive Design (AS)
- Game and Interactive Design (BS)
- Graphic and Media Design (AS)
- Graphic and Media Design (BS)
Electrical, Machine Tool, and Welding Technology

Bradley Thompson, Chair
Phone: 607-587-3123
Secretary Phone: 607-587-3115
Email: thompsbj@alfredstate.edu

From electrical contractors to welders and machine tool operators, Alfred State offers a variety of programs that prepare students to launch careers in high-demand professions. Each program provides 1,800 hours of related course work, theory, and hands-on practice, providing graduates with the necessary skills to be successful in these dynamic fields.

ELECTRICAL CONSTRUCTION & MAINTENANCE ELECTRICIAN PROGRAM

The hands-on electrical training provided in the freshman year consists of actual wiring projects off campus, as well as residential wiring projects in our laboratories. Our senior electrical students receive real-life experiences working with the campus maintenance department, trouble-shooting campus equipment, rewiring existing facilities, and designing and installing the electrical systems in the new facilities. Seniors also will design and install photovoltaic systems and wind turbine systems. They will work in the laboratories designing and installing automated projects (incorporating relay logic), PLCs, pneumatics, hydraulics, process control systems, three-phase transformer systems, industrial distribution, and motor theory and repair. All of the freshmen and senior students will utilize the National Electrical Code.

MISSION FOR ELECTRICAL CONSTRUCTION & MAINTENANCE ELECTRICIAN

Educate and instill in our students within a two-year time frame all of the information necessary to be successful in the electrical trades. This includes interpreting and understanding the National Electrical Code, electrical theory, mathematics, electrical nomenclature, wiring methods, and troubleshooting as it applies to residential, commercial, industrial wiring, and sustainable electrical systems. This also includes the necessity to work safely, be responsible, be dependable, and take pride in their craftsmanship.

TECHNICAL STANDARDS FOR THE ELECTRICAL CONSTRUCTION & MAINTENANCE ELECTRICIAN PROGRAM

Math sequence I & II recommended for all programs, plus the following requirements:

1. Must be able to visually translate information on analog or digital meters and other test equipment.
2. Must be able to lift 50 pounds to eye level.
3. Must be able to communicate orally with a person 6 to 10 feet away.
4. Must be able to read and decipher information found in technical manuals.
5. Must be able to adhere to and perform all safety requirements.

MISSION FOR WELDING AND MACHINE TOOL TECHNICIAN

Strive to provide employers with entry-level technicians who are capable of functioning in and adapting to a rapidly changing environment.

TECHNICAL STANDARDS FOR WELDING & MACHINE TOOL

1. Must be able to perform safely in the shop.
2. Must be able to lift 50 pounds to eye level.
3. Must be able to communicate orally with a person between 6 and 10 feet away.
4. Must be able to visually decipher an oscilloscope monitor and digital/analog meter, and scan tool displays.
5. Must be able to diagnose mechanical failures that are distinguished audibly.
6. Must be able to understand and retain information found in service manuals and use diagnostic flow charts.
7. Must be able to visually read an LCD display on welding equipment.
8. Must have dexterity and mobility to weld in all the welding positions to meet all requirements.
9. Good eyesight is recommended.
10. Must be able to stand for long periods of time.

DEPARTMENT FACILITIES

- Electrical Trades Labs - Our electrical trades laboratories are well equipped with the latest in electrical test equipment. Students will facilitate learning by direct hands-on applications of the theory, knowledge, and skills presented in lecture. In this program, approximately 50 percent or more of each day is spent working hands on in the laboratory or at a job site. Computer technology has been integrated into all of the courses.
- Machine Tool Labs - The first-year lab is equipped with lathes, mills, shapers, grinders, etc., and appropriate tools acquired from a $1 million grant from the Gleason Foundation. In the second year of the machine tool technology program, learning takes place in a state-of-the-art laboratory, where students are instructed in the use of multiple CNC machines that expand their experience to best prepare them for the manufacturing shop environment.
- Sustainable Advanced Manufacturing Center - This $5 million, 16,000 square-foot facility houses freshman and senior welding students and senior machine tool technology students, who train for in-demand jobs, while learning state-of-the-art sustainable practices in advanced manufacturing through more efficient processes. The building includes classrooms, a computer lab, a welding booth shop, a welding fabrication shop, material handling and preparation space, a CNC machine shop, and metrology and inspection space.

Please refer to the most current required tool list on the Alfred State website at www.alfredstate.edu/tool-lists.

DEPARTMENT PROGRAMS

Electrical Construction and Maintenance Electrician (AOS)  Machine Tool Technology (AOS)  Welding Technology (AOS)

REQUIRED TOOLS/EQUIPMENT

A list of required tools, equipment, PPE, etc. for all of the programs mentioned above can be found at http://www.alfredstate.edu/admissions/accepted-students/required-tools-supplies.
The English and Humanities Department offers courses in composition, foreign language, fine art, speech, philosophy, and literature for the entire college. Colleges, universities, and large corporations have been increasingly emphasizing the significance of a liberal arts and sciences education in providing a solid foundation upon which careers are built. The liberal arts and sciences: humanities program prepares students for life by stressing the importance of reading, writing, and thinking, while developing in them an appreciation of the arts and of the wisdom of great minds.

MISSION
Instruct students in written and oral communication and impart an appreciation and understanding of the humanities and their role in the life of human beings living in a diverse world.

FACILITIES
The department is housed in the Hunter Student Development Center, where mathematics, computer, and study skills labs, as well as classrooms are equipped with the most recent technological teaching aids.

DEPARTMENT PROGRAMS
Liberal Arts and Sciences: Humanities (AA)
The Mathematics and Physics Department offers a variety of courses, including pre-algebra, algebra, trigonometry, statistics, calculus, differential equations, astronomy, physics, and physical science. Students are recommended for placement in mathematics on the basis of their high school preparation and their placement test score. The department faculty serve as advisers for students majoring in the areas of mathematics and/or science and for those in the pre-environmental science and forestry programs. They also serve as advisers for undeclared majors. Physics and physical science courses develop within the student an understanding of basic physical principles and an appreciation of the natural environment. Technical programs require a firm foundation in fundamental physics. To that end, courses also encourage and develop the student's competence in the use of logical procedures in problem solving. Math courses are taught to develop students' abilities in logical reasoning, problem solving, and critical thinking, as well as to build algebraic reasoning and calculus skills.

**MISSION**

Provides mathematics and physics foundation courses for engineering and engineering technology students. The department also provides general education mathematics and natural science courses for all students.

**FACILITIES**

- **Physics labs** – These labs are well equipped with apparatus to facilitate learning by direct experience and to provide students with an opportunity to discover many principles on their own. The laboratory instructor is a member of the regular teaching staff and, in most cases, is the same instructor the student has for the physics lecture session. Facilities include a linear air track, lasers, air table, X-ray recorders, gamma spectrometers, oscilloscopes, precision electrical measuring devices, strobe lights, precision timers, and an 8-inch Cassegrain telescope, as well as a large collection of traditional physics apparatus, many of which are used directly by the students in their laboratory work.

**DEPARTMENT PROGRAMS**

- Liberal Arts and Sciences: Math and Science (AA)
- Pre-Environmental Science and Forestry (AA)
- Undeclared Major
The Mechanical and Electrical Engineering Technology Department has several programs that prepare graduates to join the workforce as successful technical and management professionals in a variety of industries, including electrical engineering technology, mechanical engineering technology, engineering science and computer engineering technology. Because the department maintains active contact with related industries and professional societies and works closely with them to assist graduates in exploring their profession and creating contacts for employment, graduate placement is excellent. Educational opportunities also occur through projects, competitions, and field trips in addition to memberships in several active professional society student chapters.

MISSION
To prepare graduates for immediate employment and continued educational opportunities through a quality technical and experience-based education.

FACILITIES
- **Advanced Electronics Laboratory** – (SET 456) Each work station in this laboratory has a computer that controls automated test equipment stations with a waveform generator, digitizing oscilloscope, multi-meter, and power supplies. Students can capture the oscilloscope display, run automatic frequency response, or measure device characteristics and insert these results into their laboratory reports. The work stations have programs for data analysis and circuit simulation such as Excel, MATLAB, LabVIEW, Multisim and Ultiboard. Internet connections allow quick reference to manufacturer’s data sheets. In addition to the general-purpose and automated test equipment, the laboratory also contains radio frequency (RF) test equipment such as a spectrum analyzer and data communications test equipment to investigate modulation and transmission.

- **Automated Manufacturing Laboratory** – (SET 369) provides direct experience with computer numerical control (CNC) machines, robotics, and the integration of robotic concepts to automated manufacturing. This includes a 3-axis HAAS mini mill, HAAS mini CNC lathe and an Emco 150 vertical mill. Part design and programs for operation of the CNC systems are prepared and executed. This lab is also equipped with a 3-axis coordinate measuring machine (CMM) for parts inspection and reverse engineering.

- **Computer-Aided, Mechanism, and Mechanical Design Laboratory** – (SET 396) provides a true design environment that is supported by the latest software for drafting, solid modeling, product design, mechanism and system design, calculations, presentations, and analysis. Labs consist of either a “stand alone” desktop computer or student laptops. The laboratory is also equipped as a standard industrial research and development laboratory in the area of mechanical systems dynamics. This facility enables students to analyze rotational equipment, industrial power transmission devices, and various mechanical linkage designs. Using a “learn-by-doing” approach, students are able to apply the theoretical concepts conveyed during lecture to complete rigorous laboratory assignments.

- **Data Acquisition Laboratory** – (SET 449B) Here students are introduced to general characteristics of electromechanical sensors and transducers, electrical measurement systems, electronic signal conditioning, data acquisition systems, and response characteristics of instruments. Industrial equipment, such as a punch press, drill press, and metal lathe are equipped with sensors that are configured to measure physical quantities such as force, strain, displacement, velocity and acceleration. Computers in the laboratory running LabVIEW software perform data acquisition, calculation and report generation with a graphical user interface. Utilizing renewable energy sources requires environmental monitoring. Laboratory activities could include using transducers to measure wind speed and direction, solar radiation, and temperature along with voltage, current and power measurement.

- **Electronic Fabrication Laboratory** – (SET 462A) This is a freshman “skills” laboratory covering a wide range of basic electronic fabrication techniques. It introduces the student to layout and design software tools for sheet metal chassis and printed circuit boards (PCBs) designs, electronic component identification, the proper use of soldering/de-soldering tools, wire-wrapping, schematic layout, and PCB design and fabrication techniques, as well as familiarization with a wide range of hand and power tools and proper safety practices. The laboratory is equipped with a kick-shear, punch press, bending brake, drill presses, Pace solder stations, and CNC rapid prototype machine. The laboratory contains a safety chemical vapor hood used for chemical etching of PCBs. The soldering work stations also feature individual ventilation fans. Once students learn the foundational techniques, students are allowed to use the fabrication resources for later class projects.

- **Embedded Controller Laboratory** – (SET 449A) This laboratory provides an integrated engineering systems approach toward understanding automation principles with emphasis on embedded microcontrollers. Exposure to electrical, mechanical, and process control areas is integrated into this laboratory allowing for evaluation of embedded controller applications using motion control and peripheral devices such as DC and stepper motors, pushbuttons, switches, seven segment and liquid crystal displays (LCD), matrix keypads, analog to digital converters, speakers and radio frequency (RF) and infrared (IR) interface links.

- **Energy Storage and Conversion Laboratory** – (SET 246) provides hands-on experience in the areas of fluid mechanics, heat transfer, and thermodynamics. Classroom theory is reinforced through the application to HVAC systems, wind turbines, solar-thermal, fuel cells, batteries, and other thermal-fluids process equipment. The characteristics of the laboratory systems are investigated, tested, and evaluated for component and overall efficiencies. Students gain experience in the operation of data acquisition, process control, temperature, pressure, fluid flow control, combustion, and system-level test equipment.

- **Fluid Power Laboratory** – (SET 252) This lab is used for both lower- and upper-division fluid power courses. Lab facilities include fully functional pneumatic and hydraulic system components. Students design and fabricate working fluid power circuits to reinforce topics covered in the classroom setting. Upper-division students use the hydraulic laboratory facilities to prepare for an optional industry certification offered at the end of the semester.

- **General Purpose Laboratories** – (EJ 414, EJ 415, EJ 417) General purpose laboratories are equipped with web, office, and programming software. They are used for a variety of courses such as programming, web, database, and microcomputer applications.

- **Industrial Controls Laboratory** – (SET 454) This laboratory contains multiuse work areas. When used as an introductory electrical circuits and a digital electronics laboratory, students bring in their breadboard notebook constructed in the fabrication lab and use it to build and test simple circuits to develop an understanding of the fundamentals of circuit theory and digital electronics. Other test equipment such as oscilloscopes, meters, power supplies, and signal generators are on each workstation. This laboratory is also equipped with eight matched sets of AC and DC fractional horsepower motors and the test equipment necessary to analyze their performance. Stepper motors, servo motors, programmable logic controllers (PLC), transformers, rectifiers, synchronous machines, loading devices, variable frequency drives, and a simulated transmission line relay demonstrator are available and used for laboratory experiments.

- **Machine Tool/Manufacturing Laboratory** – (SET 380) is equipped with 20 manual tool room style engine lathes, vertical and universal milling machines, drill presses, and radial drill presses. Traditional machining operations are introduced and reinforced in this laboratory with the goal of giving the students “hands-on” exposure to various methods and techniques applied to production so as to give a better understanding of the related design concepts.

- **Materials Testing Laboratory** – (SET 384) includes a 160,000-pound universal testing machine and other test equipment to examine impact, torsion, hardness, and fatigue. Metallographic preparation and computer-aided image processing are used to examine material structure. Heat treating furnaces are also used to investigate the effects of thermal processing.
• **Metrology and Measurements Laboratory** – (SET 379) serves as a state-of-the-art “quality assurance” center and is anchored by new equipment recently donated by area companies. Facilities include a manual coordinate measurement machine donated by Helmel Engineering and a digital Starrett optical comparator and direct computer controlled coordinate measurement machine, both acquired through a grant from the Gleason Foundation.

• **Microelectronics Laboratory** – (SET 462B) This laboratory gives the student a realistic experience in semiconductor manufacturing processes. In industry, the nature of the integrated circuit (IC) fabrication process is highly complex and absolutely intolerant of mistakes. Complex ICs have a multitude of transistors, capacitors, and resistors. Fabrication of these devices is rather simple in theory - deposit, pattern, etch, and repeat. However, the actual fabrication process is unbelievably detailed at every step. For very complex ICs, there can be 500 or more individual process steps! The slightest mistake at any of these steps can render the entire device useless. Through a recent grant opportunity, this laboratory was equipped with Modu-Lab semiconductor device manufacturing equipment and a clean-room facility. Oxidation/diffusion, photolithography (spin/bake/expose/develop), etch, and vapor deposition stations allow the student the opportunity to design, build, and test their own simple solid-state devices, while gaining experience in clean room operations.

• **Microfabrication and Semiconductor Manufacturing Facility** – (SET 468) This classroom includes a clean room for advanced miniature device and circuit development. The facility provides state-of-the-art instruments for designing, fabricating, characterizing and testing of complex micro-scale structures and devices in MicroElectroMechanical Systems (MEMS) and Microelectronics. The recent upgrade allows fabrication of very small MEMS devices such as sensors, actuators and microfluidic systems, and more advanced microelectronic components such as integrated circuits (ICs), transistors, capacitors, inductors, resistors, and diodes.

• **Networking Laboratories** – (SET 440 and SET 446) Two fully equipped networking laboratories are used to give students hands-on experience so critical to the competitive computer and information technology job market. The college has an academic license for VMware software products so students, using the latest version of VMware Workstation, can run multiple guest operating system virtual machines on our powerful lab computers creating complex layered virtual networks that can be directly connected to any of our lab network equipment. The labs are equipped with a blade server with 48 gigabytes of RAM and 12 terabyte storage array upon which VMware enterprise software is used to create a private cloud infrastructure where students can create and access virtual appliances. The college has an academic license for all Microsoft software, which allows students to acquire experience using the latest enterprise network operating systems.

• **Student Project Laboratory** – (SET 460) Space in this laboratory provides support for course projects and particularly the senior capstone design experience. This facility provides secure storage for projects and the necessary tools and support equipment. The laboratory houses a model house room layout for testing of competitive autonomous robots. The active campus Robotics Club makes use of the room for building, maintaining, and evaluating student built robots.

• **Systems Laboratory** – (EJ 411) This lab is used for teaching microcomputer hardware and operating systems installation, upgrading, troubleshooting, and maintenance.

• **Thermodynamics Laboratory** – (SET 344) provides students hands-on experience with diesel and multi-fuel spark ignition engines. Real-time equipment performance data is used for simulation, modeling, and economic analysis. Areas of the energy systems laboratory are also allocated for senior projects and the SAE Baja student club.

• **Thermofluid Mechanics Laboratory** – (SET 245) is equipped with systems which provide experience with the principles of fluid mechanics and thermodynamics. Fluid flows through venture tubes, orifices, nozzles, pipes, ducts, and open channels together with system components such as pumps, fans, and piping systems are used to provide a broad range of experimentation to support basic principles.

### DEPARTMENT PROGRAMS

- **Computer Engineering Technology** (AAS)
- **Computer Engineering Technology** (BS)
- **Electrical Engineering Technology** (AAS)
- **Electrical Engineering Technology** (BS)
- **Engineering Science** (AS)
- **Mechanical Engineering Technology** (AAS)
- **Mechanical Engineering Technology** (BS)
- **Mechatronics Technology** (AAS)
- **Mechatronics Technology** (BS)
The impending shortage of practitioners and current critical shortage of educators is leading to multiple options for those interested in the nursing profession. Jobs are available nationwide in a wide range of settings, usually with excellent salaries and opportunities for growth. At Alfred State, we are preparing students to be designers, coordinators, and managers of health care. Our students graduate as leaders contributing to the advancement of health care and the profession itself.

The Nursing Department offers an associate degree nursing program accredited by the Accreditation Commission for Education in Nursing (ACEN).

The associate degree is designed to prepare individuals to become registered nurses (RNs). Students of this program become eligible to take the NCLEX-RN licensing exam and receive excellent clinical preparation in a variety of settings.

Alfred State nursing AAS graduates may enter directly into the Alfred State bachelor’s degree program in nursing. This program can be completed full-time in two years or part-time as the student desires. The upper-level nursing courses are offered in an online format and include nursing, science, and liberal arts courses, primarily.

The baccalaureate degree program in nursing at The State University of New York College of Technology at Alfred is accredited by the Commission on Collegiate Nursing Education, 655 K Street, NW, Suite 750, Washington, DC 20001, 202-887-6791.

MISSION
Foster the development and growth of professional nurses in a rural environment. Nursing practice exhibits compassion, caring, and lifelong learning.

FACILITIES
- **Physical & Health Sciences Building** – This beautiful showcase facility, which opened in 2012 following an $18.5 million renovation project, houses the Nursing Department.
- **Nursing skills lab** – The lab utilizes state-of-the-art equipment including mid-fidelity manikins, newborn manikin SimNewB, and a PROMPT Birthing Simulator to complement and reinforce the learning that takes place in clinical experiences at area hospitals. This lab simulates a hospital floor setting with six stations and six VitalSim™ manikins. Each station is fully equipped for the student to learn and practice clinical skills in an acute care setting.
- **High-fidelity simulation labs** – These two high-fidelity simulation labs each house a SimMan 3G® manikin. The simulation observation room is equipped with computers and monitors to record simulation activities.
- **Practice lab** – Students have access to two stations that simulate a hospital floor setting, four examination stations, and two VitalSim™ manikins within this lab.
- **Public Health Simulation** – In addition to the above skills labs, there are facilities for students in Nursing and Allied Health to participate in simulations to promote learning in settings outside of acute care.

DEPARTMENT PROGRAMS
- Nursing (AAS)
- Nursing (BS in Nursing)
- Nursing Dual Degree (AAS to BS in Nursing)
The Physical and Life Sciences Department at Alfred State provides students with a strong education in a wide range of scientific and technical disciplines through online and on-campus curricular offerings. Faculty specializations span a spectrum of molecular and cell biology, genetics/genomics, nutrition science, forensic science, chemical instrumentation, microbiology, and physical chemistry. While diverse, the faculty and staff share the common goal of effectively delivering the practical and theoretical foundations of disciplines through a rich blend of interactive lectures, informal discussion, meaningful laboratory inquiries, and internships. In addition to discipline-related course work, each program is complemented by a broad array of general education courses aimed at equipping students with insights and background that will help fulfill their roles in greater society. Emphasis is also placed on lifelong learning, as reflected by the many articulation agreements assuring seamless transition to other programs within Alfred State and to other institutions of higher learning.

The department offers students direct use of modern laboratory/clinical equipment in real-world or simulated settings. Practical, hands-on competencies, critical reasoning skills, and, where pertinent, team-based problem solving, are emphasized. If a student expresses an interest outside of a discipline’s normal scope, independent study options may also be developed.

In some programs there are physical ability requirements based on individualized assessment rooted in current medical evidence or the best objective evidence. See each program for specific physical requirements. If a student's physical ability compromises or threatens their success in a program, or the health and safety of others, they may be denied enrollment or continuation in the program.

MISSION
To be recognized for employing a comprehensive plan for recruiting and admitting, orienting and advising, retaining, graduating, and placing students of its degree programs.

FACILITIES
Physical & Health Sciences Building – The Physical and Life Sciences Department is located in this facility. Four science-ready lecture rooms are on the first floor with eight laboratories found on the second and third floors for the biological science, environmental technology, health science, and the forensic science technology programs. The laboratories are outfitted with state-of-the-art equipment and instrumentation, anatomic models, and the latest application software for teaching and learning as well as for independent study and research.

DEPARTMENT PROGRAMS
- Biological Science (AAS)
- Forensic Science Technology (BS)
- Health Sciences (BS)
The Social and Behavioral Sciences Department offers courses in anthropology, criminal justice, education, history, human services, political science, psychology, and sociology. It coordinates six curricula: criminal justice (AS and BS), human services management, human services, liberal arts and sciences: social science, and liberal arts and sciences: adolescent education (teacher education transfer).

The criminal justice associate degree program provides a solid foundation in the field of criminal justice and its basic components. The program offers practical knowledge that is integrated across core criminal justice courses and that is then combined with other relevant coursework. The program emphasizes the development, structure, and function of the criminal justice system within the US, as well as ethical law enforcement practices and community relations. In addition, the program's professional course work includes a management component that helps prepare graduates for administrative and leadership positions within the criminal justice system.

The criminal justice bachelor's degree program provides graduates a solid foundation in the field of criminal justice, both its essential components and emerging areas, with a focus on leadership and applied learning. With strong preparation in conceptual knowledge, students gain practical experience in criminal justice, including the opportunity to complete either an internship or a lab-based criminal investigation course in their final semester. In order to prepare graduates for a wide variety of careers, the program emphasizes several areas within criminal justice: ethical law enforcement practices, decision-making, community relations, working with diverse populations, public safety, and criminal justice leadership and administration.

The human services management bachelor's degree program prepares graduates for mid-level positions in human services and social services agencies requiring skills in both direct service to clients and in management. It also prepares them for transfer into graduate-level programs in such areas as human services, public administration, and social work administration.

The human services associate-level program prepares students for entry-level career positions in a variety of human service occupations or to continue their education in baccalaureate programs. Students who pursue careers upon graduation often work with the elderly or in programs that focus on early childhood, chemical dependency, or the mentally and developmentally disabled. Students who transfer often select baccalaureate majors in human services management, social work, criminal justice, education, human services, psychology, and sociology.

The liberal arts and sciences: social science associate degree program is a transfer program that provides flexibility to students in their choice of future major. Students take considerable coursework in psychology, sociology, and history, and additional courses in mathematics, English, the humanities, and the natural sciences. When transferring, students often select baccalaureate majors in psychology, anthropology, sociology, political science, history, gerontology, communications, early childhood/childhood education, adolescent education, and criminal justice.

The liberal arts and sciences: adolescent education (teacher education transfer) associate-level program prepares graduates to transfer to a four-year adolescent education program at a public or private college or university. Students may select one of six concentrations: history/social studies, English, math, physics, biology, or chemistry.

**MISSION**
Develop and offer excellent academic programs in criminal justice, human services, social sciences, and education, and to develop and offer high-quality courses in the social and behavioral sciences that meet the program needs of the students of Alfred State.

**FACILITIES**
The department is housed in the Hunter Student Development Center, where mathematics, computer, and study skills labs, as well as classrooms, are equipped with the most recent technological teaching aids.

**DEPARTMENT PROGRAMS**
- **Criminal Justice (AS)**
- **Criminal Justice (BS)**
- **Human Services (AS)**
- **Human Services Management (BS)**
- **Liberal Arts and Sciences: Adolescent Education - Teacher Education Transfer (AA)**
- **Liberal Arts and Sciences: Social Science (AA)**
ACCOUNTING

AAS DEGREE – CODE #0630

Holly Chase, Program Coordinator
Email address: chasehs@alfredstate.edu

The accounting program is one of our most established and respected within the business discipline. It is a computer-based program in which the latest accounting theory and real-world practice receive equal emphasis as applied to both financial and managerial accounting issues. If you’re looking to enter the job market upon graduation or if you’re considering an advanced degree, this major is tailor made for you.

ADVANTAGES

• Required course work covers areas critical to success in today’s business workplace: technical accounting knowledge, communication and interpersonal skills, career-related computer literacy.
• High-tech classrooms with computer technology integrated into course content.

A laptop computer is required for students entering the accounting program. Laptop specifications are available at http://www.alfredstate.edu/required-laptops.

PROGRAM STUDENT LEARNING OUTCOMES

• Recognize the primary theories within the principle functional areas of business.
• Demonstrate professional business communication.
• Illustrate critical thinking and effective decision-making within the principle functional areas of accounting.
• Identify ethical issues within accounting.

DIRECT ENTRY INTO BACCALAUREATE DEGREE PROGRAMS

Alfred State accounting graduates may enter directly into either the business administration BBA, financial planning BBA, the interdisciplinary studies BTech, or technology management BBA degree program.

CONTINUING EDUCATION OPPORTUNITIES

Students may transfer directly into one of our own BBA degree programs or to another college. Students are encouraged to make their intentions known to their academic adviser during their freshman year. Through the careful use of elective courses, students can realize excellent transfer credit.

The Business Department has established many formal articulation agreements with local four-year institutions, although graduates may transfer to colleges virtually anywhere. Historically, accounting graduates have done very well after leaving Alfred State, whether they enter the workforce or transfer to an advanced program.

OCCUPATIONAL OPPORTUNITIES

• Banking
• Manufacturing
• Retail
• Government and other not-for-profit entities
• Tax agencies
• Financial services

EMPLOYMENT STATISTICS

Employment and transfer rate of 100 percent – 100 percent are employed.

GRADUATION REQUIREMENTS

62 semester hours, including 20 hours in major field with a 2.0 cumulative index in such courses, as well as six hours of math.
AGRICULTURAL AUTOMATION AND ROBOTICS

AAS DEGREE - CODE #122

Dr. Philip Schroeder, Department Chair and Program Coordinator
Email Address: schroepd@alfredstate.edu

Careers related to agriculture are diverse and constantly changing. Today's students need the flexibility to tailor a degree to suit their needs. That's why our agricultural automation and robotics curriculum has been designed to prepare students to enter the workforce as an agricultural automation technician or continue their education in one of Alfred State's baccalaureate programs.

ADVANTAGES
- Opportunities for hands-on experience with automated milking equipment.
- Hands-on experience and class work in both agriculture and engineering.
- The only program of its kind in the US.

DIRECT ENTRY INTO BACCALAUREATE DEGREE PROGRAMS

Alfred State agricultural automation and robotics graduates may also enter directly into either the agricultural entrepreneurship BTech, interdisciplinary studies BTech, or the technology management BBA degree program.

RELATED CLUBS AND ACTIVITIES

Students have the opportunity to participate in the Collegiate Agricultural Leaders (CAL) Club, Collegiate FFA, Equestrian Club, Dairy Judging Team, Agricultural Skills Day, Spring Fling Consignment Sale, Community Supported Agriculture projects, local foods projects, showmanship contests, and Robotics Club.

CONTINUING EDUCATION OPPORTUNITIES

Many schools, including Cornell University, grant full credit to students wishing to transfer to four-year programs. A formal articulation agreement exists between Alfred State and Cornell University for transfer options.

OCCUPATIONAL OPPORTUNITIES
- Installation and maintenance of agricultural automation equipment
- Agricultural automation equipment operations
- Agricultural automation equipment research and development
- Salespeople and consultants for agricultural equipment distributors

ENTRANCE REQUIREMENTS/RECOMMENDATIONS

Required: Algebra, Geometry, Algebra 2

Recommended: Physics

Students who believe they need a reasonable accommodation to participate in this program may contact Melanie Ryan in the Office of Accessibility Services. This office may be contacted by email at DisabilityServices@alfredstate.edu or by phone at 607-587-4506. Please keep in mind that some accommodations may take time to implement, so students seeking accommodations are encouraged to contact OAS as early as possible.
• BIOL 2803 Environmental Sciences
• BIOL 2801 Environmental Sciences Lab
• BIOL 4254 General Microbiology
• BIOL 6534 Genetics

Graduation Requirements

Students must:

• Successfully complete the prescribed sequence of courses.
• Achieve a minimum index of 2.0 in their core courses.
• Achieve a minimum index of 2.0 overall.
• Be recommended by the department faculty.
Students who believe they need a reasonable accommodation to participate in this program may contact Melanie Ryan in the Office of Accessibility Services. GRADUATION REQUIREMENTS
Students must:

• successfully complete the prescribed sequence of courses
• achieve a minimum index of 2.0 in their core courses
• achieve a minimum index of 2.0 overall
• be recommended by the department faculty
The Bachelor of Technology in agricultural entrepreneurship (AE-BT) program is designed to provide you, tomorrow’s agricultural entrepreneurs, with the skills to make local agriculture economically viable through the application of traditional production practices and the development of value-added (VA) products. You will take production courses to build a strong foundation in agriculture, value-added courses to develop non-traditional agriculture skills, and business courses to understand marketing and financial management.

This program will appeal to both traditional agriculture students who come from a farm background and to students who are new to agriculture. This program will prepare students to be successful in their efforts to improve the profitability of an existing farm or start a new agricultural venture.

**ADVANTAGES**

- Our graduates have the technical knowledge of agricultural production practices, land and water resources, management, and agricultural markets necessary to enter nearly any facet of the agribusiness field.
- Our students have hands-on experience with modern automated agricultural production systems, organic farming methods, and value added agriculture.
- Our students have the opportunity to work on the college farm and learn first-hand how to manage multiple species in modern high-tech facilities.
- Our students also learn the application of fundamental business management skills to agriculture.

**RELATED CLUBS AND ACTIVITIES**

Students have the opportunity to participate in the Collegiate Agricultural Leaders (CAL) Club, Collegiate FFA, Equestrian Club, Dairy Judging Team, Agricultural Skills Day, Spring Fling Consignment Sale, Community-Supported Agriculture projects, local foods projects, showmanship contests, and Sustainability Club.

**OCCUPATIONAL OPPORTUNITIES**

- Management or ownership of commercial farms
- Agricultural credit officers for banks, government, loan agencies, and farm cooperative loan agencies.
- High school agriculture teacher/agriculture educator
- Writers of technical publications, radio and TV scripts, news items for magazines and newspapers, education and public relations materials
- Manager/assistant managers of farm supply stores
- Warehouse managers for farm chemicals, feed, seed, and fertilizers
- Chain store and retail food management
- Agricultural consulting services

**EMPLOYMENT STATISTICS**

New program. No data currently available.

**RELATED PROGRAMS**

- Agricultural Technology
- Agricultural Business
- Agricultural Automation and Robotics

**ENTRANCE REQUIREMENTS/RECOMMENDATIONS**

- A recognized high school diploma or its equivalent.
- Two high school math courses (one of which must be Algebra), Geometry, Biology.
A typical day consists of two, one-hour lectures and a two-hour studio in the freshman and sophomore years. At the junior and senior levels, three-hour studios are required.

### Graduation Requirements

- Total minimum credit hours for graduation is 120.
- A cumulative overall index of at least 2.0 is required in order to graduate.
- 30 credit hours of the 45 upper-level credit hours for this degree must be taken at Alfred State.

### Additional Program Information

- Seven of the 10 SUNY-approved General Education categories must be fulfilled.
AGRICULTURAL TECHNOLOGY

AAS DEGREE - CODE #0510
Dr. Philip Schroeder, Department Chair and Program Coordinator
Email: schroepd@alfredstate.edu

Careers related to agriculture are diverse and constantly changing. Today’s students need the flexibility to tailor a degree to suit their needs. That’s why our agricultural technology curriculum has been designed to let you select the elective courses that fit your career goals. You can choose concentrations of courses in animal science, enhancing your knowledge of animal agriculture and/or dairy science, or enhance your knowledge of crops and plant sciences, including fruit and vegetable production.

ADVANTAGES
• Opportunities for hands-on experience with organic farming.
• Animal science concentration is a progressive practical program emphasizing dairy cattle management and provides both a science and a business background.
• Plant science concentration focuses on the management of soil to increase production of both human and animal food crops and the science and business behind it. It includes an emphasis on sustainability.

PROGRAM STUDENT LEARNING OUTCOMES
• Demonstrate essential technical knowledge of animal husbandry methods.
• Demonstrate essential technical knowledge of crops, soils, and growing conditions.
• Demonstrate the ability to analyze information, and compare and contrast agricultural management systems.
• Demonstrate the ability to find and use information related to agricultural production systems.
• Demonstrate written and oral communication skills appropriate for agricultural production systems.
• Apply critical thinking and reasoning to agricultural business management.

DIRECT ENTRY INTO BACCALAUREATE DEGREE PROGRAMS
Alfred State agricultural technology graduates may enter directly into either the agricultural entrepreneurship BTech, interdisciplinary studies BTech, or the technology management BBA degree program.

ANIMAL/DAIRY SCIENCE CONCENTRATION
The animal science concentration is a progressive practical program emphasizing dairy cattle management. The program offers both managerial and hands-on experiences. This concentration’s courses provide a science and business background. A strong emphasis is placed on application of these principles with a free-stall housed organic herd milked by a robot and our herds of Angus and Herford cattle, sheep, and meat goats. The farm also houses horses, pigs, and poultry that are used to extend learning opportunities for our students.

PLANT/CROPS/FRUIT/VEGETABLE CONCENTRATION
This curriculum emphasizes management of the soil to increase production of food crops for both human and livestock consumption. Students are usually interested in crop farming or market gardening careers. Students are taught conventional, natural, and organic food production systems. This concentration’s courses provide a science and business background. A strong emphasis is placed on application of sustainability principles on our farm, research plots, gardens, hydroponic systems, greenhouses, and high tunnels.

SHOWMANSHIP DAY
All students enrolled in agriculture classes truly enjoy participating in the annual showmanship activities each spring. Students can select a species of animal (cattle, horses, swine, alpacas, or sheep) to train, groom, and show in this annual competition. Family, friends, and alumni are invited to enjoy the competition and the awards barbecue following the showmanship contest.

RELATED CLUBS AND ACTIVITIES
Students have the opportunity to participate in the Collegiate Agricultural Leaders (CAL) Club, Collegiate FFA, Equestrian Club, Dairy Judging Team, Agricultural Skills Day, Spring Fling Consignment Sale, Community Supported Agriculture projects, local foods projects, showmanship contests, and Sustainability Club.

CONTINUING EDUCATION OPPORTUNITIES
Many schools, including Cornell University, grant full credit to students wishing to transfer to four-year programs. A formal articulation agreement exists between Alfred State and Cornell University for transfer options.

OCCUPATIONAL OPPORTUNITIES
• Owners, operators, managers, and herdsmen for dairy cattle and meat animal farms
• Fruit, vegetable, and field crop production
• Food industry
• Salespeople and consultants for feed, fertilizer, agricultural, and veterinary supply companies
• Agricultural banking and lending
• Inspectors of agricultural products
• Laboratory and field technicians for artificial insemination and veterinary supply companies
• Dairy farm inspectors

EMPLOYMENT STATISTICS
Employment and continuing education rate of 100 percent – 54 percent are employed; 46 percent continued their education.

ENTRANCE REQUIREMENTS/RECOMMENDATIONS
Required: Algebra
Recommended: Geometry, Algebra 2, Biology, Chemistry

Students who believe they need a reasonable accommodation to participate in this program may contact Melanie Ryan in the Office of Accessibility Services. This office may be contacted by email at DisabilityServices@alfredstate.edu or by phone at 607-587-4506. Please keep in mind that some accommodations may take time to implement, so students seeking accommodations are encouraged to contact OAS as early as possible.

### GRADUATION REQUIREMENTS

Students must:
- successfully complete the prescribed sequence of courses
- achieve a minimum index of 2.0 in core courses
- achieve a minimum index of 2.0 overall
- be recommended by the department faculty
Our four-year Bachelor of Science in architectural technology program is designed to provide students with a comprehensive architectural education. While the two-year AAS degree in architectural technology offers a broad range of skills this four year program continues the course of study, by combining a wholistic perspective of the built environment with an applied technical knowledge of construction systems and materials acquired throughout a four-year studio sequence.

All architecture degree programs share course work across the first two years, while the BS and BArch have some shared course work in the third and fourth years. This alignment demands the AAS and BS in architectural technology are required to meet the same NAAB “Student Criteria” and “Program Criteria” that apply to the BArch program. The BArch program is the only fully-accredited undergraduate first professional architecture degree program in the SUNY system.

ADVANTAGES

Broad exposure gives students the ability to be conversant with and/or seek employment within the architectural field, and also in related professions that engage the built environment.

The degree may be accepted for credit toward professional licensure in New York State.

Alfred State offers multiple study abroad options through our signature 10-week semester study abroad program (offered in conjunction with Sant’Anna Institute in Sorrento, Italy) and other programs offered in conjunction with SUNY partners. To learn more, see www.alfredstate.edu/study-abroad.

All students in both the architecture and interior design programs are required to purchase a computer before the beginning of the second year in addition to other equipment. Typically the costs of these purchases can be covered using financial aid. Please consult a financial aid counselor for further details. Laptop specifications are available at alfredstate.edu/required-laptops.

PROGRAM STUDENT LEARNING OUTCOMES

- Comprehend architecture as being accountable to humanity’s need for safe, affordable shelter, for dignified ways of living and for offering corresponding symbolic meaning - and the ability to produce designs infused by this understanding.
- Demonstrate knowledge of the evolution of architectural ideas (and associated principles, strategies, and devices) throughout history and of how these were marshaled by architects in the service of certain intended purposes, as well as the ability to apply such ideas in the student’s own designs.
- Demonstrate knowledge of strategies for infusing design generally, and structural expression particularly, with poetic dimensions that help to transform environments - that would otherwise be merely good functionally and of sound construction - into inspiring and uplifting places.
- Demonstrate knowledge of sustainability, construction technology, and integrated project delivery.
- Demonstrate the ability to take on/participate constructively in urban renewal/social innovation projects that seek to serve the common good.
- Info management (computer and research skills appropriate to degree level and type).
- Written and oral communication (appropriate to degree level and type).
- Critical thinking (problem solving, reasoning skills appropriate to degree level and type).

CONTINUING EDUCATION OPPORTUNITIES

Graduates wishing to continue their education may choose to apply to master’s programs in architecture or related disciplines. The lengths of such programs vary and depend on institutional requirements.

OCCUPATIONAL OPPORTUNITIES

- Architect (after successfully meeting state requirements)
- Construction manager
- Building inspector
- 3-D modeler animator
- Computer illustrator
- Detailer
- Specification writer
- Estimator
- Model builder

EMPLOYMENT STATISTICS

Employment and continuing education rate of 100 percent – 86 percent are employed; 14 percent continued their education.

RELATED PROGRAMS

Construction Management

ENTRANCE REQUIREMENTS/RECOMMENDATIONS

Required: Algebra, Geometry, Algebra 2
Recommended: Pre-calculus, Physics

TRANSFER STUDENTS

Prior to studio placement within the architectural technology BS program, applicants from schools or programs with which Alfred State College does not have an active articulation agreement, must submit a comprehensive academic portfolio for review. This portfolio will include examples of student work, course syllabi, assignments, and grade reports and will evaluated along with the student’s overall grade point average and studio course grades.

Students applying for transfer from schools with which Alfred State College has an existing and active articulation agreement (Erie CC, Finger Lakes CC, Dutchess CC, Onondaga CC, Orange County CC) may submit a condensed design portfolio.

Alfred State College uses SlideRoom to collect portfolio details, which will guide all students—new or transfer—through the process of assembling the correct materials for the portfolio.

GRADUATION REQUIREMENTS

Successfully complete all courses in the prescribed eight-semester program and earn a minimum cumulative index of 2.0.

STUDY ABROAD OPPORTUNITIES

Alfred State offers multiple study abroad options through our signature 10-week semester study abroad program (offered in conjunction with Sant’Anna Institute in Sorrento, Italy) and other programs offered in conjunction with SUNY partners in France, Estonia, and Benin. To learn more, see www.alfredstate.edu/study-abroad.

GENERAL NOTES:

A typical day consists of two, one-hour lectures and a two-hour studio in the freshman and sophomore years. At the junior and senior levels, three-hour studios are required.

Entry level of student into math and composition/literature sequences is a function of student’s high school preparation and mathematics and English placement examinations.

Math through Technical Calculus I must be completed. Students who start at a higher level of math must meet SUNY general education and campus liberal arts and sciences course credit requirements for graduation.

Minimum combined GPA of 3.0 is required in Alfred State studio courses (ARCH 1184, ARCH 2394, ARCH 3104, and ARCH 4304) or comparable courses at another institution to guarantee admission into ARCH 5306 - Design Studio 3. A portfolio review is required of all continuing or transfer students not meeting this requirement.

If entry-level math requirement is met, take LAS elective to complete degree requirements of 3 or 4 credits, otherwise take free elective.

Students must complete at least one course from seven of the 10 SUNY General Education silos.

Minimum grade of “C” is required for ARCH 5306, ARCH 6306, ARCH 7306, and ARCH 8306.

ARCHITECTURAL TECHNOLOGY (AAS)

AAS DEGREE - CODE #0538
Matthew DiRado, Program Coordinator
Email Address: diradoma@alfredstate.edu

The Bachelor of Science in architectural technology programs at Alfred State College are designed to provide students with a comprehensive architectural education. The AAS degree offers a broad range of skills and basic data—architectural design, graphic communication, and construction technology—relevant to the design of the built environment.

All architecture degree programs share course work across the first two years, while the BS and BArch have some shared course work in the third and fourth years. This alignment demands the AAS and BS in architectural technology are required to meet the same NAAB "Student Criteria" and "Program Criteria" that apply to the BArch program. The BArch program is the only fully-accredited undergraduate first professional architecture degree program in the SUNY system.

ADVANTAGES
• Broad exposure gives students the ability to be conversant with and/or seek employment with all related professions within the architectural field.
• The degree may be accepted for credit toward professional licensure in New York State.

All students in both the architecture and interior design programs are required to purchase a computer before the beginning of the second year in addition to other equipment. Typically the costs of these purchases can be covered using financial aid. Please consult a financial aid counselor for further details. Laptop specifications are available at alfredstate.edu/required-laptops.

PROGRAM STUDENT LEARNING OUTCOMES
• Comprehend architecture as being accountable to humanity's need for safe, affordable shelter, for dignified ways of living, and for offering corresponding symbolic meaning - and the ability to produce designs infused by this understanding.
• Demonstrate knowledge of the evolution of architectural ideas (and associated principles, strategies and devices) throughout history and of how these were marshaled by architects in the service of certain intended purposes, as well as the ability to apply such ideas in the student's own designs.
• Demonstrate knowledge of strategies for infusing design generally, and structural expression particularly, with poetic dimensions that help to transform environments - that would otherwise be merely good functionally and of sound construction - into inspiring and uplifting places.
• Demonstrate knowledge of sustainability, construction technology, and integrated project delivery.
• Demonstrate the ability to take on/participate constructively in urban renewal/social innovation projects that seek to serve the common good.
• Info management (computer and research skills appropriate to degree level and type).
• Written and oral communication (appropriate to degree level and type).
• Critical thinking (problem-solving, reasoning skills appropriate to degree level and type).

DIRECT ENTRY INTO BACCALAUREATE DEGREE PROGRAMS
Alfred State architectural technology AAS graduates may enter directly into either the architectural technology BS or the architecture BArch programs (portfolio review may be required). AAS students who elect to apply for internal transfer to BS or BArch programs need to have completed either MATH 2043 (College Trigonometry) or MATH 1054 (Precalculus). Please note that a minimum combined GPA of 3.0 is required in Alfred State studio courses (ARCH 1184, ARCH 2394, ARCH 3104, and ARCH 4304) to guarantee admission into ARCH 5306 - Design Studio 3. Architectural technology AAS graduates may also enter directly into the construction supervision BTech, the interdisciplinary studies BTech, or the technology management BBA degree program.

CONTINUING EDUCATION OPPORTUNITIES
Graduates may enter the workforce or may continue in Alfred State's architectural technology BS or BArch programs. Graduates may also transfer to professional or pre-professional degree programs at other institutions. Transfer is contingent on program and institution.

OCCUPATIONAL OPPORTUNITIES
• Architect (after successfully meeting state requirements)
• Computer modelers
• Computer animators
• Detailers
• Specification writers
• Estimators
• Building inspectors
• Interior designers
• Sales representatives
• Draftsperson

EMPLOYMENT STATISTICS
Employment and continuing education rate of 100 percent – 100 percent continued their education.

RELATED PROGRAMS
Construction Engineering Technology
Interior Design

CERTIFICATION OR LICENSURE
The degree may be accepted for credit toward professional licensure in New York State.

ENTRANCE REQUIREMENTS/RECOMMENDATIONS
Required: Algebra, Geometry, Algebra 2
Recommended: Physics

TYPICAL PROGRAM
A typical day might be one or two one-hour lectures and a two-hour studio for freshmen. In the second year, some courses use three-hour studios.

GENERAL NOTES:
Students must complete at least one course from each of five SUNY General Education Silos.

Entry level of student into math and composition/literature sequences is a function of student’s high school preparation and mathematics and English placement examinations.

Math through Technical Calculus I must be completed. Students who start at a higher level in math must meet all SUNY general education and campus liberal arts and sciences course credit requirements for graduation.

Minimum grade of “C” is required for ARCH 1184, ARCH 2394, ARCH 3104, and ARCH 4304.

If entry-level math requirement is met, take LAS elective to complete degree requirements of 3 credits, otherwise take free elective.

For sociology elective, students may take SOCI 1163 or substitute HIST 1113, HIST 1143, HIST 2153, or PLSC 1043. Students planning to continue in the architectural technology BS program should consult with their adviser regarding Gen. Ed./LAS requirements.

ARCHITECTURE

BARCH DEGREE – CODE #0135

Joseph Ebert, Program Coordinator
Email Address: ebertja@alfredstate.edu

You’re considering studying architecture? You have found the right place! The Bachelor of Architecture (BArch) program helps prepare students to be well-rounded, creative, and socially responsible architects who shape our world through the design of meaningful and inspirational spaces. The BArch is a fully accredited professional program, preparing students for employment and the opportunity to pursue licensure shortly after graduation, reducing the need for further graduate education or an advanced degree.

ADVANTAGES

- Students enrolled in the BArch program have had the opportunity to select a “cognate area” of special study. A list of options is available in the department office or from an academic advisor. Beginning soon, students will have (depending on their selected catalog year) the opportunity to select from an even broader list of minors offered by various departments throughout the college. [https://www.alfredstate.edu/academics/minors](https://www.alfredstate.edu/academics/minors)
- Upon successful completion of the BArch degree, graduates may begin an internship and the other professional steps leading to licensure as a registered, practicing architect. Students may participate in the Architectural Experience Program (AXP) while enrolled at Alfred State.
- The BArch program provides a career-focused, project-based education integrating theory and practice with a strong multidisciplinary foundation that draws upon an institutional heritage of building and technology.
- Alfred State offers multiple study abroad options through our signature 10-week semester study abroad program (offered in conjunction with Sant’Anna Institute in Sorrento, Italy) and other programs offered in conjunction with SUNY partners in France, Estonia, and Benin. To learn more, see [www.alfredstate.edu/study-abroad](http://www.alfredstate.edu/study-abroad).

All students in both the architecture and interior design programs are required to purchase a computer before the beginning of the second year in addition to other equipment. Typically the costs of these purchases can be covered using financial aid. Please consult a financial aid counselor for further details. Laptop specifications are available at [alfredstate.edu/required-laptops](http://alfredstate.edu/required-laptops).

NAAB ACCREDITATION INFORMATION

In the United States, most state registration boards require a degree from an accredited professional degree program as a prerequisite for licensure. The National Architectural Accrediting Board (NAAB), which is the sole agency authorized to accredit professional degree programs in architecture offered by institutions with US regional accreditation, recognizes three types of degrees: the Bachelor of Architecture, the Master of Architecture, and the Doctor of Architecture. A program may be granted an eight-year term, an eight-year term with conditions, or two-year term of continuing accreditation, or a three-year term of initial accreditation, depending on the extent of its conformance with established educational standards. Doctor of Architecture and Master of Architecture degree programs may require a non-accredited undergraduate degree in architecture for admission. However, the non-accredited degree is not, by itself, recognized as an accredited degree.

Alfred State Department of Architecture and Design offers the following NAAB-accredited degree program: Bachelor of Architecture (BArch) 157 Credit Hours

Date of next accreditation visit: Spring 2021

A detailed archive of NAAB-related accreditation documents is available on our website.

PROGRAM STUDENT LEARNING OUTCOMES

- **PSLO.1.** = NAAB PC.1 Career Paths — The program helps students understand the path to becoming a licensed architect in the United States and the range of career opportunities available to them that utilize the discipline’s skills and knowledge.

- **PSLO.2.** = NAAB PC.2 Design — The program promotes the role of design in shaping the built environment, and conveys the methods by which design integrates multiple factors, in different settings and scales of development.

- **PSLO.3.** = NAAB PC.3 Ecological Knowledge and Responsibility — The program provides a holistic understanding of the dynamic between built and natural environments, enabling future architects to responsibly mitigate climate change by leveraging ecological, advanced building performance, adaptation, and resilience principles in their work and advocacy activities.

- **PSLO.4.** = NAAB PC.4 History and Theory — The program prepares students to understand the histories and theories of architecture and urbanism, framed by broad social, cultural, economic, and political forces.

- **PSLO.5.** = NAAB PC.5 Innovation — The program expands students’ understanding of the field and encourages exploration, risk-taking, and inventiveness.

- **PSLO.6.** = NAAB PC.6 Leadership and Collaboration — The program helps students understand approaches to leadership in multidisciplinary teams, diverse stakeholder constituents, and dynamic physical and social contexts, and learn how to apply effective collaboration skills to solve complex problems.

- **PSLO.7.** = NAAB PC.7 Learning and Teaching Culture — The program fosters a positive and respectful environment that encourages optimism, respect, sharing, engagement, and innovation among the members of its faculty, student body, administration, staff, and the profession.

- **PSLO.8.** = NAAB PC.8 Social Equity and Inclusive Environments — The program deepens students understanding of diverse cultural and social contexts and helps students translate that into built environments that support and include people who have different backgrounds, resources, and abilities.

- **PSLO.9.** = NAAB SC.1 Health, Safety, and Welfare in the Built Environment — How the program promotes students’ understanding of the role of the built environment in human health, safety, and welfare at multiple scales.

- **PSLO.10.** = NAAB SC.2 Professional Practice — How the program fosters an understanding of professional ethics, the regulatory standards, and the fundamental business processes relevant to architectural practice in the United States.

- **PSLO.11.** = NAAB SC.3 Regulatory Context — How the program enables students to understand the fundamental principles of life safety, land use, and related regulations that apply to buildings and sites within the US, and the evaluative criteria architects use to assess those regulations as part of a project.

- **PSLO.12.** = NAAB SC.4 Technical Knowledge — How the program prepares students to understand the established and emerging systems, technologies, and assemblies of building construction, and the criteria architects use to assess those technologies against the design and performance objectives of projects.

- **PSLO.13.** = NAAB SC.5 Design Synthesis — Ability to make design decisions within an architectural project while demonstrating broad synthesis and consideration of user requirements, regulatory requirements, site conditions, ecological concerns, and accessible design.

- **PSLO.14.** = NAAB SC.6 Building Integration — Ability to make design decisions within an architectural project while demonstrating broad integration and consideration of building envelope systems and assemblies, structural systems, environmental control systems and life safety systems.

ENTRANCE REQUIREMENTS/RECOMMENDATIONS

Required: Algebra, Geometry, Algebra 2 with an 86 or above average plus high school pre-calculus. Physics is strongly recommended.

EMPLOYMENT STATISTICS

Employment and continuing education rate of 100 percent – 94 percent are employed; 6 percent continued their education.

PORTFOLIO REQUIREMENTS

All students who apply to the BArch program are required to submit a portfolio of creative work that demonstrates their interest in design and the built environment.

Through the portfolio, the department hopes to get a sense of the applicant as a creative individual. We understand that the portfolio will not demonstrate mastery of architecture, but instead present a student’s potential through explorations and representation of the built environment, which may be presented as art work such as drawings, sketches, models, sculpture, or photographs. The portfolio should focus mainly on the representation of space, but may also include a small representation of creative work such as woodworking, crafts, graphic design, and/or other creative endeavors (e.g., high school, college course) or from personal pursuits (e.g., employment, hobbies). Each portfolio should be a balanced representation of both two- and three-dimensional works.
Alfred State College uses SlideRoom to collect portfolio details, which will guide all students — new or transfer — through the process of assembling the correct materials for the portfolio.

PORTFOLIO REQUIREMENTS FOR TRANSFER STUDENTS
Prior to studio placement within the architectural technology BS program, applicants from schools or programs with which Alfred State College does not have an active an articulation agreement, must submit a comprehensive academic portfolio for review. This portfolio will include examples of student work, course syllabi, assignments, and grade reports and will evaluated along with the student’s overall grade point average and studio course grades.

Students applying for transfer from schools with which Alfred State College has an existing and active articulation agreement (Erie CC, Finger Lakes CC, Dutchess CC, Onondaga CC, Orange County CC) may submit a condensed design portfolio.

Alfred State College uses SlideRoom to collect portfolio details, which will guide all students — new or transfer — through the process of assembling the correct materials for the portfolio.

GRADUATION REQUIREMENTS
Successfully complete all courses in the prescribed 10-semester program at a minimum cumulative index of 2.5, which is equivalent to a “C+” average.

CAREER OPPORTUNITIES
A wide range of activities are open to graduates of this accredited degree: intern architect, practicing architect (after successfully meeting state registration requirements), or practitioner in related sub-fields that include: sustainable architecture, urban design, interior architecture, adaptive reuse and historic preservation, building construction management, hospitality design, lighting design, acoustical design, religious building design, and others.

POST-GRADUATE STUDIES
BArch graduates who wish to continue academic study may choose to apply at another institution to master’s or doctoral programs in architecture or related disciplines.

TYPICAL PROGRAM
In the first and second years, a typical day consists of two one-hour lectures and a two-hour studio. At the junior, senior, and fifth-year levels, the studio meeting times are three hours. Students can expect to spend additional time working on projects and course work out of studio.

Entry level of student into math and composition/literature sequences is a function of student’s high school preparation and mathematics and English placement examinations.

Math through Technical Calculus I must be completed. Students who start at a higher level of math must meet all SUNY general education and campus liberal arts and sciences course credit requirements for graduation.

GENERAL NOTES:
Students must complete at least one course from seven of the 10 SUNY General Education silos.

All students who transfer in courses from another institution must undergo an academic portfolio review before placement in any studio course.

Minimum of “C” is required to continue from one studio course to the next. (This includes: ARCH 1184, ARCH 2394, ARCH 3104, ARCH 4304, ARCH 5306, ARCH 6306, ARCH 7306, ARCH 8306, ARCH 8716, and ARCH 8776.)

Be advised that a prior felony conviction may impede a student's ability to participate in an internship and/or receive licensure.
AUTobody REPAIR

AOS Degree – Code #0453

Eric Wilmot, Department Chair and Program Coordinator
Email address: wilmote@alfredstate.edu

This specialization will prepare you with 1,800 hours of practical experience and classroom training applicable to the dynamic autobody repair field. Your laboratory experience will range from spot repair, total wreck repair, and specialized paint jobs to estimating, panel replacement, and frame straightening.

ADVANTAGES

- Inter-Industry Conference on Automotive Collision Repair (ICAR) certified.
- Students successfully completing autobody repair may wish to remain at Alfred State in the automotive service technician; heavy equipment, truck and diesel technician; or motorsports programs for another one-and-one-half years to receive a second degree upon successful completion of course. This requires department chair’s approval.

PROGRAM STUDENT LEARNING OUTCOMES

- Demonstrate a focused, coherent, organized written report.
- Perform mathematic calculations required for entry-level automotive employment.
- Demonstrate a functional ability to read and retain/apply written instructions and specifications relevant to their work environment.
- Demonstrate critical thinking and program-solving skills to work with sheet metal repair.
- Demonstrate ability to identify different types of frame damage.
- Demonstrate painting skills for B/C and single stage painting.
- Demonstrate the ability to repair frame and structure collision damage.
- Demonstrate the ability to identify, evaluate, remove, and replace various mechanical components.

DIRECT ENTRY INTO BACCALAUREATE DEGREE PROGRAM

Alfred State autobody repair graduates may enter directly into the technology management BBA degree program. Graduates who have credit for freshman composition, statistics, literature, history, and speech may complete the BBA program in two additional years; others may complete the BBA program in two-and-one-half years.

OCCUPATIONAL OPPORTUNITIES

- Autobody repair specialist
- Automotive refinisher
- Body shop owner
- Frame straightening specialist
- Shop foreman
- Service manager
- Wheel alignment specialist

EMPLOYMENT STATISTICS

Employment and continuing education rate of 100 percent – 67 percent are employed; 33 percent continued their education.

RELATED PROGRAMS

- Automotive Service Technician
- Heavy Equipment, Truck and Diesel Technician
- Mechanical Engineering Technology
- Motorcycle and Power Sports Technology
- Motorsports Technology
- Welding Technology

ENTRANCE REQUIREMENTS/RECOMMENDATIONS

Recommended: Algebra

REQUIRED TOOLS/EQUIPMENT

A list of required tools, equipment, PPE, etc. for all of the programs mentioned above can be found at http://www.alfredstate.edu/admissions/accepted-students/required-tools-supplies.

TECHNICAL STANDARDS

Applicants in the autobody repair program must meet the following physical requirements:

- Must be able to lift 50 pounds to eye level.
- Must be able to effectively communicate with a person 6 to 10 feet away.
- Must be able to visually decipher small images on a monitor or digital display.
- Must be able to distinguish sounds associated with mechanical failures.
- Must be able to comprehend written information found in service repair manuals.
- Must have a valid motor vehicle driver’s license.
- Students who believe they need a reasonable accommodation to participate in the program may contact Melanie Ryan in the Office of Accessibility Services. This office may be contacted by email at DisabilityServices@alfredstate.edu or by phone at 607-587-4506. Please keep in mind that some accommodations may take time to implement, so students seeking accommodations are encouraged to contact OAS as early as possible.

CERTIFICATION OR LICENSURE

Graduates may take Automotive Service Excellence (ASE) certification exams. Graduates are also eligible to take the New York State inspection certification. Students may take the ASE exam for certification in refrigerant recycling and recovery during their senior year.

GRADUATION REQUIREMENTS

A student must successfully complete all courses in the prescribed four-semester program and earn a minimum cumulative index of 2.0, which is equivalent to a "C" average.
AUTOMOTIVE SERVICE TECHNICIAN
AOS DEGREE – CODE #0451

Eric Wilmot, Department Chair and Program Coordinator
Email address: wilmotej@alfredstate.edu

This specialization includes 1,800 hours of practical and classroom training in general automotive repair geared to automotive dealership and independent garage practice. You will receive hands-on experience with all types of automobiles, including domestic, imported, gasoline, diesel, and alternative fuels with labs taught by experts in the field. All systems of the automobile are covered in the instruction, including the latest gasoline fuel injection, electronic controls, emission controls, and automatic transmission overhaul.

ADVANTAGES
• Master certified by the National Automotive Technicians Educational Foundation, Inc. (NATEF).
• National Alternative Fuels Training Consortium (NAFTC).
• NYS Licensed Inspection Station.
• Students successfully completing the general automotive service technician program may return for a third year (senior year) in heavy equipment, truck and diesel technician, motorsports technology, or motorcycle and power sports technology and earn a second associate degree.

PROGRAM STUDENT LEARNING OUTCOMES
• Demonstrate a focused, coherent, organized written report.
• Perform mathematical calculations required for entry-level automotive employment.
• Demonstrate a functional ability to read and retain/apply written instructions and specifications relevant to their work environment.
• Demonstrate the ability to understand operation and diagnostic procedures of modern vehicle electrical and electronic systems.
• Demonstrate the ability to describe operation, diagnose, and repair automotive drive train systems.
• Demonstrate the ability to describe operation, diagnose, and repair modern engines.
• Demonstrate the ability to describe operation, diagnose, and repair modern automotive steering, brakes, and suspension systems.

DIRECT ENTRY INTO BACCALAUREATE DEGREE PROGRAM
Alfred State automotive service technician graduates may enter directly into the technology management BBA degree program. Graduates who have credit for freshman composition, statistics, literature, history, and speech may complete the BBA program in two additional years; others may complete the BBA program in two-and-one-half years.

OCCUPATIONAL OPPORTUNITIES
• Automatic transmission technician
• Automotive technician specialist
• Automotive diagnostic specialist
• Brake specialist
• Drivability specialist
• Fuel system specialist
• Independent repair shop owner
• Manufacturer’s service representative
• Marine engine service specialist
• Service manager
• Service salesperson
• Shop foreman
• Wheel alignment specialist

EMPLOYMENT STATISTICS
Employment and continuing education rate of 100 percent – 85 percent are employed; 15 percent continued their education.

GRADUATION REQUIREMENTS
A student must successfully complete all courses in the prescribed four-semester program and earn a minimum cumulative index of 2.0, which is equivalent to a “C” average.
**BIOLOGICAL SCIENCE**

**AAS DEGREE - CODE #1554**

Dr. Ashley Shalooc, Program Coordinator  
Email address: shalooc@alfredstate.edu

The biological science degree is a hands-on program designed to prepare you to excel in various scientific laboratories or to continue your education in a number of science or pre-professional fields. The program provides a foundation in biology, chemistry, and mathematics as well as a common core of general education courses.

**ADVANTAGES**

Biological science is a flexible program that can be tailored to fit the educational requirements of a variety of laboratory-related occupations and transfer opportunities.

**PROGRAM STUDENT LEARNING OUTCOMES**

- Explain and apply the scientific method in order to document, interpret, and present results of an experiment.
- Evaluate scientific literature to summarize current thinking on a significant topic.
- Display effective interpersonal communication and work skills in the lecture and laboratory setting.
- Choose and employ proper safety practices in the laboratory.
- Demonstrate the calibration and operation of scientific instrumentation.
- Utilize gravimetric and volumetric methods to determine the physical and chemical properties of matter.
- Make both organic and inorganic compounds according to prescribed multi-step syntheses.
- Use microbiological techniques to isolate organisms in pure culture.
- Describe the association of structure and function of plants and animals.
- Classify groups of organisms according to taxonomic criteria and evolutionary relationships.

**DIRECT ENTRY INTO BACCALAUREATE DEGREE PROGRAMS**

Alfred State biological science graduates may enter directly into the forensic science technology BS, health sciences BS, the interdisciplinary studies BTech, or the technology management BBA degree program.

**CONTINUING EDUCATION OPPORTUNITIES**

The program also enables graduates to transfer to four-year programs in biology and chemistry as well as programs such as sports medicine, medical technology, ultrasound technology, and pre-professional programs (medicine, veterinary, dentistry, and pharmacy).

**OCCUPATIONAL OPPORTUNITIES**

- Environmental monitoring
- Pharmaceutical testing
- Wastewater treatment
- Laboratory technician

**EMPLOYMENT STATISTICS**

Employment and continuing education rate of 100 percent – 67 percent are employed; 33 percent continued their education.

**RELATED PROGRAMS**

- Forensic Science Technology (BS)
- Health Sciences (BS)

**ENTRANCE REQUIREMENTS/RECOMMENDATIONS**

Required: Algebra, Geometry, Algebra 2, Biology, Chemistry

Students who believe they need a reasonable accommodation to participate in this program may contact Melanie Ryan in the Office of Accessibility Services. This office may be contacted by email at DisabilityServices@alfredstate.edu or by phone at 607-587-4506. Please keep in mind that some accommodations may take time to implement, so students seeking accommodations are encouraged to contact OAS as early as possible.

**TECHNICAL STANDARDS:**

Technical Standards for the biological science program:

It is essential that students in this degree program are able to fully and safely participate, with or without reasonable accommodation, in all classroom, laboratory, field, internship, and research experiences required for completion of the program. Students in this degree program should be able to:

- Function in a safe manner, not placing themselves, faculty, staff, or other students in jeopardy
- Appropriately and safely use standard laboratory equipment, materials, and instrumentation to include possession of fine motor skills and mobility
- Make sensory visual and auditory observations during, and interpret data from, all required laboratory assignments
- Communicate effectively, both orally and in writing

**GRADUATION REQUIREMENTS**

A minimum of 63 credit hours is required for graduation, with an overall cumulative index of 2.0. A grade of “C” or better is required in the core science courses (those which have BIOL or CHEM prefixes).

**BIOLOGICAL SCIENCE - AAS DEGREE**

**TYPICAL FOUR-SEMESTER PROGRAM**

MATH courses must be at the level of MATH 1033 college algebra or above.

---

**Weekly Themes:**

- First: Chemistry
- Second: Biological Science
- Third: Mathematics
- Fourth: Environmental Science

---

**Required Courses:**

- General Biology
- General Chemistry
- Principles of Microbiology
- Organic Chemistry
- Organic Chemistry II
- Biological Sciences Seminar

---

**Elective Courses:**

- Technical Electives
- Perspectives Electives
- Open Electives

---

**Suggested Courses:**

- Environmental Science
- Forensic Science
- Biological Sciences

---

**Transfer Opportunities:**

- To four-year programs in biology, chemistry, and related fields.

BUILDING TRADES: BUILDING CONSTRUCTION

AOS DEGREE – CODE #0420
R. Jack Jones, Department Chair
Email address: rjonesrj@alfredstate.edu

Tim Rohrer, Program Coordinator
Email address: rohrerta@alfredstate.edu

The building construction program will provide you with instruction in the basic skills required of the carpenter and the mason in the construction of residential or other light-frame commercial and masonry buildings. You will also gain extensive experience in building layout, foundations, framing, sheathing, exterior and interior trim, block work, brick, and concrete construction.

ADVANTAGES
• Coupled with practical experience, the program provides the necessary theory connected with carpentry and masonry operations, as well as blueprint reading, cost and materials estimating, surveying for building layout and control, and safety on the job.
• A large part of the program is actual on-the-job training under the supervision of qualified instructors. Frequently, concrete and lumber companies instruct students in the uses of their products.

PROGRAM STUDENT LEARNING OUTCOMES
• Measure, layout, and cut materials accurately and build various construction systems.
• Safely set up and operate construction tools and equipment.
• Accurately estimate materials for a project and explain how to manage materials and supervise people.
• Read and interpret construction prints.
• Demonstrate essential problem-solving skills generally employed in the construction industry.
• Demonstrate effective written construction communication.
• Demonstrate effective oral communication.
• Perform common mathematical construction calculations.
• Demonstrate the proper selection and installation of materials used to build various construction projects.
• Perform computer-based research and communication.

DIRECT ENTRY INTO BACCALAUREATE DEGREE PROGRAM
Alfred State building trades: building construction graduates may enter directly into the construction supervision BTech or technology management BBA degree program. Graduates who have credit for freshman composition, statistics, literature, history, and speech may complete the baccalaureate program in two additional years; others may complete the program in two-and-one-half years.

OCCUPATIONAL OPPORTUNITIES
• Manufacturers
• Cabinetmaker
• Sales
• Shop foreman
• Installer (cabinets, etc.)
• Dealers
• Maintenance supervisor
• Carpenter
• Contractor
• Self-employment
• Expediter
• Construction superintendent
• Construction foreman
• Mason
• Estimator

EMPLOYMENT STATISTICS
Employment and continuing education rate of 95 percent – 78 percent are employed; 17 percent continued their education.

RELATED PROGRAMS
• Heating, Ventilation, and Air Conditioning
• Architectural Technology

Construction Engineering Technology
• Electrical Construction and Maintenance Electrician
• Masonry
• Surveying Engineering Technology

REQUIRED TOOLS/EQUIPMENT
A list of required tools, equipment, PPE, etc. for all of the programs mentioned above can be found at http://www.alfredstate.edu/admissions/accepted-students/required-tools-supplies.

ENTRANCE REQUIREMENTS/RECOMMENDATIONS
Recommended: Algebra and Geometry

TECHNICAL STANDARDS
Applicants in the building trades: building construction program must be able to meet the following physical requirements:
• Must be able to lift 50 pounds to shoulder height.
• Must be able to perform safely in the laboratory.
• Must be able to effectively communicate with a person 20 feet away.
• Must be able to climb a ladder and/or able to climb, un-aided, onto and off of equipment using three points of contact.
• Must be able to safely respond to a backup warning alarm.
Students who believe they need a reasonable accommodation to participate in this program may contact Melanie Ryan in the Office of Accessibility Services (OAS). This office may be contacted by email at DisabilityServices@alfredstate.edu or by phone at 607-587-4506. Please keep in mind that some accommodations may take time to implement, so students seeking accommodations are encouraged to contact OAS as early as possible.

GRADUATION REQUIREMENTS
A student must successfully complete all courses in the prescribed four-semester program and earn a minimum cumulative index of 2.0, which is equivalent to a "C" average.
BUSINESS ADMINISTRATION
AS DEGREE – CODE #0671

Mark Bloxsom, Program Coordinator
Email address: bloxsomj@alfredstate.edu

Whether you’re interested in the management, administrative, or technical side of modern business, our degree programs will prepare you with the hands-on courses and real-world skills necessary to succeed in this ever-evolving field. Our business administration AS (transfer) program is designed primarily to provide you with the foundation needed to continue your formal education in the business field in a four-year program.

ADVANTAGES
• Prepares graduates for the rapid pace of technological advancement and an increasingly global society by emphasizing managerial and technical skills and the ability to stay abreast in the dynamic field of business in today’s economy.
• Students gain a thorough foundation in written and oral communication, presentation, and decision-making skills, as well as experience working as part of a team.

PROGRAM STUDENT LEARNING OUTCOMES
• Recognize the primary theories within the principle functional areas of business.
• Demonstrate professional business communication.
• Illustrate critical thinking and effective decision-making within the principle functional areas of business.
• Identify ethical issues within business.

A laptop computer is required for students entering this degree program. Laptop specifications are available at www.alfredstate.edu/required-laptops.

DIRECT ENTRY INTO BACCALAUREATE DEGREE PROGRAMS
Alfred State business administration graduates may enter directly into either the business administration BBA, the financial planning BBA, the interdisciplinary studies BTech, or the technology management BBA degree program at Alfred State.

CONTINUING EDUCATION OPPORTUNITIES
Students may transfer directly into one of our own BBA degree programs or to another college. Although not limited to these schools, common transfer institutions include: Alfred University, St. Bonaventure University, Rochester Institute of Technology, St. John Fisher College, SUNY at Albany, University at Buffalo, SUNY College at Brockport, SUNY College at Fredonia, SUNY College at Geneseo, SUNY College at Oneonta, SUNY College at Oswego, SUNY at Binghamton, Cornell University, Canisius College, Niagara University, and Hilbert College.

EMPLOYMENT STATISTICS
Employment and continuing education rate of 100 percent – 45 percent are employed; 55 percent continued their education.

* Calculus I is essential to achieving junior status in business programs at the following SUNY campuses: the University at Buffalo, Binghamton University, and the University at Albany. Therefore, Calculus I is recommended if you are continuing your education at any one of those universities.

GRADUATION REQUIREMENTS
62 semester hours with a 2.0 cumulative index.
BUSINESS ADMINISTRATION (BBA)

BBA DEGREE – CODE #0280

Francine Staba, Program Coordinator
Email address: stabafm@alfredstate.edu

Whether you’re interested in the management, administrative, or technical side of modern business, our degree programs will prepare you with the hands-on courses and real-world skills necessary to succeed in this ever-evolving field. Our business administration BBA offers you preparation for positions of leadership and responsibility in business and industry, governmental and not-for-profit organizations, and graduate study. Students develop important analytical and critical thinking skills necessary for success in today’s business environment.

ADVANTAGES

• Prepares graduates for the rapid pace of technological advancement and an increasingly global society by emphasizing managerial and technical skills and the ability to stay abreast in the dynamic field of business in today’s economy.
• The BBA degree in business administration is designed to allow students to enter as freshmen or to transfer in after earning their AAS or AS business degree.
• An accelerated three-year option exists for highly motivated and academically talented students.

A laptop computer is required for students entering this degree program. Laptop specifications are available at www.alfredstate.edu/required-laptops.

PROGRAM STUDENT LEARNING OUTCOMES

• Demonstrate technical competence in domestic and global environments within the principle functional areas of business.
• Analyze business problems and devise solutions using critical thinking, decision-making processes, and decision-support tools.
• Formulate a strategic plan using effective teamwork while integrating the major functional areas of business and innovation.
• Evaluate software, technology, and information systems in regards to business operations.
• Identify comprehensive business issues and communicate findings and solutions.
• Identify the strategic management environment in relation to the current financial, legal, economic, and social environments.
• Analyze the role of ethics, government regulations, and legalities in management processes.

OCCUPATIONAL OPPORTUNITIES

• Administrative services manager
• Business managers of artists/athletes
• Business operations specialist
• Financial analysts/managers/specialists
• General and operations managers
• Human resource specialist
• Loan counselors/officers
• Management analysts
• Marketing managers
• Sales managers

EMPLOYMENT STATISTICS

Employment and continuing education rate of 100 percent – 70 percent are employed; 30 percent continued their education.

### GRADUATION REQUIREMENTS

- 122 credit hours
- 30 credit hours of the 45 upper-level credit hours for this degree must be taken at Alfred State
- Cumulative overall index of at least 2.0
CODING & REIMBURSEMENT SPECIALIST
CERTIFICATE – CODE #1671
Erica Matteson, RHIA, Program Coordinator
Email address: matteeses@alfredstate.edu

Securing accurate and appropriate payment for health care services is a challenge for health care providers, insurance companies, and patients. Today’s complex health care insurance and governmental payment systems depend on medical coding to determine proper payment. The coding and reimbursement specialist program incorporates the knowledge and skills you will need to assign the correct code for prompt and accurate reimbursement. As a C&RS professional, you will analyze patient records, assign ICD (ICD-10-CM/ICD-10-PCS), CPT, and HCPCS codes to diagnoses, procedures, and services provided to patients for timely and accurate health care billing, reimbursement, and medical necessity.

Online instruction is organized under the health information technology program (HIT program). This means if you initially select the C&RS program, you can transfer courses into the HIT program and earn your Associate in Applied Science (AAS) degree.

ADVANTAGES
- Alfred State’s comprehensive coding certificate program offers individuals the opportunity to pursue a business-related career essential to the health care industry.
- Alfred State’s C&RS program is entirely internet-based education, with the exception of the 80 hours of Professional Practice Experience.
- Teaching faculty in C&RS curriculum have real-world Health Information Management (HIM) industry experience.

PROGRAM STUDENT LEARNING OUTCOMES
- Apply biomedical knowledge (including medical terminology, anatomy & physiology, pathophysiology, and pharmacology) to apply diagnosis/ procedure codes (ICD-10-CM, ICD-10-PCS, CPT, and HCPCS level II) according to current nomenclature.
- Use established federal guidelines, accreditation standards, and APC and DRG calculator/grouper software to comply with health care documentation (review), reimbursement, and reporting requirements.
- Apply HIM knowledge as defined by organizational policy and external regulations (e.g., Medicare, Medicaid, and managed care) and standards to maintain the accuracy and completeness of the patient record.
- Apply HIM knowledge of policies and procedures for confidentiality and security measures regarding the access and disclosure of protected health information (PHI) to authorized users.
- Apply HIM knowledge in the collection, maintenance, and reporting of data for clinical indices/databases/registries to meet specific organizational and regulatory needs for the purposes of medical research and education.
- Apply HIM knowledge of legal, ethical, accreditation, and certification standards as appropriate for the management of health information.
- Apply basic methods when calculating descriptive, institutional, and health care vital statistics.
- Apply the use of common software applications (e.g., spreadsheets, databases, word processing, graphics, presentation, email, and so on) and HIM-related software applications (e.g., release of information, electronic health record, patient record abstracting, and so on).
- Apply HIM knowledge to promote ethical standards of practice to health information management and coding.
- Demonstrate critical thinking to problem-solving and reasoning skills to health information management and coding practices.

PROFESSIONAL PRACTICE EXPERIENCE
Students complete non-paid professional practice experiences (PPEs) in the health information (coding) department of a health care facility (80 hours) in their last semester of study. Students are not a substitute for paid staff during PPEs, which means they are expected to receive appropriate supervision and mentoring during completion of all tasks.

The Joint Commission “Hospital Accreditation Standards Manual” requires hospitals to implement “a process to ensure that a person’s qualifications are consistent with his/her job responsibilities.” This standard “applies to staff, students, and volunteers,” and it further states that the hospital is responsible for verifying “the following according to law, regulation, or hospital policy: information on criminal background.” As such, Alfred State students who complete PPEs in the C&RS program may be required to undergo a criminal background check prior to placement at the facility. In addition, the facility may require students to undergo a physical examination (on-site at the facility or by the student’s primary care provider) prior to beginning the PPE. The physical examination includes drug screening, a TB test, and/or DTB, hepatitis B, and/or MMRV immunization or status. Students may be required to incur costs associated with the criminal background check and/or physical examination.

Students may be required to attend an on-site orientation at the professional practice facility, which could be several days in length beyond the 80 PPE hours. Students must make appropriate arrangements with their current employer to complete the 80 hours at the PPE host site.

C&S ENTRANCE REQUIREMENTS & RECOMMENDATIONS
Required:
- High school biology or equivalent
- Must be able to visually read computer monitor
- Must be able to use keyboard and mouse
- Must be able to attend Professional Practice Experience (PPE) course, including 80 hours at a health care facility within reasonable driving/travel distance to home.
- Keyboarding, MS Office Professional

Working in the health information management (HIM) profession requires long periods of standing and/or sitting. Job duties typically include handling paper documents and use of computer screens. Near-vision reading of paper records or computer screens, including the use of multiple computer applications, is required 95 percent of the time. Documents are handwritten on paper, and other documents and information used are on computer screens, including scanned documents and images. The computer screen fonts may be small. HIM professionals spend the greater portion of the work day reading and analyzing both handwritten and computerized documents, and use multiple software applications such as the electronic health record. The extensive use of a computer keyboard and mouse is required. Individuals should assess their personal limitations and abilities within these working environments, as HIM candidates will be assessed in all of these skill sets during the hiring process.

Students who believe they need a reasonable accommodation to participate in this program may contact Melanie Ryan in the Office of Accessibility Services. This office may be contacted by email at DisabilityServices@alfredstate.edu or by phone at 607-587-4506. Please keep in mind that some accommodations may take time to implement, so students seeking accommodations are encouraged to contact OAS as early as possible.

CONTINUING EDUCATION OPPORTUNITIES
Graduates are eligible to continue their education by completing the health information technology (HIT) program. The HIT program is also internet-based.

OCCUPATIONAL OPPORTUNITIES
- Hospitals and other health care facilities
- Clinics and physicians’ offices
- Insurance companies
- State and federal agencies
- Legal firms
- Software companies
- Consulting firms

EMPLOYMENT STATISTICS
Employment and continuing education rate of 100 percent – 100 percent are employed.

CERTIFICATION
Graduates are eligible to take national certification examinations offered by the American Health Information Management Association (AHIMA) and the American Academy of Professional Coders (AAPC). AHIMA offers Certified Coding Specialist (CCS) exams, and the AAPC offers Certified Professional Coder (CPC) exams. It is recommended students work for a minimum of one year full-time in a coding position before taking the CCS and CPC exams.

Be advised that a prior felony conviction may impede a student’s ability to participate in a required professional practice experience.

### GRADUATION REQUIREMENTS

C&RS students are required to earn a grade of at least a "C" or better in each BiOL and MEDR prefix course prior to placement in the PPEs. Students must also earn a grade of at "C” in the MEDR courses to graduate from the C&RS program.

Should a student fail MEDR or BiOL courses a second time: They may re-take MEDR and/or BiOL courses as a continuing education student. Then, upon successful completion with a "C" or better, apply for readmission to the C&RS program. Or, students may retake the BiOL/MEDR equivalent courses on-campus at Alfred State or at another college, and transfer the credit back to Alfred State after having obtained pre-approval of the course for transfer credit and earning a grade of "C" or better.
COMPUTER ENGINEERING TECHNOLOGY

AAS DEGREE – CODE #1602
BS DEGREE - CODE #1357

Dr. Maryam Nasri, Program Coordinator
Email address: nasrim@alfredstate.edu

The computer engineering technology program will provide you with the cutting-edge industry knowledge and hands-on skills necessary to secure a career as an applied engineer capable of installing, designing, supporting, and maintaining computer systems and networks. This is an active, technically oriented program with a focus on computer system hardware and network infrastructure, as well as software development and operating systems. We’ve designed these degrees to prepare you for professional examinations leading to certifications such as the CompTIA A+ and Network+, Microsoft Certified System Administrator (MCSA), Microsoft Certified System Engineer (MCSE), and Cisco Certified Network Associate (CCNA).

ADVANTAGES
- Both AAS and BS programs are accredited by the Engineering Technology Accreditation Commission of ABET, [http://www.abet.org](http://www.abet.org).
- In the first year of the program, students gain a foundation of knowledge in digital and electronic circuits followed by the development of skills in computer hardware, operating systems, and networking.

A laptop computer is required for students in the computer engineering technology program. The college will provide a list of appropriate laptops and wireless modem cards to all accepted students. Some courses may require specialized tools and/or electronic components.

DIRECT ENTRY INTO BACCALAUREATE DEGREE PROGRAMS
Alfred State computer engineering technology AAS graduates may enter directly into either the computer engineering technology BS, the interdisciplinary studies BTech, or technology management BBA degree program.

CONTINUING EDUCATION OPPORTUNITIES
Graduates from the AAS computer engineering technology program are eligible to continue their education by enrolling in a baccalaureate program in computer engineering technology at Alfred State or elsewhere. Our computer engineering technology AAS two-year degree program is the same as the first two years of the computer engineering technology BS four-year program.

OCCUPATIONAL OPPORTUNITIES
- Computer network technician
- Computer network systems integrator
- Computer network support specialist
- Computer network administrator
- Computer network engineering technician
- Computer systems engineering technician

EMPLOYMENT STATISTICS
Employment and continuing education rate:

Computer engineering technology (AAS degree): No data available.

Computer engineering technology (BS degree): 75 percent – 50 percent are employed; 25 percent continued their education.

CERTIFICATION OR LICENSURE
The Bachelor of Science in computer engineering technology is recognized as a "professional degree" that qualifies for experience/education credit toward Professional Engineering (PE) licensure. Graduates from Alfred State’s program are allowed six years of the required 12 years of education/experience credit, and are eligible to take the Fundamentals of Engineering (FE), formerly called Engineer-in-Training (EIT), examination upon graduation.

ENTRANCE REQUIREMENTS/RECOMMENDATIONS (AAS)
Required: Algebra, Geometry, Algebra 2
Recommended: Physics

ENTRANCE REQUIREMENTS/RECOMMENDATIONS (BS)
Required: Algebra, Geometry, Algebra 2
Recommended: Physics

GRADUATION REQUIREMENTS - AAS DEGREE
- 62 semester credit hours in program as listed above
- 25 semester credit hours of liberal arts and sciences
- Four of 10 General Education areas
- 2.0 or above cumulative grade point average
- 2.0 or above grade point average in major courses (ELET, CISY)
- Approval of department faculty

GRADUATION REQUIREMENTS - BS DEGREE
- 126 semester credit hours in eight-semester program
- 60 semester credit hours of liberal arts and sciences
- Seven of 10 General Education areas
- Minimum 45 upper-division credit hours
- Minimum 24 hours upper division in major
- Minimum of 30 hours upper division in residence
- 2.0 or above cumulative grade point average
- 2.0 or above grade point average in major courses (BSET, CISY, ELET)
- Approval of department faculty

Be advised that a prior felony conviction may impede a student's ability to receive licensure.
A laptop computer is required for students entering the computer information systems program. Laptop specifications are available at www.alfredstate.edu/required-laptops.

PROGRAM STUDENT LEARNING OUTCOMES
- Communicate effectively and efficiently, both orally and in writing.
- Employ critical thinking and problem-solving skills in developing solutions to problems.
- Create and modify functional, clear, concise software design and implementation with current programming languages.
- Create functional webpages using web scripting languages.
- Install, configure, troubleshoot, and administer a simple network.
- Demonstrate proficiency either in two or more operating systems or two or more database systems.
- Demonstrate proficiency in basic office automation software.
- Solve problems in a team setting as a team member.
- Identify issues of professional ethics, including copyright laws, plagiarism, and professional etiquette.
- Solve applied mathematical problems.

DIRECT ENTRY INTO BACCALAUREATE DEGREE PROGRAMS
Alfred State computer information systems graduates may enter directly into either the cyber security BTech, information technology: applications software development BTech, information technology: network administration BTech, information technology: web development BTech, the interdisciplinary studies BTech, or technology management BBA degree program.

CONTINUING EDUCATION OPPORTUNITIES
To facilitate the transfer of graduates choosing to continue their education at the baccalaureate level, students are encouraged to make their intentions known to their academic adviser during their freshman year. Through the careful use of elective courses, students can realize excellent transfer credit.

Transfer into the information technology programs: network administration, web development, and applications software development will place them at junior status.

OCCUPATIONAL OPPORTUNITIES
- Network management
- Systems administration
- Computer technology
- Computer support
- Computer programming
- Web development
- Network administrators

EMPLOYMENT STATISTICS
Employment and continuing education rate of 100 percent – 100 percent continued their education.

* If not required, take LAS elective to complete degree requirements of 3 credits, otherwise take free elective.

Adviser-approved mathematics courses do not include MATH 1004, MATH 1104, MATH 1014, or MATH 1143.

Professional electives may include CISY, business, and selected courses from math or engineering as approved by the adviser.
GRADUATION REQUIREMENTS

Must complete a minimum of 24 credit hours of required CISY courses and nine credit hours of professional electives approved by adviser with a minimum 2.0 cumulative index. Twenty credit hours of liberal arts courses, a minimum overall cumulative index of 2.0, along with other requirements as stated in the College Academic Regulations, must be met by candidates of the AAS degree. Must successfully complete a minimum of 61 credit hours of course work.
COMPUTER SCIENCE
AS DEGREE – CODE #0532
Ronald Keeney, Program Coordinator
Email address: keeneyrh@alfredstate.edu

The computer science program at Alfred State was one of the originally established programs in the SUNY system. It is a comprehensive program, which will prepare you for this fast-moving field with courses in the underlying theories of computing, as well as the specific applications of information manipulation and problem solving.

ADVANTAGES
Students develop strong written and oral communication, critical thinking, and problem-solving skills.

A laptop computer is required for students entering the computer science program. Laptop specifications are available at www.alfredstate.edu/required-laptops.

PROGRAM STUDENT LEARNING OUTCOMES

• Communicate effectively and efficiently, both orally and in writing.
• Employ critical thinking and problem-solving skills in developing solutions to problems.
• Create and modify functional, clear, concise software design and implementation with current programming languages.
• Demonstrate the scientific method in one area of natural science.
• Assess and implement appropriate data structures within a programming project.
• Demonstrate proficiency in basic office automation software.
• Solve problems in a team setting as a team member.
• Identify issues of professional ethics, including copyright laws, plagiarism, and professional etiquette.
• Demonstrate proficiency with mathematical principles through the level of calculus or discrete mathematics.

DIRECT ENTRY INTO BACCALAUREATE DEGREE PROGRAMS
Alfred State computer science graduates may enter directly into either the interdisciplinary studies BTech or technology management BBA degree program.

CONTINUING EDUCATION OPPORTUNITIES
The primary focus of the computer science program is transfer. The AS degree granted is specifically designed to maximize transfer credit to four-year programs. Transfer into the information technology programs: network administration, web development, and applications software development is possible with junior status with careful selection of courses for electives.

OCCUPATIONAL OPPORTUNITIES

• Network management
• Systems administration
• Computer engineering technology
• Computer support
• Computer programming
• Database administration
• Web development

EMPLOYMENT STATISTICS
Employment and continuing education rate of 100 percent – 100 percent continued their education.

Professional electives may include CISY, business, and selected courses from math or engineering as approved by the adviser.

GRADUATION REQUIREMENTS
Must complete a minimum of 24 credit hours of required CISY courses and one professional elective approved by adviser with a 2.0 cumulative index. A minimum cumulative index of 2.0, along with other requirements as stated in the College Academic Regulations, must be met by candidates for the AS degree. A minimum of 62 credit hours of course work with 30 credit hours in liberal arts is required.
The program in construction engineering technology includes a well-designed balance of theoretical and laboratory studies, providing students with a broad knowledge of civil engineering technology and the construction fields. This field is expanding rapidly, and our technical curricula will give you a broad-based education, as well as the hands-on skills and experience needed for leadership in today’s construction business.

ADVANTAGES
- The college offers testing and certification with the American Concrete Institute that students can earn their first semester.
- Students develop the ability to function effectively as a member of a technical team, as well as the ability to apply written, oral, and graphical communication in both technical and nontechnical environments.
- This program is accredited by the Engineering Technology Accreditation Commission of ABET, http://www.abet.org.

A laptop computer is required for students entering the construction engineering technology program. Laptop specifications are available at www.alfredstate.edu/required-laptops.

A student who completes the AAS degree can complete the bachelor’s degree in two additional years.

PROGRAM STUDENT LEARNING OUTCOMES
- An ability to apply knowledge, techniques, skills and modern tools of mathematics, science, engineering, and technology to solve well-defined engineering problems appropriate to the discipline.
- An ability to design solutions for well-defined technical problems and assist with the engineering design of systems, components, or processes appropriate to the discipline.
- An ability to apply written, oral, and graphical communication in well-defined technical and non-technical environments; and an ability to identify and use appropriate technical literature.
- An ability to conduct standard tests, measurements, and experiments and to analyze and interpret the results.
- An ability to function effectively as a member of a technical team.

PROGRAM EDUCATIONAL OBJECTIVES
Program educational objectives were established with the assistance of the Industrial Advisory Committee and are reviewed periodically. The construction engineering technology program produces graduates who:
- Write, read, and orally present technical reports, letters, and projects that meet the standards of the profession.
- Understand and are able to complete various activities related to construction such as interpret construction documents, draw plans using computer-aided drafting, complete an estimate, manage project activities, and be able to technically review construction materials used on the project.
- Recognize the need for and have an ability to engage in continued formal education as well as lifelong learning.

DIRECT ENTRY INTO BACCALAUREATE DEGREE PROGRAMS
Alfred State construction engineering technology graduates may enter directly into either the construction management BS, the construction supervision BTech, the interdisciplinary studies BTech, or the technology management BBA degree program.

Entry level of student into math and composition/literature sequences is a function of student’s high school preparation and mathematics and English placement examinations.

Students receiving credit for math classes shown in the typical four-semester program may require additional LAS electives to complete degree requirements.

Students must complete two technical electives and two General Education electives.

**Suggested Technical Electives:**

- CIVL 2204 Surveying II
- CIVL 6113 Environmental Technical Concepts
- CIVL 7103 Land Development and Design
- ARCH 4013 Municipal Codes & Regulations
- Other technical electives by department approval.

**GRADUATION REQUIREMENTS**

- 2.0 cumulative grade point average, and department requirement of 2.0 grade point average in major courses (CIVL).
Do you dream of a leadership role in the construction industry? Then this program is for you. Our expert faculty have designed a series of courses that will familiarize you with all aspects of construction management. Technical course work is combined with specific construction management courses as well as several business courses, giving you a broad-based education.

ADVANTAGES

- Alfred State students compete annually in the Associated Schools of Construction Northeast Region student competition.
- Students can compete for scholarships given by the Associated General Contractors of New York.
- Seniors in the BS program are required to take the Associate Constructor Level I exam prior to graduation.
- This program is accredited by the American Council for Construction Education (ACCE), [1717 North Loop Road 1604 East, Suite 320, San Antonio, TX 78232].
- This program is accredited by the Applied and Natural Science Accreditation Commission of ABET, www.abet.org.
- Students typically gain work experience through summer employment with construction companies.

A laptop computer is required for students entering the construction management program. Laptop specifications are available at www.alfredstate.edu/required-laptops.

PROGRAM STUDENT LEARNING OUTCOMES (ACCE ACCREDITATION)

- Create written communications appropriate to the construction discipline.
- Create oral presentations appropriate to the construction discipline.
- Create a construction project safety plan.
- Create construction project cost estimates.
- Create construction project schedules.
- Analyze professional decisions based on ethical principles.
- Analyze construction documents for planning and management of construction processes.
- Analyze methods, materials, and equipment used to construct projects.
- Apply construction management skills as a member of a multi-disciplinary team.
- Apply electronic-based technology to manage the construction process.
- Apply basic surveying techniques for construction layout and control.
- Understand different methods of project delivery and the roles and responsibility of all constituencies involved in the design and construction process.
- Understand construction risk management.
- Understand construction accounting and cost control.
- Understand construction quality assurance and control.
- Understand construction project control processes.
- Understand the legal implications of contract, common, and regulatory law to manage a construction project.
- Understand the basic principles of sustainable construction.
- Understand the basic principles of structural behavior.
- Understand the basic principles of mechanical, electrical, and piping systems.

PROGRAM EDUCATIONAL OBJECTIVES

Program educational objectives were established with the assistance of the Industrial Advisory Committee and are reviewed periodically. The construction management program produces graduates who:

- Understand technical components and techniques of construction.
- Write, read, and orally present information standard to the construction industry.
- Understand methods and tools to manage both a construction project and construction company.
- Understand safety and risk management.
- Understand industry ethics and statutory requirements.

OCCUPATIONAL OPPORTUNITIES

- Project manager
- Project engineer
- Estimator
- Project scheduler
- Planner
- Construction supervisor
- Plant manager
- Construction equipment sales
- Materials sales
- Facilities management

EMPLOYMENT STATISTICS

Employment and continuing education rate of 100 percent – 100 percent are employed.

### GENERAL NOTES:

Students receiving credit for math classes shown in the typical eight-semester program may require additional LAS electives to compete degree requirements.

Must meet seven of the 10 General Education areas.

### GRADUATION REQUIREMENTS

2.0 cumulative grade point average, and department requirement of 2.0 grade point average in major courses (CIVL).
CONSTRUCTION SUPERVISION

BTECH DEGREE – CODE #635

Jeff Marshall, Program Coordinator
Email address: marshajk@alfredstate.edu

The Bachelor of Technology (BTech) in construction supervision is a completion degree that will add valuable construction business skills to a technical background. Students with carpentry, heavy equipment, electrical, mechanical, and architecture skills, to name a few, will be able to see how their skills are utilized to build the environment in which they live. The BTech in construction supervision will give graduates a working knowledge of construction estimating, scheduling, and contract law. These skills along with their technical competency will make graduates a prized asset to companies that are involved in the construction industry. The program includes a full-semester internship.

The program is set up as a completion degree, meaning students entering must have an associate degree or 60 credits in a related curriculum. A true 2+2 can be achieved with 21 credits of liberal arts and sciences, including five silos of SUNY General Education completed before entering the program.

ADVANTAGES

• Students take their distinct technical background and apply it in the construction industry through project-based learning.
• With a cohort of students from many different fields of prior study, students will gain an interdisciplinary appreciation of the construction industry.
• Students will gain a strong background in construction contractual requirements.
• Students will expand their understanding of construction job site cost control.

PROGRAM STUDENT LEARNING OUTCOMES

• Create written communication appropriate to the construction discipline.
• Create oral presentation appropriate to the construction discipline.
• Create a construction project safety plan.
• Create construction project cost estimates.
• Create construction project schedules.
• Analyze professional decisions based on ethical principles.
• Analyze construction documents for planning and management of construction processes.
• Apply construction management skills as a member of a multi-disciplinary team.
• Apply electronic-based technology to manage construction processes.
• Understand different methods of project delivery and the roles and responsibilities of all constituencies involved in the design and construction process.
• Understand construction accounting and cost control.
• Understand construction quality assurance and control.
• Understand the legal implications of contract, common, and regulatory law to manage a construction project.

OCCUPATIONAL OPPORTUNITIES

• Assistant superintendent
• Equipment and material sales
• Project manager for specialty trade contractors
• Superintendent

EMPLOYMENT STATISTICS

Employment and continuing education rate of 100 percent – 100 percent are employed.

ARTICULATION

Alfred State accepts students from other two-year institutions as juniors into the construction supervision BTech program with appropriate course work and grade point average.

GRADUATION REQUIREMENTS

• 2.0 cumulative GPA and 2.0 in major courses (CIVL)
• 30 credits liberal arts and sciences
• 7 of 10 General Education silos with math silo required

RELATED PROGRAMS

• Architectural Technology
• Building Trades: Building Construction
• Construction Management
• Electrical Engineering Technology
• Heavy Equipment Operations
• Mechanical Engineering Technology

ENTRANCE REQUIREMENTS/RECOMMENDATIONS

• Students must either possess an associate degree in a related curriculum or have amassed at least 60 credit hours with a minimum cumulative GPA of 2.0, including courses that fulfill five different general education fields.
• Other majors can be considered with construction related work experience. Students without the required college credits can come into the individual studies (AS) program as a bridge program to the construction supervision (BTech) program.
• Recommended minimum of five SUNY General Education categories covered (BC and MA included).
• Recommended minimum of 21 credits in liberal arts and sciences.
• A laptop computer will be required of all students. See laptop specifications at www.alfredstate.edu/required-laptops.
• Students entering from an AOS degree will need to work out a general education completion plan with the department chair or curriculum coordinator.

TECHNICAL STANDARDS

Students in the construction supervision program must meet the following requirements:

• Students must have the ability to use industry-standard software and computers.
• Students must have the ability to traverse varying types of construction sites.

Students who believe they need a reasonable accommodation to participate in this program may contact the Office of Accessibility Services by email at DisabilityServices@alfredstate.edu or by phone at 607-587-4506. Please keep in mind that some accommodations may take time to implement, so students seeking accommodations are encouraged to contact OAS as early as possible.

COURT AND REALTIME REPORTING
AAS DEGREE – CODE 6047
Melissa Blake, Program Coordinator
Email address: blakemj@alfredstate.edu

This program, approved by the National Court Reporters Association, will prepare you for a career in various court reporting fields—from official to freelance to realtime and closed captioning for the hearing impaired.

ATTRIBUTES
- Independence
- Great Lifestyle
- Prestige
- Flexibility
- Mobility
- Exciting Work Environments

ADVANTAGES
- Development of high-speed recording skills to 225-plus words per minute through the use of real-time translation machine shorthand and computer aided transcription (CAT).
- In the first year, students learn realtime shorthand theory and develop computer skills that will enhance their overall employability.
- Development of skills in recording and transcribing specialized court reporting matter starts in the summer term and continues through the second year.
- The college offers court reporting courses online, making it possible for students who transfer in credit or attend other colleges to earn their degree from Alfred State in court and realtime reporting. This approach is perfect for working professionals, adult and returning students, and anyone who needs high flexibility in their academic schedule.

A laptop computer is required for students entering the court and realtime reporting program. Laptop specifications are available at http://www.alfredstate.edu/required-laptops.

PROGRAM STUDENT LEARNING OUTCOMES
- Develop a shorthand recording speed on five minutes of unfamiliar dictation with at least 95 percent accuracy.
- Write a dictated list with 95 percent accuracy using advanced shorthand theory, special abbreviations, and phrasing principles.
- Perform readback and analysis of shorthand notes.
- Perform proper transcription and various other functions using the computer.
- Translate two-voice and multi-voice testimony.
- Analyze and describe various aspects of the technology of court reporting and captioning.
- Apply the rules of grammar, spelling, and punctuation, and capitalization of transcripts.

DIRECT ENTRY INTO BACCALAUREATE DEGREE PROGRAM
Alfred State court and realtime reporting AAS graduates may enter directly into either the interdisciplinary studies BTech or technology management BBA degree program at Alfred State.

OCCUPATIONAL OPPORTUNITIES
- Official court and hearing reporters
- General freelance reporters
- Realtime and closed-captioning reporters
- Scoping

PROFESSIONAL OUTLOOK
- According to the Bureau of Labor Statistics Occupational Outlook Handbook, the national median salary was $49,500 in 2015.
- The US Department of Labor projects that court reporting job opportunities will grow fastest in the careers that help the deaf or the hard of hearing, such as realtime captioning and communication access realtime translation (CART).

EMPLOYMENT STATISTICS
Employment and continuing education rate of 100 percent – 100 percent are employed.

Be advised that a prior felony conviction may impede a student's ability to participate in an internship and complete the program.

ADDITIONAL PROGRAM INFORMATION
- The internship course (CTRP 4602) is completed off campus.
- All students are required to take CTRP 3163 in the summer.

GRADUATION REQUIREMENTS
- A cumulative overall index of at least 2.0 is required in order to graduate.
• All CTRP skill writing classes must be taken and passed at Alfred State with a passing grade of “C” or better.
• Court reporting students must also meet all the NCRA requirements as stated in the course objectives, including the passing of three, five-minute tests on unfamiliar matter with 95 percent accuracy on two-voice material at 225 wpm, jury charge material at 200 wpm, and literary material at 180 wpm; the completion of 40 verified hours of internship experience, including the production of a 40-page transcript; the transcription of a simulated RPR skills test at RPR speed levels in three hours; and the production of accurate transcripts using computer-aided technology as stated in the course outlines.
This program, approved by the National Court Reporters Association, will prepare you for a career in various court reporting fields—from official to freelance to realtime and closed captioning for the hearing impaired.

ADVANTAGES

- Development of high-speed recording skills to 225-plus words per minute through the use of realtime translation machine shorthand and computer aided transcription (CAT).
- In the first year, students learn realtime shorthand theory and develop computer skills that will enhance their overall employability.
- Development of skills in recording and transcribing specialized court reporting matter starts in the summer term and continues through the second year.
- The college offers court reporting courses online, making it possible for students who transfer in credit or attend other colleges to earn their certificate from Alfred State in court and realtime reporting. The online approach still requires two years of course work and does not change any of the standards reflected in graduation requirements for all students. This approach is perfect for working professionals, adult and returning students, and anyone who needs high flexibility in their academic schedule.

A laptop computer is required for students entering the court reporting and captioning program. Laptop specifications are available at [http://www.alfredstate.edu/required-laptops](http://www.alfredstate.edu/required-laptops).

PROGRAM STUDENT LEARNING OUTCOMES

- Develop a shorthand recording speed on five minutes of unfamiliar dictation with at least 95 percent accuracy.
- Write a dictated list with 95 percent accuracy using advanced shorthand theory, special abbreviations, and phrasing principles.
- Perform readback and analysis of shorthand notes.
- Perform proper transcription and various other functions using the computer.
- Translate two-voice and multi-voice testimony.
- Analyze and describe various aspects of the technology of court reporting and captioning.
- Apply the rules of grammar, spelling, and punctuation, and capitalization of transcripts.

OCCUPATIONAL OPPORTUNITIES

- Official court and hearing reporters
- General freelance reporters
- Realtime and closed-captioning reporters
- Scoping

Criminal Justice

As Degree – Code #2279

Jill Priest Amati, Program Coordinator
Email address: amatijp@alfredstate.edu

The Associate in Science (AS) degree in criminal justice provides graduates with a solid foundation in the field of criminal justice and its basic components. The program offers practical knowledge that is integrated across core criminal justice courses and that is then combined with other relevant coursework. The program emphasizes the development, structure, and function of the criminal justice system within the US, as well as ethical law enforcement practices and community relations. In addition, the program’s professional course work includes a management component that helps prepare graduates for administrative and leadership positions within the criminal justice system.

Advantages

As program – students can attend the Police Academy and receive up to six credits toward their degrees for CJUS 1003, Intro to Criminal Justice, and CJUS 2003, Introduction to Law.

Police Academy - http://www.alfredstate.edu/police-academy

Program Student Learning Outcomes

- Apply critical thinking skills in the context of professional practice.
- Perform the basic operations of personal computer use, as well as employ basic research techniques to locate, evaluate, and synthesize information from a variety of sources.
- Communicate effectively and appropriately in oral and written forms.
- Explain the importance of ethical behavior by criminal justice professionals as part of the social contract between a diverse citizenry and the criminal justice system.
- Apply basic management practices to the topical issues facing the police, court, and correction systems.
- Demonstrate basic knowledge of the New York State Penal Code and of Criminal Law Procedure.
- Demonstrate knowledge of the causes and consequences of crime.

Direct Entry Into Baccalaureate Degree Program

Alfred State criminal justice graduates may enter directly into the criminal justice BS, interdisciplinary studies BTech, or the technology management BBA degree program.

Continuing Education Opportunities

Graduates are well prepared to enter a police academy or to seamlessly transfer into Alfred State's criminal justice program at the baccalaureate level.

Employment Statistics

Employment and continuing education rate of 100 percent – 50 percent are employed; 50 percent continued their education.

Entrance Requirements/Recommendations

Required: Algebra

Recommended: Geometry and Biology

Students who believe they need a reasonable accommodation to participate in this program may contact Melanie Ryan in the Office of Accessibility Services. This office may be contacted by email at DisabilityServices@alfredstate.edu or by phone at 607-587-4506. Please keep in mind that some accommodations may take time to implement, so students seeking accommodations are encouraged to contact OAS as early as possible.
The Bachelor of Science (BS) degree in criminal justice provides graduates with a solid foundation in the field of criminal justice, both its essential components and emerging areas, with a focus on leadership and applied learning. With strong preparation in conceptual knowledge, students gain practical experience in criminal justice, including the opportunity to complete either an internship or a lab-based criminal investigation course in their final semester. In order to prepare graduates for a wide variety of careers, the program emphasizes several areas within criminal justice:

- ethical law enforcement practices
- decision-making
- community relations
- working with diverse populations
- public safety
- criminal justice leadership and administration

ADVANTAGES

BS program students can attend the Police Academy and receive up to 12 credits toward their degrees for CJUS 1003, Intro to Criminal Justice, and CJUS 2003, Introduction to Law, and two three-credit professional electives.

Police Academy: [http://www.alfredstate.edu/police-academy](http://www.alfredstate.edu/police-academy)

PROGRAM STUDENT LEARNING OUTCOMES

- Communicate effectively and appropriately in written and oral form.
- Apply critical thinking to modern criminal justice practices, procedures, and policies, as well as other disciplines.
- Perform the basic operations of personal computer use and employ basic research techniques to locate, evaluate, and synthesize information from a variety of sources.
- Describe the development of the US criminal justice system, its structures, laws, and functions, and how the system fits within the US democratic system.
- Explain the importance of ethical behavior by criminal justice professionals as part of the social contract between a diverse citizenry and the criminal justice system.
- Apply contemporary management and leadership concepts and theories.
- Show how theories of crime, crime prevention, treatment, and punishment have impacted public policy in the US.
- Show the connections between US constitutional law and state and local criminal law and procedures.
- Examine the importance of diversity training for criminal justice professionals across all levels and parts of the US system.
- Demonstrate knowledge of the causes and consequences of crime.

EMPLOYMENT OPPORTUNITIES

The US Bureau of Labor Statistics and the New York State Department of Labor predict that job opportunities will exist over the next decade in law enforcement at the local, county, state, and federal levels, and in correctional institutions, parole and probation departments, private security companies, and police science organizations, among others. Though the numbers point to no more than a stable projected job market over the next few years, the sheer volume of criminal justice positions should ensure ample opportunities for graduates possessing expertise in the field.

EMPLOYMENT STATISTICS

Employment and continuing education rate of 100 percent – 100 percent are employed.

**INTERNSHIP REQUIREMENTS**

Students who elect to go the internship route will be responsible for locating and securing the internship. The internships (three-hour and 12-hour) require a minimum of either 120 or 480 hours of work experience in an approved public safety agency, commonly defined as police, courts, corrections, fire service, or in a commercial/industrial security agency. The agency or industry selected must be approved by the internship coordinator and the department chair and be specifically related to the curriculum of the student. Students must be in good academic standing (cumulative GPA of 2.0 or higher) and be able to pass any required background check.

Be advised that a prior felony conviction may impede a student’s ability to participate in an internship and complete the program.

**GRADUATION REQUIREMENTS**

- Good academic standing (cumulative GPA of 2.0 or higher)
- Successful completion of all courses in the prescribed eight-semester plan
- Submission of the college’s degree application form
CULINARY ARTS

AOS DEGREE – CODE #0578
Debra Burch, Department Chair and Program Coordinator
Email address: burchda@alfredstate.edu

The courses train students in the principles applied to culinary arts. The goal is to prepare men and women for supervisory positions, and culinary positions that require special skills and knowledge of food and business. By learning fundamental and advanced culinary principles in the food service industry and employing the techniques of menu planning, preparation, and supervision in the lab classes, the students develop skills, confidence, and critical thinking.

ADVANTAGES
• Students may earn manager sanitation certification from the Educational Foundation of the National Restaurant Association as part of the program.
• The department requires that all students obtain experience under direct managerial supervision for a minimum of 300 hours of employment prior to graduation. This is to enhance skill development and improve career advancement after graduation.
• Graduates have the option of applying for readmission into a dual-degree program, whereby they may obtain a second degree in baking, production and management in one additional year.

PROGRAM STUDENT LEARNING OUTCOMES
• Interpret and comply with prevailing food safety regulations.
• Create products from complex recipes.
• Successfully vie for employment or continuing education in the food service industry.
• Productively utilize typical culinary equipment.
• Establish product and plate cost for menu items.
• Demonstrate the relationship among menu, equipment, layout, and design.

DIRECT ENTRY INTO BACCALAUREATE DEGREE PROGRAM
Alfred State culinary arts graduates may enter directly into the technology management BBA degree program. Graduates who have credit for freshman composition, statistics, literature, history, and speech may complete the BBA program in two additional years; others may complete the BBA program in two-and-one-half years.

OCCUPATIONAL OPPORTUNITIES
• Chef Manager
• Cook
• Sous Chef
• Chef
• Production Manager
• Health Care
• Food Service Manager
• School Servicer
• Caterer
• Food Sales Representative
• Food Marketing
• Dining Room Manager

EMPLOYMENT STATISTICS
Employment and continuing education rate of 100 percent – 60 percent are employed; 40 percent continued their education.

EXPENSES
In addition to regular college expenses, the student must purchase a probe thermometer, calculator, uniform package, and uniform laundry service from the Alfred State Campus Store. Uniforms may cost approximately $360 to $460. The uniform laundry service is approximately $60 per semester. It is mandatory for all culinary arts students to have at least a 5-meal, meal plan. First-semester textbooks cost approximately $500, and approximately $100 each succeeding semester.

RELATED PROGRAMS
Culinary Arts: Baking, Production and Management

REQUIRED TOOLS/EQUIPMENT
A list of required tools, equipment, PPE, etc. for the program mentioned above can be found at http://www.alfredstate.edu/admissions/accepted-students/required-tools-supplies.

ENTRANCE REQUIREMENTS/RECOMMENDATIONS
Recommended: Knowledge of basic math, reading, and writing skills.

TECHNICAL STANDARDS
Applicants in the culinary arts program must meet the following curriculum requirements:
• Perform all lab functions.
• Work in a high-paced and crowded lab environment for several hours a day.
• Capability to lift 50 pounds.
• Identify degree of product doneness.
• Operate all kitchen equipment, including knives.
• Students who believe they need a reasonable accommodation to participate in this program may contact Melanie Ryan in the Office of Accessibility Services. This office may be contacted by email at DisabilityServices@alfredstate.edu or by phone at 607-587-4506. Please keep in mind that some accommodations may take time to implement, so students seeking accommodations are encouraged to contact OAS as early as possible.

CERTIFICATION OR LICENSURE
Students may earn manager sanitation certification from the Educational Foundation of the National Restaurant Association as part of the program.

CULINARY ARTS: BAKING, PRODUCTION & MANAGEMENT
AOS DEGREE – CODE #0423
Debra Burch, Department Chair and Program Coordinator
Email address: burchda@alfredstate.edu

There’s never been greater demand for skilled bakers. Our program will prepare you for this exciting field with 1,350 hours of hands-on production experience, of which approximately 80 percent is concentrated in bakery training. The major includes detailed instruction in methods, ingredients, measurements, controls, equipment, and merchandising. And the production for breakfast, lunch, and dinner requirements is built into one daily schedule.

ADVANTAGES
• Students may earn sanitation certification from the Educational Foundation of the National Restaurant Association as part of the program.
• The department requires that all students obtain experience under direct managerial supervision for a minimum of 300 hours of employment prior to graduation. This is to enhance skill development and improve career advancement after graduation.
• Graduates have the option of applying for readmission into a dual-degree program whereby they may obtain a second degree in culinary arts in one additional year.

CYBER SECURITY

BTECH DEGREE – CODE #2085
Scott O'Connor, Program Coordinator
Email address: oconnors@alfredstate.edu

The Bachelor of Technology degree in cyber security at Alfred State is designed to prepare you to enter the workforce as an information security professional—one of the fastest-growing computer and information technology career paths—with a special emphasis in network and host security, secure programming, secure database applications, mobile device security, and cloud security. From courses in security, to programming language sequences such as .NET, Java, and C++, this program will help you meet the needs of today's and tomorrow's information security industry. You will also receive a sound foundation in web development, networking, and microcomputer systems. And in order to give you the hands-on experience employers are looking for, a full-semester internship is included.

ADVANTAGES

• Organizations of all types and sizes need information technology professionals, and emphasis on security has never been higher.
• Due to the solid foundation in all the major fields of information technology, the job opportunities for graduates are wide and numerous.

A laptop computer is required for students entering the cyber security program. Laptop specifications are available at www.alfredstate.edu/required-laptops.

PROGRAM STUDENT LEARNING OUTCOMES

• Demonstrate troubleshooting strategies with a variety of security problems.
• Install and configure web, database, file, and application servers.
• Develop and implement effective security and disaster recovery systems and policies.
• Develop and maintain technical documentation and procedures for security management.
• Demonstrate effective research, planning, and security management of software updates and fixes.
• Apply accumulated knowledge and skills in an actual industry environment.
• Demonstrate effectiveness in the use of computer forensic tools, procedures, techniques, and hardware, as well as maintain physical evidence.
• Demonstrate effectiveness in configuring authentication schemes, such as NAT, content security and content vectoring, SYNDDefender, and VPNs using industry standard firewalls.
• Demonstrate effectiveness in the use and scan of a network with heterogeneous operating systems and identify security vulnerabilities.
• Demonstrate knowledge of multiple areas within the liberal arts arena.
• Demonstrate knowledge in design and configuration of Windows security.
• Demonstrate effectiveness in tracking and monitoring attacks against Linux servers and how to prevent them.

CONTINUING EDUCATION OPPORTUNITIES

Articulation agreements have been established with many community colleges and additional agreements are in development. It is possible, with careful selection of courses, to transfer to a variety of associate degrees, including computer information systems, information technology, computer science, and others. Upon completion of the bachelor’s degree, students will be prepared to pursue a graduate degree in information technology. The computer information systems degree (AAS) at Alfred State is especially well suited for transfer into the bachelor's degree at the junior level.

OCCUPATIONAL OPPORTUNITIES

Organizations of all types and sizes need information technology professionals and emphasis on security has never been higher. The primary employment field includes security IT specialists, Virtual Private Network administrators, authentication specialists, database administrators, programmers, and system analysts. Due to the solid foundation in other areas, graduates will not be limited to these areas; thus, the job opportunities are wide and numerous.

EMPLOYMENT STATISTICS

Employment and continuing education rate of 100 percent – 100 percent are employed.

* If not required, take LAS elective to complete degree requirements of three credits; otherwise take free elective.

** BUAD 4003 or BUAD 6113 recommended.

GPA of 2.5 or higher is required in major courses; GPA of 2.0 minimum overall is required.

Internship is student-initiated.

Be advised that a prior felony conviction may impede a student’s ability to participate in an internship and complete the program.

GRADUATION REQUIREMENTS

- 124 credit hours
- 39 credit hours in major field required courses
- 24 credit hours in professional courses
- 18 credit hours in core concentration
- 30 credit hours in liberal arts/general education courses
- A 2.5 grade point average in the major is needed for the required internship
- Other requirements as stated in college academic regulations
- Seven general education areas are required, including three of the following five: art, language, other world civilizations, American history, or western civilization
The diagnostic medical sonography (DMS) program is seeking accreditation from the Commission on Accreditation of Allied Health Education Programs (CAAHEP). Currently, there are three pathways available to students to achieve sonography certification depending on individual requirements. The certifications are available via the American Society of Diagnostic Medical Sonography (ARDMS) and the American Registry of Radiologic Technologist (ARRT). Once the DMS program receives accreditation with CAAHEP, students will be required to take only one certification exam. Please contact our DMS program for further information.

Clinical education is assigned to provide experiences consistent with the student’s level of achievement in different hospital and outpatient environments. Through clinical assignments, students have opportunities to work with the most modern and specialized equipment available and knowledgeable staff with a wealth of experience in imaging. These assignments include a 12-week (40 hours per week) summer session that is required and provides valuable experience in developing clinical competency skills. In addition, nine weeks of full-time clinical will be assigned in both fall and spring semesters of the second year of the program. Students will require housing close enough to their clinical placements to travel there on a daily basis.

The program currently admits 20 students each year, with a fall semester start date only. One student placement is reserved for an on-campus curriculum change, with the remaining 19 placements being filled by admissions.

ADVANTAGES

- Prepares the student for the American Registry of Diagnostic Medical Sonography registry exams.
- Sonography and simulation laboratory on campus.
- Low student-to-faculty ratio.
- Gaining proficiency in the technical skills necessary for diagnostic medical sonography.
- Extensive clinical experience in hospital setting.
- Availability of on-campus housing and variety of campus activities.

PROGRAM STUDENT LEARNING OUTCOMES

- Demonstrate appropriate technical and effective skills in the clinical setting.
- Demonstrate patient-centered, age-specific skills.
- Analyze images to determine diagnostic quality.
- Demonstrate proper work ethics.
- Examine the value of leadership, professional development, and growth.
- Demonstrate critical thinking and problem-solving skills in both the didactic and clinical setting.
- Apply written communication skills to the construction of documents of record that are established professional guidelines.
- Apply communication skills to the explanation of ideas and scientific terminology.
- Using technological resources effectively and appropriately, synthesize theory and concepts from the liberal education domain and other professions into radiologic technology.
- Explain cultural diversity and evaluate the role of cultural competency, values, and ethics in the patient care setting.

EMPLOYMENT STATISTICS

Employment and continuing education rate of 100 percent – 86 percent are employed; 14 percent continued their education.

ENTRANCE REQUIREMENTS/RECOMMENDATIONS

Applicants for the diagnostic medical sonography program must possess a recognized high school diploma or its equivalent. A standardized test (SAT or ACT) is not required but recommended. Specific high school course requirements and recommendations are:

- Required: Algebra, Geometry, Algebra 2, Biology, Physics
- Recommended: Chemistry

Applicants with previous college experience must submit an official college transcript and their success at the college level will be an admissions consideration. Due to the technical and science rigor, entrance requirements are higher than those of the institution.

TECHNICAL STANDARDS

To participate in the program, the applicant must possess specific non-academic skills. The technical standards described below are consistent with the duties of an entry-level radiographer in a professional position and are required in order to provide adequate patient care and produce a diagnostic image.

The applicant should have the:

- Ability with reasonable accommodation, if necessary, to reach and position the patients on the exam table.
- Ability with reasonable accommodation, if necessary, to move, adjust, and manipulate equipment to perform imaging procedures.
- Ability to review and evaluate recorded images to determine the quality of the image with reasonable accommodation.
- Ability to communicate effectively with patients, doctors, and other personnel so that the patient is not placed in an “at-risk” situation.
- Ability to make proper decisions involving patient and co-worker safety.
- Ability with reasonable accommodation, if necessary, to hear sounds that are necessary to assess patient’s health status.

CONTINUING EDUCATION OPPORTUNITIES

The program allows graduates to transfer to a four-year program in imaging science or healthcare management.

OCCUPATIONAL OPPORTUNITIES

- Hospital Sonography Department Staff Technologist
- Advanced Sonography Modalities- Cardiac, Vascular, and Musculoskeletal
- Sonography Education
- Sonography Department Management
- Industry
- Private Physician Offices

DIRECT ENTRY INTO BACCALAUREATE DEGREE PROGRAM

Graduates may enter directly into either the healthcare management BTech, the interdisciplinary studies BTech, or technology management BBA degree program.

Grade of "C+" or better required for all SONO, BIOL and RADT prefix courses.

## GRADUATION REQUIREMENTS

The AAS degree in diagnostic medical sonography has finely prescribed courses reflective of accreditation standards for students to be prepared for admission to the American Registry of Diagnostic Medical Sonography (ARDMS) Certification Examination. Specific graduation requirements are:

- 64 total semester credit hours
- Minimum of 20 credit hours of liberal arts and sciences from three of the 10 SUNY General Education categories
- 2.0 cumulative GPA and a grade of “C+” or better in the core science courses (SONO and BIOL prefixes)
- Approval of department faculty
DIGITAL MEDIA AND ANIMATION

BS DEGREE – CODE #2018

Larry Neuberger, Program Coordinator
Email address: neuberl@alfredstate.edu

The emerging field of computer imaging and animation is impacting virtually every industry and profession. The digital media and animation program will provide you with a broad range of technical, creative, and problem-solving skills to facilitate your employment in new media and animation. At the core of the program is a sequence of studio courses that enhances individual artistic creativity and provides instruction in the traditional arts and industry-standard computer graphics software.

ADVANTAGES

- Students develop critical thinking skills by completing rigorous problem-solving activities.
- Gain experience creating a professional presentation, as well as evaluating, revising, and defending ideas and artistic decisions in presented work.

A laptop computer is required for students entering the digital media and animation program. Laptop specifications are available at [http://www.alfredstate.edu/digital-media](http://www.alfredstate.edu/digital-media)

PROGRAM STUDENT LEARNING OUTCOMES

- Demonstrate adaptability/flexibility with technology.
- Illustrate critical thinking by completing course work.
- Demonstrate a strong work ethic through time management and quality works.
- Visually analyze their own work, as well as the work of others, in critiques, presentations, writing, and other activities.
- Apply knowledge of the history and theory relevant to digital media and animation through studio work.
- Communicate verbally using specific terminology associated with the software, hardware, and industry.

OCCUPATIONAL OPPORTUNITIES

- Animation
- Interactive media
- Digital imaging
- Media Design
- Fine art

EMPLOYMENT STATISTICS

Employment and continuing education rate of 100 percent – 100 percent are employed.

RELATED PROGRAMS

Information Technology; Web Development

ENTRANCE REQUIREMENT/RECOMMENDATIONS

Required: Algebra, Geometry

Recommended: Algebra 2

GENERAL NOTES

Entry level of student into math and composition/literature sequences is a function of student’s high school preparation and mathematics and English placement examinations.

Minimum of “C” is required for all core courses. A 2.0 GPA or greater in core courses or comparable courses at another institution is required to guarantee admission into DGMA 5103, 5403, and 5603.

Students must complete at least one course from seven of the 10 SUNY General Education silos.

Students are required to complete a digital portfolio assignment and annual reviews to meet graduation requirements.

ELECTRICAL CONSTRUCTION AND MAINTENANCE ELECTRICIAN
AOS DEGREE – CODE #0498
Bradley Thompson, Department Chair and Program Coordinator
Email address: thompsbj@alfredstate.edu

This program provides in-depth instruction in the theories and principles of electricity. Principles of operation for electrical devices and equipment, and correct and safe operation of tools are covered. You will study and learn to interpret and apply the requirements of the National Electric Code for designing electrical layouts, installation methods, and the maintenance, troubleshooting, and repair of electrical circuits and equipment.

Practical (hands-on) application of the classroom theory is the main emphasis of the laboratory work. As an electrical construction and maintenance electrician student, you will assist in the design and installation of the electrical installations of many projects both on and off campus. Approximately one-third of lab time is spent on actual work sites, gaining real-life work experience.

In your senior year, you will create completely automated projects in the lab using PLCs, pneumatics, electronics, and process controls.

ADVANTAGES
- Summer internships are available to selected students through the International Brotherhood of Electrical Workers, Village of Wells Island Electric Department, and RADEC Corporation in Rochester, allowing students to gain additional, valuable trade experience.
- Various IBEW Locals have agreed to award qualified graduates from Alfred State’s electrical construction and maintenance electrician program advanced placement in their apprenticeship programs. The degree of advanced placement to be awarded will be determined after review by the joint apprenticeship committee and after all conditions of the joint apprenticeship standards have been met.

PROGRAM STUDENT LEARNING OUTCOMES
- Read, interpret, and apply technical information from the National Electrical Code.
- Perform basic and complex mathematical equations as they apply to the electrical trade.
- Perform layout, design, and installation for commercial and industrial wiring systems.
- Perform entry-level layout, design, and installation of residential wiring systems.
- Apply combined knowledge to perform maintenance and troubleshooting procedures within the electrical trade.
- Students will develop an understanding of efficiency, design, and NEC requirements as pertaining to renewable energy systems.
- Design, sizing, layout, and selection of equipment for the electrical systems within a residential dwelling.

DIRECT ENTRY INTO BACCALAUREATE DEGREE PROGRAM
Alfred State electrical construction and maintenance electrician graduates may enter directly into the construction supervision BTech or technology management BBA degree program. Graduates who have credit for freshman composition, statistics, literature, history, and speech may complete the baccalaureate program in two additional years; others may complete the program in two-and-one-half years.

CONTINUING EDUCATION OPPORTUNITIES
The following local chapters of the International Brotherhood of Electrical Workers (IBEW) have signed articulation agreements with the electrical construction and maintenance electrician program at Alfred State.

IBEW Local 86, Rochester
IBEW Local 237, Niagara Falls
IBEW Local 241, Ithaca

OCCUPATIONAL OPPORTUNITIES
- Designer
- Installer
- Construction site electrician
- Electrical estimator
- Electrical inspector
- PLC programmer
- Salesperson
- Electrical trade union or non-union apprentice

- Electric motor control technician
- Private contractor (residential, commercial)
- Industrial maintenance electrician
- Technical field representative
- Wholesale representative
- Electrical technician
- Wind turbine technician/installer
- Photovoltaic technician/Installer

EMPLOYMENT STATISTICS
Employment and continuing education rate of 88 percent – 76 percent are employed; 12 percent continued their education.

RELATED PROGRAMS
Building Trades: Building Construction
Electrical Engineering Technology

REQUIRED TOOLS/EQUIPMENT
A list of required tools, equipment, PPE, etc. for all of the programs listed above can be found at http://www.alfredstate.edu/admissions/acceptedstudents/required-tools-supplies.

ENTRANCE REQUIREMENTS/RECOMMENDATIONS
Recommended: Algebra; good writing and reading comprehension skills

TECHNICAL STANDARDS
Applicants in the electrical construction and maintenance electrician program must meet the following physical requirements:
- Must be able to visually translate information on analog or digital meters and other test equipment.
- Must be able to lift 50 pounds to eye level.
- Must be able to communicate orally with a person 6 to 10 feet away.
- Must be able to read and decipher information found in technical manuals.
- Must be able to adhere to and perform all safety requirements.
- Students who believe they need a reasonable accommodation to participate in this program may contact Melanie Ryan in the Office of Accessibility Services. This office may be contacted by email at DisabilityServices@alfredstate.edu or by phone at 607-587-4506. Please keep in mind that some accommodations may take time to implement, so students seeking accommodations are encouraged to contact OAS as early as possible.

Note: Seniors will rotate through the six courses listed in the third and fourth semesters. These six are taught both semesters.

GRADUATION REQUIREMENTS

A student must successfully complete all courses in the prescribed four-semester program and earn a minimum cumulative index of 2.0, which is equivalent to a "C" average.
The electrical engineering technology AAS and BS programs provide the skills and occupational competence necessary for entry into the field as an applied engineer who works with and is responsible for all the electronic equipment in the field. Thus, in addition to a firm foundation in electrical circuit concepts, the program provides a robust laboratory experience.

This program will prepare you by emphasizing basic knowledge and skills during the first year of the program. Studies include fundamental DC and AC circuit analysis and digital circuit logic to develop skills in use of electronic test equipment and in use of tools and printed circuit fabrication equipment. Laboratory experiments supplement classroom instruction and problem solving. Computer problem solving and simulation aid in course instruction.

The second year of the associate degree program continues the study of fundamental electronic circuits. The areas of study include microcontroller circuitry and programming, electronic communication circuits and systems, and IC circuit fabrication on silicon wafers.

**ADVANTAGES**

- The understanding of general processes gained through laboratory experiences prepares students to either continue their education or enter the workforce in the fields of microcontrollers, power systems, and microelectronics.
- Both electrical engineering technology programs are accredited by the Engineering Technology Accreditation Commission of ABET, [http://www.abet.org](http://www.abet.org).
- The Bachelor of Science degree in electrical engineering technology is recognized as a “professional degree” that qualifies for experience/education credit toward New York Professional Engineering Licensure.

A laptop computer is required for students entering the electrical engineering technology programs. Laptop specifications are available at www.alfredstate.edu/required-laptops. Some courses require specialized tools and/or electronic components.

**PROGRAM STUDENT LEARNING OUTCOMES (PSLOS) - AAS DEGREE**

- An ability to apply the knowledge, techniques, skills, and modern tools of the discipline to narrowly defined engineering technology activities.
- An ability to apply a knowledge of mathematics, science, engineering, and technology to engineering technology problems that require limited application of principles but extensive practical knowledge.
- An ability to conduct standard tests and measurements and to conduct, analyze, and interpret experiments.
- An ability to function effectively as a member of a technical team.
- An ability to identify, analyze, and solve narrowly defined engineering technology problems.
- An ability to apply written, oral, and graphical communication in both technical and non-technical environments, and an ability to identify and use appropriate technical literature.
- An understanding of the need for and an ability to engage in self-directed continuing professional development.
- An understanding of and a commitment to addressing professional and ethical responsibilities, including a respect for diversity.
- A commitment to quality, timeliness, and continuous improvement.
- The application of circuit analysis and design, computer programming, associated software, analog and digital electronics, and microcomputers, and engineering standards to the building, testing, operation, and maintenance of electrical/electronic(s) systems.
- The applications of physics or chemistry to electrical/electronic(s) circuits in a rigorous mathematical environment at or above the level of algebra and trigonometry.

**DIRECT ENTRY INTO BACCALAUREATE DEGREE PROGRAM**

Alfred State electrical engineering technology AAS graduates may enter directly into either the construction supervision BTech, the electrical engineering technology BS, the interdisciplinary studies BTech, or technology management BBA degree program.

**OCCUPATIONAL OPPORTUNITIES**

- Electrical or electronics technician (two-year)
- Electrical or electronics technologist (four-year)
- Communications technician/technologist
- Computer technician/technologist
- Semiconductor manufacturing technician/technologist
- Electrical power technician/technologist

**EMPLOYMENT STATISTICS**

Employment and continuing education rate of 100 percent:

- Electrical Engineering Technology (AAS degree): 100 percent – 100 percent continued their education.
- Electrical Engineering Technology (BS degree): 100 percent – 100 percent are employed.

CERTIFICATION OR LICENSURE
The Bachelor of Science degree in electrical engineering technology is recognized as a "professional degree" that qualifies for experience/education credit toward New York Professional Engineering Licensure. Graduates from Alfred State's program are allowed six years of the required 12 years of education/experience credit and are eligible to take the Fundamentals of Engineering (FE), formerly called Engineer-in-Training (EIT), examination upon graduation.

Be advised that a prior felony conviction may impede a student’s ability to receive licensure.

ENTRANCE REQUIREMENTS/RECOMMENDATIONS (AAS)
Required: Algebra, Geometry, Algebra 2
Recommended: Physics

ENTRANCE REQUIREMENT/RECOMMENDATIONS (BS)
Required: Algebra, Geometry, Algebra 2.
Recommended: Physics

Courses that repeat or significantly overlap those taken in the student’s associate degree program cannot be taken for upper-level credit. If the associate degree covered the subject matter in one of the required baccalaureate courses, a different course must be substituted and approved by the faculty adviser.

FINANCIAL PLANNING

BBA DEGREE – CODE #1938

Scott DuMond, Program Coordinator
Email address: dumondsr@alfredstate.edu

Personal financial services is one of the most lucrative and rapidly expanding professions in existence. By combining expertise in estate planning, investment planning, risk management, insurance evaluation, tax planning, retirement planning, and employee benefits planning, the CERTIFIED FINANCIAL PLANNER™ professional offers one-stop comprehensive expert advice that would have formerly required a variety of different professionals. As a student completing this four-year degree, you will be eligible to sit for the CERTIFIED FINANCIAL PLANNER™ examination. While there are numerous job opportunities for employment in various types of financial institutions - banks, investment firms, and the insurance industry - perhaps the greatest earnings potential lies in becoming a self-employed CFP® practitioner.

ADVANTAGES

• Students receiving their AAS or AS degree in virtually any business concentration will be able to seamlessly transfer into this program and receive the BBA degree in four more semesters, which includes a full-semester internship in the field.
• Students develop the ability to integrate and synthesize the knowledge identified by the CFP® Board’s required topic list and gained from core courses, into decision making, critical thinking, and problem-solving skills.
• This program is registered with the Certified Financial Planner Board of Standards, Inc.

A laptop computer is required for students entering this degree program. Laptop specifications are available at www.alfredstate.edu/required-laptops.

PROGRAM STUDENT LEARNING OUTCOMES

• Demonstrate competence in domestic and global environments within the principle functional areas of business.
• Analyze personal finance problems and devise solutions using critical thinking, decision-making processes, and decision-support tools.
• Formulate a financial plan while integrating the major functional areas of business and personal finance.
• Incorporate software, technology, and information systems into personal finance.
• Identify comprehensive personal finance issues and communicate findings and solutions.
• Identify the personal finance environment in relation to the current financial, legal, economic, and social environments.
• Analyze the role of ethics, government regulations, and legalities in personal financial planning processes.

OCCUPATIONAL OPPORTUNITIES

• Banking
• Insurance
• Investment firms
• Financial planning firms
• Attorneys’ offices
• Self-employment
• Employee benefits specialists
• Accounting firms
• Wealth management firms
• Broker-dealer (securities) firms

EMPLOYMENT STATISTICS

Employment and continuing education rate of 100 percent – 78 percent are employed; 22 percent continued their education.

RELATED PROGRAMS

Accounting
Business Administration
Marketing

ENTRANCE REQUIREMENTS/RECOMMENDATIONS

Required: Algebra, Geometry, Algebra 2

CERTIFIED FINANCIAL PLANNER®: THE HIGHEST STANDARD

Today more than ever, CFP® pros are an essential resource. From budgeting, to planning for retirement, to saving for education, to managing your taxes and your insurance coverage, “finances” doesn’t mean just one thing for most Americans - and “financial planning” means much more than just investing. Bringing all the pieces of your financial life together is a challenging task.

Although many professionals may call themselves “financial planners,” CFP® professionals have completed extensive training and experience requirements and are held to rigorous ethical standards. They understand all the complexities of the changing financial climate and are required to make financial planning recommendations in your best interest.

WHY CERTIFICATION MATTERS

Most people think all financial planners are “certified,” but this isn't true, nor are all certifications the same. Anyone may call him or herself a "financial planner," but only those who have fulfilled the certification and renewal requirements of the CFP Board can display the CFP® certification marks, which represent a high level of competency, ethics, and professionalism. CFP Board’s Standards of Professional Conduct require CFP® pros to look out for your interests above their own when delivering financial planning advice.

EDUCATION

Unlike many financial advisors, CFP® pros are required to develop their theoretical and practical knowledge by completing a comprehensive course of study at a college or university with a curriculum approved by the CFP Board. Planning professionals with training outside of the CFP Board’s approved list may meet the education requirement through a review process, which looks at transcripts, previous course work, and other professional designations.

EXAMINATION

CFP® professionals must pass the comprehensive CFP® Certification Exam, which tests their ability to apply financial planning knowledge to real-life situations. The exam covers the financial planning process, tax planning, employee benefits and retirement planning, estate planning, investment management and insurance. The average pass rate for this difficult exam is only 55 percent to 60 percent. This comprehensive exam ensures that CFP® professionals are highly qualified to develop a plan for your finances.

EXPERIENCE

CFP® professionals must have a minimum of three years’ experience in the financial planning process prior to earning the right to use the CFP® certification marks. This hands-on experience guarantees that CFP® professionals have practical financial planning knowledge, so you can count on them to help you create a realistic financial plan that fits your individual needs.

ETHICS

When it comes to financial planning, CFP® professionals are held to the highest of standards. CFP Board’s Code of Ethics outlines CFP® professionals’ obligations to uphold principles of integrity, objectivity, competence, fairness, confidentiality, professionalism and diligence. The Rules of Conduct require CFP® professionals to put clients’ interests above their own, and to provide their financial planning services as a "fiduciary" — acting in the best interest of their financial planning clients. CFP® professionals are subject to sanctions if they violate these standards.

ENFORCEMENT

CFP Board’s rigorous enforcement of its Standards of Professional Conduct — including releasing disciplinary information to the public — distinguishes the CFP® certification from the many other designations in the financial services industry. Anyone who seeks CFP® certification is subject to a background check, and those whose past conduct falls short of CFP Board’s ethical and practice standards can be barred from becoming certified. After attaining certification, a CFP® professional who violates CFP Board’s ethical and practice standards becomes subject to disciplinary action, which could include the permanent revocation of certification. Through diligent enforcement of its ethical and practice standards, CFP Board provides you with the confidence that your CFP® professional is both competent and ethical.

**GRADUATION REQUIREMENTS**

- 122 credit hours
- 30 credit hours of the 45 upper-level credit hours for this degree must be taken at Alfred State
- Cumulative overall index of at least 2.0
FORENSIC SCIENCE TECHNOLOGY
BS DEGREE - CODE #2023
Wayne Benslewy, Department Chair and Program Director
Email address: benslewd@alfredstate.edu

The forensic science technology major is a technically rigorous four-year program culminating in a Bachelor of Science degree. Students in this laboratory-based on-campus program will complete classwork focusing on three areas of physical evidence analysis:

- Biological applications within forensics, e.g., DNA technologies, genetic analysis, and microbiology.
- Chemical practicalities, notably: physicochemical analysis and identification of drugs, poisons, and fire debris.
- Microscopic-based examinations, including the analysis of fingerprints, firearms evidence, and trace evidence.

The forensic science technology program is fully accredited by FEPAC (Forensic Science Education Programs Accreditation Commission).

VISION STATEMENT
Through a rigorous hands-on curriculum rooted in the natural and physical sciences, the forensic science technology program at Alfred State strives to provide our students with a strong foundation in the natural and physical sciences. This includes not only theoretical didactic delivery, but also a wealth of hands-on laboratory-based forensic analytical techniques. Graduates of the program will be equipped with the knowledge and skills necessary to obtain entry-level positions as laboratory technicians, scientists, or examiners in a variety of governmental, institutional, and industrial settings, or with the background necessary for successful transfer into graduate-level programs in the forensic, biological, and chemical sciences or related subjects.

ADVANTAGES
- All students in the program are required to take a core course load that includes preparation in chemistry, biology, physics, and mathematics as well as more advanced training in organic chemistry, genetics, biochemistry, instrumental methods, analytical chemistry, microbiology, biotechniques, evidentiary law, public speaking, and technical writing.
- Students are trained in the usage and theory of modern instrumental techniques that are utilized by employees in crime laboratories nationwide.
- Students have the opportunity to broaden and deepen their training by selecting from a list of approved technical elective course work.
- All students in the program are required to complete either an off-campus internship or on-campus directed research experience. Students selecting the internship option will be exposed to a workplace setting and may complete this course at a multitude of off-campus locations offering laboratory testing services.
- Students selecting the directed research option will receive preparatory training for future graduate and/or professional school options. In addition, these students will have the opportunity to present their research at both on- and off-campus conferences and/or showcases.

PROGRAM STUDENT LEARNING OUTCOMES
- Apply the scientific principles of chemistry, biology, and physics to specific applications in forensic science.
- Explain and show competency in basic chemical and biological lab procedures, including the identification of and the synthesis of various compounds and the forensic analysis of DNA.
- Demonstrate an understanding of the capabilities, use, potential, and limitations of various laboratory instrumental techniques widely utilized in forensic science.
- Recognize and use appropriate professional and ethical behavior as defined by the forensic science community.
- Demonstrate an understanding of the scientific principles of crime scene investigation and reconstruction, including evidence collection, preservation, and documentation.
- Summarize the criminal justice system and explain the role of the forensic scientist and physical evidence within the criminal justice system.

- Evaluate scientific literature to distinguish fact from opinion, develop informed and reasonable conclusions, apply knowledge and understanding to problems, develop rational and reasonable interpretations, suspend beliefs and remain open to new information and methods, and assimilate information learned into knowledge base.
- Use technological resources effectively and appropriately to communicate, collaborate, and retrieve information; determine when technology is useful and select the appropriate tool(s) and technology resources to address a variety of tasks and problems.
- Apply written communication skills to the construction documents of record that are well organized and contain appropriate format, grammar, punctuation, sentence structure, and spelling in accordance with established professional guidelines.
- Apply oral communication skills to the explanation of ideas, scientific terminology, and results of scientific examinations in a competent and confident manner.

OCCUPATIONAL OPPORTUNITIES
- Government crime laboratories and medical examiner’s offices
- Private forensic testing laboratories
- Industrial laboratories employing chemical or biological technologists
- Quality control/quality assurance positions in testing laboratories

Examples of locations where our graduates have obtained employment include:
- New York City Office of the Chief Medical Examiner
- New York Police Department Crime Laboratory
- National Security Agency
- United States Army Criminal Investigations Division
- Hamilton County (Ohio) Coroner’s Office
- Onondaga County Medical Examinations Division
- Erie County Medical Examiner’s Office
- Erie County Crime Lab
- Erie County Medical Examiner’s Office
- NMS Labs

FUTURE EDUCATIONAL OPPORTUNITIES
- Graduate-Level Forensic Science Programs
- Medicine
- Dentistry
- Pharmacy
- Biology
- Chemistry

Graduates of the program have been accepted into master’s or doctorate level programs from several universities including:
- Syracuse University
- Cedar Crest College
- University of Buffalo
- University of Albany
- George Washington University
- Pace University
- Pittsburgh University
- Marshall University
- Virginia Commonwealth University
- West Virginia University

EMPLOYMENT STATISTICS
Employment and continuing education rate of 100 percent – 67 percent are employed; 33 percent continued their education.

### RELATED PROGRAMS
- Biological Science
- Criminal Justice
- Health Sciences

### INTERNSHIP OPPORTUNITIES
Students have completed internship experiences at various locations, including the FBI, ATF, New York State Police Crime Laboratories, multiple county and municipal crime laboratories both inside and outside of New York State, private testing and industrial laboratories, and hospital clinical laboratories.

### ENTRANCE REQUIREMENTS/RECOMMENDATIONS
**Required:** Algebra, Geometry, Algebra 2, Biology, Chemistry

**Recommended:** Physics

Students who believe they need a reasonable accommodation to participate in this program may contact Melanie Ryan in the Office of Accessibility Services. This office may be contacted by email at DisabilityServices@alfredstate.edu or by phone at 607-587-4506. Please keep in mind that some accommodations may take time to implement, so students seeking accommodations are encouraged to contact OAS as early as possible.

### FORENSIC SCIENCE TECHNOLOGY - BS DEGREE

#### TYPICAL EIGHT-SEMESTER PROGRAM

**First**
- FRSC 1001 Intro to Forensic Science Tech I 1
- CHEM 1984 Chemical Principles I 4
- BIOL 1104 General Biology I 4
- COMP 1503 Freshman Composition 3
- MATH 1084 Calculus I 4

**Second**
- FRSC 2001 Intro to Forensic Science Tech II 1
- CHEM 2984 Chemical Principles II 4
- BIOL 2204 General Biology II 4
- SPC 1083 Effective Speaking 3
- GLST 2113 Global Perspectives/Special Topic 3

**Third**
- FRSC 3001 Topics in Forensic Science I 1
- CHEM 3514 Organic Chemistry I 4
- PHYS 1044 College Physics I 4
- LITR xxx3 Literature Elective 3
- xxxx xxx3 General Education Elective 3

**Fourth**
- FRSC 4001 Topics in Forensic Science II 1
- CHEM 4524 Organic Chemistry II 4
- PHYS 2044 College Physics II 4
- MATH 2124 Statistical Methods & Analysis 4
- XXXX xxx3 General Education Elective 3

**Fifth**
- CJUS 1003 Intro to Criminal Justice 3
- CHEM 7784 Biochemistry 4
- BIOL 5254 Principles of Microbiology 4
- COMP 5703 Technical Writing II 3
- XXXX xxx3 Technical Elective 3

**Sixth**
- BIOL 6534 Genetics 4
- CHEM 6614 Instrumental Analysis 4
- CJUS 6003 Law & Criminal Evidence 3
- FRSC 6214 Microscopy and Criminalistics 4

**Seventh**
- FRSC 7214 Forensic Chemistry 4
- BIOL 5013 Biotechniques 3
- CHEM 5414 Analytical Principles 4
- XXXX xxx3 Technical Elective 3

**Eighth**
- FRSC 8213 Forensic Biology 3
- FRSC 8111 Forensic Science Tech Capstone 1
- FRSC 8113 Forensic Scie Tech Prep 3
- FRSC 8703 Senior Research Project 3
- FRSC 8713 Forensic Sci Tech Internship 3
- XXXX xxx3 Technical Elective 3
Approved Technical Electives:
- ANTH 5333 Medical Anthropology
- BIOL 1304 Botany
- BIOL 1404 Anatomy & Physiology I
- BIOL 2504 Anatomy & Physiology II
- BIOL 2633 Histotechniques
- BIOL 4403 Pathophysiology
- BIOL 4900 Directed Study, Biology
- BIOL 5003 Genomics
- BIOL 5900 Directed Study, Biology
- BIOL 6003 Molecular and Cell Biology
- BIOL 6403 Advanced Pathophysiology
- BIOL 7723 Research Methods in Health Sciences
- CHEM 4900 Directed Study, Chemistry
- CHEM 5900 Directed Study, Chemistry
- CHEM 6854 Physical Chemistry
- ENVR 4424 Environmental Chemistry and Microbiology
- FRSC 3113 Forensic Pathology
- FRSC 4900 Directed Study, Forensic Science
- FRSC 5900 Directed Study, Forensic Science
- MATH 2094 Calculus II
- MATH 6104 Multivariate and Vector Calculus
- MATH 6114 Differential Equations
- MEDR 1132 Essen. of Pharmacology and MEDR 1133 Med. Terminology

TECHNICAL STANDARDS
It is essential that students in this degree program are able to fully and safely participate, with or without reasonable accommodation, in all classroom, laboratory, field, internship, and research experiences required for completion of the program. Students in this degree program should be able to:

- Function in a safe manner, not placing themselves, faculty, staff, or other students in jeopardy.
- Appropriately and safely use standard laboratory equipment, materials, and instrumentation to include possession of fine motor skills and mobility.
- Make sensory visual and auditory observations during, and interpret data from, all required laboratory assignments.
- Communicate effectively, both orally and in writing.

In addition, this degree program requires students to complete either an off-campus internship experience or a research project. Students in this degree program are expected to meet the following professional standards:

- Maintain confidentiality in professional workplace settings.
- Maintain professional composure at all times.

Be advised that a prior felony conviction may impede a student's ability to participate in an internship experience. In addition, students desiring careers within the field of forensic science should be aware that they will likely have to undergo background checks prior to being offered employment or an internship at a crime laboratory. These background checks are often similar to those required for law enforcement officers and may include questions regarding drug usage, criminal history, driving records, credit history, personal associations, and/or past work performance. In addition, they may include drug tests, polygraph examinations, and physical and medical examinations.

GRADUATION REQUIREMENTS
- Minimum of 121 total semester credit hours
- Completion of at least one course from seven of the 10 SUNY General Education categories
- Minimum of 45 upper-division semester credit hours
- Minimum of 30 upper-division semester credit hours in residence
- 3 credit hours of research or internship
- 2.0 cumulative grade point average
- Grade of "C" or higher in courses with BIOL, CHEM, and FRSC prefixes
- Completion of a "mock trial" capstone experience
- Approval of department faculty
The game and interactive design (G&ID) program offers a hands-on, studio-based approach to design, programming, and storytelling. Course work covers the breadth of interactive design from AAA (trip A) game titles to the interactions of application interfaces. Skills developed in the program are applicable to the growing fields of user experience (UX) design, application design, web design, data visualization, and interactive entertainment.

ADVANTAGES
Graduates of the game and interactive design Bachelor of Science program will possess the skills and technical knowledge base necessary to be proficient and capable in both the design and development of interactive media. They will be well prepared for entry-level positions in the fields of experience (UX) design, application design, web design, data visualization, and interactive entertainment. The program’s strength is in the versatility and flexibility of the graduating student, allowing employment opportunities to expand well beyond a singular field of design.

A laptop computer is required for students entering the game and interactive design program. Laptop specifications are available at [http://www.alfredstate.edu/game-interactive-design](http://www.alfredstate.edu/game-interactive-design)

PROGRAM STUDENT LEARNING OUTCOMES
- Demonstrate proficiency and flexibility with technology associated with game and interactive design.
- Organize and produce works of interactive media in a team environment.
- Create quality works of game design and interactive media that utilize relevant history and theory.
- Analyze their own work, as well as the work of others in critiques, presentations, writings, and other activities.
- Demonstrate a strong work ethic through time management and quality work.
- Demonstrate critical thinking by completing problem-solving activities.

OCCUPATIONAL OPPORTUNITIES
- Game design
- UX (user experience design)
- Interactive entertainment
- Application design
- Data visualization
- Web design

RELATED PROGRAMS
- Digital Media and Animation
- Graphic and Media Design
- Information Technology: Web Development

ENTRANCE REQUIREMENTS/RECOMMENDATIONS
Required: Algebra and Geometry Transfer applicants must possess a 2.0 cumulative grade point average as well as a grade of "C" or better in each course taken during the most recent semester of attendance. Individuals with less than a 2.0 cumulative grade point average may be considered with additional documentation.

Recommended: Algebra 2, Physics

BS DEGREE GRADUATION REQUIREMENTS

- Complete 121 total semester credit hours
- 60 credit hours of liberal arts and sciences from eight of the 10 SUNY general education categories
- 2.0 cumulative GPA
- Grade of "C" or better in core courses (DGMA and CISY prefixes)
- Students are also required to complete a digital portfolio assignment and annual reviews to meet graduation requirements.
The game and interactive design (AS) program will offer a hands-on, studio-based approach to design, programming, and storytelling. Course work covers the breadth of interactive design from AAA (triple A) game titles to the interactions of application interfaces. Skills developed in the program are applicable to the growing fields of user experience (UX) design, application design, web design, data visualization and interactive entertainment. The program will develop foundational skills, yet provide versatility and flexibility in the graduating student, allowing employment opportunities to expand well beyond a singular field of design.

ADVANTAGES
Graduates of the game and interactive design Associate in Science (AS) program will possess the skills and technical knowledge base necessary to be proficient and capable in both the design and development of interactive media. They will be prepared for entry-level positions in the fields of experience (UX) design, application design, web design, data visualization, and interactive entertainment, as well as prepared for transfer to a bachelor's-level program.

A laptop computer is required for students entering the game and interactive design program. Laptop specifications are available at [link]

PROGRAM STUDENT LEARNING OUTCOMES
Graduates of the program will be able to:
- Demonstrate proficiency with the technology associated with game and interactive design.
- Organize and produce works of interactive media.
- Create quality works of game design and interactive media.
- Analyze their own work, as well as the work of others in critiques, presentations, writings, and other activities.
- Demonstrate a strong work ethic through time management and quality works.
- Demonstrate critical thinking by completing problem-solving activities.

DIRECT ENTRY INTO BACCALAUREATE DEGREE PROGRAMS
Alfred State game and interactive design AS graduates may enter directly into the game and interactive design BS, the interdisciplinary studies BTech, or the technology management BBA degree program.

OCCUPATIONAL OPPORTUNITIES
- Game design
- UX (user experience design)
- Interactive entertainment
- Application design
- Data visualization
- Web design

EMPLOYMENT STATISTICS
No data available.

RELATED PROGRAMS
- Digital Media and Animation
- Graphic and Media Design
- Information Technology: Web Development

ENTRANCE REQUIREMENTS/RECOMMENDATIONS
Required: Algebra, Geometry
Recommended: Algebra 2, Physics
The graphic and media design (AS) program provides graduates with foundational knowledge in graphic design for screen-based and print media. The program focuses on developing the contemporary problem-solving and design skills needed to apply the elements and principles of design, drawing, and visual communication. An awareness of design history is combined with the latest topics in graphic and media design to provide an informed student aimed at innovation in the field.

Graduates will possess the skills necessary to be well rounded in both design and production across a wide variety of print and digital media. They will be prepared for entry-level positions at design firms and in-house design and/or production departments within larger companies.

ADVANTAGES

The Alfred State graphic and media design (GMD) program is different from other such programs because it is constructed to meet the current needs for design in a time-based, screen-filled world. From cellphones to video billboards, new venues are demanding movement and interaction. This program is built to take advantage of new and ever-changing technologies and remain at the leading edge of design.

Because designers are being asked to design for print and screen, this requires new thinking, new versatility, and a new type of creative problem-solver. A new versatile designer is what Alfred State’s graphic and media design program is designed to produce.

A laptop computer is required for students entering the graphic and media design program. Laptop specifications are available at http://www.alfredstate.edu/Graphic-MediaDesign

PROGRAM STUDENT LEARNING OUTCOMES

- Demonstrate proficiency and flexibility with technology associated with graphic and media design.
- Demonstrate use of a professional design process to conceptualize and create a finished design project.
- Analyze their own work, as well as others through critiques, presentations, and other activities.
- Employ critical thinking to complete problem-solving activities.
- Create quality graphic and media design that utilizes relevant design history and theory.

DIRECT ENTRY INTO BACCALAUREATE DEGREE PROGRAM

Graphic and media design AS graduates may enter directly into either the graphic and media design BS, the interdisciplinary studies BTech, or the technology management BBA degree program.

CONTINUING EDUCATION OPPORTUNITIES

Graduates will be well prepared to continue into baccalaureate programs in graphic design, media production, and education.

FACILITIES

- Video and audio production studio
- High-end computer labs
- Screen printing
- Large-format printing
- Traditional materials studios
- 24-hour studio access
- HD video and surround-sound in each studio
- Real-world collaborative studio environments
- Virtual reality and 3D sculpting studio
- 3D printing and laser cutting lab

OCCUPATIONAL OPPORTUNITIES

- Graphic design
- Media design
- Fine art
- Video and audio production

EMPLOYMENT STATISTICS

Employment and continuing education rate at 100 percent – 50 percent are employed; 50 percent continued their education.

RELATED PROGRAMS

- Digital Media and Animation
- Game and Interactive Design

RELATED CLUBS

- Visual Impact Club

- **XXXX xxx3**: LAS Elective (Upper Level) 3

### Seventh
- **DGMA 7803**: Professional Practices 3
- **DGMA 6303**: Special Topics Media Design I 3
- **DGMA 7603**: Advanced Motion Graphics 3
- **XXXX xxx3**: LAS Elective 3
- **XXXX xxx3**: LAS Elective 3

### Eighth
- **DGMA 8403**: Sr Studio Proj - Media Design 3
- **DGMA 8503**: Special Topics Media Design II 3
- **DGMA 8203**: Media Design Seminar 3
- **XXXX xxx3**: LAS Elective 3
- **XXXX xxx3**: Gen Ed/LAS Elective 3

## Graduation Requirements
To fulfill degree requirements, each student must complete 124 total semester credit hours, including a minimum of 60 credit hours of liberal arts and sciences from eight of the 10 State University of New York general education categories, and earn a 2.0 cumulative GPA and a grade of “C” or better in the core courses (DGMA and FNAT prefixes).

Students are required to complete a digital portfolio assignment and annual review to meet graduation requirements.

A typical day consists of two, one-hour lectures and a two-hour studio in the freshman and sophomore years.
Health information technology (HIT) professionals play a key role in the planning, implementation, and management of the electronic health record (EHR), and with today’s growing reliance on computer-based records, this profession has become one of the fastest-growing in the nation. HIT professionals are educated in the leadership and management of health information, and are considered the custodians of health information. In this career, your primary function will be to make sure all the medical information collected about an individual is complete, accurate, and protected, while, at the same time, readily available for health care providers when it is needed. Alfred State offers an online Associate in Applied Science degree in Health Information Technology, which combines a profession in health care with information technology. As an HIT professional, you will be responsible for maintaining components of health information systems consistent with medical, legal, accreditation, and regulatory requirements of the health care delivery system. You will also maintain, collect, and analyze data crucial to the delivery of quality patient care.

ADVANTAGES

• Graduates are eligible to take the national certification examination to become a registered health information technician (RHIT). Since the program was created in 1968, Alfred State HIT graduates have traditionally achieved a passing rate above the national average.
• Teaching faculty in HIT curriculum have real-world Health Information Management (HIM) industry experience.

PROGRAM STUDENT LEARNING OBJECTIVES

• Apply biomedical knowledge (including medical terminology, anatomy & physiology, pathophysiology, and pharmacology) to apply diagnosis/ procedure codes (ICD-9-CM, ICD-10-CM, ICD-10-PCS, CPT, and HCPCS level II) according to current nomenclature.
• Use established federal guidelines, accreditation standards, and APC and DRG calculator/grouper software to comply with health care documentation (review), reimbursement, and reporting requirements.
• Apply HIM knowledge as defined by organizational policy and external regulations (e.g., Medicare, Medicaid, managed care) and standards to maintain the accuracy and completeness of the patient record.
• Apply HIM knowledge of policies and procedures for confidentiality and security measures regarding the access and disclosure of protected health information (PHI) to authorized users.
• Apply HIM knowledge in the collection, maintenance, and reporting of data for clinical indices/databases/registries to meet specific organizational and regulatory needs for the purposes of medical research and education.
• Organize and present data for quality management, utilization management, risk management, and other related studies.
• Apply HIM knowledge of legal, ethical, accreditation and certification standards as appropriate for the management of patient information.
• Apply basic methods when calculating descriptive, statistical, and health care vital statistics.
• Apply the use of common software applications (e.g., spreadsheets, databases, word processing, graphics, presentation, email, and so on) and HIM-related software applications (e.g., release of information, electronic health record, patient record abstracting, and so on).
• Apply HIM knowledge to promote ethical standards of practice to health information management and coding.
• Demonstrate effective written and oral communication as appropriate to health information management and coding practices. Communicate effectively with consumers, providers, and other health care professionals.
• Demonstrate critical thinking to problem solving and reasoning skills to health information management and coding practices.

PROFESSIONAL PRACTICE EXPERIENCES

Students complete non-paid professional practice experiences (PPEs) in the Health Information Department of a health care facility (160 hours) in their study. PPE arrangements are made in consultation with each student to identify locations considered to be within a reasonable distance. Students are not a substitute for paid staff during PPEs, which means they are expected to receive appropriate supervision and mentoring during completion of all tasks. The professional practical experience (PPE) includes the completion of on-site hours in the Health Information Management (HIM) Department of a hospital (or other health care facility) with adequate facilities to provide varied work opportunities in HIM.

The Joint Commission Hospital Accreditation Standards Manual requires hospitals to implement “a process to ensure that a person’s qualifications are consistent with their job responsibilities.” This standard “applies to staff, students, and volunteers,” and it further states the hospital is responsible for verifying “the following according to law, regulation, or hospital policy: information on criminal background.” As such, Alfred State students who complete PPEs in the HIT program may be required to undergo a criminal background check prior to placement at the facility. The PPE facility may require students to undergo a physical examination (on-site at the facility or by the student’s primary care provider) prior to beginning the professional practice experience. The physical examination includes drug screening, a TB test, and/or DTB, hepatitis B, and/or MMRV immunization or status. Students may be required to incur costs associated with the criminal background check and/or physical examination. Be advised that a prior felony conviction may impede a student’s ability to participate in a required professional practice experience. Students may be required to attend an on-site orientation at the professional practice facility, which could be several days in length beyond the 160 PPE hours.

NOTE: Students must make appropriate arrangements with their current employer to complete the 160 hours at the PPE host site.

ARTICULATION AGREEMENTS

One-plus-one transfer agreements exist among Alfred State and Jamestown and American Samoa Community Colleges. Students complete their first year of study at the local community college and transfer to Alfred State for their second year. Transfer is guaranteed if a student successfully completes the prescribed first-year schedule of courses with a 2.0 cumulative index.

CONTINUING EDUCATION OPPORTUNITIES

Although not limited to these schools, common transfer institutions for HIT bachelor’s degree programs include SUNY Polytechnic, Stephens College, St. Scholastica, Regis University, University of Cincinnati, and Saint Joseph's College of Maine.

DIRECT ENTRY INTO BACCALAUREATE DEGREE PROGRAMS

Alfred State health information technology AAS graduates may enter directly into the healthcare management BTech, the interdisciplinary studies BTech, or the technology management BBA degree program.

CERTIFICATION

Graduates are eligible to take the Registered Health Information Technician (RHIT), Certified Coding Specialist (CCA, CCS, CCS-P), and Certified Professional Coder (CPC, CPC-A, CPC-H-A, CPC-H, CPC-P) exams.

RELATED PROGRAMS

Coding and Reimbursement Specialist (Certificate)

OCCUPATIONAL OPPORTUNITIES

• Hospitals and other health care facilities
• Clinics and physicians’ offices
• Insurance companies
• State and federal agencies
• Law firms
• Software companies
• Consulting

EMPLOYMENT STATISTICS

Employment and continuing education rate of 100 percent – 100 percent are employed.
HEALTH INFORMATION TECHNOLOGY

TYPICAL FOUR-SEMESTER PROGRAM - Full-time (12 credit hours or more)

This program is offered as an internet-based program only

First
- BIOL 1114 Human Anat & Physiology I 4
- COMP 1503 Freshman Composition 3
- MEDR 1133 Medical Terminology 3
- MEDR 1132 Essentials of Pharmacology 2
- MEDR 1114 Intro to Health Info Management 4

Second
- BIOL 2214 Human Anat & Physiology II 4
- BIOL 4403 Pathophysiology 3
- MEDR 3114 Electronic Health Record Mgmt 4
- MEDR 1234 ICD-10-CM & ICD-10-PCS Coding 4
- MATH 1113 Statistical Concepts 3

Third
- MEDR 1223 Hlth Data Mgmt & Hlthcare Stat 3
- MEDR 1244 CPT & HCPCS Level II Coding 4
- MEDR 4214 Insurance&Reimbursmt Processing 4
- MEDR 3414 Quality & Legal Aspects of HIM 4
- GLST 2113 Global Perspectives:Spbl Topic 3

Fourth
- MEDR 4514 Alternate Care Hlth Info Mgmt 4
- MEDR 4213 Leadership in Health Info Tech 3
- MEDR 4312 HIM Operations PPE 2
- MEDR 4322 Coding PPE 2
- MEDR 4111 Health Informatin Tech Seminar 1

HIT students are required to earn a grade of at least a "C" or better in each BIOL and MEDR prefix course prior to placement in the PPEs. Students must also earn a grade of at least a "C" in all BIOL, MEDR, and COMP 1503 courses to graduate from the HIT program.

MEDR 2614 (advanced coding & reimbursement) may be taken in the last semester as an elective.

STUDENT ACHIEVEMENT
The RHIT examination pass rate for the 2018-2019 graduating class is 92 percent.

ACREDITATION/CERTIFICATION
The health information technology program is accredited by the Commission on Accreditation for Health Informatics and Information Management Education (CAHIIM) [233 N. Michigan Ave., 21st Floor, Chicago, IL 60601-5800, 312-233-1100, www.cahiim.org/]. CAHIIM is an independent accrediting organization that enforces quality Accreditation Standards for Health Informatics and Health Information Management (HIM) educational programs through accreditation.

CAHIIM accredits associate and baccalaureate degree programs in health information management and master's degree programs in the health informatics and health information management professions. CAHIIM is recognized by the Council for Higher Education Accreditation (CHEA) [One Dupont Circle NW, Suite 510, Washington, DC 20036, 202-955-6126, chea@chea.org]. CHEA is a nationally recognized nongovernmental higher education organization that undertakes recognition of accrediting bodies.

Alfred State is accredited by the Middle States Commission on Higher Education [3624 Market St., Philadelphia, PA 19104, 215-662-5606].

ENTRANCE REQUIREMENTS/RECOMMENDATIONS
Required: Biology, Algebra

Recommended: Keyboarding and knowledge of Microsoft Office Professional

Must be able to attend Professional Practice Experience (PPE) courses including 160 hours at a health care facility within reasonable driving/travel distance to their home.

Students who believe they need a reasonable accommodation to participate in this program may contact Melanie Ryan in the Office of Accessibility Services. This office may be contacted by email at DisabilityServices@alfredstate.edu or by phone at 607-587-4506. Please keep in mind that some accommodations may take time to implement, so students seeking accommodations are encouraged to contact OAS as early as possible.

GENERAL NOTES
- Working in the Health Information Management HIM profession requires long periods of standing and/or sitting.
- Job duties typically include handling paper documents and use of computer screens.
- Near vision reading of paper records or computer screens, including the use of multiple computer applications, is required 95 percent of the time.
- Documents are handwritten on paper, and other documents and information used are on computer screens, including scanned documents and images.
- The computer screen fonts may be small. The extensive use of a computer keyboard and mouse is required.
- HIM professionals spend the greater portion of the work day reading and analyzing both handwritten and computerized documents and use multiple software applications such as the electronic health record.
- Individuals should assess their personal limitations and abilities within these working environments, as HIM candidates will be assessed in all of these skill sets during the hiring process.

HEALTH SCIENCES

BS DEGREE - CODE #2564
Dr. Kathryn Link, Program Coordinator
Email address: linkka@alfredstate.edu

The Bachelor of Science in health sciences program is a rigorous four-year baccalaureate degree in biological sciences designed to satisfy requirements for students entering health care professions or graduate-level biomedical research. Students in the program will be exposed to a rich offering of liberal arts courses and will advance from basic biology, chemistry, and physics courses to upper-level courses in biology, chemistry, health care, and research. The program further provides opportunities to select from a wide range of health-related technical electives to enhance and broaden the student’s expertise. These will prepare the graduate for working with future colleagues from the health care professions and the diverse population that will require their services. In addition, this program will prepare the graduate to seek transfer options to graduate-level or initial professional degree programs.

ADVANTAGES
• Students will build a solid foundation in biology and chemistry courses.
• Students will be able to internally and seamlessly transfer from Alfred State’s biological science (AAS) degree.
• Students will further advance knowledge and skills in biology, chemistry, health care, and research through courses, including microbiology, genetics, bio-techniques, molecular and cellular biology, biochemistry, culture of health care, ethical issues in health care, and research methods.
• Students will have the opportunity to enhance and broaden their training by selecting from a list of approved health-related technical electives such as advanced pharmacology, complementary and alternative medicine, genomics, instrumental analysis, medical anthropology, and more.
• Students will conceptualize and implement their knowledge and skills through a directed research experience or professional internship.

PROGRAM STUDENT LEARNING OUTCOMES (PSLOS)
• Apply the scientific principles of biology and chemistry to specific applications in health sciences.
• Explain and show competency in basic biological and chemical laboratory procedures.
• Demonstrate an understanding of the capabilities, use, potential, and limitations of various laboratory instrumental techniques widely utilized in health sciences.
• Recognize and use appropriate professional and ethical behavior as defined by the health sciences community.
• Evaluate scientific literature to distinguish fact from opinion, develop informed and reasonable conclusions, apply knowledge and understanding to problems, develop rational and reasonable interpretations, suspend beliefs and remain open to new information and methods, and assimilate information learned into knowledge base.
• Use technological resources effectively and appropriately to communicate, collaborate, and retrieve information; determine when technology is useful; and select the appropriate tool(s) and technology resources to address a variety of tasks and problems.
• Apply written communication skills to construct documents of record that are well organized and contain appropriate format, grammar, punctuation, sentence structure, and spelling in accordance with established professional guidelines.
• Apply oral communication skills to the explanation of ideas, scientific terminology, and results of scientific examinations in a competent and confident manner.
• Synthesize theory and concepts from the liberal arts education domain and other professions into health sciences.

FUTURE EDUCATIONAL OPPORTUNITIES
• Medicine
• Physician assistant
• Dentistry
• Optometry
• Osteopathy
• Pharmacy
• Audiology
• Physical therapy
• Occupational therapy
• Chiropractic
• Clinical psychology
• Graduate level biology, chemistry, or biomedical science

LECOM EARLY ADMISSION PROGRAM
Alfred State's health sciences program has an agreement in place with the Lake Erie College of Osteopathic Medicine (LECOM). Through this 4+4 program, a student who earns a BS in health sciences at Alfred State College will continue their education at LECOM. As a high school senior, you can apply and be admitted to both Alfred State College and LECOM's College of Osteopathic Medicine or its College of Pharmacy. For more information about LECOM, visit www.LECOM.edu/admissions/about-admissions/

EMPLOYMENT STATISTICS
Employment and continuing education rate of 100 percent – 50 percent are employed; 50 percent continued their education.

RELATED PROGRAMS
Biological Science
Forensic Science Technology

INTERNERNSHIP OPPORTUNITIES
• Academic or industrial research laboratory
• Health care or clinical laboratory
• Pharmacy
• Health care practitioner’s office

ENTRANCE REQUIREMENTS/RECOMMENDATIONS
Specific high school course requirements and recommendations are:
Required: Algebra, Geometry, Algebra 2, Biology, Chemistry
Recommended: Physics

Students who believe they need a reasonable accommodation to participate in this program may contact Melanie Ryan in the Office of Accessibility Services. This office may be contacted by email at DisabilityServices@alfredstate.edu or by phone at 607-587-4506. Please keep in mind that some accommodations may take time to implement, so students seeking accommodations are encouraged to contact OAS as early as possible.

TECHNICAL STANDARDS
Technical Standards for Health Sciences:
It is essential that students in this degree program are able to fully and safely participate, with or without reasonable accommodation, in all classroom, laboratory, field, internship, and research experiences required for completion of the program. Students in this degree program should be able to:
• Function in a safe manner, not placing themselves, faculty, staff, or other students in jeopardy.
• Appropriately and safely use standard laboratory equipment, materials, and instrumentation to include possession of fine motor skills and mobility.
• Make sensory visual and auditory observations during, and interpret data from, all required laboratory assignments.
• Communicate effectively, both orally and in writing.
In addition, this degree program requires students to complete either an off-campus internship experience or a research project. Students in this degree program are expected to meet the following professional standards:

- Maintain confidentiality in professional workplace settings.
- Maintain professional composure at all times.

Be advised that a prior felony conviction may impede a student’s ability to participate in an internship experience.

**GRADUATION REQUIREMENTS**

- 124 total semester credit hours
- 74 semester credit hours of liberal arts and sciences from seven of the 10 SUNY General Education categories
- 48 upper-division credit hours
- 42 upper-division credit hours in the major
- Minimum of 30 upper-division credit hours in residence
- 3 credit hours of research or internship
- 2.0 cumulative grade point average
- Grade of “C” or higher in core courses with BIOL, CHEM, HLSC, and HLTH prefixes
- Approval of department faculty

HEALTHCARE MANAGEMENT

BTECH DEGREE – CODE #2647

Kathy Young, Department Chair
Email address: youngk@alfredstate.edu

The Bachelor of Technology in healthcare management (HCM-BT) is an online, upper-division program designed to allow a student or working professional who has earned an associate degree (AAS, AA, or AS) in a health-related area (or at least 60 credits toward such a degree) to complete a bachelor’s degree. Individuals may currently be working in a laboratory, radiology, records, occupational therapy, surgical technology, paramedic, or ultrasound setting, and seeking advancement into management or administrative positions. The HCM-BT will open doors for these working adults by providing flexible online courses and ladderling with all health-related two-year degrees granted by both colleges of technology and community colleges. The program emphasizes the development of managerial skills through a set of core courses and a wide array of electives to address areas such as healthcare finance/accounting, the culture of healthcare, human resources, communications, healthcare law and ethics and policies, information systems, marketing, and quality control. This degree will also provide an opportunity for students to continue their education toward an MBA to become a CNO, CEO, or COO.

ADVANTAGES

• Students will build a solid foundation in healthcare-related management courses from those currently working in the field.
• Students will be able to internally, seamlessly transfer from Alfred State’s radiologic technology, diagnostic medical sonography, health information technology, and nursing AAS degrees.
• Students will have the opportunity to enhance and broaden their training by selecting from a list of approved healthcare technical electives.

PROGRAM STUDENT LEARNING OUTCOMES

• Apply an understanding of self, as well as an understanding of the dynamics of groups and team interaction.
• Discuss and apply the methods used to plan, organize, and lead a healthcare facility.
• Analyze and use the appropriate skills and techniques needed for problem solving and decision making.
• Analyze and explain the application of employment laws and the legal system to the healthcare environment.
• Communicate effectively: oral, written, and nonverbal, using current technology where appropriate.
• Illustrate basic accounting methods and apply them using current technology.
• Perform financial and statistical analysis.
• Discuss the uses of and be able to prepare a comprehensive healthcare marketing plan.

OCCUPATIONAL OPPORTUNITIES

• Medical and health services department managers
• Public relations and fundraising managers
• Administrative services managers
• Training and development managers

FUTURE EDUCATIONAL OPPORTUNITIES

• Master of Business Administration (MBA)
• Master of Science (MS) Health Services Administration
• Master of Science (MS) Healthcare Management
• Doctorate of Philosophy (PhD) Healthcare Administration

EMPLOYMENT STATISTICS

Employment and continuing education rate of 75 percent – 50 percent are employed; 25 percent continued their education.

RELATED PROGRAMS

Diagnostic Medical Sonography (AAS)
Health Information Technology (AAS)
Radiologic Technology (AAS)
Technology Management (BTech)

ENTRANCE REQUIREMENTS/RECOMMENDATIONS

This upper-division program is designed to accept students who have already earned an associate degree in a health-related field. Accordingly, the admission requirements reflect the requisite advanced standing. In all other respects, the criteria parallel the requirements of similar baccalaureate completion programs at Alfred State.

• Associate degree or 60-plus credits in a health-related field
• A minimum of five SUNY Gen. Education categories covered
• A minimum of 21 credits in liberal arts and sciences
• Minimum GPA of 2.00

Students who believe they need a reasonable accommodation to participate in this program may contact Melanie Ryan in the Office of Accessibility Services. This office may be contacted by email at DisabilityServices@alfredstate.edu or by phone at 607-587-4506. Please keep in mind that some accommodations may take time to implement, so students seeking accommodations are encouraged to contact OAS as early as possible.

HEATING, VENTILATION, AND AIR CONDITIONING
AOS DEGREE - CODE #0464

R. Jack Jones, Department Chair
Email address: jonesrj@alfredstate.edu

Scott Hillman, Program Coordinator
Email address: hillmasd@alfredstate.edu

The heating, ventilation, and air conditioning program will prepare you for
this growing field with courses on all phases of residential and commercial
installation, maintenance, troubleshooting, and repair. It includes forced air, hot
water and steam heating, gas and oil burner systems, along with hands-on air
conditioning and heat pump technology.

The plumbing aspect of the program provides instruction in the basic skills
required by the plumber in the construction of residential housing and
commercial buildings. The program ranges from the installation of waste and
sewage lines to the installation of potable water lines and plumbing fixtures.

ADVANTAGES
• The program provides the necessary theory connected with plumbing and
  HVAC, as well as on-the-job training experience overseen by expert tradesmen.
• Students will take the National Refrigerant Handling Certification Course
  and Test and the National ARI HVAC (Air Conditioning & Refrigeration
  Institute Heating Ventilation & Air Conditioning) Competency Test.

PROGRAM STUDENT LEARNING OUTCOMES
• Accurately measure and layout PHVC (plumbing, heating, ventilation, and
  air conditioning) projects.
• Apply safe practices to hand tools, power tools, and the environment.
• Select and apply the various materials used in the PHVC trade.
• Perform appropriate trade-related math, including interpretation of charts
  and graphs.
• Perform installation service and troubleshooting of fuels and emergency
  sources used in residential and commercial PHVC.
• Effectively communicate orally.
• Use the computer to access equipment information and operating
  specifications.
• Effectively communicate in writing.

DIRECT ENTRY INTO BACCALAUREATE DEGREE PROGRAM
Alfred State heating, ventilation, and air conditioning graduates may enter
directly into the construction supervision BTech or technology management
BBA degree program. Graduates who have credit for freshman composition,
statistics, literature, history, and speech may complete the baccalaureate
program in two additional years; others may complete the program in two-and-
one-half years.

OCCUPATIONAL OPPORTUNITIES
• Maintenance personnel
• Maintenance supervisor
• Sheet metal fabricator
• Sales representative
• Pipe fitter
• Sprinkler installer
• HVAC mechanic or troubleshooter
• Water or sewer plant operator
• Private contractor

EMPLOYMENT STATISTICS
Employment and continuing education rate of 91 percent – 73 percent are
employed; 18 percent continued their education.

RELATED PROGRAMS
Building Trades; Building Construction
Masonry

REQUIRED TOOLS/EQUIPMENT
A list of required tools, equipment, PPE, etc. for all of the programs mentioned
above can be found at http://www.alfredstate.edu/admissions/accepted-
students/required-tools-supplies.

ENTRANCE REQUIREMENTS/RECOMMENDATIONS
Recommended: Algebra and Geometry

TECHNICAL STANDARDS
Applicants in the heating, ventilation, and air conditioning program must meet
the following physical requirements:
• Must be able to lift 50 pounds to shoulder height.
• Must be able to perform safely in the laboratory.
• Must be able to effectively communicate with a person 20 feet away.
• Must be able to climb a ladder and/or able to climb, unaided, onto and off
equipment using three points of contact.
• Must be able to safely respond to a backup warning alarm.

Students who believe they need a reasonable accommodation to
participate in this program may contact Melanie Ryan in the Office of
Accessibility Services (OAS). This office may be contacted by email at
DisabilityServices@alfredstate.edu or by phone at 607-587-4506. Please keep
in mind that some accommodations may take time to implement, so students
seeking accommodations are encouraged to contact OAS as early as possible.

### GRADUATION REQUIREMENTS

A student must successfully complete all courses in the prescribed four-semester program and earn a minimum cumulative index of 2.0, which is equivalent to a "C" average.
HEAVY EQUIPMENT OPERATIONS

AOS DEGREE – CODE #1908

R. Jack Jones, Department Chair
Email address: jonesrr@alfredstate.edu

Mark Payne, Program Coordinator
Email address: paynem@alfredstate.edu

This program will provide you with the hands-on skills and expert training required by heavy equipment operators for the light construction and heavy highway industries. Instruction is provided in heavy equipment operations theory, as well as grades, soils, blueprint reading, safety, and supervision.

You will spend approximately 25 percent of your lab time operating real, industry-standard equipment; the balance of the lab time is spent on equipment inspection, maintenance, grades, lot layout, operation support, and estimating.

ADVANTAGES

Programs leading to an AOS degree are hands-on and do not include liberal arts and sciences courses. Offered at the School of Applied Technology campus in Wellsville, heavy equipment operations is geared toward a person who would like to enter the heavy equipment operation industry following graduation.

PROGRAM STUDENT LEARNING OUTCOMES

- Select the correct piece of equipment and demonstrate the proper use for an earth moving or excavation project.
- Select and use the necessary PPE for a given construction project.
- Demonstrate the proper set-up and use of various types of survey equipment.
- Read and interpret blueprints.
- Accurately estimate materials for a project.
- Demonstrate essential problem-solving and supervisory skills.
- Perform common mathematical calculations.
- Demonstrate how to excavate to meet construction and OSHA standards, based on the soil type.
- Safely operate various equipment utilized in the construction industry.
- Perform computer-based research and communication.

DIRECT ENTRY INTO BACCALAUREATE DEGREE PROGRAM

Alfred State heavy equipment operations graduates may enter directly into the construction supervision BTech or technology management BBA degree program. Graduates who have credit for freshman composition, statistics, literature, history, and speech may complete the baccalaureate program in two additional years; others may complete the program in two-and-one-half years.

OCCUPATIONAL OPPORTUNITIES

- Town, village, or county department of public works
- NYS Department of Transportation
- Highway and heavy construction companies
- Mining companies
- Logging companies
- Energy industry
- Self-employment
- Equipment operator
- Construction foreman
- Construction superintendent

EMPLOYMENT STATISTICS

Employment and continuing education rate of 93 percent – 90 percent are employed; 3 percent continued their education.

RELATED PROGRAMS

Heavy Equipment, Truck & Diesel Technician

REQUIRED TOOLS/EQUIPMENT

A list of required tools, equipment, PPE, etc. for the program mentioned above can be found at http://www.alfredstate.edu/admissions/accepted-students/required-tools-supplies.

ENTRANCE REQUIREMENTS/RECOMMENDATIONS

Required: Letters of recommendation, essay, and resume indicating related work experience and/or knowledge of field

Recommended: Algebra and Geometry

Students will be accepted for the heavy equipment operations program based on the strength of their application. Criteria for consideration will include high school average, Regents exam scores (if a New York State student), grades in related course work, results of standardized tests (if available), and additional information provided through letters of recommendation, a personal essay indicating career goals, and a resume.

TECHNICAL STANDARDS

Applicants in the heavy equipment operations program must meet the following physical requirements:

- Must be able to lift 50 pounds to shoulder height.
- Must be able to perform safely in the laboratory.
- Must be able to effectively communicate with a person 20 feet away.
- Must be able to climb a ladder and/or able to climb, unaided, onto and off equipment using three points of contact.
- Must be able to safely respond to a backup warning alarm.

Students who believe they need a reasonable accommodation to participate in this program may contact Melanie Ryan in the Office of Accessibility Services (OAS). This office may be contacted by email at DisabilityServices@alfredstate.edu or by phone at 607-587-4506. Please keep in mind that some accommodations may take time to implement, so students seeking accommodations are encouraged to contact OAS as early as possible.

HEAVY EQUIPMENT, TRUCK & DIESEL TECHNICIAN

AOS DEGREE – CODE #0452

Eric Wilmot, Department Chair and Program Coordinator
Email address: wilmote@alfredstate.edu

One of our most popular programs, this specialization includes 1,800 hours of practical experience and classroom training designed to prepare you to enter the dynamic field of heavy equipment maintenance and repair. You will receive a strong foundation on all types of vehicles during your freshman year, followed by a year of concentration on trucks, bulldozers, earthmovers, farm tractors, and other diesel-powered equipment during your senior year.

ADVANTAGES

- Our heavy equipment, truck and diesel technician program is the only program in New York and New England that is approved by the Association of Diesel Specialists (ADS). The heavy equipment, truck and diesel technician program is one of only nine national ADS TechSmart training programs.
- Students successfully completing the heavy equipment, truck and diesel technician program may return for a third year (senior year) in automotive service technician or motorsports technology and earn a second associate degree. They may be admitted to autobody repair with the department chair’s approval.

PROGRAM STUDENT LEARNING OUTCOMES

- Demonstrate a focused, coherent, organized written report.
- Perform mathematic calculations required for entry-level automotive employment.
- Demonstrate a functional ability to read and retain/apply written instructions and specifications relevant to their work environment.
- Demonstrate the ability to diagnose and repair heavy equipment/truck drive trains.
- Demonstrate the ability to diagnose and repair heavy equipment/truck electrical and electronic systems.
- Demonstrate the ability to diagnose and repair heavy equipment/truck gas engines.
- Demonstrate the ability to diagnose and repair heavy equipment/truck brakes, steering, and suspension systems.

DIRECT ENTRY INTO BACCALAUREATE DEGREE PROGRAM

Alfred State heavy equipment, truck and diesel technician graduates may enter directly into the technology management BBA degree program. Graduates who have credit for freshman composition, statistics, literature, history, and speech may complete the BBA program in two additional years; others may complete the BBA program in two-and-one-half years.

OCCUPATIONAL OPPORTUNITIES

- Agricultural equipment mechanic
- Service manager
- Diesel engine specialist
- Diesel fuel system specialist
- Shop foreman
- Heavy equipment mechanic
- Truck fleet mechanic
- Industrial equipment mechanic
- Marine engine service technician

EMPLOYMENT STATISTICS

Employment and continuing education rate of 100 percent – 77 percent are employed; 23 percent continued their education.

RELATED PROGRAMS

Autobody Repair
Automotive Service Technician
Mechanical Engineering Technology
Motorcycle and Power Sports Technology
Welding Technology

REQUIRED TOOLS/EQUIPMENT

A list of required tools, equipment, PPE, etc. for all of the programs mentioned above can be found at http://www.alfredstate.edu/admissions/accepted-students/required-tools-supplies.

ENTRANCE REQUIREMENTS/RECOMMENDATIONS

Recommended: Algebra

TECHNICAL STANDARDS

Applicants for all programs in the Automotive Trades Department must meet the following physical requirements:

- Must be able to lift 50 pounds to eye level.
- Must be able to effectively communicate with a person 6 to 10 feet away.
- Must be able to visually decipher small images on a monitor or digital display.
- Must be able to distinguish sounds associated with mechanical failures.
- Must be able to comprehend written information found in service repair manuals.
- Must have a valid motor vehicle driver’s license.
- Students who believe they need a reasonable accommodation to participate in this program may contact Melanie Ryan in the Office of Accessibility Services. This office may be contacted by email at DisabilityServices@alfredstate.edu or by phone at 607-587-4506. Please keep in mind that some accommodations may take time to implement, so students seeking accommodations are encouraged to contact OAS as early as possible.

CERTIFICATION OR LICENSURE

Students may take Automotive Service Excellence (ASE) certification exams in eight areas and the ADS TechCert test. Students are eligible for New York State inspection certification upon successful completion of their freshman year. In their senior year, students may take the test for certification in Basic Engine Theory through the Association of Diesel Specialists.

Continuing Students:

Students successfully completing the heavy equipment, truck & diesel technician program receive first priority for space if they wish a third year (senior year) in automotive service technician. They may be admitted to autobody repair with the department chair’s approval.

GRADUATION REQUIREMENTS

A student must successfully complete all courses in the prescribed four-semester program and earn a minimum cumulative index of 2.0, which is equivalent to a “C” average.
HUMAN SERVICES

AS DEGREE – CODE #1175

Jill Priest Amati, Department Chair and Program Coordinator
Email address: amatijp@alfredstate.edu

The human services program is a broadly based, applied program emphasizing both professional course work in the human services and course work in the social sciences and liberal arts. As a student, you will take courses that provide you with the skills and knowledge to be successful when working in a variety of human services agencies. You will also have the opportunity to take electives in specialty areas such as education, substance abuse, criminal justice, and gerontology.

PROGRAM STUDENT LEARNING OUTCOMES

• Apply critical thinking skills in the context of professional practice.
• Perform the basic operations of personal computer use, as well as employ basic research techniques to locate, evaluate, and synthesize information from a variety of sources.
• Communicate effectively and appropriately in oral and written forms.
• Demonstrate ethical professional behaviors.
• Identify the components of one’s own belief systems and the assumptions underlying them.
• Analyze the impact of social policies on client systems, workers, and agencies.
• Identify the bio-psycho-social variables that affect individual and group development and behavior.
• Examine the role of diversity in the human services field.

DIRECT ENTRY INTO BACCALAUREATE DEGREE PROGRAMS

Alfred State human services graduates may enter directly into either the human services management BS, the interdisciplinary studies BTech, or the technology management BBA degree program.

CONTINUING EDUCATION OPPORTUNITIES

The human services program offers excellent transfer potential in fields such as psychology, human services, human services management, education, social work, sociology, criminal justice, gerontology, and communications. Among the colleges to which recent graduates have successfully transferred are: Alfred University, Mansfield University, Hilbert College, SUNY at Brockport, University of Buffalo, and SUNY at Stony Brook.

INTERNSHIP OPPORTUNITIES

In Practicum (HUSR 1074) students complete a substantial internship providing direct service to clients at one local/regional human services agency. Agencies include Accord Corp., Alfred Montessori School, Allegany County ARC, Allegany County Department of Health, Allegany County Office of the Aging, Allegany Rehabilitation Associates, Inc., Catholic Charities, Hornell Area Concern for Youth, Trapping Brook House, and the YMCA of Hornell.

Be advised that a prior felony conviction may impede a student’s ability to participate in an internship and complete the program.

OCCUPATIONAL OPPORTUNITIES

• Early childhood programs
• Education
• Social services
• Youth services
• Elderly services
• Criminal justice
• Disability services
• Substance abuse programs
• Activity directors

EMPLOYMENT STATISTICS

Employment and continuing education rate of 100 percent – 36 percent are employed; 64 percent continued their education.

RELATED PROGRAMS

Human Services Management
Individual Studies
Interdisciplinary Studies
Liberal Arts & Sciences: Social Science

ENTRANCE REQUIREMENTS/RECOMMENDATIONS

Required: Algebra

Recommended: Geometry, Biology

Students who believe they need a reasonable accommodation to participate in this program may contact Melanie Ryan in the Office of Accessibility Services. This office may be contacted by email at DisabilityServices@alfredstate.edu or by phone at 607-587-4506. Please keep in mind that some accommodations may take time to implement, so students seeking accommodations are encouraged to contact OAS as early as possible.

Technical Standards - Human Services

These technical standards have been established to inform students of the skills and standards necessary for completion of the human services program and as a professional in the field of human services.
Students must possess physical ability to navigate in the classroom, intern site, and community. Attend class and complete required number of hours during internship. Attend and perform safely and satisfactorily in the classroom and in a human/social services agency/organization.

Meet the physical demands of internship placement, including demands related to the use of sensory and motor skills. Accurately observe clients to effectively assess their situations. Have sensory abilities to carry out necessary assessment activities.

Think critically, analyze, and interpret objective and subjective data. Apply effective problem-solving skills. Demonstrate appropriate coping mechanisms when managing life-stressors. Use appropriate self-care. Evaluate and appropriately modify behavior for medical or emotional problems that interfere with academic and internship performance.

Demonstrate appropriate use of self-disclosure. Resolve ethical dilemmas that may occur among classmates, during class projects, and while at practicum sites. Comply with applicable ethical and legal standards of privacy and confidentiality as they relate to clients, class activities, and internship placements.

Adhere to policies on academic integrity and code of conduct. Ability to pass a background check.* Adhere to the Ethical Standards for Human Services Professionals (NOHS).

Capacity to work with individuals, families, groups, and colleagues from a variety of social/emotional, agencies/or organizations that support them. Adhere to the Ethical Standards for Human Services Professionals (NOHS).

Communication skills sufficient to communicate in class and in human service agencies/organizations. Communicate effectively with other students, faculty, clients, and other professionals.

Have a willingness to listen attentively. Communicate effectively through presentations, written assignments, small group settings, and through electronic means. Perceive and interpret nonverbal communication. Demonstrate competency in writing skills.

*Students must sign a document indicating they understand that if they have a felony conviction they may not pass a background check for employment in human services.

PRACTICUM (HUSR 1074) PREREQUISITES

- Good academic standing (cumulative GPA of 2.0 or higher)
- Completion of PSYC 1063 and either HUSR 2083 or HUSR 4033 with a "C" or higher grade
- Submission of HUSR 1074 practicum application form to the departmental practicum coordinator
- Approval of the department faculty
- Ability to pass any agency required background check

GRADUATION REQUIREMENTS

- Good academic standing (cumulative GPA of 2.0 or higher)
- Successful completion of all courses in the prescribed four-semester plan
- "C" average or higher needed in HUSR 2083, HUSR 4033, and PSYC 1063
- HUSR 1074 with a "B" or higher
- Submission of the college's degree application form
HUMAN SERVICES MANAGEMENT

BS DEGREE – CODE #2153

BS Degree - Accelerated - 3 year - Code #2603

Jill Priest Amati, Department Chair and Program Coordinator
Email address: amatijo@alfredstate.edu

The US Bureau of Labor Statistics expects demand for bachelor-prepared human services professionals to grow faster than average through the next decade, especially in rural areas that already face a significant shortage of human services professionals.

The baccalaureate degree (BS) program in human services management will prepare you as a generalist who can work with clients in a wide range of human services agencies and also can employ sound management practices. This interdisciplinary program will not only instruct you on how to offer direct service to clients, but also how to build a strong foundation in the basics of program management and supervision. The program requires you to take lower- and upper-level courses in the human services and additional courses in management, accounting, and leadership.

ADVANTAGES
- Internship opportunities are available. See details below.
- Graduate-level programs exist in areas including human services, human services administration, social work, social work administration, business administration, business administration - non-profit and government, and public administration.
- An accelerated three-year option exists for highly motivated and academically talented students.

PROGRAM STUDENT LEARNING OUTCOMES
- Apply critical thinking skills in the context of professional practices.
- Perform the basic operations of personal computer use and employ basic research techniques to locate, evaluate, and synthesize information from a variety of sources.
- Communicate effectively and appropriately in oral and written forms.
- Apply a core set of management skills in human resources, finance, operations, and leadership.
- Apply a core set of generalist practice skills in planning, implementing, and evaluating client interventions.
- Adhere to professional ethical standards and value diversity in all areas of practice, including the supervised field practicum, academic experiences, and community involvement.
- Analyze and design intervention strategies to improve social policies impacting client systems at individual, organizational, and community levels.
- Construct a professional portfolio to prepare for employment or graduate study.

FUTURE EDUCATIONAL OPPORTUNITIES
Graduate-level programs in areas including human services, human services administration, social work, social work administration, business administration, business administration - non-profit and government, and public administration.

OCCUPATIONAL OPPORTUNITIES
- Case, program, or residential manager
- Human services supervisor
- Aftercare coordinator
- Quality assurance specialist
- Outreach coordinator
- Grants management and organizational development specialist
- Program planner

EMPLOYMENT STATISTICS
Employment and continuing education rate of 100 percent – 86 percent are employed; 14 percent continued their education.

The US Bureau of Labor Statistics expects demand for bachelor-prepared human services professionals to grow faster than average through the next decade, especially in rural areas that already face a significant shortage of human services professionals. Depending on location, starting salary will typically range from $35,000 to $45,000.

INTERNSHIP OPPORTUNITIES
In Field Practicum (HUSR 5314) students complete 400 hours of a management-focused internship. Internship opportunities exist with a number of local and regional human services agencies including, but not limited to, ACCORD Corp., Adelphi Behavioral Sciences, Alfred Montessori School, Allegany County ARC, Allegany County Department of Health, Allegany County Department of Social Services, Allegany County Office for the Aging, Allegany Rehabilitation Associates, Inc., Catholic Charities, Hillside Children’s Services, Hornell Area Concern for Youth, St. James Mercy Healthcare, Trapping Brook House, and the YMCA of Hornell.

ENTRANCE REQUIREMENTS/RECOMMENDATIONS
- Applicants are informed that many human services agencies require that field practicum students pass background checks before being allowed to begin their field placements.
- While the program allows students to pursue their degrees on a part-time basis, applicants should be aware that they must enroll as full-time students in the semester in which they take their senior fieldwork (HUSR 5314).

Required: Algebra
Recommended: Geometry, Biology

Students who believe they need a reasonable accommodation to participate in this program may contact Melanie Ryan in the Office of Accessibility Services. This office may be contacted by email at DisabilityServices@alfredstate.edu or by phone at 607-587-4506. Please keep in mind that some accommodations may take time to implement, so students seeking accommodations are encouraged to contact OAS as early as possible.

Technical Standards - Human Services Management

These technical standards have been established to inform students of the skills and standards necessary for completion of the human services program and as a professional in the field of human services.

GRADUATION REQUIREMENTS

- Good academic standing (cumulative GPA of 2.0 or higher)
- Successful completion of all courses in the prescribed eight-semester plan
- Grade of "B" or higher in HUSR 1074 and HUSR 5314
- Completion of HUSR 5003, HUSR 5103, HUSR 5203, and HUSR 5213 with a "C" or higher grade in each course
- Submission of the college's degree application form
- Grade of "C" or higher in HUSR 2083, HUSR 4033, and PSYC 1063

Practicum (HUSR 1074) Prerequisites

- Good academic standing (cumulative GPA of 2.0 or higher)
- Completion of at least three of the following four courses - HUSR 5003, HUSR 5103, HUSR 5203, HUSR 5213 - with a "C" or higher grade in each of the three
- Submission of HUSR 5314 practicum application form to the departmental practicum coordinator
- Approval of the department faculty
- Ability to pass any required background check

Practicum (HUSR 5314) Prerequisites

- Good academic standing (cumulative GPA of 2.0 or higher)
- Completion of at least three of the following four courses - HUSR 5003, HUSR 5103, HUSR 5203, HUSR 5213 - with a "C" or higher grade in each of the three
- Submission of HUSR 5314 practicum application form to the departmental practicum coordinator
- Approval of the department faculty
- Ability to pass any required background check
- Completion of HUSR 1074 with a grade of "B" or higher

For all human services management programs: Be advised that a prior felony conviction may impede a student’s ability to participate in an internship and complete the program.

Note:

* Any non-required course designated as "Liberal Arts and Sciences" in the college catalog.

** Any non-required course taught in the Department of Social & Behavioral Sciences.

*** HUSR 1074 requires a "C" or higher between PSYC 1063 and either HUSR 2083 or HUSR 4033.

**** One of HIST 1143 (American History I), HIST 2143 (American History II), PLSC 1043 (American Government) or GEAH 9100.
INDIVIDUAL STUDIES
AS DEGREE – CODE #0688
Dr. Kathleen Ebert, Program Coordinator
Email address: ebertkc@alfredstate.edu

This broad-based online program will give you the opportunity to explore majors, career options, and futures—all in one place. It is also excellent preparation for transfer into four-year programs or various colleges and universities, and can be tailored to fulfill a career goal that cannot be met by traditional program offerings.

ADVANTAGES
• Flexibility to choose online courses that fit your needs.
• Ability to sample or select courses from different fields.
• Excellent preparation for transfer or tailoring to specific goals.

PROGRAM STUDENT LEARNING OUTCOMES
• Create written communication (including the appropriate use of technology) appropriate for degree type and level that meets standards of style, clarity, and grammatical correctness as described in the Writing Rubric.
• Demonstrate oral communication proficiency.
• Demonstrate foundational knowledge required to be an informed citizen in a global community by successfully completing (“C” or better) seven of the 10 SUNY General Education skill areas.
• Complete 15 credit hours in a concentration and describe their coherent sequence of study and transfer focus.
• Critical thinking (problem-solving, reasoning skills appropriate to degree level and type).
• Use library, online, and other resources to locate and evaluate scholarly articles and other research materials. Perform the basic operations of personal computer use, understand and use basic research techniques and locate, evaluate, and synthesize information from a variety of sources.
• Demonstrate competence in arithmetic, algebra, geometry, data analysis, and quantitative reasoning. Employ basic problem-solving strategies.

DIRECT ENTRY INTO BACCALAUREATE DEGREE PROGRAMS
Alfred State individual studies graduates may enter directly into either the interdisciplinary studies BTech or the technology management BBA degree program.

EMPLOYMENT STATISTICS
Employment and continuing education rate of 100 percent – 20 percent are employed; 80 percent continued their education.

*Depending on student's career area, additional general education and/or liberal arts credits may be needed to reach the 30-credit-hour requirement of each. If met by career area courses, these are open electives.

GRADUATION REQUIREMENTS
• A minimum of 61 hours is required for graduation, with a cumulative index of 2.0.
• Students must have a clear career or transfer focus with at least 15 credit hours, with a 2.0 GPA.
• Students must complete at least 30 credit hours in general education with at least seven of the 10 SUNY GE knowledge areas met (two of which must include math and written or oral communication).
• Students must complete at least 30 liberal arts and sciences credits
• HPED
INFORMATION TECHNOLOGY: APPLICATIONS SOFTWARE DEVELOPMENT

BTECH DEGREE – CODE #1502

Evan Enke, Program Coordinator
Email address: enkeeg@alfredstate.edu

The Bachelor of Technology degree in information technology: applications software development at Alfred State is designed to prepare you to enter the workforce as an IT professional with a special emphasis in the fast-moving field of programming and database applications. From database application to programming language sequences, including C#, Java, and C++, our expert faculty have created a curriculum to help you meet your career goals. You will also receive a sound foundation in web development, networking, and microcomputer systems. And a full-semester internship will give you the hands-on experience employers are looking for.

A laptop computer is required for students entering the information technology: applications software development program. Laptop specifications are available at www.alfredstate.edu/required-laptops.

ADVANTAGES
Due to the solid foundation in all the major fields of information technology, the job opportunities for graduates are wide and numerous.

PROGRAM STUDENT LEARNING OUTCOMES
• Produce object-oriented application software with current development programming languages.
• Produce functional databases with current DBMS such as Oracle, MySQL, Access, etc.
• Use the appropriate database design methodologies.
• Perform the full life cycle of software development.
• Develop an outline for an information system project.
• Install, configure, and troubleshoot basic hardware.
• Identify and utilize business principles and problem-solving techniques.
• Demonstrate and use managerial principles of business.
• Demonstrate knowledge of multiple areas within the liberal arts arena.
• Apply accumulated knowledge and skills in an actual industry environment.

CONTINUING EDUCATION OPPORTUNITIES
Articulation agreements have been established with many community colleges and additional agreements are in development. It is possible, with careful selection of courses, to transfer from a variety of associate degrees, including computer information systems, information technology, computer science, and others. Upon completion of the bachelor's degree, students will be prepared to pursue a graduate degree in information technology. The computer information systems degree (AAS) at Alfred State is especially well suited for transfer into the bachelor's degree at the junior level.

OCCUPATIONAL OPPORTUNITIES
Organizations of all types and sizes need computer professionals. The primary employment field includes database administrators, programmers, and systems analysts. Due to the solid foundation in all the major fields of information technology, the job opportunities for graduates are wide and numerous. They include database administrators, software developers, network support, project managers, user support, web developers, IT managers, technical sales, and technical support staff, to name a few.

EMPLOYMENT STATISTICS
Employment and continuing education rate of 100 percent – 100 percent are employed.

*If not required, take LAS elective to complete degree requirements of three credits; otherwise take free elective.

GPA of 2.5 or higher required in major courses; GPA of 2.0 minimum overall; internship is student-initiated.

Be advised that a prior felony conviction may impede a student's ability to participate in an internship and complete the program.

### GRADUATION REQUIREMENTS

- 124 credit hours
- 39 credit hours in major field required courses
- 24 credit hours in professional courses
- 18 credit hours in core concentration
- 30 credit hours in liberal arts courses
- A 2.5 grade point average in the major is needed for the required internship
- Other requirements as stated in college academic regulations
- Seven general education areas are required, including three of the following five: art, language, other world civilizations, American history, or western civilization
The Bachelor of Technology degree in information technology: network administration at Alfred State is designed to prepare you to enter the workforce as an IT professional with a special emphasis in the growing field of networking. After completing the course work, you will have a strong foundation to obtain professional certification in: Cisco Certified Network Association (CCNA), CCNA Security, Microsoft Certified Technology Specialist, CompTIA A+, and Network+. Core courses will also provide you with a foundation in other essential areas, including web server administration, programming, database applications, and microcomputer systems. And a full-semester internship will give you the hands-on experience employers are looking for.

A laptop computer is required for students entering the information technology: network administration program. Laptop specifications are available at www.alfredstate.edu/required-laptops.

ADVANTAGES
Due to the solid foundation in all the major fields of information technology, the job opportunities for graduates are wide and numerous.

PROGRAM STUDENT LEARNING OUTCOMES

• Demonstrate troubleshooting strategies and techniques with a variety of networking problems.
• Identify and configure a variety of networking topologies and protocols.
• Demonstrate effective network operation and management.
• Install and configure both client and server networking software.
• Demonstrate effective network design for LAN and WAN.
• Install and configure web, database, file, and application servers.
• Develop and implement effective security and disaster recovery systems and policies.
• Develop and maintain technical documentation and procedures for network management.
• Demonstrate knowledge of multiple areas within the liberal arts arena.
• Apply accumulated knowledge and skills in an actual industry environment.
• Identify and utilize business principles and problem-solving techniques.

CONTINUING EDUCATION OPPORTUNITIES
Articulation agreements have been established with many community colleges and additional agreements are in development. It is possible, with careful selection of courses, to transfer from a variety of associate degrees, including computer information systems, information technology, computer science, and others. The computer information systems degree (AAS) at Alfred State is especially well suited for transfer into this degree at the junior level.

OCCUPATIONAL OPPORTUNITIES
Organizations of all types and sizes need computer professionals. Due to the solid foundation in all the major areas of computer information technology and systems, job opportunities for graduates are wide and numerous. They include network administrators, systems analysts, project managers, user support, web developers, security specialists, IT managers, and technical support staff, to name just a few.

EMPLOYMENT STATISTICS
Employment and continuing education rate of 100 percent – 100 percent are employed.

INFORMATION TECHNOLOGY: WEB DEVELOPMENT

BTECH DEGREE – CODE #1506
Evan Enke, Department Chair and Program Coordinator
Email address: enkeeg@alfredstate.edu

The Bachelor of Technology degree in information technology: web development at Alfred State is designed to prepare you to enter the workforce as an IT professional with a special emphasis in web development and applications, web publishing, programming, and web server administration constitute the upper level of courses. Additionally, the web is integrated across the entire program, beginning with the very first course. Through core courses, you will also be given an essential foundation in programming, database administration, networking, and microcomputer systems. And a full-semester internship will give you the hands-on experience employers are seeking.

A laptop computer is required for students entering the information technology: web development program. Laptop specifications are available at www.alfredstate.edu/recommended-laptops.

ADVANTAGES
Due to the solid foundation in other areas, graduates will find that job opportunities are wide and numerous.

PROGRAM STUDENT LEARNING OUTCOMES
• Produce dynamically functional software with web development and scripting languages.
• Perform full life cycle of web software development.
• Create and use a database with appropriate web design principles.
• Produce functional web applications using web composing software.
• Analyze and create interface design.
• Install, configure, and troubleshoot basic hardware.
• Identify and utilize business principles and problem-solving techniques.
• Demonstrate and use managerial principles of business.
• Demonstrate knowledge of multiple areas within the liberal arts arena.
• Apply accumulated knowledge and skills in an actual industry environment.

CONTINUING EDUCATION OPPORTUNITIES
Articulation agreements have been established with many community colleges and additional agreements are in development. It is possible, with careful selection of courses, to transfer from a variety of associate degrees, including computer information systems, information technology, computer science, and others. Upon completion of the bachelor’s degree, students will be prepared to pursue a graduate degree in information technology. The computer information systems degree (AAS) at Alfred State is especially well suited for transfer into this bachelor's degree at the junior level.

OCCUPATIONAL OPPORTUNITIES
Organizations of all types and sizes need computer professionals. The primary employment field includes web administrators and developers. Due to the solid foundation in other areas, graduates will not be limited to these areas; thus, the job opportunities are wide and numerous. They include database administrators, programmers, systems analysts, network support, project managers, user support, IT managers, technical sales, and technical support staff, to name just a few.

EMPLOYMENT STATISTICS
Employment and continuing education rate of 100 percent – 100 percent are employed.

### Graduation Requirements

- 124 credit hours
- 39 credit hours in major field required courses
- 24 credit hours in professional courses
- 18 credit hours in core concentration
- 30 credit hours in liberal arts/general education courses
- A 2.5 grade point average in the major is needed for the required internship
- Other requirements as stated in college academic regulations
- Seven general education areas are required, including three of the following five: art, language, other world civilizations, American history, or western civilization

**If not required, take LAS elective to complete degree requirements of three credits; otherwise take free elective.**

**Recommended: BUAD 5003 or BUAD 6113**

***Recommended: CISY 5233 - Human Computer Interaction or CISY 4053 Linux/Unix Admin & Scripting***

GPA of 2.5 or higher required in major courses; GPA of 2.0 minimum overall; internship is student-initiated.

Be advised that a prior felony conviction may impede a student’s ability to participate in an internship and complete the program.
The Bachelor of Technology in interdisciplinary studies program is designed to provide a four-year curriculum in which students are empowered to personalize, within specified core and concentration areas, their technology-based program of study. The program is founded in academic flexibility by providing two sets of broad-based academic options. Students start with a core set of courses selected for years one and two of the program and two concentration areas for years three and four. The general academic categories are as follows:

### YEARS ONE AND TWO CORE AREAS (SELECT ONE):
- Science/Technology/Engineering/Math (STEM)
- Management
- Technical Communication
- Health
- Humanities
- Social Sciences

### YEARS THREE AND FOUR CONCENTRATION AREAS (SELECT TWO):
- Science/Technology/Engineering/Math (STEM)
- Management
- Technical Communication
- Design
- Health/Agriculture/Science
- Humanities/Social Sciences
- Technical Communication

### ADVANTAGES
- Students must complete 18 credit hours in a core area during the first two years of the program; most associate degrees will satisfy this.
- Students must also satisfy a minimum of 12 credit hours in each of two academic concentrations during the junior and senior years. Courses satisfying these requirements are identified and categorized by prefix.
- The program affords students the opportunity to design and complete a rigorous, yet flexible interdisciplinary course of study in technology-based disciplines.
- The program will provide an avenue by which students can pursue precise career interests that cannot be accommodated within typical majors.
- With appropriate advisement, graduates will be well prepared to enter and succeed in a wide range of technology-based careers.

### PROGRAM STUDENT LEARNING OUTCOMES
- Evaluate the value of the lower-level courses and analyze the relationship of those in the context of the interdisciplinary nature of the degree.
- Synthesize two or more upper-level concentration areas within an approved interdisciplinary course of study.
- Employ written communication skills (including the appropriate use of technology) appropriate for the degree type and level that meets standards of style, clarity, and grammatical correctness.
- Employ verbal communication skills (including the appropriate use of technology) appropriate for the degree type and level that meets standards of style, clarity, and grammatical correctness.
- Employ problem solving, reasoning and critical thinking skills to a situation relevant to the concentration choices.
- Demonstrate foundational knowledge required to be an informed citizen in a global community. (VED)
- Use library, online, and other resources to locate and evaluate scholarly articles and other research materials.
- Competently employ computer technology to present and manage data.

### OCCUPATIONAL OPPORTUNITIES
The nature of the program allows for many occupational opportunities. Some of the more common interest areas are as follows:
- Technical writer
- Health office manager
- Sales engineer
- Logician

### EMPLOYMENT STATISTICS
Employment and continuing education rate of 100 percent – 33 percent are employed; 67 percent continued their education.

### ENTRANCE REQUIREMENTS/RECOMMENDATIONS
Required: Algebra, Second Year of Advanced Math, Two Units of Science

Students who believe they need a reasonable accommodation to participate in this program may contact Melanie Ryan in the Office of Accessibility Services. This office may be contacted by email at DisabilityServices@alfredstate.edu or by phone at 607-587-4506. Please keep in mind that some accommodations may take time to implement, so students seeking accommodations are encouraged to contact OAS as early as possible.

### GRADUATION REQUIREMENTS – BT DEGREE
- 124 total semester credit hours
- 30 semester credit hours of liberal arts
- 30 semester credit hours of general education from seven of 10 SUNY General Education categories (must include math as well as written and oral communication)
- 48 upper-division credit hours from the approved list
- Good academic standing and at least a 2.0 cumulative grade point average
- Approval of the advising committee
The AAS interior design program is designed to provide students with knowledge and skills for entry-level positions in the interior design discipline. The program consists of a core graphics sequence with additional courses in appropriate technical areas. Digital tools are integrated throughout the four-semester program.

**ADVANTAGES**

- The faculty consists of expert interior designers, as well as licensed architects and engineers.
- Students develop the ability to think creatively, visually, and volumetrically, exhibiting a variety of ideas, approaches, and concepts when designing interior projects.
- Students gain an understanding of how design solutions affect and are impacted by construction systems, power and mechanical, lighting and ceiling systems, acoustics, building methods, and materials.

All students in both the architecture and interior design programs are required to purchase a computer before the beginning of the second year in addition to other equipment. Typically the costs of these purchases can be covered using financial aid. Please consult a financial aid counselor for further details. Laptop specifications are available at alfredstate.edu/required-laptops.

**PROGRAM STUDENT LEARNING OUTCOMES**

- Think creatively, visually and volumetrically, exhibiting a variety of ideas, approaches, and concepts when designing interior projects.
- Understand and utilize color principles, theories, and systems in design projects.
- Demonstrate competent design skills in selection of interior finishes, layout of furniture, lighting, and decorative elements.
- Demonstrate understanding of ergonomics and the relationship between human behavior and the built environment.
- Demonstrate understanding of the history of art, architecture, interiors, and furnishings.
- Apply 2- and 3-dimensional design principles and elements in the development of the spatial envelope.
- Demonstrate programming skills, including identifying the problem, client and user needs, and gathering and analyzing information.
- Demonstrate competence in manual and computer-aided graphic presentation of interior design projects.
- Express ideas clearly in oral presentations and critiques, and communicate clearly in writing concept statements, reports, and research.
- Understand that design solutions affect and are impacted by construction systems.

**DIRECT ENTRY INTO BACCALAUREATE DEGREE PROGRAMS**

Alfred State interior design graduates may enter directly into the technology management BBA or the interdisciplinary studies BTech degree program.

**ENTRANCE REQUIREMENTS/RECOMMENDATIONS**

Required: Algebra, Geometry

Recommended: Algebra 2

Entry level of student into math and composition/literature sequences is a function of student’s high school preparation and mathematics and English placement examinations.

Minimum of “C” is required for ARCH 1184, ARCH 2394, DSGN 2204, and DSGN 2304.

**GRADUATION REQUIREMENTS**

A student must successfully complete all courses in the prescribed four-semester program and earn a minimum cumulative index of 2.0, which is equivalent to a “C” average.
This transfer program will prepare you to enter into baccalaureate programs in adolescent education at public and private colleges and universities. As a graduate, you will have satisfied all of SUNY’s general education knowledge requirements and will have completed two courses in a foreign language, one course in adolescent development, one in foundations of education, and at least four courses in one of six concentrations – history/social studies, biology, chemistry, English, math, or physics.

ADVANTAGES

- Students have the benefit of small classes taught by expert faculty who take an interest in each student’s success and are advised by faculty within their concentration area.
- The US Department of Labor expects employment for secondary school teachers to grow 8 percent through 2026.

PROGRAM STUDENT LEARNING OUTCOMES

- Apply critical thinking skills to the analysis of typical issues in education.
- Perform the basic operations of personal computer use and employ basic research techniques to locate, evaluate, and synthesize information from a variety of sources.
- Communicate effectively and appropriately in written and oral forms.
- Demonstrate competence of subject matter in the content area of specialization.
- Identify the basic concepts and theories in adolescent development.
- Identify basic pedagogical terms and theories.
- Demonstrate competence in all 10 general education knowledge areas defined by SUNY.

DIRECT ENTRY INTO BACCALAUREATE DEGREE PROGRAMS

Alfred State liberal arts and sciences: adolescent education (teacher education transfer) graduates may enter directly into either the interdisciplinary studies BTech or the technology management BBA degree program.

CONTINUING EDUCATION OPPORTUNITIES

Transfer requirements for students in adolescent education vary across public and private colleges and universities. Therefore, students should work closely with their faculty adviser to ensure that they meet the particular entrance requirements of their transfer college of choice. The minimum cumulative grade point average for admission as a transfer student in adolescent education to SUNY colleges and universities varies from 2.5 to 3.0, with some transfer colleges also setting minimum grade point averages in concentration courses and in courses in adolescent development and foundations of education.

EMPLOYMENT STATISTICS

Employment and continuing education rate of 100 percent – 20 percent are employed; 80 percent continued their education.

RELATED PROGRAMS

- Biological Science
- Interdisciplinary Studies
- Liberal Arts and Sciences: Humanities
- Liberal Arts and Sciences: Math and Science
- Liberal Arts and Sciences: Social Science

ENTRANCE REQUIREMENTS/RECOMMENDATIONS

- Biology and Chemistry concentrations: Algebra, Geometry, Algebra 2, Biology, Chemistry required
- History/Social Studies and English concentrations: Algebra required
- Math and Physics concentrations: Algebra, Geometry, Algebra 2, Biology, and Chemistry or Physics required

Students who believe they need a reasonable accommodation to participate in this program may contact Melanie Ryan in the Office of Accessibility Services. This office may be contacted by email at DisabilityServices@alfredstate.edu or by phone at 607-587-4506. Please keep in mind that some accommodations may take time to implement, so students seeking accommodations are encouraged to contact OAS as early as possible.

LIBERAL ARTS & SCIENCES: HUMANITIES

AA DEGREE – CODE #0201

Calista McBride, Department Chair and Program Coordinator
Email address: mcbrida@alfredstate.edu

If you’re planning on continuing your education at another four-year college or university, the liberal arts and sciences: humanities program might be for you. By careful selection of elective credits, you will be qualified to enter a baccalaureate program as a third-year student in a wide variety of fields. The program also serves an exploratory function if you have not decided on a field of study or a specific career.

ADVANTAGES

• The liberal arts and sciences: humanities program prepares students for life by stressing the importance of reading, writing, and thinking while developing in them an appreciation of the arts and the wisdom of great minds.

• Colleges, universities, and large corporations are increasingly emphasizing the importance of a liberal arts education upon which to build a career.

PROGRAM STUDENT LEARNING OUTCOMES

• Create written communication appropriate for audience and purpose and that meets standards of style, clarity, and grammatical correctness as described in the Writing Rubric.

• Create oral communication appropriate for audience and purpose and which meets standards of presentation as described in the Effective Speaking Rubric.

• Construct and recognize arguments in both written and oral formats that are free from logical defects, as described in the Critical Thinking Rubric.

• Use library, online, and other resources to locate and evaluate scholarly articles and other research materials.

• Create research-based prose in literature, history, philosophy, or the arts.

• Articulate the relevance of the humanities to the self and society.

• Complete eight of the 10 SUNY General Education requirements and meet the two infused competencies.

• Evaluate self and demonstrate sensitivity to others of different cultures or perceptions to work constructively in a pluralistic society

• Analyze and appraise moral and ethical dilemmas.

• Analyze and evaluate the obligations of knowledge to promote common good.

DIRECT ENTRY INTO BACCALAUREATE DEGREE PROGRAMS

Alfred State liberal arts and sciences: humanities graduates may enter directly into either the interdisciplinary studies BTech or the technology management BBA degree program.

EMPLOYMENT STATISTICS

Employment and continuing education rate of 100 percent – 100 percent continued their education.

RELATED PROGRAMS

Health Information Technology
Human Services
Individual Studies
Liberal Arts and Sciences: Math and Science
Liberal Arts and Sciences: Social Science
Nursing

ENTRANCE REQUIREMENTS/RECOMMENDATIONS

Required: Algebra

Recommended: Geometry, Biology

Students who believe they need a reasonable accommodation to participate in this program may contact Melanie Ryan in the Office of Accessibility Services. This office may be contacted by email at DisabilityServices@alfredstate.edu or by phone at 607-587-4506. Please keep in mind that some accommodations may take time to implement, so students seeking accommodations are encouraged to contact OAS as early as possible.

</tbody>
</table>

All students must pass COMP 1503 Freshman Composition with a "C" or better.

Humanities electives can be chosen from among the following course prefixes: COMP, FNAT, ITAL, JAPN, LITR, PHIL, RELG, SPAN, or SPCH.

Also required: writing portfolio and one unit of physical education.

GRADUATION REQUIREMENTS

Each student must successfully complete 61 credit hours (excluding HPE) with a minimum grade point average of 2.0.
The mathematics and science emphasis will provide you with a solid foundation in mathematics and/or science, perfect for transferring and entering into career programs that depend on those skills.

PROGRAM STUDENT LEARNING OUTCOMES

- Demonstrate competence in arithmetic, algebra, geometry, data analysis, and quantitative reasoning.
- Demonstrate methods scientists use to explore natural phenomena, including observation, hypothesis development, measurement and data collection, experimentation, evaluation of evidence, and employment of mathematical analysis.
- Employ proficient written and verbal communication skills.
- Students will identify, analyze, and evaluate arguments as they occur in their own and others' work and develop well-reasoned arguments.
- Students will perform the basic operations of personal computer use, understand and use basic research techniques and locate, evaluate, and synthesize information from a variety of sources.
- Students will successfully transfer to a bachelor's or terminal associate degree.

DIRECT ENTRY INTO BACCALAUREATE DEGREE PROGRAMS

Alfred State liberal arts and sciences: math and science graduates may enter directly into either the interdisciplinary studies BTech or the technology management BBA degree program.

CONTINUING EDUCATION OPPORTUNITIES

This program is designed in such a way that the student and adviser work together to match courses at Alfred State with first- and second-year courses at the desired transfer school so that the student may enter a baccalaureate program as a full third-year student. Some typical fields of study that graduates choose to enter are mathematics, statistics, math or science education, physical education, biology, chemistry, physics, physical therapy, athletic training, engineering, pre-med, pre-vet, dentistry, or pharmacy.

EMPLOYMENT STATISTICS

Employment and continuing education rate of 100 percent – 33 percent are employed; 67 percent continued their education.

RELATED PROGRAMS

- Biological Science
- Forensic Science Technology
- Individual Studies
- Liberal Arts and Sciences: Humanities
- Liberal Arts and Sciences: Social Science
- Pre-Environmental Science and Forestry

ENTRANCE REQUIREMENTS/RECOMMENDATIONS

Required: Algebra, Geometry, and Algebra 2; Biology; Chemistry or Physics

GRADUATION REQUIREMENTS

A minimum of 61 credit hours is required for graduation with a cumulative index of 2.0. Students must also have a cumulative index of at least 2.0 in mathematics and science sequence courses.
LIBERAL ARTS & SCIENCES: SOCIAL SCIENCE
AA DEGREE – CODE #0212
Jill Priest Amati, Department Chair and Program Coordinator
Email address: amatijp@alfredstate.edu
This transfer program emphasizes course work in the social and behavioral sciences and in the liberal arts. By careful selection of electives, you will be well placed to enter baccalaureate programs at the third-year level with all your general education requirements met.

ADVANTAGES
• Students have the benefit of small classes taught by expert faculty who take an interest in each student’s success, and are advised by faculty within their concentration area.
• Students interested in education, criminal justice, psychology, sociology, history, or political science may enroll in advanced courses at Alfred University through cross-registration at no extra cost.

PROGRAM STUDENT LEARNING OUTCOMES
• Apply critical thinking skills to the analysis of topical issues in the social sciences.
• Perform the basic operations of personal computer use, as well as employ basic research techniques to locate, evaluate, and synthesize information from a variety of sources.
• Communicate effectively and appropriately in oral and written forms.
• Discuss the social, psychological, and historical influences on human behavior.
• Identify the steps of the scientific method and discuss the research methods employed by social scientists.
• Recognize the effects of globalization.
• Identify the terminology related to theories of and research in the social sciences.

DIRECT ENTRY INTO BACCALAUREATE DEGREE PROGRAMS
Alfred State liberal arts and sciences: social science graduates may enter directly into either the interdisciplinary studies BTech or the technology management BBA degree program.

CONTINUING EDUCATION OPPORTUNITIES
Graduates are qualified to enter baccalaureate programs in a variety of academic disciplines such as psychology, sociology, anthropology, history, and political science, as well as professional fields such as early childhood/childhood education, adolescent education, criminal justice, pre-law, human services management, and business administration. Among the colleges to which recent graduates have successfully transferred are Alfred University, University of Buffalo, Cornell University, SUNY Cortland, SUNY Fredonia, SUNY Geneseo, and St. Bonaventure University.

EMPLOYMENT STATISTICS
Employment and continuing education rate of 100 percent – 100 percent continued their education.

GRADUATION REQUIREMENTS
• Good academic standing (2.0 cumulative GPA) or higher
• Successful completion of all courses in the prescribed four-semester plan
• Submission of the college’s degree application form
MACHINE TOOL TECHNOLOGY

AOS DEGREE – CODE 80551

Bradley Thompson, Department Chair
Email address: thompbs@alfredstate.edu

Did you know the average salary for a machinist in industry today is ranked the seventh highest among all American professions (including doctors, lawyers, etc.), and this average salary is higher than the average salary for all four-year college graduates?

If earning a high salary is on your list for selecting occupational opportunities, you need to look at machine tool technology. More than 50 percent of all machinists in America today will retire in the next 10 to 15 years. This fact alone shows the tremendous opportunity that awaits the trained and well-qualified machinist.

The machine tool technology program features instruction in the safe operation of all basic machine tools, such as lathes, milling machines, drill presses, various saws, and grinding equipment, as well as proper measurement and inspection of parts. Interpreting engineering drawings and mathematical calculations required by all machinists is also presented.

The second year includes shop math and CNC (Computer Numerical Controls) programming with an emphasis on hands-on skills using advanced machine tools. A strong emphasis on shop safety is an integral part of the program. The AOS degree program includes operation of CNC lathes (turning centers), and CNC milling machines (machining centers). This set-up, as well as operation of the machines. Interpreting engineering drawings and control documents will also be emphasized. The understanding of quality control and how to conduct appropriate measurements and inspection will be integrated into the course work. The intent is to graduate someone with overall advanced machine shop skills.

PROGRAM STUDENT LEARNING OUTCOMES
- Demonstrate and apply safe operation of all machine tools.
- Student will be proficient in basic lathe operation.
- Student will be proficient in basic milling operation.
- Demonstrate mathematical operations using accepted mathematical applications.
- Demonstrate ability to perform advanced procedures on assigned projects.
- Student will be proficient in writing CNC programs for lathe.
- Student will be proficient in writing CNC programs for milling machine.
- Student will be proficient and apply GDT to all projects.
- Student will demonstrate ability to operate CNC equipment.
- Student will demonstrate all knowledge in capstone project.

DIRECT ENTRY INTO BACCALAUREATE DEGREE PROGRAM

Alfred State machine tool technology graduates may enter directly into the technology management BBA degree program. Graduates who have credit for freshman composition, statistics, literature, history, and speech may complete the BBA program in two additional years; others may complete the BBA program in two-and-one-half years.

OCCUPATIONAL OPPORTUNITIES
- CNC programmers, machinists, and engineers
- Tool and die makers
- Machine setters and operators
- Machinists
- Mold makers

EMPLOYMENT STATISTICS

Employment and continuing education rate of 100 percent – 70 percent are employed; 30 percent continued their education.

RELATED PROGRAMS

Welding Technology

REQUIRED TOOLS/EQUIPMENT

A list of required tools, equipment, PPE, etc. for all of the programs mentioned above can be found at http://www.alfredstate.edu/admissions/accepted-students/required-tools-supplies.

ENTRANCE REQUIREMENTS/RECOMMENDATIONS

Recommended: Algebra

TECHNICAL STANDARDS

Applicants for the machine tool technology program must meet the following physical requirements:
- Must be able to perform safely in the shop.
- Must be able to lift 50 pounds up to eye level.
- Must be able to communicate orally with a person 6 to 10 feet away in a shop environment.
- Must be able to visually decipher an oscilloscope monitor and digital/analog meter, and scan tool displays.
- Must be able to diagnose mechanical failures that are distinguished audibly.
- Must be able to understand and retain information found in service repair manuals and use diagnostic flow charts.
- Must be able to stand for long periods of time.
- Good eyesight is recommended.
- Students who believe they need a reasonable accommodation to participate in this program may contact Melanie Ryan in the Office of Accessibility Services. This office may be contacted by email at DisabilityServices@alfredstate.edu or by phone at 607-587-4506. Please keep in mind that some accommodations may take time to implement, so students seeking accommodations are encouraged to contact OAS as early as possible.

GRADUATION REQUIREMENTS

A student must successfully complete all courses in the prescribed four-semester program and earn a minimum cumulative index of 2.0, which is equivalent to a “C” average. Students are required to have earned a minimum grade of “C” in MACH CALC. I & II, and in the MATT 4003 senior project. (Articulation is available in MACH, CALC. area.)
The American Marketing Association defines marketing as “the process of planning and executing the conception, promotion, and distribution of ideas, goods, and services to create exchanges that satisfy individual and organizational objectives.” Marketing is a fast-moving, diverse field that includes the numerous business activities required to satisfy the needs of both the consumer and the industrial buyer. Our program will help you develop a strong background in communication, management, accounting, advertising, consumer behavior, industrial marketing, and salesmanship. And the degree’s liberal arts foundation will provide you with a solid basis for the human relations elements in the study of marketing.

A laptop computer is recommended, but not required, for students entering the marketing program. The college will provide a list of appropriate laptops to all students who have been accepted to attend Alfred State.

**ADVANTAGES**

Students gain a thorough understanding of many areas, including the design and implementation of a sales presentation, consumer-buying behavior, the use of technology in marketing communications, and much more.

**PROGRAM STUDENT LEARNING OUTCOMES**

- Recognize the primary theories within the principle functional areas of business.
- Demonstrate professional business communication.
- Illustrate critical thinking and effective decision-making within the principle functional areas of marketing.
- Identify ethical issues within marketing.

**DIRECT ENTRY INTO BACCALAUREATE DEGREE PROGRAMS**

Alfred State marketing graduates may enter directly into the business administration BBA, the interdisciplinary studies BTech, or the technology management BBA degree program at Alfred State.

**CONTINUING EDUCATION OPPORTUNITIES**

Students may transfer directly into one of our own BBA degree programs or to another college. Although not limited to these schools, common transfer institutions include Alfred University, St. Bonaventure University, Rochester Institute of Technology, St. John Fisher College, SUNY at Albany, University at Buffalo, SUNY College at Brockport, SUNY College at Fredonia, SUNY College at Geneseo, SUNY College at Oneonta, SUNY College at Oswego, SUNY at Binghamton, Canisius College, Niagara University, and Hilbert College.

**OCCUPATIONAL OPPORTUNITIES**

- Consumer and industrial sales
- Service institutions
- Banks
- Advertising agencies
- Financial and credit agencies
- Insurance companies
- Recreational businesses
- Tourist bureaus
- Transportation systems

**EMPLOYMENT STATISTICS**

Employment and continuing education rate of 100 percent – 100 percent continued their education.

**RELATED PROGRAMS**

- Accounting
- Business Administration (AS)
- Business Administration (BBA)
- Financial Planning
- Technology Management

**ENTRANCE REQUIREMENTS/RECOMMENDATIONS**

Required: Algebra
MASONRY

AOS DEGREE – CODE #0401

R. Jack Jones, Department Chair
Email address: jonesrj@alfredstate.edu

Stephen Richard, Program Coordinator
Email address: richarsb@alfredstate.edu

Each year, more and more students and employers have asked for additional instruction and skills-based training in masonry beyond what is provided by the building construction program. Our masonry program was designed with these desires in mind. It will provide you with extensive instruction after completing the common first-year building construction curricula.

PROGRAM STUDENT LEARNING OUTCOMES

- Estimate, layout, and build various masonry and concrete flatwork systems and explain how to supervise people.
- Properly choose and implement personal and job site safety and access equipment.
- Read and interpret construction drawings and specifications.
- Communicate construction details and estimates with written documents and scale shop drawings.
- Lay out, prepare, and install various concrete flatwork, block work, stone work, and brick work.
- Use the computer to access trade-related specifications.
- Perform computer-based research and communication.
- Demonstrate effective oral communication.

DIRECT ENTRY INTO BACCALAUREATE DEGREE PROGRAM

Alfred State masonry graduates may enter directly into the construction supervision BTech or technology management BBA degree program. Graduates who have credit for freshman composition, statistics, literature, history, and speech may complete the baccalaureate program in two additional years; others may complete the BBA program in two-and-one-half years.

OCCUPATIONAL OPPORTUNITIES

- Brick or stone salesman
- Kiln mason
- Construction foreman
- Estimator
- Salesperson
- Private or commercial remodeler
- Maintenance supervisor
- Construction superintendent
- Concrete foreman
- Expediter
- Contractor
- Mason

EMPLOYMENT STATISTICS

No data available.

RELATED PROGRAMS

Heating, Ventilation, and Air Conditioning
Building Trades; Building Construction
Electrical Construction and Maintenance Electrician

REQUIRED TOOLS/EQUIPMENT

A list of required tools, equipment, PPE, etc. for all of the programs mentioned above can be found at http://www.alfredstate.edu/admissions/accepted-students/required-tools-supplies.

ENTRANCE REQUIREMENTS/RECOMMENDATIONS

Recommended: Algebra and Geometry

TECHNICAL STANDARDS

Applicants in the masonry program must be able to meet the following physical requirements:

- Must be able to lift 50 pounds to shoulder height.
- Must be able to perform safely in the laboratory.

- Must be able to effectively communicate with a person 20 feet away.
- Must be able to climb a ladder and/or able to climb, unaided, onto and off equipment using three points of contact.
- Must be able to safely respond to a backup warning alarm.

Students who believe they need a reasonable accommodation to participate in this program may contact Melanie Ryan in the Office of Accessibility Services (OAS). This office may be contacted by email at DisabilityServices@alfredstate.edu or by phone at 607-587-4506. Please keep in mind that some accommodations may take time to implement, so students seeking accommodations are encouraged to contact OAS as early as possible.

GRADUATION REQUIREMENTS

A student must successfully complete all courses in the prescribed four-semester program and earn a minimum cumulative index of 2.0, which is equivalent to a “C” average.
MECHANICAL ENGINEERING TECHNOLOGY

AAS DEGREE - CODE #0493

BS DEGREE - CODE #0235

Aric Bryant, AAS Program Coordinator
Email address: bryantam@alfredstate.edu

Dr. Reza Rashidi, BS Program Coordinator
Email address: rashidr@alfredstate.edu

Dr. Matt Lawrence, Department Chair and BS Program Co-Coordinator
Email address: lawrenmj@alfredstate.edu

As a mechanical engineering technology program graduate, you will be well prepared to be a mechanical technologist or technician for industry in engineering-related areas, including automotive component design; heating, ventilation, and air conditioning (HVAC); process and component design; mechanical systems design; energy systems; product development; and technical support and sales. You will be able to design, specify, test, analyze, and install mechanical systems. This broad content exposure occurs through the development of analytical skills and theory in the classroom and experience working with engines, complete energy systems, compressors, fans, pumps, controls, instrumentation, engineering graphics, and material testing.

A laptop computer is required for students entering the mechanical engineering technology programs. Laptop specifications are available at www.alfredstate.edu/required-laptops.

ADVANTAGES

- Both the AAS and BS mechanical engineering technology programs are accredited by the Engineering Technology Accreditation Commission of ABET, http://www.abet.org.
- The Bachelor of Science in mechanical engineering technology is recognized as a "professional degree" that qualifies for experience/education credit toward Professional Engineering (PE) licensure.

PROGRAM STUDENT LEARNING OUTCOMES (PSLOS) - AAS DEGREE

- An ability to apply the knowledge, techniques, skills, and modern tools of mathematics, science, engineering, and technology to solve well-defined engineering problems appropriate to the discipline.
- An ability to design solutions for well-defined technical problems and assist with the engineering design of systems, components, or processes appropriate to the discipline;
- An ability to apply written, oral, and graphical communication in well-defined technical and non-technical environments; and an ability to identify and use appropriate technical literature;
- An ability to conduct standard tests and measurements, and experiments and to analyze and interpret the results; and
- An ability to function effectively as a member of a technical team.

PROGRAM STUDENT LEARNING OUTCOMES (PSLOS) - BS DEGREE

- An ability to apply the knowledge, techniques, skills, and modern tools of mathematics, science, engineering, and technology to solve well-defined engineering problems appropriate to the discipline;
- An ability to apply knowledge, techniques, skills and modern tools of mathematics, science, engineering, and technology to solve broadly-defined engineering problems appropriate to the discipline;
- An ability to design solutions for well-defined technical problems and assist with the engineering design of systems, components, or processes appropriate to the discipline;
- An ability to design systems, components, or processes meeting specified needs for broadly-defined engineering problems appropriate to the discipline;
- An ability to apply written, oral, and graphical communication in well-defined technical and non-technical environments; and an ability to identify and use appropriate technical literature;
- An ability to apply written, oral, and graphical communication in broadly-defined technical and non-technical environments; and an ability to identify and use appropriate technical literature;
- An ability to conduct standard tests and measurements, and experiments and to analyze and interpret the results;
- An ability to conduct standard tests, measurements, and experiments and to analyze and interpret the results to improve processes;
- An ability to function effectively as a member of a technical team; and
- An ability to function effectively as a member as well as a leader on technical teams.

DIRECT ENTRY INTO BACCALAUREATE DEGREE PROGRAMS

Alfred State mechanical engineering technology AAS graduates may enter directly into the construction supervision BTech, the interdisciplinary studies BTech, the mechanical engineering technology BS, or the technology management BBA degree program.

CONTINUING EDUCATION OPPORTUNITIES

A cooperative/transfer program involving one year of appropriate study in either mechanical engineering technology or engineering science at selected regional community colleges, together with a second year of study at Alfred State, will result in the awarding of the AAS degree to qualified graduates.

Graduates from the associate-level mechanical engineering technology program are eligible to continue their education by enrolling in a baccalaureate degree program in mechanical or related engineering technology at Alfred State or elsewhere. Our mechanical engineering technology AAS two-year degree program is the same as the first two years of the mechanical engineering technology BS four-year degree program.

OCCUPATIONAL OPPORTUNITIES

- Automotive industry
- HVAC & R industry
- Development/design
- Field service
- Installation supervision
- Aerospace industry
- Utility companies
- Sales and applications
- Manufacturing
- Petroleum industry
- Engineering aide
- Test technicians
- Process equipment
- MEMS and Microfabrication

EMPLOYMENT STATISTICS

Employment and continuing education rate of 100 percent:

Mechanical engineering technology (AAS degree): 100 percent – 17 percent are employed; 83 percent continued their education.

Mechanical engineering technology (BS degree): 100 percent – 77 percent are employed; 23 percent continued their education.

RELATED PROGRAMS

- Mechatronics Technology
- Motorcycle and Power Sports Technology

CERTIFICATION OR LICENSURE

The Bachelor of Science in mechanical engineering technology is recognized as a "professional degree" that qualifies for experience/education credit toward Professional Engineering (PE) licensure. Graduates from Alfred State’s program are allowed six years of the required 12 years of education/experience credit and are eligible to take the Fundamentals of Engineering (FE), formerly called Engineer-in-Training (EIT), examination upon graduation.

Be advised that a prior felony conviction may impede a student's ability to receive licensure.
ENTRANCE REQUIREMENTS/RECOMMENDATIONS (AAS)
Required: Algebra, Geometry, Algebra 2
Recommended: Physics

ENTRANCE REQUIREMENTS/RECOMMENDATIONS (BS)
Required: Algebra, Geometry, Algebra 2
Recommended: Physics

Courses that repeat or significantly overlap those taken in the student’s associate degree program cannot be taken for upper-level credit. If the associate degree covered the subject matter in one of the required baccalaureate courses, a different course must be substituted and approved by the faculty adviser.

MECHATRONICS TECHNOLOGY

AAS DEGREE – CODE #2729

BS DEGREE - CODE #2882

Timothy Cochran, Program Coordinator (AAS and BS)
Email address: cochratj@alfredstate.edu

Mechatronics interweaves electrical, mechanical, and computer engineering technology with applications in automated industrial processes and robotics. Mechatronics professionals are the technicians and engineers who design and maintain automated equipment. Technicians and engineers conduct their work in laboratories, offices or on-site at manufacturing plants. These professionals work toward the same goal of producing safe and efficient automated equipment. While technicians primarily maintain machinery, engineers are more concerned with the design and development of components and products. A mechatronics technology graduate will design, adapt, and troubleshoot electro-mechanical systems that are controlled by programmable digital devices.

A laptop computer is required for students entering the mechatronics technology program. Laptop specifications are available at www.alfredstate.edu/required-laptops. Some courses may require specialized tools and/or electronic components.

ADVANTAGES

• Combines strength in electrical and mechanical engineering technology.
• Broad background to fit many possibilities and small employers.
• Learn in laboratories outfitted with excellent electronic test equipment.
• Hands-on metal and circuit board fabrication facilities.
• Program different devices to perform electromechanical tasks.

DIRECT ENTRY INTO BACCALAUREATE DEGREE PROGRAM

Alfred State mechatronics technology AAS graduates may enter directly into the construction supervision BTech, the interdisciplinary studies BTech, the mechatronics technology BS, or technology management BBA degree program.

OCCUPATIONAL OPPORTUNITIES

• Robotics Testing Technician
• Mechatronics Technician
• Industrial Robotics Mechanic
• Programmable Logic Controller Assembler
• Electromechanical Technician

BS DEGREE GRADUATION REQUIREMENTS

- Completion of above courses
- 125 credit hours
- 52 upper-division credit hours
- 60 credit hours of liberal arts and sciences
- 2.0 grade point average in major courses
- 2.0 cumulative grade point average
- Approval of department faculty
- Seven of 10 General Education areas
MOTORCYCLE AND POWER SPORTS TECHNOLOGY

AOS DEGREE - CODE #2590

Ed Abdo, Program Coordinator
Email address: abdoej@alfredstate.edu

Motorcycle and power sports technology is a two-year AOS degree program that prepares students for careers as motorcycle / power sports / small engine technicians. This program incorporates a progressively challenging format and hands-on laboratories using full-size functioning vehicles. Training will include all aspects of motorcycle and small vehicle repair, including the diagnosis and repair of gasoline and diesel engines, transmissions, electrical/electronic systems, brake systems, steering systems, and suspension systems.

ADVANTAGES

- Provides a simulated real-world practice environment that will prepare the student for immediate entry-level employment as a technician after graduation.
- The diverse tools and equipment provided for hands-on practice will prepare the student for a variety of employment opportunities.
- Instructors are well trained, with many years of field experience.

PROGRAM STUDENT LEARNING OUTCOMES

Graduates of the program will be able to:

- Prepare a focused, coherent, and organized written report.
- Perform mathematical calculations required for entry-level employment.
- Demonstrate the ability to retain and apply written instructions and specifications relevant to their work environment.
- Demonstrate the ability to understand operation and diagnostic procedures of modern vehicle electrical and electronic systems.
- Demonstrate the ability to describe operation of, diagnose, and repair drive train systems.
- Demonstrate the ability to describe operation of, diagnose, and repair modern engines.
- Demonstrate the ability to describe operation of, diagnose, and repair steering, brakes, and suspension systems.

DIRECT ENTRY INTO BACCALAUREATE DEGREE PROGRAM

Graduates may enter directly into the technology management BBA degree program. Graduates who have credit for freshman composition, statistics, literature, history, and speech may complete the BBA program in two additional years; others may complete the BBA program in two-and-one-half years.

OCCUPATIONAL OPPORTUNITIES

- Motorcycle technician
- Marine vehicle technician
- Small engine/lawn and garden equipment technician
- Service manager
- Shop foreman

EMPLOYMENT STATISTICS

Employment and continuing education rate of 100 percent – 54 percent are employed; 46 percent are continuing their education.

RELATED PROGRAMS

- Autobody Repair
- Heavy Equipment, Truck and Diesel Technician
- Mechanical Engineering Technology
- Motorsports Technology
- Welding

REQUIRED TOOLS/EQUIPMENT

A list of required tools, equipment, PPE, etc. for all of the programs mentioned above can be found at http://www.alfredstate.edu/admissions/accepted-students/required-tools-supplies.

ENTRANCE REQUIREMENTS/RECOMMENDATIONS

Recommended: Algebra

TECHNICAL STANDARDS

Applicants in the motorcycle and power sports technology program must meet the following physical requirements:

- Must be able to lift 50 pounds to eye level.
- Must be able to effectively communicate with a person 6 to 10 feet away.
- Must be able to visually decipher small images on a monitor or digital display.
- Must be able to distinguish sounds associated with mechanical failures.
- Must be able to comprehend written information found in service repair manuals.
- Students who believe they need a reasonable accommodation to participate in this program may contact Melanie Ryan in the Office of Accessibility Services. This office may be contacted by email at DisabilityServices@alfredstate.edu or by phone at 607-587-4506. Please keep in mind that some accommodations may take time to implement, so students seeking accommodations are encouraged to contact OAS as early as possible.

CERTIFICATION OR LICENSURE

The New York State vehicle inspector exam is offered on campus.

MOTORCYCLE AND POWER SPORTS TECHNOLOGY - AOS DEGREE

GRADUATION REQUIREMENTS

A student must successfully complete all courses in the prescribed four-semester program and earn a minimum cumulative index of 2.0, which is equivalent to a "C" average.
TECHNICAL STANDARDS
Applicants in the motorsports technology program must meet the following physical requirements:

- Must be able to lift 50 pounds to eye level.
- Must be able to effectively communicate with a person 6 to 10 feet away.
- Must be able to visually decipher small images on a monitor or digital display.
- Must be able to distinguish sounds associated with mechanical failures.
- Must be able to comprehend written information found in service repair manuals.
- Must have a valid motor vehicle driver's license.
- Students who believe they need a reasonable accommodation to participate in this program may contact Melanie Ryan in the Office of Accessibility Services. This office may be contacted by email at DisabilityServices@alfredstate.edu or by phone at 607-587-4506. Please keep in mind that some accommodations may take time to implement, so students seeking accommodations are encouraged to contact OAS as early as possible.

CERTIFICATION OR LICENSURE
Students may take Automotive Service Excellence (ASE) certification exams.

GRADUATION REQUIREMENTS
A student must successfully complete all courses in the prescribed four-semester program and earn a minimum cumulative index of 2.0, which is equivalent to a “C” average.
ADVANTAGES

Any student wishing more information should contact the nursing program.

Clinical experience, an essential part of each nursing course, further enables students to gain technical competence to apply theoretical knowledge with practice. Clinical experiences are gained through a variety of health care facilities. There is no guarantee that the college will provide bus transportation to and from all clinical sites.

A laptop is required for the nursing program, as it will be needed for on-campus exams and other educational purposes. Microsoft Office is required; internet access is required. In addition, a handheld pocket-sized electronic device is required (i.e., smart phone) for downloading program software. The device must have the capability to turn off both phone and camera. Further system requirements will be sent via a newsletter in early June to newly admitted, transfer, and continuing students.

All sciences (anatomy and physiology I and II, microbiology) must be passed with a minimum of “C+” in order to progress through the nursing program. Students must earn a “C” in Nursing I (NURS 1108) and Nursing II (NURS 2208) and a “C+” in Nursing III (NURS 3310) and Nursing IV (NURS 4410) to progress in the nursing program. Competency in medication clinical computation is required and is tested as part of the Nursing II (NURS 2208) and Nursing III (NURS 3310) courses.

Note: BIOL 1404 Anatomy & Physiology I and BIOL 2504 Anatomy & Physiology II have to be completed with a "C+" and must be taken in the classroom with lab component at the same college. Microbiology must be taken in the classroom with lab component at the same college.

Specific policies related to progression in the nursing program and readmission to the nursing program are publicized to enrolled nursing students in the Nursing Student Handbook.

Nursing students are required to provide documentation of an annual two-step PPD and a self-report health assessment. Hepatitis B vaccine, flu vaccine, and other requirements may be specified by affiliating agencies.

Students may be placed in day, evening, and night clinical placement, weekend and weekday rotations, and may be responsible for their own transportation.

Any student wishing for more information should contact the nursing program.

PROGRAM STUDENT LEARNING OUTCOMES

- **Patient-centered care** – Acquires self-empowerment to provide holistic care to a diverse population while providing health education using learner-centered focused principles.
- **Teamwork and collaboration** – Demonstrates accountability and effective interpersonal relationships with clients and members of the health care team, and works collaboratively in professional practice.
- **Evidence-based practice** – Implements evidence-based practice to promote a caring environment that ensures client’s safety, comfort, dignity, and self-esteem consistent with his/her developmental stage in an effective and efficient manner.
- **Quality improvement** – Demonstrates responsibility for continued learning and further growth.
- **Safety** – Manages care for clients while evaluating own performance to improve professional practice, quality of care, and safety in a timely and cost-effective manner.
- **Informatics** – Applies technology and information management skills to retrieve data, communicate, support decision making, and submit information.

Reference: Quality and Safety Education for Nurses, 2019

DIRECT ENTRY INTO BACCALAUREATE DEGREE PROGRAM

Alfred State nursing graduates may enter directly into either the healthcare management BTech, the interdisciplinary studies BTech, the BS in Nursing, or the technology management BBA degree program.

FACILITIES

Facilities used for clinical experiences may include: Cuba Memorial Hospital, Elderwood, Guthrie Healthcare Hospital, Highland Hospital, Highland Park Rehabilitation & Nursing Center, Jones Memorial Hospital, Noyes Memorial Hospital, Clean General Hospital, Saint James Hospital, Unity Hospital, Wyoming County Community Hospital, Hornell Gardens, as well as other area facilities and community sites.

PROFESSIONAL OPPORTUNITIES

- Ambulatory settings
- Health insurance providers
- Hospitals
- Long-term care facilities
- Schools
- Clinics
- Home health care
- Industry
- Physician offices
- Visiting nurses’ agencies

EMPLOYMENT STATISTICS

Employment and continuing education rate of 100 percent – 29 percent are employed; 71 percent continued their education.

STUDENT ACHIEVEMENT DATA

The NCLEX-RN pass rate for the May 2018 graduates is 94.5 percent.

The NCLEX-RN pass rate for the May 2019 graduates is 83 percent (overall pass rate for the year is 81.5 percent due to one student taking the exam from a prior graduating class).

The NCLEX-RN pass rate of the May 2019 graduates after two attempts is 96.8 percent.

NCLEX-RN pass rate for New York State was 85.65 percent.

The completion rate for the fall 2016 entering cohort completing by spring 2019 was 74.7 percent.

RELATED PROGRAMS

- Biological Science
- Diagnostic Medical Sonography
- Health Information Technology
- Health Science
- Human Services
- Liberal Arts and Sciences: Humanities
- Diagnostic Medical Sonography
ENTRANCE REQUIREMENTS/RECOMMENDATIONS

- Required: Algebra, Biology, and Chemistry
- Recommended: 980 combined reading/writing and math SAT score or composite ACT score of 19
- Required: It is essential that students are able to fully participate, with or without a reasonable accommodation, in clinical care for clients as assigned. Nursing students should be able to:
  - Ambulate in a sufficient manner in order to appropriately and safely perform patient care.
  - Lift at least 35 pounds.
  - Function in a safe manner, not placing clients in jeopardy.
  - Maintain confidentiality in regard to professional practice.
  - Appropriately use standard medical equipment.
  - Interpret data from electronic devices in a health care setting for the purpose of client care.
  - Maintain professional composure at all times.
  - Communicate effectively orally and in writing.

Students who believe they need a reasonable accommodation to participate in clinical care may contact Melanie Ryan in the Office of Accessibility Services. This office may be contacted by email at DisabilityServices@alfredstate.edu or by phone at 607-587-4506. Please keep in mind that some accommodations may take time to implement, so students seeking accommodations are encouraged to contact OAS as early as possible.

ACCREDITATION

- Middle States Commission on Higher Education (www.msche.org); 3624 Market Street, 2nd Floor West, Philadelphia, PA 19104; phone: 267-284-5000.
- The program is accredited by the Accreditation Commission for Education in Nursing (ACEN) [3343 Peachtree Road, Suite 850, Atlanta, GA 30326] phone 404-975-5000, www.acenursing.org.
- The AAS nursing program is registered by the New York State Education Department.

LICENSURE

Graduates are eligible to apply for licensure in any state as well as sit for the NCLEX-RN. Completion of the nursing program does not assure licensure as a registered professional nurse. Graduates of this nursing program meet the education requirements for admittance to the NCLEX-RN licensure exam; however, there is a requirement that the applicant be of “good moral character” and a fee must be paid for the test and license. On the application for New York State licensure, the applicant is required to truthfully answer the following questions:

- Have you ever been found guilty after trial, or pleaded guilty, no contest, or nolo contendere to a crime (felony or misdemeanor) in any court?
- Are criminal charges pending against you in any court?
- Has any licensing or disciplinary authority refused to issue you a license or ever revoked, annulled, canceled, accepted surrender of, suspended, placed on probation, refused to renew a professional license or certificate held by you now or previously, or ever fined, censured, reprimanded, or otherwise disciplined you?
- Are charges pending against you in any jurisdiction for any sort of professional misconduct?
- Has any hospital or licensed facility or clinical laboratory restricted or terminated your professional training, employment or privileges or have you ever voluntarily or involuntarily resigned or withdrawn from such association to avoid imposition of such measures?
- If the answer to any of the questions is yes, the applicant must offer full explanation and establish his/her good moral character with the State Education Department, prior to earning a license.

BIOL 1404 Anatomy & Physiology I and BIOL 2504 Anatomy & Physiology II have to be completed with a "C+" and must be taken in the classroom with lab component at the same college.

CPR certification is required BEFORE taking Nursing I (NURS 1108) and must remain active throughout the nursing program.

RN TRANSFER PROGRAM

Alfred State students may transfer to most New York State baccalaureate programs consistent with NYS transfer agreement.

- 12 credits of natural science (anatomy & physiology I and II, microbiology)
- Nine credits of social science (general psychology, general sociology, human development)
- Six credits of English/humanities (freshman composition, literature)

GENERAL NOTES:

Min. of a "C" grade is required for Nursing I and II; min. of "C+" is required for Nursing III and IV.
**NURSING**

**BS IN NURSING DEGREE - CODE #0291**

KathyAnn Sager, Department Co-Chair and Program Coordinator  
Email address: sagerk@alfredstate.edu

The completion rate for the May 2019 graduates is 76 percent.

**STUDENT ACHIEVEMENT DATA**

The BS in Nursing program can be taken entirely online, allowing the student to progress at their own pace.

The program will serve as a solid academic foundation for advanced study in nursing at the graduate level. The BS in Nursing program is offered in an online format, providing flexibility and learning style choices for the adult student and working professional.

The graduate will be prepared to assume a leadership role in the health care delivery system using gained experience, research, and technology for evidence-based decision making. The baccalaureate graduate will be able to deliver, design, and coordinate care for a variety of individuals from diverse backgrounds to improve client outcomes.

The core foundation nursing courses are arranged to increase the student's knowledge base and skill level for the expanded role as a baccalaureate-prepared practitioner.

A professional capstone course (NURS 8013) is required as a culminating educational experience of the BS in Nursing program. To further advance the student's knowledge base and skill level, there are clinical components integrated within the program.

Meeting the needs of registered nurses seeking a bachelor's degree, the BS in Nursing program is offered primarily as an online format. This provides flexibility and learning style choices for the adult student and working professional.

A computer with internet access, webcam, and Microsoft Office is required for the nursing program. Written work must be submitted in Word and APA format.

Students are permitted to repeat an upper-level (5000 or higher) nursing core course one time only. If a student is unsuccessful in the same nursing course twice, they will be unable to progress in the nursing program.

Bachelor-level students are expected to write at a BS level proficiency, using APA format. Writing proficiency, grammar, spelling, and APA formatting are all essential elements of every nursing course. Failure to write at a BS level may result in failure of nursing course work.

It is strongly recommended that clinical site affiliations are submitted at least two months prior to taking the course to ensure a clinical site agreement is in place. Clinical components will be required in the following courses:

- NURS 6003 - Nursing Leadership and Management
- NURS 6413 - Health Assessment and Promotion Across the Lifespan
- NURS 7004 - Population Focused Care in the Community

**ADVANTAGES**

The BS in Nursing program can be taken entirely online, allowing the student to progress at their own pace.

**STUDENT ACHIEVEMENT DATA**

The completion rate for the May 2019 graduates is 76 percent.

**PROGRAM STUDENT LEARNING OUTCOMES**

- Synthesize theory and concepts from nursing, the liberal education domain, and other professions to expand knowledge.
- Create a plan to foster social justice through civic engagement.
- Apply principles of critical reflection, inquiry, and evidence-based practice to resolve nursing issues.
- Integrate leadership principles to design, manage, and coordinate care for individuals and populations in complex and changing health care delivery systems.
- Appraise issues related to health promotion and disease prevention to promote healthy life for individuals, families, groups, and populations across the life span, with attention to rural communities, maintenance, and end of life.
- Apply knowledge of informatics to foster inter- and intra-professional communication and collaboration in the delivery of safe, quality health care.
- Create a philosophy as a foundation for commitment to the profession, advancement, and lifelong learning.
- Use a variety of methods to communicate in written and oral form throughout the program.

**PROFESSIONAL OPPORTUNITIES**

Leadership, management, research, education, and practice opportunities exist in a variety of health care settings and institutions throughout New York State and the US.

**EMPLOYMENT STATISTICS**

Employment and continuing education rate of 100 percent – 100 percent are employed.

**ADMISSIONS REQUIREMENTS**

Admission to the BS in Nursing program requires graduation from an accredited or state-approved associate degree in nursing or certified diploma program in nursing, and plans to secure licensure as a registered professional nurse by completion of the first semester in the program. The minimum GPA requirement for admission is 2.00. The applicant's associate degree course work must include the following:

- A minimum of 30 credits of nursing
- A minimum of 24 hours of liberal arts and sciences credit
- A minimum of three of 10 SUNY General Education categories
- Eight credits of anatomy and physiology (taken at the same school in a classroom setting)
- A lab course in microbiology in the classroom
- Course work in communication, literature, psychology, and sociology

It is essential that students are able to fully participate, with or without a reasonable accommodation, in clinical caring for clients as assigned. Nursing students should be able to:

- Function in a safe manner, not placing clients in jeopardy
- Maintain confidentiality in regard to professional practice
- Appropriately use standard medical equipment
- Interpret data from electronic devices in health care setting for the purpose of client care
- Maintain professional composure at all times
- Communicate effectively, orally and in writing

Students who believe they need a reasonable accommodation to participate in clinical care may contact Melanie Ryan in the Office of Accessibility Services. This office may be contacted by email at DisabilityServices@alfredstate.edu or by phone at 607-587-4506. Please keep in mind that some accommodations may take time to implement, so students seeking accommodations are encouraged to contact OAS as early as possible.

Students must have an active, unencumbered state license to progress into the second semester of BSN courses.

**ACCREDITATION/CERTIFICATION**

- Middle States Commission on Higher Education (www.msche.org); 3624 Market Street, 2nd Floor West, Philadelphia, PA 19104; phone: 267-284-5000.
- The baccalaureate degree program in nursing at The State University of New York College of Technology at Alfred is accredited by the Commission on Collegiate Nursing Education, 655 K Street, NW, Suite 750, Washington, DC 20001, 202-887-6791.
- The BS in Nursing program is registered by the NYS Education Department.

**ARTICULATION AGREEMENTS**

Articulation agreements are in progress between multiple regional community colleges and Alfred State for the BS in Nursing program.

Be advised that a prior felony conviction may impede a student’s ability to participate in a required professional practice experience.

*Course has a 45-hour clinical immersion experience.

## GRADUATION REQUIREMENTS

- 28 credits of upper-level nursing
- A minimum of 60 credits of liberal arts and sciences (inclusive of associate degree credits)
- A minimum of a "C" grade in all upper-level nursing courses
NURSING DUAL DEGREE PROGRAM

DUAL DEGREE PROGRAM - CODE #2373

Jess Lippa, Department Co-Chair and Program Coordinator
Email address: lippa@alfredstate.edu

The demand for nurses with bachelor's degrees has never been greater. According to the Health and Medicine Division's (HMD) Future of Nursing: Leading Change, at a minimum, 80 percent of nurses should have at least a bachelor's degree by 2020. In order to meet the recommended need, Alfred State now offers a dual degree.

The new dual degree nursing program is a model to meet the high demand for bachelor's degrees in nursing, while allowing the student to earn both an associate and baccalaureate degree over four years. The graduates of the associate program are eligible to sit for the NCLEX-RN exam at the end of the third year. The nursing program will prepare you to become a registered professional nurse - one of the fastest-growing professions in the country. Courses are sequential and progress from simple to more complex situations, with specialized content in obstetrics, psychiatrics, and pediatrics integrated into the program. Clinical experience, an essential part of each nursing course, further enables you to gain technical competence to apply theoretical knowledge with practice.

FACILITIES

Facilities used for clinical experiences may include: Cuba Memorial Hospital, Elderwood, Guthrie Corning Hospital, Highland Hospital, Highland Park Rehabilitation & Nursing Center, Jones Memorial Hospital, Noyes Memorial Hospital, Olean General Hospital, Unity Hospital, Hornell Gardens, as well as other area facilities and community sites. Students may be placed in day, evening, and night clinical placement, weekend and weekday rotations, and may be responsible for their own transportation.

The upper-division completion program will enhance your knowledge and skills foundation to function more autonomously and interdependently in diverse, complex, and dynamic health care environments. Moreover, the program will enhance your potential to expand your responsibilities in practice to become a leader, coordinator, and manager of care. Lastly, the program will serve as a solid academic foundation for advanced study in nursing at the graduate level. Some of the BSN core nursing courses will begin to be offered in both an on-campus setting (for residential students), while online opportunities will be available for students not living on or near campus, providing flexibility and learning style choices for the adult student and working professional.

Clinical components will be required in the following courses:

- NURS 8003 - Nursing Leadership and Management
- NURS 8413 - Health Assessment and Promotion Across the Lifespan
- NURS 7004 - Population Focused Care in the Community

It is strongly recommended that clinical site affiliations are submitted at least two months prior to taking the course to ensure that a clinical site agreement is in place.

As a graduate of this program, you will be prepared to assume a leadership role in the health care delivery system using gained experience, research, and technology for evidence-based decision making. You will be equipped to deliver, lead, and coordinate care for a variety of individuals from diverse backgrounds to improve client outcomes.

ADVANTAGES

Both the AAS and BS in Nursing programs are registered by NYS Education Department. Graduates of the AAS degree are eligible to apply for licensure as a registered professional nurse (NCLEX-RN) in any state.

Articulation agreements are in progress between multiple regional community colleges and Alfred State for the BSN program.

PROGRAM STUDENT LEARNING OUTCOMES - AAS

- Patient-centered care – Acquires self-empowerment to provide holistic care to a diverse population while providing health education using learner-centered focused principles.
- Teamwork and collaboration – Demonstrates accountability and effective interpersonal relationships with clients and members of the health care team, and works collaboratively in professional practice.

- Evidence-based practice – Implements evidence-based practice to promote a caring environment that ensures client’s safety, comfort, dignity, and self-esteem consistent with his/her developmental stage in an effective and efficient manner.
- Quality improvement – Demonstrates responsibility for continued learning and further growth.
- Safety – Manages care for clients while evaluating own performance to improve professional practice, quality of care, and safety in a timely and cost-effective manner.
- Informatics – Applies technology and information management skills to retrieve data, communicate, support decision making, and submit information.

Reference: Quality and Safety Education for Nurses, 2019

PROGRAM STUDENT LEARNING OUTCOMES - BS IN NURSING

- Synthesize theory and concepts from nursing, the liberal education domain, and other professions to expand knowledge.
- Create a plan to foster social justice through civic engagement.
- Apply principles of critical reflection, inquiry, and evidence-based practice to resolve nursing issues.
- Integrate leadership principles to design, manage, and coordinate care for individuals and populations in complex and changing health care delivery systems.
- Appraise issues related to health promotion and disease prevention to promote healthy life for individuals, families, groups, and populations across the lifespan, with attention to rural communities.
- Apply knowledge of informatics to foster inter- and intra-professional communication and collaboration in the delivery of safe, quality health care.
- Create a philosophy as a foundation for commitment to the profession, advancement, and lifelong learning.
- Use a variety of methods to communicate in written and oral form throughout the program.

PROFESSIONAL OPPORTUNITIES

- Hospitals
- Clinics
- Long-term care facilities
- Physician offices
- Industry
- Ambulatory settings
- Visiting nurses’ agencies
- Schools
- Home health care
- Health insurance providers
- Leadership, management, research, education, and practice opportunities exist in a variety of health care settings and institutions throughout New York State and the US.

STUDENT ACHIEVEMENT DATA

The NCLEX pass rate for the May 2018 graduates was 94.5 percent.

The NCLEX-RN pass rate for the May 2019 graduates was 83 percent (overall pass rate for the year is 81.5 percent due to one student taking the exam from a prior graduating class).

The NCLEX-RN pass rate for the May 2019 graduates after two attempts is 96.8 percent.

NCLEX-RN pass rate for New York State was 85.65 percent.

The dual degree program was officially registered with the NYS Department of Education as of the fall 2016 semester.

EMPLOYMENT STATISTICS

Employment and continuing education rate of 100 percent – 94 percent are employed; 6 percent continued their education.

RELATED PROGRAMS

Biological Science
Diagnostic Medical Sonography
Health Information Technology
Health Sciences
Human Services
Liberal Arts and Sciences: Humanities
Radiologic Technology

ENTRANCE REQUIREMENTS

Required: Algebra, Biology, Chemistry

Required: It is essential that students are able to fully participate, with or without a reasonable accommodation, in clinical caring for clients as assigned.

Nursing students should be able to:

• Ambulate in a sufficient manner in order to appropriately and safely perform patient care.
• Lift at least 35 pounds.
• Function in a safe manner, not placing clients in jeopardy.
• Maintain confidentiality in regard to professional practice.
• Appropriately use standard medical equipment.
• Interpret data from electronic devices in a health care setting for the purpose of client care.
• Maintain professional composure at all times.
• Communicate effectively orally and in writing.

Students who believe they need a reasonable accommodation to participate in clinical care may contact Melanie Ryan in the Office of Accessibility Services.

A computer with internet access, webcam, and Microsoft Office is required for the nursing program. Written work must be submitted in Word format.

Students are permitted to repeat an upper-level (5000 or higher) nursing core course one time only. If a student is unsuccessful in the same nursing course twice, they will be unable to progress in the nursing program.

Bachelor-level students are expected to write at a BS level proficiency, using APA format. Writing proficiency, grammar, spelling, and APA formatting are all essential elements of every nursing course. Failure to write at a BS level may result in failure of nursing course work.

LICENSURE

Upon completion of the AAS degree portion of the dual degree program, graduates are eligible to apply for licensure as a registered professional nurse (NCLEX-RN) in any state. Completion of the AAS nursing program does not assure licensure as a registered professional nurse. Graduates of this portion of the dual degree nursing program meet the education requirements for admittance to the RN licensure exam; however, there is a requirement that the applicant be of “good moral character” and a fee must be paid for the test and license. On the application for New York State licensure, the applicant is required to truthfully answer the following questions:

• Have you ever been found guilty after trial, or pleaded guilty, no contest, or nolo contendere to a crime (felony or misdemeanor) in any court?
• Are criminal charges pending against you in any court?
• Has any licensing or disciplinary authority refused to issue you a license or ever revoked, annulled, canceled, accepted surrender of, suspended, placed on probation, refused to renew a professional license or certificate held by you now or previously, or ever fined, censured, reprimanded, or otherwise disciplined you?
• Are charges pending against you in any jurisdiction for any sort of professional misconduct?
• Has any hospital or licensed facility restricted or terminated your professional training, employment of privileges, or have you ever voluntarily or involuntarily resigned or withdrawn from such association to avoid imposition of such measures?

If the answer to any of the questions is yes, the applicant must offer full explanation and establish their good moral character with the State Education Department, prior to earning a license.

Be advised that a prior felony conviction may impede a student’s ability to participate in a required professional practice experience.

ACCREDITATION/CERTIFICATION

• The nursing programs at The State University of New York, College of Technology at Alfred are accredited by the Middle States Commission on Higher Education [3624 Market Street, 2nd Floor West, Philadelphia, PA 19104; 267-284-5000].
• The AAS nursing program is accredited by the Accreditation Commission for Education in Nursing (ACEN), formerly the National League for Nursing Accreditation Commission (NLNAC) [3343 Peachtree Road, Suite 850, Atlanta, GA 30326]; phone 404-975-5000, www.acenursing.org
• The baccalaureate degree program in nursing at The State University of New York College of Technology at Alfred is accredited by the Commission on Collegiate Nursing Education, 655 K Street NW, Suite 750, Washington, DC 20001, 202-887-6791.
• Both the AAS and BS in Nursing programs are registered by the NYS Education Department. Graduates of the AAS degree are eligible to apply for licensure as a registered professional nurse (RN-NCLEX) in any state.

**GRADUATION REQUIREMENTS**

**AAS**

- 36 credits of nursing (nursing I, II, III, IV)
- 12 credits of natural science (anatomy & physiology I and II, microbiology)
- Nine credits of social science (general psychology, general sociology, human development)
- Six credits of English/humanities (freshman composition, literature)

**BS - Total dual degree credits**

- 64 credits of nursing
- 60 gen ed/liberal arts and sciences credits
Environmental science and forestry is a diverse field requiring professionals of many specialties. That's why we've designed this program to prepare you to enter into several areas—from environmental science to paper science engineering to forestry and natural resource conservation.

ADVANTAGES

• This program prepares graduates for the Bachelor of Science degree program in environmental science and/or the associate degree in forestry and natural resource conservation from the SUNY College of Environmental Science and Forestry (ESF).

• After the first two years of study at Alfred State, transfers to ESF may apply to a variety of programs. These include: the biological sciences (botany and forestry pathology, entomology, zoology, wildlife biology, and pest management); chemistry (natural and synthetic polymers, biochemistry, and natural products, environmental); forest engineering; paper science engineering; wood products engineering; and forestry (resource management, forest resource science, management science, environmental education and communications, urban forestry, world forestry, and applied resource management). The program in landscape architecture leads to a baccalaureate degree after one additional year, a Bachelor of Landscape Architecture degree (BLA).

• A student taking the pre-ESF 1+1 ranger option, forest technology, natural resources conservation, or land surveying, completes one year of required liberal arts and sciences courses at Alfred State, and then spends the second year at the Wanakena Campus of ESF. Successful completion of this program leads to an AAS degree in forest technology.

PROGRAM STUDENT LEARNING OUTCOMES

• MATHEMATICS: Demonstrate competence in arithmetic, algebra, geometry, data analysis, and quantitative reasoning.

• NATURAL SCIENCES: Demonstrate understanding of the methods scientists use to explore natural phenomena, including observation, hypothesis development, measurement and data collection, experimentation, evaluation of evidence, and employment of mathematical analysis.

• COMMUNICATION & INFORMATION: Employ proficient written and verbal communication skills, including the appropriate uses of technology.

• REASONING: Identify, analyze, and evaluate arguments as they occur in their own and others' work, and develop well-reasoned arguments.

• INFORMATION MANAGEMENT: Perform the basic operations of personal computer use; understand and use basic research techniques; and locate, evaluate, and synthesize information from a variety of sources.

• TRANSFERABILITY: Students will successfully transfer to a bachelor's or associate degree.

DIRECT ENTRY INTO BACCALAUREATE DEGREE PROGRAM

Alfred State pre-environmental science and forestry graduates may enter directly into the interdisciplinary studies BTech or technology management BBA degree program.

CONTINUING EDUCATION OPPORTUNITIES

Students in this program spend two years at Alfred State, and then generally transfer to the SUNY College of Environmental Science and Forestry (ESF) at Syracuse. Those students who complete, with a "C" or better, the lower-division sequences prescribed by ESF, gain admission to ESF 1 with full junior status. An articulation agreement is available with SUNY ESF at Syracuse.

EMPLOYMENT STATISTICS

No data available.

Agricultural Technology
Biological Science
RADIOLOGIC TECHNOLOGY
AAS DEGREE - CODE #0628
Jenna Zetwick, Program Director
Email address: zetwick@alfredstate.edu

Radiologic technology is a two-year AAS degree program preparing qualified students to become health care professionals who administer ionizing radiation to produce photographic and digital anatomical images for diagnostic, therapeutic, and research applications. The program coordinates on-campus didactic and laboratory classes and clinical experiences at area hospitals to which students are responsible for their own transportation. Students must be able to demonstrate technical standards and pass clinical competencies as described by the American Registry of Radiologic Technologists (ARRT) and the Joint Review Committee on Education in Radiologic Technology (JRCERT), recognized by the United States Department of Education as the national accreditation agency of programs for radiographers. Upon graduation, students are prepared to take the American Registry Certification Exam administered by ARRT and be granted New York State licensure through the New York State Department of Health.

Clinical education is assigned to provide experiences consistent with the student’s level of achievement in different hospital environments. Through clinical assignments, students have opportunities to work with the most modern and specialized equipment available and knowledgeable staff with a wealth of experience in imaging. Clinical education assignments include eight clinical hours per week during the second semester of study and 24 clinical hours per week the third and fourth semesters. In addition, a 12-week (40 hours per week) summer session is required and provides valuable experience in developing clinical competency skills. Clinical placements are in hospitals near Alfred State, so students completing the summer session will require housing close enough to their clinical placements to travel there on a daily basis. For those who need it, summer housing is available at Alfred State; contact the Office of Residential Services for details.

The program currently admits 20 students each year, with a fall semester start date only. One student placement is reserved for an on-campus curriculum change, with the remaining 19 placements being filled by Admissions.

ADVANTAGES
• Preparés the student for the American Registry of Radiologic Technologists’ certification examination and New York State licensure.
• Energized laboratory on campus.
• Low student-to-faculty ratio.
• Major emphasis in the required courses is gaining proficiency in the technical skills necessary for radiologic technology.
• Extensive clinical experience in area hospitals.

PROGRAM STUDENT LEARNING OUTCOMES
• Demonstrate appropriate technical and affective skills in the clinical setting.
• Apply appropriate radiation protection techniques.
• Demonstrate patient-centered, age-specific skills.
• Analyze images to determine diagnostic quality.
• Demonstrate proper work ethics.
• Examine the value of leadership, professional development, and growth.
• Demonstrate critical thinking and problem-solving skills in both the didactic and clinical setting.
• Apply written communication skills to the construction of documents of record that are established professional guidelines.
• Apply oral communication skills to the explanation of ideas and scientific terminology.
• Using technological resources effectively and appropriately, synthesize theory and concepts from the liberal education domain and other professions into radiologic technology.
• Explain cultural diversity and evaluate the role of cultural competency, values, and ethics in the patient care setting.

MISSION STATEMENT
The radiologic technology program embraces the mission and vision statements of Alfred State. It enables students to become competent, efficient, and caring radiographers. The program also has the primary responsibility to ensure that the student has acquired the positive characteristics of dedication to duty, quality care, teamwork, and high ethical standards as they relate to the patient, their families, physicians, and other health care providers. The program embraces the mission and core values of Alfred State in its education of students enrolled in the program.

PROGRAM GOALS
• To develop competent practitioners capable of functioning in the highly technical and dynamic field of radiologic technology.
• To develop competent practitioners who demonstrate proficiency in communication skills.
• To develop competent practitioners who demonstrate proficiency in critical thinking skills and problem-solving skills.
• To develop practitioners who model professionalism.

DIRECT ENTRY INTO BACCALAUREATE DEGREE PROGRAMS
Alfred State radiologic technology graduates may enter directly into either the healthcare management BTech, the interdisciplinary studies BTech, or the technology management BBA degree program.

ACCREDITATION/CERTIFICATION
The radiologic technology program at Alfred State is fully accredited by JRCERT, the Joint Review Committee on Education in Radiologic Technology. JRCERT is the only agency recognized by the US Department of Education for accreditation of educational programs in radiologic technology.

EMPLOYMENT STATISTICS
Employment and continuing education rate of 100 percent – 100 percent are employed.

ENTRANCE REQUIREMENTS/RECOMMENDATIONS
Applicants for the radiologic technology program must possess a recognized high school diploma or its equivalent. A standardized test (SAT or ACT) is not required but recommended. Specific high school course requirements and recommendations are:

Required: Algebra, Geometry, Algebra 2, Biology
Recommended: Chemistry and Physics

Applicants with previous college experience must submit an official college transcript, as their success at the college level will be an admissions consideration. Due to the technical and science rigor, entrance requirements are higher than those of the institution.

Students who believe they need a reasonable accommodation to participate in this program may contact Melanie Ryan in the Office of Accessibility Services. This office may be contacted by email at DisabilityServices@alfredstate.edu or by phone at 607-587-4506. Please keep in mind that some accommodations may take time to implement, so students seeking accommodations are encouraged to contact OAS as early as possible.

TECHNICAL STANDARDS
To participate in the program, the applicant must possess specific non-academic skills. The technical standards described below are consistent with the duties of an entry-level sonographer in a professional position and are required in order to provide adequate patient care and produce a diagnostic image.

The applicant should have the:

- Ability with reasonable accommodation, if necessary, to reach and position the patients on the exam table.
- Ability with reasonable accommodation, if necessary, to move, adjust, and manipulate equipment to perform imaging procedures.
- Ability to review and evaluate recorded images to determine the quality of the image with reasonable accommodation.
- Ability to communicate effectively with patients, doctors, and other personnel so that the patient is not placed in an “at-risk” situation.
- Ability to make proper decisions involving patient and co-worker safety.
- Ability with reasonable accommodation, if necessary, to hear sounds that are necessary to assess patient’s health status.

FACILITIES
The program is located in the radiologic technology suite, which includes two lecture classrooms connected to a non-energized and an energized radiology laboratory. Clinical experience is at various local hospitals and clinic sites.

CONTINUING EDUCATION OPPORTUNITIES
The program allows graduates to transfer to a four-year program in radiologic science such as ultrasound, radiologic imaging, nuclear medicine, and radiation therapy.

OCCUPATIONAL OPPORTUNITIES
- Hospital Radiology Department staff technologist
- Advanced imaging modalities - CT, cardiovascular intervention, mammography
- Radiology education
- Radiology Department management
- Industry
- Private physician offices

</table>

Grade of “C+” or better required for all BIOL and RADT prefix courses.

Be advised that a prior felony conviction may impede a student’s ability to participate in a required clinical experience.

GRADUATION REQUIREMENTS
The AAS degree in radiologic technology has finely prescribed courses reflective of accreditation standards for students to be prepared for admission to the American Registry of Radiologic Technologists' Certification Examination and New York State licensure granted by the Department of Health. Specific graduation requirements are:

- 64 total semester credit hours
- Minimum of 20 credit hours of liberal arts and sciences from three of the 10 SUNY General Education categories
- 2.0 cumulative GPA and a grade of “C+” or better in the core science courses (RADT and BIOL prefixes)
- Approval of department faculty
SPORT MANAGEMENT

AS DEGREE - CODE #1396

Keary Rouff, Program Coordinator
Email address: rouffkj@alfredstate.edu

The growing emphasis on athletics, coupled with the increasing amount of leisure time the public now enjoys, has made the world of sports one of the fastest-growing segments of American business. The sports industry requires a great variety of people with expertise in business. The goal of this program is to prepare you — using both hands-on and theory-based training — for a career in many areas of sport management and administration.

A laptop computer is required for students entering this degree program. Laptop specifications are available at www.alfredstate.edu/required-laptops.

ADVANTAGES

Students obtain a holistic and in-depth understanding in many areas, such as principles of facility management, the unique aspects of sports marketing, promotions, finance, sport law, media relations, ticket sales, and sponsorship.

PROGRAM STUDENT LEARNING OUTCOMES

- Recognize the primary theories within the principle functional areas of business and sport management.
- Demonstrate professional business communication.
- Illustrate critical thinking and effective decision-making within the principle functional areas of sport management.
- Identify ethical issues within sport management

DIRECT ENTRY INTO BACCALAUREATE DEGREE PROGRAMS

Alfred State sport management graduates may enter directly into the business administration BBA, the interdisciplinary studies BTech, the sport management BBA, or the technology management BBA program.

CONTINUING EDUCATION OPPORTUNITIES

Students may transfer directly into our four-year sport management program, which results in a BBA degree.

OCCUPATIONAL OPPORTUNITIES

- Professional sports
- College sports
- Minor league sports
- Olympic organizations
- Recreational sport organizations
- Philanthropic sport organizations
- International sport organizations
- Ticket sales
- Sports marketing and promotions
- Sports sponsorship
- Media relations and sports broadcasting
- Sports law and sports agencies
- Facilities and event management

EMPLOYMENT STATISTICS

Employment and continuing education rate of 100 percent – 100 percent continued their education.

GRADUATION REQUIREMENTS

64 semester hours with a 2.0 cumulative index.
SPORT MANAGEMENT
BBA DEGREE - CODE #0182
Keary Rouff, Program Coordinator
Email address: rouffjk@alfredstate.edu

The growing emphasis on athletics, coupled with the increasing amount of leisure time the public now enjoys, has made the world of sports one of the fastest-growing segments of American business. The sports industry requires a great variety of people with expertise in business. The goal of this program is to prepare you — using both hands-on and theory-based training — for a career in the areas of administration, marketing, sales, fund development, finance, event promotion and management, communication, and facility management.

A laptop computer is required for students entering this degree program. Laptop specifications are available at www.alfredstate.edu/required-laptops.

ADVANTAGES

• BBA students will complete a specialization in marketing and event promotion field experiences during the second year, and a full-semester internship in the senior year.
• Students will study the core body of knowledge in sport management, a sport management specialization, and the required SUNY general education component.

PROGRAM STUDENT LEARNING OUTCOMES

• Demonstrate technical competence in domestic and global environments within the principle functional areas of business.
• Analyze sport-related business problems and devise solutions using critical thinking, decision-making processes, and decision-support tools.
• Formulate solutions to current sport issues by incorporating the major functional areas of business and sport management.
• Incorporate software, technology, and information systems into sport-related operations.
• Identify comprehensive sport management issues and communicate findings and solutions.
• Identify the sport management environment in relation to the current financial, legal, economic, and social environments.
• Analyze the role of ethics, industry-based organizational regulations, and legalities in sport management processes.

OCCUPATIONAL OPPORTUNITIES

• Professional sports
• College sports
• Minor league sports
• Olympic organizations
• Recreational sport organizations
• Philanthropic sport organizations
• International sport organizations
• Ticket sales
• Sports marketing and promotions
• Sports sponsorships
• Media relations and sports broadcasting
• Sports law and sports agencies
• Facilities and event management

EMPLOYMENT STATISTICS

Employment and continuing education rate of 100 percent — 80 percent are employed; 20 percent continued their education.

GRADUATION REQUIREMENTS

- 122 credit hours
- 30 credit hours of the 45 upper-level credit hours for this degree must be taken at Alfred State
- Cumulative overall index of at least 2.0
SURVEYING AND GEOMATICS ENGINEERING TECHNOLOGY

BS DEGREE - CODE #1046
Kera Mariotti, Program Coordinator
Email address: mariottka@alfredstate.edu

Governmental agencies, private industries, and individuals all benefit from the surveying and mapping of our natural resources and planning of transportation systems, recreational facilities, new cities, and land subdivisions. Using advanced surveying equipment such as the electronic total stations to measure angles and distances, the modern surveyor has learned to increase his/her productivity and measurement accuracy. Particularly exciting about the future of the surveying profession are the emerging technologies of Global Positioning Systems (GPS), Geographic Information Systems (GIS), and Land Information Systems (LIS).

This program will provide you with a thorough understanding of the basic sciences of mathematics and physics, as well as applied subjects such as graphics and computer-aided drafting and design. The knowledge obtained from these basic courses is applied to a well-rounded study of modern surveying theory and practice.

A laptop computer is required for students entering the surveying engineering technology programs. Laptop specifications are available at www.alfredstate.edu/required-laptops.

ADVANTAGES

- The student constantly applies theoretical knowledge in meaningful and comprehensive laboratory sessions. Graduates are educated in a two-fold sense, both theoretically and practically.
- Both the surveying engineering technology (AAS) and the surveying and geomatics engineering technology (BS) programs are accredited by the Engineering Technology Accreditation Commission of ABET, http://www.abet.org.

PROGRAM STUDENT LEARNING OUTCOMES

- An ability to apply knowledge, techniques, skills and modern tools of mathematics, science, engineering, and technology to solve broadly defined engineering problems appropriate to the discipline.
- An ability to design systems, components, or processes meeting specified needs for broadly defined engineering problems appropriate to the discipline.
- An ability to apply written, oral, and graphical communication in broadly defined technical and non-technical environments; and an ability to identify and use appropriate technical literature.
- An ability to conduct standard tests, measurements, and experiments and to analyze and interpret the results to improve processes.
- An ability to function effectively as a member and a leader on technical teams.

PROGRAM EDUCATIONAL OBJECTIVES

Program educational objectives were established with the assistance of the Industrial Advisory Committee and are reviewed periodically. The surveying and geomatics engineering technology program produces graduates who:

- Write, read, and orally present technical reports, letters, and projects that meet the standards of the profession.
- Recognize the need for, and an ability to engage in, continued formal education as well as lifelong learning.
- Will be capable of sitting successfully for the Land Surveyor Examination.
- Have the skills to perform a land title survey in all its complexity.
- Will be capable of employing state-of-the-art surveying techniques in leading a survey crew to the accomplishment of its goal.

OCCUPATIONAL OPPORTUNITIES

- Land surveyor (after successfully meeting state requirements)
- Surveying engineering technician
- Project surveyor
- Party chief
- Mapping technologist
- GPS surveyor

EMPLOYMENT STATISTICS

Employment and continuing education rate of 100 percent – 100 percent are employed.

RELATED PROGRAMS

Building Trades: Building Construction
Construction Management

CERTIFICATION OR LICENSURE

Both the surveying engineering technology (AAS) and the surveying and geomatics engineering technology (BS) are accredited by the Engineering Technology Accreditation Commission of ABET, http://www.abet.org.

Graduates of the BS program will receive four years of credit toward the total statutory time requirement for licensure as a land surveyor in New York State.

Graduates of the BS program will receive four years of credit toward the total statutory time requirement for licensure as a land surveyor in New York State. The BS graduates are eligible to take the first part of the NCEES licensing exam for land surveying in their senior year, eighth semester, if within 20 semester credit hours of graduation.

Additionally, graduates of the BS program will receive six years of credit toward the statutory time for licensure as a professional engineer in New York State. The BS graduates are eligible to take the first part of the NCEES licensing exam for professional engineer in the fall following their graduation.

ARTICULATION AGREEMENTS

Alfred State accepts students from other two-year institutions as juniors into the BS surveying and geomatics engineering technology program with appropriate course work and grade point averages.

ENTRANCE REQUIREMENTS/RECOMMENDATIONS

Required: Algebra, Geometry, Algebra 2
Recommended: Physics

TECHNICAL STANDARDS

Students in the surveying and geomatics program must meet the following:

- Students must have the ability to complete field work over natural terrain.
- Students must have the ability to use standard software of the profession.

Students who believe they need a reasonable accommodation to participate in this program may contact the Office of Accessibility Services by email at DisabilityServices@alfredstate.edu or by phone at 607-587-4506. Please keep in mind that some accommodations may take time to implement, so students seeking accommodations are encouraged to contact OAS as early as possible.

GRADUATION REQUIREMENTS

2.0 cumulative grade point average and department requirement of 2.0 grade point average in major courses (CIVL).
# Surveying and Geomatics Engineering Technology - BS Degree

## Typical Eight-Semester Program

### First Semester
- **COMP 1503** Freshman Composition: 3 credits
- **CIVL 1011** Civil AutoCAD: 1 credit
- **CIVL 1204** Surveying I: 4 credits
- **CIVL 1182** Civil Tech Graphics: 2 credits
- **MATH 1033** College Algebra: 3 credits
- **GLST 2113** Global Perspectives: Special Topic: 3 credits

### Second Semester
- **CIVL 2204** Surveying II: 4 credits
- **PHYS 1024** General Physics I: 4 credits
- **MATH 2043** College Trigonometry: 3 credits
- **LITR xxx3** Literature Elective: 3 credits

### Third Semester
- **CIVL 3204** Legal Asp & Prac of Land Surv: 4 credits
- **CIVL 3214** Geodesy: 4 credits
- **PHYS 2023** General Physics II: 3 credits
- **MATH 1063** Technical Calculus I: 3 credits

### Fourth Semester
- **CIVL 4204** Subdivision Theory & Appl: 4 credits
- **CIVL 4214** Surveying Practicum: 4 credits
- **CIVL 4243** Surveying Computer Appl: 3 credits
- **CIVL 4273** Photogrammetry & Image Interpr: 3 credits
- **XXX XXX3** Gen Ed Elective: 3 credits

### Fifth Semester
- **CHEM 5013** Applied Chemical Principles: 3 credits
- **MATH 2074** Technical Calculus II: 4 credits
- **CIVL 5114** Land Surveying: 4 credits
- **CIVL 7114** Geographic Information Systems: 4 credits
- **XXX XXX4** Gen Ed Elective: 3 credits
- **BUAD 3043** Business Law I: 3 credits

### Sixth Semester
- **SPCH 1083** Effective Speaking: 3 credits
- **CIVL 6104** Arlys & Adjmnts of Surv Mmmts: 4 credits
- **CISY 1113** Computer Programming I: 3 credits
- **XXX XXX4** Gen Ed (Upper) (MATH 6114 recommended): 4 credits
- **XXX XXX3** Technical or Business Elective (Upper): 3 credits

### Seventh Semester
- **MATH 7123** Statistics for Engr Tech & Sci: 3 credits
- **MATH 7113** Economic Analy for Engr Tech: 3 credits
- **CIVL 8104** Global Positioning Systems: 4 credits
- **CIVL 7114** Geographic Information Systems: 4 credits
- **CIVL 5114** Land Surveying: 4 credits
- **CIVL 7001** Sr Seminar & Project Design I: 1 credit
- **COMP 5703** Technical Writing II: 3 credits

### Eighth Semester
- **PHYS 8013** Modern Physics: 3 credits
- **CIVL 8003** Sr Seminar & Project Design 2: 3 credits
- **XXX XXX3** Technical Elective (Upper): 3 credits

---

Must meet seven of the 10 General Education areas.

Be advised that a prior felony conviction may impede a student's ability to receive licensure.

## Suggested Technical or Business Electives
- **CIVL 6113**
- **CIVL 7103**
- **BUAD 5000+**
- **TMGT 5000+**
- **ACCT 5000+**
SURVEYING ENGINEERING TECHNOLOGY
AAS DEGREE - CODE #1039
Nicholas Ford, Program Coordinator
Email address: fordnb@alfredstate.edu

Governmental agencies, private industries, and individuals all benefit from the surveying and mapping of our natural resources and planning of transportation systems, recreational facilities, new cities, and land subdivisions. Using advanced surveying equipment such as the electronic total stations to measure angles and distances, the modern surveyor has learned to increase his/her productivity and measurement accuracy. Particularly exciting about the future of the surveying profession are the emerging technologies of Global Positioning Systems (GPS), Geographic Information Systems (GIS), and Land Information Systems (LIS).

This program will provide you with a thorough understanding of the basic sciences of mathematics and physics, as well as applied subjects such as graphics and computer-aided drafting and design. The knowledge obtained from these basic courses is applied to a well-rounded study of modern surveying theory and practice.

A laptop computer is required for students entering the surveying engineering technology program. Laptop specifications are available at www.alfredstate.edu/required-laptops.

ADVANTAGES
• The student constantly applies theoretical knowledge in meaningful and comprehensive laboratory sessions. Graduates are educated in a two-fold sense, both theoretically and practically.
• Both the surveying engineering technology (AAS) and the surveying and geomatics engineering technology (BS) programs are accredited by the Engineering Technology Accreditation Commission of ABET, http://www.abet.org.

PROGRAM STUDENT LEARNING OUTCOMES
• An ability to apply knowledge, techniques, skills and modern tools of mathematics, science, engineering, and technology to solve well-defined engineering problems appropriate to the discipline.
• An ability to design solutions for well-defined technical problems and to assist with the engineering design of systems, components, or processes appropriate to the discipline.
• An ability to apply written, oral, and graphical communication in well-defined technical and non-technical environments; and an ability to identify and use appropriate technical literature.
• An ability to conduct standard tests, measurements, and experiments and to analyze and interpret the results.
• An ability to function effectively as a member of a technical team.

PROGRAM EDUCATIONAL OBJECTIVES
Program educational objectives were established with the assistance of the Industrial Advisory Committee and are reviewed periodically. The surveying engineering technology program prepares graduates who:
• Write, read, and orally present technical reports, letters, and projects that meet the standards of the profession.
• Have an understanding of and are able to implement basic field and office survey procedures.
• Are capable of performing elementary research.
• Are competent in surveying techniques.
• Recognize the need for engagement and an ability to engage in continued formal education, as well as lifelong learning.

DIRECT ENTRY INTO BACCALAUREATE DEGREE PROGRAMS
Alfred State surveying engineering technology AAS graduates may enter directly into the construction supervision BTech, the interdisciplinary studies BTech, the surveying and geomatics engineering technology BS, or the technology management BBA degree program.

OCCUPATIONAL OPPORTUNITIES
• Land surveyor (after successfully meeting state requirements)
• Field technician
• Drafter - computer

EMPLOYMENT STATISTICS
Employment and continuing education rate of 100 percent – 100 percent continued their education.

Construction Management
Construction Supervision

CERTIFICATION OR LICENSURE
The surveying engineering technology (AAS) program is accredited by the Engineering Technology Accreditation Commission of ABET, http://www.abet.org. Accreditation means that the graduates from the AAS program will receive two years of credit toward the total statutory time requirement for licensure as a land surveyor in New York State.

ENTRANCE REQUIREMENTS/RECOMMENDATIONS
Required: Algebra, Geometry, Algebra 2

Recommended: Physics

Entry level of student into math and composition/literature sequences is a function of student’s high school preparation and mathematics and English placement examinations.

Math through technical calculus I must be completed. Freshman composition and introduction to literature must be taken.

TECHNICAL STANDARDS
Students in the surveying engineering technology program must meet the following:
• Students must have the ability to complete field work over natural terrain.
• Students must have the ability to use standard software of the profession.

Students who believe they need a reasonable accommodation to participate in this program may contact the Office of Accessibility Services by email at DisabilityServices@alfredstate.edu or by phone at 607-587-4506. Please keep in mind that some accommodations may take time to implement, so students seeking accommodations are encouraged to contact OAS as early as possible.

TECHNOLOGY MANAGEMENT
BBA DEGREE - CODE #1318
Dianne Clark and Danielle Green, Program Coordinators
Email address: clarkdc@alfredstate.edu or greendr@alfredstate.edu

The technology management BBA is designed to allow you to take your professional/technical degree to new heights. We’ve constructed this program to provide you with the hands-on business, administrative, and technological course work necessary to advance into management and supervisory positions in your field. That means you’ll have the skills necessary to run a small-to-medium-sized business, manage a department or a division, or own and manage your own business.

In order to earn the bachelor’s degree, students entering the program with an earned associate degree must complete all specified upper-level requirements for the bachelor’s degree, fulfill all required prerequisites for upper-level courses, and earn a minimum of 60 credits beyond the associate degree. The student will take courses that will result in the fulfillment of seven SUNY General Education course areas.

ADVANTAGES
• The technology management degree is designed to allow a student who has earned an associate degree (AAS, AA, AS, or AOS) in a technical or professional area (or at least 60 credits toward such a degree) to complete a bachelor’s degree through this upper-division program.
• The program includes an internship in the final semester of the senior year.
• Graduates of this program are eligible for employment in many industries that require both a technical and business background.
• The college offers technology management courses online, making it possible for students who transfer in credit or attend other colleges to earn their degree from Alfred State in technology management. This approach is perfect for working professionals, adult and returning students, or anyone who needs high flexibility in their academic schedule.

PROGRAM STUDENT LEARNING OUTCOMES
• Demonstrate technical competence in domestic and global environments within the principle functional areas of business.
• Analyze business problems and devise solutions using critical thinking, decision-making processes, and decision-support tools.
• Formulate a strategic plan using effective teamwork while integrating the major functional areas of business and innovation.
• Demonstrate and incorporate software, technology, and information systems into business operations.
• Identify comprehensive business issues and communicate findings and solutions.
• Identify the technology-related business environment in relation to the current financial, legal, economic, and social environments.
• Analyze the role of ethics, government regulations, and legalities in management processes.

EMPLOYMENT STATISTICS
Employment and continuing education rate of 92 percent – 79 percent are employed; 13 percent continued their education.

ENTRANCE REQUIREMENTS/RECOMMENDATIONS
• Required: Successful completion of an associate degree (AAS, AA, AS, or AOS) with a minimum cumulative GPA of 2.0 or have amassed at least 60 credit hours, including courses that fulfill five different general education fields.
• Students must either possess an AAS, AA, AS, or AOS degree or have amassed at least 60 credit hours, including courses that fulfill five different general education fields.
• A laptop computer will be required of all students. See laptop specifications at www.alfredstate.edu/required-laptops.
• Students entering this major from an AOS degree program are accepted in the program as ASOP students until completion of the five bridge courses (15 credits) in Liberal Arts and Sciences/General Education. The Business Department chair will review all college credits earned and will recommend specific courses to complete this bridge.

| 15    | 18    | 18      | 12     |

Students seeking permission to take four upper-level classes in lieu of completing an internship must submit an appeal form with their justification, along with a faculty member's statement of support. Internship appeal forms should be emailed or hand-delivered to the department secretary and will be reviewed by Business Department faculty. Appeal forms are due no later than Oct. 15 for the fall semester and March 15 for the spring semester.

Be advised that a prior felony conviction may impede a student's ability to participate in an internship.

GRADUATION REQUIREMENTS
• Total minimum credit hours for graduation is 123.
• A cumulative overall index of at least 2.0 is required in order to graduate.
• 30 credit hours of the 45 upper-level credit hours for this degree must be taken at Alfred State.

ADDITIONAL PROGRAM INFORMATION
• Seven of the 10 SUNY-approved General Education categories must be fulfilled.
• 12 credit hours may be transferred back within a seven-year period if you leave Alfred State prior to completing your degree.
UNDECLARED MAJOR

CODE # 0000
Bridget Kehrer, Program Coordinator
Email address: keherbe@alfredstate.edu

If you’re undecided about your career goals, the undeclared major may be right for you. This program gives you the opportunity to try different options and select a course of study the first two semesters that fits your interests and background. Along the way, you can take advantage of extensive support services, including career planning and counseling, offered by caring faculty and staff throughout the program.

Since the primary goal of the program is to explore various academic areas of interest, individual course schedules will vary. The suggested program includes both a component of core courses (English, math, social science) and a component of electives in support of your interests.

Students enrolled in the undeclared major must transfer to a degree-granting program within two semesters. Depending on the choice of major, students may enter the workforce upon graduation, or continue their education in a bachelor’s degree program.

ENTRANCE REQUIREMENTS/RECOMMENDATIONS

Required: Algebra

Recommended: Biology

Students who believe they need a reasonable accommodation to participate in this program may contact Melanie Ryan in the Office of Accessibility Services. This office may be contacted by email at DisabilityServices@alfredstate.edu or by phone at 607-587-4506. Please keep in mind that some accommodations may take time to implement, so students seeking accommodations are encouraged to contact OAS as early as possible.

*ASOP students will also take other ASDC courses

**Some students may be required to also take COMP 1403 based on placement
Licensed veterinary technicians are indispensable members of the veterinary medical team, capable of providing everything from life support and surgical assistance to physical therapy and nutritional management. Our program is designed to provide you with extensive training in the theory and principles, reinforced with the hands-on technical, animal, and laboratory experience needed to prepare you for this exciting field.

ADVANTAGES

- This program has full accreditation status as granted by the American Veterinary Medical Association, Committee on Veterinary Technician Education and Activities, Education and Research Division, [1931 N. Meacham Road, Suite 100, Schaumburg, IL 60173-4360; 847-925-8070].
- Students are eligible to sit for the Veterinary Technician National Exam (VTNE), the state licensing exam for veterinary technicians. Demand for licensed veterinary technicians is strong across the country.

PROGRAM STUDENT LEARNING OUTCOMES

- Demonstrate a working knowledge of anatomy and physiology of domestic, laboratory, and exotic animal species encountered in veterinary medicine.
- Successfully perform animal care and husbandry, restraint, imaging, surgical, anesthetic and laboratory specimen analyses commonly encountered in veterinary clinical practice.
- Demonstrate written and oral communication skills appropriate for animal health care professionals.
- Critically think and reason when calculating and administering therapeutic agents used in veterinary medicine.
- Follow and uphold applicable laws and the veterinary technology profession's ethical codes to provide high-quality patient care.
- Troubleshoot and safely utilize all instruments and equipment commonly utilized in veterinary clinical practice.
- Display the knowledge and skills necessary to successfully pass the Veterinary Technician National Exam.

DIRECT ENTRY INTO BACCALAUREATE DEGREE PROGRAMS

Alfred State veterinary technology graduates may enter directly into the interdisciplinary studies BTech, the technology management BBA, or the healthcare management BTech degree program.

EXPENSES

Rabies vaccinations are strongly encouraged for all veterinary technology students. The vaccination series cost varies between $600 and $800. Textbooks are the primary annual expense, with the cost averaging $1,000 to $1,200 each year.

CONTINUING EDUCATION OPPORTUNITIES

The Alfred State veterinary technology program has an established transfer agreement with Cornell University’s College of Agriculture. Students have also successfully transferred into the Purdue University BS veterinary technology program.

OCCUPATIONAL OPPORTUNITIES

- Veterinary hospitals (small animal, large animal, mixed animal, and exotic animal)
- Biomedical research institutions
- Zoological parks
- Educational institutions
- Specialized dairy calf or cow management
- Colleges of Veterinary Medicine

EMPLOYMENT STATISTICS

Employment and continuing education rate of 100 percent – 94 percent are employed; 6 percent continued their education.

RELATED PROGRAMS

- Agricultural Technology
- Nursing

Enrollment Statistics

- Number of students enrolled: 92
- Number of students completing the program: 84
- Three year average VTNE pass rate: 91.3%

Students who believe they need a reasonable accommodation to participate in this program may contact Melanie Ryan in the Office of Accessibility Services. This office may be contacted by email at DisabilityServices@alfredstate.edu or by phone at 607-587-4506. Please keep in mind that some accommodations may take time to implement, so students seeking accommodations are encouraged to contact OAS as early as possible.

CERTIFICATION OR LICENSURE

The veterinary technology program at Alfred State is a two-year educational course of study leading to an Associate in Applied Science degree and students are eligible to sit for the Veterinary Technology National Exam (VTNE). The VTNE is the New York State licensing exam for veterinary technicians. The demand for graduate-licensed or license-eligible veterinary technicians is strong across the country.

**Preceptorship** of 240 hours, either during summer or semester break after successful completion of second semester course requirements. Preceptorship hours can be fulfilled through part-time employment at an appropriate facility.

In order to progress in the veterinary technology program, students must earn a “C” or better in each required veterinary technology course, with the exception of VETS 1214 Animal Anatomy and Physiology I, which requires a minimum of a “D” to pass the course. Students receiving an “F” in two or more required courses will be required to change majors.

ASOP students must earn a “C” or better in the Introduction to Veterinary Technology course and earn a “B” or better in the Domestic Animal Anatomy and Physiology course in order to progress to the next level of core veterinary courses.

Be advised that a prior felony conviction may impede a student’s ability to participate in an internship.

**GRADUATION REQUIREMENTS**

Students must:
- Successfully complete the prescribed sequence of courses.
- Achieve a minimum of 2.0 in their core courses and a minimum of 2.0 overall.
- Be recommended by the department faculty.
- Completed 240-hour preceptorship.

*The 240-hour preceptorship is a program requirement and a graduation requirement.

The Admissions and Performance Standards discussed in the following paragraphs define performance expectations that must be met for successful completion of the veterinary technology program at Alfred State. It is the policy of Alfred State to provide reasonable accommodations for those with disabilities as defined under the Americans with Disabilities Act. If you need an accommodation due to a disability under the Americans with Disabilities Act, please contact the Student Success Center office at 607-587-4122. Some accommodations may require up to six weeks to prepare. For progression in the veterinary technology program, students are expected to meet the following performance standards:
### Some Examples of Necessary Activities (not all-inclusive)

<table>
<thead>
<tr>
<th>Category</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Critical Thinking</strong></td>
<td>Critical thinking sufficient for clinical judgment. Identify cause-effect relationships in clinical situations. Develop nursing care plans. Demonstrate problem-solving skills. Adapt to stressful situations.</td>
</tr>
<tr>
<td><strong>Interpersonal</strong></td>
<td>Interpersonal abilities sufficient to interact with patients, clients, families, and groups from a variety of social, emotional, cultural, and intellectual backgrounds. Establish rapport with patients/clients and colleagues. Recognize appropriate boundaries in relationships with patients/clients and colleagues.</td>
</tr>
<tr>
<td><strong>Communication</strong></td>
<td>Communication abilities for interaction with others orally and in writing. Explain treatment procedures, initiate health teaching, document and interpret nursing actions and patient/client responses. Team-building skills.</td>
</tr>
<tr>
<td><strong>Mobility</strong></td>
<td>Physical abilities sufficient to move from room to room, maneuver in small spaces, and provide assistance to patients. Move around in patient and treatment areas. Administer CPR. Provide physical assistance to clients and colleagues. Ensure safety within the environment. Ability to prevent or escape injury caused by animals (e.g., biting, kicking, stampeding).</td>
</tr>
<tr>
<td><strong>Motor Skills</strong></td>
<td>Gross and fine motor abilities sufficient to provide safe, effective nursing care in a timely manner. Use of instruments, supplies, safety devices, and communication equipment in the care of patients. Performance of nursing care, surgical assistance, and laboratory techniques.</td>
</tr>
<tr>
<td><strong>Hearing</strong></td>
<td>Auditory ability sufficient to monitor and assess health needs. Auditory ability sufficient to hear auscultatory sounds, monitor alarms, and monitor and assess health emergency signals and cries for help. Hear needs/warning sounds from animals and humans of impending danger/injury.</td>
</tr>
<tr>
<td><strong>Visual</strong></td>
<td>Visual ability sufficient for observation and assessment necessary in nursing care. Observe patients for expected and unexpected physical and emotional responses to nursing and medical treatment regimens. Use of diagnostic equipment such as a microscope, thermometer, refractometer, etc.</td>
</tr>
<tr>
<td><strong>Tactile</strong></td>
<td>Tactile ability sufficient for physical assessment and performance of nursing duties in a timely manner. Perform palpation functions of physical exam. Administer oral, intramuscular, subcutaneous, and intravenous medications. Insert and remove tubes and perform wound care management. Surgical assistance.</td>
</tr>
<tr>
<td><strong>Physical Condition</strong></td>
<td>Physical ability and stamina sufficient to restrain, lift, and assist in the care of a variety of species of animals. Ability to stand for extended periods of time. Ability to withstand extreme weather conditions. Immune system competence. Safely lift, position, and restrain animals and supplies for treatment. Surgical assistance. Daily clinical routine. Year-round treatment and care of outdoor animals. Exposure to a wide range of chemical and biological agents.</td>
</tr>
</tbody>
</table>

**WELDING TECHNOLOGY**

**AOS DEGREE - CODE #0666**

Bradley Thompson, Department Chair

Email address: thompsbj@alfredstate.edu

This high-tech program focuses on welding processes performed in all positions on both plate and pipe. You will learn proper safety methods, required math, related skills, layout and fit up, welding codes and standards, welding inspection, testing, and drawing/welding symbol interpretation.

The first year, students will complete AWS Level I standards for an entry-level welder. The second year will take students toward AWS Level II - advanced welder and expert welder. Additional techniques such as high-pressure vessel and high-pressure pipe will be taught, as well as other advanced welding techniques.

**ADVANTAGES**

The welding technology program is taught according to the standards set by the American Welders Society (AWS) and is AWS-certified.

**PROGRAM STUDENT LEARNING OUTCOMES**

- Demonstrate mathematical operations using accepted mathematical applications.
- Practice shop safety and welding safety.
- Perform straight and bevel cuts using manual and automatic oxyfuel and plasma equipment.
- Set up and operate constant current welding equipment.
- Set up and operate constant voltage welding equipment.
- Perform fillet and groove welds in all positions on carbon steel plate.
- Perform fillet and groove welds on pipe in all positions.
- Identify and describe the heat relationship to the grain structure of various metals.
- Maintain and develop testing and inspection records.
- Demonstrate layout and fabrication skills resulting from the previous materials used in program.

**DIRECT ENTRY INTO BACCALAUREATE DEGREE PROGRAM**

Alfred State welding technology graduates may enter directly into the technology management BBA degree program. Graduates who have credit for freshman composition, statistics, literature, history, and speech may complete the BBA program in two additional years; others may complete the BBA program in two-and-one-half years.

**OCCUPATIONAL OPPORTUNITIES**

- Industrial welder
- Steel construction
- Equipment repair
- Self-employment
- Fabrication welder
- Structural welder

**EMPLOYMENT STATISTICS**

Employment and continuing education rate of 95 percent – 89 percent are employed; 6 percent continued their education.

**RELATED PROGRAMS**

- Autobody Repair
- Heating, Ventilation, and Air Conditioning
- Machine Tool Technology
- Mechanical Engineering Technology
- Motorcycle and Power Sports Technology

**REQUIRED TOOLS/EQUIPMENT**

A list of required tools, equipment, PPE, etc. for all of the programs mentioned above can be found at [http://www.alfredstate.edu/admissions/accepted-students/required-tools-supplies](http://www.alfredstate.edu/admissions/accepted-students/required-tools-supplies).

**ENTRANCE REQUIREMENTS/RECOMMENDATIONS**

Recommended: In-depth knowledge of basic math skills.

**TECHNICAL STANDARDS**

Applicants for the welding program must meet the following physical requirements:

- Must be able to perform safely in the shop.
- Must be able to lift 50 pounds to eye level.
- Must be able to communicate orally with a person 6 to 10 feet away in a shop environment.
- Must be able to diagnose mechanical failures that are distinguished audibly.
- Must be able to understand and retain information found in service repair manuals and use diagnostic flow charts.
- Must be able to visually read an LCD display on welding equipment.
- Must have the dexterity and mobility to weld in all the welding positions to meet all requirements.
- Good eyesight is recommended.
- Must be able to stand for long periods of time.
- Students who believe they need a reasonable accommodation to participate in this program may contact Melanie Ryan in the Office of Accessibility Services. This office may be contacted by email at DisabilityServices@alfredstate.edu or by phone at 607-587-4506. Please keep in mind that some accommodations may take time to implement, so students seeking accommodations are encouraged to contact OAS as early as possible.

**GRADUATION REQUIREMENTS**

A student must successfully complete all courses in the prescribed four-semester program and earn a minimum cumulative index of 2.0, which is equivalent to a “C” average. Students are required to earn a grade of “C” or higher in WELD 1723 to be eligible for graduation. (Articulation is available in this area.)

A “C” or higher must also be received for WELD 4013.
Course Descriptions

ACCT - ACCOUNTING

ACCT - 1124 Financial Accounting, 4.00 Credits
Level: Lower
Topics included in this course are the fundamental principles of accounting, the accounting cycle and basic procedures, statement of financial position, determination and reporting of periodic earnings, cash and accrual basis of accounting; accounting for a merchandising firm and inventory valuation, principles of internal control. Other topics will include accounting for the acquisition, depreciation, and disposition of property, plant, and equipment.

ACCT - 2224 Managerial Accounting, 4.00 Credits
Prerequisite(s): ACCT 1124 with D or better
Level: Lower
Topics include: current liabilities; nature of corporations and related equity and income reporting issues; long-term liabilities; statement of cash flows; analysis of financial statements; nature and behavior of manufacturing costs; introduction to cost accounting concepts and systems; cost-volume-profit relationships; introduction to budgetary planning.

ACCT - 3423 Intermediate Accounting I, 3.00 Credits
Prerequisite(s): ACCT 2224 with C or better
Level: Lower
This course provides an in-depth examination of accounting theory in the treatment of assets, liabilities and stockholder's equity. The accounting cycle is reviewed in detail and a full examination and analysis of financial statement development and usage is undertaken. Continual focus will be on fundamental accounting concepts and principles with special emphasis on the contemporary theory and practice that applies to accounting statements. Topics included will include the foundations of accounting, the accounting process, accounting statements, and asset structure of the balance sheet.

ACCT - 3453 Tax Accounting I, 3.00 Credits
Prerequisite(s): ACCT 1124 with D or better
Level: Lower
Applied Learning-Practicum
This course will focus on fundamental income tax concepts related to understanding and completing individual federal income tax returns. Manual and computerized income tax preparation will be required. Coverage will include: income tax formula for individuals, gross income and exclusions, taxation of self-employed individuals, retirement plans, rental properties, standard vs itemized deductions, tax credits and additional taxes, depreciation, and capital gains/losses. Students will apply course theory to a contemporary tax software product through the computerized completion of progressively challenging federal tax returns.

ACCT - 4523 Intermediate Accounting II, 3.00 Credits
Prerequisite(s): ACCT 3423 with D or better
Level: Lower
Continuation of ACCT 3423. Topics include: long-term investments, fixed assets, current and long-term debt, and stockholder's equity. Special problems of income determination, statement of cash flow and statements from incomplete records.

ACCT - 4663 Acctng Sys & Computer Appl, 3.00 Credits
Prerequisite(s): ACCT 2224 with D or better
Level: Lower
Applied Learning-Practicum
This course will cover all aspects of accounting for payroll, including the requirements of the Fair Labor Standards Act, calculations relative to gross pay, statutory and non-statutory deductions, employee and employer payroll taxes, general journal entry work relative to payroll, the payroll register, and the individual earnings record. Determining the amount and timing of payroll deposits, and preparing required quarterly and annual reports will also be covered. The course will then apply payroll and other accounting activities to a contemporary accounting software product covering the following topics: creating a new payroll, payroll interactions with other systems, both benefit and delinquent (paids), will be studied. Management of synthetic inputs will be included in this course. Emphasis will be given to cultural (or biological) crop management strategies that reduce input costs in crop production and reduce fluctuations (risks) to crop performance and the environment.

AGEC - AGRICULTURE ECON/BUS

AGEC - 3213 Farm & Rural Business Mgmt I, 3.00 Credits
Level: Lower
This is the first in a two semester series where both the production management and financial management of a rural or farm business are studied. The course emphasizes the skills needed to manage a profitable business including analysis of financial statements, record keeping, key production management areas, leadership and decision-making skills. Aspects and functions of management as well as types of decision making will be introduced. Acquiring and organizing financial management information will be the primary emphasis of the course including constructing and analyzing financial statements and pertinent production information. The importance of good management (financial and otherwise) to the success of the business will be stressed.

AGPS - AGRONOMY/PLANT SCIENCE

AGPS - 1103 Soils, 3.00 Credits
Level: Lower
Gen Ed - Natural Sciences, Liberal Arts and Science
Fundamental principles of soil science are studied in an effort to relate soil characteristics to plant growth; plant growth as influenced by soil factors. Soil parent materials and soil formation, physical, chemical and colloidal properties of soils and soil surveys, life in the soil, soil water, and water conservation, plant nutrition, and liming practices are all covered in this course. Laboratory components complement lecture material.

AGPS - 4303 Farm & Rural Business Mgmt II, 3.00 Credits
Prerequisite(s): AGEC 3213 with D or better
Level: Lower
This is the second in a two semester series where both the production management and financial management of a rural or farm business are studied. The course emphasizes the skills needed to manage a profitable business including analysis of financial statements, record keeping, key production management areas, leadership and decision-making skills. The relationship between good management performance and financial success will be stressed. The primary emphasis of the course is improving management skills in acquiring resources for management. This includes farm business organization and transfer, as well as the acquisition of resources for rural enterprises. The importance of risk management and enterprise analysis to the success of the business will be stressed.

AGPS - 5003 Agricultural Policy, 3.00 Credits
Prerequisite(s): AGEC 4303 with D or better
Level: Upper
Upper Level
This course includes an analysis of the causes, nature, and effects of government participation in agriculture; and interrelationship of the American agriculture and agribusiness sector with the political and economic system, public administration, and interest group representation.
COURSE DESCRIPTIONS

ANSC - 2114 Dom Animal Anat & Phys, 4.00 Credits
Level: Lower
Applied Learning-Other, Course Fee $24.00, Liberal Arts and Science
This course is a systems approach to the study of anatomy and physiology of common domestic animals, emphasizing Ruminant, Equine, Swine, Canine and Feline as the animal models. The on-line course materials will provide the student with a complete overview of how each body system functions in the maintenance of a healthy animal. The on-line course materials will be reinforced in the laboratory where skeletons, models and prepared specimen will allow the student to gain applied perspectives of the gross anatomy and normal physiology. Histologic slides, kodachromes, radiographs and live animals will also be used to enhance student understanding. Computer simulated dissection materials will also be used to provide the opportunity for the students to refine their understanding of the required information.

ANSC - 3003 Feeds and Nutrition, 3.00 Credits
Level: Lower
This course provides the student with an understanding of animal nutrition. Students will learn feeding farm animals for growth, production, and profit, nutrient content and physiological value of feeds; nutrient requirements of farm livestock; physiology of digestion and developing and evaluating rations.

ANSC - 3013 Animal Disease Control, 3.00 Credits
Prerequisite(s): ANSC 1204 with D or better
Level: Lower
In this course, fundamental information on the nature of disease and its control and prevention will be studied. Students will learn the causes, symptoms, prevention and treatment of common diseases as well as to the life cycles, damage, diagnosis, control and treatment of various internal and external parasites.

ANSC - 3103 Livestock Mgmt & Production, 3.00 Credits
Level: Lower
The course introduces the student to the management and production of assorted species of livestock. Breeds of sheep, beef, and swine will be studied as well as the skills in selecting and judging these species. Feeding and management of each of these species, as well as housing and equipment requirements for animals in specific types of operations will be examined. Students will be introduced to diseases and parasites that may be encountered when managing a species-specific livestock operation. Students will also gain insight into different types of marketing used in livestock production.

ANSC - 3203 Dairy Cattle Production I, 3.00 Credits
Prerequisite(s): ANSC 1204 with D or better or VETS 3204 with D or better
Level: Lower
Applied Learning-Field Study
Dairy Cattle Production I is an introduction to specific subject matter which influences cattle production units today. Subject matter includes: on-farm disease control and biosecurity, calf and heifer management, milk letdown and physiology of lactation, udder health, basic herd management skills and introduction to Dairy Comp 305 record keeping software.

ANSC - 3204 Dairy Cattle Production II, 4.00 Credits
Prerequisite(s): ANSC 1204 with D or better or VETS 3204 with D or better
Level: Lower
Applied Learning-Field Study
Dairy Cattle Production II focuses on dairy farm management analysis to troubleshoot and prioritize production and profitability opportunities. The course includes: developing on-farm observation skills, production records analysis using Dairy Comp 305, monitoring cow and rumen health, nutrition and feeding management and employee management.

ANSC - 3223 Dairy Calf Management, 3.00 Credits
Prerequisite(s): ANSC 2114 with D or better or ANSC 1204 with D or better
Level: Lower
Applied Learning-Field Study
This course will provide the student with a basic understanding of the nutritional, environmental and health challenges a calf must go through from birth to weaning stage. Lab sessions will focus on mastering basic calf care skills. Field trips will be incorporated into the laboratories to expose students to different management approaches including custom calf raisers, and large and small herd replacement enterprises. Students will spend two hours per week practicing calf care procedures.

ANSC - 3243 Dairy Management Analysis, 3.00 Credits
Level: Lower
Applied Learning-Practicum
Dairy Management Analysis is an overview of the factors that influence dairy cattle production units today. Topics include dairy records analysis, fresh cow management, heifer and calf management, housing and ventilation, economics, profitability factors and employee management. Participation in the Northeast Dairy Challenge interscholastic competition or an assigned farm assessment with presentation is required.

ANTH - ANTHROPOLOGY

ANTH - 1013 Cultural Anthropology, 3.00 Credits
Level: Lower
Gen Ed - Other World Civ, Gen Ed - Social Sciences, Liberal Arts and Science
This course promotes understanding of the world's cultures by providing an introduction to cultural anthropology and the study of contemporary cultures worldwide, with an emphasis on non-western cultures. This course will introduce the student to anthropological methods, theories and concepts. It is a broad survey of a variety of belief systems, social and family structures, and different ways anthropologists understand individuals and cultures. Case studies are selected for specific ethnographic focus, through which to explore different approaches to life. The experiences of cross-cultural encounters are examined. At the completion of this class the student should be able to define basic anthropological concepts, understand theories of cultural anthropology and critically reflect on personal assumptions you may have about human beings and cultural.

ANTH - 5113 Cross-Cultural Encounters, 3.00 Credits
Level: Upper
Gen Ed - Other World Civ, Liberal Arts and Science, Upper Level
This course develops a framework for cross-cultural literacy - understanding different cultural contexts and the dynamics of cross-cultural communication. Attention is paid to the challenges that might be encountered in multi-cultural environments and how they might be resolved. Leading social, economic, and political institutions of several specific cultures will be examined. The course is writing-intensive and a project is required.

ANTH - 5223 Archaeology - Cities of Fire, 3.00 Credits
Level: Upper
Gen Ed - Social Sciences, Liberal Arts and Science, Upper Level
The discovery of the buried city of Pompeii in the 18th century gave birth to the modern science of archaeology, and at the same time added greatly to our understanding of Roman civilization. "Cities of Fire" is offered to students enrolled in the study abroad program in Sorrento, Italy, and takes advantage of the unique cultural heritage of Campania (the region surrounding the Gulf of Naples). The course is a survey of the techniques of archaeology, the vulcanism of the region, and the history and culture of the Roman civilization in Campania. Field lectures at sites including Pompei, Herceulanum, Baia, Cuma, Puteoli, Mt. Vesuvius and Naples enrich classroom presentations, and provide a first-hand experience of the ancient cultures of Greece and Rome. Students investigate specific aspects of Roman architecture, city planning, and culture, and present their findings in research reports during field visits.

ANTH - 5333 Medical Anthropology, 3.00 Credits
Level: Upper
Gen Ed - Other World Civ, Liberal Arts and Science, Upper Level
This course will introduce students to the diversity in health seeking practices and beliefs across the globe. Students will learn how to analyze medical practice, including biomedicine, as a cultural institution. We will explore how culture shapes our perceptions of what it means to be sick or healthy. This course will provide a context for understanding the way in which culture plays an integral role in understanding, maintaining and restoring health. We will also examine how social structures and cultural misunderstandings can lead to inequities in health outcomes and healthcare delivery.

ARCH - ARCHITECTURE AND DESIGN

ARCH - 1184 Design Fundamentals 1, 4.00 Credits
Prerequisite(s): COMP 1503 with D or better * and ( MATH 1033 with D or better * or MATH 1034 with D or better * or MATH 1054 with D or better * or MATH 1063 with D or better * or MATH 1084 with D or better *)
Level: Lower
Course Fee $53.00
This course is an introduction to fundamental design, architectural design drawing, written and verbal communication skills and applied drawing techniques. Students are introduced in lecture to design and drawing principles, and techniques and conventions used to develop and communicate architectural ideas. Studio assignments emphasize the relationship between drawing and three-dimensional form and space, and include exercises in basic design and model-making. Topics include ordering systems, spatial relationships, the design process and architectural theory. Students explore and practice, observational sketching, depicting light, texture and depth, analytical drawing, orthographic projection systems, and professional standards for layout, lettering, use of line weights, and dimensioning of architectural drawings.

ARCH - 2014 Computer Visualization, 4.00 Credits
Level: Lower
Applied Learning-Practicum
This is an introductory course that examines the practical and theoretical issues of architectural modeling software (BIM) as a tool for all aspects of the architectural design and development process. Students learn to create and execute projects populated with elements of "process and technique" that will form a foundation tool for sequence courses.

ARCH - 2394 Design Fundamentals 2, 4.00 Credits
Prerequisite(s): ARCH 1184 with C or better or CIAT 1184 with C or better
Level: Lower
Course Fee $53.00
An introductory course designed to expose students to fundamental design and communication skills, research, site analysis skills, and assessment tools, use of precedent studies, design program development, color theory, and site planning. Students also continue to develop their understanding and application of the design process, spatial relationships, design ordering systems and design principles. The course examines these topics through readings and quizzes, and design projects incorporating graphic, written and verbal presentation skills. Students also explore the characteristics of materials through hands on material alteration and model building.

ARCH - 3003 Environmental Controls 1, 3.00 Credits
Prerequisite(s): MATH 1033 with C or better or MATH 1034 with C or better or MATH 1054 with C or better or MATH 1063 with C or better
Level: Lower
This course introduces the student to the fundamental principles of mechanical, electrical and plumbing (MEP) systems for small buildings. Students will explore passive design strategies and their effects on active MEP building systems. The course will emphasize holistic analyses of sites, buildings and small building systems with respect to geographic regions. Instruction will focus on impacts of the built environment on global resources. Tests, calculations and delineation of building systems will form the basis of instruction.
ARCH - 3014 Construction Technology 1, 4.00 Credits
Prerequisite(s): ARCH 2394 with C or better
Level: Lower
This course builds on the construction topics begun in Construction Technology 1. The course is focused on construction techniques for commercial buildings. Topics covered include: steel frame, reinforced concrete, pre-cast concrete and building envelope systems. Emphasis is placed on contemporary details and methods of construction. Student evaluations are based on Building Information Modeling (BIM) computer generated projects and periodic tests.

ARCH - 4013 Municipal Codes & Regulations, 3.00 Credits
Prerequisite(s): ARCH 3014 with D or better or CIAT 3014 with D or better
Level: Lower
This course covers the municipal code review process and definition of model building and zoning codes. The course emphasizes use and occupancy, special use and occupancy, building heights and areas, types of construction, fire-resistive construction, interior finishes, fire-protection systems, means of egress, accessibility, interior environment, energy efficiency, exterior walls, door assemblies, structural provisions, building materials and systems and existing structures as described in the Building Code of New York State.

ARCH - 4014 Construction Technology 2, 4.00 Credits
Prerequisite(s): ARCH 3014 with D or better
Level: Lower
This course builds on the construction topics begun in Construction Technology 1. The course is focused on construction techniques for commercial buildings. Topics covered include: steel frame, reinforced concrete, pre-cast concrete and building envelope systems. Emphasis is placed on contemporary details and methods of construction. Student evaluations are based on Building Information Modeling (BIM) computer generated projects and periodic tests.

ARCH - 4304 Design Studio 2, 4.00 Credits
Prerequisite(s): ARCH 3104 with C or better or CIAT 3104 with C or better
Level: Lower
Course Fee $106.00
This course concentrates on problem-solving methods for a variety of architectural project types and sizes. Students working individually and in teams explore and document their work through sketches, study models and preliminary working drawings. The students are encouraged to develop a professional approach to investigating, analyzing and solving architectural problems. This is the second studio course and will help students in preparing for more advanced and challenging studio course work in the curriculum.

ARCH - 4900 Directed Study, 1.00 TO 4.00 Credits
Level: Lower
A student may contract for one to four credit hours of independent study through an arrangement with an instructor who agrees to direct such a study. The student will submit a plan acceptable to the instructor and to the department chairman. The instructor and student will confer regularly regarding the process of the study.

ARCH - 5306 Design Studio 3, 6.00 Credits
Prerequisite(s): ARCH 4304 with C or better and ARCH 4013 with D or better and ARCH 4014 with D or better and CIVIL 4103 with D or better
Level: Upper
Course Fee $106.00, Upper Level
This studio is designed to develop the student's ability to apply and integrate architectural principles and methods to design of buildings and spaces. The exploration and study of architectural design and technology makes connections between theory and practice through the design of buildings and environments that explore the relationship between architecture, building systems, and human experience. Students will be expected to progress through the schematic design and design development phases of short-term and extended design projects.

ARCH - 5900 Directed Study, 1.00 TO 6.00 Credits
Level: Upper
Upper Level
A student may contract for one to six credit hours of independent study through an arrangement with an instructor who agrees to direct such a study. The student will submit a plan acceptable to the instructor and to the department chairman. The instructor and student will confer regularly regarding the process of the study.

ARCH - 5901 STAR Center Civic Engagement, 1.00 Credits
Prerequisite(s): ARCH 2394 with D or better
Level: Upper
Upper Level
This course will be offered to students who want to pursue a civic engagement project through the Southern Tier Architectural Resource (STAR) Center. Each semester the program will change depending on the projects that the STAR Center receives from the public. Students will be given a "real-world" project within the Southern Tier Region to complete with an advising instructor and a client. The student should produce a final project that will be presented to the client at the end of the semester.

ARCH - 6306 Design Studio 4, 6.00 Credits
Prerequisite(s): ARCH 5306 with C or better or CIAT 5306 with C or better
Level: Upper
Applied Learning-Field Study, Course Fee $106.00, Upper Level
This course is intended to develop critical thinking and problem solving skills associated with historic building projects, guided by treatments set forth by the federal and state governments. Students will study the inherent qualities of materials and develop an understanding of their use and integration within a residential structure. The process of construction and the resulting assemblies will be graphically explored using Building Information Modeling (BIM). Emphasis will be placed on the graphic standards used in the architectural industry and developing a basic understanding of construction documents. As the course progresses, each student will apply their understanding of residential construction technology, materials and the software environment by producing a series of architectural documents. As the semester progresses, these drawings will come together as schematic development drawings, visualizing the building’s address issues of design and organization, will develop into contract documents for construction.

ARCH - 6406 Studio Sorrento, 6.00 Credits
Prerequisite(s): ARCH 5306 with C or better or CIAT 5306 with C or better
Level: Upper
Applied Learning-Int/Dom Tvl, Upper Level
Studio Sorrento is intended solely for students enrolled in the Junior Year Study Abroad Program in Sorrento, Italy. The course will be structured around the experiences, field trips and other learning opportunities during the semester of study in Italy. Particular attention will focus on elements of traditional town design, sustainable building strategies, historic building analysis, and adaptive/reuse historic structures. Student work for the semester will include: the development of a journal of site visits and analyses, photographic and metric documentation, reflective writing, and small design projects within the Sorrento environment.

ARCH - 6433 Urban Sketching & Journaling, 3.00 Credits
Level: Upper
Applied Learning-Int/Dom Tvl, Upper Level
Urban sketching and Journaling is offered to students enrolled at Sant’Anna Institute as part of the study abroad program in Sorrento, Italy. The course is designed to augment the creative environment of students experiencing the culture and visual environment of Sorrento by developing drawing skills and observational acuity. Emphasis is placed on the advanced use of drawing as an invaluable tool for seeing, learning, thinking, and communicating. Lectures are centered on the use of graphite, pen & ink, and watercolor, for observational sketching and note-taking. Lab exercises will capitalize on the unique urban environments of Sorrento and southern Italy. Students are required to keep a running journal that documents their thoughts and experiences throughout the studio experience.

ARCH - 7003 Environmental Controls 2, 3.00 Credits
Prerequisite(s): (ARCH 2123 with D or better or CIAT 2123 with D or better or ARCH 3003 with D or better ) and (ARCH 3304 with D or better or CIAT 3304 with D or better or ARCH 4014 with D or better )
Level: Upper
Upper Level
This course reinforces advanced technical and design strategies to maximize sustainability in large building designs, and their relationship to other building service systems. Emphasis will be placed on applications of photovoltaic, geothermal and wind systems in a sustainable environmental context. Qualitative and quantitative measures of building environments with a focus on efficient use of energy through integrated design practices will be employed. Other topics of discussion will include commercial building design practices related to MEP, acoustic, communication, vertical transportation, security, and fire protection systems. Case studies and projects will form the basis of instruction.

ARCH - 7306 Design Studio 5, 6.00 Credits
Prerequisite(s): ARCH 6306 with C or better or ARCH 6406 with C or better
Level: Upper
Course Fee $159.00, Upper Level
This studio focuses on the design of buildings and places in an urban setting that require an intense concentration of support systems. The course exploration and study of architectural technology, planning and principles is designed to bridge the gap between architectural theory and practice through the design of structures and places for human use and inspiration. Students will be expected to progress through the schematic design and design development phases of short-term and extended design projects. Project presentations will be held in conjunction with the studio. Other topics include commercial building design practices related to MEP, acoustic, communication, vertical transportation, security, fire protection systems. Case studies and projects will form the basis of instruction.

ARCH - 8003 Professional Practice, 3.00 Credits
Prerequisite(s): ARCH 4014 with D or better
Level: Upper
Upper Level
The context within which buildings and spaces are created is rapidly evolving as is the way in which architecture and design is practiced. This advanced course is designed to provide the future practitioner with a comprehensive study of the business and practice of architecture and design. Experience will be placed on practical skills and usable information that will enhance the student's ability to function within the design professions and/or related disciplines.

ARCH - 8306 Design Studio 6, 6.00 Credits
Prerequisite(s): ARCH 7306 with C or better or CIAT 7306 with C or better
Level: Upper
Applied Learning-Creative Work, Course Fee $159.00, Upper Level
This course requires students to conceptualize and develop a comprehensive design solution for a semester-long project that integrates sound architectural design with thorough research of site conditions, accessibility for the disabled. Emphasis is placed on the ability to make effective design decisions while generating and considering multiple options in a schedule-driven context within which buildings and spaces are created. Other learning opportunities during the semester of study in Italy. Particular attention will focus on elements of traditional town design, sustainable building strategies, historic building analysis, and adaptive/reuse historic structures. Student work for the semester will include: the development of a journal of site visits and analyses, photographic and metric documentation, reflective writing, and small design projects within the Sorrento environment.
ARCH - 8716 Design Studio 7-Thesis Defntn, 6.00 Credits
Prerequisite(s): ARCH 8306 with C or better
Level: Upper
Applied Learning-Creative Work, Course Fee $159.00, Upper Level
Thesis Defntn is the first studio course of a two-studio course sequence offered in the final year of the B.Arch. program. The coursework prepares students for the culmination of their undergraduate academic professional preparation in architecture by providing a guided framework that will encourage the student to independently discern, discourse, define, design, plan, research, manage, and successfully complete the two-studio thesis project. Significant emphasis on research, planning, and iterative investigation of a topical architecture issue frames the project in which students will work closely with a thesis committee composed of a chief faculty mentor, a secondary faculty mentor, and a volunteer member of the profession. Throughout the duration of the semester each student will complete a research plan and a significant research and precedent study that will result in a rigorous and controlled schematic design. The initial output from this course will comprise the first portion of a 2-part publication and design project that will serve as the basis for further exploration, research, and development in the ARCH 8776 course that follows in sequence. The course is structured into a communal lecture section that will encompass weekly seminar discussions, and weekly tutorials on scientific method, design process, and the iterative process. Attendant to the lecture section is a lab section that is led by the primary thesis advisor for each individual student. Periodic, interim, and final critiques are scheduled as a function of the lecture section.

ARCH - 8733 Modern Architectural Theory, 3.00 Credits
Prerequisite(s): FNAT 5003 with C or better and ( ARCH 8306 with C or better or CIAT 8306 with C or better )
Level: Upper
Upper Level
This seminar introduces the student to theories and criticisms of contemporary architecture from the beginnings of the modern period to contemporary issues. This seminar course is designed to be highly interactive and will consist of facilitated discussion, weekly writing assignments, in-class exercises and presentations. Students will have the responsibility of initiating weekly discussion of the assigned readings. In-class discourse includes discussion and analysis of the central arguments and conclusions of the theoretical constructs presented in the course made relevant to contemporary and future context of architecture. Students will prepare a series of long research papers that analyze and synthesize the arguments presented in the selected readings for the course. A brief oral presentation will accompany each research paper.

ARCH - 8753 Advanced Structural Concepts, 3.00 Credits
Prerequisite(s): CIVL 5213 with C or better
Level: Upper
Upper Level
This course addresses advanced architectural structures, exterior building envelopes and production technologies. It explores structural elements and expands to include more computer forms, materials, systems. Materials covered are: glass, steel and advanced composites. Material performance and detailing of the exterior envelope are emphasized with digital projects utilizing node based parametric programming and pattern based surface development.

ARCH - 8776 Design Studio 8-Thesis Develop, 6.00 Credits
Prerequisite(s): ARCH 8716 with C or better
Level: Upper
Applied Learning-Creative Work, Course Fee $159.00, Upper Level
This course is the capstone of the two-semester sequence of architectural design studios. Building upon the thesis research completed during the previous semester in Design Studio 7 – Studio Definition, students will initiate a design project for their thesis. They will carry out a comprehensive design development study, present their design solution to a panel of faculty and visiting professionals, and defend the decision making process that gave rise to their design. The student is expected to show competence and care in their technological solutions and in the creation of a lively, efficient, and contextually appropriate structure.

ARCH - 8793 Professional Development, 3.00 Credits
Prerequisite(s): ARCH 8003 with C or better or CIAT 8003 with C or better
Level: Upper
Upper Level
This comprehensive course will enhance the student’s exposure to the architect’s professional role based on case studies of real-world experiences. It expands upon previously introduced architectural business practices such as marketing, responding to client requests for services, assembling project teams, working with the appropriate consultants, and delivering a project, all within financial constraints of both project and business management. The changing role of the architect in nontraditional practice types and project delivery methods will also be explored. Throughout the course, professional written, verbal and graphic communication skills will be emphasized in relation to their importance in the business setting.

ASDC - 1201 Structured Learning-Soc Scien*, 1.00 Credit
Level: Remedial
Pass/Fail, Remedial
This course is supplemental instruction and recitation for students who need more structured study and development time, taught by faculty, professional tutor, and/or student success staff. The instructor develops additional review problems to match homework and topics of need while study skills, specific to discipline, are integrated. This course will coincide with and compliment a student’s registered course (e.g. history, psychology, criminal justice). This course will be graded Pass/Fail.

ASDC - 1301 Structured Learning-Eng Tech, 1.00 Credit
Level: Remedial
Pass/Fail, Remedial
This course is supplemental instruction and recitation for students who need more structured study and development time, taught by faculty, professional tutor, and/or student success staff. The instructor develops additional review problems to match homework and topics of need while study skills, specific to discipline, are integrated. This course will coincide with and compliment a student’s registered course (e.g. civil, mechanical, architecture). This course will be graded Pass/Fail.

ASDC - 1401 Structured Learning-Science*, 1.00 Credit
Level: Remedial
Pass/Fail, Remedial
This course is supplemental instruction and recitation for students who need more structured study and development time, taught by faculty, professional tutor, and/or student success staff. The instructor develops additional review problems to match homework and topics of need while study skills, specific to discipline, are integrated. This course will coincide with and compliment a student’s registered course (e.g. microcomputer applications, computer programming). This course will be graded Pass/Fail.

ASDC - 1971 Structured Learning-Math*, 1.00 Credit
Level: Remedial
Pass/Fail, Remedial
This course is supplemental instruction and recitation for students who need more structured study and development time, taught by faculty, professional tutor, and/or student success staff. The instructor develops additional review problems to match homework and topics of need while study skills, specific to discipline, are integrated. This course will coincide with and compliment a student’s registered course (e.g. college algebra, calculus, statistics). This course will be graded Pass/Fail.

ASDC - 1901 Structured Learning-English*, 1.00 Credit
Level: Remedial
Pass/Fail, Remedial
This course is supplemental instruction and recitation for students who need more structured study and development time, taught by faculty, professional tutor, and/or student success staff. The instructor develops additional review problems to match homework and topics of need while study skills, specific to discipline, are integrated. This course will coincide with and compliment a student’s registered course (e.g. composition, literature). This course will be graded Pass/Fail.

ASDC - 1901 Structured Learning-Math*, 1.00 Credit
Level: Remedial
Pass/Fail, Remedial
This course is supplemental instruction and recitation for students who need more structured study and development time, taught by faculty, professional tutor, and/or student success staff. The instructor develops additional review problems to match homework and topics of need while study skills, specific to discipline, are integrated. This course will coincide with and compliment a student’s registered course (e.g. college algebra, calculus, statistics). This course will be graded Pass/Fail.

ASDC - 2101 Career Exploration & Planning*, 1.00 Credit
Level: Remedial
Pass/Fail, Remedial
This course will assist students with exploring and selecting a college major and/or career goal. The students will learn a decision-making model designed to make appropriate, well-informed career/life choices. The students will engage in a variety of assessments using software programs and self-directed career exploration. Students will complete out of class assignments designed to integrate self-awareness with career options and will develop their own marketing materials such as resumes, cover letters, and career portfolios. This is a pass/fail course.

ASDC - 2102 Career Explorat & Planning II, 1.00 Credit
Level: Lower
Pass/Fail, Remedial
This course will assist students with exploring and selecting a college major and/or career goal. The students will learn a decision-making model designed to make appropriate, well-informed career/life choices. The students will engage in a variety of assessments using software programs and self-directed career exploration. Students will complete out of class assignments designed to integrate self-awareness with career options and will develop their own marketing materials such as resumes, cover letters, career portfolios. This is a pass/fail course.

ASDC - 2103 Intro to Academic Literacy, 3.00 Credits
Level: Lower
This course focuses on the continued improvement of literacy skills - reading comprehension skills, reading efficiency and flexibility, critical thinking, development of a college-level vocabulary, and the grammar, writing, and study skills needed for success with college course work. Students may be placed in this course on the basis of their placement test scores or may take it as an elective to expand their basic literacy skill levels.

ASDC - 2900 Directed Study, 1.00 TO 4.00 Credits
Level: Lower
A student may contract for one to four credit hours of independent study through an advisor for each individual student. Periodic, interim, and final critiques are scheduled as a function of the lecture section.
AUTO - AUTOMOTIVE

AUTO - 1109 Brakes, Steering & SUS Sys, 9.00 Credits
Level: Lower
Applied Learning-Practicum
This course is designed to train students in the service and diagnosis of: automotive brake systems, suspension systems, vehicle alignment, tire changing, tire balancing, and vibration diagnosis.

AUTO - 1124 Automotive Welding, 4.00 Credits
Level: Lower
Applied Learning-Practicum, Course Fee $66.00
This course covers all facets of welding as they apply to the servicing of cars and light trucks. Methods covered are: SAW, GTAW, and GMAW. The safe use of the cutting torch and plasma cutter and "booth time" is supplemented by the use of various processes in the actual repair of vehicles and equipment. The students are required to do outside research for a written and oral report.

AUTO - 1135 AutoBsc Elect & Comput overlh, 5.00 Credits
Level: Lower
Applied Learning-Practicum
This course includes the construction and testing of electronic circuits, alternators, and starters. The student will also use Ohm's Law to calculate voltage drop, current and resistance in electrical circuits. Air bag, power window motor and door power lock actuator testing and diagnosis will be investigated.

AUTO - 1149 Inspect, Main, AC Htg & Clng, 9.00 Credits
Level: Lower
Applied Learning-Practicum
This course includes lecture and lab instruction on the diagnosis and repair of automotive cooling, heating, and air conditioning systems. In addition automotive preventive maintenance, exhaust system service, and annual safety inspection checks are also covered.

AUTO - 1169 Auto Electric, Fuel & Emission, 9.00 Credits
Level: Lower
Applied Learning-Practicum
This course begins with instruction on basic electrical theory and progresses through the operation and diagnosis of many of the advanced electrical and electronic systems used on modern vehicles. Topics covered include: basic electrical theory, circuit design, common electrical components, fuel, ignition, emission control and electronic engine controls systems.

AUTO - 1219 Truck Brake, Steer & Sus Sys, 9.00 Credits
Level: Lower
Applied Learning-Practicum
This course is designed to train students in the service and diagnosis of: automotive brake systems, suspension systems, vehicle alignment, tire changing, tire balancing, and vibration diagnosis.

AUTO - 1224 Welding, 4.00 Credits
Level: Lower
Applied Learning-Practicum, Course Fee $67.00
This course covers all facets of welding as they apply to the servicing of cars and light trucks. Methods covered are: SAW, GTAW, and GMAW. The safe use of the cutting torch and plasma cutter and "booth time" is supplemented by the use of various processes in the actual repair of vehicle and equipment. The students are required to do outside research for a written and oral report.

AUTO - 1239 Trk Ins, Maint, AC, Clng/Htg, 9.00 Credits
Level: Lower
Applied Learning-Practicum
This course includes lecture and lab instruction on the diagnosis and repair of automotive cooling, heating, and air conditioning systems. In addition automotive preventive maintenance, exhaust system service, and annual safety inspection checks are also covered.

AUTO - 1245 Trk Bsc Electms & Cmptn Ovrhl, 5.00 Credits
Level: Lower
Applied Learning-Practicum
This course includes the construction and testing of electronic circuits, alternators, and starters. The student will also use Ohm's Law to calculate voltage drop, current and resistance in electrical circuits. Air bag, power window motor and door power lock actuator testing and diagnosis will be investigated.

AUTO - 1306 Rust Repair, 6.00 Credits
Level: Lower
Applied Learning-Practicum
Encompasses the causes, repair, and prevention of rust formation and develops an awareness in the student that it is his/her ethical duty to make rust repairs properly and economically.

AUTO - 1313 Wrecker Operation & Estimating, 3.00 Credits
Level: Lower
Applied Learning-Practicum
This course provides instruction and practical experience in wrecker operation including hook-ups, winching, dolly use, wheel lifts, and safety. It includes instruction and practical experience in auto body damage estimate writing and analysis.

AUTO - 1326 Body Welding, 6.00 Credits
Level: Lower
Applied Learning-Practicum, Course Fee $87.00
This course covers welding methods used for securing body sheet metal including the thinner, high-strength, low alloy steels. Some of the methods covered in depth are: oxy-acetylene, MIG, and TIG welding. Emphasis is placed on proficiency in repairing steels found in panels and vehicle frames, the use of heat as a straightening medium is investigated, and choosing welding equipment for a body shop, sheet metal fabrication and fuel tank repairs are included.

AUTO - 1343 Refinishing Basics, 3.00 Credits
Level: Lower
Applied Learning-Practicum, Course Fee $106.00
Develops in the student the basic skills of the refinishing industry and provides the technical knowledge of different types of finishes as well as the sequence of foundation coats.

AUTO - 1344 Recondtnng & Mechanci Compnts, 4.00 Credits
Level: Lower
Applied Learning-Practicum
Designed to acquaint trainee with the proper process of reconditioning a vehicle before customer delivery. Students will learn how to remove and install seat upholstery as well as interior trim panels and hardware.

AUTO - 2169 Truck Electrical, Fuel & Emiss, 9.00 Credits
Level: Lower
Applied Learning-Practicum
This course begins with instruction on basic electrical theory and progresses through the operation and diagnosis of many of the advanced electrical and electronic systems used on modern vehicles. Topics covered include: basic electrical theory, circuit design, common electrical components, fuel, ignition, emission control and electronic engine controls systems.

AUTO - 2309 Brakes, Sus & Structrl Anlys, 9.00 Credits
Level: Lower
Applied Learning-Practicum
This unit of instruction is designed to train high school graduates and adult learners in the service and diagnosis of automotive brake and suspension systems as they relate to collision repair. Vehicle alignment, tire balancing, and vibration diagnosis are included. Students will be trained to operate a variety of brake, suspension, and alignment equipment while performing actual repairs, adjustments, and diagnosis. In addition, identification and analysis of structural damage, as well as frame and body measuring techniques are covered. This training will supplement the students' autobody education in preparation for entry-level employment.

AUTO - 2365 Chassis Electrical, 5.00 Credits
Level: Lower
Applied Learning-Practicum
This course includes the construction and testing of electronic circuits, alternators, and starters. The student will also use Ohm's Law to calculate voltage drop, current and resistance in electrical circuits. Air bag, power window motor and door power lock actuator testing and diagnosis will be investigated.

AUTO - 2369 Prev Maint for Hvy Tk & Diesel, 3.00 Credits
Level: Lower
Applied Learning-Practicum
This course is designed to teach the student the formulas and concepts of race car brakes and the importance of brakes in the overall efficiency of a vehicle. The student will learn how to use Ohm's Law to calculate voltage drop, current and resistance in electrical circuits. Air bag, power window motor and door power lock actuator testing and diagnosis will be investigated.

AUTO - 3409 Engine Service, 9.00 Credits
Level: Lower
Applied Learning-Practicum
Theory of operation and repair procedures of gasoline engine valve systems, crankshaft and bearings, connecting rods, cylinders, and pistons, diagnosis of engine malfunctions, repair procedures, cooling system repairs and diagnosis, cylinder boring, piston pin fitting, connecting rod reconditioning, valve guide resizing and replacing, valve seat replacement, and other machine work and service procedures.

AUTO - 3429 Adv Electr & Engine Perfmcn, 9.00 Credits
Level: Lower
Applied Learning-Practicum
Lecture sessions cover most areas of the automobile except engine and drive train repairs. Designed to update and bring together earlier training with emphasis on diagnosing sophisticated automotive electrical, drivability and emission-related problems. This is an extremely critical area with enhanced inspection programs and OBDII systems.

AUTO - 3504 Motorsport Fabrication I, 4.00 Credits
Level: Lower
Applied Learning-Practicum, Course Fee $138.00
This course is designed to teach the student the fundamental skills of complete chassis and roll cage fabrication. Major topics include principles of layout, bending, bead rolling, riveting and welding procedures. Laboratory exercises emphasize technique and skill development to build race cars.

AUTO - 3506 Introduction to Motorsports, 6.00 Credits
Level: Lower
Applied Learning-Practicum
This course is designed to teach the student the fundamental skills of team organization and management. Major topics include introduction to motor sports, team structure, budgeting and finance. Laboratory exercises emphasize technique and skill development for success at the track. A sponsorship proposal is developed by each student.

AUTO - 3514 Racing Suspension Dynamics, 4.00 Credits
Level: Lower
Applied Learning-Practicum
This course is designed to teach the student advanced skills in race car chassis. Major topics include principles of suspension set-up, development and weight transfer. Laboratory exercises emphasize technique and skill development in modified suspension and steering geometry to build race cars to meet different track demands.

AUTO - 3524 Hgh Prfmnce Tune-up/Electrns, 4.00 Credits
Level: Lower
Applied Learning-Practicum
This course is designed to teach the student the advanced skills of tuning the race car for optimum performance at the track. Major topics include principles of handling modified race fuels and modified delivery. Laboratory exercises emphasize techniques and skills to modify fuel and ignition systems.

AUTO - 3534 Hgh Permnce Srrng/Bks/Chasis, 4.00 Credits
Level: Lower
Applied Learning-Practicum
This course is designed to teach the student the formulas and concepts of race car brakes and the importance of brakes in the overall efficiency of a vehicle. The student will learn how to use Ohm's Law to calculate voltage drop, current and resistance in electrical circuits. Air bag, power window motor and door power lock actuator testing and diagnosis will be investigated.
AUTO - 3535 High Perf Mnc Engine Building, 5.00 Credits
Level: Lower
Applied Learning-Practicum
This course is designed to teach the student the advanced skills for reconstruction of high performance engines. Advanced topics include modified engine building and dynamometer testing. Laboratory exercises emphasize technique and skill development in engine assembly and dynamometer testing.

AUTO - 3545 Motorsports Aerodynamics, 4.00 Credits
Level: Lower
Applied Learning-Practicum
This course is designed to teach the student the fundamental principles of aerodynamics for racing and performance cars. Major topics include principles of aerodynamic effects on braking, handling, lift and drag coefficient. Laboratory exercises emphasize technique and skill development to build race cars.

AUTO - 3609 Heavy Duty Drive Train, 9.00 Credits
Level: Lower
Applied Learning-Practicum
This course consists of the service and repair of heavy duty clutches, transmissions, drive line and rear axle, leaf, torsion bar, and air suspensions, the alignment of front and rear axle, also alignment of trailer suspension and on-vehicle tire balancing. This will include Eaton and Meritor clutches, Mack and Eaton transmissions, and Meritor, Eaton and Mack rear axles. Also covered are Road Ranger auto shift transmissions.

AUTO - 3623 Air Brake Service, 3.00 Credits
Level: Lower
Applied Learning-Practicum
This course consists of maintenance and repair of air brake systems including compressors, valves, tubing, and circuity. This course will also include troubleshooting of foundation brakes and related components. Also covered is air ABS brake components, operation and troubleshooting.

AUTO - 3649 Diesel Engine Service, 9.00 Credits
Level: Lower
Applied Learning-Practicum
This nine credit hour course covers the procedures needed to understand, test, repair, and overhaul diesel engines and their related components. Major emphasis is placed on the mid-range and heavy duty diesels of the following makes: Cummins, Caterpillar, Detroit Diesel, Mack, John Deere, and Navistar. Covered is the use of special tools and equipment necessary to troubleshoot, maintain, and overhaul these engines and their related components.

AUTO - 3809 Inspec, Gen Alignment & AC, 9.00 Credits
Level: Lower
Applied Learning-Practicum
Includes lab application of body panel alignment and mandated annual safety inspection repair techniques to insure customer satisfaction with component fit and operation, keeping customer safety in mind when components are replaced, and techniques to insure customer comfort and engine efficiency through control of heat as they apply to auto cooling, heating and air conditioning systems.

AUTO - 3819 Auto Body Skls/Computrzed Est, 9.00 Credits
Level: Lower
Applied Learning-Practicum, Course Fee $106.00
Includes the different states of repair: metal analysis, metal straightening, filling and metal finishing, glass replacement, alignment problems, fender and door replacement, any and all small, quick, one or two day jobs. Also includes how to make manual and computerized estimates.

AUTO - 4383 Heavy Duty Elec/Hydr Special, 3.00 Credits
Level: Lower
Applied Learning-Practicum
This three credit hour course consists of the service and troubleshooting of electrical systems as they pertain to heavy equipment, truck and diesel. This will include series parallel circuits including 12 and 24 volt systems. Included in this course is the service and troubleshooting of hydraulic systems as found in heavy equipment, truck and diesel. This will include pumps, valves, actuators, accumulators and other related components in today's hydraulic systems.

AUTO - 4439 Shop Management & Enhanced Sys, 9.00 Credits
Level: Lower
Applied Learning-Practicum
This course will provide insight into other aspects of the automotive trade. Covered in shop management is repair order writing, duties of a shop adviser, customer relations, customer communications, questioning and follow-up, estimating repair costs, checking for recalls, searching for technician service bulletins, researching new product information, motorist's bill of rights, lemon laws and understanding the nature of the automotive business and reviewing Hybrid vehicles information. The lab portion allows the student to perform as a service manager in one of our many automotive shops. Work scheduling, quality control, maintenance, and record keeping are stressed as part of this program.

AUTO - 4449 Drive Train Service, 9.00 Credits
Level: Lower
Applied Learning-Practicum
Study and actual repair of standard, automatic, and automatic transmissions and transaxles with emphasis on overdrive and electronically controlled units. Full coverage of clutches, axles, drivelines, C-V joints, and 4 x 4 transfer cases, as well as open, limited-slip, and front drive differentials. Extensive hands-on work in a busy "line shop" situation. This is a seven and one-half (7 1/2) week course.

AUTO - 4603 Heavy Duty Electrical Systems, 3.00 Credits
Level: Lower
Applied Learning-Practicum
This course covers the service and troubleshooting of electrical equipment pertaining to heavy equipment, truck, and diesel. This will include 12-48 volt electrical systems, multiplexing, GPS guidance, and traction motors.

AUTO - 4613 Heavy Duty Hydraulic Systems, 3.00 Credits
Level: Lower
Applied Learning-Practicum
This course consists of the service and troubleshooting of hydraulic systems pertaining to heavy equipment, truck and diesel. This will include operation of open center and closed center systems, pumps, valves, actuators, accumulators, and the relation of electrical multiplexing and today's hydraulic systems. This course will also include preventative maintenance of hydraulic systems.

AUTO - 4623 Heavy Duty HVAC, 3.00 Credits
Level: Lower
Applied Learning-Practicum
This course consists of the service and troubleshooting of HVAC (Heating Ventilation & Air Conditioning) as they pertain to heavy equipment, truck and refrigeration trailers for commercial usage. This will include MACS (Mobile Air Conditioning Society) certification review and testing for a national recognized Section 609 certification and basic HVAC systems used in refrigeration trailers.

AUTO - 4629 Major Refinishing, 9.00 Credits
Level: Lower
Applied Learning-Practicum
This course is designed to further the student's knowledge and practical experience in the use of painting and refinishing equipment, blending paints, metallic finishes, and hard to match colors, correcting paint fails, custom refinishing and how to solve their problems.

AUTO - 4639 Major Collision Repair, 9.00 Credits
Level: Lower
Applied Learning-Practicum
Provides instruction in the repair procedures of vehicles considered by appraisers to be totals, or near totals. Study and repair of frame and uni-body damage, suspension repairs. This includes computerized measuring systems, plastic welding, use of structural adhesives, and complete vehicle refinishing.

AUTO - 4669 Diesel Fuel System Service, 9.00 Credits
Level: Lower
Applied Learning-Practicum
This nine credit hour course is intended for heavy equipment, truck and diesel mechanic majors. Coverage will include the fundamentals of diesel fuel systems, both mechanical and computer controlled. Engine tune up procedures, and diesel fuel system troubleshooting and computer usage will be included. Injection pumps, governors, injectors, emission control devices, automatic advance units and transfer pumps of the following systems will be covered: American Bosch, Caterpillar, Detroit Diesel, Cummins and Navistar.

BIOL - BIOLOGY

BIOL - 1013 Essentials of Exercise Physiol, 3.00 Credits
Level: Lower
Gen Ed - Natural Sciences, Liberal Arts and Science
This is an internet-based course intended for both science and non-science majors covering the basic study of exercise physiology. Topics include the role of nutrition in energy-producing pathways and human growth and development; nutritional and common pharmaceutical aids used to support and enhance exercise and athletic performance; study of metabolic production of energy and its application in the human capacity for work; and study of select body systems and the principles of exercise training with resultant physiological adaptations that could be expected from such training. The course concludes with a study of the role of exercise in the maintenance of health and the prevention of disease.

BIOL - 1101 Topics in General Biology, 1.00 Credit
Corequisite(s):
Level: Lower
A one-credit hour course to supplement the General Biology (BIOL 1104) course for biology majors. The format of the course is to expand on topics discussed during the lecture/laboratory portions of BIOL 1104 and to discuss current topics of interest to biology students. The format of the course is reading and discussion. Each participant will be responsible for being a discussion leader at least once during the semester. The discussion leader's role is to introduce the topic, provide background information about the subject, and encourage the group to ask questions and ask questions. Topics for discussion may be directly related to lecture material or may originate from current media sources, as long as that topic was already introduced in the BIOL 1104 class lecture or lab and the students have some familiarity with the subject.

BIOL - 1104 General Biology I, 4.00 Credits
Level: Lower
Applied Learning-Other, Course Fee $20.00, Gen Ed - Natural Sciences, Liberal Arts and Science
This course incorporates a survey of molecular, cellular, and hereditary principles. Topics include the chemistry and physics of cellular activities; the ultra-structure of cells, photosynthesis and cellular metabolism; the structure and function of DNA; recent developments in DNA bio-technology; and the basic aspects of genetic principles.

BIOL - 1113 Biology of Human Sexuality, 3.00 Credits
Level: Lower
Gen Ed - Natural Sciences, Liberal Arts and Science
This internet-based course studying human sexuality, approaches the subject from the perspective of health and the discipline of biology, with attention given to the historical and contemporary perspectives concerning the topic. Reproductive anatomy is examined, along with the physiological response of sexual arousal. The events of fertilization, pregnancy and childbirth are studied along with examples of the contraceptives used to prevent it. Puberty and sexual development is considered and the role of biology is examined in the areas of gender, sexuality, attraction and love. The course concludes with an overview of common sexual difficulties, a study of sexually transmitted diseases and defines the act of rape and sexual assault.

<tbody>
<tr>
<td>BIOL - 1114</td>
<td>Human Anat &amp; Physiology I</td>
<td>4.00</td>
<td>Lower</td>
<td>Gen Ed - Natural Sciences, Liberal Arts and Science</td>
<td>This is a lecture and lab-based online course that is the first in a two-semester sequence, including laboratory components, that covers the structure and function of the human body. The general study covers the organization, covering, support, and movement of the body. Topics include an orientation to the human body, chemistry of life, cells and tissues, and the integumentary, musculoskeletal, nervous, and sensory systems.</td>
</tr>
<tr>
<td>BIOL - 1113</td>
<td>Marine Biology</td>
<td>3.00</td>
<td>Lower</td>
<td>Applied Learning Inti/Dom Trvl, Liberal Arts and Science</td>
<td>This course focuses on the biology of organisms residing in the sea, from the diversity of planktonic communities to marine megafauna, taking into consideration the ecological principles that govern marine life. The course aims to provide a solid educational background in basic and applied marine biology. Emphasis will be placed on marine environment issues and the adaptive and evolutionary mechanisms of organisms that allow them to occupy marine habitats. In particular, this course will provide an overview of unique ecosystems and a nearby renowned marine research institute to conduct field trips and practical tutorials.</td>
</tr>
<tr>
<td>BIOL - 1233</td>
<td>Introduction to Forestry</td>
<td>3.00</td>
<td>Lower</td>
<td>Applied Learning-Field Study, Course Fee $3.00, Gen Ed - Natural Sciences, Liberal Arts and Science</td>
<td>This course is designed to familiarize students with the sustainable management of New York hardwood forests. Students are introduced to the history of forests and forestry practices in North America and New York State, as well as basic tree biology, silvicultural systems, and forest management. Major emphases are placed on practical management strategies for maintaining and developing wood lots and farm forests for a variety of desired outcomes, including timber, fuel, assimilation, erosion control, and wildlife habitat. The financial aspects of various woodlot strategies are also discussed. As part of the practical component of the course, students will be required to complete a detailed forest management plan.</td>
</tr>
<tr>
<td>BIOL - 1304</td>
<td>Botany</td>
<td>4.00</td>
<td>Lower</td>
<td>Applied Learning-Other, Course Fee $10.00, Gen Ed - Natural Sciences, Liberal Arts and Science</td>
<td>Each of us is intimately involved with plants. We wear them, ingest them, exchange gas molecules with them, live under them, etc. In this course students will develop knowledge of plant morphology (form) and function that later enhances their lives. Topics include the study of human food, ornamental plants, feed, forestry, and any other use of plants to sustain life on the planet Earth or provide other ecosystem services. The laboratory portion of the course includes field ecology and classification of important plant groups in addition to morphological and anatomical study of the major plant organs. Use of the laboratory, the college farm, field trips, and the plant science greenhouse integrates various teaching methods for the above subjects.</td>
</tr>
<tr>
<td>BIOL - 1313</td>
<td>Nutrition</td>
<td>3.00</td>
<td>Lower</td>
<td>Gen Ed - Natural Sciences, Liberal Arts and Science</td>
<td>This course is intended for both the science and non-science major. Coverage will include the fundamental biochemical aspects of the essential nutrients and their effects when consumed in less than recommended or excessive amounts. These nutritional facts will help answer some of the questions brought forward concerning the relationship between food and health, diet control, preservatives, cancer, athletic performance, vegetationism, pregnancy and lactation, just to name a few. Beyond these facts will be the understanding of the non-nutrient characteristics of food as related to culture, family and society. Most importantly, this course will present the tools necessary to properly evaluate the purchase and preparation of nutritious foods via personal assessment.</td>
</tr>
<tr>
<td>BIOL - 1404</td>
<td>Anatomy &amp; Physiology I</td>
<td>4.00</td>
<td>Lower</td>
<td>Applied Learning-Other, Course Fee $12.00, Gen Ed - Natural Sciences, Liberal Arts and Science</td>
<td>This course is the study of the gross and microscopic anatomy of various human systems, emphasizing how structure facilitates function. The areas emphasized are: basic anatomical and directional terminology; fundamental concepts and principles of cell biology; histology; the integumentary system; the nervous system and special senses; the skeletal system; and the muscular system.</td>
</tr>
<tr>
<td>BIOL - 2024</td>
<td>General Biology II</td>
<td>4.00</td>
<td>Lower</td>
<td>Applied Learning-Other, Course Fee $15.00, Gen Ed - Natural Sciences, Liberal Arts and Science</td>
<td>A continuation of BIOL 1104 (General Biology I), with emphasis on animal and plant systematics, evolution and ecology. Laboratory topics include the study of the following mammalian organ systems: digestion, respiration, circulation, homeostasis, reproduction, chemical and nervous control, and musculoskeletal system and function. Lecture topics include systematics, evolution, ecosystems, and biogeography, including human impacts on the environment.</td>
</tr>
<tr>
<td>BIOL - 2214</td>
<td>Human Anat &amp; Physiology II</td>
<td>4.00</td>
<td>Lower</td>
<td>Liberal Arts and Science</td>
<td>The second in a two-semester Internet-based course sequence, including laboratory components, that covers the structure and function of the human body. General issues include the maintenance of the human body, pregnancy, human development and heredity. Topics include the endocrine, cardiovascular, lymphatic, immune, respiratory, digestive, urinary, and reproductive body systems.</td>
</tr>
<tr>
<td>BIOL - 2301</td>
<td>Human Biology Laboratory</td>
<td>1.00</td>
<td>Lower</td>
<td>Applied Learning-Other, Course Fee $24.00, Liberal Arts and Science</td>
<td>This course is a group of laboratory exercises to aid in the study of human systems and their physiology. The laboratory sessions are designed to provide students with a basic understanding of the structure and functions of cells, tissues, and organ systems. The goals of the course are to promote an appreciation for the remarkable complexity of our bodies, to develop a proficiency in the use of laboratory equipment and the proper handling of materials, and to foster the development of self-sufficiency in the conduct of laboratory experiments and observations. This course is to be taken either concurrent with, or following completion of, BIOL 2303.</td>
</tr>
<tr>
<td>BIOL - 2303</td>
<td>Human Biology</td>
<td>3.00</td>
<td>Lower</td>
<td>Gen Ed - Natural Sciences, Liberal Arts and Science</td>
<td>An introductory study of human systems and their physiology. Included in the course are examination of the function of the cells, musculoskeletal, nervous, integration, sensory, and reproductive systems. Topics will include basic chemistry, cell structure and biochemistry, digestion, circulation and blood, immunity, respiration, excretion, nervous integration, senses, endocrine system, and reproduction. Sexually transmitted diseases also will be discussed. Students cannot receive credit for BIOL 2301 or BIOL 2303 concurrently or previously taken.</td>
</tr>
<tr>
<td>BIOL - 2504</td>
<td>Anatomy &amp; Physiology II</td>
<td>4.00</td>

</table>
BIOL - 4254 General Microbiology, 4.00 Credits
Level: Lower
Applied Learning-Other, Course Fee $29.00, Gen Ed - Natural Sciences, Liberal Arts and Science

This course is designed to provide an introductory survey to the various microorganisms, prions, viruses, bacteria, protozoans, and multicellular parasites, their structures, physiology, identification, with the various medical and non-medical implications in our daily lives. Lecture topics include prokaryotic cell structure and function, biochemical processes, physical and chemical factors that affect cell growth, classification and identification, and physical and chemical methods of control. A major portion of the course deals with the pathogenic properties of microorganisms and the body’s defense mechanisms including the functions of the immune systems. Laboratory topics include bacterial culture and staining, metabolism and biochemical reactions, physiological characteristics, patient specimen collection and processing as done in a microbiology laboratory and pathogen identification and antibiotic sensitivity determination.

BIOL - 4403 Pathophysiology, 3.00 Credits
Prerequisite(s): BIOL 2504 with C or better * or BIOL 2214 with C or better *
Level: Lower
Gen Ed - Natural Sciences, Liberal Arts and Science

This is a lecture-based online course that includes the study of disruptions of normal physiology, processes that bring about these disruptions, and various ways in which the disruptions manifest themselves as symptoms, signs, physical findings, and laboratory findings. The course will explore the pathophysiology of genetic diseases, hypersensitivity and autoimmune diseases, infectious diseases, neoplasia, diseases due to physical and chemical agents, disturbances of fluid and electrolyte balance, and endocrine dysfunction.

BIOL - 5003 Genomics, 3.00 Credits
Prerequisite(s): BIOL 6534 with D or better
Level: Upper
Applied Learning-Practicum, Liberal Arts and Science, Upper Level

This is a project-based-learning course that will introduce the students to the emerging science of genomics and its implications for human biology, medicine, social policy and individual life path choices in the 21st century. Our genome is the blueprint that encodes all the information we need to develop from a single cell into a hugely complicated functional organism. This course will instruct students how to use bioinformatics tools to analyze genes and their expression. The course will explore techniques used to study genomes, what information is available, and how this information is used to understand how organisms differ or match; how different organisms evolved; how the genome is constructed and how it operates. In addition the course will examine genome structure and function in terms of our future health and wellbeing. The laboratory portion of the course will enable students to use bioinformatics tools to annotate genes from the bacterium Kytococcus sedentarius and to participate in a DNA Barcoding project to catalog living organisms such as http://www.studentdnabarcoding.org/.

BIOL - 5013 Biotechniques, 3.00 Credits
Prerequisite(s): ( CHEM 2984 with D or better or CHEM 2124 with D or better ) and BIOL 2204 with D or better
Level: Upper
Applied Learning-Practicum, Course Fee $152.00, Liberal Arts and Science, Upper Level

This course focuses on the development of advanced practical skills, competencies, and knowledge in laboratory techniques commonly used across the biological sciences in research and industry. It is based on a full “hands on” approach where all students will have the opportunity to work with different organisms and techniques derived primarily from the areas of DNA technology, cellular biology, protein analysis and tissue preparation. This course requires the student to use appropriate professional laboratory protocols that will lead to advanced study and employment.

BIOL - 5223 Ecology, 3.00 Credits
Prerequisite(s): ( BIOL 1104 with D or better and BIOL 2204 with D or better ) or ( BIOL 1304 with D or better and BIOL 2204 with D or better )
Level: Upper
Liberal Arts and Science, Upper Level

The course will analyze the biotic and abiotic factors that influence or limit distributions of organisms. Emphasis will be placed on population and community biology, including evolution, genetics, behavior, models of population growth, species interactions and community structure. Metabolic and energy relationships at the ecosystem level will also be explored. Examples will be drawn from all Domains and Kingdoms of organisms. Students will be required to evaluate the role of a specific “Keystone” species in an ecosystem and how the loss of that species impacts biodiversity in the ecosystem.

BIOL - 5254 Principles of Microbiology, 4.00 Credits
Prerequisite(s): ( BIOL 2204 with C or better or BIOL 2504 with C or better ) or ( VETS 2013 with C or better or VETS 2023 with C or better or VETS 1203 with C or better or BIOL 1214 with D or better ) or ( BIOL 1104 with C or better or BIOL 1404 with C or better )
Level: Upper
Applied Learning-Other, Course Fee $26.00, Liberal Arts and Science, Upper Level

A survey of microorganisms, their structures, physiology, and identification, with the various medical and non-medical implications in our daily lives. Topics include prokaryotic cell structure and function, biochemical processes, physical and chemical factors that affect cell growth, classification and identification, and physical and chemical methods of control. A major portion of the course deals with the pathogenic properties of microorganisms and the body’s defense mechanisms including the functions of the immune systems. Laboratory topics include bacterial culture and staining, metabolism and biochemical reactions, physiological characteristics, patient specimen collection and processing as done in a microbiology laboratory and pathogen identification and antibiotic sensitivity determination.

BIOL - 5900 Directed Study, 1.00 TO 6.00 Credits
Level: Upper
Applied Learning-Practicum, Liberal Arts and Science, Upper Level

A student may contract for one to six credit hours of independent study through an arrangement with an instructor who agrees to direct such a study. The student will submit a plan acceptable to the instructor and to the department chairperson. The instructor and student will confer regularly regarding the progress of the study.

BIOL - 6003 Molecular and Cell Biology, 3.00 Credits
Prerequisite(s): BIOL 6534 with D or better
Level: Upper
Liberal Arts and Science, Upper Level

This course will provide a firm foundation on the principles of modern molecular and cellular biology. The first half of the course will focus on the molecular structure and function of DNA, RNA and proteins and the tenets of the central dogma of molecular biology. The second half of the course will focus on the fundamental processes that enable cells to grow, move, and communicate as well as introduce the processes underlying tissue formation and cell death. During recitation the students will read and analyze primary journal articles, create a short oral presentation on a topic and submit a short “News and Views” article written for a general audience.

BIOL - 6113 Diet and Disease, 3.00 Credits
Prerequisite(s): ( BIOL 1313 with D or better or HLTH 1313 with D or better ) and ( BIOL 2504 with D or better or BIOL 2214 with D or better )
Level: Upper
Liberal Arts and Science, Upper Level

This course is an in depth exploration of the cause and effect relationship between diet and common diseases. The course will examine nutritional epidemiology, nutritional intervention and the research that substantiates both. The relationship of nutrition to common maladies, such as: obesity, diabetes mellitus and cancer, will be compared. Additionally, specifically disease processes will be evaluated from a nutritional perspective, including: neurodegenerative, cardiovascular, gastrointestinal and bone disease. The course will conclude by determining the nutritional and dietary factors necessary for proper healing and recovery.

BIOL - 6403 Advanced Pathophysiology, 3.00 Credits
Prerequisite(s): BIOL 2504 with D or better or BIOL 2214 with D or better
Level: Upper
Liberal Arts and Science, Upper Level

This internet-based course examines abnormal human physiology in a clinical context, with intent to develop specific intellectual skills related to nursing and other allied health professions. Pathophysiology is considered from a systemic perspective, with emphasis given to cellular abnormalities, disruptions of homeostasis, infectious disease, inflammation, and disorders of the blood, immune, cardiovascular, respiratory, digestive, endocrine, neurological, musculoskeletal, integumentary, renal, genitourinary, and reproductive systems. The course concludes with case study presentations to allow students to derive and discuss correlations among clinical healthcare or other related disciplinary settings.

BIOL - 6534 Genetics, 4.00 Credits
Prerequisite(s): BIOL 1104 with C or better or BIOL 1304 with C or better or BIOL 1404 with C or better or VETS 1214 with C or better
Level: Upper
Applied Learning-Other, Course Fee $104.00, Liberal Arts and Science, Upper Level

A study of heredity and the gene from the perspective of the individual, the cell, and the population. The human species will be emphasized along with recent advances in biotechnology. Laboratory work includes Drosophila breeding, polymerase chain reaction, and DNA electrophoresis.

BIOL - 7723 Research Methods in Health Sci, 3.00 Credits
Prerequisite(s): BIOL 2204 with C or better and CHEM 4524 with C or better
Level: Upper
Liberal Arts and Science, Upper Level

This course familiarizes the student with laboratory protocols, safety, and experimental design. It covers searching for, reading, writing, and presenting scientific literature. Students also learn skills for exploring and obtaining careers in the health professions.

BLCT - BUILDING CONSTRUCTION

BLCT - 1002 Intro to Construction Safety, 2.00 Credits
Level: Lower

This course explores the safety hazards associated with the construction trades. Part of this course will follow the training requirements set forth by the Occupational Safety & Health Administration (OSHA) Construction Safety Outreach Program, including OSHA’s Focus Four Hazards, personal protective equipment, and health hazards in construction. During this course students may have the opportunity to obtain an OSHA 10 card for the construction industry. Students will develop an understanding of construction safety beyond basic OSHA 10 industry training.

BLCT - 1132 Estimating I, 2.00 Credits
Level: Lower

This course develops mathematical concepts and application skills necessary for the carpenter and mason to estimate building quantities and associated costs. Topics include arithmetic operations with whole numbers, decimals, and fractional numbers. Formulas for area, volume, board foot quantities, and basic geometry as it pertains to construction will be studied. The quantities estimated are in the framing/sheathing stages of enclosing a building and the information we need to develop from a single cell into a hugely complicated functional organism.

BLCT - 1202 Portable Tools & Fastening Sys, 2.00 Credits
Level: Lower

This course is a survey of hand and portable power tools, as well as fasteners, adhesives, and power fastening systems commonly used in the construction industry. Students will learn the proper terminology, use, care, maintenance, and safety associated with the subject matter. The course also includes the proper choice of tools, fasteners, and adhesives as well as critical thinking problems that challenge students’ comprehension of subject matter.
BLCT - 1206 Building Construction Lab I, 6.00 Credits
Level: Lower
Applied Learning-Practicum, Course Fee $25.00
This course is a survey and application of practices used in residential and light commercial construction. Emphasis will be on basic principles and development of skills used in construction operations to safely perform layout, measurement, cutting, and installation processes. This hands-on applied learning lab will include masonry and framing work on real-world projects and authentic construction sites. Throughout the semester, students will be required to demonstrate learned competency through a series of proficiency assessments.

BLCT - 1212 Foundation Systems & Layout, 2.00 Credits
Level: Lower
This course is an overview of the first stages of building a structure. This course will cover the process of building layout along with concrete form building, concrete science, mixing and placement. Block wall construction and principles will also be introduced in this course.

BLCT - 1222 Construction Math, 2.00 Credits
Level: Lower
This course is an introduction to the math concepts and theories used specifically in the construction field. Geometric and basic math operations will be applied to scenarios commonly seen in the construction field. Fundamentals of print reading will be covered as these math concepts are employed.

BLCT - 1232 Framing I, 2.00 Credits
Level: Lower
This course is an introduction to various types of residential framing systems and introduces building codes relevant to these systems. The course includes terminology and identification of components involved with types of construction, floor and wall frames and green building products used with these systems. Students will learn basic print reading, proper layout, how to calculate material sizes, rough opening sizes and procedures for framing floor, wall and ceiling systems and power tool safety.

BLCT - 1242 Framing II, 2.00 Credits
Prerequisite(s): BLCT 1232 with D or better
Level: Lower
This course is a continuation of concepts taught in BLCT 1232. The course will include backer, blocking, and framing, and metal stud framing. Roof framing concepts will be introduced. Students will study roof topics and terminology with a concentration on common rafter layout and truss installation. Truss roof design, along with common fastening techniques and building codes relevant to the industry will be covered.

BLCT - 1302 Blueprint Reading & Grades I, 2.00 Credits
Level: Lower
This course is an introduction to different types of construction plans and how they represent finished grades of buildings. This course will present the parts of blueprints in detail including symbols, the title block, and grid lines. Students will be introduced to site plans and the concept of preparing graded surfaces using heavy equipment. Identification of construction stakes and interpretation of marks on each type of stake will be covered. The process for grading slopes will also be discussed.

BLCT - 1306 Heavy Equipment Lab I, 6.00 Credits
Level: Lower
Applied Learning-Practicum
This course is an introduction to the use of grade setting equipment and heavy equipment. Emphasis is placed on safety and development of job skills. This hands-on applied learning lab will include various heavy equipment operations, performing site layout, grade setting, and the use of labor skills involved in the construction industry. Throughout the semester students will be required to demonstrate learned competency through a series of proficiency assessments. The Equipment Practicum is divided into observation, seat time, maintenance and various support functions.

BLCT - 1312 Introduction to Earth Moving, 2.00 Credits
Level: Lower
This course provides a broad introduction to the processes of planning and executing earth moving activities on various types of construction projects. The uses of heavy equipment such as bulldozers, scrapers, excavators, and loaders will be covered.

BLCT - 1322 Preventive Maintenance Checks, 2.00 Credits
Level: Lower
This course introduces new operators to equipment systems and their preventive maintenance procedures. Emphasis is placed on developing daily maintenance routines based on manufacturer’s guidelines. The course content explains the reason for daily checks in relation to equipment uptime and longevity.

BLCT - 1332 Operations Part I, 2.00 Credits
Level: Lower
This course covers the use and maintenance of the most commonly used machines on a construction site. The course emphasizes safe operation as well as basic operating techniques for each machine. This will include safe setup of machines as well as excavating foundations, septic systems, driveways, etc.

BLCT - 2202 Insulation and Drywall, 2.00 Credits
Level: Lower
This course is an introduction to thermal and acoustical insulation, condensation and required ventilation in residential building. This course also includes drywall products and installation of drywall and concealing fasteners and joints (finishing) drywall. Students learn of various tools and fasteners related to the industry.

BLCT - 2206 Building Construction Lab II, 6.00 Credits
Prerequisite(s): BLCT 1206 with D or better
Level: Lower
Applied Learning-Practicum, Course Fee $68.00
This hands-on applied learning lab is a continuation of skills learned in BLCT 1206. It will include the application of practices used in residential and light commercial construction and wood fabrication. Students will learn to safely set up and operate stationary power tools, as well as construction equipment commonly used on the job site. Students will develop the ability to interpret construction drawings and assemble projects based on shop drawings and models. There will be continued advancement in the application of residential and light commercial building practices. This course will have an emphasis on interior and exterior wall systems. Subject matter will include masonry, residential wall systems, and roof fabrication. Much of the lab will be conducted on genuine construction job sites. Throughout the semester, students will be required to demonstrate learned competency through a series of proficiency assessments.

BLCT - 2212 Exterior Building Envelope, 2.00 Credits
Level: Lower
This course provides the student with basic knowledge of windows, doors, and weather resistant barriers in residential construction. Subject matter will include applicable terminology, comparisons, and installation methods. Attention will be given to proper flashing techniques, code requirements, and associated condensation issues inside conventional wall systems. A survey of developing technologies in wall systems will also be conducted.

BLCT - 2242 Wood Products & Fabrication, 2.00 Credits
Level: Lower
This course covers basic construction communication through residential print reading. Students will learn how to perform material takeoffs and apply costs based on construction drawings. The course will also cover common scales, symbols, line types, and abbreviations used in construction drawings. Basic construction drafting principles will be introduced. The course will familiarize students with the purpose of building codes and zoning laws and how they are demonstrated in a set of working drawings for a house.

BLCT - 2262 Masonry, 2.00 Credits
Prerequisite(s): BLCT 1306 with D or better
Level: Lower
This course reviews, reinforces, and builds on trade aspects and skills introduced in BLCT 1212. The class will cover the evolution of the masonry trades, its tools and materials. Bricklaying and stone veneers, the basics of plasterwork, and LEED and Green concepts will be introduced in this course as they pertain to masonry. The concepts and practices that make masonry a safe building material will also be covered.

BLCT - 2302 Work Zone Safety, 2.00 Credits
Prerequisite(s): BLCT 4212 with D or better
Level: Lower
This course presents topics for safety on the construction site. A broad range of work zones involving heavy equipment will be covered. Emphasis is given to residential, commercial and highway construction. This course covers occupational safety and health standards and The Manual for Uniform Traffic Control Devices.

BLCT - 2306 Heavy Equipment Lab II, 6.00 Credits
Prerequisite(s): BLCT 1306 with D or better
Level: Lower
Applied Learning-Practicum
This course continues the use of grade setting equipment and heavy equipment. Emphasis is placed on work site safety and development of job skills. This hands-on applied learning lab will include various heavy equipment operations, performing site layout, grade settings, and the use of labor skills utilized in the construction industry. Throughout the semester, students will be required to demonstrate learned competency through a series of proficiency assessments.

BLCT - 2312 Blueprint Reading & Grades II, 2.00 Credits
Prerequisite(s): BLCT 1302 with D or better
Level: Lower
This course presents proper practices for setting grades off benchmarks and describes methods of setting grades using various types of levels. The student will be taught how to read and interpret construction plans to determine grading requirements. Students will review basic grading operations, site prep. New York State Code rule 753, contours, establishing grades, reading and understanding site plans.

BLCT - 2322 Equipment Preventative Maintnc, 2.00 Credits
Level: Lower
This course covers preventative maintenance responsibilities including specifying basic equipment subsystems and major mechanical systems; knowing how to set up equipment; and how and when to complete routine inspections of equipment.

BLCT - 2323 Operations - Part II, 2.00 Credits
Prerequisite(s): BLCT 1332 with D or better
Level: Lower
This course continues the study of tractors, dump trucks, and front-end loaders. Safe operation practices as well as preventative maintenance requirements will be covered for each piece of equipment. Common uses of each piece of equipment and their attachments will also be discussed.
BLCT - 2342 Soils, 2.00 Credits
Level: Lower
This course describes basic soil classification methods, details factors affecting classification, and presents soil density and compaction requirements for highway and building construction.

BLCT - 2302 Compaction & Stabilization, 2.00 Credits
Level: Lower
This course presents the use, sale operation, and specialized maintenance of compaction equipment to include pneumatic tire compactor, steel-wheel compactor, vibratory compactor and sheepfoot compactor. The use of compaction and stabilization equipment for footing and compacting soils, compaction cement and asphalt will be explained and demonstrated. A discussion of soil stabilization methods and erosion control methods will be included.

BLCT - 3302 Blueprint Reading & Grades III, 2.00 Credits
Prerequisite(s): BLCT 2312 with D or better
Level: Lower
This course covers the equipment and supplies required to perform structural work. Discussions include the following topics: bridge types and materials, bridge substructures, bridge superstructures, structural concrete and structural steel. Reading and interpreting site plans will also be reinforced.

BLCT - 3306 Heavy Equipment Lab III, 6.00 Credits
Prerequisite(s): BLCT 3306 with D or better
Applied Learning-Practicum
This course builds on the content of HEO lab part II. Additional highway and bridge construction techniques, as well as advanced pieces of heavy equipment will be introduced. Labs will include practice with record keeping, estimation and project management.

BLCT - 3312 Introduction to Grading, 2.00 Credits
Level: Lower
This course contains information using various grading instruments and tools. A laser level, engineer's level, and GPS are used to establish grades for surface and sub-surface construction sites. Students will place and correctly mark appropriate grades stakes used at industry standard work sites.

BLCT - 3322 Advanced Operations, 2.00 Credits
Prerequisite(s): BLCT 2332 with D or better
Level: Lower
This course presents the use, sale operation, and maintenance of excavators, tractors and trailers. The course content will explain and demonstrate the use of excavators in ditching, grading, and slope-finishing operations, describing various operating techniques, and describes the types of trucks used in highway/heavy construction; these include rigid frame trucks, such as dump trucks, transit-mix trucks, and tractor-trailer trucks. The trailer discussed used include dump, haulers and flatbed trailers. Truck controls and components, preventive maintenance and operation, and required licensing regulations are also covered. This course will continue to reinforce the operation of backhoes, bulldozers, and front-end loaders.

BLCT - 3332 Highway Surfaces, 2.00 Credits
Level: Lower
This course includes the processing, preparation and application of asphalt and concrete to a highway surface. Also covered is the operation of asphalt pavers and all equipment required to perform paving and concrete applications.

BLCT - 3342 Construction Proej Supervision, 2.00 Credits
Level: Lower
This course will discuss the principles of project planning, scheduling, estimating, and management. The student will practice different roles and skills required for supervising personnel. Students will be required to understand and utilize computer-based applications during the course.

BLCT - 3352 Tracked Finishing & Grading, 2.00 Credits
Level: Lower
This course includes the use of tracked equipment used in the process of finishish and grading of a construction site. Types of equipment available, proper selection and operating techniques will be discussed.

BLCT - 3413 Blueprint Reading-Bldg Construct, 3.00 Credits
Corequisite(s): BLCT 3410-A
Level: Lower
This course covers instruction in blueprint reading, concentrating on plumbing blueprints, building blueprints, and instruction in the use of the architect's scale for taking measurements. The course covers all components of a wood frame structure including foundations. Students will be taught the proper installation of piping and fixtures so as not to jeopardize the building's structural integrity.

BLCT - 3423 Pipe Fitting - Math Estimating, 3.00 Credits
Corequisite(s): BLCT 3352-A
Level: Lower
This course covers basic math and materials estimating the plumbing trades. Pipe fitting math is practiced and applied to ensure proper plumbing drainage, as well as water and gas line pipe length installations. Material lists and job estimating is also taught as it pertains to various plumbing systems and fixtures. The students are given instruction on materials mark up for profit, proper customer billing, and required income and sales tax as it pertains to a self-run plumbing business.

BLCT - 3433 Cop Pipe & Tub, Water Sys Des, 3.00 Credits
Corequisite(s): Level: Lower
This course covers the study and installation of various types of copper pipe and tubing and proper methods of joining. Also includes instruction on fitting use and proper code applications. The methods of testing potable water lines are also covered.
BLCT - 3606 Building Construction Lab III, 6.00 Credits
Prerequisite(s): BLCT 2206 with D or better
Level: Lower
Applied Learning-Practicum
This hands-on applied learning lab is a continuation of skills learned in BLCT 2206. Specific subject matter will include advanced framing principles, interior and exterior details, and roofing systems. Students will participate in a remedial work project where they will use critical thinking skills to apply understanding that was developed in previous courses. There will be continued advancement in construction estimating and print reading, and work with computer aided drafting and design. Much of the lab will be conducted on genuine construction job sites. Throughout the semester, students will be required to demonstrate learned competency through a series of proficiency assessments.

BLCT - 3612 Roofing Systems, 2.00 Credits
Level: Lower
This course will cover the theory and application of different roofing materials and techniques for residential and commercial construction. Emphasis is placed on basic principles of step flashing and water proofing for all types of roofing systems.

BLCT - 3622 Advanced Print-reading & Estimat, 2.00 Credits
Prerequisite(s): BLCT 2252 with D or better
Level: Lower
This course gives specific information on the contractor's role in preparing quantity take-off estimates for final bid offerings. The course will build from the foundational information given in Introduction to Print Reading and Estimation (BLCT 2252). Students will learn the full extent of all contract documents, with an emphasis on drawing and reading blueprints, understanding building codes, identifying symbols, and gaining a full understanding of the specifications for a given project.

BLCT - 3632 Exterior Construction Details, 2.00 Credits
Level: Lower
This course covers the methods used in the construction and installation of residential exterior elements. The course content includes the construction of porches, decks, patios, and breezeways. Students will learn about exterior elements such as flooring/decking materials, different types of entrance doors and their installation, garage doors, pier footings, metal fastening systems, railing systems and structural supports, as well as building code requirements for these systems.

BLCT - 3642 Interior Trims, 2.00 Credits
Level: Lower
This course is a survey of the skills necessary to perform quality installation and fabrication of interior trim, doors, windows, and stair components. Course work also includes the design, fabrication, and installation practices of closet shelving.

BLCT - 3652 Advanced Framing, 2.00 Credits
Prerequisite(s): BLCT 1242 with D or better
Level: Lower
This course will cover the theory and application of framing techniques in residential and light commercial construction. Emphasis will be placed on basic principles used in residential roof layout and fabrication. This course will also cover various stairway configurations and their calculations and layout.

BLCT - 3702 Residential Foundations, 2.00 Credits
Prerequisite(s): BLCT 2262 with D or better
Level: Lower
This course further develops concepts introduced in BLCT 2262. The student will be presented with advanced techniques to construct residential foundations using CMU (concrete masonry unit) construction. Reinforced footings, walls, piers and footings, and foundation drainage are presented in this course.

BLCT - 3706 Masonry Construction Lab III, 6.00 Credits
Prerequisite(s): BLCT 2206 with D or better
Level: Lower
Applied Learning-Practicum
This course covers the survey and application of practices and skills used in residential and light commercial masonry and concrete construction. Emphasis is on basic principles and development of skills used in construction operations to safely perform layout, measurement, cutting, and installation processes. This hands-on applied learning lab will include the masonry elements of brick, CMU, stone, pavers and concrete flatwork as related to masonry construction. The lab experience will include the proper and safe erection of scaffolding. Throughout the semester students will be required to demonstrate learned competency through a series of proficiency assessments.

BLCT - 3712 Building Stone, 2.00 Credits
Prerequisite(s): BLCT 2262 with D or better
Level: Lower
This course presents to the student the proper knowledge, techniques, and tool and equipment use to construct stonewall, facades and building elements of natural and cast stone.

BLCT - 3722 Fireplace & Hearth Oven Design, 2.00 Credits
Prerequisite(s): BLCT 2262 with D or better
Level: Lower
This course presents the proper knowledge and techniques to construct site-built fireplaces and hearth ovens. The course will also cover the installation of various refractory products.

BLCT - 3732 Masonry Restoration, 2.00 Credits
Prerequisite(s): BLCT 2262 with D or better
Level: Lower
This course covers the knowledge and techniques to analyze, prepare and restore deteriorated or damaged masonry. Cleaning, caulking and tuck-pointing are included in this course.

BLCT - 3742 Sustainability w/Masonry Const, 2.00 Credits
Prerequisite(s): BLCT 2262 with D or better
Level: Lower
This course presents to the student the proper knowledge to install sustainable masonry paving and wall systems. Sustainable masonry products can contribute to a longer life cycle of a building, as well as the safe occupancy and use of a building. Run-off reducing permeable paving systems are included in this course.

BLCT - 3752 All Weather Masonry, 2.00 Credits
Prerequisite(s): BLCT 2262 with D or better
Level: Lower
This course covers the proper knowledge, planning, mobilization and techniques to construct masonry in cold/freezing weather and the extremes of hot weather.

BLCT - 4002 Below Grade Construction, 2.00 Credits
Level: Lower
This course discusses the below grade construction processes that are necessary to perform highway/urban construction. Excavation support systems, excavation safety, underground piping materials and fittings, joining methods for underground pipe, box culverts, and catch basins are covered.

BLCT - 4143 Basic House Wiring-Forced Air, 3.00 Credits
Prerequisite(s): BLCT 3453 with D or better
Level: Lower
Course Fee $136.00
This course offers instruction and application of basic house wiring and theory. The student is also introduced to the heating trade and to the theory of proper furnace installation. Reasons for human comfort and discomfort as it pertains to forced air heat are discussed. Troubleshooting of disturbing and distressing noises and conditions as well as indoor air quality is also covered in this course.

BLCT - 4153 Sheet Metal Fabrication, 3.00 Credits
Prerequisite(s): BLCT 3453 with D or better
Course Fee $24.00
This course covers the instruction and the application of various materials of the sheet metal trade. Students are also instructed in the forming and use of different seams and edges required for various applications. Instruction and proper application of methods of joining sheet metal such as riveting, welding, brazing, and soldering is also covered.

BLCT - 4163 Mid & Hi Efy Furn-Air Warm Ar, 3.00 Credits
Prerequisite(s): BLCT 3453 with D or better
Level: Lower
This course covers the proper evaluation and installation of mid and high efficiency furnaces. Fuel oil burner breakdown, maintenance, and installations are covered in this course. Instruction is given on the proper sizing and installation of natural gas and propane gas distribution pipelines. Alternate warm air heat sources, types, and installations are also taught. Proper trade practices of the HVAC technician, heat system analysis, and maintenance are also covered in this course.

BLCT - 4173 Sheet Mtl Air Dist Systm &Vent, 3.00 Credits
Prerequisite(s): BLCT 3453 with D or better
Level: Lower
This course covers the many types of furnace ductwork and proper application of various duct fittings. Proper application and installation of furnace air distribution systems is also covered. Instruction on Type B galvanized sheet metal vent pipe and components is given and the proper sizing and installation of this metal piping is covered. Sheet metal math such as perimeter, area, and volume is also included in this course.

BLCT - 4183 Sheet Metal Trade Safety, 3.00 Credits
Prerequisite(s): BLCT 3453 with D or better
Level: Lower
This course covers instruction in the proper use and application of various hand and power tools used in the sheet metal trade. Sheet metal trade and tool safety is also covered in this unit. Students will be introduced to different sheet metal types and their proper applications as well as mechanical drawing. Students will develop and lay out patterns for sheet metal to be cut and formed.

BLCT - 4203 Air Cond Components & Install, 3.00 Credits
Level: Lower
Students will learn about air conditioning components and accessories. Students will learn how to install air conditioning including pressure testing, evacuation, and charging.

BLCT - 4213 Air Conditioning Fundamentals, 3.00 Credits
Level: Lower
This course teaches the fundamentals of air conditioning and how the components of the system work together to perform the cooling process. This includes an examination of types of systems, and detailed look at the types and performance of evaporators and compressors.

BLCT - 4223 Air Cond Perf & Trou & Ht Pump, 3.00 Credits
Level: Lower
This course teaches electrical and mechanical troubleshooting capabilities that are usable in real life applications. Students will also study heat pumps and a variety of applications in which they are feasible.

BLCT - 4233 Heat Loss & Heat Gain, 3.00 Credits
Prerequisite(s): BLCT 3523 with D or better
Level: Lower
Students will determine the heat loss and heat gain in a residential or small commercial building, which would allow a technician to determine what size equipment and to select and size heating and cooling ductwork and diffusers.

BLCT - 4243 Refrigeration Handling Cert, 3.00 Credits
Level: Lower
This course prepares students to take the EPA Refrigerant Handling Certification test.

BLCT - 4253 Residential Duct System Design, 3.00 Credits
Prerequisite(s): BLCT 4253 with D or better
Level: Lower
Students will learn the fundamentals of duct system design as it applies to residential forced air heating and cooling systems. This includes an in-depth look at blower performance and equipment which affects airflow in ductwork.
BLCT - 4302 Basic CAD-Residential Drawing, 2.00 Credits
Prerequisite(s): BLCT 3332 with D or better
Level: Lower
This course introduces students to cabinet construction. Course content includes cabinet designs, components needed for fabrication, kitchen layouts, and cabinet installation. This course also explores a variety of countertops and how they are manufactured and installed.

BLCT - 4303 Interior Surfaces, 3.00 Credits
Prerequisite(s): BLCT 3332 with D or better
Level: Lower
This course covers the installation of finished ceiling, floor, and wall materials as well as the principles of stair building. The student will install floor and wall materials as well as calculate, cut and assemble stair parts in the laboratory.

BLCT - 4306 Building Construction Lab IV, 6.00 Credits
Prerequisite(s): BLCT 3606 with D or better
Level: Lower
Applied Learning-Practicum
This hands-on applied learning lab is a continuation of skills learned in Building Construction Lab III. Subject matter expands on an understanding of construction systems within the carpentry discipline and links other aspects of the construction industry to better prepare students for the job market. Students will produce a finish-quality cabinet, develop skills in the installation of interior finishes, and learn about mechanical systems to include electrical and plumbing. Students will also explore career paths in the construction industry which may include commercial construction, green building, small business ownership, and more. Much of the lab will be conducted on genuine construction job sites. Throughout the semester, students will be required to demonstrate learned competency through a series of proficiency assessments.

BLCT - 4332 Green Building & Bldg Science, 2.00 Credits
Level: Lower
This course is a study in the concepts of green building and building sciences, which includes alternative building techniques designed to allow building practices that result in energy efficient, healthier and economically sustainable buildings. Students will learn about alternative sources of heating and cooling, electricity, water efficiency and alternative building materials. Students will employ critical thinking skills in the study of building science and learn the concepts behind moisture and thermal control and building envelope systems. Course content also includes study of energy efficient rating systems such as LEED (Leadership in Energy and Environmental Design) and its impact on the current construction industry.

BLCT - 4342 Mechanical Systems, 2.00 Credits
Level: Lower
This course is an overview of plumbing, HVAC, and electrical installation to develop jobsite coordination and cooperation among various trades working at a construction site. Students will develop an understanding necessary to perform fundamental tasks with regard to electrical and plumbing.

BLCT - 4352 Interior Finishes, 2.00 Credits
Level: Lower
This course is the study of interior finishes used in the building trades. Students will learn terminology and techniques and employ critical thinking skills in the study of wall and ceiling finishes, ceramic tile, wood flooring and resilient tile. Study also includes finish cabinet installation as well as countertop installation, including plastic laminate, solid surface and granite tops. Safe handling of materials, tools and equipment will be included in this course of study.

BLCT - 4362 Cabinetry, 2.00 Credits
Level: Lower
This course introduces students to cabinet construction. Course content includes cabinet designs, components needed for fabrication, kitchen layouts, and cabinet installation. This course also explores a variety of countertops and how they are manufactured and installed.

BLCT - 4372 Timber Framing, 2.00 Credits
Level: Lower
This course will focus on the progression of timber framing traditions and practices from the Far East, Europe, and America. We will begin with an in-depth look at the centuries-old techniques employed in timber framing, and then follow the progression through braced frame and balloon frame buildings. Layout procedures covered and employed include scribe rule, centerline, and square rule. Specific engineering principles and appropriate joint design will be thoroughly covered.

BLCT - 4402 Wheeled Finishing & Grading, 2.00 Credits
Level: Lower
In this course students will learn how motor grader controls work and function at industry standards as well as various types of controls for motor graders. Students will learn about wheeled excavators and their effects as well as various controls and types. Students will learn about wheeled excavators and how they are used in grading.

BLCT - 4406 Heavy Equipment Lab IV, 6.00 Credits
Prerequisite(s): BLCT 3306 with D or better
Level: Lower
Applied Learning-Practicum
This applied learning lab builds off skills acquired in HEO Lab pt. III. Students will gain experience in a sponsor company. Students benefit from this employer-employee relationship and may elect to take the ACI field technician exam provided by a qualified ACI examiner.

BLCT - 4412 Finish Processes, 2.00 Credits
Level: Lower
In this course, students will learn about the work site finish processes for sub-surface and surface finishing methods and techniques. Also covered in this course: sub-surface/ surface piping and drainage systems, materials used, equipment used and interpretation of production requirements/specifications.

BLCT - 4422 Project Management & Support, 2.00 Credits
Level: Lower
This course will build on the concepts from Construction Project Supervision. Students will use Gantt charts, spreadsheets and project management tools to track project costs and completion dates. Computer based technology will be utilized during the course. Leadership techniques will also be discussed.

BLCT - 4432 Advanced Safety, 2.00 Credits
Level: Lower
This course teaches advanced safety techniques and requirements for heavy equipment operators. Emphasis is placed on organizing and conducting safety meetings. OSHA hazardous material requirements and safe operation of equipment will be discussed. Safety reporting, inspections, and investigations will also be covered.

BLCT - 4442 Machine Control Technology, 2.00 Credits
Level: Lower
This course discusses advanced grading techniques utilizing both indicate and machine control technology. The use of the dual slope laser in conjunction with machine-mounted receivers will be reinforced. The course also describes the available technology and discusses its use in the field.

BLCT - 4502 ACI Concrete Testing, 2.00 Credits
Prerequisite(s): BLCT 3706 with D or better
Level: Lower
This course presents the student with the proper knowledge and techniques to perform American Concrete Institute (ACI) quality control field tests on freshly mixed concrete and masonry grout. Upon completion, the student may elect to take the ACI field technician exam provided by a qualified ACI examiner.

BLCT - 4506 Masonry Construction Lab IV, 6.00 Credits
Prerequisite(s): BLCT 3706 with D or better
Level: Lower
Applied Learning-Practicum
This course builds upon the skills learned in BLCT 3706 - Masonry Construction Lab III. Emphasis will be placed on course principles and further development of skills used in masonry construction operations to safely perform layout, measurement, cutting, and installation processes. This hands-on applied learning lab will include masonry and forming work on real-world projects and authentic construction sites. Throughout the semester, students will be required to demonstrate learned competency through a series of proficiency assessments.

BLCT - 4512 Masonry Stairs & Ramps, 2.00 Credits
Prerequisite(s): BLCT 3706 with D or better
Level: Lower
This course presents the student with the proper knowledge and techniques to build masonry and concrete stairs and ramps that comply with the applicable building codes.

BLCT - 4522 Hardscaping with Masonry, 2.00 Credits
Prerequisite(s): BLCT 3706 with D or better
Level: Lower
This course presents the student with the proper knowledge and techniques to build outdoor masonry patios, walls, low-rise retaining walls, and outdoor kitchens with segmental retaining wall blocks, concrete and brick pavers and natural stone.

BLCT - 4532 Print Reading for Masonry, 2.00 Credits
Prerequisite(s): BLCT 3706 with D or better
Level: Lower
This course presents the student with the proper knowledge and techniques to read, interpret, and navigate commercial building plans and shop drawings related to masonry construction.

BLCT - 4542 Masonry Sketching & Detailing, 2.00 Credits
Prerequisite(s): BLCT 3706 with D or better
Level: Lower
This course presents the student with the proper knowledge, skill and techniques to produce simple sketches and shop drawings of masonry details as they pertain specifically to the masonry trade.

BLCT - 4552 Business Planning Masonry/Concrete, 2.00 Credits
Prerequisite(s): BLCT 3706 with D or better
Level: Lower
This course presents the student with general knowledge of bidding, evaluating production costs, and presenting a detailed, concise proposal to a customer. An introduction to recordkeeping and overhead cost is presented to the student.

BSET - BACHELOR OF SCI ENGR TECH

BSET - 7001 Senior Seminar & Project Des, 1.00 Credit
Level: Upper
Upper Level
First of two-semester sequence Bachelor of Science seniors. Students design technical project for completion in BSET 8003. Project proposal and design oral reports are presented. Weekly seminar deals with various aspects of post-graduation professional employment.

BSET - 8003 Senior Technical Project, 3.00 Credits
Level: Upper
Applied Learning-Creative Work, Upper Level
Students build and test a technical project designed in BSET 7001. Each student must complete a formal oral presentation, project demonstration and submit a written project report. The project is subject to faculty approval. Each student chooses or is assigned a faculty project advisor.

BUAD - BUSINESS ADMINISTRATION

BUAD - 1043 Occupational Experience, 3.00 Credits
Level: Lower
Applied Learning-Internship, Pass/Fail
This is a semester-long experience where a business student can gain hands-on work experience in a sponsor company. Students benefit from this employer-employee relationship as an extension of classroom theory/applications and learn to work within corporate rules/ regulations as expected of a newly hired worker. Satisfaction completion of this training, as well as related assignments, is required.

205
COURSE DESCRIPTIONS

BUAD - 1543 Grammar for Court Reporters, 3.00 Credits
Level: Lower
In this course students will develop a high-level ability in spelling, vocabulary, sentence structure, word choice, capitalization and punctuation with direct application to business writing and speaking. This course encourages application of this knowledge through editing activities. Attention is given to diagnosing fragments, run-ons, comma splices and parallelism errors. Emphasis is placed upon mastery of grammatical structure needed for effective writing of sentences, paragraphs, and essays. When this course serves as the prerequisite for another course, the student must receive a grade of “C” or better in this course.

BUAD - 2033 Business Communication, 3.00 Credits
Prerequisite(s): COMP 1503 with D or better
Level: Lower
Gen Ed - BC-COMP1503/BUAD2033; Gen Ed - BC-COMP3503/BUAD2033
Students will develop skills in communicating in the digital age workplace. In addition to learning fundamentals of communication theory and principles, special attention is given to the business writing process, preparing short workplace messages and digital media, preparing positive, negative and persuasive messages, written and oral reports. Emphasis is also given to preparing students for the job search, application and interview process in the digital age as students send resumes, business resumes, and mock interviews. Generational communication will be introduced through digital and written understanding.

BUAD - 3043 Business Law I, 3.00 Credits
Level: Lower
This course offers a general inquiry into the nature of law and the legal system in the United States. Areas covered include, but are not limited to, the different schools of jurisprudential thought, the Common law tradition, Alternative Dispute Resolution, court procedures, legal research and case citations. Special attention is given to Constitutional Law and business, Torts and Crimes, Intellectual Property and the Common Law of Contracts.

BUAD - 3114 Intl Tourism: Ital Food & Geo, 4.00 Credits
Level: Lower
The course presents concepts of tourism relating to food and geography, using Italy as its example. The course is relevant to students of all backgrounds but was designed specifically for students of hospitality and culinary arts. Students will study international organizations operating in tourism (i.e. WTO) and the different types of tourism, with particular attention paid to sustainable tourism. Students will be asked to investigate the tourism industry of Italy, becoming familiar with the most important tourist sites in Italy and Campania (through several excursions). The third module of the course will be dedicated to a very important kind of tourism in Italy and of the Campania Region: Food and Wine Tourism. Students are expected to actively participate and contribute to class discussion. Students will learn about marketing and/or sales activities such as marketing research and advertising, promotional campaign organization, and media relations connected with the promotion of tourism in Italy and Campania.

BUAD - 3153 Fundamentals of Management, 3.00 Credits
Level: Lower
This course deals with the skills necessary to become a manager. The students will develop an understanding of management theories and management skills through an examination of the basic functions of management. The concepts of planning, organizing, leading, and controlling a business organization are examined to show how these basic principles can be used to create a healthy and thriving organization in today's global environment. Special attention will be given to decision making, problem solving, and leadership in an environment where productivity improvements are a major concern.

BUAD - 4004 Ess of Enterp & Sm Bus Mgmt, 4.00 Credits
Level: Lower
This course offers the student a step-by-step approach to starting a business. The course covers the fundamental principles of marketing, law, management, and office administration as applied to beginning a new venture. The class will be divided into teams that will prepare a comprehensive individualized business plan to include a market profile, site analysis, competitive analysis, financials, goals and objectives, pricing and marketing strategies, and executive summary. A major focus of this course is to explore each step necessary in structuring and launching a new venture, and discussing ways of recruiting the necessary resources to accomplish this venture.

BUAD - 4053 Business Law II, 3.00 Credits
Level: Lower
This course is an examination of the law of sales, commercial paper, agency-employment relationships, business organizations and government regulation of same. Article 2 of the UCC is used in the sales area with special attention paid to contract formation, title and risk of loss, performance and product liability. In examining commercial paper, Article 3 of the UCC is referenced with emphasis on function and form, holders in due course and liability and discharge. Attention is also given to employer/employee relationships, and distinguishing between the two. Proprietary, personal, partnership, and corporation liabilities are also covered. Finally, government regulation of business is examined, especially in the areas of anti-trust and restraint of trade.

BUAD - 4133 Investments, 3.00 Credits
Level: Lower
This course is designed to be an introductory course in investments. Topics covered are sources of information, establishing investment goals, investment returns and risks, time value of money, investing in common stocks, bonds, and mutual funds, tax aspects of investing, analysis of financial statements, portfolio management techniques, and introduction to futures and options.

BUAD - 4193 Insurance and Risk Management, 3.00 Credits
Level: Lower
This course will describe the techniques a financial planner/risk manager/consumer will use to analyze risk and assess alternate strategies for managing risk. The course begins by examining the pervasive nature of risk and its impact on both the individual risk society. It also demonstrates the ways in which insurance can be used to deal with the problems posed by such risk. The course is designed to be consumer oriented with the main emphasis on the use of insurance within the risk management framework. The course can be useful in preparation for a career in the fields of life insurance, health and disability insurance, as well as property and casualty insurance.

BUAD - 4203 Intro Personal Financial Plan, 3.00 Credits
Level: Lower
Applied Learning-Practicum
This course is an introduction to personal finance covering those areas that are necessary for an individual to make better financial decisions throughout one’s lifetime. Topics include: developing financial statements, plans, budgets, time value of money, money management, credit management, tax planning, insurance, investments, retirement planning, and estate planning. Computer, business calculator applications, and case studies will be used throughout the course. The completion of a comprehensive financial plan will be required.

BUAD - 4403 Business Computer Applications, 3.00 Credits
Level: Lower
This course will introduce the student to multiple aspects of business computer applications including the representation, storage, manipulation, and use of digital information. Topics include: essential applications; information collection and analysis; research methods; and using digital information to enhance presentations in the workplace. This course prepares students to work with Microsoft Office in a career setting. Students will be introduced to key ethical issues they will face in the context of using information technology. Students will develop electronic documents, spreadsheets, and databases. Students will also develop and present an electronic presentation in order to document the students’ competence applying business solutions.

BUAD - 5003 Management Communications, 3.00 Credits
Prerequisite(s): COMP 1503 with D or better or BUAD 2033 with D or better
Level: Upper
Upper Level
This course is designed to provide the student with the range of communication issues a manager will face in the future. Enduring issues on how to write and speak effectively and devise a successful communications strategy as well as how to make the best use of telecommunications technology will be explored. Through lecture and application, the student will study such areas as handwriting, shorthand, memo writing, interviewing, presenting, communicating with diverse populations and external audiences. Special emphasis will focus on how to use communications to achieve an organizational mission, how to adapt their communications to the specific needs of their audiences, and how to prepare for intercultural communication challenges.

BUAD - 5013 Principles of Leadership, 3.00 Credits
Prerequisite(s): BUAD 3153 with D or better or TMGT 7153 with D or better
Level: Upper
Upper Level
This course is an examination of the theory, practice, and principles of leadership within the realm of management. Major topics include the evolution of leadership theory, an examination of the major leadership theories operating in modern organizations, and the impact of each on organizational effectiveness. The development, refinement, and application of effective leadership principles and skills are also examined. Students will be expected to analyze the spectrum of leadership theories and formulate opinions as to the most effective and efficient forms of leadership given a specific situation or organizational context.

BUAD - 5023 Human Resource Management, 3.00 Credits
Prerequisite(s): BUAD 3153 with D or better or TMGT 7153 with D or better
Level: Upper
Upper Level
This course provides students with an understanding of human resource management, and how they can improve their use of human resources through management tactics. It will discuss what human resource management contributes to the organization in terms of effectiveness and competitiveness. Discussion and research will take place on some of the challenges and workforce issues being faced in this area. Some of the topics covered include equal opportunity and the legal environment, strategic human resource planning, recruiting and selection, staffing, training and development, compensation, performance appraisal, employee and labor relations, and workplace safety.

BUAD - 5033 Retirement Planning, 3.00 Credits
Prerequisite(s): BUAD 4203 with D or better
Level: Upper
Upper Level
This course provides an overview of the retirement planning process. It will describe the ongoing, systematic procedures a financial planner will utilize to assist a client in establishing meaningful retirement objectives and creating appropriate strategies. Topics will include employer sponsored retirement plans, Social Security, Medicaid, Medicare, post retirement health and quality of life issues, as well as investment, estate, and tax planning strategies.

BUAD - 5043 Business Ethics, 3.00 Credits
Prerequisite(s): BUAD 3153 with D or better or TMGT 7153 with D or better
Level: Upper
Upper Level
This course explores the complex nature of ethical issues confronted by modern business leaders and managers. It integrates perspectives from a variety of disciplines, including, but not limited to, philosophy, law, management, economics, marketing, and public policy. Coursework is designed to illustrate the ethical principles and values that guide managers and other business leaders, while considering policies concerning employees, customers, and the general public, and while building trust, commitment, and effort within the business organization.

BUAD - 5900 Directed Study, 1.00 TO 6.00 Credits
Level: Upper
Upper Level
A student may contract for one to six credit hours of independent study through an agreement with an instructor who agrees to direct such a study. The student will submit a plan acceptable to the instructor and to the department chairperson. The instructor and student will confer regularly regarding the process of the study.
This course is a comprehensive examination of the theoretical and practical approaches to financial management. Analyzing, planning, controlling investment and short and long term financing are examined for decision making purposes. Topics include: the financial environment, risk and rates of return, capital budgeting techniques, the cost of capital and capital structure, analysis of financial statements, financial planning and control, and ethics in finance.

BUAD - 6113 Strategic & Creative Prob Solv, 3.00 Credits
Prerequisite(s): TMGT 7153 with D or better or BUAD 3153 with D or better
Level: Upper Upper Level
The focus of this course is the analysis of issues that managers typically address in technology-based environments and application of creative problem techniques. Emphasis is on fostering creative thinking as a way to approach and solve problems, and analysis of personal thinking styles. Problem, evaluation, and decision analysis techniques as well as computer-assisted problem solving will be used. Preparation and presentation of written and oral reports is required. The course offers an opportunity for students to present the communication of ideas and accomplishments through informal discussion, formal presentation, team decision-making and written case analysis. The applied case studies problems explored in this course are based upon real and current industry problems.

BUAD - 6213 Business in the European Union, 3.00 Credits
Level: Upper Applied Learning/Int'l Dom Trvl, Upper Level
The course describes how economic, political and social factors interrelate, and influence business in the European Union. Students will research sustainable business practices from different European Union member state's perspective. Guest lecturers and field trips are planned for students enrolled in the study abroad program.

BUAD - 6303 Mktg & Commng thru Soc Media, 3.00 Credits
Prerequisite(s): Cisy 1103 with D or better or CISY 1003 with D or better or CISY 1023 with D or better ) and ( BUAD 3153 with D or better or TMGT 7153 with D or better )
Level: Upper Upper Level
Upon completion of this course, the student will understand the key concepts of social media and their application in today's business environment. This course is designed specifically to address how businesses need related to the design, development, and implementation of social media projects in areas such as customer relationship management (CRM), marketing and public relations, and internal organizational communication. In addition to the presentation of key concepts via lectures, this course will use case studies to illustrate business applications of social media, and hands-on projects in which students will create their personal social "brand" online. Students will also work on a larger team project that involves the development of a social media project for not for profit organization that is selected and approved in coordination with the faculty.

BUAD - 6403 Proj Mgmt for Busi Profsnsns, 3.00 Credits
Prerequisite(s): Cisy 1103 with D or better or CISY 1003 with D or better or CISY 1023 with D or better or BUAD 4403 with D or better ) and ( BUAD 3153 with D or better or TMGT 7153 with D or better )
Level: Upper Upper Level
This course provides a comprehensive introduction to the standards, principles, guidelines, and processes for project management in business, government, and non-governmental organizations. The primary focus of this course will be the business project management processes identified in the Project Management Institute (PMI) Guide to the Project Management Body of Knowledge (PMBOK Guide). With the PMBOK Guide as the primary text, students will use this case study to develop key deliverables for a Project Management Plan. Microsoft Project will be used for some aspects of the case study work, but instruction in the use of the software will be limited to its basic functions (task listing, sequencing, and scheduling; resource identification and allocation; and cost estimating). Students will also become familiar with the use of GANTT charts and critical path analysis related to project management in general business settings.

BUAD - 6503 Intro to Supply Chain Mgmt, 3.00 Credits
Prerequisite(s): BUAD 3153 with D or better or TMGT 7153 with D or better
Level: Upper Upper Level
This course is an introduction to, along with application of, theoretical and practical techniques to managing a global supply chain. Course focus will be on managing material and information outside of the factory walls including aspects of product design collaboration, demand planning and forecasting, inventory management and deployment, understanding and designing distribution channels, procurement in global economy, general logistics, and career opportunities. Supply chain management (SCM) is a system approach to managing the entire flow of information, materials, and services from raw materials suppliers through operations facilities and warehouses to the end customer. This course stresses the need to identify and maintain customer value throughout the entire process. Students will learn how supply chain strategies support corporate strategies.

BUAD - 7004 Small Business Planning & Mgmt, 4.00 Credits
Prerequisite(s): MKTG 2073 with D or better or BUAD 3153 with D or better or TMGT 7153 with D or better
Level: Upper Applied Learning-Creative Work, Upper Level
This course offers the student a step-by-step approach to starting and managing a small business. The course covers the fundamental principles of marketing, law, management, and owner administration as applied to beginning a new venture. Each student will prepare a comprehensive individualized business plan to include a market profile, site analysis, competitive analysis, financials, goals and objectives, pricing and marketing strategies, and executive summary. At the conclusion of this course is to explore each step necessary in structuring and launching a new venture, and discussing ways of recruiting the necessary resources to accomplish this venture.
CHEM - 1013 Introductory Chemistry, 3.00 Credits
Level: Lower
Gen Ed - Natural Sciences, Liberal Arts and Science
This non-laboratory course is designed for students who need to understand the basic concepts of chemistry. Students will explore mathematical relationships using the factor labeling (conversion factor method), atomic and molecular structures (with emphasis on the special nature of carbon), pH, essential building block molecules, water, ions and ionization, and other topics of interest to those who live in our chemical world. Students cannot receive credit for CHEM 1013 if CHEM 1114 or CHEM 1984 is concurrently or previously taken.

CHEM - 1023 Foundations in Chemistry, 3.00 Credits
Level: Lower
Liberal Arts and Science
This course is a continuation of Chemical Principles I and is intended for physical science and proteins will be surveyed.

CHEM - CHEMISTRY
BUAD - 8023 Strategic Management Capstone, 3.00 Credits
Level: Upper
Applied Learning-Other, Upper Level
This course is application of theoretical approaches to Strategic Management. Major concepts, tools, and processes will be explored through lecture, readings, team activities, and case study applications. Major topics include creating a competitive advantage, analyzing the external and internal environment of an organization, recognizing an organization's intellectual assets, developing business level, corporate level, and international level strategies, strategic control and corporate governance, creating organizational designs, creating a learning organization and an ethical organization, and managing innovation and fostering corporate entrepreneurship. The completion of a business simulation will be required.

CHEM - 2124 General Chemistry II, 4.00 Credits
Prerequisite(s): CHEM 1114 with D or better or CHEM 1984 with D or better in 3 or better
Level: Lower
Applied Learning-Other, Course Fee $27.00, Gen Ed - Natural Sciences, Liberal Arts and Science
This course is a continuation of General Chemistry I and is intended for science majors. It includes atomic structure of matter, chemical reactions, thermochemistry, electronic structure concepts and problem-solving techniques that are essential in science. General topics include: Acids & Bases, Electrochemistry, and Nuclear Chemistry. After these foundations are laid, the class will provide a primer in a thorough introduction to the language, mechanisms, materials and concepts fundamental to organic chemistry. Level topics include: VSEPR and atomic orbital models; basic valence hybrid and molecular orbital theory; the language of stereochemistry; the basic activated complex M4 of Eyring and Polanyi; free radical reactions, notably as they occur in alkanes; alkene preparation and synthesis; SN1 and SN2 substitution reaction pathways notably as they occur in alkyl halides and alcohols; E1 and E2 elimination pathways, notably as they occur for alcohols and alkyl halides; the stereochemistry and energetics of cycloalkanes, and an introduction to retrograde, multi-step synthesis. Lab skills taught include: principles and practice of simple, fractional and steam distillation; recrystallization, solvent extraction, melting point, refractive index determination, IR and GC instrumental characterizations of compounds. Students are also required to synthesize three different compounds, including a multistep Grignard synthesis to 2-propanone and 1-bromobutane.

CHEM - 2984 Chemical Principles II, 4.00 Credits
Prerequisite(s): BUAD 2103 (or BUAD 2104) and BUAD 2984 with D or better
Level: Upper
Applied Learning-Practicum, Course Fee $6.00, Gen Ed - Natural Sciences, Liberal Arts and Science
This course is an in-depth examination of the chemistry and mathematical underpinnings connected to classical chemical calculations and wet chemical methods that form the foundation of modern quantitative chemistry. Using only a balance, buret and various classical volumetric devices, students will develop skills and understanding of gravimetric, titrimetric, complexometric, argentometric and redox methodologies. The course contains a thorough introduction to the language, mechanisms, materials and concepts fundamental to organic chemistry. Level topics include: VSEPR and atomic orbital models; basic valence hybrid and molecular orbital theory; the language of stereochemistry; the basic activated complex M4 of Eyring and Polanyi; free radical reactions, notably as they occur in alkanes; alkene preparation and synthesis; SN1 and SN2 substitution reaction pathways notably as they occur in alkyl halides and alcohols; E1 and E2 elimination pathways, notably as they occur for alcohols and alkyl halides; the stereochemistry and energetics of cycloalkanes, and an introduction to retrograde, multi-step synthesis. Lab skills taught include: principles and practice of simple, fractional and steam distillation; recrystallization, solvent extraction, melting point, refractive index determination, IR and GC instrumental characterizations of compounds. Students are also required to synthesize three different compounds, including a multistep Grignard synthesis to 2-propanone and 1-bromobutane.
COURSE DESCRIPTIONS

CHEM - 6854 Physical Chemistry, 4.00 Credits
Prerequisite(s): CHEM 2954 with C or better and PHYS 1064 with C or better and MATH 6114 with C or better
Level: Upper
Applied Learning-Practicum, Course Fee $57.00, Upper Level
This course provides an introduction to the use of molecular models, quantum mechanical methods, and statistical mechanics in the study of physical chemistry. Topics covered include: the basics of quantum mechanics, the construction of molecular orbitals, and the application of statistical mechanics to thermodynamics.

CISY - 2133 Microcomputer Systems I, 3.00 Credits
Level: Lower
Applied Learning-Practicum
This course provides an introduction to microcomputer systems, including the architecture of microprocessors, assembly language programming, and the use of system software.

CISY - 2143 Microcomputer Systems II, 3.00 Credits
Prerequisite(s): CISY 2133 with D or better
Level: Lower
Applied Learning-Practicum
This course covers the fundamentals of computer hardware and software, including the architecture of microprocessors, assembly language programming, and the use of system software.

CHEM - 7784 Biochemistry, 4.00 Credits
Prerequisite(s): CHEM 4524 with C or better and BIOL 2204 with C or better
Level: Upper
Applied Learning-Practicum, Course Fee $109.00, Upper Level
This course provides an introduction to the principles of biochemistry, including the structure and function of biological molecules, and the processes of metabolism.

CISY - 3193 Computer Architecture & Organi, 3.00 Credits
Prerequisite(s): CISY 1113 with D or better
Level: Lower
This course provides an introduction to computer architecture and organization, focusing on the design and implementation of computer systems.

CISY - 2093 Intro to Microcomputer Appl, 3.00 Credits
Level: Lower
An introductory course in business computing, focusing on microcomputer technology and applications. Students will learn basic computer operations and software use.

CISY - 1033 Intro to Information Tech, 3.00 Credits
Level: Lower
Applied Learning-Practicum
This course provides an introduction to the principles of information technology, including the basics of computer operations and software use.

CISY - 1103 Info Technology Management, 3.00 Credits
Level: Lower
Applied Learning-Practicum
This course covers the fundamentals of information technology management, including the principles of computer systems, data management, and network administration.

CISY - 1113 Computer Programming I, 3.00 Credits
Level: Lower
Applied Learning-Practicum
This course provides an introduction to computer programming, focusing on the principles of algorithm design and the use of computer software.

CISY - 2133 Computer Programming II, 3.00 Credits
Prerequisite(s): CISY 1113 with D or better
Level: Lower
Applied Learning-Practicum
This course covers the fundamentals of algorithms and data structures, and the use of computer software.

CISY - 2123 Intro to Web Page Development, 3.00 Credits
Level: Lower
Applied Learning-Practicum
This course provides an introduction to web page development, including the principles of HTML and CSS.

CISY - 4033 Comp Prgrmmng III/Data Strctu, 3.00 Credits
Prerequisite(s): CISY 2123 with D or better
Level: Lower
Applied Learning-Practicum
This course covers the fundamentals of data structures and software modeling, including the principles of algorithm design and the use of computer software.

CISY - 4053 Linux/Unix Admin and Scripting, 3.00 Credits
Prerequisite(s): CISY 4033 with D or better
Level: Lower
Applied Learning-Practicum
This course provides an introduction to the principles of Linux and Unix system administration, including the principles of system configuration and software packages.

Applied Learning-Practicum, Course Fee $109.00

Certified Network Associate certification exams upon completion of both courses.
CISY - 5030 Web Programming I, 3.00 Credits
Prerequisite(s): CISY 3223 with D or better
Level: Upper
Applied Learning-Practicum, Upper Level
A comprehensive survey of HTML and web publishing software to create robust, functional web pages. This course will examine HTML standards, browser capabilities, information architecture, bandwidth considerations, image format, maps, frames, forms, and server/client side scripting. Topics of current interest will be included, such as: JavaScript, VBScript, ActiveX, Active Server Pages, Dynamic HTML, and Cascading Style Sheets.

CISY - 5403 Database Concepts, 3.00 Credits
Prerequisite(s): CISY 2153 with D or better
Level: Upper
Applied Learning-Practicum, Upper Level
This course is a study of the terminology, design, implementation and software associated with database systems. Topics include the need for database management systems, file organization, sequential and direct access methods and physical implementation. Other topics covered are relational database design, entity and semantic models, hierarchical and network models, SQL, database applications using the internet, and sharing enterprise data. Students will design, implement, test, and debug database management systems according to industry standards.

CISY - 5613 UNIX/Linux Server Admin, 3.00 Credits
Prerequisite(s): CISY 3223 with D or better
Level: Upper
Upper Level
This course covers the fundamentals of administration of UNIX/Linux operating systems. This course will cover the operational procedures, log management, backups, logging, script use, and documentation. A comprehensive survey of all aspects of computer security. This includes host, network, web, database security as well as other objects that are prone to attack. The course will focus on the identification of security threats and countermeasures that can be taken to make these systems more secure. Students will develop a security plan for a small to mid-size company.

CISY - 5723 Essentials of Info Security, 3.00 Credits
Prerequisite(s): CISY 4033 with D or better or ELET 2012 with D or better
Level: Upper
Upper Level
This is a comprehensive survey of all aspects of computer security. This will include local host, network, web, database security as well as other objects that are prone to attack. The course will focus on the identification of security threats and countermeasures that can be taken to make these systems more secure. Students will develop a security plan for a small to mid-size organization.

CISY - 5813 Cloud Computing Architecture I, 3.00 Credits
Prerequisite(s): CISY 2153 with D or better and CISY 3223 with D or better
Level: Upper
Upper Level
This is an introductory course in the emerging field of cloud computing technologies. This course is the first course in a two course sequence which provides the student with a foundation and survey of the many new emerging cloud computing tools being used to recreate the internet. Topics will include SaaS, PaaS, IaaS, & IDaaS. Data Storage, Collaboration, Securing, and Disaster Recovery in the cloud. This course will be using industry leading cloud services and cloud datacenter technologies. A variety of cloud service providers' products and platforms will be explored through appropriate hands-on labs.

CISY - 5900 Directed Study, 1.00 TO 6.00 Credits
Prerequisite(s): CISY 4033 with D or better or ELET 2012 with D or better
Level: Upper
Applied Learning-Practicum, Upper Level
A capstone course which provides an integrative experience in applying the knowledge and skills of earlier course work, with particular emphasis on computer science management information systems, and communications skills in an integrated/internship setting; requires student to present and defend, orally and in writing, solutions to experienced real-world problems encountered.

CISY - 6323 Adv Pro with Vid Game Des & Dev, 3.00 Credits
Prerequisite(s): CISY 4003 with D or better or CISY 6503 with D or better
Level: Upper
Applied Learning-Practicum, Upper Level
This course is an advanced study of game programming using current tools to create video games. Topics covered include higher-level programming techniques, writing programs that use the windows user interface, and creating and using graphic objects. The gaming topics of data structures and algorithms, artificial intelligence, graphics modeling, and mathematics will also be covered. A final project will be required incorporating AI and physics.

CISY - 6503 Object-Oriented Programming, 3.00 Credits
Prerequisite(s): CISY 4103 with D or better
Level: Upper
Applied Learning-Practicum, Upper Level
Object-oriented analysis (OOA) and object-oriented design (OOD) concepts will be covered using an object-oriented programming (OOP) language such as Java. Topics include: objects, messages, classes, encapsulation, inheritance, polymorphism, code reuse, and method-driven and model-driven object-oriented approaches, methodologies and tools. Students will formulate object solutions to practical problems in the business and scientific areas.

CISY - 6703 Network Design Concepts, 3.00 Credits
Prerequisite(s): CISY 4033 with D or better
Level: Upper
Applied Learning-Practicum, Upper Level
This is a comprehensive survey of all aspects of network design. Students will design and implement network systems, utilizing various topologies, media, and protocols. Students will control network hardware such as switches, and routers. Design concepts will be implemented through a variety of laboratory exercises. Students will be required to analyze and present a network design plan.
CISY - 7003 Project Management, 3.00 Credits
Prerequisite(s): CISY 1003 with D or better or CISY 1023 with D or better or CISY 1113 with D or better or CISY 1123 with D or better or BUAD 5503 with D or better
Level: Upper
Applied Learning-Practicum, Upper Level
A comprehensive approach to project management tools and applications in an interdisciplinary and global environment. Emphasizing concepts, techniques, and principles associated with project management, this course is vital to students entering the IT management field. The course will focus on the changes in the computing environment including hardware, software, and networking. Students will be able to plan, schedule, budget, estimate, control, and monitor projects. In addition, they will become familiar with resource allocation, requisitioning, CPM, OCM, GANTT, and PERT. The use of project management software will be a major component of the course.

CISY - 7013 Network & Host Security, 3.00 Credits
Prerequisite(s): CISY 4033 with D or better and CISY 4053 with D or better
Level: Upper
Applied Learning-Practicum, Upper Level
This course will provide a practical, hands-on approach to the security of both hosts and networks. Students will be provided with the opportunity to perform penetration testing and then apply results to updating and patching hosts to mitigate discovered vulnerabilities. It includes access control and authentication systems as well as planning and implementation for wireless network security. A variety of client and network operating systems will be used. This course assumes a prerequisite knowledge of network operating systems and introductory security concepts. A major network security project is a requirement of the course and will be presented in written and oral formats.

CISY - 7023 Compu Forensics & Legal Issues, 3.00 Credits
Prerequisite(s): CISY 5203 with D or better or CISY 5613 with D or better
Level: Upper
Applied Learning-Practicum, Upper Level
This course provides a practical, hands-on approach to a myriad of security tools employed in wired and wireless networks. These security tools will include Industry Standard Firewalls, Virtual Private Networks (VPNs), network vulnerability scanners, wireless security probes, wireless intrusion detection systems, wireless scanners and wireless encryption cracking utilities. Advanced firewall concepts and technologies will be covered in depth and include design considerations for enterprise networks, large company networks and medium business networks. The course will include VPN concepts, technologies, and configurations for site to site VPNs as well as configurations for client remote access VPNs. The course will cover various vulnerability scanners for networks with heterogeneous operating systems and advanced firewall configurations. Students, in a laboratory environment, will attack and defend networks and submit a project paper detailing lessons learned and how to best defend both wired and wireless networks. The course assumes a prerequisite knowledge of network operating systems and security concepts.

CISY - 7203 Web Programming II, 3.00 Credits
Prerequisite(s): CISY 5303 with D or better
Level: Upper
Applied Learning-Practicum, Upper Level
A survey of programming languages and techniques for Web development. Topics include CGI (Common Gateway Interface), client side programming with JavaScript, dynamic content using Java and ActiveX, server side programming using Active Server Pages and VBScript, creating dynamic database driven content, and developing web based client/server database applications.

CISY - 8303 Sftw Intgtn & Interoperability, 3.00 Credits
Prerequisite(s): CISY 6703 with D or better and CISY 4723 with D or better
Level: Upper
Applied Learning-Practicum, Upper Level
In this course, students will integrate network system components to construct a working enterprise network. Topics addressed include integration of different network topologies, interoperability between network operating systems, integration of client-server applications, web based information systems, other support systems and support of end-user needs.

CISY - 8403 Web Applications, 3.00 Credits
Prerequisite(s): CISY 7203 with D or better
Level: Upper
Applied Learning-Practicum, Upper Level
In this capstone course, students will create web based multi-media applications for companies and/or organizations. These applications will demonstrate client and server side design, programming and maintenance. Additional topics include: systems development life cycle, web-site hosting and administration, e-commerce, and integrated software applications.

CISY - 8503 Appl Database Management, 3.00 Credits
Prerequisite(s): CISY 5403 with D or better and CISY 6503 with D or better
Level: Upper
Applied Learning-Practicum, Upper Level
In this capstone course, students will create and maintain Database Applications in a commercial and/or academic setting. This course provides an integrative experience applying the knowledge and skills of earlier course work, focusing on multi-user database systems. A major portion of this course will be design, implementation, and documentation of an enterprise data system. Additional topics may include: systems development life cycle, web applications, and application reliability and security.

CISY - 8603 Seminar Critical Issues in IT, 3.00 Credits
Prerequisite(s): CISY 4103 with D or better
Level: Upper
Applied Learning-Creative Work, Upper Level
This is a research-oriented and performance-oriented course. The course addresses critical (both theoretical and pragmatic) issues in information technology (IT). Issues of concern may include, but are not limited to, IT systems security, ethics of using IT systems, human-IT systems interface, and data analysis requirements at different organizational levels.

CISY - 8703 Information Security Capstone, 3.00 Credits
Prerequisite(s): CISY 5133 with D or better
Level: Upper
Applied Learning-Creative Work, Upper Level
In this course, students will integrate, configure and analyze network system components, security tools and procedures necessary to create enterprise class network security perimeter. Topics addressed include a combination of open source and proprietary security applications covering the fundamental components of an effective network security perimeter. These components include: firewalls, Intrusion Detection Systems (IDS), Intrusion Prevention Systems (IPS), Virtual Private Networks (VPN), authentication systems, port scanning, vulnerability scanning penetration testing, disaster recovery systems and security management systems. An in-depth analysis of the security risks associated with the TCP/IP protocol and associated sub-protocols will also be included as part of a final project.

CISY - 8706 Info Technology Internship, 6.00 Credits
Level: Upper
Applied Learning-Internship, Pass/Fail, Upper Level
Students will complete supervised field work in a selected business, industry, government or educational setting. Students carry out a planned program of educational experiences under direct supervision of an owner, manager or supervisor of information technology in an organization. Each intern will be supervised by a member of the faculty. Written and oral reports and a journal of work experience activities will be required. Evaluation will be based on the quality of experiences gained from the internship. Students will be required to complete a series of 4 brief investigative or evaluative papers while completing the internship in areas such as career development, organizational structures, organized labor, business management, security, policies, and/or industry and market trends. Two papers will be completed in each of the 6 hour internships. These courses are offered as a two-part alternative to CISY 8712, 8706 and 8716.

CISY - 8712 Info Technology Internship, 12.00 Credits
Level: Upper
Applied Learning-Internship, Pass/Fail, Upper Level
Students will complete supervised field work in a selected business, industry, government or educational setting. Students carry out a planned program of educational experiences under direct supervision of an owner, manager or supervisor of information technology in an organization. Each intern will be supervised by a member of the faculty. Written and oral reports and a journal of work experience activities will be required. Evaluation will be based on the quality of experiences gained from the internship. Students will be required to complete a series of 4 brief investigative or evaluative papers while completing the internship in areas such as career development, organizational structures, organized labor, business management, security, policies, and/or industry and market trends. Two papers will be completed in each of the 6 hour internships. These courses are offered as a two-part alternative to CISY 8712, 8706 and 8716. They are taken in sequence as two 6 credit hour classes. These 12 hours will be equivalent of CISY 8712.

CISY - 8716 Info Technology Internship, 6.00 Credits
Level: Upper
Applied Learning-Internship, Pass/Fail, Upper Level
Students will complete supervised field work in a selected business, industry, government or educational setting. Students carry out a planned program of educational experiences under direct supervision of an owner, manager or supervisor of information technology in an organization. Each intern will be supervised by a member of the faculty. Written and oral reports and a journal of work experience activities will be required. Evaluation will be based on the quality of experiences gained from the internship. Students will be required to complete a series of 4 brief investigative or evaluative papers while completing the internship in areas such as career development, organizational structures, organized labor, business management, security, policies, and/or industry and market trends. Two papers will be completed in each of the 6 hour internships. These courses are offered as a two-part alternative to CISY 8712, 8706 and 8716. They are taken in sequence as two 6 credit hour classes. These 12 hours will be equivalent of CISY 8712. Students may not enroll in CISY 8712 and CISY 8706.

CIVL - 1013 Portland Cement Concrete, 3.00 Credits
Prerequisite(s): CIVL 8712 and CISY 8706 / 8716.
Level: Upper
Applied Learning-Creative Work, Upper Level
In this capstone course, students will create web based multi-media applications for companies and/or organizations. These 12 hours will be equivalent to CISY 8712. Students may not enroll in CISY 8712 and CISY 8706 / 8716.

CIVL - 1011 Civil AutoCAD, 1.00 Credit
Level: Lower
Applied Learning-Field Study, Course Fee $15.00
This course introduces aggregation concrete as construction materials. Standard techniques of measurements and computation are presented and then applied to testing materials. The student is prepared to reach the level of Concrete Field Testing Technician Grade 4, with emphasis on the American Concrete Institute studies of Portland Cement Concrete, and on quality control in the field. Concrete masonry block is reviewed as a product of cement.
CIVL - 1182 Civil Tech Graphics, 2.00 Credits  
Level: Lower  
Applied Learning-Practicum  
This is an introductory course in construction/civil surveying graphics. The student will be introduced to scales, dimensioning, surveying maps, house plans, building codes, and construction terminology. Contour maps, wall sections, foundation plans, floor plans, and house elevations will be drawn and plotted using industry standard software.

CIVL - 1204 Surveying I, 4.00 Credits  
Prerequisite(s): MATH 1024 with D or better or MATH 1034 with D or better or MATH 1054 with D or better or MATH 1063 with D or better or MATH 1084 with D or better or MATH 2043 with D or better or MATH 2074 with D or better or MATH 2094 with D or better  
Level: Lower  
Applied Learning-Field Study  
This course is a study of the fundamentals of construction surveying. Emphasis is on the use and care of various types of surveying equipment, note keeping, basic surveying calculations and adjustment of data. The course is designed to introduce measurement techniques through applications in an outdoor laboratory environment.

CIVL - 2154 Quality Control of Const Matl, 4.00 Credits  
Level: Lower  
Applied Learning-Field Study  
This course will equip students with skills typical of a quality control technician in soils and associated concrete. Students will learn about the properties of soil, including laboratory testing of soil that will lead to the classification of soils. Students will also design and test asphaltic concrete mixes using industry procedures and standards.

CIVL - 2204 Surveying II, 4.00 Credits  
Prerequisite(s): CIVL 1204 with D or better  
Level: Lower  
Applied Learning-Field Study  
This is the second course of a two-semester sequence emphasizing plane and route surveying theory and techniques. Emphasis will be on circular curves, vertical curves, profiling, cross-sectioning, realignment of circular curves, spiral curves, earthwork calculations, construction stakeout procedures and an introduction to electronic distance measurement.

CIVL - 3204 Legal Asp & Prac of Land Surv, 4.00 Credits  
Prerequisite(s): CIVL 2204 with D or better  
Level: Lower  
Applied Learning-Field Study  
This course is a study of the fundamentals of construction surveying. Emphasis is on the use and care of various types of surveying equipment, note keeping, basic surveying calculations and adjustment of data. The course is designed to introduce measurement techniques through applications in an outdoor laboratory environment.

CIVL - 3214 Geodesy, 4.00 Credits  
Prerequisite(s): MATH 1054 with D or better or MATH 2043 with D or better or MATH 1063 with D or better  
Level: Lower  
Course emphasizes the techniques of precise horizontal and vertical control surveying used by government or private surveyors and engineering consultants. Use of directional theodolites, precise levels and total station measurement equipment are stressed. Projects are used to present underlying theory of field work, standards, specifications, and adjustment of horizontal and vertical data.

CIVL - 3553 Comm Bldg Const Methods & Prac, 3.00 Credits  
Prerequisite(s): CIVL 1011 with D or better and CIVL 1182 with D or better  
Level: Lower  
This course is a study of materials and methods of construction employed in commercial building construction. This course will be used to extend the students' graphics skills using BIM/3-D software as well as their knowledge of the building construction process. Topics include: foundation, steel frame and reinforced concrete construction. Throughout the course, attention will be given to sustainability of construction materials and methods.

CIVL - 4043 Construction Management, 3.00 Credits  
Level: Lower  
This course is a study of the business organizations, contracts, personnel and ethics used in construction projects. Topics include the stakeholders, contracts, cost accounting, construction documentation, planning and scheduling, bonding, insurance, labor relations and ethics as specifically experienced in the construction industry.

CIVL - 4103 Structures I, 3.00 Credits  
Prerequisite(s): ( MATH 1054 with D or better or MATH 1063 with D or better or MATH 1084 with D or better or MATH 2043 with D or better ) and ( PHYS 1024 with D or better or PHYS 1044 with D or better )  
Level: Lower  
This course emphasizes the design and development of reinforced concrete structures. 

CIVL - 4134 Contracts,Specs, & Estimating, 3.00 Credits  
Prerequisite(s): CIVL 3553 with D or better or ARCH 4014 with D or better  
Level: Lower  
Applied Learning-Creative Work  
This course is a study of contracts and specifications governing contractors in the construction phase of a project. Students will practice the estimating of earthwork, masonry, concrete, steel, and wood. Students will progress through manual takeoffs to electronic spreadsheets. At the completion of this course, the student will be able to create an estimate and a cost analysis for a construction project.

CIVL - 4204 Subdivision Theory & Appli, 4.00 Credits  
Prerequisite(s): CIVL 3204 with D or better  
Level: Lower  
Applied Learning-Practicum  
This course is an introduction to the U.S. Public Lands Survey System, the laws of simultaneous survey conveyances, and subdivision of lands. Governmental regulations and environmental considerations will be addressed. Industry standard software will be utilized in the laboratory.

CIVL - 4214 Surveying Practicum, 4.00 Credits  
Prerequisite(s): CIVL 3214 with D or better and CIVL 3204 with D or better  
Level: Lower  
Applied Learning-Practicum  
This course is an introduction to the concepts of field to office automation, the use of coordinate geometry (COGO) software programs and computer aided drafting (CAD) software programs. Emphasis will be placed on the use of the computer in the solution of problems and projects that stress data analysis, data adjustment, mapping calculations and the application of computer graphics.

CIVL - 4273 Photogrammetry & Image Interpr, 3.00 Credits  
Level: Lower  
This course will introduce the advantages of photogrammetry, LiDAR and Remote Sensing as a mapping and planning tool. The types of photography, photo scale, flight planning techniques and specifications, displacement calculations and stereoscopic measurement are covered.

CIVL - 4900 Directed Study, 1.00 TO 6.00 Credits  
Level: A student may contract for one to six credit hours of independent study through an arrangement with an instructor who agrees to direct such a study. The student will submit a plan acceptable to the instructor and to the department chairperson. The instructor and student will confer regularly regarding the process of the study.

CIVL - 5114 Land Surveying, 4.00 Credits  
Prerequisite(s): CIVL 3204 with D or better  
Level: Upper  
Upper Level  
A study of licensure requirements, professional liability and ethics. The legal concepts of the rules and regulations are presented and applied to written and unwritten transfers of land ownership. Riparian rights, reversionary rights, problems of appointment, procedures, both field and office, for locating written title boundaries and the writing of deed descriptions are discussed in both a theoretical and applied sense.

CIVL - 5213 Foundations and Concrete, 3.00 Credits  
Prerequisite(s): CIVL 4104 with D or better or CIVL 4103 with D or better  
Level: Upper  
Upper Level  
This course introduces students to basic design principles of reinforced concrete structural members such as beams, slabs, and walls. Topics will include bending of single and doubly reinforced beams, T-beams, and slabs, as well as shear design of these members. The design of development length and splicing of reinforcing bars in the members will be included as well. Methods and materials used in concrete work will be discussed with attention given to the materials and methods of formwork construction and pertinent ACI codes and regulations.

CIVL - 5900 Directed Study, 1.00 TO 6.00 Credits  
Level: Upper  
Upper Level  
A student may contract for one to six credit hours of independent study through an arrangement with an instructor who agrees to direct such a study. The student will submit a plan acceptable to the department chairperson. The instructor and student will confer regularly regarding the process of the study.

CIVL - 6104 Anlys & Adjmnts of Surv Mrntns, 4.00 Credits  
Prerequisite(s): MATH 2074 with D or better or MATH 2094 with D or better  
Level: Upper  
Upper Level  
This course focuses on environmental technology systems. Topics covered will include: basic environmental concepts, water quality, water pollution, drinking water, air pollution, noise pollution, erosion control and environmental assessments. During the course, the student will analyze systems for a large commercial building. These systems for a residence or small office building. Students will review blueprints and analyze systems for a large commercial building.

CIVL - 6105 Structural Analysis, 4.00 Credits  
Prerequisite(s): MATH 1033 with D or better or MATH 1034 with D or better or MATH 2043 with D or better or MATH 2074 with D or better  
Level: Upper  
Upper Level  
This course focuses on structural analysis. Topics covered will include: structural mechanics are covered.

CIVL - 6113 Environmental Tech Concepts, 3.00 Credits  
Prerequisite(s): MATH 1033 with D or better or MATH 1034 with D or better or MATH 2043 with D or better or MATH 1063 with D or better  
Level: Upper  
Upper Level  
This course focuses on environmental technology systems. Topics covered will include: basic environmental concepts, water quality, water pollution, drinking water, air pollution, noise pollution, erosion control and environmental assessments. During the course, the student will analyze systems for a large commercial building. These systems for a residence or small office building. Students will review blueprints and analyze systems for a large commercial building.

CIVL - 6123 Mechanical Systems, 3.00 Credits  
Prerequisite(s): CIVL 3553 with D or better or CIVL 3564 with D or better  
Level: Upper  
Upper Level  
An introduction to building equipment for single and multi-story projects including domestic water, sewer, heating and ventilating systems, and electrical systems. Students will design these systems for a residence or small office building. Students will review blueprints and design these systems for a residence or small office building. Students will review blueprints and analyze systems for a large commercial building.
CIVL - 6154 Supervisory Estimating, 4.00 Credits  
Prerequisite(s): CIVL 7503 with D or better  
Level: Upper  
Applied Learning-Creative Work, Upper Level  
This course provides in depth study of construction estimating as used in winning bids and the change order process during construction. The course teaches the student to use a quantity estimating software package to incorporate advanced estimating techniques into a final project cost estimate. During the course the students will complete estimates in several disciplines of construction.

CIVL - 6212 Construction Safety, 2.00 Credits  
Prerequisite(s): CIVL 3553 with D or better or ARCH 4014 with D or better  
Level: Upper  
Applied Learning-Creative Work, Upper Level  
This course is a comprehensive study of the requirements of an effective safety program that focuses on worker safety, improved productivity and accident risk management. The course will also provide students with an understanding of the Occupational Safety Health Administration (OSHA) standards and their application to the construction industry.

CIVL - 6214 Advanced Estimating, 4.00 Credits  
Prerequisite(s): CIVL 4143 with D or better  
Level: Upper  
Applied Learning-Practicum, Upper Level  
This course is an extension of topics learned in the basic estimating course. The course teaches students to use a database estimating software package to incorporate advanced estimating techniques into a final project cost estimate. During the course, the students will create estimates on several types of construction including commercial building and heavy civil projects. The student will also learn the concepts of database estimating including how to create and edit a database.

CIVL - 7013 Land Development & Design, 3.00 Credits  
Prerequisite(s): CIVL 1204 with D or better and ( MATH 1054 with D or better or MATH 1063 with D or better or MATH 1084 with D or better or MATH 2043 with D or better or MATH 2074 with D or better or MATH 2094 with D or better )  
Level: Upper  
Applied Learning-Creative Work, Upper Level  
This course is the first of a two-semester sequence required for all Geomatics/Land Surveying Engineering Technology Bachelor seniors. Students design and implement a technical project for completion in CIVL 8003. Project proposal and oral reports are presented for initial approval by department faculty. The weekly seminar encompasses professional licensure examination preparation, aspects of post-graduation professional employment, review of initial project proposal and consultation on project progress.

CIVL - 7103 Geographic Information Systems, 4.00 Credits  
Prerequisite(s): CIVL 3214 with D or better  
Level: Upper  
Applied Learning-Practicum, Upper Level  
This course is an introduction to GIS, especially the application of spatial analysis and modeling. Applications will cover hardware and software considerations, map overlays, automation in thematic and topographic mapping, raster/vector devices, data acquisition, and related database storage and algorithms. Advanced topics will include error modeling, data uncertainty, and new directions and impacts of GIS.

CIVL - 7213 Construction Systems, 3.00 Credits  
Prerequisite(s): CIVL 4143 with D or better  
Level: Upper  
Applied Learning-Practicum, Upper Level  
This course examines how people and machines interact to build efficient systems that improve productivity in the construction industry. This course will document existing and emerging construction systems and will delve extensively into production capacity and uses of construction equipment. This course culminates with a project to design equipment spreads for an earthwork project.

CIVL - 7223 Construction Project Planning, 3.00 Credits  
Prerequisite(s): CIVL 3554 with D or better or CIVL 3553 with D or better  
Level: Upper  
Applied Learning-Practicum, Upper Level  
Students will develop a construction project management logic diagram for large multi-phased projects. The students will use software for scheduling, monitoring, and "crashing" projects to evaluate alternatives to reduce time to completion and to ensure cost effectiveness and safety considerations.

CIVL - 7503 Construction Business and Law, 3.00 Credits  
Prerequisite(s): COMP 1503 with D or better *  
Level: Upper  
Applied Learning-Practicum, Upper Level  
This course is an exploration of construction contract types and language. Managing resources such as time, labor, equipment, materials and budget are introduced. Additionally students will be introduced to the business of construction through construction job site cost accounting. Effective oral and written construction supervision communication will be addressed.

CIVL - 7523 Construction Scheduling, 3.00 Credits  
Prerequisite(s): CIVL 7503 with D or better  
Level: Upper  
Applied Learning-Practicum, Upper Level  
In this course, students will study job site construction scheduling. Software will be employed to produce Critical Path Method analysis. Topics include Lean, Last Planner System, crew distribution and leveling as well as construction equipment resource loading. Students will be required to complete a scheduling project using appropriate industry documents and processes.

CIVL - 8003 Sr Seminar & Project Design 2, 3.00 Credits  
Prerequisite(s): CIVL 7001 with D or better  
Level: Upper  
Applied Learning-Creative Work, Upper Level  
In this course, students implement a capstone technical project proposed and designed in CIVL 7001. Each student must do research, prepare a plat/map, conduct a formal oral presentation and submit a comprehensive written report.

CIVL - 8104 Global Positioning Systems, 4.00 Credits  
Prerequisite(s): CIVL 3214 with D or better  
Level: Upper  
Applied Learning-Practicum, Upper Level  
This course is designed to provide an introduction to the following topics: The U.S. Global Positioning System; other satellite-based navigation systems; GPS terminology; sources of error; GPS accuracy in forested conditions; post-process differential correction; WAAS, DGPS; and mission planning.

CIVL - 8123 Construction Project Admin, 3.00 Credits  
Prerequisite(s): CIVL 4043 with D or better or CIVL 7503 with D or better  
Level: Upper  
Applied Learning-Practicum, Upper Level  
This course is an in-depth study of the documents and processes for construction project administration, including submittals, subcontracting, expediting, pay procedures, closeout and reporting. This course culminates in a simulated construction project where students assume various stakeholder roles.

CIVL - 8512 Construction Mgmt Internship, 12.00 Credits  
Prerequisite(s): CIVL 7503 with D or better  
Level: Upper  
Applied Learning-Practicum, Upper Level  
This course is a work experience designed to assist the student in making the transition from classroom to the construction industry. Students will complete an approved supervised work experience under the direct supervision of an owner, manager or supervisor in a construction related industry. Each student will have a planned work program of educational objectives approved by the student, site supervisor, and Internship Coordinator. Written and oral reports, along with a journal of work activities and experience, will be required.

CJUS - CRIMINAL JUSTICE

CJUS - 1003 Intro to Criminal Justice, 3.00 Credits  
Level: Lower  
This course examines the three segments of the criminal justice system in the U.S. - law enforcement, the courts and corrections. Included is study of their evolution, philosophy, structure, responsibilities, agencies, and ethical obligations. Also examined are the role of the U.S. Constitution and of state and federal laws, the role of the criminal justice system in a democratic society and current issues facing those who work in the criminal justice field.

CJUS - 2003 Introduction to Law, 3.00 Credits  
Level: Lower  
This course introduces students to civil and criminal law. It examines the historical development of laws in the United States, distinguishing between civil and criminal laws. It also examines the essential elements of substantive law, procedural law and civil processes, and how they interact, as well as the evolution of legal realism and legal interpretation. The roles of those involved with civil and criminal law to include types of courts, plaintiffs, defendants, police, prosecutors, judges and other court-related personnel are discussed. Special emphasis is placed on the basic principles to manage complex situations during the administration of justice.

CJUS - 3003 Cybercrime, 3.00 Credits  
Level: Lower  
As emerging technologies continue to redefine the very nature of crime, the legal apparatus in the United States and around world must adapt accordingly. This course is designed to provide an overview of topics related to cybercrime. The theories and legal issues, with emphasis on technology will be used to address cybercrime issues and to apply critical thinking skills to modern criminal justice practices, procedures, and policies related to cybercrime. Topics include legalistic, enforcement, behavioral, social, and technological issues that are related to the cybercrime problems.

CJUS - 4003 Corrections Process in the U.S. 3.00 Credits  
Prerequisite(s): CJUS 1003 with D or better  
Level: Lower  
This course provides an introduction to the corrections process and examines state, local and federal correctional programs in the United States. Included is the study of the evolution, philosophy, structure, responsibilities and types of correctional agencies as well as the roles and ethical obligations of those working in the corrections system. The impact of American Correctional Association Standards (ACA) on correctional agencies is examined. Attention also is paid to public policy as it relates to issues affecting the corrections process including incapacitation versus rehabilitation and offender versus victim rights.
from popular culture will inform students' own compositions in text-based, audio, video, directed study course must be so designated by the department chair. Writing is continued in agreement with the instructor. The student must submit a plan acceptable for the instructor.

COMP - 3603 Writing for Emergent Media, 3.00 Credits
Prerequisite(s): COMP 1503 with D or better and (LITR 2603 with D or better or LITR 2033 with D or better or LITR 2343 with D or better or LITR 2503 with D or better or LITR 2603 with D or better or LITR 2703 with D or better or LITR 2813 with D or better or LITR 2900 with D or better or LITR 2903 with D or better or LITR 2913 with D or better or LITR 3233 with D or better or LITR 4333 with D or better or LITR 7003 with D or better)
Level: Lower
Liberal Arts and Science
This course is an introduction to writing for emergent media. Students will be taught basic principles of good writing as they apply to various media forms, practices, and online audiences. An emphasis will be placed on textual and visual development for use in different contexts, such as digital narrative, Web page content, blogging, screenwriting, online journalism, and hypertext styles. Students will design, edit and publish online content using current methods and tools across different platforms. Ethics in writing for emergent media will be a focus in the course.

COMP - 5703 Technical Writing II, 3.00 Credits
Prerequisite(s): COMP 1503 with D or better * and (LITR 2603 with D or better or LITR 2033 with D or better or LITR 2343 with D or better or LITR 2503 with D or better or LITR 2603 with D or better or LITR 2703 with D or better or LITR 2813 with D or better or LITR 2900 with D or better or LITR 2903 with D or better or LITR 2913 with D or better or LITR 3233 with D or better or LITR 4333 with D or better or LITR 7003 with D or better or LITR 7013 with D or better or LITR 7023 with D or better)
Level: Upper
Applied Learning/Service-Learn, Gen Ed - Credit Only, Liberal Arts and Science, Upper Level
This course will prepare students to handle typical workplace assignments in a competent and professional manner. It will also prepare students to communicate their ideas effectively in writing to persons in and out of their particular professional disciplines. The course centers on the knowledge and practice of format and style in technical writing when producing superior level documents; this includes an emphasis on audience analysis and document design as well as research and editing decisions in the composition of long formats. A required component of this course is a Service-Learning project. An emphasis will be placed on oral presentations.

CTRP - 1113 Med & Legal Term for Court Rep, 3.00 Credits
Prerequisite(s): CTRP 1182 with D or better
Level: Lower
Health
This course is designed to give the student the basics of medical and legal terminology as required by the National Court Reporters Association's General Requirements and Minimum Standards (GRMS). Students will be able to use the terminology learned to build and enhance their personal dictionary and work with the shorthand writing machine to produce an instantaneous real-time translation of the terminology learned. The goal of the course is to give the student knowledge of anatomy and medical terminologies, including root words, prefixes, suffixes, body systems and functions, psychological and physical diseases, drugs, and methods of researching medical information, as well as knowledge of civil law, criminal law, the judicial system (discovery, trial, and appellate processes), and legal terms.

CTRP - 1162 Realtime Writing Theory Ia, 2.00 Credits
Level: Lower
Realtime Writing Theory I teaches students how to write the spoken word with punctuation by means of a conflict-free, real-time ready shorthand theory and provide instantaneous translation. It includes the use of online computer-aided technology and teacher interaction; live practice dictation for speed and accuracy; read back and analysis of shorthand notes. NCRA requirements include the following: students are required to transcribe steno notes and speed takes under timed institutional supervision or, if internet students, sign a sworn verification form stating that the work was completed without the aid of anyone present and without cheating. Speed takes shall be monitored and timed in the same way. Students are required to transcribe at least once a week. All speed tests and test recordings shall be deleted from the student's computer immediately following tests. Internet students must sign a sworn statement verifying that the material has been deleted from their computers and no backup has been made. Students shall have access to the minimum grading criteria as set forth by the NCRA requirements. Successful completion of the course requires a grade of "C" or better. The course includes online computer-aided technology for realtime translation.

CTRP - 1172 Realtime Writing Theory Ib, 2.00 Credits
Level: Lower
Realtime Writing Theory I teaches students how to write the spoken word with punctuation by means of a conflict-free, real-time ready shorthand theory and provide instantaneous translation. It includes the use of online computer-aided technology and teacher interaction; live practice dictation for speed and accuracy; read back and analysis of shorthand notes. NCRA requirements include the following: students are required to transcribe steno notes and speed takes under timed institutional supervision or, if internet students, sign a sworn verification form stating that the work was completed without the aid of anyone present and without cheating. Speed takes shall be monitored and timed in the same way. Students are required to transcribe at least once a week. All speed tests and test recordings shall be deleted from the student's computer immediately following tests. Internet students must sign a sworn statement verifying that the material has been deleted from their computers and no backup has been made. Students shall have access to the minimum grading criteria as set forth by the NCRA requirements. Successful completion of the course requires a grade of "C" or better. This course includes online computer-aided technology for realtime translation.

CTRP - 1174 Realtime Writing Theory I, 4.00 Credits
Level: Lower
Realtime Writing Theory I teaches students how to write the spoken word with punctuation by means of a conflict-free, real-time ready shorthand theory and provide instantaneous translation. It includes the use of online computer-aided technology and teacher interaction; live practice dictation for speed and accuracy; read back and analysis of shorthand notes. NCRA requirements include the following: students are required to transcribe steno notes and speed takes under timed institutional supervision or, if internet students, sign a sworn verification form stating that the work was completed without the aid of anyone present and without cheating. Speed takes shall be monitored and timed in the same way. Students are required to transcribe at least once a week. All speed tests and test recordings shall be deleted immediately. Internet students must sign a sworn statement verifying that the material has been deleted from their computers and no backup has been made. Students shall have access to the minimum grading criteria as set forth by the NCRA requirements.

CTRP - 1182 Realtime Writing Theory Ia, 2.00 Credits
Prerequisite(s): CTPR 1162 with C or better or CTPR 1172 with C or better
Level: Lower
In a continuation of Realtime Writing Theory I, Realtime Writing Theory II teaches students how to write the spoken word with punctuation by means of a conflict-free, real-time ready shorthand theory and provide instantaneous translation. It includes the use of online computer-aided technology and teacher interaction; live practice dictation for speed and accuracy; read back and analysis of shorthand notes. NCRA requirements include the following: students are required to transcribe steno notes and speed takes under timed institutional supervision or, if internet students, sign a sworn verification form stating that the work was completed without the aid of anyone present and without cheating. Speed takes shall be monitored and timed in the same way. Students are required to transcribe at least once a week. All speed tests and test recordings shall be deleted immediately. Internet students must sign a sworn statement verifying that the material has been deleted from their computers and no backup has been made. Students shall have access to the minimum grading criteria as set forth by the NCRA requirements. Successful completion of the course requires a grade of "C" or better. The course includes online computer-aided technology for realtime translation.
CTRP - 2282 Realtime Writing Theory IVb, 2.00 Credits
Prerequisite(s): CTRP 2262 or CTRP 2272 with C or better
Level: Lower
This course is a continuation of basic realtime writing theory. The student will continue to learn to write, read, and transcribe the spoken word by means of a conflict-free, realtime-ready shorthand theory and provide instantaneous translation. Students are required to transcribe steno notes and speed takes. NCRA requirements include the following: students are required to transcribe steno notes and speed takes under timed institutional supervision or, if an internet student, sign a sworn verification form stating that the work was completed without the aid of anyone present and without cheating. Speed takes shall be monitored and timed in the same way. Students are required to transcribe at least once a week. All speed takes and test recordings shall be deleted from the student's computer immediately following tests. Internet students must sign a sworn statement verifying that the material has been deleted from their computers and no backup has been made. Students shall have access to the minimum grading criteria as set forth by the NCRA requirements. Successful completion of the course requires a grade of "C" or better. The course includes online computer-aided technology for realtime translation.

CTRP - 2229 Realtime Writing Theory IVa, 2.00 Credits
Prerequisite(s): CTRP 2262 or CTRP 2272 with C or better
Level: Lower
This course is a continuation of basic realtime writing theory. The student will continue to learn to write, read, and transcribe the spoken word by means of a conflict-free, realtime-ready shorthand theory and provide instantaneous translation. Students are required to transcribe steno notes and speed takes. NCRA requirements include the following: students are required to transcribe steno notes and speed takes under timed institutional supervision or, if an internet student, sign a sworn verification form stating that the work was completed without the aid of anyone present and without cheating. Speed takes shall be monitored and timed in the same way. Students are required to transcribe at least once a week. All speed takes and test recordings shall be deleted from the student's computer immediately following tests. Internet students must sign a sworn statement verifying that the material has been deleted from their computers and no backup has been made. Students shall have access to the minimum grading criteria as set forth by the NCRA requirements. Successful completion of the course requires a grade of "C" or better. The course includes online computer-aided technology for realtime translation.
This course is a continuation of Speed Building I for Reporters and Captioners. The student will continue to learn to write, read, and transcribe the spoken word by means of a conflict-free, real-time shorthand theory. Reporting students must be able to transcribe five minutes of unfamiliar dictation with at least 95 percent accuracy in each of the areas listed: literary at 130 wpm, jury charge at 150 wpm, and two-voice at 170 wpm. Dictation includes two-voice and multi-voice testimony (including medical and technical material), literary, jury charge, and current events. Testing material used for speed takes will be given at incremental speeds on unfamiliar material; the same material will not be used more than once every six months. Students are required to transcribe steno notes and speed takes under institutional supervision or if online students, sign a sworn verification form stating that the work was completed without the aid of anyone present and without cheating. Speed takes shall be monitored and timed in the same way. Students are required to transcribe at least once a week. All speed takes and tests shall be deleted immediately. Online students must sign a sworn statement verifying that the recording material has been deleted from their computers and no backup has been made. Students shall have access to the minimum grading criteria as set forth by the NCRA. Successful completion of the course requires a grade of "C" or better. The course includes online computer-aided technology for realtime translation.

### CTRP - 4292 Speed Building IIib, 2.00 Credits
**Prerequisite(s):** CTRP 4282 with C or better or CTRP 4272 with C or better
**Level:** Lower

This course is a continuation of Speed Building II for Reporters and Captioners. The student will continue to learn to write, read, and transcribe the spoken word by means of a conflict-free, real-time shorthand theory. Reporting students must be able to transcribe five minutes of unfamiliar dictation with at least 95 percent accuracy in each of the areas listed: literary at 130 wpm, jury charge at 150 wpm, and two-voice at 170 wpm. Dictation includes two-voice and multi-voice testimony (including medical and technical material), literary, jury charge, and current events. Testing material used for speed takes will be given at incremental speeds on unfamiliar material; the same material will not be used more than once every six months. Students are required to transcribe steno notes and speed takes under institutional supervision or if online students, sign a sworn verification form stating that the work was completed without the aid of anyone present and without cheating. Speed takes shall be monitored and timed in the same way. Students are required to transcribe at least once a week. All speed takes and tests shall be deleted immediately. Online students must sign a sworn statement verifying that the recording material has been deleted from their computers and no backup has been made. Students shall have access to the minimum grading criteria as set forth by the NCRA. Successful completion of the course requires a grade of "C" or better. The course includes online computer-aided technology for realtime translation.
A plan acceptable to the instructor and to the department chairperson. The instructor and student will confer regularly regarding the process of the study.

CULN - CULINARY ARTS

CULN - 1083 Food Safety & Service Training, 3.00 Credits
Level: Lower
Applied Learning-Practicum
This course is an introduction to the basics of food safety and service sanitation with an emphasis on various types of food service operations, sanitation, preparation, and hygiene. The course will cover the basics of food safety and sanitation, as well as the importance of employee training in food service. The basics of food safety and sanitation will also be explored. Students will be required to sit for the Education Foundation of the National Restaurant Association exam at the completion of this course.

CULN - 1143 Culinary Foundations, 3.00 Credits
Level: Lower
Applied Learning-Practicum
This introductory course will teach students the proper procedures, mixing methods, and equipment used in basic baked goods production. Culinary and baking history will be discussed.

CULN - 1153 Baking Foundations, 3.00 Credits
Level: Lower
Applied Learning-Practicum
This introductory course will teach students the proper procedures, mixing methods, and equipment used in basic baked goods production. Culinary and baking history will be discussed.

CULN - 1373 Purchasing & Cost Control, 3.00 Credits
Level: Lower
This course incorporates basic math as related to the food service industry. Topics will include principles of food costs controls, daily yields and menu pricing, monthly report forms, operation efficiency and comparisons of similar operations. In addition this course will cover the principles of purchasing, receiving and storage. Students will learn the ABC's of inventory as well as how to utilize sales history and popularity percentages to create forecasting as it pertains to budgeting and production.

CULN - 1479 Kitchen Fundamentals, 9.00 Credits
Level: Lower
Applied Learning-Practicum, Course Fee $60.00
This course hybrid lab section introduces students to the fundamental aspects of baking. Students will learn about the production and handling of food, as well as how to utilize sales history and popularity percentages to create forecasting as it pertains to budgeting and production.

CULN - 1579 Baking Fundamentals, 9.00 Credits
Level: Lower
Applied Learning-Practicum, Course Fee $60.00
This course hybrid lab section introduces students to the fundamental aspects of baking. Students will learn about the production and handling of food, as well as how to utilize sales history and popularity percentages to create forecasting as it pertains to budgeting and production.
CULN - 2043 Fundamentals of Nutrition, 3.00 Credits
Level: Lower
This course will cover the function and importance of nutrients and vitamins in the body, daily nutritional requirements, important food sources and the effects of nutrient deficiencies. Nutritional guidelines and standards will also be reviewed. The importance of production, storing, and using nutritious ingredients in the daily production of food will be stressed. In addition, students will examine various topics related to the American diet such as fast foods, herbs and supplements, diet and exercise, allergies, special needs diets and food additives.

CULN - 2193 Menu Planning, 3.00 Credits
Level: Lower
This course will focus on the basic principles of menu planning with an emphasis on classical menu patterns, menu formats, and the relationship of the menu to the complete operation of a food service establishment. The pricing and profitability of menu items, menu design, as well food merchandising and styling will be covered.

CULN - 2263 Cooking Techniques & Preps, 3.00 Credits
Prerequisite(s): CULN 1143 with D or better or FDSR 1373 with D or better
Level: Lower
Applied Learning-Practicum
This course is a continuation of Culinary Foundations (CULN 1143). This course aims to provide understanding of cooking theory and mastery of a set of manual skills. These are applied to a wide range of cooking styles and products.

CULN - 2273 Baking Techniques & Prep, 3.00 Credits
Prerequisite(s): CULN 1153 with D or better
Level: Lower
Applied Learning-Practicum
This course will cover the proper procedures for mixing methods, and equipment used in intermediate baked goods production. Topics include laminated doughs, frozen desserts, intermediate yeast raised products such as baguettes and brioché, as well as intermediate baked goods, cakes, icings, and specialty desserts. The course will also introduce students to basic chocolate work, including tempering and piping.

CULN - 2479 Culininary Preparations, 9.00 Credits
Prerequisite(s): CULN 1479 with D or better or FDSR 1478 with D or better
Level: Lower
Applied Learning-Practicum, Course Fee $60.00
This lab is a study and practice of the principles, standards and procedures involved in quantity and quality food preparation. Students will rotate the duties involved in all areas of preparation, service, and sanitation within the a la carte restaurant and the cafeteria. The course emphasizes improvement of basic knife, fabrication, and bakery skills needed for the preparation of breakfast items, meat, fish and poultry, soups and vegetables.

CULN - 2489 Baking Preparations, 9.00 Credits
Prerequisite(s): CULN 1579 with D or better or FDSR 1578 with D or better
Level: Lower
Applied Learning-Practicum, Course Fee $60.00
This lab section develops intermediate level skills in baking and production. Students will build on skills learned in CULN 1579 and will rotate bi-weekly through experiences with yeast dough, pastries, specialty cookies, finishing and decorating.

CULN - 3162 Hospitality Accounting, 2.00 Credits
Prerequisite(s): CULN 1373 with D or better or ( FDSR 2183 with D or better and FDSR 2153 with D or better )
Level: Lower
This course focuses on introductory accounting principles and practices specific to the hospitality industry. Activities in this class are directed toward developing and refining a professional fluency in budget and forecast preparation. This class will also explore operational performance analysis based upon income statements and balance sheets. Students will study basic accounting principles, rules and standards. The course will introduce and raise awareness of the importance of business plans, tax implications, and cash controls.

CULN - 3173 Intl Cook, Garde Manger & Baki, 3.00 Credits
Prerequisite(s): CULN 2263 with D or better
Level: Lower
Applied Learning-Practicum
This course introduces baking products, techniques, advanced food preparation and regional cuisines. It is broken down into three separate modules; each one dealing with those three areas. The course will establish a strong foundation in basic baking, advance ability in higher level food preparations, and develop an understanding and appreciation for global cuisine.

CULN - 3251 Beverages, 1.00 Credit
Level: Lower
Applied Learning-Practicum
Students will learn about the history, classification, methods of production, and the characteristics of wine, spirits and beers. Mixology, lounge service, systems of beverage controls, laws controlling beverage sales, nonalcoholic beverages, and profitability will also be covered in this course.

CULN - 3253 Beverage & Fermentation, 3.00 Credits
Level: Lower
Students will learn about the history and production of beer, wine and cheese through hands-on experience. They will develop an understanding of styles and characteristics of different types of beer, wine, and cheese. The course covers systems of beverage controls, laws controlling beverage sales, and nonalcoholic beverages.

CULN - 3293 Intl Baking & Cooking Fundamen, 3.00 Credits
Prerequisite(s): CULN 2273 with D or better
Level: Lower
Applied Learning-Practicum
This course will teach students the proper baking procedures and mixing methods used to produce advanced baked goods. The course will cover specialty items such as mousses, puddings, and cream desserts, as well as meninges, advanced gateaux and tortes. Students will learn about advanced bakery techniques using gingerbread, marzipan, and specialty sauces. Ethnic desserts and baked goods will be a focus of the course. Baking students will also become familiar with fundamental culinary skills.

CULN - 3353 Hospitality Supervision, 3.00 Credits
Level: Lower
The emphasis of this course is on kitchen management techniques, cost control, employee hiring and supervision. A major focus will be budgets, including labor and product cost controls and analysis. The importance of internal and external communications, conflict management, and creative problem solving will be stressed. The hiring, training, and rating of employees, as well as the role of unions in the hospitality industry, will be covered. Students will give an oral report on their work experience required by department mandates as it relates to personnel management. Each student will be prepared for job procurement through resume writing, cover letter creation and insights on interviewing.

CULN - 3479 Advanced Culinary Preparation, 9.00 Credits
Prerequisite(s): CULN 2479 with D or better or FDSR 2479 with D or better
Level: Lower
Applied Learning-Practicum, Course Fee $60.00
Students will practice menu planning and the preparation of restaurant items in the working labs of the program. This lab provides hands-on experience in order to develop supervisory and management skills in the kitchens and dining room. In addition, the student is expected to develop a mastery of skills for a la carte and volume preparation of basic sauces, appetizers, vegetables, grains and pastas, salads, sandwiches, and a variety of entrees, with an emphasis on accepted culinary techniques and presentation.

CULN - 3489 Advanced Pastry Preparation, 9.00 Credits
Prerequisite(s): CULN 2489 with D or better or FDSR 2489 with D or better
Level: Lower
Applied Learning-Practicum, Course Fee $60.00
This lab section will develop advanced techniques and disciplines for fine dining and high volume baking operations. In weekly rotations in the lab, students will gain hands-on experience producing wedding cakes, specialized pastries and cookies, layer and ethnic cakes, tortes, seasonal baked goods, and specialty doughs. Management of a bakery operation will also be addressed.

CULN - 4003 Intro to Food Science & Techno, 3.00 Credits
Level: Lower
Applied Learning-Practicum
This course is an introduction to food science - the biology, chemistry, and physics of foods and food ingredients and food production. The role of formulation, heating, and cooling on foods, as well as the way taste, texture and appearance affect food production will be covered. The chemistry and interactions of key food ingredients are a major focus of the course. There will be an emphasis on the scientific method as it pertains to food science and technology, ingredient substitution, and the development and testing of food products. Students will gain experience creating new or improved food products using formulation variables.

CULN - 4043 Advanced Pastry, 3.00 Credits
Prerequisite(s): CULN 3293 with D or better
Level: Lower
Applied Learning-Practicum
This course will introduce the student to specialized techniques in baking and pastry. Skill development covering petit fours, candy making, decorative sugar, wedding cakes, various ethnic ingredients, desserts, and baked goods will be the focus. Bakery packaging and merchandising will also be covered.

CULN - 4163 Advanced Cuisine, 3.00 Credits
Prerequisite(s): CULN 3173 with D or better
Level: Lower
Applied Learning-Practicum
This course deals with advanced cooking techniques and cuisine issues. Much of the activity is directed toward developing and refining a personal fluency in budget and forecast preparation. This class will also explore operational performance analysis based upon income statements and balance sheets. Students will study basic accounting principles, rules and standards. The course will introduce and raise awareness of the importance of business plans, tax implications, and cash controls.

CULN - 4173 Intl Cook, Garde Manger & Baki, 3.00 Credits
Prerequisite(s): CULN 2263 with D or better
Level: Lower
Applied Learning-Practicum
This course introduces baking products, techniques, advanced food preparation and regional cuisines. It is broken down into three separate modules; each one dealing with those three areas. The course will establish a strong foundation in basic baking, advance ability in higher level food preparations, and develop an understanding and appreciation for global cuisine.

CULN - 4253 Hospitality Management, 3.00 Credits
Prerequisite(s): CULN 3353 with D or better
Level: Lower
This course builds on the supervisory elements covered in Hospitality Supervision. The fundamentals of personnel management relating to motivation, performance, employee rights and labor relations will be covered. In addition, the course will emphasize basic planning, organizing, staff development, and interfacing with government and the public. Students will be exposed to management and motivation theory, allowing them to begin developing personal philosophies in both areas.

CULN - 4479 Culinary Capstone, 9.00 Credits
Prerequisite(s): CULN 3479 with D or better
Level: Lower
Applied Learning-Practicum, Course Fee $60.00
Using the knowledge and experience gained through previous lecture and lab experiences, this capstone course provides students with hands-on managerial experience in the planning, organizing and direction of kitchen production. Students will rotate through experiences as chef, station cook and dining room manager. These experiences will help students develop a personal/professional cooking style through creativity, innovation and synthesis based on previous lab exposures. The lab will emphasize refined sauce making, braising, smoking, cooking proteins to order and sophisticated plate presentation.

CULN - 4489 Pastry Capstone, 9.00 Credits
Prerequisite(s): CULN 3489 with D or better
Level: Lower
Applied Learning-Practicum, Course Fee $60.00
In this capstone course students will incorporate earlier lab and lecture experiences, and will demonstrate managerial level skills in the planning, organizing, and direction of bake-shop production. Students will be encouraged to develop a personal/professional baking style through creativity, innovation, and synthesis. In weekly rotations in the lab, students will gain hands-on experience with a wide variety of pastry items including but not limited to plated desserts, cakes and tortes, chocolates, sculpture, sugar artistry, and production inventory control, ordering, and pricing, as well as promotion and merchandising of bakery products will also be covered.
DCAD - DRAFTING/CAD

DCAD - 1053 Technical Calculations I, 3.00 Credits
Level: Lower
Mathematics review, basic algebra, industrial applications applying the decimal and metric systems, use of reference books and electronic calculators. Successful completion of this course requires a grade of “C” or better.

DCAD - 1205 Industrial Drafting Intro, 5.00 Credits
Level: Lower
Preparation of drafting and machine detail drawings using proper dimensioning practices and applications, development of conventional drafting symbols to aid the student in creating working drawings that they will be instructed on how to use the software to develop their skills in the visualization of motion and time.

DCAD - 1405 Industrial Drafting II, 5.00 Credits
Prerequisite(s): DCAD 1205 with D or better
Level: Lower
Applied Learning-Practicum
The use and application of auxiliary view drawings. Also the use and application of development drawings. Students will develop, through projection and solid modeling processes, developed sheet metal developments and intersections. This course will address aspects of freeform modeling and HVAC applications.

DCAD - 2053 Introduction to Unigraphics, 3.00 Credits
Level: Lower
Applied Learning-Creative Work
In this course the student will model, using a current version of 3D parametric software, industrially correct systems. Application of geometric dimensioning and tolerances to appropriate detail drawings. This is a five (5) week course.

DCAD - 2053 Technical Calculations II, 3.00 Credits
Level: Lower
Applied Learning-Creative Work
Prerequisite(s): DCAD 1205 with D or better
Successful completion of this course requires a grade of “C” or better.

DCAD - 2205 Industrial Drafting III, 5.00 Credits
Level: Lower
Applied Learning-Practicum
Develop and complete industrial assembly drawings and detail drawings for assemblies, using appropriate dimensioning and ANSI tolerances, complete bill of materials including raw stock materials, piping and structural members. Converting castings to fabrication parts will also be addressed. Successful completion of this course requires a grade of 70% or better on a comprehensive II exam.

DCAD - 2305 Welding Drawings, 5.00 Credits
Level: Lower
Applied Learning-Practicum
Prerequisite(s): DCAD 1205 with D or better
Successful completion of this course requires a grade of 70% or better on a comprehensive II exam.

DCAD - 2805 Fitting for Residential Const, 5.00 Credits
Level: Lower
Applied Learning-Practicum
Prerequisite(s): DCAD 1205 with D or better
Prerequisite(s): DCAD 1205 with D or better
Successful completion of this course requires a grade of 70% or better on a comprehensive II exam.

DCAD - 3023 Geometric Dimen & Tolerncng, 3.00 Credits
Level: Lower
Correctly specify geometric form controls and positional tolerances to engineering drawings with the use of ANSI geometric symbols.

DCAD - 3024 Layout & Details, 4.00 Credits
Level: Lower
Applied Learning-Practicum
Preparation of mechanical design layouts, details and assembly drawings, using mechanisms such as linkages, pneumatics, hydraulics, gear trains, belt and chain drives and control systems. Application of geometric dimensioning and tolerances to appropriate detail drawings. This is a five (5) week course.

DCAD - 3044 Fluid Power, 4.00 Credits
Level: Lower
Applied Learning-Practicum
In this course students will prepare layouts of single and double line drawings for hydraulic and pneumatic systems, and will also study and apply mathematical calculations as they pertain to their assignments. The use of vendor catalogs and line components are used in the preparation of the above-mentioned drawings. The student will also prepare a sequence of operations explaining how each schematic operates.

DCAD - 3103 Intro to 3D Parametric Model, 3.00 Credits
Level: Lower
Applied Learning-Practicum
The student will model, using a current version of 3D parametric software, industrially correct projects giving careful consideration to their interrelated features. The student will use both sketches and Boolean operations to accomplish their models. The importance of parametric controls within and between part files will be stressed.

DCAD - 3104 Advanced Mechanical Layout, 4.00 Credits
Level: Lower
Applied Learning-Practicum
This course will address advanced layout techniques and practices that are typical in the design industry. Students will be presented with design concepts and will use problem solving techniques to accomplish tasks. The course includes the study of power transfer systems such as couplings, chain and sprocket drives, and the use of motors and bearings. Instruction in the application of clutches, and their uses in machine design, will also be stressed.

DCAD - 4003 Senior Project, 3.00 Credits
Level: Lower
Applied Learning-Creative Work
This course shall be considered a capstone project for the authentic assessment of the curriculum. The student shall select a project that shall challenge the student and demonstrate various abilities and skills acquired in their previous classes. This project shall include an oral presentation along with a written report and a demonstration of their chosen project. This demonstration may include all associated drawings, a finished part of their design, and an electronic “slide show”. This course is designed as a research/lab course to design/improve a consumer product. Instructor shall supply minimal guidance in the development of this project.

DCAD - 4125 Process Piping I, 5.00 Credits
Level: Lower
Applied Learning-Practicum
Applied Learning-Practicum
This course will facilitate the concepts and principals employed by drafters in the Industrial Process Piping industry. Using practical laboratory application with topics including flow diagrams, orthogonal and isometric piping drawings, plan & elevation piping arrangements, selection of valves, pipe racks and supports. Students will generate a variety of accurate CAD piping assignments similar to the ones currently used in industry today.

DCAD - 4155 Technical Illustration, 5.00 Credits
Level: Lower
Applied Learning-Practicum
In this course students will master isometric exploded view technical illustration, including such topics as applications, pictorial selections, and illustration techniques. In addition students will learn about basic printing process, scaling artwork for press runs and coordinating with printing firms. The student will also supply complete assembly instructions (sequence of operations) explaining how this job is put together and functions.

DGMA - DIGITAL MEDIA & ANIMATION

DGMA - 1333 Survey of Animatn & Visual Eff, 3.00 Credits
Level: Lower
This course will take students through a comprehensive history of animated films beginning with their conception in the early 1900’s through the present. Students will learn how the medium reflects social issues, political views as well as human creativity. The various types of animation and how they were created in different countries and cultures will be the major focus. The screenings and discussions will span various genres and styles of animation including anime, experimental, commercial, computer, and independent film as well as gaming.

DGMA - 1401 Freshman Seminar, 1.00 Credit
Level: Lower
This introductory course prepares students with basic skills that will help them succeed in the Graphic & Media Design or Digital Media & Animation programs. These skills include but are not limited to: file management, time management, research practices, effective critique strategies, and online portfolio management.

DGMA - 1403 Digital Foundations I, 3.00 Credits
Level: Lower
Applied Learning-Practicum
Applied Learning-Practicum
This is an introductory digital media course that focuses on the manipulation of both raster and vector-based imagery. Students will learn the basics of Photoshop as well as digital imaging and use the software to develop their skills in the visualization of motion and time. The course will have a strong emphasis on principles of lighting, layout and composition.

DGMA - 1413 Foundations:Form/Space Rlnshp, 3.00 Credits
Level: Lower
This is a visual rendering course in the Digital Media and Animation major. Broad experience is emphasized with diverse graphic tools and techniques to develop observation of and analyze visual information. This course is designed to deconstruct preconceived ideas of form/space relationships and replace them with objective understandings.
DGMA - 1423 Intro to Visual Communication, 3.00 Credits
Level: Lower
This course focuses on creative, technical, and environmental/collaborative issues involved in visual communication. Students will learn about the elements and principles of design, how to look at and critique photography, photographic vocabulary, and be introduced to digital photography covering basic to advanced techniques. This course introduces students to the art of creating cartoon-style animation. Emphasis is given to understanding the creative process and design thinking using multiple models of visual communication. Students will explore the history and theories associated with the use of color in graphic design, and develop design practices that utilize concept-driven color solutions for projects. Students will gain experience in the techniques and color management practices necessary for the production of effective screen-based and print-based design.

DGMA - 2003 Media Forge, 3.00 Credits
Prerequisite(s): DGMA 1403 with C or better
Level: Lower
This course involves design teams on real-world media design problems, with emphasis on video production, motion graphics and project management.

DGMA - 2503 Digital Foundations II, 3.00 Credits
Prerequisite(s): DGMA 1403 with C or better
Level: Lower
This course expands upon the fundamental concepts behind visual communications introduced in previous courses. Emphasis will be placed on the creative process and design thinking using multiple models of visual communication. Students will explore the history and theories associated with the use of color in graphic design, and develop design practices that utilize concept-driven color solutions for projects. Students will gain experience in the techniques and color management practices necessary for the production of effective screen-based and print-based design.

DGMA - 3111 Japanese Media, 1.00 Credit
Level: Lower
This course is an overview of Japanese art, cinema and digital media. Students will explore Japanese media in native and transnational contexts through a series of lectures and research projects. Special emphasis is given on communication strategies for art and digital media collaboration across cultures, with the goal of participation in a short-term study abroad program.

DGMA - 3113 Studio Tokyo, 3.00 Credits
Prerequisite(s): DGMA 3111 with D or better and JAPN 1203 with D or better
Level: Lower
This course provides an introduction to 3D modeling, texturing, lighting and rigging. Students will explore the use of current non-linear editing technology. Class projects will develop an understanding of the methods used for creating, sampling and storing digital video and audio and the constraints placed on these media assets when used for media based products. Emphasis is placed upon the technology of digital video and audio, including: formats, data rates and compression algorithms.

DGMA - 3113 Studio Tokyo, 3.00 Credits
Prerequisite(s): CIAT 4103 with C or better or DGMA 4103 with C or better
Level: Upper
This course explores the fundamental concepts of sound as a creative medium. Emphasis will be placed on concurrent development of theory and practice of sound and how it contextualizes visual experience. Students will learn about waveform synthesis, expanded Foley techniques, electronics, performance, acoustics and theories of listening. By the end of this course, students will create both stand alone and integrated sonic artworks for use in film, interactive and other digital media applications.

DGMA - 3503 Sound Design, 3.00 Credits
Prerequisite(s): DGMA 2503 with C or better
Level: Upper
This course explores fundamental concepts of sound as a creative medium. Emphasis will be placed on concurrent development of theory and practice of sound and how it contextualizes visual experience. Students will learn about waveform synthesis, expanded Foley techniques, electronics, performance, acoustics and theories of listening. By the end of this course, students will create both stand alone and integrated sonic artworks for use in film, interactive and other digital media applications.

DGMA - 3603 Production I, 3.00 Credits
Prerequisite(s): DGMA 1403 with C or better and CIYS 1113 with C or better
Level: Lower
This course focuses on the use of current non-linear editing technology. Class projects will develop an understanding of the methods used for creating, sampling and storing digital video and audio and the constraints placed on these media assets when used for media based products. Emphasis is placed upon the technology of digital video and audio, including: formats, data rates and compression algorithms.

DGMA - 3703 2D Game Design, 3.00 Credits
Prerequisite(s): DGMA 1403 with C or better and CIYS 1113 with C or better
Level: Lower
This course introduces students to the use of current non-linear editing technology. Class projects will develop an understanding of the methods used for creating, sampling and storing digital video and audio and the constraints placed on these media assets when used for media based products. Emphasis is placed upon the technology of digital video and audio, including: formats, data rates and compression algorithms.
DGMA - 5403 Advanced Modeling, 3.00 Credits
Prerequisite(s): DGMA 2403 with C or better
Level: Upper
Applied Learning-Creative Work, Upper Level
This course builds on the knowledge and skills gained in Interactive Media. Students will expand on skills developed in previous courses. Special emphasis will be given to the incorporation of video and animation in interactive environments. Students will explore the possibilities of communication through interactive media in studio projects and complete interactive titles of their own design that incorporate concepts covered in class.

DGMA - 5900 Directed Study, 1.00 TO 4.00 Credits
Prerequisite(s): DGMA 1403 with D or better
Level: Upper
Upper Level
A student may contract for one to four credit hours of independent study through an arrangement with an instructor who agrees to direct such a study. The student will submit a plan acceptable to the instructor and to the department chairperson. The instructor and student will confer regularly regarding the process of the study.

DGMA - 6103 Production IV, 3.00 Credits
Prerequisite(s): DGMA 3603 with C or better
Level: Upper
Applied Learning-Creative Work, Upper Level
This is an advanced course that expands upon the fundamental concepts involved in time based visual communications. Emphasis will be placed on the creative process of making images that can convey ideas and information to others. Students will learn advanced cinematography, editing and collaborative workflow techniques while incorporating expanded theoretical concepts from the history of narrative and non-narrative media to their projects.

DGMA - 6203 Motion Graphics, 3.00 Credits
Prerequisite(s): DGMA 5103 with C or better or DGMA 3603 with C or better
Level: Upper
Applied Learning-Creative Work, Upper Level
From experimental video and film title sequences to revolutionary TV commercials, broadcast design and motion graphics are used to inspire and influence. Through a series of exercises and projects, students will develop skills in motion design and compositing, utilizing techniques developed in previous courses.

DGMA - 6303 Special Topics Media Design I, 3.00 Credits
Prerequisite(s): DGMA 4103 with C or better
Level: Upper
Upper Level
This course focuses on current issues in media design and explores the latest techniques and processes. Students will evaluate emerging technologies and the changing role of media design. Students will utilize research-based practices as a catalyst in the generation of project(s) aligned with a special topic. Topics may vary each time the course is offered.

DGMA - 6413 Advanced Animation, 3.00 Credits
Prerequisite(s): DGMA 3403 with C or better
Level: Upper
Applied Learning-Creative Work, Upper Level
This course is a continuation of the sequence of animation, focusing on more in depth and complex character animation as well as the animation of organic and non-organic shapes and object. Areas covered in this class include: pre-visualization, advanced character set-up and animation, facial animation, soundtrack synchronization, and advanced animation principles and techniques.

DGMA - 6503 Interface Design, 3.00 Credits
Prerequisite(s): DGMA 4103 with C or better
Level: Upper
Upper Level
This course will examine the theory, design and evaluation of interactive interfaces. Students will explore user-centered interactive design through a series of case studies and studio experiments. Students will analyze existing professional interfaces and construct interfaces of their own design focused on usability and intuitive interaction. Emphasis will be put on design for screen-based and physical interfaces, as well as historical and current research in interface usability.

DGMA - 6533 Game Design Studio 1, 3.00 Credits
Prerequisite(s): DGMA 4303 with C or better and CISSY 1113 with C or better
Level: Upper
Applied Learning-Creative Work, Upper Level
In this course, students will collaborate in game production. Focus in this course will be placed on Agile software development. Production emphasis will include behavior design and scripting, asset design, interface testing, and effective professional communication. Students will be introduced to distribution processes for independent games.

DGMA - 6603 Media Forge II, 3.00 Credits
Prerequisite(s): DGMA 2603 with C or better or DGMA 5103 with C or better
Level: Upper
Applied Learning-Practicum, Upper Level
This course continues to develop the students' media design studio practice. Students in this upper level course lead design teams on real-world media design problems, with emphasis on video production, motion graphics, and project management.

DGMA - 7203 Senior Seminar, 3.00 Credits
Level: Upper
Upper Level
This seminar will serve two purposes. The first is to enhance students' understanding of opportunities in the field of animation and digital media through presentations, workshops and discussions. The second is to generate new techniques for problem solving in digital media projects. The course will include in-class exercises, discussions and responses to visiting artist presentations.

DGMA - 7403 Senior Studio I, 3.00 Credits
Prerequisite(s): DGMA 6103 with C or better and DGMA 6413 with C or better
Level: Upper
Applied Learning-Creative Work, Upper Level
In this course, students will integrate aspects of their studies from the previous three years in a semester-long production. Students will use this semester to create a short animation, video or interactive piece from start to completion. Students will be responsible for all aspects of this project, including conceptualization, design, pre-production, animation, cinematography, sound design, post production and final delivery.

DGMA - 7503 Digital Media & Amnmt Internsh, 3.00 Credits
Level: Upper
Applied Learning-Internship, Pass/Fail, Upper Level
This course provides the students with practical application of skills in the Digital Media and animation major. The internship provides valuable real-life experience while extending the skills of the student towards various businesses, organizations, and professionals. The student will be responsible for all aspects of the project for a business or organization.

DGMA - 7603 Advanced Motion Graphics, 3.00 Credits
Prerequisite(s): DGMA 6203 with C or better
Level: Upper
Applied Learning-Creative Work, Upper Level
This course builds on the knowledge and skills gained in Motion Graphics. Focus is on 3D motion graphics, special effects, and compositing. Students will complete projects using Motion Graphics software.

DGMA - 7703 Adv Topics Interactive Design, 3.00 Credits
Prerequisite(s): DGMA 5603 with C or better
Level: Upper
Upper Level
In this course students will expand on skills developed in Interactive Media, and apply them in interactive design projects that work across platforms. Students will build interactive projects both individually and in groups that visualize complex data sets and respond to active and passive user input. Special emphasis will be given to development of media for emerging technologies.

DGMA - 7803 Professional Practices, 3.00 Credits
Prerequisite(s): DGMA 6103 with C or better
Level: Upper
Upper Level
In this course there will be an exploration of the importance of integrity in professional relationships, which lies in all aspects of the design process. Students will examine multiple communication paths and how to maintain coherent communication that follows the design process from conception to completion. Forms, documents and ethical issues of the business relationship shall be covered.

DGMA - 8103 Portfolio, 3.00 Credits
Prerequisite(s): CIAT 7403 with C or better or DGMA 7403 with C or better
Level: Upper
Upper Level
This course will prepare students for the task of finding the next opportunity to advance their professional career be it graduate school, employment in industry, exhibition and/or freelance work. The students will develop a strategy to promote skills in an ever-changing field. Instruction will be given to develop a professional identity that is conveyed in the design of their portfolio. Current print and web design software will be utilized to produce an electronic portfolio detailing their work.

DGMA - 8106 Senior Studio Project II, 6.00 Credits
Prerequisite(s): CIAT 7403 with C or better or DGMA 7403 with C or better
Level: Upper
Applied Learning-Creative Work, Upper Level
This is a cumulative two-part course where students will integrate aspects from their studies of the previous three years. Students will use this semester to create one of the following: a 3D animated film; a 2D animated film; and Experimental Animation film (Stop Motion, Mixture of 3D and 2D animation or a fully Interactive/Interactive Media project). Students will produce all pre-production work including proposal, storyboards and animatics. Students will also generate all post-production work including editing, sound mixing and final delivery format (using current technology) prior to a film screening.

DGMA - 8203 Media Design Seminar, 3.00 Credits
Prerequisite(s): DGMA 6103 with C or better
Level: Upper
Upper Level
This seminar will prepare Graphic Media and Design seniors to transition into the professional world by focusing on critical self-evaluation. Students will examine their own body of work as well as the work of professionals in the field. Special focus will be given to a designer's responsibilities in social, cultural, and environmental contexts. This course will include field trips and lectures from visiting artists.

COURSE DESCRIPTIONS
ECON - 2023 Principles of Microeconomics, 3.00 Credits
Level: Lower
Gen Ed - Social Sciences, Liberal Arts and Science
This course provides an analysis of the basic market forces of supply and demand, and economic outcomes under different market structures such as competitive, imperfectly competitive and monopolistic markets. The labor and capital markets are analyzed. In addition, the economics of the public sector emphasizes tax policy, externalities, monopoly power, and the provision of public goods. The course examines contemporary social issues such as income distribution, poverty, and the welfare system as well as global issues such as international trade and protectionism.

ECON - 4900 Directed Study, 1.00 TO 6.00 Credits
Level: Lower
A student may contract for one to six credit hours of independent study through an arrangement with an instructor who agrees to direct such a study. The student will submit a plan acceptable to the instructor and to the department chairperson. The instructor and student will confer regularly regarding the progress of the study.

ECON - 5133 Territory & Entrepnrshp: Trdtn,, 3.00 Credits
Prerequisite(s): ECON 1013 with D or better or ECON 2023 with D or better
Level: Upper
Upper Level
The course aims to analyze the relationship between sustainability, economy, quality and globalization. It will also focus on the European Union and sustainable development. Other included topics will be: food industry in Italy (especially in the Campania region), organic farming in Italy, "local food, local market, local business" and sustainable tourism in Italy.

EDUC - EDUCATION
EDUC - 2163 Foundations of Education, 3.00 Credits
Level: Lower
Applied Learning-Creative Work
The course examines the social, historical, ethical and philosophical foundations of the U.S. educational system. Attention also will be paid to contemporary educational opportunities and challenges including the evolving teaching role, school equity and funding, educational standards and assessment, classroom diversity and multicultural education, social justice, and reform initiatives. Students will complete a portfolio as the culmination of their work within the program.

ELET - ELECTRICAL ENGI TECH
ELET - 1001 Seminar, 1.00 Credit
Level: Lower
Applied Learning-Creative Work
This course is an examination of strategies for success, including organizational and study skills, and electrically related career opportunities for engineering technology students. The class entails textbook and research readings followed by written assignments. Topics include the history of engineering technology and engineering careers, diversity in society and the technical workplace, sustainability, and ethics. Students make personal assessments of goals, values, strengths and weaknesses as related to college and technical career success. Employment application techniques addressed in assignments include resume writing, and letters of application. Research assignments use library and internet resources.

ELET - 1103 Circuit Theory I L 3.00 Credits
Prerequisite(s): MATH 1033 with D or better or MATH 1034 with D or better or MATH 1104 with D or better or MATH 1105 with D or better and MATH 1063 with D or better or MATH 1064 with D or better or MATH 2043 with D or better
Level: Lower
In circuit theory, a student will analyze electrical circuits according to the fundamental definitions and laws as they apply to direct current circuits. The physical parameters defined include charge, voltage, current, resistance, capacitance and inductance. The laws applied include Ohm's Law, Joule's Law, Kirchhoff's Voltage Law, and Kirchhoff's Current Law. The analysis relies on algebra and exponentials.

ELET - 1111 Digital Logic Laboratory, 1.00 Credit
Corequisite(s): Applied Learning-Other
This laboratory implements the theoretical principles of ELET 1133, Digital Logic. Students learn to build working circuits based upon design goals. Applications include examples of combinational and sequential logic such as adders, multipliers, counters and 7-segment displays. Logic solutions utilize programmable logic devices and external interfaces as well as transistor-transistor logic integrated circuits, and simulation software. Written laboratory reports are required.

ELET - 1133 Digital Logic, 3.00 Credits
Level: Lower
Digital Logic introduces a student to two-state logic. Logic analysis will use the binary number system and Boolean algebra. Both combinational (AND-OR) logic and sequential (flip-flop) logic are studied. Typical logic designs include 7-segment displays, adders, multipliers, and counters. Logic designs are implemented using simulation, programmable logic devices and transistor-transistor logic.

ELET - 1142 Electronic Fabrication, 2.00 Credits
Level: Lower
Applied Learning-Practicum
This course covers the fundamentals of prototype design, fabrication, and documentation. Major topics include: safety, sheet metal fabrication, printed circuit board design & fabrication, schematic & wiring diagram drafting & analysis, computer applications for schematic drawing & printed circuit board layout, circuit construction, troubleshooting fundamentals, soldering techniques, project parts procurement & cost analysis, and the ability to work in teams. Personal laptop computers are required.
Laboratory experiments parallel material presented in Circuit Theory. The theories and laws governing dc circuits are applied and verified. Hands-on building of electrical circuits reinforces the interpretation of schematic diagrams. Verification includes detailed analysis of the circuit under test by calculation, measurement, and simulation. Outside preparation and laboratory report writing are required.

Level: Lower
Applied Learning-Other

ELET - 1151 Circuit Theory Laboratory, 1.00 Credit
Prerequisite(s): ELET 1104 with D or better or ELET 1103 with D or better
Corequisite(s): ELET 1104 with D or better
Level: Lower
Applied Learning-Other

Laboratory experiments parallel material presented in Circuit Theory. The theories and laws governing dc circuits are applied and verified. Hands-on building of electrical circuits reinforces the interpretation of schematic diagrams. Verification includes detailed analysis of the circuit under test by calculation, measurement, and simulation. Outside preparation and laboratory report writing are required.

Level: Lower
Applied Learning-Other

ELET - 1104 Electrical Power Circuits, 4.00 Credits
Prerequisite(s): ELET 1104 with D or better and MATH 2043 with D or better or MATH 1054 with D or better or MATH 1063 with D or better or MATH 2074 with D or better
Corequisite(s): ELET 1104 with D or better or ELET 1143 with D or better
Level: Lower
Applied Learning-Practicum

Students will build upon dc circuit theory concepts as they apply to alternating current using phasor analysis in single and three-phase circuits. Complicated networks are analyzed using mesh and nodal matrix methods. MATLab is introduced as a computational tool. The course emphasis is upon ac power applications including transformers and three-phase systems. Passive filters are investigated for signal conditioning using frequency domain analysis. Laboratory sessions will back up the analysis with hands on exercises using electronic instrumentation.

Level: Lower
Applied Learning-Practicum

ELET - 2143 Embedded Controller Fundamentals, 3.00 Credits
Prerequisite(s): ELET 1111 with D or better and ELET 1153 with D or better and ELET 1142 with D or better or ELET 1143 with D or better
Corequisite(s): ELET 1111 with D or better
Level: Lower
Applied Learning-Practicum

Fundamentals of both the hardware and software aspects of the microcontroller. A RISC (reduced instruction set computer) microcontroller is used with an in-system programmer to create an engineering development system. Structured programming code is written in assembly language, assembled and downloaded to the controller. Switches, light emitting diodes, seven segment displays, pneumatic solenoids and motors are among the devices that will be connected to the controller.

Level: Lower
Applied Learning-Practicum

ELET - 2151 Electronics Laboratory I, 1.00 Credit
Prerequisite(s): ELET 1103 with D or better and ELET 1151 with D or better
Corequisite(s): ELET 1103 with D or better and ELET 1151 with D or better
Level: Lower
Applied Learning-Other

The material in this course parallels and supplements the subject matter in ELET 2103. The use of appropriate electronic test equipment is emphasized, along with computer simulation, and computer aided test equipment.

Level: Lower
Applied Learning-Other

ELET - 3103 Electronics Theory II, 3.00 Credits
Prerequisite(s): ELET 2103 with D or better
Corequisite(s): ELET 2103 with D or better
Level: Lower
Applied Learning-Practicum

This course involves the study and application of operational amplifiers. Inverting, non-inverting and follower amplifiers are presented in detail with consideration of gain, bandwidth, and impedance. Different feedback circuits are studied to realize basic mathematical inverting and follower amplifiers are presented in detail with consideration of gain, bandwidth, and impedance. Different feedback circuits are studied to realize basic mathematical

Level: Lower
Applied Learning-Practicum

ELET - 3151 Electronics Laboratory II, 1.00 Credit
Prerequisite(s): ELET 2103 with D or better
Corequisite(s): ELET 2103 with D or better
Level: Lower
Applied Learning-Other

This laboratory is an experimental study of operational amplifiers and linear integrated circuits as applied to comparators, amplifiers, waveform generation, signal conditioning, and regulated power supplies. Emphasis is placed on design, proper measuring techniques and documentation of results. Device characteristics and limitations will be studied. The use of manufacturer's data sheets is required. Computers are used to design, analyze and test circuits along with manual measuring techniques.

Level: Lower
Applied Learning-Other

ELET - 4154 Microelectronics, 4.00 Credits
Prerequisite(s): ELET 1103 with D or better
Level: Lower
Applied Learning-Practicum

Course Fee $98.00

This course provides the student with a realistic experience in semiconductor manufacturing processes. Oxidation, diffusion, photolithography (spin/bake/expose/develop), etch, and vapor deposition equipment allow students the opportunity to design, build, and test simple solid-state devices in a cleanroom environment. Properties and characteristics of semiconductor materials will be examined. Introduction to fabrication processes, design rules,
ELTR - ELECTRICAL/ELECTRONICS

ELTR - 1156 Residential Wiring I, 6.00 Credits
Corequisite(s):
Level: Lower
This lecture course introduces a student to the theories, principles, and laws of static and dynamic electricity. Direct and alternating current circuits are studied utilizing the related trade mathematics covering topics such as Ohm’s law, resistance, power, inductance, and capacitance. Major emphasis is placed on applying trade related mathematics and analytical reasoning to troubleshooting series, parallel and compound circuits. National Electrical Code requirements and proper techniques for soldering/terminating conductors are covered. Students will learn to interpret and draw electrical schematics and wiring diagrams relating to low voltage signal circuits. The National Electrical Code and its application to residential branch circuit requirements and non-metallic wiring methods as well as correct electrical and component terminology is introduced.

ELTR - 1166 Residential Wiring Lab IA, 6.00 Credits
Corequisite(s):
Level: Lower
Applied Learning-Practicum, Course Fee $26.00
Students will apply techniques learned in theory required to make proper terminations and soldered splices. Alternating and direct current circuits are constructed and students will analyze and confirm electrical principles and applicable laws. Emphasis is placed on safety, craftsmanship, correct, and accurate laboratory test procedures using appropriate test equipment such as Volt-Ohm-Milliampere Meters (VOM). Schematic drawings are required for each circuit and outside of lab, report and analysis writing is necessary.

ELTR - 2156 Residential Wiring II, 6.00 Credits
Prerequisite(s): ELTR 1156 with D or better * and ELTR 1166 with D or better * and ELTR 1176 with D or better *
Corequisite(s):
Level: Lower
Understanding and interpretation of the National Electrical Code requirements for residential branch circuits are covered in detail. Practical considerations for the economic and adequate distribution of electrical energy are discussed, as well as the adequacy of circuit design. Reading and interpreting floor plan drawings as they relate to all trades is taught. Power calculations along with all N.E.C. and utility company requirements for the installation of any type of residential service are covered. Conduit wiring methods are covered as well as all related National Electrical Code requirements. Substantial time is spent performing the mathematical calculations utilized for designing, laying out and bending conduit. Students are required to perform all tasks in a neat craftsman-like manner. Emphasis is placed on the reasonsings of why workmanship is important.

ELTR - 2166 Residential Wiring Lab IIA, 6.00 Credits
Prerequisite(s): ELTR 1156 with D or better * and ELTR 1166 with D or better * and ELTR 1176 with D or better *
Corequisite(s):
Level: Lower
Applied Learning-Practicum, Course Fee $27.00
Applied Learning-Practicum, Course Fee $27.00
Substantial time is spent with students working the wiring systems on actual residential homes built off campus. In lab students design, layout, and manufacture every type of bend utilized with conduit raceway systems. Conduit fill calculations are applied as well as utilizing correct methods for installing branch circuit conductors. Students are required to apply the National Electrical Code to all work done in labs and on the outside projects. Major emphasis is placed on safety, craftsmanship, circuit analysis, and troubleshooting of circuit faults. Schematic and wiring diagrams are required for each circuit and outside of lab, report and analysis writing is necessary.

ELTR - 2176 Residential Wiring Lab IIB, 6.00 Credits
Prerequisite(s): ELTR 1156 with D or better * and ELTR 1166 with D or better * and ELTR 1176 with D or better *
Corequisite(s):
Level: Lower
Applied Learning-Practicum, Course Fee $27.00
The lab emphasizes the application of the complete wiring system used for residential applications. Students will be required to complete several types of services, such as riser, mast, conduit and cable installations. Students will complete their freshman capstone project, which requires each student to redraw a two story residential home to scale. They will then perform the design work and lay out all of the wiring required by the National Electrical Code and ensuring that it will meet the minimum adequacy requirements of a prospective homeowner. Students will then complete a spreadsheet containing all the components with their complete descriptions that are necessary to complete the Capstone project. Schematic and wiring diagrams are required for each circuit and outside of lab, report and analysis writing is necessary.

ELTR - 3156 Electrical Power Systems, 6.00 Credits
Prerequisite(s): ELTR 1156 with D or better and ELTR 1166 with D or better and ELTR 1176 with D or better and ELTR 2156 with D or better and ELTR 2166 with D or better and ELTR 2176 with D or better
Level: Lower
Applied Learning-Practicum, Course Fee $17.00
This course will provide instruction in the applied mathematics, circuit analysis, design, installation, distribution methods, protection, and trouble of single phase and three phase electrical power systems.

ELTR - 3366 Ind Automtn & Process Controls, 6.00 Credits
Prerequisite(s): ELTR 1156 with D or better and ELTR 1166 with D or better and ELTR 1176 with D or better and ELTR 2156 with D or better and ELTR 2166 with D or better and ELTR 2176 with D or better
Level: Lower
Applied Learning-Practicum, Course Fee $17.00
This course involves the study of effective process control theory. A systems approach is used in an effort to develop effective control systems. A lab component is included to prepare students to implement control systems. A written report and analysis writing is necessary.

ELTR - 3376 Photovlct & Wind Trbn System Im, 6.00 Credits
Prerequisite(s): ELTR 1156 with D or better and ELTR 1166 with D or better and ELTR 1176 with D or better and ELTR 2156 with D or better and ELTR 2166 with D or better and ELTR 2176 with D or better
Level: Lower
Applied Learning-Practicum, Course Fee $17.00
This course will provide instruction in the applied mathematics, operation, design methodology, installation requirements, and National Electrical Code requirements for alarms and special systems.

EMET - ELECTROMECH ENGR TECH

EMET - 5004 Instrumentation, 4.00 Credits
Prerequisite(s): PHYS 2023 with D or better or PHYS 2044 with D or better and MATH 1063 with D or better or MATH 1084 with D or better
Level: Upper
Upper Level
This course introduces the student to general characteristics of electromechanical sensors and transducers, electrical measurement systems, electronic signal conditioning, data acquisition systems, and response characteristics of sensors. The lectures focus on the selection, calibration techniques and applications of electromechanical transducers. The laboratory has industrial equipment, such as a punch press, drill press, and metal lathe, which are equipped with sensors that are configured to measure physical quantities such as force, strain, displacement, velocity, and acceleration. Data acquisition and real-time software applications are applied in a laboratory environment.
EMT - 6004 Feedback Control Systems, 4.00 Credits
Prerequisite(s): MATH 6114 with D or better
Level: Upper
Upper Level
Feedback control systems and topics in time response, stability, criteria, system representation, root locus diagrams, and compensation. The systems include electrical, mechanical, and electromechanical networks. The laboratory features simulation of electrical and mechanical systems using MATLAB and SIMULINK as well as a variety of physical controllers.

ENGR - ENGINEERING SCIENCE
ENGR - 1201 Engineering Sci Orientation, 1.00 Credit
Level: Lower
An examination of strategies for success, including organizational and study skills, and transfer and career opportunities for engineering students in industry. There will be at least a dozen textbooks and research readings followed by written assignments on topics to include the variety of engineering transfer institutions and engineering majors, diversity in society and the technical workplace, personal assessments of goals, values, strengths and weaknesses as related to student and technical career success, employment application techniques such as resume writing, letters of application, interviewing, follow-up communications, and an introduction to MS word and Excel.

ENGR - 2001 Engineering Computing Applictns, 1.00 Credit
Prerequisite(s): MATH 1984 with D or better
Level: Lower
This is an introductory, software-oriented, engineering computing course using an interactive, high-performance, scientific and engineering software package which integrates computation and visualization in a programming environment to solve engineering application problems. Topics will include embedded mathematical functions, complex numbers, matrix manipulation, plotting, user-defined script and function files, matrix algebra, numerical techniques and graphical user interfaces.

ENGR - 2201 Engineering Science Seminar, 1.00 Credit
Prerequisite(s): ENGR 1201 with D or better
Level: Lower
The purpose of this course is to assist sophomore engineering science students in choosing and transferring to the college or university of their choice in order to complete a baccalaureate degree in engineering. Transfer admissions visitors are invited to classes and there may be class trips to potential transfer institutions depending on the interest of the students. This is a required course for the Engineering Science associate degree.

ENGR - 3004 Circuit Analysis I, 4.00 Credits
Prerequisite(s): MATH 2094 with D or better
Corequisite(s): MATH 2094 with D or better
Level: Lower
This Calculus-based course covers dc circuit analysis including voltage, current, resistance, power and energy. Circuit analysis techniques and Kirchoff’s laws are applied to series, parallel and combined circuits. Thevenin’s, Norton’s and Superposition theorems are applied to dc circuits. Operational amplifiers are introduced. Inductance and capacitance are introduced and the transient response of RL, RC and RLC circuits to step inputs is studied using differential equations. The laboratory incorporates use of manual and computer-controlled equipment and simulation software to reinforce lecture concepts. Computational software is required for circuit calculations.

ENGR - 3213 Analytical Mechanics I, 3.00 Credits
Prerequisite(s): MATH 2094 with D or better and PHYS 1064 with D or better
Level: Lower
This course covers statics at the intermediate level. Equilibrium of particles and rigid bodies in two and three dimensions, centroids, centers of gravity, analysis of structures, friction, area and moment of inertia, force and vector mathematics are employed throughout.

ENGR - 3254 Systems Dynamics I, 4.00 Credits
Prerequisite(s): MATH 6114 with D or better and PHYS 1064 with D or better
Applied Learning Practicum
This course covers analysis, modeling and design of dynamic and feedback control systems using a common methodology regardless of physical discipline. Mathematical modeling, block diagrams, transfer functions, system excitation, response and stability of linear mechanical and electrical systems in both time and frequency domains will be studied using classical techniques, state space representation, matrix notation and Laplace transforms. The laboratory will include simulation and introduction of independent and coupled, first and second order electrical and mechanical systems using appropriate software such as MATLAB and SIMULINK. An experimental project or simulation will be required.

ENGR - 4004 Circuit Analysis II, 4.00 Credits
Prerequisite(s): ENGR 3004 with D or better and MATH 6114 with D or better
Level: Lower
This course covers AC circuit analysis beginning with the study of sinusoidal steady-state solutions for circuits in the time domain. Nodal, loop and mesh methods of AC circuit analyses and the Thevenin, Norton and Superposition theorems are applied to the complex plane. AC power, transformers, mutual induction, three-phase circuits and two-port networks are introduced and used for analysis. Laplace and Fourier Transformers and the Fourier Series are applied to circuit analyses. Complex frequency analysis is introduced to enable discussion of transfer functions, frequency dependent behavior, resonance phenomenon and simple filter circuits. The laboratory incorporates use of manual and computer-controlled equipment and simulation software to reinforce lecture concepts. Computational software use is required for circuit calculations.

ENGR - 4213 Analytical Mechanics II, 3.00 Credits
Prerequisite(s): ENGR 3213 with D or better
Level: Lower
This course covers dynamics at the intermediate level. Topics in kinematics and kinetics include particles, systems of particles and rigid bodies, mechanical vibrations, force, mass, acceleration, work and energy, impulse and momentum. Calculus and vector mathematics are employed throughout.

ENGR - 4264 Engr Mechanics of Materials, 4.00 Credits
Prerequisite(s): ENGR 3213 with D or better and ( MATH 2074 with D or better or MATH 2094 with D or better )
Level: Lower
Course Fee $46.00
This course is a calculus-based study of advanced concepts in Mechanics of Materials. It addresses the behavior of deformable mechanical components when subjected to tension, compression, torsion, flexure-bending or a combination of these loads. Extensive use is made of free body diagrams as well as Mohr’s Circle for stress and strain. Experience is gained in the analysis of beam deflection, shafts in torsion, power, column buckling and thin walled pressure vessels. Analysis includes examination of stress concentrations, elastic and inelastic responses, residual stresses, indeterminate structures and thermal effects. Superposition, singularity functions and theories of failure are studied. Laboratory experiences include traditional mechanical material testing and computer software applications.

ENGR - 4900 Directed Study, 1.00 TO 6.00 Credits
Level: Lower
A student may contract for one to six credit hours of independent study through an arrangement with an instructor who agrees to direct such a study. The student will submit a plan acceptable to the instructor and to the department chairperson. The instructor and student will confer regularly regarding the process of the study.

ENVR - ENVIRONMENTAL TECHNOLOGY
ENVR - 4411 Environmental Capstone Seminar, 1.00 Credit
Prerequisite(s): ENVR 4424 with D or better *
Level: Lower
This course is intended for students in the last semester of the Environmental Technology program. Current environmental issues are considered by utilizing guest speakers, an alumni panel, and audiovisual resources. Field trips are made to on-site sites of environmental interest. A job search is organized and resumes are prepared with cover letters.

ENVR - 4413 Environmental Law, 3.00 Credits
Prerequisite(s): BIOL 2801 with D or better and BIOL 2803 with D or better
Level: Lower
This course is a non-technical overview of environmental law and public policy. Included in the course are laws, regulations and policies governing water pollution, air pollution, solid waste, hazardous waste, global commons, land use, pesticides, energy, and public lands. The social concerns of environmental regulation such as environmental economics, risk assessment and environmental impact statements are also explored. The conflict/perceived conflict of economic development with environmental protection is particularly stressed. In addition, environmental problems, public policy, administration, politics and philosophy are studied.

ENVR - 4424 Environmntl Chem & Microbiology, 4.00 Credits
Prerequisite(s): BIOL 2801 with D or better and BIOL 2803 with D or better and ( CHEM 2984 with D or better or CHEM 2124 with D or better )
Level: Lower
Applied Learning-Field Study, Course Fee $118.00
This is the "capstone" course for students in the Environmental Technology curriculum. The course includes a survey of the techniques used for sampling and laboratory analysis of soil, water, and microbiological samples. Chemistry topics include a review of inorganic and organic chemicals of environmental concern. Microbiology topics include the biology of microorganisms in soil, water, and waste treatment.

ENVR - 4900 Directed Study, 1.00 TO 6.00 Credits
Level: Lower
A student may contract for one to six credit hours of independent study through an arrangement with an instructor who agrees to direct such a study. The student will submit a plan acceptable to the instructor and to the department chairperson. The instructor and student will confer regularly regarding the progress of the study.

ENVR - 5900 Directed Study, 1.00 TO 6.00 Credits
Level: Upper
A student may contract for one to six credit hours of independent study through an arrangement with an instructor who agrees to direct such a study. The student will submit a plan acceptable to the instructor and to the department chairperson. The instructor and student will confer regularly regarding the progress of the study.

EPLP - EMERGING PIOR LDRSHIP PGM
EPLP - 1031 Social Change & Leadership, 1.00 Credit
Level: Lower
This first leadership development class and mentor-guided experience is designed to assist sophomore engineering science students. This is a required course for the Engineering Science associate degree.
FNAT - 1303 Architectural History I, 3.00 Credits
Prerequisite(s): EPLP 1031 with D or better and EPLP 2032 with D or better
Level: Upper
Applied Learning Creative Work, Upper Level
The third of three Emerging Pioneers Leadership development classes seeks to address the last of the Social Change Theory - Citizenship and Personal Leadership within the Society of the Community. This capstone level experience creates the opportunity for students to engage in the concepts of active citizenship and leading positive change within their own community. Students will learn about and apply these concepts by experiencing local government in action and by engaging in a local community challenge within the context of a small group. Civic Engagement Intensive (CEI) sections exist.

FDSR - FOOD SERVICE
FDSR - 1143 Menu Planning, 3.00 Credits
Level: Lower
This is an introductory course that will teach proper service protocol, dining room etiquette, ordering and use of point of sales systems. As the semester progresses, other topics will include: basic principles of menu planning with emphasis on classical menu patterns; matching the style and relationship of the menu to the complete operation of a food service establishment, and pricing of basic menu items.

FDSR - 4900 Directed Study, 3.00 TO 9.00 Credits
Level: Lower
A student who has successfully completed three semesters of Food Service courses may arrange for three, five, or nine credit hours of directed study to provide an opportunity to continue study in a subject area of special interest. Directed study may be conducted by a student only through an arrangement with the Food Service Instructional Staff who are to direct such a study. The student will submit a plan acceptable to the instructional staff and will confer regularly regarding his or her progress.

FILM - FILM STUDIES
FILM - 3113 History of Italian Cinema, 3.00 Credits
Level: Lower
This course provides an in-depth study of the history of Italian Cinema from its beginnings in the first decade of the 20th Century until the present. Students will study the various social, political, technological, and artistic influences on Italian Cinema throughout its history.

FNAT - FINE ARTS
FNAT - 1013 Art Appreciation, 3.00 Credits
Level: Lower
Gen Ed - The Arts, Liberal Arts and Science
Art Appreciation will introduce the student to the meaning of what Art is and is about. Special emphasis is placed on open discussion to create awareness of why men and women have valued the arts which have become a driving force as they developed and became civilized. Students will see how the arts are really part of their daily lives by reading, viewing slides and works of art, and by creating. Writing is continued in assignments related to readings, class discussions, and lectures.

FNAT - 1023 Introduction to Theatre, 3.00 Credits
Level: Lower
Gen Ed - The Arts, Liberal Arts and Science
The primary objective of this course is to develop knowledge and appreciation of theatre arts. This course is done through a study of theatrical traditions and dramatic literature from classical theatre to the contemporary. Writing is continued in assignments related to readings, class discussions, and lectures.

FNAT - 1133 Surv of Art Hist:Ancnt Grk Art, 3.00 Credits
Level: Lower
Gen Ed - The Arts, Liberal Arts and Science
Art is the highest expression of a culture. Political, historical and social changes are the “heart of art”. Works of art are a reflection of the ages in which they are produced and are often used as a “tool” to carry messages. This course will consider the development of art through the centuries and how it is affected today’s art, with a focus on the main artistic movements starting with Ancient Greece through the Baroque period in Italy. Guided tours will help students to experience first-hand the main artistic expressions in Campania and Rome.

FNAT - 1303 Architectural History I, 3.00 Credits
Prerequisite(s): COMP 1503 with D or better
Level: Lower
Gen Ed - The Arts, Liberal Arts and Science
This is a survey course of the origin and development of historically notable architecture throughout the world from the Neolithic Era to the 19th century. From the settlement of Jericho in the Neolithic era through Eclecticism, the era of stylistic revolutions in the late 18th century, the students will be exposed to a wide variety of buildings, as well as introduced to the corresponding cultures and religions.

FNAT - 1313 Art History, 3.00 Credits
Level: Lower
Gen Ed - The Arts, Liberal Arts and Science
Art History is a comprehensive survey course which views the visual arts as a humanistic discipline. Students will see the condition of our western tradition as encountered from the magic of covenants to the complexities of the twentieth century. Emphasis will be placed on the variety of purposes for which art has been produced. Writing is continued in assignments related to readings, class discussions, and lectures.

FNAT - 1403 Survey of Interactive Media, 3.00 Credits
Level: Lower
Gen Ed - The Arts, Liberal Arts and Science
This course presents students with the history of interactive media and entertainment. Topics include the basics of games, the video game industry, interface design on the world wide web, and the development of the graphic user interface. Students will explore how developments in technology, as well as changes in other fields (cinema, graphic design, music) have driven change in interactive media. Students will examine works of interactive entertainment both inside and outside of class, and discuss theory and criticism relevant to the field. Additional focus will be given to intersections of Interactive Media with social issues, including issues of race, gender, economics and politics.

FNAT - 2333 Survey of Design, 3.00 Credits
Prerequisite(s): COMP 1503 with D or better
Level: Lower
Gen Ed - The Arts, Liberal Arts and Science
Students will be introduced to basic design principles, theories, historical periods, disciplines, practices, and technologies. The areas of conceptual development, style, patterns, materials, structures, and relationships in design will be examined. Major disciplines and fields in design will be considered, compared, and evaluated. The course will focus on how design influences architecture, industry, graphic and visual communication, digital media, print media, and culture. Students will evaluate design by reading, writing, researching, speaking about, and analyzing the discipline.

FNAT - 2423 3D Design/Color, 3.00 Credits
Level: Lower
Gen Ed - The Arts, Liberal Arts and Science
This course builds upon the fundamental skills learned in the Foundations: Form/Space Relationship (DGA 1413). Course through the use of the human model. Proportion, perspectives, plus structural and locomotion dynamics will be studied. Students will focus on the mechanics of motion.

FNAT - 2443 Intro to Digital Photography, 3.00 Credits
Level: Lower
Gen Ed - The Arts, Liberal Arts and Science
Introduction to Digital Photography gives students fundamental skills for effectively recording travel, home, and work experiences. Using digital photography as a tool, students are encouraged to become more careful observers of the people, the landscape, the art, the architecture, and the culture that they encounter in their daily lives. The course concentrates on technical lectures and lab/studio time regarding the basic operation of a digital camera and the processing of images. Students develop an understanding of how to combine to create powerful visual images: subject matter, composition, color, and light. Through selected readings, assignments, lab/studio time, and critiques, students produce a written and visual final project for the course. Students are responsible for providing their own cameras, supplies, and image editing software.

FNAT - 2453 Drawing on Location: Art of Tr, 3.00 Credits
Level: Lower
Applied Learning Intl-Dom Trvl, Liberal Arts and Science
This course is offered to students enrolled at Sant’Anna Institute as part of the study abroad program in Sorrento, Italy. Lectures and field sketching sessions are centered on drawing on location as the best way that a student can have the time to increase his or her capacity to observe and record reality. Whether it is an object, a tree, a person, or cities and landscapes, sketching from real life is a profound and lasting experience. This form of artistic expression can happen during everyday life while traveling, or writing in journals. While drawing, students will learn to select information and highlight details better than they could with a camera. Students will discover Sorrento, Italy, and its region of Campania, visit Naples and surrounding archeological sites, and record their observations through images and words in their travel sketchbook.

FNAT - 3413 Music of Western Cultures I, 3.00 Credits
Level: Lower
Gen Ed - The Arts, Liberal Arts and Science
This course presents the student with the history of western music and its contexts with the music traditions and diversity in western cultures. The course also emphasizes the Latin American, Caribbean, and Polynesian styles of roots (hybrid), folk, and traditional forms and will include the fundamentals of musical theory and form.

FNAT - 3513 Art History II, 3.00 Credits
Level: Lower
Gen Ed - The Arts, Liberal Arts and Science
This course is an introduction to understanding art. You will become aware of the relationship of media, artistic expression and the context of the cultural period which formed the art object. For most students the art of our own times is difficult to understand; for this reason, the main emphasis of the course will be contemporary culture and its interpretation of traditional imagery. Through written critical analysis of visual art issues students will gain experience discussing how art is created and what it means.

COURSE DESCRIPTIONS
A student may contract for one to six credit hours of independent study through an arrangement with an instructor who agrees to direct such a study. The student may submit a plan acceptable to the instructor and to the department chairperson. The instructor and student will confer regularly regarding the progress of the study.

FRSC - 5900 Directed Study, 1.00 TO 6.00 Credits
Level: Upper
A student may contract for one to six credit hours of independent study through an arrangement with an instructor who agrees to direct such a study. The student will submit a plan acceptable to the instructor and to the department chairperson. The instructor and student will confer regularly regarding the progress of the study.

FRSC - 6214 Microscopy and Criminalistics, 4.00 Credits
Prerequisite(s): CHEM 4524 with C or better
Level: Upper
Applied Learning-Practicum, Course Fee $53.00, Upper Level
This course is an exploration of the basic theory and practice of traditional criminalistics and microscopic techniques commonly performed in forensic science. Topics covered include: crime scene investigation; evidence collection and handling; microscopic theory and techniques; analysis of trace evidence such as hair, fiber, paint, soil, and glass evidence; analysis of fingerprint evidence; analysis of firearms and ammunition; analysis of gunshot residue evidence; and analysis of impression and toolmark evidence.

FRSC - 7214 Forensic Chemistry, 4.00 Credits
Prerequisite(s): FRSC 6214 with C or better and CHEM 6614 with C or better
Level: Upper
Applied Learning-Practicum, Course Fee $100.00, Upper Level
This course is an exploration of the basic theory and practice of commonly performed examinations on chemical evidence in forensic science. Topics covered include: principles of various chemical and instrumental separation techniques; sampling plans and uncertainty in measurements; an introduction to quality control and quality assurance concepts; principles and techniques of controlled substance examination; principles and techniques of forensic toxicology; principles and techniques of fire debris and explosive evidence examinations; and principles and techniques of material analysis to include inks, dyes, colors, colorants and polymers.

FRSC - 8111 Forensic Science Tech Capstone, 1.00 Credit
Prerequisite(s): FRSC 7214 with C or better
Corequisite(s): FRSC 7214 with C or better
Level: Upper
Applied Learning-Creative Work, Upper Level
This course is intended for students to complete during the eighth and final semester of their enrollment in the forensic science technology program. It is to be taken concurrently with FRSC 8113. The course is designed to prepare the student to enter the workforce and/or continue their education at the graduate level. Students complete a capstone project requiring the analysis of physical evidence in a simulated casework setting. Students also apply the fundamentals of proper forensic laboratory report writing by producing a professional quality laboratory report suitable for admission into a court of law that communicates their findings. In addition, students are required to prepare and deliver expert witness testimony in a simulated mock courtroom setting.

FRSC - 8113 Forensic Sci Tech Prep, 3.00 Credits
Prerequisite(s): FRSC 7214 with C or better
Corequisite(s): FRSC 7214 with C or better
Level: Upper
Applied Learning-Practicum, Course Fee $158.00, Upper Level
This course is an exploration of the basic theory and practice of commonly performed examinations on biological evidence in forensic science. Topics covered include: principles and techniques of serological examinations to include identification of body fluids, species determinations, and enzymatic analysis; blood spatter evidence interpretation and crime scene reconstruction; principles and techniques of forensic DNA examinations to include polymerase chain reaction, variable number tandem repeat profiling, short tandem repeat profiling and an introduction to Y-STR and mitochondrial DNA; and introductory principles and techniques of forensic pathology and forensic photography.

FRSC - 8703 Senior Research Project, 3.00 Credits
Prerequisite(s): BIOL 7723 with C or better or BIOL 8823 with C or better
Level: Upper
Applied Learning-Research, Course Fee $47.00, Upper Level
This course is intended for students in the final year of the four-year forensic science technology curriculum. Students are required to complete an approved research project in an area of special interest in forensic science. The student will submit a plan for research acceptable to the forensic science technology program director and to the department chair. The instructor and student will confer regularly regarding the progress of study and research. The student will be required to prepare a formal scientific paper and will be required to give a formal presentation to the campus community upon completion of the research project. Participation in this course will be encouraged to present their findings at a national or regional forensic science conference.
COURSE DESCRIPTIONS

FRSC - 8713 Forensic Sci Tech Internship, 3.00 Credits
Prerequisite(s): CHEM 6614 with C or better and FRSC 6214 with C or better
Level: Upper
Applied Learning-Internship, Pass/Fail, Upper Level
This course is an opportunity for students to pursue advanced work in an area of special interest and to obtain extended internship opportunities in Forensic Science Technology. A student may contract for one to six credit hours of independent study through an arrangement with an instructor who agrees to direct such a study. The student will submit a plan acceptable to the instructor, to the Forensic Science Technology Program director, and to the department chair. The instructor and student will confer regularly regarding the progress of the study.

FSMA - FINANCIAL SERVICES MANAG
FSMA - 5003 Investment Planning, 3.00 Credits
Prerequisite(s): BUAD 4133 with D or better and BUAD 4203 with D or better
Level: Upper
Upper Level
This course teaches the student how to prudently plan investments to take maximum advantage of investment opportunities. Prudent planning includes the ability to relate the present changing economic environment to investment prices and determine if those prices are related to traditional fundamentals of value. The student will also be able to construct portfolios and analyze the total impact of investment choices. Tax implications of various choices will also be discussed.

FSMA - 5103 Tax Planning, 3.00 Credits
Prerequisite(s): ACCT 3453 with D or better
Level: Upper
Upper Level
This course covers tax-planning considerations for both individuals and businesses. The students will analyze current tax laws and the steps involved in managing one's tax liability by using IRS regulations as part of an overall investment strategy. A final project will be required. The students will be given a set of facts and an overall objective. They must then research the applicable tax laws, recommend a course of action, and defend that course of action with the supporting IRS regulations. An oral and written presentation of the student's project will be required.

FSMA - 5900 Directed Study, 1.00 TO 6.00 Credits
Prerequisite(s): CHEM 6614 with C or better
Level: Upper
Pass/Fail, Upper Level
A student may contract for one to six credit hours of independent study through an arrangement with an instructor who agrees to direct such a study. The student will submit a plan acceptable to the instructor and to the department chairperson. The instructor and student will confer regularly regarding the process of the study.

FSMA - 6003 Employee Benefit Planning, 3.00 Credits
Prerequisite(s): BUAD 4203 with D or better
Level: Upper
Upper Level
This course will enable the student to evaluate employee benefits from the employer's and employee's perspective and articulate the regulations and compliance necessary to maintain employee benefit plans. The course will focus on group benefits, fringe benefits and retirement plans and will require case studies and team projects to synthesize the knowledge acquired in the course.

FSMA - 7023 Estate Planning, 3.00 Credits
Prerequisite(s): BUAD 3043 with D or better or BUAD 7023 with D or better
Level: Upper
Upper Level
This course is designed to expose students to the estate planning process. It explores the many issues to consider when assisting people to enhance and maintain their financial welfare. Emphasis is not only on the arrangements for the disposition of property at death, but also on steps that can be taken to increase overall family wealth and security while still alive. Topics include, but are not limited to, wills, trusts, property ownership, future interests and their effect on family, probate procedures, conveyances as well as gift and estate taxation.

FSMA - 7103 Money & Banking, 3.00 Credits
Prerequisite(s): ECON 1013 with D or better and ECON 2023 with D or better
Level: Upper
Upper Level
This course is an exploration of the role and importance of money in effective monetary policy as a solution for inflation and unemployment. The operation, function, and structure of the banking system and the interactions of the central banking system will be the focus. The role of monetary theories, money management, and monetary policy will also be studied. The theoretical foundations of commercial and central banking will be discussed within the context of macroeconomic analysis.

FSMA - 7123 Perini Finlan Planning Caspstone, 3.00 Credits
Prerequisite(s): BUAD 4203 with D or better and BUAD 4193 with D or better, BUAD 5033 with D or better and FSMA 7023 with D or better and FSMA 5003 with D or better and FSMA 5103 with D or better
Level: Upper
Applied Learning-Other, Upper Level
The purpose of this course is to bring together all the academic and professional knowledge you have learned so that you will be able to launch successfully into the professional world. This course focuses on the application of the knowledge base acquired in the prerequisite courses as part of the financial planning process. Emphasis will be on the analysis of data, critical regard to the client's circumstances, the presentation of information and the subsequent recommendations to a client. The interrelationship of all planning areas in the construction of a comprehensive plan will be highlighted. Assignments, presentations, quizzes, and examinations will be used to hone the student's analytical, presentation, and financial planning skills.

FSMA - 8112 Financial Planning Internship, 12.00 Credits
Level: Upper
Applied Learning-Internship, Pass/Fail, Upper Level
Students complete 15 weeks of supervised field work in a selected financial service provider setting. The student must be engaged in bona fide financial planning work in at least one of the six core areas of investment planning, tax planning, estate planning, retirement planning, employee benefit planning, or insurance risk management. Students carry out a planned program of educational experiences under direct supervision of an owner, manager or supervisor of financial services and/or financial planning in an organization.

GEOG - GEOLOGY
GEOG - 1133 Introduction to Geology, 3.00 Credits
Level: Lower
Applied Learning-Int/Dom Trvl, Liberal Arts and Science
The course is an introduction to the science of geology. In particular, the main types of rocks are analyzed with an emphasis on genetic processes and in relationship to plate tectonics theory. This basic knowledge will provide a background to understand and study the main geological risks, such as volcanoes, earthquakes, floods and landslides. Specific examples from the Apeninnes mountain chain and Campanian plain will be examined to contextualize these topics in the Italian environment. In addition, a significant aim of this course is for students to gain a conscious relationship with the environment. The Campania region is an ideal place for experiential learning via site visits, with the opportunity for students to witness a wide range of geological features. The evaluation for the course will include midterm and final written exams, a presentation and graphical exercises.

GEOG - 1233 Volcanology, 3.00 Credits
Level: Lower
Applied Learning-Int/Dom Trvl, Liberal Arts and Science
The course is an introduction to the main elements of geological sciences including stratigraphy laws, the main types of rocks, and an understanding of faults and folds. These elements will be used to understand Plate Tectonics theory. Using this Prerequisite, kinds of volcanoes will be analyzed, examining different magmatic compositions, igneous and pyroclastic rocks and their geodynamic environments. The role of geologic and geomorphologic processes will be analyzed in reference to volcanic risk. This course will also study landslides in volcanic soils (the case of Sarno mounts) and groundwater flow in volcanic aquifers and explotation of thermal waters (the case of Ischia).

GLST - GLOBAL STUDIES
GLST - 2113 Global Perspectives:Spcl Topic, 3.00 Credits
Level: Lower
Gen Ed - Other World Civ, Liberal Arts and Science
This course will introduce the students to the important role of general education and the intersection with their lives. Students will investigate their own values and ethical decision making. Students will consider the extent to which values shape behavior and ethical decisions. The student will recognize potentially different perspectives on a variety of topics as they evaluate other non-Western cultures. Through the exploration of various non-Western cultures, the course will assist students in developing a greater awareness of, and sensitivity about, social and cultural issues on both a local and global level. Through a collection of readings, discussion, personal reflection, writing, and research, students will learn skills to think critically about their social world and broaden their awareness and understanding of cultural and social diversity.

HIST - HISTORY
HIST - 1113 Hist of West Civil Since 1648, 3.00 Credits
Level: Lower
Gen Ed - Western Civilization, Liberal Arts and Science
This course provides an introduction to the political, military, intellectual, cultural, technological, religious, artistic, and economic history of Europe from the fall of the Roman Empire to the present. It also study landslides in volcanic soils (the case of Sarno mounts) and groundwater flow in volcanic aquifers and explotation of thermal waters (the case of Ischia).

HIST - 1123 History of the Mafia, 3.00 Credits
Level: Lower
Liberal Arts and Science
This course examines the history of the Mafia from its origins to the present day. How the Mafia works and has succeeded as well as approaches, including those by civil society organizations, to combat the Mafia. Attention is paid to examples of Mafa enterprises, its past and present role in to legs of the Civil War and Reconstruction. Topics include native cultures, European heritage, the colonial experience, revolution and the new republic. Emphasis will be placed on the formation of the constitution, reform movements and political compromises. Special attention will be paid to the common institutions in American society and their affects on different groups.

HIST - 1143 Surv of American History I, 3.00 Credits
Level: Lower
Gen Ed - American History, Liberal Arts and Science
This course is an introductory survey of American history from the early Native Americans and European colonization through the Civil War and Reconstruction. This basic knowledge will provide a background to understand and study the main geographical risks, such as volcanoes, earthquakes, floods and landslides. Specific examples from the Apeninnes mountain chain and Campanian plain will be examined to contextualize these topics in the Italian environment. In addition, a significant aim of this course is for students to gain a conscious relationship with the environment. The Campania region is an ideal place for experiential learning via site visits, with the opportunity for students to witness a wide range of geological features. The evaluation for the course will include midterm and final written exams, a presentation and graphical exercises.

HIST - 1123 History of Western Civilization, 3.00 Credits
Level: Lower
Liberal Arts and Science
This course provides an introduction to the political, military, intellectual, cultural, technological, religious, artistic, and economic history of Europe from the fall of the Roman Empire to the present. It also study landslides in volcanic soils (the case of Sarno mounts) and groundwater flow in volcanic aquifers and explotation of thermal waters (the case of Ischia).
be encouraged to present their findings at a national or regional health science conference. A student may contract for one to six credit hours of independent study through an arrangement with an instructor who agrees to direct such a study. The student will submit a plan acceptable to the instructor and to the department chairperson. A student will confer regularly regarding the progress of the study.

HIST - 5133 Africa and the West, 3.00 Credits
Prerequisite(s): HIST 1113 with D or better or PLSC 1053 with D or better
Level: Upper
Gen Ed - Other World Civ, Liberal Arts and Science, Upper Level
This course introduces students to the relationship between Western countries and sub-Saharan Africa and its interactions over the last two centuries and today. Particular attention will be paid to the political, economic, and cultural links established between Europe and Africa, including the imperialist occupation and exploitation of Africa by Europeans. Historical topics covered will include the slave trade, European exploration of Africa; the diaspora of Africans to the West, and of Europeans in Africa; racial attitudes; patterns of economic development and impoverishment; the political evolution of European colonial regimes in Africa; and the processes of decolonization, including its political, economic, and social consequences. Contemporary topics covered will include political instability and poverty in Africa; the AIDS crisis; the legacy of colonialism and white settlement; the democratization of African political systems; and competing approaches to African development.

HIST - 6133 The World at War: 20th Century, 3.00 Credits
Prerequisite(s): HIST 1113 with D or better or PLSC 1053 with D or better
Level: Upper
Liberal Arts and Science, Upper Level
This course is designed to give the student a broad outline of world history. The students will study civilizations from the earliest humans through the classical world and beyond to the age of cross-cultural interactions and the trade in the early 1500 CE. The student will be exposed to the traditions and cultures of the world to aid in weaving the story of human civilization. Early civilizations covered in the course include Mesopotamia, Indus, Chinese, Persian, Greek, Roman, Mesoamerican, European, as well as Islamic. Artistic and intellectual achievements, and technological breakthroughs will be discussed throughout the course.

HLTH - 5233 The Culture of Healthcare, 3.00 Credits
Level: Upper
Upper Level
This course demonstrates a two pronged approach to healthcare as an interface between the biology of health and health outcomes. Students will investigate questions on both the health and care of patients from a cultural perspective. Differences in the physiology and genetics of disease regionally in the U.S. and globally in other countries will be discussed as well as cultural differences in the care of patients and their families.

HLTH - 5333 Healthcare Law and Ethics, 3.00 Credits
Prerequisite(s): BUAD 3153 with D or better or TMGT 7153 with D or better
Level: Upper
Upper Level
This course is an introduction to the laws and ethics that affect healthcare decisions, relationships among professionals and patients, and the management aspects of healthcare delivery. It provides students with the knowledge and skills necessary to recognize legal and ethical issues that arise in healthcare practice, to be prepared to evaluate situations that may have legal or ethical implications, to know when to seek legal or ethics committee counsel, and to have an understanding of the implications of healthcare law on their own practice making. By the end of the course, students will have been exposed to many management ideas, theories and applications of healthcare law and ethics. Students will have a working knowledge of pertinent law and ethical procedures and how to apply them in healthcare arena.

HLTH - 5433 Healthcare Marketing, 3.00 Credits
Level: Upper
Applied Learning-Other, Upper Level
This course is designed to provide a fundamental knowledge of the principles of marketing and their particular application in healthcare. The healthcare system poses a variety of marketing challenges due to new laws and policies, fresh innovations, and an increasingly educated health consumer. This course covers the fundamentals of marketing as they are applied across a broad spectrum of healthcare organizations to address these challenges. This course is divided into three primary aspects: marketing process, understanding the consumer, and marketing mix. The goal of this course is to provide students with a strong foundation of marketing principals and tools and techniques to develop a marketing plan for any healthcare organization.

HLTH - 5900 Directed Study, 1.00 TO 6.00 Credits
Level: Upper
Upper Level
A student may contract for one to six credit hours of independent study through an arrangement with an instructor who agrees to direct such a study. The student will submit a plan acceptable to the instructor and to the department chairperson. The instructor and student will confer regularly regarding the process of study.
HLTH - 6003 Healthcare Management, 3.00 Credits  
Level: Upper  
Upper Level  
This is an online course which will provide an overview of the skills and concepts required to be a manager within healthcare. General basic functions of management, as well as specific issues pertaining to healthcare will be reviewed. Theories and models of leadership, financial structure, planning, legal/regulatory requirements, communication and emerging issues will be explored. This course will also provide the student with the basic understanding of the impact of human resources department including: challenges, education, safety, compensation and employee issues.

HLTH - 7003 Healthcare Compliance, 3.00 Credits  
Level: Upper  
Upper Level  
This is an online course that includes a study of the key areas of risk for healthcare organizations in general. Compliance is an essential element of any healthcare organization. This course will prepare the student to understand the components of an effective compliance plan, the role of a compliance officer, specific legislation in regards to compliance in healthcare, the audit process and enable the student to author policies and procedures.

HPED - HEALTH & PHYSICAL EDUC  
HPED - 1031 Volleyball, 1.00 Credit  
Level: Lower  
To develop the skills of passing, serving, spiking, and blocking.

HPED - 1111 Health and Wellness, 1.00 Credit  
Level: Lower  
To provide students with a better understanding of the human body and concepts, attitudes and practices concerning Health and Wellness. This course focuses on all the dimensions of Wellness.

HPED - 1121 Basketball, 1.00 Credit  
Level: Lower  
This course is designed to expose the student to the many basketball skills and types of playing.

HPED - 1131 Indoor Soccer, 1.00 Credit  
Level: Lower  
To develop skills, knowledge, and proper fitness levels pertaining to soccer.

HPED - 1171 Aerobics, 1.00 Credit  
Level: Lower  
Aerobics to music where the student will learn sound lifetime habits of fitness.

HPED - 1603 Prin of Org PE & Athletics, 3.00 Credits  
Level: Lower  
A course to provide each student with a workable frame of reference concerning the principles, organization, and philosophical aspects of physical education and athletics.

HPED - 3003 Coaching Sports, 3.00 Credits  
Level: Lower  
This course is a lecture course designed to serve as a foundation for future coaching experiences. This course will enhance students' knowledge and understanding of concepts and techniques of coaching and their application to achieving important objectives in working with athletes. The class will help students develop an understanding of coaching philosophy and essential techniques including practice planning, program organization, coaching roles and instruction. This course will combine sport science theory and research with the practical knowledge and methods of expert coaches.

HPED - 3061 Physical Fitness, 1.00 Credit  
Level: Lower  
Pass/Fail  
To learn the basic principles of conditioning. The student will be provided an individualized fitness program designed to improve muscular strength and endurance, cardio-vascular wellness, flexibility, and body composition.

HPED - 4102 Personal Health, 3.00 Credits  
Level: Lower  
This course provides the opportunity to develop sound concepts in health and health-related areas in order to better understand the environment in which they live. Strong emphasis will be placed on current health issues in the area of human sexuality, mental and emotional health, drug and substance abuse, and the development of sound health practices for the individual in today's society.

HUMN - HUMANITIES  
HUMN - 2114 Culture of Italy in Context, 4.00 Credits  
Prerequisite(s): COMP 1503 with C or better and ( LITR 2033 with D or better or LITR 2343 with D or better or LITR 2503 with D or better or LITR 2603 with D or better or LITR 2703 with D or better or LITR 2813 with D or better or LITR 2900 with D or better or LITR 2903 with D or better or LITR 2913 with D or better or LITR 3233 with D or better or LITR 4333 with D or better or LITR 7003 with D or better )  
Level: Lower  
Gen Ed - Humanities, Liberal Arts and Science  
While there are many definitions of "culture", most have in common the characteristic behaviors, values, and beliefs of a group and those items of excellence influenced by those values, beliefs, and behaviors. This course will examine the culture of Italy from the point of view of Americans who are alert to their own country's culture. Through academic and first-hand field experiences, students will search out the values and characteristics perhaps unique to the Italians, make comparisons and contrasts with their own culture, and thereby increase their own intercultural competency. Learning will involve class discussions, lectures, introspective and public writing, workshops, oral presentations, and field trips.

HUSR - HUMAN SERVICES  
HUSR - 1047 Practicum in Human Services, 4.00 Credits  
Prerequisite(s): PSYC 1063 with C or better and ( HUSR 2083 with C or better or HUSR 4533 with C or better )  
Level: Lower  
Applied Learning-Practicum  
This senior project course is designed to provide students with supervised work experience in human services agencies. In addition, students participate in a weekly class that combines the principle of small group dynamics with the acquired skills, knowledge and experience that students have obtained from their field experience. Students produce a final project and a portfolio to document learning. Students should consult the Practicum Pre-requisites listed in the Human Services program description section in the college catalog. Civic Engagement Intensive (CEI) sections exist.

HUSR - 1303 Intro Alcohol & Substc Abuse, 3.00 Credits  
Level: Lower  
This course is intended to provide students with a basic yet comprehensive understanding of substance abuse and dependence. Attention will be given to understanding the effects of alcohol and other drugs on the mind and body, the components of addiction, the concept of alcoholism as a progressive disease, the recovery process, and the effects on society.

HUSR - 2083 Introduction to Human Services, 3.00 Credits  
Level: Lower  
This course is designed to give students an understanding and working knowledge of the human services profession: its goals and objectives, structure and organization, legal and ethical standards and client populations. An emphasis will be placed on the generalist approach to human services.

HUSR - 4033 Issues in Human Services, 3.00 Credits  
Level: Lower  
Major issues related to the field of human services are discussed in this course. Emphasis is placed on the ethical standards within the field of Human Services. Students are expected to develop the necessary skills, values and knowledge to enhance their ability to gain employment and advance within the human service profession.

HUSR - 5003 Community Organizations, 3.00 Credits  
Prerequisite(s): HUSR 1074 with B or better  
Level: Upper  
Upper Level  
This course is an upper level human services methods course focusing on major theories and methods of community organizing with applications in urban, suburban, transitional and rural communities. It provides a framework for assessment, and intervention with regard to the structures and processes of neighborhoods, communities, and organizations as they influence and are influenced by the many stakeholders in the human services arena. It explores the potential for the use of technology in organizing communities.

HUSR - 5103 Social Policy & Human Services, 3.00 Credits  
Prerequisite(s): HUSR 1074 with B or better  
Level: Upper  
Upper Level  
This course examines the evolution of American social problems and the response of the social welfare policy systems and programs at the national, state, regional and local levels. A basic framework for comparison with international social welfare systems will also be provided. The course will focus on the following aspects of the social welfare system: the impact of social policy on the delivery of human services, social welfare policy, and the systematic analysis of social welfare policy; understanding of social welfare policy analysis from both historical and current standpoints, and the organization, community and policy practice settings requiring advocacy and policy formulation; comprehension of social welfare policy analysis in the areas of welfare reform, homelessness/housing, poverty, mental health, substance abuse and health care; and individual communication skills in describing, analyzing, synthesizing and presenting a letter to the editor, a letter to a legislator, and a social welfare policy analysis response to a current societal problem. Applications in social welfare advocacy at all levels will be explored.

HUSR - 5203 Grants Contracts Organ Adv HS, 3.00 Credits  
Level: Upper  
Applied Learning-Practicum, Upper Level  
This course will provide students with the tools needed to be successful with proposal writing, program and strategic planning, fund raising and institutional advancement. Specific areas to be addressed will include how to identify appropriate funding sources, how to market and organize charitable fundraising events and campaigns, how to complete applications for funding assistance, and how to respond to requests for proposals from public and private resources. Civic Engagement Intensive (CEI) sections exist.

HUSR - 5213 Case Management Systems, 3.00 Credits  
Prerequisite(s): HUSR 1074 with B or better  
Level: Upper  
Upper Level  
This course is designed to give students an understanding of the various pathways that individuals with chronic conditions may take. This course will provide students with experience in the use of automated data systems and a comparison of electronic records in case management will be explored.

HUSR - 5213 Case Management Systems, 3.00 Credits  
Prerequisite(s): HUSR 1074 with B or better  
Level: Upper  
Upper Level  
This course is designed to give students an understanding of the various pathways that individuals with chronic conditions may take. This course will provide students with experience in the use of automated data systems and a comparison of electronic records in case management will be explored.

HUSR - 5213 Case Management Systems, 3.00 Credits  
Prerequisite(s): HUSR 1074 with B or better  
Level: Upper  
Upper Level  
This course is designed to give students an understanding of the various pathways that individuals with chronic conditions may take. This course will provide students with experience in the use of automated data systems and a comparison of electronic records in case management will be explored.

HUSR - 5213 Case Management Systems, 3.00 Credits  
Prerequisite(s): HUSR 1074 with B or better  
Level: Upper  
Upper Level  
This course is designed to give students an understanding of the various pathways that individuals with chronic conditions may take. This course will provide students with experience in the use of automated data systems and a comparison of electronic records in case management will be explored.

HUSR - 5213 Case Management Systems, 3.00 Credits  
Prerequisite(s): HUSR 1074 with B or better  
Level: Upper  
Upper Level  
This course is designed to give students an understanding of the various pathways that individuals with chronic conditions may take. This course will provide students with experience in the use of automated data systems and a comparison of electronic records in case management will be explored.

HUSR - 5213 Case Management Systems, 3.00 Credits  
Prerequisite(s): HUSR 1074 with B or better  
Level: Upper  
Upper Level  
This course is designed to give students an understanding of the various pathways that individuals with chronic conditions may take. This course will provide students with experience in the use of automated data systems and a comparison of electronic records in case management will be explored.

HUSR - 5213 Case Management Systems, 3.00 Credits  
Prerequisite(s): HUSR 1074 with B or better  
Level: Upper  
Upper Level  
This course is designed to give students an understanding of the various pathways that individuals with chronic conditions may take. This course will provide students with experience in the use of automated data systems and a comparison of electronic records in case management will be explored.
HUSR - 5314 Human Serv Field Practic & Sem, 14.00 Credits
Prerequisite(s): COMP 5703 with D or better and HUSR 5103 with C or better and HUSR 5203 with C or better or ( HUSR 5003 with C or better and HUSR 5103 with C or better and HUSR 5213 with C or better or ( HUSR 5003 with C or better and HUSR 5203 with C or better and HUSR 5213 with C or better or ( HUSR 5103 with C or better and HUSR 5203 with C or better and HUSR 5213 with C or better) and HUSR 1074 with B or better
Level: Upper
Applied Learning-Practicum, Upper Level
This seminar course is taken concurrently with a structured, supervised work experience in a human service agency. Students must successfully complete a minimum of 400 clock hours of work in human services management at an approved human service agency. In addition, students participate in this weekly seminar that synthesizes theoretical knowledge and didactic learning with the acquired skills, knowledge, and experience that the students have obtained through their field experience. The internship may be at distant locations. Faculty supervision and communication may be through various technologies that students must utilize. A complete list of practicum requirements is in Human Services Management program description in the college catalog. Civic Engagement Intensive (CEI) sections exist.

IDST - INTERDISCIPLINARY STUDIES

IDST - 4102 Individual Studies Capstone, 2.00 Credits
Prerequisite(s): COMP 1503 with D or better
Level: Lower
Applied Learning-Civic Engage
In this course, students will investigate their concentration including current field entrance requirements, necessary skills and job opportunities. Students will create a capstone project demonstrating their skills and knowledge in their chosen concentration. Students will demonstrate their technology proficiency by creating an online portfolio. Students will identify their educational and career pathway goals considering assessments related to their current interests, values, personality and personal strengths. Students will identify and investigate potential four-year transfer programs that will meet their educational and career pathway goals, utilizing information literacy skills. Students will explore the concept of citizenship through critical thinking and analyzing current challenges in their target work environment. Students will design and implement a proposal and plan that demonstrates critical thinking strategies and will promote positive civic outcomes.

IDST - 5002 Interdisc Studies Capstone Des, 2.00 Credits
Prerequisite(s): COMP 1503 with D or better
Level: Upper
Upper Level
In this semester students investigate the nature of interdisciplinary studies, complete personal assessments and reflect on their strengths and goals. A course-taking plan, based on extensive research and written justification, will be created. A portfolio will be designed to include a projection of their chosen concentration along with a 4-semester registration plan, with justification and a collection of supporting documentation. Students will design an individual project demonstrating a plan for integrating their individual lower level coursework with their upper level area(s) of concentration choices for completion in IDST 7001. Students will present these designs to the student's project supervisor/advisor.

IDST - 5900 Directed Study, 1.00 TO 4.00 Credits
Level: Upper
Upper Level
A student may contract for one to four credit hours of independent study through an arrangement with an instructor who agrees to direct such a study. The student will submit a plan acceptable to the instructor and to the department chairperson. The instructor and student will confer regularly regarding the process of the study.

IDST - 6103 Research Methods Interdisc Std, 3.00 Credits
Prerequisite(s): COMP 1503 with D or better and IDST 5002 with D or better
Level: Upper
Upper Level
This course provides students the basis for a research study including an opportunity to form foundational knowledge and expand existing knowledge of research methods via survey of research language, research methods and ethical challenges in research. Students will apply an interdisciplinary approach integrating at least two disciplines using information literacy techniques to their work as they create an introduction to the problem, a substantive review of the literature and development of a research proposal. Students will apply the BROAD method of interdisciplinary research as they gather, organize, synthesize and analyze current literature and create an interdisciplinary research prospectus.

ITAL - ITALIAN

ITAL - 1303 Italian I, 3.00 Credits
Level: Lower
Gen Ed - Foreign Languages, Liberal Arts and Science
This course focuses on developing the student's ability to speak, to write, and to read Italian. Additional emphasis is given to learning about Italian culture. Instruction centers on oral communication, written communication, reading for comprehension, and cultural awareness. Writing and speaking are emphasized in assignments related to readings, class discussions, and lectures.
ITAL - 5443 Medieval Italian Literature II, 3.00 Credits
Prerequisite(s): ITAL 5303 with D or better
Level: Upper
Liberal Arts and Science, Upper Level
This advanced course will enable students to read and write Italian fluently. Students will work with a wide range of spoken and written sources. Students will concentrate on the analysis of text for argument structure, and they will be expected to summarize and coherently present arguments in oral presentations. Student work will require an advanced level of spontaneity when writing and speaking; students will be expected to precisely differentiate nuances of meaning in complex situations.

JAP - JAPANESE
JAPN - 1203 Japanese I, 3.00 Credits
Level: Lower
Gen Ed - Foreign Languages, Liberal Arts and Science
This course is an introduction to the spoken and written Japanese language and focuses on developing the student's ability to speak, to write, and to read Japanese. Additional emphasis is given to learning about Japanese culture. Instruction centers on oral communication, written communication, reading for comprehension, and cultural awareness. Writing and speaking are emphasized in assignments related to readings, class discussions, and lectures. This course also provides students with the ability to communicate in Japanese in their pursuit of travel, business, academic endeavors, and personal pleasure.

JAPN - 2203 Japanese II, 3.00 Credits
Prerequisite(s): JAPN 1203 with C or better
Level: Lower
Gen Ed - Foreign Languages, Liberal Arts and Science
This course is designed as a continuation of JAPN 1203; this course further develops the student's ability to speak, to write, and to read Japanese. Additional emphasis is given to learning about Japanese culture. Instruction centers on oral communication, written communication, reading for comprehension, and cultural awareness. Writing and speaking are emphasized in assignments related to readings, class discussions, and lectures. This course also provides students with the ability to communicate in Japanese in their pursuit of travel, business, academic endeavors, and personal pleasure.

LITR - LITERATURE
LITR - 2033 The Short Story, 3.00 Credits
Prerequisite(s): COMP 1503 with D or better
Level: Lower
Gen Ed - Humanities, Liberal Arts and Science
The Short Story introduces the student to the study and appreciation of the short story as an art form. Reading selections will include stories by such masters as Joyce, Lawrence, Faulkner, Hemingway, and O'Connor, as well as recent works by Olson, Paley, and Barthelme. Writing is continued in assignments related to readings, class discussions, and lectures.

LITR - 2343 Children's Literature, 3.00 Credits
Prerequisite(s): COMP 1503 with D or better
Level: Lower
Applied Learning/Service-Learn, Gen Ed - Humanities, Liberal Arts and Science
Children's literature covers a broad range of literature for children from preschool to age twelve, as they encounter it through the home, the library, and the school. Picture books, the classics, folk and fairy tales, novels, and plays for children are presented in a critical context. Writing is continued in assignments related to readings, class discussions, and lectures. A required component of this course is a Service-Learning project.

LITR - 2603 Introduction to Literature, 3.00 Credits
Prerequisite(s): COMP 1503 with D or better
Level: Lower
Gen Ed - Humanities, Liberal Arts and Science
This course focuses on literature, thought, and language. Writing is continued in assignments related to readings, class discussions, and lectures. Selections include novels, short stories, poems, and plays.

LITR - 2703 Sci Fi in the 20th Century, 3.00 Credits
Prerequisite(s): COMP 1503 with D or better
Level: Lower
Gen Ed - Humanities, Liberal Arts and Science
Major representative works of science fiction are read and discussed. Works selected contain the major themes present in science fiction in the 20th century. Readings, class discussion, and lectures are the basis for oral reports and written assignments which continue training in composition and encourage a broadening of interest in science and technology. Writing is continued in assignments related to readings, class discussions, and lectures.

LITR - 2813 Introduction to Film, 3.00 Credits
Prerequisite(s): COMP 1503 with D or better
Level: Lower
Gen Ed - Humanities, Liberal Arts and Science
This course focuses on film, thought, and language through the viewing and analysis of representative fiction films. Writing is continued in assignments related to film viewing, class discussions, and lectures. From readings and lectures, the student will become acquainted with basic technical terms and film theory, thus facilitating analysis of the more complex aspects of film history and production. Permission of the instructor may supersede prerequisite. Writing is continued in assignments related to readings, class discussions, and lectures.

LITR - 2900 Directed Study, 1.00 TO 4.00 Credits
Level: Lower
Gen Ed - Humanities, Liberal Arts and Science
The student may contract for one to four credit hours of independent study through an arrangement with an instructor who agrees to direct such a study. The student must submit a plan acceptable to the instructor, and the department chairperson. To be substituted for the listed humanities requirements, a directed study course must be so designated by the department chair. Writing is continued in assignments related to readings, class discussions, and lectures.

LITR - 2913 Introduction to Poetry, 3.00 Credits
Prerequisite(s): COMP 1503 with C or better
Level: Lower
Gen Ed - Humanities, Liberal Arts and Science
This course focuses on a survey of the principles of poetry, the literary traditions of poetry, and the critical terminology to understand, to define, and to analyze poetry. Special attention will be paid to underrepresented authors, movements, and schools of poetry. Classroom exercises and discussions emphasize the importance of close literary analysis. Writing skills will be practiced in Freshman Composition assignments.

LITR - 3133 Creative Writing:Travel & Expr, 3.00 Credits
Prerequisite(s): COMP 1503 with D or better
Level: Lower
Gen Ed - The Arts, Gen Ed - Humanities, Liberal Arts and Science
This course will have students write creative non-fiction, focusing on the experience of travel. Student will read and be exposed to different works of non-fiction (travel writing and instruction, how-to writing), and Foregrounded fiction (poetry, stories, and novels) revolving around travel. Class readings will also expose students to various writing styles and provide examples of the successes and strategies of other writers. Class time will be spent discussing the writer's craft and the assigned readings, and critiquing student writing in a workshop setting.

LITR - 3233 Survey of American Lit I, 3.00 Credits
Prerequisite(s): COMP 1503 with D or better
Level: Lower
Gen Ed - Humanities, Liberal Arts and Science
This is the first of two courses surveying American literature from the time of the Puritans to the present; it stresses the development of the American voice in literature through the critical study of such authors as Edwards, Franklin, Poe, Whitman, Emerson, Thoreau, Hawthorne, and Melville.

LITR - 3333 Survey of British Literature I, 3.00 Credits
Prerequisite(s): COMP 1503 with D or better
Level: Lower
Gen Ed - Humanities, Liberal Arts and Science
Survey of British Literature I, this course surveys British literature from the Middle Ages to the present; this course examines literature in the Middle Ages, the Early Modern Period, and the Restoration and eighteenth century. Emphasis is placed on the critical study of works such as Beowulf and authors such as Malory, Chaucer, Julian of Norwich, Spencer, Marlowe, Shakespeare, Milton, Dryden, Defoe, Swift, Pope, Johnson, and Boswell. Writing is emphasized in assignments related to readings, class discussions, and lectures.

LITR - 4333 Survey of American Lit II, 3.00 Credits
Prerequisite(s): COMP 1503 with D or better and LITR 2603 with D or better
Level: Lower
Gen Ed - Humanities, Liberal Arts and Science
This course is a continuation of Survey of American Literature I with special attention to the works of Twain, Howells, Dickinson, James, Crane, Dreiser, Robinson, Frost, O'Neill, Eliot, Hemingway, Faulkner, Baldwin, and Updike. Writing is continued in assignments related to readings, class discussions, and lectures.

LITR - 4900 Directed Study, 1.00 TO 4.00 Credits
Level: Lower
A student may contract for an independent study through an arrangement with an instructor who agrees to direct such a study. The student will submit a plan acceptable to the instructor and to the department chairperson. The instructor and student will confer regularly regarding the process of the study.

LITR - 5133 Special Topics in Literature, 3.00 Credits
Prerequisite(s): LITR 2603 with C or better and LITR 2603 with C or better or LITR 2033 with C or better or LITR 2343 with C or better or LITR 2503 with C or better or LITR 2603 with C or better or LITR 2703 with C or better or LITR 2813 with C or better or LITR 2900 with C or better or LITR 2903 with C or better or LITR 2913 with C or better or LITR 3233 with C or better or LITR 4333 with C or better or LITR 7003 with C or better
Level: Upper
Liberal Arts and Science, Upper Level
Students will study selected literature of the past five centuries through the lens of a particular special topic, such as the African-American experience, or Life During Wartime, or Global Colonization, or the Women's Rights Movement, or Political Movements Left and Right, or any topic of special interest to the instructor and relevance to students. Reading from selected literary works, students will apply historical, literary, and rhetorical analyses to determine key elements of composition, argument, historical setting, sociological context, and cultural interpretation. Students will be expected to actively participate and contribute to class discussion. Typical critical approaches to literature include these: the formalist approach or “otherness”, the biographical approach, the psychoanalytic approach including the theories of Freud and Jung, the economic and social class approach, gender-focused criticism, the mythological perspective, the structuralism approach, the deconstructive approach, and the cultural studies perspective. A research paper will be required.
LITR - 5900 Directed Study, 4.00 Credits
Prerequisite(s): ( BUAD 3153 with D or better or TMGT 7153 with D or better ) and BUAD 7033 with D or better
Level: Upper
Liberal Arts and Science, Upper Level
The student may contract for one to four credit hours of independent study through an agreement with the instructor. The student must submit a plan acceptable for the instructor and the department chairperson. To be substituted for the listed humanities requirements, a directed study course must be so designated by the department chair. Writing is continued in assignments related to readings, class discussions, and lectures.

LITR - 7033 Literature and Nature, 3.00 Credits
Prerequisite(s): COMP 1503 with D or better and ( LITR 2603 with D or better or LITR 2033 with D or better or LITR 2343 with D or better or LITR 2703 with D or better or LITR 2813 with D or better or LITR 2903 with D or better or LITR 2933 with D or better or LITR 3333 with D or better or LITR 4333 with D or better or LITR 7033 with D or better )
Level: Upper
Gen Ed - Humanities, Liberal Arts and Science, Upper Level
This course explores the relationship between humans and the natural world expressed in the literature of nature writing. The students will observe the literary movement from discovery and description to environment, ecology, ecocriticism, and sustainability will be emphasized. Readings will be concentrated in American Literature, but works from other countries and cultures will be included. A variety of literary genres, including poems, journals, nonfiction essays, short stories, travel narratives, and excerpts from novels and nonfiction books will be examined. The purpose of this course is to introduce students to the canon of nature writing and to track the literary movement into emerging texts that examine the political, environmental, and technological themes of ecology and sustainability in contemporary culture. Students will be required to write a substantial research paper that analyzes an issue directly related to the works under study. They will also present their research at the end of the semester. Short writing exercises and exams will also be required. Class sessions will center on student participation and debate, and discussions and writing strategies will employ principles of sound reasoning, critical thinking, and Information Literacy skills.

LITR - 7013 Native American Literature, 3.00 Credits
Prerequisite(s): COMP 1503 with D or better and ( LITR 2603 with D or better or LITR 2033 with D or better or LITR 2343 with D or better or LITR 2703 with D or better or LITR 2813 with D or better or LITR 2903 with D or better or LITR 3133 with D or better or LITR 3333 with D or better or LITR 4333 with D or better or LITR 5133 with D or better or LITR 7003 with D or better )
Level: Upper
Gen Ed - Humanities, Liberal Arts and Science, Upper Level
This course will trace the evolution of Native American literature from oral tradition to written narrative. Students will analyze Native American texts for their narrative techniques, historical and cultural significance, themes, symbols, as well as their place in the American literary tradition. This course will focus on oral storytelling, a selection of Native American myths, documents, nonfiction, fiction, and feature films produced by Native Americans. In addition, the course will investigate the myths and realities of reservation education, alcoholism, medicine, the war on drugs, family structures, and intercultural relations. Students will be required to write a personal reflection paper, research papers on the readings/films, and a revision of one of the essays. Students must demonstrate the ability to write analytically and coherently, in ways appropriate to the discipline, and they must also use and improve their writing in both form and content.

LITR - 7023 Alternate World Literature, 3.00 Credits
Prerequisite(s): COMP 1503 with D or better and ( LITR 2603 with D or better or LITR 2033 with D or better or LITR 2343 with D or better or LITR 2503 with D or better or LITR 2703 with D or better or LITR 2813 with D or better or LITR 2903 with D or better or LITR 2933 with D or better or LITR 3333 with D or better or LITR 4333 with D or better or LITR 7003 with D or better or LITR 7013 with D or better )
Level: Upper
Gen Ed - Humanities, Liberal Arts and Science, Upper Level
This course focuses on literature set in other worlds, including alternate realities, possible universes, and imaginative settings. To develop a critical understanding of their own reality, students will critically analyze the extrapolation and adaptation of human life into other worlds and vice versa. Selections may include films, video games, novels, myths, documentaries, nonfiction, fiction, and feature films produced by Native Americans. In this course, students will gain a deep appreciation for the role of enterprise systems in efficiently managing processes from multiple functional perspectives.

MATH - MATHEMATICS
MATH - 1004 Mathematical Concepts*, 4.00 Credits
Level: Remedial
Quarterly 1 Comparison, Remedial
This course will introduce the students to the following topics: order of operations, operations on real numbers, simplifying algebraic expressions, integer exponents, solving linear equations in one variable, two linear equations in two variables, linear inequalities, systems of linear equations, and graphs of linear equations and functions such as geometry and modeling. Emphasis is placed on reviewing basic arithmetic skills and elementary algebra topics. Development of arithmetic skills throughout the semester is essential; therefore students will be required to use calculators. Students will work on the development of thinking skills through creative problem solving, writing to explain methods and solutions to problems, and collaborative learning. NOTE: This is a remedial course; it will not satisfy any graduation requirements. A grade of C or better is required to register for any subsequent math course.

MATH - 1014 Algebra Concepts, 4.00 Credits
Prerequisite(s): MATH 1004 with C* or better
Level: Lower
Liberal Arts and Science
This course is intended for students who need more preparation to be successful in College Algebra or other courses of that level. Topics covered include: review of first degree equations, systems of equations and inequalities, graphing, polynomials, factoring, radicals and rational exponents, quadratic equations, rational expressions, relations and functions and an introduction to triangle trigonometry. This course is also designed for students who did not complete Algebra II/trig in high school. Students cannot receive credit for MATH 1014 if they have credit for MATH 1033, MATH 1054, or any course for which MATH 1033 or MATH 1054 are prerequisites. NOTE: A grade of C or better is required in MATH 1014 to register for subsequent courses (i.e. MATH 1033, 1034, 2124, 1323, 1423, 2163). THIS COURSE DOES NOT FULFILL THE GENERAL-EDUCATION MATHEMATICS REQUIREMENT.

MATH - 1033 College Algebra, 3.00 Credits
Prerequisite(s): MATH 1014 with C or better
Level: Lower
Liberal Arts and Science
This course includes topics such as polynomials, radicals, exponents, coordinate geometry, rational expressions and equations, and solutions to linear and quadratic equations. Students are introduced to the concept of functions and their graphs. Additional topics may include conic sections, matrices, variation, and nonlinear inequalities. Emphasis will be placed on problem solving. A graphing calculator is required. Students cannot receive credit for MATH 1033 if they have credit for MATH 1034, MATH 1054, MATH 1063, MATH 1064, or any course for which MATH 1063 or MATH 1064 are prerequisites. A grade of C or better is required to take MATH 2043, College Trigonometry.

MATH - 1034 College Algebra of Functions, 4.00 Credits
Prerequisite(s): MATH 1014 with C or better
Level: Lower
Liberal Arts and Science
This course includes topics such as polynomials, radicals, exponents, coordinate geometry, rational expressions and equations, and solutions to linear and quadratic equations. Students are introduced to the concept of functions and their graphs. Additional topics may include conic sections, matrices, variation, and nonlinear inequalities. Emphasis will be placed on problem solving. A graphing calculator is required. The course is designed to give students additional MATH 1033 above that allotted in MATH 1033 working on mastery of concepts and skills in the student learning outcomes. Students cannot receive credit for MATH 1034 if they have credit for MATH 1033, MATH 1054, MATH 1063, MATH 1064, or any course for which MATH 1063 or MATH 1064 are prerequisites. A grade of C or better is required to take MATH 2043, College Trigonometry.
MATH - 1054 Precalculus, 4.00 Credits
Level: Lower
Gen Ed - Math, Liberal Arts and Science
This course is designed primarily for the student who needs a foundation in algebra and trigonometry for the study of calculus. The concept of function and graphical representation of functions is stressed. Topics covered include: real numbers; algebra of real numbers including equations and inequalities; functions and their graphs including polynomials, rational expressions, logarithmic and exponential, trigonometric, algebra of the trigonometric functions including identities, equations, polar coordinates, complex numbers, systems of equations. Students may not earn credit for this course and for MATH 1033 or MATH 1034 or MATH 1054. Students cannot receive credit for MATH 1054 if they have credit for MATH 1063, MATH 1084, or any course for which MATH 1063 or MATH 1084 are prerequisites.

MATH - 1063 Technical Calculus I, 3.00 Credits
Prerequisite(s): [MATH 1033 with C or better and MATH 2043 with D or better] or [MATH 1034 with C or better and MATH 2043 with D or better] or MATH 1054 with D or better Level: Lower
Gen Ed - Math, Liberal Arts and Science
This course includes a review of functions, an introduction to the concept of limits, and a study of the techniques of differentiation and integration of algebraic functions with applications to the various technologies. A graphing calculator is required. Credit for MATH 1063, Technical Calculus I will not be allowed if student receives credit for MATH 1084.

MATH - 1084 Calculus I, 4.00 Credits
Prerequisite(s): MATH 2043 with D or better or MATH 1054 with D or better Level: Lower
Gen Ed - Math, Liberal Arts and Science
This course is designed for the student intending to continue his/her education in mathematics, science or engineering. The course includes a thorough treatment of limits leading to the Limit definition of the derivative and definite integral. Properties of derivatives will be used to differentiate and integrate algebraic and transcendental functions and numerous applications of the derivative and integral will be studied. A graphing calculator is required. Students cannot receive credit for both MATH 1063 and MATH 1084.

MATH - 1103 Quantway Core, 3.00 Credits
Corequisite(s):
Level: Lower
Gen Ed - Math, Initial College-level Math, Liberal Arts and Science
Quantway Core focuses on math for everyday life. It integrates fluency with numbers, proportional reasoning, data interpretation, algebraic reasoning, models, and communicating quantitative information. Mathematical concepts are investigated through group problem solving and class discussions based on real-life contexts of citizenship, personal finance, and model literacy. A grade of C or better is required to register for any subsequent math course. The course prepares students to take college level non-STEM courses in mathematics, such as MATH 1014, MATH 1113, MATH 1114, MATH 1123 or MATH 1323.

MATH - 1104 Quantway I*, 4.00 Credits
Level: Remedial
Quantway 1, Remedial
Quantway I focuses on math for everyday life. It integrates fluency with numbers, proportional reasoning, data interpretation, algebraic reasoning, models, and communicating quantitative information. Mathematical concepts are investigated through group problem solving and class discussions based on real-life contexts of citizenship, personal finance, and model literacy. A grade of C or better is required to register for any subsequent math course. The course prepares students to take college level non-STEM courses in mathematics, such as MATH 1014, MATH 1113, or MATH 1123.

MATH - 1113 Statistical Concepts, 3.00 Credits
Prerequisite(s): MATH 1004 with C* or better Level: Lower
Gen Ed - Math, Liberal Arts and Science
This is an introductory course which provides an introduction to and understanding of the basic concepts of statistics. Actual computation will be minimal; calculators will be used whenever calculations are necessary. Emphasis will be placed on the meaning of statistical results. Content will include sampling, experiments, measurement, organizing data, and statistical inferences. Optional topics include probability, time trends, survey design and basic inferential concepts.

MATH - 1114 Quantway II, 4.00 Credits
Prerequisite(s): MATH 1104 with C* or better or MATH 1143 with C or better or MATH 1014 with C or better Level: Lower
Gen Ed - Math, Liberal Arts and Science, Quantway 2
This course uses mathematical and statistical reasoning in everyday life decision-making. The course integrates percentages, probability, mathematical modeling, and statistical thinking within quantitative literacy. This is achieved through hands-on, collaborative learning with a focus on medical, financial and citizenship real-world examples. Students may not receive credit for MATH 1114 if they have already received credit for MATH 1323.

MATH - 1123 Statistics I, 3.00 Credits
Prerequisite(s): MATH 1003 with C* or better or MATH 1004 with C* or better or MATH 1104 with C or better Level: Lower
Gen Ed - Math, Liberal Arts and Science
This is the first of two semester sequence in statistics. It covers mainly descriptive statistics such as data collection, organization techniques, measures of center, spread, and position. Other topics covered include: probability, probability distributions (such as normal and binomial distributions); correlation and regression. Students cannot earn credit for MATH 1123 if they have credit for MATH 2124. A grade of C or better is required to take MATH 2133, Statistics II.

MATH - 1143 Liberal Arts Math I, 3.00 Credits
Prerequisite(s): MATH 1004 with C* or better Level: Lower
Gen Ed - Math, Liberal Arts and Science
This is a one semester course whose basic objective is to develop an interest and appreciation for mathematics in students with little background in the subject. Included are topics from the following areas: Problem Solving, Inductive Reasoning, Estimation, Sets, Consumer Math, Metric System, Algebra, and Geometry. It may also include topics from the following areas: Linear equations and inequalities, absolute values, topics in Consumer Mathematics, Probability, Statistics, Number Systems, Number Theory, and Voting Methods.

MATH - 1203 Statway Core, 3.00 Credits
Corequisite(s):
Level: Lower
Gen Ed - Math, Initial College-level Math, Liberal Arts and Science
Statway Core is the first course in the two-semester Statway course sequence. The Statway course sequence is recommended for students enrolled in degree programs that require no math beyond college level statistics. Students will use mathematical and statistical tools to explore real-life data in a participatory learning environment. Statway Core topics include an introduction an introduction to data analysis, statistical studies, sampling, experimental design, descriptive statistics techniques, scatterplots, correlation and regression, modeling data with functions, linear and exponential functions, and probability. This course requires the use of statistical technology. A grade of C or better is required to register for any subsequent math course. After completing this course, students will be able to take MATH 1143, MATH 1214 or MATH 2133.

MATH - 1204 Statway I*, 4.00 Credits
Level: Remedial
Remedial, Statway
Statway I is the first course in the two-semester Statway course sequence. The Statway course sequence is recommended for students enrolled in degree programs that require no math beyond college level statistics. Both courses in the sequence, Statway I and Statway II, must be taken to receive credit for college level statistics. Students will use mathematical and statistical tools to explore real-life data in a participatory learning environment. Statway I topics include an introduction to data analysis, statistical studies, sampling, experimental design, descriptive statistics techniques, scatterplots, correlation and regression, modeling data with functions, linear and exponential functions, and probability. This course requires the use of statistical technology. A grade of C or better is required to register for any subsequent math course. After completing this course, students will be able to take Statway II or MATH 1143. Students cannot receive credit for MATH 1113 or MATH 1123 after successful completion of Statway I.

MATH - 1214 Statway II, 4.00 Credits
Prerequisite(s): MATH 1204 with C* or better Level: Lower
Gen Ed - Math, Liberal Arts and Science, Statway II
Statway II is the second course in the two-semester Statway course sequence. The Statway course sequence is recommended for students enrolled in degree programs that require no math beyond college level statistics. Both courses in the sequence, Statway I and Statway II, must be taken to receive credit for college level statistics. Students will use mathematical and statistical tools to explore real-life data in a participatory learning environment. Statway II topics include sampling distributions and the Central Limit Theorem, confidence intervals, hypothesis testing, ANOVA and Chi-Square tests, and statistical models. This course requires the use of statistical technology.

MATH - 1323 Quantitative Reasoning, 3.00 Credits
Prerequisite(s): MATH 1014 with D or better Level: Lower
Gen Ed - Math, Liberal Arts and Science
This course is designed for technical curricula where quantitative reasoning is required. The course content includes critical thinking skills, arithmetic and algebra concepts, statistical concepts, financial concepts, as well as numerical systems and applications. A scientific calculator is required.

MATH - 1423 Explorations in Geometry, 3.00 Credits
Prerequisite(s): MATH 1014 with D or better Level: Lower
Gen Ed - Applied Learning-Creative Work, Gen Ed - Math, Liberal Arts and Science
The content of this course will apply geometrical truths in a variety of contexts, including knot simplifications and knots' symmetries. In addition, it will cover some principles of Gestalt perceptual properties, the exploration and creation of models of geometrical art from other cultures, and any additional material deemed suitable by the instructor. The material will involve experimentation by the student in a geometric forum to discover or verify properties of 2- and 3-dimensional objects and patterns. AutoCAD and 2- and 3-dimensional modeling tools will be used extensively to enhance spatial intelligence skills and awareness of properties. Students will learn to analyze designs by identifying their geometric component parts and create designs by combining geometric shapes. They will identify the rules used in creating the design and will create new designs by varying some of those rules.

MATH - 2043 College Trigonometry, 3.00 Credits
Prerequisite(s): MATH 1033 with C or better or MATH 1034 with C or better Level: Lower
Gen Ed - Math, Liberal Arts and Science
This course is the first of two semester sequence in trigonometry. It covers mainly descriptive techniques such as data collection, organization techniques, measures of center, spread, and position. Other topics covered include: probability, probability distributions (such as normal and binomial distributions); correlation and regression. Students cannot earn credit for MATH 2043 if they have credit for MATH 1054, MATH 1063, MATH 1084, or any course for which MATH 1063 or MATH 1084 are prerequisites.

MATH - 2074 Technical Calculus II, 4.00 Credits
Prerequisite(s): MATH 2043 with D or better or MATH 1054 with D or better Level: Lower
Gen Ed - Math, Liberal Arts and Science
A continuation of MATH 1063 with further study in differentiation and integration of the algebraic and transcendental functions. Applications will be included in each topic. An introduction to Matrix Algebra may be included. Graphing Calculator required. Student cannot receive credit for MATH 2074 if they have received credit for MATH 1084.
MATH - 2094 Calculus II, 4.00 Credits
Prerequisite(s): MATH 1084 with D or better
Level: Lower
Gen Ed - Math, Liberal Arts and Science
This course is designed as a continuation of MATH 1084 with a concentrated study of integration techniques along with applications. Applications include but are not limited to areas, volumes, and arc length. The course involves the methods of integration and applications as they apply to both the algebraic and transcendental functions. Infinite series and Taylor series will be included. A graphing calculator is required. Students cannot receive credit for both MATH 2094 and MATH 2074.

MATH - 5023 Math Foundations Cryptography, 3.00 Credits
Prerequisite(s): MATH 1033 with C or better or MATH 1034 with C or better
Level: Lower
Gen Ed - Math, Liberal Arts and Science
This is a one-semester, non-calculus based course, which covers descriptive as well as inferential statistics. Included are topics on collecting, organizing, and summarizing data. Other topics include correlation and regression, probability, normal and binomial probability distributions, normal approximation to the binomial, central limit theorem, confidence intervals, hypothesis testing, and nonparametric statistics. Students cannot receive credit for both MATH 2124 and any of the following: MATH 1113, MATH 1123, MATH 2133, and MATH 7123.

MATH - 2124 Statistical Methods & Analysis, 4.00 Credits
Prerequisite(s): MATH 1033 with C or better or MATH 1034 with C or better
Level: Lower
Gen Ed - Math, Liberal Arts and Science
This is the beginning study of the solution of differential equations with emphasis on both analytic and numerical solutions. Topics include first and second order differential equations and their solutions, series solutions, Laplace transforms, linear equations of higher order, numerical solutions or ordinary differential equations using Euler's method, and the use of Eigenvalue methods to solve linear systems. In addition, this course emphasizes the development of differential equations as mathematical models for a variety of practical applications. The course will include several major projects outside of class.

MATH - 7113 Economic Analy for Engr Tech, 3.00 Credits
Prerequisite(s): MATH 1063 with D or better or MATH 1084 with D or better
Level: Upper
Gen Ed - Math, Liberal Arts and Science, Upper Level
This course covers basic pricing formulas, cost estimation techniques, present economic studies, time-value of money, evaluating a single alternative, comparison and selection among multiple alternatives, and depreciation.

MATH - 7123 Statistics for Engr Tech & Sci, 3.00 Credits
Prerequisite(s): MATH 2074 with D or better or MATH 2094 with D or better
Level: Upper
Gen Ed - Math, Liberal Arts and Science, Upper Level
This course offers the theoretical basis for probability and statistics related to engineering applications. Topics include data analysis techniques, correlation and regression, probability, probability distributions, confidence intervals, and hypothesis tests concerning means and standard deviations. Graphing calculators are required. Computer applications may be included.

MATT - 1723 Reading Engineering Drwngs II, 3.00 Credits
Prerequisite(s): MATT 1024 with C or better
Level: Lower
Applied Learning-Practicum
The student will be instructed in advanced vertical milling machine set-up (i.e. sine plates and indexing heads) and operations (i.e. dovetail and t-slot cutting). The student will demonstrate the various skills required by producing assigned advanced level projects.

MATT - 1004 Basic Industrial Machining, 4.00 Credits
Level: Lower
Course Fee $119.00
This introductory course is designed to instill safe shop methods and procedures along with the proper and safe use of all equipment associated with Machine Tool Technology. Also incorporated in this introductory course is the proper use of basic measuring tools and hand tools. Students will be instructed in the proper operation of the power saw, drill press and pedestal grinder.

MATT - 1014 Industrial Machining I, 4.00 Credits
Level: Lower
Applied Learning-Practicum
Students will be instructed in the proper operation of power Basic lathe operations will be presented. The student will demonstrate their proficiencies on this equipment by producing specifically assigned projects.

MATT - 1024 Industrial Machining II, 4.00 Credits
Level: Lower
Applied Learning-Practicum
This course is designed to develop basic skills on the vertical milling machine. Projects will be assigned to allow the student to demonstrate the various skill levels required.

MATT - 1234 Industrial Machining III, 4.00 Credits
Level: Lower
Applied Learning-Practicum
Course Fee $119.00
The student will be instructed in advanced lathe operations and procedures. These will include precision turning, maintaining closer tolerances, and gage threading with the use of carbide tool cutters. The student will demonstrate the various skills required by producing assigned advanced level projects.

MATT - 1244 Industrial Machining IV, 4.00 Credits
Level: Lower
Applied Learning-Practicum
The student will be instructed in advanced vertical milling operations and procedures. These will include advanced vertical milling machine set-up (i.e. sine plates and indexing heads) and operations (i.e. dovetail and t-slot cutting). The student will demonstrate the various skills required by producing advanced level projects.

MATT - 1254 Industrial Machining V, 4.00 Credits
Level: Lower
Applied Learning-Practicum
The student will be instructed in the safe operation of the horizontal milling machine and the surface grinder. The student will demonstrate the various skills required by producing assigned projects.

MATT - 1713 Reading Engineering Drawings, 3.00 Credits
Level: Lower
The transfer of ideas from the Engineering Department to the manufacturing area is accomplished through the use of Engineering drawings. This course will explain how information is conveyed through the use of ANSI standard drafting procedures and the correct interpretation of that information by the machinist.

MATT - 1723 Reading Engineering Drwngs II, 3.00 Credits
Level: Lower
The transfer of ideas from the Engineering Department to the manufacturing area is accomplished through the use of engineering drawings. This course will be a continuation of MATT 1713 and will explain how advanced information is conveyed through the use of ANSI standard drafting procedures. The correct interpretation of this advanced information will be used by the machinist to produce mechanical parts on the various machine tools in the shop. These major topics will be included: auxiliary views, assembly drawings, weldment drawings, fasteners and fastener threads.
MATT - 1923 Machinist Calculations II, 3.00 Credits
Level: Lower
This course is a continuation of basic trigonometry and geometry used in machining. The student will be expected to perform trigonometric calculations on all types of machinery, including milling machines, band saws, drill presses, precision measurement devices etc. As time permits, the student will be expected to develop the programming for the desired part, download to the proper controllers to create sequential operations. The course is predominantly laboratory time.

MATT - 3003 Geometric Dimensioning & Toler, 3.00 Credits
Level: Lower
Geometric Dimensioning and Tolerancing is dimensioning associated with the tolerancing of individual characteristics of a part where permissible variations relate to form, profile, radial relationship to an axis orientation of a feature to another and location of features. Applications of all symbols and proper interpretation will be stressed. Application of various principles referenced in the current specification will be presented.

MATT - 3005 Intro to CNC Machine Program, 5.00 Credits
Level: Lower
COURSE DESCRIPTIONS

MATT - 3015 CNC Industrial Machining I, 5.00 Credits
Level: Lower
Applied Learning-Practicum
The student will use the horizontal and vertical mill in a safe manner, and will perform various external and internal operations including drilling, power tapping, milling of slots, keyways, boring, laying out bolt circles using x and y coordinates. Students will write step-by-step procedures and will use math formulas to calculate machine time and will draw basic prints for machining purposes.

MATT - 3029 CNC Industrial Machining II, 5.00 Credits
Level: Lower
Applied Learning-Practicum
The mechanical components of the lathe are explained in this module. The terminology established here is used throughout the balance of the instruction. Because of the variety of turret styles and automatic tool handling mechanisms found on CNC lathes, several configurations are shown along with an explanation of how each operates.

MATT - 4003 Senior Project, 3.00 Credits
Level: Lower
Applied Learning-Creative Work
This course is designed as a capstone project to verify a student's ability in all aspects of machining. The student will be required to identify a need for a new product and improvement on an existing product. After identification, the completion of the project will occur with minimal instructor guidance, which will allow the student to demonstrate their ability to perform independently. Upon completion, the student will demonstrate the functionality of their project in the form of a formal presentation.

MATT - 4005 CNC Industrial Machining III, 5.00 Credits
Level: Lower
Applied Learning-Practicum, Course Fee $199.00
An industry accepted CAD/CAM system to generate CNC programs will be used throughout this module. The students will be able to produce full programs and download these into the CNC lathe and mill producing a part. Trouble shooting and correction of program errors will be stressed. Proper fixtureing and setup of rough material will be presented.

MATT - 4015 CNC Industrial Machining IV, 5.00 Credits
Level: Lower
Applied Learning-Practicum
CNC programs may be refined regardless of mode of generation. Through this module the students will learn to correct flaws and will produce a finished part within the tolerance of the print and the geometric dimensioning. The concepts of fixtureing and manufacturing will be related using geometric dimensioning and tolerancing.

MATT - 4025 CNC Industrial Machining V, 5.00 Credits
Level: Lower
Applied Learning-Practicum
The student will be required to set up many various complex parts. Students will use all of their recently acquired knowledge for previous courses to complete set-ups in conjunction with programming using canned cycles on the turning and machining centers. The student will be expected to develop the programming for the desired part, download to the proper machine, and produce the desired part. All of these tasks will be performed with minimum supervision.

MCET - MECHATRONICS TECH

MCET - 2423 Circuits Fundamentals, 3.00 Credits
Prerequisite(s): MATH 1033 with D or better or MATH 1034 with D or better or MATH 2043 with D or better or MATH 1063 with D or better or MATH 1064 with D or better or MATH 2074 with D or better or MATH 2094 with D or better or MATH 6114 with D or better
Corequisite(s): MATH 1033 with D or better or MATH 1034 with D or better or MATH 2043 with D or better or MATH 1054 with D or better or MATH 1063 with D or better or MATH 1064 with D or better or MATH 2074 with D or better or MATH 2094 with D or better or MATH 6114 with D or better
Level: Lower
This course is a one-semester overview of electrical circuit theory. The course defines voltage, current, and resistance and analyzes DC and AC circuits. The course begins with dc analysis of resistive circuits. Students will learn about capacitors, and then magnetic circuits to describe inductance. Sinusoidal alternating current sources are introduced leading to series-parallel analysis of R-L-C networks using phasors. Power calculations are performed on dc, single-phase ac and three-phase ac networks.

MCET - 2461 Circuits Fundamentals Lab, 1.00 Credit
Corequisite(s):
Level: Lower
Applied Learning-Other
This is the companion laboratory to MCET 2423, Circuits Fundamentals. The laboratory's goal is to reinforce the theory presented in class. Students will build, simulate, and analyze electrical circuits involving series and parallel connections of resistors, capacitors and inductors. Circuit power sources will be both dc and ac. Students will learn to use the digital multimeters, electronic power supplies, oscilloscopes and waveform generators.

MCET - 5004 Instrumentation, 4.00 Credits
Prerequisite(s): PHYS 2023 with D or better or PHYS 2044 with D or better and ( MATH 1063 with D or better or MATH 1084 with D or better )
Level: Upper
Upper Level
This course introduces the student to general characteristics of electromechanical sensors and transducers, electrical measurement systems, electronic signal conditioning, data acquisition systems, and response characteristics of instruments. The lectures focus on the selection, calibration techniques and applications of electromechanical transducers. The laboratory has industrial equipment, such as a punch press, drill press, and metal lathe, which are equipped with sensors that are configured to measure physical quantities such as force, strain, displacement, velocity, and acceleration. Data acquisition and real-time software using LabVIEW is also emphasized in the laboratory environment.

MCET - 7143 Process Controls, 3.00 Credits
Prerequisite(s): ELET 6143 with D or better
Level: Upper
Applied Learning-Practicum, Upper Level
In this course, students will learn about a manufacturing process line. Students will study the details of sensors and actuators. Hands-on connections and assemblies are required. Programmable logic controllers will be programmed for the task. Electromechanical and pneumatic actuators will be used. Students will learn about the programming and networking of controllers to create sequential operations. The course is predominantly laboratory time.

MECH - MECHANICAL ENG TECH

MECH - 1003 Intro to Mechanical Eng Tech, 3.00 Credits
Level: Lower
This course prepares students who are new to the mechanical engineering technology field for success at the college level. Topics covered include mechanical engineering technology as a career, problem solving techniques, right triangle geometry, dimensional analysis, significant figures, unit conversion, and data collection and analysis. Career options and opportunities and diversity and inclusion will be presented using guest speakers from industry. Students will produce professional process documentation, organized solutions to basic engineering problems, engineering diagrams, and engineering presentations. Students will also explore campus tools for academic success.

MECH - 1203 Materials Science, 3.00 Credits
Level: Lower
Applied Learning-Practicum, Course Fee $37.00
This course is a first semester, freshman level course. It is a broad introductory study of the basic characteristics of engineering materials. The course will emphasize the selection of metals, plastics, ceramics, and composites for mechanical design purposes. The relationships of structure, material properties, and material selection to the design and manufacturing process will be emphasized. Significant figures, unit conversion, and data collection and analysis. Career options and opportunities and diversity and inclusion will be presented using guest speakers from industry. Students will produce professional professional process documentation, organized solutions to basic engineering problems, engineering diagrams, and engineering presentations. The students also have substantial preparation work for the weekly labs.

MECH - 1603 Graphics/CAD, 3.00 Credits
Level: Lower
Applied Learning-Practicum
Graphics/CAD involves the visualization, sketching, and geometric construction of mechanical components. Students will layout and create 2D working industrial drawings that adhere to industry standards. This course will illustrate CAD-drawing construction techniques that implement graphical communication via the use of the alphabet of lines, orthographic projection, section views, auxiliary views and the creation of assembly and detail mechanical components. This course will also use the ASME Standard Y14.5M-1994 for Geometric Dimensioning & Tolerancing to facilitate the communication of geometry requirements for associated features on detail components and assemblies.

MECH - 1663 Manufacturing Processes, 3.00 Credits
Level: Lower
Applied Learning-Practicum
The basic equipment, processes and services required to produce a product are studied. This course is designed to give the student the knowledge and vocabulary to generally comprehend the complex and inter-related design and manufacturing functions that must be accomplished to produce the end product. The processes covered include the making of iron and steel, casting, plastics production, hot and cold forming, machining, fastening, non-traditional machining, grinding, etc. Equipment covered in the lab include: lathes, grinders, mills, boring machines, band saws, drill presses, precision measurement devices etc. As time or student experience permit, the topic of basic C.N.C. machine operations and programs may be introduced. Safety and proper manufacturing procedures will be emphasized.
MECH - 2543 Advanced CAD Applications, 3.00 Credits
Level: Lower
Advanced CAD is a continuation of the basic drafting standards and techniques facilitated through the course pre-requisite, MECH 1603. Delving into other mechanical drafting disciplines, this course will help students develop additional skill sets required in a variety of other mechanical fields. This course will cover, but not be limited to, machine design, weldments, structural steel, process piping, and pressure vessels. The major emphasis of this course will be the development of working industrial drawings for fabrication and or successful integration into a mechanical assembly. The following standards will be used: ASME Sec. VIII, Div. 2, Pressure Vessel Code, ASME Y14.5-M-Geometric Dimensioning & Tolerancing. ASME B31: Standards of Pressure Piping, ANSI B4.1: Limits and Fits, ASID: Standard Structural Steel Construction.

MECH - 3124 HVAC Systems, 4.00 Credits
Level: Lower
Applied Learning-Practicum
This course introduces the student to the fundamental principles of heating, ventilation and air conditioning systems. Topics include psychrometric principles and processes, equipment selection, heating and cooling load calculations and heating system principles including forced warm air, hot water, electric and steam systems, and geothermal heating and cooling systems. Weekly laboratory experiences address topics with organized experiments and applications.

MECH - 3203 Computer Aided Manufacturing, 3.00 Credits
Prerequisite(s): MECH 1603 with D or better
Level: Lower
Applied Learning-Other
This course is a study of Computer Aided Manufacturing (CAM) using software, programming languages and methods to produce Computer Numerical Control (CNC) machining programs. CAD software is used to develop detailed drawings of student projects. Laboratory exercises include programming, machine tool setup and machine operation with software and hardware controls. The students will work in small groups, between the student laptops and the machine tools using current communication protocol is also studied.

MECH - 3223 Mechanical Design Principles, 3.00 Credits
Prerequisite(s): MECH 1603 with D or better or ( MECH 1012 with D or better and MECH 1022 with D or better ) and MECH 4003 with D or better
Level: Lower
Applied Learning-Other
This course will emphasize the application of mechanical design for industrial machinery. The lecture material for this course will be enhanced through a laboratory experience using design techniques that will prepare the creation of working industrial drawings, parametrically driven spreadsheet solutions of design problems, and component sizing and dimension determinations. The course will include the study of mechanical power systems such as gear trains, belt and chain drives, linkages, clutch-coupling brake components, torque transmission devices, shaft and component design calculations. The techniques of component design will also include the extensive use of online database information, standards and manufacturers specifications. At all times in this class, the design and development for manufacturability will be paramount.

MECH - 3334 Statics, 4.00 Credits
Prerequisite(s): ( MATH 1054 with D or better or MATH 2043 with D or better or MATH 1063 with D or better or MATH 1084 with D or better ) and ( PHYS 1024 with D or better or PHYS 1044 with D or better or PHYS 1064 with D or better )
Level: Lower
Applied Learning-Other
This course is a study of introductory mechanics through the application of the principles of statics. Students will focus on the equilibrium of particles and rigid bodies in two and three dimensions. Additional topics will include centroids, centers of gravity, and analysis of structures, friction, area and mass moments of inertia. The course will also emphasize the importance of problem-solving in statics by using algebraic and trigonometric computations.

MECH - 3643 Manufacturing Management, 3.00 Credits
Level: Lower
This course supplements the study of manufacturing processes with emphasis on techniques, processes and factors that contribute to manufacturing management decision making. Previous manufacturing process exposure is desirable but not essential. Selected topics to be discussed include: motion and time study, engineering economics, project planning and scheduling, Computer Integrated Manufacturing Management (CIM), just in time manufacturing strategy, design for manufacturability, Statistical Process Control (SPC), Statistical Quality Control (SQC), and other management policies and strategies.

MECH - 4003 Solid Modeling, 3.00 Credits
Prerequisite(s): MECH 1603 with D or better or ( MECH 1012 with D or better and MECH 1022 with D or better )
Level: Lower
Applied Learning-Practicum
This course is an introduction to 3D solid modeling techniques utilizing feature-based, constraint-based parametric design. This course encourages the student to visualize in the 3D world and have a "design intent" plan for each part in which they will design. This will help in the arrangement of assemblies, parts, features, and dimensions to meet design requirements.

MECH - 4024 Dynamics, 4.00 Credits
Prerequisite(s): ( MATH 1063 with D or better or MATH 1084 with D or better ) and ( MECH 2603 with D or better or MECH 3113 with D or better or MECH 3334 with D or better or ENGR 2304 with D or better )
Level: Lower
The course will emphasize applications of material involving the two basic concepts of dynamics, i.e., kinematics and kinetics and will introduce the students to vibrations. The course will include the study of levers, links, slide mechanisms, shock yoke and the principles of force, torque, velocity, acceleration, inertia and friction. The course will use the principles of Equilibrium, Work-Energy and Impulse-Momentum along with Newton's Second Law to examine a variety of problems.

MECH - 4124 Geo. Dimensioning&Tolerancing, 4.00 Credits
Prerequisite(s): MECH 1603 with D or better and MECH 3223 with D or better and MECH 1663 with D or better
Level: Lower
Applied Learning-Practicum
Geometric Dimensioning and Tolerancing (GD&T) is a language of symbols used to describe a part's nominal geometry and the allowable tolerance for variation. Permissible variations in manufactured components are communicated between the design engineer and the manufacturer using standard GD&T symbols. These variations may relate to form, profile, radial relationship to an axis, orientation of one feature to another, or location of features. Application of all symbology and proper interpretation will be stressed.

MECH - 4224 Mechanical Systems Design, 4.00 Credits
Prerequisite(s): MECH 3224 with D or better or MECH 3223 with D or better
Level: Lower
Applied Learning-Other
This course will emphasize the application of mechanical design for industrial machinery. The lecture material for this course will be enhanced through a laboratory experience using design techniques that include the creation of working industrial drawings, parametrically driven spreadsheet solutions of design problems, and component sizing and dimension determinations. This course will include the study of rigid coupling design and flywheels. Also covered in this class are spring design and selection, bolted and welded joint design, column support and lifting lug design. The techniques of component design will also include extensive use of online database information, standards and manufacturers specifications, and manufacturing for assembly. At all times in this class, the design and development for manufacturability will be paramount. This class includes several applied laboratory exercises.

MECH - 4333 CAM II, 3.00 Credits
Prerequisite(s): MECH 3203 with D or better
Level: Lower
Advanced CAM is a follow-up course to MECH 3204 and MECH 3203 CAM (Computer Aided Manufacturing) and MECH 4003 (Solid Modeling). The course will introduce advanced Computer Aided Manufacturing topics such as APT (Automatically Programmed Tool) programming, additional CNC machine programming, solid modeling and Reverse Engineering Projects using a Coordinate Measurement Machine/System (CMM).

MECH - 4523 Control System Fundamentals, 3.00 Credits
Prerequisite(s): MATH 1033 with D or better or MATH 1034 with D or better or MATH 1054 with D or better or MATH 1063 with D or better or MATH 1084 with D or better or MATH 2003 with D or better or MATH 2074 with D or better or MATH 2094 with D or better or MATH 6114 with D or better
Level: Lower
Applied Learning-Practicum
This course introduces students to the electronic components commonly used to monitor and control mechanical systems. Topics include principles of measurement, instrumentation, data acquisition, and control systems with an emphasis on mechanical engineering technology applications. Students build simulated control systems using switches and both traditional and solid state relays common on modern industrial machines. Safety interlock systems, delay circuits, and motor circuits are designed and wired. Lab projects allow students to experience a variety of design solutions and trouble-shoot electronic control systems.

MECH - 4554 Computer Aided Mfg Fundamentals, 4.00 Credits
Level: Lower
This course covers the skills from manufacturing processes and solid modeling to a modern production manufacturing environment. It introduces basic skills in word address programming as well as advanced computer aided manufacturing topics such as automatically programmed tool (APT) programming, computer numeric control machine programming, solid modeling and the use of computer aided design and manufacturing software using a coordinate measurement machine will also be performed. The course includes a final project where students design and produce a component using modern manufacturing techniques.

MECH - 4900 Directed Study, 1.00 TO 6.00 Credits
Level: Lower
A student may contract for one to six credit hours of independent study through an arrangement with an instructor who agrees to direct such a study. The student will submit a plan acceptable to the instructor and to the department chairperson. The instructor and student will confer regularly regarding the progress of the study.

MECH - 5334 Mechanics of Materials, 4.00 Credits
Prerequisite(s): MATH 2074 with D or better and MECH 3334 with D or better
Level: Upper
Applied Learning-Practicum, Course Fee $15.00, Upper Level
This course is a calculus-based study of advanced concepts in Mechanics of Materials. It addresses the behavior of deformable mechanical components when subjected to tension, compression, torsion, flexure, bending or a combination of these loads. Extensive use is made of free body diagrams as well as Mohr's Circle for stress and strain. Experience is gained in the analysis of beam deflection, shafts in torsion, power, column buckling and thin-walled pressure vessels. Analysis includes examination of stress concentrations, elastic and inelastic response, residual stresses, indeterminate structures and thermal effects. Superposition, singularity functions and theories of failure are studied. Laboratory experiences include traditional mechanical material testing and computer software applications.

MECH - 5900 Directed Study, 1.00 TO 6.00 Credits
Level: Upper
Upper Level
A student may contract for one to six credit hours of independent study through an arrangement with an instructor who agrees to direct such a study. The student will submit a plan acceptable to the instructor and to the department chairperson. The instructor and student will confer regularly regarding the progress of the study.
MECH - 6334 Fluid Mechanics, 4.00 Credits
Prerequisite(s): MATH 2074 with D or better or MATH 2094 with D or better
Level: Upper
Applied Learning-Practicum, Upper Level
This course is an introduction to the theory and application of continuum fluid mechanics. Fluid properties and state relations are studied. Incompressible laminar and turbulent flows are investigated using control volume and momentum and energy equations. Navier-Stokes Equations are developed. Flow rate, pipe sizing and minor losses in pipe systems are addressed. Compressible flow and gas dynamics are introduced and include topics in boundary layer theory, Mach number, stagnation properties and shock waves. Turbomachinery, pumps and turbines are included. Weekly laboratory experiences address most of the above topics with applied projects and organized experiments.

MECH - 6643 Process Engineering & Manufact., 3.00 Credits
Prerequisite(s): MECH 1663 with D or better and MATH 7123 with D or better
Level: Upper
Applied Learning-Practicum, Upper Level
This course emphasizes techniques, processes, and factors that contribute to manufacturing processes and operations decision making. Selected topics to be discussed include: 6-sigma DMAIC, KAIZEN, SS, work flow and project planning and scheduling, Computer Integrated Manufacturing/Management (CIM), Design for Manufacturing (DFM), Just In Time (JIT) manufacturing strategies, Statistical Process Control (SPC), Statistical Quality Control (SQC), and other potential management policies and strategies. Students will complete a department designated professional project.

MECH - 7114 Applied Thermodynamics, 4.00 Credits
Prerequisite(s): MATH 2074 with D or better or MATH 2094 with D or better
Level: Upper
Upper Level
This course covers the basic concepts of thermodynamics including property evaluation of ideal gases and compressible substances. Theory and application of the first and second laws of thermodynamics relating to pumps, compressors, turbines, heat exchangers; power cycles-Carnot, Rankine; refrigeration cycles-vapor compression, heat pump are covered. Problem-solving skills are applied to ideal as well as actual cycles. Basic principles of energy conversion, energy conservation, efficiencies and environmental impacts are explored.

MECH - 7153 Fluid Power Systems Design, 3.00 Credits
Prerequisite(s): MECH 6253 with D or better or ELET 4143 with D or better or ELET 6143 with D or better or MECH 2603 with D or better or MECH 3113 with D or better or MECH 3334 with D or better
Level: Upper
Applied Learning-Practicum, Upper Level
This is an upper level design course for all aspects of fluid power systems. Both hydraulic and pneumatic systems are covered. Topics covered in this class include pneumatic circuits, hydraulic power systems, hydrostatic transmissions, and electro-hydraulic control systems. Emphasis will be placed on system design and hydraulic and pneumatic component specification. The course prepares students to sit for the Hydraulic Specialist industry certification exam hosted by the National Fluid Power Society.

MECH - 7223 Energy Systems, 3.00 Credits
Prerequisite(s): MATH 2074 with D or better or MATH 2094 with D or better
Corequisite(s): MATH 2074 with D or better or MATH 2094 with D or better
Level: Upper
Upper Level
This course evaluates the concepts of energy and identifies how it relates to current and future technology. Topics include the data analysis of various types of energy systems, conversion among the several forms of energy, environmental impacts, and cost analyses. Lecture is supported by laboratory activities that may include: experiments, data collection and analysis, field trips to energy production facilities, design activities, and a final group project emphasizing principles discussed and experienced throughout the lecture and laboratory portions of the course.

MECH - 7403 Microfabrication Technology, 3.00 Credits
Prerequisite(s): MATH 2074 with D or better or PHYS 1044 with D or better and CHEM 5013 with D or better or ELET 1202 with D or better
Level: Upper
Applied Learning-Practicum, Course Fee $76.00, Upper Level
This course is designed to provide a valuable experience in the areas of microfabrication and MEMS (microelectromechanical systems) technology and respond to calls from industry to provide undergraduate students with more multidisciplinary experiences. The course provides a comprehensive introduction to technology of miniaturization and its application. Methods and tools to create miniature electromechanical architectures are discussed. Students will gain hands-on experience required in standard microfabrication industry and learn basics of design, fabrication, and characterization of MEMS devices. The course is ideal for junior and senior undergraduate students who are looking to perform senior projects in this field, find a career in the microfabrication industry, or pursue graduate studies in MEMS.

MECH - 7603 Heat Transfer, 3.00 Credits
Prerequisite(s): MECH 7114 with D or better and MATH 6114 with D or better and MECH 6334 with D or better
Level: Upper
Upper Level
This course is a study of the physical effects of heat transfer phenomena including conduction, convection, and radiation. This will include the concepts of control volume analysis, conversion laws of mass, momentum and energy, steady state and transient conduction, laminar and turbulent convection, and phase change. A wide range of engineering problems will be presented to the students for solution using algebraic, differential and/or finite-difference methods. The heat transfer process will be directly applied in the design and analysis of thermal energy systems.

MEDR - HEALTH INFO TECH

MEDR - 1114 Intro to Health Info Management, 4.00 Credits
Prerequisite(s): COMP 1503 with C or better and ( BIOL 1114 with C or better or BIOL 1404 with C or better )
Level: Lower
This is a lecture- and lab-based online course that covers the study of health record content, documentation, compliance with regulations and standards; the role of HIM professionals; data retention, storage and retrieval; and destruction; release of information; privacy, confidentiality, and HIPAA; legal and ethical issues related to healthcare documentation; the principles to the practice of HIM; primary and secondary use of data; and healthcare organizations and delivery systems.

MEDR - 1132 Essentials of Pharmacology, 2.00 Credits
Prerequisite(s): MEDR 1133 with C or better
Level: Lower
This is a lecture-based online course for those entering a health care profession, and it covers the study of basic concepts and terminology associated with medication structure, function, interaction, and administration. Core concepts in pharmacology are introduced, including terminology, consumer safety and drug regulations, sources and bodily effects of drugs, medication preparation, abbreviations and symbols of systems, measurements, responsibilities, and principles of drug administration. Students also identify diseases associated with certain medications as well as medications that would be prescribed for certain diseases. Commonly used drugs are organized according to classification, and each classification is described along with characteristics of typical drugs, purpose, side effects, cautions and interactions.

MEDR - 1133 Medical Terminology, 3.00 Credits
Level: Lower
This is a lecture-based online course offered in both traditional on-campus and on-line formats that includes the study of body systems, functions, including the structure, meaning, and use of medical terms related to diseases and operations of the human body. Body systems studied include integumentary, musculoskeletal, nervous, sensory organs, endocrine, cardiovascular, respiratory, reproductive, genitourinary, and digestive. Units on psychiatry, psychology and pharmacology (drugs) are also covered. Students also learn how to use research medical information (e.g., such as reputable electronic medical references).

MEDR - 1223 Hlth Data Mgmt & Hltcare Stat, 3.00 Credits
Prerequisite(s): MEDR 1144 with C or better
Level: Lower
This is a lecture and lab-based online course. Topics of study include health data management (data collection, validation, accuracy, and data) governance and information, analytics and decision support, primary and secondary sources, clinical indices, databases, and registries. Reporting of data, healthcare report generation, presentation of data, graphic representation, healthcare descriptive statistics (e.g., number of patients, percent of occurrence, length of stay, healthcare rates), measures of central tendency (frequency distribution), vital statistics data and rates, research methods, productivity, staffing levels, and budgeting will be covered.

MEDR - 1234 ICD-10-CM & ICD-10-PCS Coding, 4.00 Credits
Prerequisite(s): MEDR 1144 with C or better and ( BIOL 2214 with C or better or BIOL 2304 with C or better ) and BIOL 4403 with C or better and MEDR 1132 with C or better
Level: Lower
This is a lecture- and lab-based online course that includes a study of clinical classification systems (e.g., ICD-10-CM and ICD-10-PCS) and reimbursement methodologies. Topics of study include the use and maintenance of electronic applications and work processes that support clinical classification and coding; assignment of diagnosis and procedure codes using current nomenclature (paper-based coding manuals and encoder software); ensuring the accuracy of diagnostic and procedural groupings (e.g., DRGs, MS-DRGs); interpretation of regulations and coding guidelines; validation of coding accuracy using clinical information located in the health record; use and maintenance of applications and processes to support other clinical classification and reimbursement systems (e.g., DSM-IV-TR, SNOMED-CT); and use of clinical data for reimbursement and prospective payment systems.

MEDR - 1244 CPT & HCPCS Level II Coding, 4.00 Credits
Prerequisite(s): ( MEDR 1114 with C or better and BIOL 2214 with C or better or BIOL 2304 with C or better ) and BIOL 4403 with C or better and MEDR 1132 with C or better
Level: Lower
This is a lecture- and lab-based online course that includes a study of the CPT and HCPCS level II clinical classification systems and outpatient and physician office reimbursement methodologies. Topics of study include the use and maintenance of electronic applications and work processes that support clinical classification and coding; assignment of procedure codes using current nomenclature; ensuring the accuracy of procedural groupings (e.g., ambulatory payment classifications, Medicare fee schedule); interpretation of regulations and coding guidelines; validation of coding accuracy using clinical information located in the health record; use and maintenance of applications and processes to support other clinical classification and reimbursement systems (e.g., DRGs, MS-DRGs); and use of clinical data for reimbursement and prospective payment systems.

MEDR - 2614 Advanced Coding & Reimbursement, 4.00 Credits
Prerequisite(s): MEDR 1234 with C or better and MEDR 1244 with C or better
Level: Lower
This is a lecture- and lab-based online course that includes intermediate and advanced study of the ICD-10-CM and ICD-10-PCS (abbreviated as ICD-10-CM/PCS), CPT, and HCPCS level II classification systems. Application-based assignments allow students to demonstrate their mastery of coding conventions, coding principles, and official inpatient and outpatient coding guidelines. Students use inpatient and outpatient (e.g., ambulatory surgery, emergency department, physician office) case studies and patient records to assign codes to diagnoses/ procedures statements and generate claims. ICD-10-CM, ICD-10-PCS, CPT, and HCPCS level II coding manuals and encoders (e.g., CodeFinder, CodeCorrect.com, Encoder Pro, Quantam) are required. Students generate diagnosis-related groups (DRGs) and ambulatory patient classifications (APCs) for inpatient and outpatient cases, respectively, and complete assignments to master other prospective payment systems (e.g., ambulatory surgical center payments, resource utilization groups, home health resource groups).
The PPE is designed to enable students to obtain actual practical experience in theoretical and application-based procedures previously studied. Students will complete a maximum of 80 unpaid hours on site. Students will be required to complete weekly logs, discussion board postings of their experience, and submit a completed student handbook along with a final project at the end of their PPE. If a student is not able to be placed at a healthcare facility, internet-based laboratory projects/assignments, which are evaluated by college faculty, will be required by the student, to simulate a virtual PPE.

Med - 4514 Alternate Care Hlth Info Mgmt, 4.00 Credits
Prerequisite(s): MEDR 1114 with C or better * and MEDR 1223 with C or better * and (MEDR 5114 with C or better * or MEDR 3114 with C or better * )
Level: Lower
This is a lecture- and lab-based online course that includes a study of health information management (HIM) consulting, cancer registry management, healthcare information management requirements and standards in alternate healthcare settings (e.g., behavioral healthcare facilities, correctional facilities, long-term healthcare facilities, etc.), clinical classification systems for alternate health care (e.g., DSM-5, ICD-10, SNOMED-CT), alternate health delivery systems, HIM human resources, and HIM financial and resource management.

Med - 4900 Directed Study, 1.00 TO 6.00 Credits
Level: Lower
An internet-based elective course for students interested in advanced work in health information management in an area of special interest. Enrollment is limited in order to allow each student the opportunity to pursue his/her area of special interest.

Mktg - Marketing

Mktg - 1033 Advertising Principles, 3.00 Credits
Prerequisite(s): Mktg 2073 with D or better
Level: Lower
Students will learn the uses and power of advertising and how to apply these concepts to daily business. Students will get a basic understanding of advertising concepts and how to apply them to various media. Utilizing good design and marketing techniques, students will analyze and create advertisements for business use.

Mktg - 1063 Principles of Sales, 3.00 Credits
Prerequisite(s): Mktg 2073 with D or better
Level: Lower
This course examines the principles and methods of sales with respect to the salesperson, their company, products, and customers. Emphasis is placed on the selling process: prospecting, pre-approach, approach, presentation, trial close, meeting objections, and closing. Students will design and implement an industrial sales presentation.

Mktg - 2073 Principles of Marketing, 3.00 Credits
Level: Lower
Applied Learning-Practicum
Principles of Marketing introduces students to the field of marketing. The course emphasizes marketing functions and institutions as they pertain to the product, price, place, and promotion aspects of bringing goods and services to the consumer. Students learn how to evaluate marketplace potential and risk of delivering marketing offerings with meaningful customer value. Students will participate in classroom presentations, discussions, team problem solving and role playing marketing situations. The creation of a comprehensive marketing plan will be required.

Mktg - 3153 Web Design & Marketing, 3.00 Credits
Prerequisite(s): Mktg 2073 with D or better
Level: Lower
This course will examine the uses and power of the Internet, web pages, and e-commerce and how to apply these concepts to daily business. Integration of marketing and web design techniques will be utilized in the creation of effective web pages.

Mktg - 6003 Strategic Marketing, 3.00 Credits
Level: Upper
Level: Upper
Strategic Marketing provides students with an overview of the marketing discipline and a framework that presents marketing as a value creation process. Participants learn how to evaluate marketplace potential and risk from the perspective of the entity's unique ability to develop and deliver goods and services to the customer. Students learn how to evaluate marketplace potential and risk of delivering marketing offerings with meaningful customer value. Students will participate in classroom presentations, discussions, team problem solving, and in-depth analysis of a series of real-life marketing situations with a diverse range of entities and industries. The course explores the principal concepts and tools of contemporary marketing management, from market segmentation and product positioning to the design of distribution channels and communications strategy, in order to maximize the value delivered to customers. A Strategic Marketing Plan will be required. Civic Engagement Intensive (CEI) sections exist.

Motor - Motorcycle/Powersports

Motor - 1003 Intro to Shop Service Basics, 3.00 Credits
Prerequisite(s): Applied Learning-Practicum
Level: Lower
This course will familiarize the student with the general operation of a motorcycle and powersports repair facility. Topics will include: typical business operating procedures, safety, tools, equipment, and hazard awareness.

Motor - 1005 Basic Electrical Systems, 5.00 Credits
Prerequisite(s): Applied Learning-Practicum
Level: Lower
This course will introduce the student to electrical fundamentals including circuit designs and circuit calculations. Common electrical components, operation, and testing will also be included.

Motor - 1015 Welding & Fabrication, 5.00 Credits
Prerequisite(s): Applied Learning-Practicum, Course Fee $129.00
This course will familiarize the student with all common welding and fabrication techniques, using a variety of equipment including oxy-acetylene torch, arc welders, M.I.G. welders, T.I.G. welders, plasma cutters, metal breaks, and metal shears.

Motor - 1025 Brake Systems, 5.00 Credits
Prerequisite(s): Applied Learning-Practicum
Level: Lower
This course will cover brake systems used on all types of motorcycles and powersports vehicles. Topics covered include: component identification, hydraulic principles and component operation including anti-lock brakes; diagnosis and service of brake systems.
MOTO - 2005 Starting & Charging Systems, 5.00 Credits
Level: Lower
Applied Learning-Practicum
This course will cover starting and charging systems used on all types of motorcycles and powersport vehicles. Topics covered include: starter types, alternator/generator types, system wiring, testing and diagnosis.

MOTO - 2013 Inspection & Preventative Mtn, 3.00 Credits
Level: Lower
Applied Learning-Practicum
This course focuses on NYS vehicle inspection and vehicle maintenance related to the motorcycle and powersports industry.

MOTO - 2015 Suspension & Steering Systems, 5.00 Credits
Level: Lower
Applied Learning-Practicum
This course will cover suspension and steering systems used on all types of motorcycles and powersport vehicles. Topics covered include: component identification, operation of suspension and steering systems; wheel alignment principles, measurement, and adjustments; diagnosis of steering and suspension concerns; steering and suspension component removal and replacement.

MOTO - 2035 Fuel & Ignition Systems, 5.00 Credits
Level: Lower
Applied Learning-Practicum
This course will cover ignition and fuel systems used on all types of motorcycles and powersport vehicles. Topics covered include: carburetion, fuel injection, points type ignitions, and electronic ignition.

MOTO - 3010 Adv Engines & Transmissions, 10.00 Credits
Level: Lower
Applied Learning-Practicum
This course will cover the air and liquid cooled engines and transmissions used on all types of motorcycles and power sport vehicles. Topics covered include engine operation, transmission and clutch operation, diagnosis, and service procedures.

MOTO - 3023 Final Drive Systems, 3.00 Credits
Level: Lower
Applied Learning-Practicum
This course will cover all types of motorcycle and powersport vehicle drive systems. Topics covered include drive system types, operation, diagnosis, and service procedures.

MOTO - 3045 Adv Fuel and Exhaust Systems, 5.00 Credits
Level: Lower
Applied Learning-Practicum
This course will cover fuel and exhaust systems used on all types of motorcycles and powersport vehicles. Topics covered include intake, fuel and exhaust systems, forced induction, diagnosis, and service.

MOTO - 4005 Advanced Drivability, 5.00 Credits
Level: Lower
Applied Learning-Practicum
This course will cover the use of technologies and procedures to diagnose and repair drivability concerns. Instruction will focus on the use of various types of test equipment available to assist in the diagnosis of problems found on motorcycles and powersport vehicles.

MOTO - 4015 Advanced Electrical, 5.00 Credits
Level: Lower
Applied Learning-Practicum
This course will cover the use of advanced technologies and procedures to diagnose and repair electrical components. Instruction will focus on the use of various types of test equipment and tools used to diagnose all electrical systems used on modern motorcycles and powersport vehicles.

MOT - 4043 Advanced Applications, 3.00 Credits
Level: Lower
Applied Learning-Practicum
This course focuses on repair facility management practices. Paperwork processing, employee and customer relations are included.

MOTO - 4055 Adv Chassis and Suspension, 5.00 Credits
Level: Lower
Applied Learning-Practicum
This course will cover all types of motorcycles and powersport vehicle chassis and suspension systems. Topics covered include chassis design, front and rear suspension types, operation, diagnosis, and service procedures. Wheels and tire replacement and repair will also be included.

NASC - NATURAL SCIENCE

NASC - 1001 Astronomy Laboratory, 1.00 Credit
Level: Lower
Liberal Arts and Science
This laboratory course is designed to accompany NASC 1003 for the student who wishes a laboratory component to astronomy. It will cover many of the same topics as the astronomy course but using a laboratory setting including the use of a telescope, computers, graphing, and various measuring instruments, and astronomical charts.

NASC - 1003 Astronomy I, 3.00 Credits
Level: Lower
Gen Ed - Natural Sciences, Liberal Arts and Science
This course is an introduction to planetary science and positional astronomy. Topics covered are: positional astronomy; sidereal and solar periods; phases; planetary motion; the nature of science and its application to astronomy; gravity and Kepler's Laws of Planetary Motion; light and telescopes, the physical properties of the planets and other Solar System bodies; the evolution of planets; the evolution of the Solar System; extra-solar planets and life elsewhere in the Universe.

NASC - 1043 Physical Science Survey, 3.00 Credits
Level: Lower
Gen Ed - Natural Sciences, Liberal Arts and Science
This course is a survey of the principles and applications of the physical and earth science. The course covers basic topics in mechanics, astronomy, geography, meteorology, environmental science and earth science. The nature and practice of science will also be discussed.

NASC - 2003 Astronomy II, 3.00 Credits
Level: Lower
Gen Ed - Natural Sciences, Liberal Arts and Science
This course is designed as a continuation of NASC 1003, Astronomy, or as a separate introduction to stellar evolution and cosmology. It will introduce advanced topics from the fields of astronomy and cosmology. Emphasis will be placed on scientific process and critical thinking. This course is suitable for science majors or as a science elective. Topics to be covered are: star cycles, galactic evolution and cosmology. An optional laboratory course will be offered.

NASC - 6003 Topics in Sustainability, 3.00 Credits
Prerequisite(s): MATH 1003 with C or better and ( BIOL 1104 with D or better or BIOL 1304 with D or better or CHEM 1114 with D or better or CHEM 1114 with D or better or PHY 1024 with D or better or PHYS 1044 with D or better or PHYS 1044 with D or better )
Level: Upper
Upper Level
In this course, students will apply quantitative reasoning and qualitative reasoning to a variety of areas as they relate to sustainability; the goal of meeting the needs of the present while maintaining the ability of the future to meet its needs. Students will establish ways in which these areas relate to the three pillars of sustainability: environmental, social and economic with the goal of recognizing and coping with potential conflicts and issues involved with efforts to achieve sustainable goals.

NASC - 6004 Topics in Sustainability, 4.00 Credits
Prerequisite(s): MATH 2043 with D or better or MATH 1054 with D or better
Level: Upper
Upper Level
Course is designed to apply quantitative and qualitative reasoning to a variety of areas as they relate to sustainability; the goal of meeting the needs of the present while maintaining the ability of the future to meet its needs. Establish ways in which these areas relate to the three pillars of sustainability: environmental, social and economic with the goal of recognizing potential conflicts and issues involved with efforts to try to achieve sustainable goals.

NURS - NURSING

NURS - 1011 NURS Living Learning Comm I, 1.00 Credit
Level: Lower
Pass/Fail
Nursing Seminar: Conceptual Skill Building is the beginning foundation of concept based learning in nursing. The course content includes the concepts of critical thinking, observational skills, caring, and recognizing self-development. Emphasis is placed on individual skill building and enhancing self-confidence. The student is also introduced to the development of an individual portfolio to assist in meeting personal goals and to reflect on accomplishments. Engagement in the college culture will be explored through a designated living area in a residence hall, planned tours of college resources, and increased faculty contact during engaging concept-based learning activities. Conceptual skill building and self-development skills will facilitate student transition into a healthy lifestyle and reduce stress while participating in the Associate Degree Nursing program.

NURS - 1055 Nursing 1 Lecture, 5.00 Credits
Prerequisite(s): BIO 1404 with C+ or better
Corequisite(s): BIO 1404 with C+ or better
Level: Lower
Pass/Fail
Nursing 1 is the foundation course in the nursing curriculum. Its content represents commonalities of knowledge and skills considered fundamental to subsequent nursing courses. Emphasis is placed on principles of care needed for an individual and how these vary, depending on their physical and emotional state and level of development. The student is introduced to the nursing process with an emphasis on assessment and planning. The student uses a variety of methods to achieve competence in learning objectives and demonstrates proficiency in their responsibility for learning at a novice level.

NURS - 1108 Nursing I, 8.00 Credits
Level: Lower
Applied Learning-CLINICAL PLOM, Clinical Liability Insurance, Course Fee $17.00
Nursing 1 is the foundation course in the nursing curriculum. Its content represents commonalities of knowledge and skills considered fundamental to subsequent nursing courses. Emphasis is placed on principles of care needed for an individual and how these vary, depending on their physical and emotional state and level of development. The student is introduced to the nursing process with an emphasis on assessment and planning. The student develops beginning skills in assisting patients with major health concerns to meet their basic needs. Areas of concentration include but are not limited to: legal/ethical responsibilities of the nurse, concepts of mental health, therapeutic communication and asepsis principles are incorporated throughout the course. The development of basic nursing skills begins in a structured campus lab setting and continues in the clinical lab.

NURS - 1133 Nursing 1 Lab, 3.00 Credits
Prerequisite(s): BIO 1404 with C+ or better
Corequisite(s): BIO 1404 with C+ or better
Level: Lower
Pass/Fail
Nursing 1 Lab is the foundation course in the nursing curriculum. Its content represents commonalities of knowledge and skills considered fundamental to subsequent nursing courses. Emphasis is placed on principles of care needed for an individual and how these vary, depending on their physical and emotional state and level of development. The student is introduced to the nursing process with an emphasis on assessment and planning. The student develops beginning skills in assisting patients with major health concerns to meet their basic needs.
The student further develops their role as a teacher by formulating and implementing teaching based upon a client's individual needs. Major health concerns include but are not limited to: psychiatric, blood disorders, nephric problems, immunological, musculoskeletal disorders, cancer, gerontology, gynecological problems, neurological disorders, and acute cardiac problems. The student considers some of the major health problems of children. The student begins to care for clients in more complex situations in the clinical setting incorporating therapeutic verbal and nonverbal communication skills. Experiences include rotations to intensive care unit, and emergency department. To develop the role as a professional, the student participates in a group leader rotation.

NURS - 3310 Nursing III, 10.00 Credits
Prerequisite(s): ( NURS 2208 with C or better or NURS 2209 with C or better ) and ( BOL 4254 with C+ or better * or BOL 5254 with C+ or better * )
Level: Lower
Applied Learning-Clinical Pclm, Clinical Liability Insurance, Course Fee $23.00
In Nursing III, the student applies the nursing process to assess, analyze, plan, implement, and evaluate nursing care for two or more clients with chronic and/or critical health concerns. The student further develops her role as a teacher by formulating and implementing teaching based upon a client's individual needs. Major health concerns include but are not limited to: psychiatric, blood disorders, nephric problems, immunological, musculoskeletal disorders, cancer, gerontology, gynecological problems, neurological disorders, and acute cardiac problems. The student considers some of the major health problems of children. The student begins to care for clients in more complex situations in the clinical setting incorporating therapeutic verbal and nonverbal communication skills.

NURS - 4055 Nursing IV Lecture, 5.00 Credits
Prerequisite(s): BOL 4254 with C+ or better or BOL 5254 with C+ or better ( NURS 3055 with C+ or better and NURS 3155 with C+ or better ) or NURS 3310 with C+ or better or NURS 3311 with C+ or better
Corequisite(s): BOL 4254 with C+ or better or BOL 5254 with C+ or better and ( NURS 3055 with C+ or better and NURS 3155 with C+ or better ) or NURS 3310 with C+ or better or NURS 3311 with C+ or better
Level: Lower
In Nursing IV, the student synthesizes the nursing process to assess, plan, implement, and evaluate nursing care to clients with major health concerns that are studied to include critical care topics building on prior knowledge. The student uses a variety of methods to acquire competence in learning objectives and demonstrates proficiency in their responsibility for learning.

NURS - 4155 Nursing IV Lab, 5.00 Credits
Prerequisite(s): BOL 4254 with C+ or better or BOL 5254 with C+ or better ( NURS 3055 with C+ or better and NURS 3155 with C+ or better ) or NURS 3310 with C+ or better or NURS 3311 with C+ or better
Corequisite(s): BOL 4254 with C+ or better or BOL 5254 with C+ or better and ( NURS 3055 with C+ or better and NURS 3155 with C+ or better ) or NURS 3310 with C+ or better or NURS 3311 with C+ or better
Level: Lower
In Nursing IV, the student increases skills in applying the nursing process to a group of clients with chronic and/or critical health problems. The student develops her/his professional role as a leader and manager and is prepared for the transition from student to graduate. Nursing IV involves the student in specialty areas such as Emergency Department and Intensive Care Unit. To develop the role as a professional, the student participates in a group leader rotation. Clinical experiences include a variety of settings. A pediatric experience and a preceptorship are included. Students continue to focus on prevention and health education in the clinical and community setting. In the clinical lab, the student cares for a group of clients with more critical and complex situations. The student will demonstrate proficiency in critical thinking in applied learning environments.

NURS - 4140 Nursing IV, 10.00 Credits
Prerequisite(s): ( NURS 3311 with C+ or better or NURS 3310 with C+ or better ) and ( BOL 4254 with C+ or better or BOL 5254 with C+ or better )
Level: Lower
Applied Learning-Clinical Pclm, Clinical Liability Insurance, Course Fee $12.00
In Nursing IV, the student increases skills in applying the nursing process to a group of clients with chronic and/or critical health concerns. The student develops her/his professional role as a leader and manager and is prepared for the transition from student to graduate. Nursing IV involves the student in specialty areas such as the Emergency Department, Intensive Care Unit, and Community Agencies. The student is introduced to health areas which are investigated include, but are not limited to: Endocrine, Neurology, Cardiac, Respiratory, Obstetrical and Trauma Emergencies. To develop the role as a professional, the student participates in a group leader rotation. Clinical experiences include a variety of settings. A pediatric experience and a two day preceptorship are included. Students continue to focus on prevention and health education in the clinical and community setting. In the clinical lab, the student cares for a group of clients with more critical and complex situations. The student will demonstrate proficiency in critical thinking in applied learning environments.
NURS - 6003 Nursing Leadership/Management, 3.00 Credits
Prerequisite(s): NURS 5003 with C or better and NURS 8003 with C or better
Level: Upper
Applied Learning-Clinical, Clinical Liability Insurance, Upper Level
This nursing course focuses on the development of decision-making knowledge and skills for the nurse leader. The principles of management and leadership are addressed in the course. Course content includes role concepts, change theory, fiscal management, organizational structure, conflict resolution, impact of unionization, quality control, and performance appraisal. In addition, evidence-based leadership and decision-making for public policy are explored in the course. Lastly, applied learning will be implemented with an in-person immersion with a nursing leader to explore the nurse leadership role.

NURS - 6403 Adv Phrmclgy, Herbal Ther, Nut, 3.00 Credits
Prerequisite(s): NURS 2209 with C or better or NURS 2208 with C or better
Level: Upper
Upper Level
This advanced course involves the study of drug preparations relative to their mechanism of action, physiological effects, methods of administration, therapeutic dosages, healthcare practitioner responsibilities, interactions, untoward effects, and legal implications. The course also explores the use of common herbal therapies, over the counter medications, and nutritional supplements. In addition, the course addresses off-label use of drugs and biotechnical preparations and their therapeutic use. Students will present a patient teaching plan.

NURS - 6413 Health Asmt & Promotion Across, 3.00 Credits
Prerequisite(s): NURS 2209 with C or better or NURS 2208 with C or better
Level: Upper
Upper Level
This course focuses on a holistic approach to health assessment and promotion across the life span. The course builds on previously acquired knowledge and skills to allow a student to complete a comprehensive health assessment. Technical aspects for health assessment and promotion are addressed with the use of simulation where appropriate. Socio-cultural influences, growth and development, and gender are concepts integrated in the course. Students will be required to produce and present a health promotion plan.

NURS - 7003 Nursing Research, 3.00 Credits
Prerequisite(s): ( MATH 1123 with C or better or MATH 2124 with C or better ) and ( NURS 2209 with C or better or NURS 2208 with C or better ) and NURS 5003 with C or better
Level: Upper
Upper Level
This course provides the student with the opportunity to examine the role of the nurse in the generation and application of research in the healthcare domain. The course focuses on the study and analysis of research in nursing practice to optimize client outcomes. Course content includes discussion of research formulation, identification of variables, research design and methodology, data collection and analysis, and interpretation of findings. In addition, the course will focus on how theory and research relate to evidence-based practice. The steps of the research process will have sufficient depth covered to allow for a beginning appreciation of scholarly inquiry and evaluation of selected nursing research studies. Student groups will present a topical research literature review.

NURS - 7004 Population Focused Care in Com, 4.00 Credits
Level: Upper
Applied Learning-Field Study, Clinical Liability Insurance, Upper Level
Current RN licensure is required for this course. This course focuses on the role of the nurse in the evaluation of current public health issues and population-focused health care delivery. Key public health concepts and frameworks will be examined from an evidenced-based perspective. Principles of social justice and public health policy will be discussed as they interrelate with a variety of populations, with an emphasis on specific needs of rural communities. A forty-five hour preceptor guided community health immersion experience will provide an opportunity for the student to utilize the public health nursing model to participate in community assessment, identify resources, plan, execute and evaluate a primary health prevention/promotion project.

NURS - 7023 The History Imp & Culture Nsg, 3.00 Credits
Prerequisite(s): NURS 5003 with C or better and NURS 8003 with C or better
Level: Upper
Upper Level
This course is designed to provide an overview of the history of nursing and nursing images as they relate to nursing culture and the American health care system and society. Using historical research methods, students will explore fundamental principles for critiquing historical studies or narratives. The course will address issues of class, race, gender, and societal values as possible influences on the development of the nursing profession and nursing culture. By the end of the course, students will be able to describe the impact of historical, societal and cultural influences on modern nursing.

NURS - 7033 Healthy Aging in Rural Areas, 3.00 Credits
Prerequisite(s): NURS 5003 with C or better and NURS 8003 with C or better
Level: Upper
Upper Level
This course focuses on the healthcare of elders including the unique aspects of aging across the adult lifespan. Elders and their needs are framed from a physical, psychological, social, cultural, and spiritual perspective and within a family/community environment. Emphasis in the course is on health maintenance, prevention, and promotion as well as maintaining function and preventing disability in the elderly. The student will offer a presentation addressing contemporary nursing and healthcare issues affecting elders in rural areas.

NURS - 8003 Informtica&Tech App in Hlthcare, 3.00 Credits
Prerequisite(s): NURS 2209 with C or better or NURS 2208 with C or better
Level: Upper
Upper Level
This course will focus on informatics and technology applications in the healthcare setting. This course will cover the use of information systems and technologies such as telehealth, electronic health record (EHR), distance and e-learning, use of secondary data, and summarization of information. In addition, the course will explore the use of portable and personal devices such as smart phones, tablets, laptop and other mobile platforms in the healthcare setting. The course will also address the integration of topics related to legal, ethical, and policy issues affecting information management and technology in healthcare delivery. Finally, the course will explore information technology systems as they relate to workflow and redesign in various healthcare settings to improve client outcomes.

NURS - 8013 Professional Capstone, 3.00 Credits
Prerequisite(s): NURS 5003 with C or better and NURS 6413 with C or better and NURS 7003 with C or better
Level: Upper
Applied Learning-Creative Work, Upper Level
Current RN licensure is required for this course. This capstone course continues to expand and explore content to prepare the student for an autonomous role as a baccalaureate-prepared practitioner in health care. Course activities help the student identify a health care need and implement a project to address the selected concern. In addition, the course content allows the student to further develop a personal philosophy through the culminating socialization process to the expanded and autonomous role.

NURS - 8043 Politics & Economics in Nursin, 3.00 Credits
Prerequisite(s): NURS 5003 with C or better and NURS 8003 with C or better
Level: Upper
Upper Level
This course is designed to provide the student with a knowledge base and develop skills in influencing policy in today's changing health care environment. The course focuses on the politics of health policy in terms of legislative and executive processes at the local, state, and federal level. The course also explores economic, social, ethical and political factors of healthcare delivery systems. In addition, political aspects are explored relative to individuals or groups of importance, including special interest groups, lobbyists, the press, elected officials, legislative, and public agencies. Students will produce an analysis of healthcare systems and policies of elected countries, compared to the U.S. healthcare system and industry.

PHIL - PHILosophy

PHIL - 1073 Problems of Philosophy, 3.00 Credits
Level: Lower
Gen Ed - Humanities, Liberal Arts and Science
This course examines some of the fundamental questions, controversial issues, and major problems faced by people in relationship to the world. It also focuses on some of the methods for inquiry and problem-solving that people have devised to make their world more comprehensible. The course is designed, through readings and class discussions, to promote critical thinking and to develop effective techniques of systematic inquiry.

PHIL - 2013 Critical Thinking, 3.00 Credits
Level: Lower
Gen Ed - Humanities, Liberal Arts and Science
This course is a three part structure: 1. Logic. At root, critical thinking is the ability to reason clearly and logically. Students will learn core concepts such as validity, soundness, logical form, and informal fallacies. 2. Applied Argument Construction. Students will learn to construct and critique ordinary and scientific arguments, both in written and oral form, using the logical principles learned in the Logic component of the course. 3. Alternative Reasoning Methods. Students will be encouraged to identify and examine arguments based on cultural background, gender, religious convictions, requirements of classical logic. Students will be encouraged to identify and examine such arguments. The purpose of this examination is not to validate or endorse alternative reasoning methods, but to encourage students to talk with each other about the difference and similarities in the ways they make judgments and other factors. Writing is continued in assignments related to readings, class discussions, and lectures.

PHIL - 2173 Ethics, 3.00 Credits
Level: Lower
Gen Ed - Humanities, Liberal Arts and Science
Ethics is a course designed to inquire into the nature of values and how we acquire them. It studies some major ethical systems derived from such values that have been used to evaluate people's conduct. It encourages students to discuss theories as applied to existing moral dilemmas. Writing is continued in assignments related to readings, class discussions, and lectures.

PHIL - 6003 Professional Ethics, 3.00 Credits
Prerequisite(s): COMN 1203 B or better or LITR 2003 B or better or LITR 2033 B or better or LITR 2143 B or better or LITR 2503 B or better or LITR 2703 B or better or LITR 2813 B or better or LITR 2903 B or better or LITR 2913 B or better or LITR 3233 B or better or LITR 3333 B or better or LITR 3433 B or better or LITR 3703 B or better or LITR 7003 B or better or LITR 7013 B or better
Level: Upper
Gen Ed - Humanities, Liberal Arts and Science, Upper Level
This course introduces students to historical ethical foundations that will serve as frameworks for discussion, activities, and projects. Students will examine how to manage relationships both internal and external to the workplace, determining how best to manage those relationships despite challenges such as privacy and conflict of interest. In addition to determining how to resolve workplace conflict ethically and justly, students will assess the difficulties and conflicts that may arise between individuality and workplace standards. Through engagement with practical ethical problems, students will also learn to recognize, analyze, and apply environmental, cultural, and corporate social responsibilities. Course knowledge will culminate in each student's development of a statement of professional ethics, which will function as an ethical cornerstone in each student's career path.

PHYS - PHYSics

PHYS - 1014 Introductory Physics, 4.00 Credits
Level: Lower
Gen Ed - Natural Sciences, Liberal Arts and Science
This course is appropriate for students lacking a strong math and science background and who need to develop physical concepts in the classroom and a desire to participate in a laboratory. The laboratory portion of the course will include traditional and conceptual physics experiments, and will develop physical concepts in the classroom in a highly interactive laboratory. The course is appropriate for students lacking a strong math and science background.
PHYS - 1024 General Physics I, 3.00 Credits

Level: Lower
Gen Ed - Natural Sciences, Liberal Arts and Science

This is the first semester of a one-year course designed for students in Engineering Technology. The course covers the principles of physics that have been developed to explain the behavior of matter and energy. The topics covered include: measurement, physical constants, and the laws of motion. The course includes laboratory work covering some of these topics.

PHYS - 1044 College Physics I, 4.00 Credits

Prerequisite(s): MATH 1034 with D or better or MATH 1054 with D or better or MATH 1084 with D or better

Level: Lower
Applied Learning-Other, Gen Ed - Natural Sciences, Liberal Arts and Science

This is the first semester of a two-semester physics sequence, which is appropriate for Liberal Arts students and technical students who plan to pursue a four-year degree in the biological sciences. In this course, students will learn how to explain natural phenomena both qualitatively and quantitatively. Problem solving skills are emphasized. Topics include: motion, energy, work, power, momentum, circular motion, and the dynamics of rotational motion. The course includes laboratory work covering some of these topics.

PLSC - 1003 International Relations, 3.00 Credits

Level: Lower
Gen Ed - Other World Civ, Liberal Arts and Science

This course examines the dynamics of the nation-state and the interrelationship among states. The focus of the course is the position of the United States as a world power in the past, present, and future. Topics may include the history of international relations; U.S. foreign policy and security challenges; the problems faced by less developed countries; international organizations; “globalization” and the dynamics of the world economy, and regional and national perspectives. An emphasis on current events and areas of conflict around the world.

PSYC - PSYCHOLOGY

PSYC - 1013 General Psychology, 3.00 Credits

Level: Lower
Gen Ed - Social Sciences, Liberal Arts and Science

The major emphasis of this course is on the scientific study of the behavioral and mental processes of human beings. Both the biological structure of the human organism and the effect of the environment upon behavior are studied. The major areas of psychological study, including research methods, sensation and perception, learning theories, and cognitive processes are surveyed.

PSYC - 1023 Human Development, 3.00 Credits

Prerequisite(s): PSYC 1013 with D or better

Level: Lower
Gen Ed - Social Sciences, Liberal Arts and Science

This course is designed to introduce students to the basic concepts and principles of physical, cognitive, and psychosocial development at each major stage of life— from conception until old age. Major theories are explained and fully integrated throughout the human life span.

PSYC - 1033 Human Relations, 3.00 Credits

Level: Lower
Gen Ed - Social Sciences, Liberal Arts and Science

This course covers the problems of human adjustment using the psychoanalytic, social-learning, and humanistic perspectives. The course also focuses on stress, its effects and its management. The third area of study concerns interpersonal and social aspects of adjustment.

PSYC - 1063 Basic Helping Skills, 3.00 Credits

Prerequisite(s): PSYC 1013 with D or better

Level: Lower
Applied Learning-Practicum, Gen Ed - Social Sciences, Liberal Arts and Science

This course is designed to assist the student in developing the helping skills necessary to conduct a productive, helping session. Helping models, ethical considerations, and interview methods will be examined, particularly as they apply to the human services field.

PSYC - 2033 Adolescent Development, 3.00 Credits

Prerequisite(s): PSYC 1013 with D or better

Level: Lower
Liberal Arts and Science

Adolescent Development is an introduction to the physical, cognitive, and social changes which occur between puberty and young adulthood. Contemporary issues of gender, sexuality, morality, and education are discussed. Psychological theories and developmental stages of life will be explored by the student and applied to adolescent behavior.

PSYC - 2093 Abnormal Psychology, 3.00 Credits

Prerequisite(s): PSYC 1013 with D or better

Level: Lower
Gen Ed - Social Sciences, Liberal Arts and Science

Major emphasis of this course is on understanding the symptoms, etiology, diagnostic classification, and theories pertaining to psychopathology. Special attention is paid to the medical model, the psychological model, and the behavioral model as they apply to the causes and treatment of the behavioral disorders. Newer developments in therapy are analyzed which treat mental disorders as problems of living rather than specific diseases.

PSYC - 2900 Directed Study, 1.00 TO 4.00 Credits

Level: Lower
Liberal Arts and Science

This course allows students who have successfully completed a previous course in psychology to continue study in that subject. A student may contract for one to four credit hours. However, directed study may be contracted by a student only with the approval of the directing instructor and the department chairperson.

PSYC - 5013 Counseling Theory, 3.00 Credits

Prerequisite(s): PSYC 1013 with D or better

Level: Upper
Liberal Arts and Science, Upper Level

This course provides students with an overview of historical and contemporary psychological approaches to helping. Topics will include theories of counseling, cultural issues, professional concerns and ethical standards of the field. The course will also address issues related to the historical and theoretical bases of crisis intervention.

PSYC - 5053 Social Psychology, 3.00 Credits

Prerequisite(s): PSYC 1013 with D or better

Level: Upper
Liberal Arts and Science, Upper Level

The course examines social psychology—the scientific discipline which studies the psychology of the individual in society. It focuses on the individual during social interaction and societal influences. Among topics considered are attitude change, person perception, attribution theory, verbal and nonverbal communication, conformity and nonconformity, aggression and affiliation, stereotypes and prejudice, social justice, and interpersonal attraction.
This course is designed to provide a basic knowledge of the principles of physics as it pertains to radiation. The X-ray circuit, radiographic equipment, diagnostic X-rays, tubes, fluorescence units, and an overview of quality control will be discussed. Additionally, this course provides fundamental principles of radiographic exposure. Principles of exposure and image production including exposure factors, receptor exposure, differential absorption, spatial magnification, shape distortion, magnification, beam restriction, beam filtration, scatter radiation, grids and exposures factors will be discussed. Digital image acquisition and processing, image quality errors, quality management, image display and data management will also be covered. Strategies for individual and community health advocacy will also be discussed.

This course will examine theory, research, and interventions in autism spectrum disorders (ASD) and other related disorders, such as Asperger’s Syndrome, Prett Syndrome, Pervasive Developmental Disorders, or Childhood Disintegrative Disorder. Some of the topics that will be covered include the early history of ASD and related disorders, diagnosis, and treatment of autism; current classification and diagnostic issues and techniques; epidemiology; etiological issues; major neurological and psychological theories of ASD; current approaches to intervention; and current ASD research.

This course will provide a systemic examination of family and intimate relationship violence throughout the lifespan. The course will include discussion of the causes and types of violence, reporting procedures and legal remedies associated with this type of violence. It will also examine intervention and prevention programs that are available to the victims, perpetrators and others affected by it. While the course focuses mainly on the violence in the U.S., family and intimate relationship violence in other cultures will be explored. Students will be expected to prepare a research-based paper or presentation on current literature related to family and intimate relationship violence.

This course provides the theoretical basis for performing radiographic procedures with special patient positioning instruction in the laboratory. The examination protocols and imaging evaluation for the thoracic cavity, abdominal cavity, upper extremities and lower extremities will be introduced. The laboratory setting will reinforce the theoretical foundation of the lecture through demonstration, role playing and skill practice in the laboratory. Image analysis will be included and require problem solving and critical thinking skills to evaluate diagnostic quality of the images obtained in the laboratory.

This course provides the theoretical basis for performing radiographic procedures with specific patient positioning instruction in the laboratory. The laboratory setting will reinforce the theoretical foundation of the lecture through demonstration, role playing and skill practice in the laboratory.

This course provides the theoretical basis for performing radiographic procedures with specific patient positioning instruction in the laboratory. The laboratory setting will reinforce the theoretical foundation of the lecture through demonstration, role playing and skill practice in the laboratory.

This course provides the theoretical basis for performing radiographic procedures with specific patient positioning instruction in the laboratory. The laboratory setting will reinforce the theoretical foundation of the lecture through demonstration, role playing and skill practice in the laboratory.

This course provides the theoretical basis for performing radiographic procedures with specific patient positioning instruction in the laboratory. The laboratory setting will reinforce the theoretical foundation of the lecture through demonstration, role playing and skill practice in the laboratory.

This course provides the theoretical basis for performing radiographic procedures with specific patient positioning instruction in the laboratory. The laboratory setting will reinforce the theoretical foundation of the lecture through demonstration, role playing and skill practice in the laboratory.

This course provides the theoretical basis for performing radiographic procedures with specific patient positioning instruction in the laboratory. The laboratory setting will reinforce the theoretical foundation of the lecture through demonstration, role playing and skill practice in the laboratory.

This course provides the theoretical basis for performing radiographic procedures with specific patient positioning instruction in the laboratory. The laboratory setting will reinforce the theoretical foundation of the lecture through demonstration, role playing and skill practice in the laboratory.

This course is designed to provide a basic knowledge of the principles of physics as it pertains to radiation. The X-ray circuit, radiographic equipment, diagnostic X-rays, tubes, fluorescence units, and an overview of quality control will be discussed. Additionally, this course provides fundamental principles of radiographic exposure. Principles of exposure and image production including exposure factors, receptor exposure, differential absorption, spatial magnification, shape distortion, magnification, beam restriction, beam filtration, scatter radiation, grids and exposures factors will be discussed. Digital image acquisition and processing, image quality errors, quality management, image display and data management will also be covered. Strategies for individual and community health advocacy will also be discussed.

This course is designed to provide a general overview of the study of radiologic science and the role it serves in the health care delivery system. Several key topics in imaging including introductory principles of radiography, the health care environment, understanding orders and diagnostic reports, hospital organizations, and radiology organizations. The course will also include a dialogue of medical legal ethics and the radiographer’s role in making ethical decisions. Pharmacology and venipuncture topics such as drug nomenclature and classification, general pharmacologic principles, contrast agents, routes of administration, and drug categories relevant to radiography will be discussed. Patient care topics including transfer techniques, patient history and vital signs, infections control, sterile techniques, medical emergencies, and professionalism and communication in patient care will be presented. Finally, cultural awareness and the radiographer’s role in multicultural health care setting will be discussed.

SOCI - 2523 Gerontology-Sociology of Aging, 3.00 Credits
Level: Upper
Gen Ed - Social Sciences, Liberal Arts and Science, Upper Level
This course provides an overview of the sociological, psychological, physical and cultural aspects of the aging process. It will review demographic trends, theories and contemporary issues for this population. The course will also provide students with the opportunity to explore their views and attitudes on aging. Students will complete a research paper that examines the implications of the aging population on the student's intended major.

SOCI - 6003 Juvenile Justice Admin, 3.00 Credits
Prerequisite(s): CJUS 1003 with C or better
Level: Upper
Upper Level
This course examines the evolution of the juvenile justice system and the transformation of the juvenile court within the United States. This course is an analysis of the juvenile justice system in the United States - its components and functions. Students will evaluate the adjudication of juveniles and application of legal precedent established by the U.S. Supreme Court that results in social policy. Students evaluate ethical decision making and diversity in the adjudication and treatment of juveniles. The United States system and the systems of other countries are also compared. Students will apply course findings to a case study in a significant written document for final evaluation.

SOCI - 8003 Terrorism, 3.00 Credits
Prerequisite(s): SOCI 1183 with D or better
Level: Upper
Liberal Arts and Science, Upper Level
This course examines the phenomena of international and domestic terrorism from the historical and criminological perspectives. The course evaluates historical and political viewpoints and examines the changing trends in security and justice. Students will examine ethical issues including an analysis of diversity factors and policy issues for consideration. This terrorism course provides a critical analysis of leadership styles required to alleviate fears of civil liberties erosion and public safety. The course will culminate with a research project.

SONO - SONOGRAPHY

SONO - 1003 Fundamentals Sonography/PT Care, 3.00 Credits
Level: Lower
This course is designed to provide a general overview of the study of diagnostic medical sonography and the role it serves in the health care delivery system. Several key topics in imaging including introductory principles of sonography, discipline terminology, sonography specialties and careers in the profession will be explored. The course will also include a dialogue of medical legal ethics and the sonographer's role in making ethical decisions. Patient care topics including transfer techniques, patient history and vital signs, infection control, sterile techniques, medical emergencies and basic pharmacology will be presented. Finally, cultural awareness and the sonographer's role in a multicultural health care setting will be discussed.

SONO - 2003 Sectional Anatomy, 3.00 Credits
Level: Lower
This course is designed to provide the tools necessary to understand basic sectional anatomy of the human body. Emphasis is placed on imaging correlation to human cadaver cross sections. Sectional anatomy of the abdomen, male and female pelvis, neck, thorax, head and fetal anatomy will be reviewed. In addition, vascular anatomy will also be discussed.

SONO - 2013 US Physics and Instrument I, 3.00 Credits
Level: Lower
This course is designed to provide a practical understanding of the principles of ultrasound physics and sonographic instrumentation as it pertains to diagnostic medical sonography and its use in the clinical setting. Topics include the properties of sound waves, interactions of sound waves, ultrasound instrumentation and functions of the components of processing, scan converter displays, image and display techniques, film and methods of permanent image recording, ultrasound transducers, operating standards, equipment calibration, resolution, gray scale photography and film critique. Additionally, Doppler physics and applications along with sonographic artifacts discussed and practiced.

SONO - 2024 Sonographic Procedures I, 4.00 Credits
Level: Lower
Applied Learning-Practicum
This course provides the theoretical basis for performing sonographic procedures with specific patient scanning instruction in the laboratory. The examination protocols and imaging techniques for the Breast; Thyroid; Scrotum; Musculoskeletal; GI Tract; Interventional and Venous Vascular will be introduced. The laboratory setting will reinforce the theoretical foundation of the lecture through demonstration, role playing and skill practice in the laboratory. Sonographic image analysis will be included and require problem solving and critical thinking skills to evaluate diagnostic quality of the images obtained in the laboratory.

SONO - 2031 US Physics & Instrument II, 3.00 Credits
Prerequisite(s): SONO 2013 with D or better
Level: Lower
This course is a continuation of SONO 2013 and is designed to provide a practical understanding of the principles of ultrasound physics and sonographic instrumentation as it pertains to diagnostic medical sonography and its use in the clinical setting. Topics include the properties of sound waves, interactions of sounds waves, ultrasound instrumentation and functions of the components of processing, scan converter displays, image and display techniques, film and methods of permanent image recording, ultrasound transducers, operating standards, equipment calibration, resolution, gray scale photography and film critique. Additionally, Doppler physics and applications along with sonographic artifacts discussed and practiced.

SONO - 3016 Sonography Clinical I, 6.00 Credits
Prerequisite(s): SONO 2024 with C+ or better
Level: Lower
Applied Learning-Clinical Plcm, Clinical Liability Insurance
This course allows for the continued progression of skills in the clinical setting. Procedural competence and the acquisition of additional proficiencies in diagnostic medical sonography are the focus of this clinical experience. Continued assessment of learning and proficiency is conducted using summative competencies and initial and intermediate level learning objectives during the clinical rotation. This clinical experience consists of 360 hours, which will be completed 40 hours per week for 9 weeks.

SONO - 3024 Sonography Clinical II, 4.00 Credits
Prerequisite(s): SONO 3016 with C+ or better
Level: Lower
Applied Learning-Clinical Plcm, Clinical Liability Insurance
This course allows for the continued progression of skills in the clinical setting. Procedural competence and the acquisition of additional proficiencies in diagnostic medical sonography are the focus of this clinical experience. Continued assessment of learning and proficiency is conducted using summative competencies and advanced and mastery level learning objectives during the clinical rotation. This clinical experience consists of 360 hours, which will be completed 40 hours per week for 9 weeks.

SONO - 3034 Sonographic Procedures II, 4.00 Credits
Level: Lower
Applied Learning-Practicum
This course provides the theoretical basis for performing sonographic procedures with specific patient scanning instruction in the laboratory. The examination protocols and imaging evaluation for the female pelvic organs; First, Second and Third Trimester Obstetrical; Cardiac; Peripheral Arterial and Venous Vascular Scanning will be introduced. The laboratory setting will reinforce the theoretical foundation of the lecture through demonstration, role playing and skill practice in the laboratory. Sonographic image analysis will be included and require problem solving and critical thinking skills to evaluate diagnostic quality of the images obtained in the laboratory.

SONO - 4003 Professional Dev in Sonography, 3.00 Credits
Level: Lower
This course is an overview of the radiographer's continued professional development. The course is designed to encourage active participation in professional organizations and a development of lifelong learning. The course will culminate in a senior research project and presentation on a topic within the field of radiologic science and imaging. Students will be expected to prepare for the Registry Exam(s).

SONO - 4024 Sonography Clinical III, 4.00 Credits
Prerequisite(s): SONO 3024 with C+ or better
Level: Lower
Applied Learning-Clinical Plcm, Clinical Liability Insurance
This course allows for the continued progression of skills in the clinical setting. Procedural competence and the acquisition of additional proficiencies in diagnostic medical sonography are the focus of this clinical experience. Continued assessment of learning and proficiency is conducted using summative competencies and advanced and mastery level learning objectives during the clinical rotation. This clinical experience consists of 360 hours, which will be completed 40 hours per week for 9 weeks.

SONO - 4034 Sonographic Procedures III, 4.00 Credits
Level: Lower
Applied Learning-Practicum
This course provides the theoretical basis for performing sonographic procedures with specific patient scanning instruction in the laboratory. The examination protocols and imaging evaluation for the Breast; Thyroid; Scrotum; Musculoskeletal; GI Tract; Interventional and Venous Vascular will be introduced. The laboratory setting will reinforce the theoretical foundation of the lecture through demonstration, role playing and skill practice in the laboratory. Sonographic image analysis will be included and require problem solving and critical thinking skills to evaluate diagnostic quality of the images obtained in the laboratory.

SONO - 4900 Directed Study, 1.00 Credit
Prerequisite(s): SONO 3024 with D or better
Level: Lower
This course is an elective course designed to allow students to pursue advanced work in sonography or obtain extended clinical opportunities. A student may contract for one credit hour of independent study through an arrangement with the clinical coordinator, who agrees to direct such a study. Enrollment is limited by clinical site participation.

SPAN - SPANISH

SPAN - 1203 Spanish I, 3.00 Credits
Level: Lower
Gen Ed - Foreign Languages, Liberal Arts and Science
This course focuses on developing the student's ability to speak, to write, and to read Spanish. Additional emphasis is given to learning about the diverse cultures of the Spanish-speaking world. Instruction centers on oral communication, grammar (especially formation of verbs), and cultural awareness. Writing is continued in assignments related to readings, class discussions, and lectures.
SPAN - 2303 Spanish II, 3.00 Credits  
Prerequisite(s): SPAN 1203 with D or better  
Level: Lower  
Gen Ed - Foreign Languages, Liberal Arts and Science  
This course offers an in-depth examination of the Spanish language for purposes of travel, business, personal pleasure, and academic environment. The student's learning, speaking, reading and writing skills in Spanish will be further developed.

SPCH - 6083 Interpersonal Communication, 3.00 Credits  
Prerequisite(s): COMP 1503 with D or better  
Level: Lower  
Applied Learning-Internship, Pass/Fail  
This course is designed to expose students to the legal environment within which sport management professionals function. It focuses on sport's relationship with government agencies (public law issues) as well as with other businesses, consumers, suppliers, etc., (private law issues). It is intended to better equip the sport business manager for decision making by exploring the legal issues involved in contracts, torts, business organizations, employment law, risk management, intellectual property law and Constitutional Law. Legislation specifically related to sport will be highlighted. A variety of specific problems for the business of sport, found within the law will be examined and analyzed through case briefs and studies, research projects and advocacy exercises. Students will have an opportunity to explore law-related topics of particular interest to themselves with oral presentations to the class.

SPCH - 4001 Field Experience I, 1.00 Credit  
Prerequisite(s): SPCH 1083 with D or better and SPCH 3001 with D or better  
Level: Lower  
Applied Learning-Internship, Pass/Fail  
This course encompasses a semester of supervised, hands-on experience working in the field of sport management. A minimum of 45 hours of work throughout the semester is required.

SPCH - 5003 Mediated Argu. in Pub. Spheres, 3.00 Credits  
Prerequisite(s): SPCH 1083 with D or better  
Level: Upper  
Liberal Arts and Science  
This course is an introduction to the study of policies and procedures utilized in dealing with communication issues occurring within the sports industry, including print and electronic media, the internal and external constituencies to be served, and the development of specific forms of communication approaches. Heavy emphasis will be placed on the practical as opposed to the theoretical, as well as, a thorough understanding of the unique aspects of communication in sport.

SPMG - 3001 Field Experience I, 1.00 Credit  
Prerequisite(s): SPMG 1123 with D or better  
Level: Lower  
Applied Learning-Internship, Pass/Fail  
This course encompasses a supervised, hands-on experience working in the field of sport management. A minimum of 45 hours of work throughout the semester is required.

SPMG - 3013 Sport Communication, 3.00 Credits  
Prerequisite(s): COMP 1503 with D or better and BUAD 2033 with D or better and SPMG 1123 with D or better  
Level: Lower  
This course is an introduction to the study of policies and procedures utilized in dealing with communication issues occurring within the sports industry, including print and electronic media, the internal and external constituencies to be served, and the development of specific forms of communication approaches. Heavy emphasis will be placed on the practical as opposed to the theoretical, as well as, a thorough understanding of the unique aspects of communication in sport.

SPCH - 4001 Field Experience II, 1.00 Credit  
Prerequisite(s): SPCH 1083 with D or better and SPCH 3001 with D or better  
Level: Lower  
Applied Learning-Internship, Pass/Fail  
This course encompasses a semester of supervised, hands-on experience working in the field of sport management. A minimum of 45 hours of work throughout the semester is required.

SPMG - 4003 Sport Law, 3.00 Credits  
Prerequisite(s): SPMG 1123 with D or better and ( BUAD 3043 with D or better or BUAD 7023 with D or better )  
Level: Lower  
This course is designed to expose students to the legal environment within which sport management professionals function. It focuses on sport's relationship with government agencies (public law issues) as well as with other businesses, consumers, suppliers, etc., (private law issues). It is intended to better equip the sport business manager for decision making by exploring the legal issues involved in contracts, torts, business organizations, employment law, risk management, intellectual property law and Constitutional Law. Legislation specifically related to sport will be highlighted. A variety of specific problems for the business of sport, found within the law will be examined and analyzed through case briefs and studies, research projects and advocacy exercises. Students will have an opportunity to explore law-related topics of particular interest to themselves with oral presentations to the class.

SPMG - 4033 Ethics & Leadership in Coach., 3.00 Credits  
Prerequisite(s): SPMG 1123 with D or better  
Level: Lower  
This course is designed to help students learn and practice the disciplines needed to advance their ethical and leadership abilities as a sport coach. It explores the nuances needed to assist athletes understand the ethical values of sport and help them to become leaders. Topics include but are not limited to sportsmanship, ethical values, gambling, performance enhancing substances, race and gender issues, and leadership development techniques specific to sport applications.

SPMG - 4123 Sport Facility Management, 3.00 Credits  
Prerequisite(s): SPMG 1123 with D or better  
Level: Lower  
This course is a review of budgeting and financial statements. Sources of funding and revenue, the implementation and use of an economic impact analysis, and a review of budgeting and financial statements.

SPMG - 5003 Sport Business and Finance, 3.00 Credits  
Prerequisite(s): SPMG 1123 with D or better and ACCT 1124 with D or better  
Level: Upper  
Upper Level  
This course is a review of budgeting and financial statements. Sources of funding and revenue, the implementation and use of an economic impact analysis, and a review of budgeting and financial statements.

SPMG - 5023 Principles of Coaching, 3.00 Credits  
Prerequisite(s): SPMG 1123 with D or better  
Level: Upper  
Upper Level  
This course is designed to expose students to the study of administrative, strategic and operational aspects of coaching. It focuses on sport's relationship with government agencies (public law issues) as well as with other businesses, consumers, suppliers, etc., (private law issues). It is intended to better equip the sport business manager for decision making by exploring the legal issues involved in contracts, torts, business organizations, employment law, risk management, intellectual property law and Constitutional Law. Legislation specifically related to sport will be highlighted. A variety of specific problems for the business of sport, found within the law will be examined and analyzed through case briefs and studies, research projects and advocacy exercises. Students will have an opportunity to explore law-related topics of particular interest to themselves with oral presentations to the class.

**Course Descriptions**

**SPMG - 6003 Sport Marketing, 3.00 Credits**
- **Prerequisite(s):** MRTG 2073 with D or better
- **Level:** Upper Level

This course is designed to be an examination of the unique nature of Sport Marketing. This course will examine the elements of the marketing mix form that perspective. Major topics include an overview of the sport market, the critical nature of market research and market segmentation, developing an understanding of the special nature of the sport product, pricing within sport marketing, the process of promotion in the sport market, and the theory of ‘place’ in sport. Students will be responsible for designing, implementing and evaluating a sport marketing research plan.

**SPMG - 6013 Licensing and Endorsements, 3.00 Credits**
- **Prerequisite(s):** SPMG 1123 with D or better and SPMG 6003 with D or better
- **Level:** Upper Level

This course covers the details involved in the development of a corporate licensing program, as well as the licensing of intellectual property from corporations. The student will be exposed to the necessary details of becoming a licensee or licensor. Product value, agreements, endorsements, royalties, enforcement, and legal issues will all be included.

**SPMG - 6023 Event Promotion and Sales, 3.00 Credits**
- **Prerequisite(s):** SPMG 1123 with D or better and SPMG 4123 with D or better
- **Level:** Upper Level

This course is a comprehensive review of the skills and tasks required to successfully sell a sporting event to the consumer. Creating an effective sales culture, examining incentives for sport consumers, sales management and servicing, and the role of technology in sport promotion and sales are included. Additionally, this course explores sales training, the art of ticket sales, customer retention, branding, and sales risk management.

**SPMG - 6043 Sport Law, 3.00 Credits**
- **Prerequisite(s):** SPMG 1123 with D or better and ( BUAD 3043 with D or better or BUAD 7023 with D or better )
- **Level:** Upper Level

This course is designed to expose students to the legal environment within which sport management professionals function. It focuses on sport’s relationship with government agencies (public law issues) as well as with other businesses, consumers, suppliers, etc. (private law issues). It is intended to better equip the sport business manager for decision making by exploring the legal issues involved in contracts, torts, business organizations, employment law, risk management, intellectual property law and Constitutional Law. Legislation specifically related to sport will be highlighted. A variety of specific problems for the business of sport, found within the law will be examined and analyzed through case briefs and studies, research projects and advocacy exercises. Students will have an opportunity to explore law related topics of particular interest to themselves with oral presentations to the class.

**SPMG - 7001 Pre-Internship Seminar, 1.00 Credit**
- **Prerequisite(s):** SPMG 1123 with D or better
- **Level:** Upper Level

This course is a focus on the development, analysis, and pursuit of internship and career goals. Emphasis is placed on the development of a professional portfolio, including cover letters, resumes, and basic interviewing techniques. Related issues, professional ethics, and etiquette will be explored.

**SPMG - 7013 Sport Management Capstone, 3.00 Credits**
- **Level:** Upper

Applied Learning-Creative Work, Upper Level

This course is designed to expand knowledge and understanding of large-scale events and sport organizations through concentrated research that culminates in a senior research project. This course is designed with a two-part focus. The first half of the course will emphasize Sport Management scholarly research through a review of literature. The second half of the course is focused on a hands-on learning approach and application of scholarly research. This culminates in a capstone project, providing unique and innovative solutions to a sport organization.

**SPMG - 7023 Strategic Mgmt in Sport Organtn, 3.00 Credits**
- **Prerequisite(s):** SPMG 1123 with D or better and BUAD 3153 with D or better
- **Level:** Upper Level

This course is a study of the administrative structure of sport organizations including those operating at a local, national, and international level. Emphasis will be placed on existing structures and how best to function within each to accomplish objectives.

**SPMG - 8112 Internship, 12.00 Credits**
- **Level:** Upper

Applied Learning-Internship, Pass/Fail, Upper Level

A work experience designed to assist the student in making the transition from the classroom to a segment of the sport management field. The internship permits a degree of independence and an element of learning that is not possible in a conventional classroom. The intent of the internship is to provide each student with an experiential learning opportunity in a management situation as a pre-professional supervisor or manager. Students will be supervised by a supervisor in their technical field or professional area. The intern will also be supervised by a faculty member who serves as the Internship Coordinator. Written reports, weekly journals of work and experiences, and self and supervisor evaluations are required. Evaluation will be based on the quality of experiences gained from the internship and student work performance.

**TMGT - 5900 Directed Study, 1.00 TO 6.00 Credits**
- **Level:** Upper Level

Pass/Fail, Upper Level

A student may contract for one to six credit hours of independent study through an arrangement with an instructor who agrees to direct such a study. The student will submit a plan acceptable to the instructor and to the department chairperson. The instructor and student will confer regularly to review the progress of the study.

**TMGT - 7003 Managing Tech & Innovation Cap, 3.00 Credits**
- **Prerequisite(s):** TMGT 7153 with D or better or BUAD 3153 with D or better
- **Level:** Upper Level

Applied Learning-Practicum, Upper Level

This course is an application of theoretical approaches to technology management and innovation. Major concepts, tools, and processes will be explored through lecture, readings, team assignments, case studies, and online discussion. Major topics include innovation management, the assessment of technology and the importance of technology forecasts. Students will learn how to manage innovation strategy, technological evolution, and organizational contexts for technology management. Additional topics will also include strategic actions required by business; developing a firm’s organizational innovation capabilities, creating and implementing a development strategy, new product development, and challenges to managing innovation. Students will learn about the latest technology methods of AI/AR/VR and be able to apply them through a hands on, team-based PBL simulation.

**TMGT - 7153 Principles of Management, 3.00 Credits**
- **Level:** Upper Level

This internship is designed to assist the student in making the transition from the classroom to industry. This integration of work allows a degree of independence and an element of learning that is not possible in a conventional classroom. The intent of the internship is to provide each student with an experiential learning opportunity in a management situation as a pre-professional supervisor or manager. Students will be supervised by a supervisor in a selected business, industry, government or educational setting. Students carry out a planned program of educational experiences under the direct supervision of an owner, manager, or supervisor in their technical field or professional area. The interns will also be supervised by a faculty member who serves as the Internship Coordinator. Written reports, weekly journals of work and experiences, and self and supervisor evaluations are required. Evaluation will be based on the quality of experiences gained from the internship and student work performance.

**TMGT - 8006 Technology Management Internsh, 6.00 Credits**
- **Level:** Upper

Applied Learning-Internship, Pass/Fail, Upper Level

This internship is designed to assist the student in making the transition from the classroom to industry. This integration of work allows a degree of independence and an element of learning that is not possible in a conventional classroom. The intent of the internship is to provide each student with an experiential learning opportunity in a management situation as a pre-professional supervisor or manager. The intent of the internship is to provide each student with an experiential learning opportunity in a management situation as a pre-professional supervisor or manager. Students will be supervised by a supervisor in a selected business, industry, government or educational setting. Students carry out a planned program of educational experiences under the direct supervision of an owner, manager, or supervisor in their technical field or professional area. The interns will also be supervised by a faculty member who serves as the Internship Coordinator. Written reports, weekly journals of work and experiences, and self and supervisor evaluations are required. Evaluation will be based on the quality of experiences gained from the internship and student work performance.

**TMGT - 8106 Technology Management Internsh, 6.00 Credits**
- **Level:** Upper

Applied Learning-Internship, Pass/Fail, Upper Level

This internship is designed to assist the student in making the transition from the classroom to industry. This integration of work allows a degree of independence and an element of learning that is not possible in a conventional classroom. The intent of the internship is to provide each student with an experiential learning opportunity in a management situation as a pre-professional supervisor or manager. Students will be supervised by a supervisor in a selected business, industry, government or educational setting. Students carry out a planned program of educational experiences under the direct supervision of an owner, manager, or supervisor in their technical field or professional area. The interns will also be supervised by a faculty member who serves as the Internship Coordinator. Written reports, weekly journals of work and experiences, and self and supervisor evaluations are required. Evaluation will be based on the quality of experiences gained from the internship and student work performance.

**TMGT - 8109 Technology Management Internsh, 9.00 Credits**
- **Level:** Upper

Applied Learning-Internship, Pass/Fail, Upper Level

This internship is designed to assist the student in making the transition from the classroom to industry. This integration of work allows a degree of independence and an element of learning that is not possible in a conventional classroom. The intent of the internship is to provide each student with an experiential learning opportunity in a management situation as a pre-professional supervisor or manager. Students will be supervised by a supervisor in a selected business, industry, government or educational setting. Students carry out a planned program of educational experiences under the direct supervision of an owner, manager, or supervisor in their technical field or professional area. The interns will also be supervised by a faculty member who serves as the Internship Coordinator. Written reports, weekly journals of work and experiences, and self and supervisor evaluations are required. Evaluation will be based on the quality of experiences gained from the internship and student work performance.
VETS - Veterinary Technology

VETS - 1002 Applied Veterinary Med Term, 2.00 Credits
Level: Lower
Prerequisite(s): VETS 1203 with C or better

This course introduces the student to the terminology and specialized vocabulary of the Veterinary Medicine Curriculum. The nature of professional and ethical practices will be explored.

VETS - 1203 Intro to Veterinary Technology, 3.00 Credits
Level: Lower
Prerequisite(s): VETS 1214 with D or better and VETS 1203 with C or better

This course will introduce Veterinary Technology students to the animal and procedural terminology they will need to understand during their studies. Students will be expected to learn the acronyms and abbreviations commonly used in the field of Veterinary Medicine.

VETS - 1214 Anatomy & Physiology of Animals I., 4.00 Credits
Level: Lower
Prerequisite(s): VETS 1203 with C or better

This course is an organ systems approach to the study of anatomy and physiology using Domestic and Exotic animal species as the primary model. The course provides a functional integration of basic science and clinical information as it relates to the normal healthy animal in an integrated lecture and laboratory approach. Protected animal specimens both fresh and preserved, as well as skeletons and models will be utilized in the laboratory to allow applied reinforcement of concepts presented in the lecture. Histologic slides, kodachromes and radiographs will be utilized to enhance organ recognition through multiple formats and give the student a better understanding of organ function. The students will explore in greater depth and detail the course materials through questions and discussions fostered by the development of group Power Point presentations on topics that are related to the organ systems studied.

VETS - 2014 Anatomy & Physiology of Animals II, 4.00 Credits
Level: Lower
Prerequisite(s): VETS 1214 with D or better and VETS 1203 with C or better

This course is an organ systems approach to the study of anatomy and physiology using Domestic and Exotic animal species as the primary model. The course provides a functional integration of basic science and clinical information as it relates to the normal healthy animal in an integrated lecture and laboratory approach. Protected animal specimens both fresh and preserved, as well as skeletons and models will be utilized in the laboratory to allow applied reinforcement of concepts presented in the lecture. Histologic slides, kodachromes and radiographs will be utilized to enhance organ recognition through multiple formats and give the student a better understanding of organ function. The students will explore in greater depth and detail the course materials through questions and discussions fostered by the development of group Power Point presentations on topics that are related to the organ systems studied.

VETS - 2104 Pathophysiology of An Disease, 4.00 Credits
Prerequisite(s): VETS 1214 with D or better and VETS 2014 with C or better

Pathophysiology of Animal Disease is a course which provides a multidisciplinary approach to the understanding of basic science and clinical information as it relates to health and disease in domestic animals. Utilizing a bodies system approach, students will receive in-depth exposure to the most common diseases of domestic animals. They will build on their foundation in anatomy and physiology from previous courses to learn how disease affects normal anatomy and physiology. They will learn their role in the diagnosis, management, and prevention of disease in domestic animals.

VETS - 2333 Domestic Animal Behavior, 3.00 Credits
Level: Lower
Prerequisite(s): VETS 1214 with D or better and VETS 2104 with D or better

This course will introduce veterinary technology students to the animal and procedural terminology they will need to understand during their studies. Students will be expected to learn the acronyms and abbreviations commonly used in the field of Veterinary Medicine.

VETS - 3003 Animal Health Care, 3.00 Credits
Prerequisite(s): VETS 1214 with C or better and ( VETS 1214 with D or better and ANSC 2114 with C or better )

This course is designed to give first year students intensive animal handling skills and familiarity with basic procedures such as injections, venipuncture, bandaging, and dosage and fluid therapy calculations. Students will also develop skills to perform proficient physical examination of animals. Common outpatient diagnostic tests used for eye, ear, and skin disease will be mastered. Urinalysis and collection of urine samples will be practiced and students will also learn how to measure packed cell volumes and plasma protein levels in blood samples. Dentistry procedures, recognition of dental abnormalities, and dental charting using both anatomic and Triadan systems will also be covered thoroughly. Students will also visit the local Humane Society to perform technician-related duties.

VETS - 3004 Anesthesia & Surgical Nursing, 4.00 Credits
Prerequisite(s): VETS 2014 with C or better and VETS 3003 with C or better and VETS 3023 with C or better

This course is designed to prepare the second year Veterinary Technology student to become the individual who can induce, maintain and recover small animal surgical patients. The student will also perform the animals for surgery and assist in the surgical procedures. Upon course completion, the student will possess an understanding of all procedures done in vet practice with anesthesia and surgical nursing.

VETS - 3013 Animal Parasitology, 3.00 Credits
Prerequisite(s): VETS 1214 with D or better and VETS 1203 with C or better

Parasitology is a multidisciplinary approach to the study of internal and external parasites of companion, exotic and farm animals. This course will integrate the student's knowledge of anatomy and pharmacology while providing the student the opportunity to understand life cycles of parasitic protozoa and helminth parasites of the most common internal and external parasites. The course will also provide the students' understanding of how to appropriately provide both verbal and written communications for the client concerning management, prevention and potential parasitic disease. The course will also emphasize the common techniques used to identify the parasites of companion, laboratory and farm animals.

VETS - 3022 Anesthesia & Surgical Nsg I, 2.00 Credits
Prerequisite(s): VETS 2014 with C or better and VETS 3003 with C or better and VETS 3013 with C or better

This course will introduce veterinary technology students to the animal and procedural terminology they will need to understand during their studies. Students will be expected to learn the acronyms and abbreviations commonly used in the field of Veterinary Medicine.

VETS - 3023 Radiography, 3.00 Credits
Prerequisite(s): VETS 1214 with D or better and VETS 2014 with C or better

This course will introduce Veterinary Technology students to the animal and procedural terminology they will need to understand during their studies. Students will be expected to learn the acronyms and abbreviations commonly used in the field of Veterinary Medicine.

VETS - 3024 Clinical Laboratory Techniques, 4.00 Credits
Prerequisite(s): VETS 4014 with C or better and BIOL 5245 with C or better and VETS 3012 with D or better

This course introduces laboratory techniques performed in veterinary offices and clinics. Examination and testing of blood, feces, urine, and exuclates are performed for diagnostic and prognostic purposes. Lectures deal with testing theories and relevance to animal health and management. Laboratories develop skills necessary to maintain a safe laboratory working environment, institute quality control programs, collect, process, store, and transport clinical biological specimens. Major emphasis of the course is development of skills necessary to operate and maintain clinical analyzers, accurately perform laboratory tests, interpret, and report laboratory results on clinical specimens.

VETS - 3103 Path & Pharm of An Disease I, 3.00 Credits
Prerequisite(s): VETS 1214 with D or better and VETS 2014 with C or better

This course will combine pathophysiology and pharmacology in a comprehensive method of presenting information about animal disease and treatment. This course is the first of a series of two courses that cover this descriptive topic. This first course will begin with a background presentation of pharmacologic science and then progress to pathophysiologic differential and pharmacologic treatment of disease. Pathophysiologic processes will be presented by a combination of systems and species approaches and include coverage of all the small and large animal species that are typically treated by the veterinarian / veterinary technician team. Emphasis will be given to diseases that are more likely to be encountered in routine veterinary practice.
VETS - 4903 Directed Study, 1.00 to 4.00 Credits
Level: Lower
Applied Learning-Practicum, Course Fee $33.00
This course provides the student with an introduction to shielded metal arc welding, welding level: lower. The student will confer regularly regarding the process of the study. The student will submit assignments for approval and feedback.

WELD - 1105 Int Shiled Metl Arc Weld (SMAW), 5.00 Credits
Level: Lower
Applied Learning-Practicum, Course Fee $118.00
This course provides the student with a thorough technical understanding of shielded metal arc welding (SMAW), carbon arc cutting, welding and cutting safety, power sources, and electrodes. Through hands-on technical training, the student will develop skills necessary to make quality groove welds on mild steel in all positions and on varying plate thickness. Carbon arc welding will include cutting and gouging of mild steel.

WELD - 1205 Shielded Metal Arc Weld I, 5.00 Credits
Level: Lower
Applied Learning-Practicum, Course Fee $118.00
This course provides the student with a thorough technical understanding of shielded metal arc welding (SMAW), carbon arc cutting, welding and cutting safety, power sources, and electrodes. Through hands-on technical training, the student will develop skills necessary to make quality groove welds on mild steel in all positions and on varying plate thickness.

WELD - 1715 Gas Weld, Cutting & Plasma Cut, 5.00 Credits
Level: Lower
Applied Learning-Practicum, Course Fee $118.00
This course teaches the student the fundamental skills of brazing, gas welding, gas cutting, and plasma processes used in industry. Major topics include principles of operation, component identification, equipment set up, minor repairs, process variables, and manual and semi-automatic performance exercises.

WELD - 1723 Welders Calculations I, 3.00 Credits
Level: Lower
Basic mathematical functions used by the welder in the performance of their duties will be the subject of this course. Mathematical operations such as manipulation of fractions, decimals, and unilaterally converting between the two and into the metric measurement system along with calculating perimeter, volumes, weight and bend calculations will be taught in this course.

WELD - 1724 Gas Wlding/Cutng & Plasma Cutng, 4.00 Credits
Level: Lower
Applied Learning-Practicum, Course Fee $118.00
This course is designed to provide the student with a comprehensive and organized overview of veterinary technology curriculum and as a preparation for actual cases and client communication requirements in a veterinary practice.

WELD - 2173 Blueprint Reading, Insp & Test, 3.00 Credits
Level: Lower
Course Fee $22.00
This course provides the student with a thorough technical understanding of blueprint reading for welders; and welding symbol interpretation and application. The study of joint design and weldment inspection will be performed by testing, and evaluation of completed weld specimens using various metal and welding testing techniques; both destructive and non-destructive.

WELD - 2715 Shld Mill Arc & Fix Crd Arc Wld, 5.00 Credits
Level: Lower
Applied Learning-Practicum, Course Fee $118.00
This course is designed for the welding student to understand the typical working drawing and any tolerances that may apply. These tolerances include unilateral, bilateral and geometric tolerances. The importance of accuracy and proper orientation of weldments will be stressed. This application will address all possible tolerancing and drawing applications the student will need to be effective as an industrial welder.
WELD - 4445 Welding Fabrication, 5.00 Credits
Level: Lower
Applied Learning-Practicum
This course provides the student with a thorough technical understanding of gas tungsten arc welding, welding safety and arc characteristics. Hands on technical training will develop the skills necessary to make quality gas tungsten arc welds on mild steel, stainless steel and aluminum using both direct and alternating current. Certification documentation for the student will be performed for all welding processes with special attention placed on code conformance and welding procedure development.

WELD - 3005 Shielded Metal Arc Welding II, 5.00 Credits
Prerequisite(s): WELD 2715 with D or better
Level: Lower
Applied Learning-Practicum, Course Fee $118.00
This course covers safety standards and performance of shielded metal arc welding (SMAW II). Students will learn and apply OSHA standards. SMAW II theory will also be covered. Students will be performing groove welds in preparation for the required 6G qualification test.

WELD - 3015 GMAW II, FCAW II, 5.00 Credits
Prerequisite(s): WELD 2715 with D or better and WELD 2725 with D or better
Level: Lower
Applied Learning-Practicum
This course will cover the practice and proper use of protective clothing, equipment, and hand tools for the safe use of constant voltage welding equipment. Students will learn to make adjustments and repairs to equipment according to manufacturer’s recommendations. Proper set up, operation and theory will qualify the student for certification in gas metal arc welding of steel, in the short arc; spray, and globular modes of metal transfer. Qualification testing (AWS EG3.0-96) will also be performed in dual shielded flux cored arc welding.

WELD - 3025 Gas Tungsten Arc Welding II, 5.00 Credits
Prerequisite(s): WELD 2735 with D or better
Level: Lower
Applied Learning-Practicum
Students will learn setup and operating procedures, gas cylinder handling, flow meter and torch operations for welding carbon steel pipe and tubing. The course will also cover the various methods of testing and inspection of welds. All position qualification testing will prepare students for welder certification testing (AWS EG3.0-96).

WELD - 3035 Metlgy, Codes, Certs & Inspect, 3.00 Credits
Level: Lower
Applied Learning-Practicum
This course will cover the principles related to welding metallurgy, the properties of carbon steel metals, and the residual stress and distortion caused by the welding process. Students will learn to locate the essential information for codes and standards pertaining to the industry and work assignments for the materials used. Students will be able to perform inspections of cut surfaces of prepared metals (pre-welding), as well as test welds during and post welding.

WELD - 4013 Senior Project, 3.00 Credits
Level: Lower
Applied Learning-Creative Work
This course is designed as a capstone project to verify a student's ability in all aspects of welding. The student will be required to identify a need for a new product or improvement on an existing product. After identification, the completion of the project will occur with minimal instructor guidance. This will allow the student to demonstrate their ability to perform independently. Upon completion, the student will demonstrate the functionality of their project in the form of a formal presentation. This will be a functional model of the student's own design.

WELD - 4425 GMAW III & GTAW IV, 5.00 Credits
Prerequisite(s): WELD 3015 with D or better and WELD 3025 with D or better
Level: Lower
Applied Learning-Practicum, Course Fee $118.00
This course will cover the safety inspections of the GMA and GTA welding equipment and accessories. Student will be able to make minor repairs to the equipment and accessories, which will include the changing of wire electrodes and cable lines. Students will learn to troubleshoot welding equipment problems, how to recognize them, and the correct procedures in the use of the equipment. Set up and safe operations will be taught for the pulsed transfer method of welding. Students will perform welds on aluminum pipe.

WELD - 4435 Gas Tungsten Arc Welding III, 5.00 Credits
Prerequisite(s): WELD 3025 with D or better
Level: Lower
Applied Learning-Practicum
This course covers the safety inspections of welding equipment and accessories. Students will be able to make external repairs to the equipment and accessories. Students will also learn set up and operation of the GTAW equipment for stainless steel pipe/tubing. Students will execute corrective actions to repair surface flaws on welds and base metals and perform 2G and 5G performance qualification tests on 300 series stainless steel pipe/tubing using stainless steel fillers. Pipe welding using GTAW process will be stressed. Students will be required to take the exams for Level II AWS certification.

WELD - 4445 Welding Fabrication, 5.00 Credits
Level: Lower
Applied Learning-Practicum
This course will be conducted as though the student were employed in an actual work environment. The student will perform all necessary work in the fabrication of various parts. Safe and proper set up and use of appropriate equipment for various applications will be expected. Along with the setup and use of equipment, the student will be required to generate and apply weld process sheets, and inspect each weld using industrially accepted inspection processes. The student will perform various duties common in industry today, as well as apply any certifications, codes, and standards that must be met for qualifications. They will perform visual examinations and complete inspection records and reports.

WELD - 4900 Directed Study, 1.00 TO 5.00 Credits
Level: Lower
A student may contract for one to five credit hours of independent study through an arrangement with an instructor who agrees to direct such a study. The student will submit a plan acceptable to the instructor and to the department chairperson. The instructor and student will confer regularly regarding the process of the study.

WGST - WOMEN AND GENDER STUDIES
WGST - 1003 Intro to Women/Gender Studies, 3.00 Credits
Level: Lower
Liberal Arts and Science
This course explores critical questions about the meaning and role of gender in society. The course will expose the students to diverse values, perspectives and backgrounds relating to gender sexuality. Cultural and societal constructs and influences will be examined as they relate to gender. The course will focus on how gender, sex, race, sexual orientation, class and age influence individual attitudes and society's views.
SUNY Distinguished Professors

ANIKO V. CONSTANTINE (1974) - SUNY Distinguished Teaching Professor, English and Humanities
BA - Hartwick College
MA, PhD - University of Illinois
SUNY Chancellor's Award for Excellence in Teaching, 1979-80
Faculty and Staff

BRADY T. ADAMS (2017) - Instructor, Building Trades

BRIAN ADAMS (2020) - Instructor, Building Trades
BS - Houghton College

NICOLE AGOSTA (2017) - Assistant Professor, Physical and Life Sciences
AS, BS - SUNY College of Technology at Alfred
MS - Syracuse University

ERICA ALGER (2014) - Senior Counselor, Health and Wellness Services
AAS - SUNY College of Technology at Alfred
BA, MSED - Alfred University

DR. JILL AMATI (2012) - Associate Professor and Chair, Social and Behavioral Sciences
BA - University of Washington
MA - Oregon State University
MPA, PhD - Syracuse University

MOLLY E. ANDRUS (2008) - Graphic Designer, Marketing Communications
BA - Plattsburgh State University

ERIN ARMSTRONG (2017) - Head Baseball Coach, Athletics
BA - Ithaca College

RUTHANNE ASHWORTH (2017) - Assistant Professor, Nursing
AS - SUNY College of Technology at Alfred
BS - SUNY College at Brockport
MS - SUNY College at Binghamton

DR. KARLA M. BACK (2004) - Professor, Business
BA - University of Houston-University Park
MA - University of Houston-Clear Lake
PhD - Texas A&M University

ANN BALDWIN (2006) - Admissions Counselor, Admissions
BA - Wilmington College
SUNY Chancellor’s Award for Excellence in Professional Service, 2002-03

DR. STEPHEN M. BAUER (2019) - Assistant Professor, Physical and Life Sciences
BA - Saint John Fisher College
MS - University of Rochester
PhD - University of Rochester

ANDREW J. BAYUS (1986) - Director of College Housing, Residential Services
BS, MAEd - Edinboro University

CORY BENNETT (2020) - Associate Director of Student Accounts, Student Records and Financial Services
BA - SUNY College at Geneseo

WAYNE BENSLEY (2007) - Associate Professor and Chair, Physical and Life Sciences
BA - Syracuse University
MSFS - University of Alabama at Birmingham

CURTIS BERLEUE (2015) - Senior Staff Assistant, Technology Services
AAS, BT - SUNY College of Technology at Alfred

KRISTOFER BIANCHI (2012) - University Police Officer II
BS - SUNY College at Oneonta

KYLIE K. BIERMAN (2017) - Staff Assistant, Athletics
BS - Alfred University

SCOTT BINGHAM (2006) - University Police Officer II
AAS - Finger Lakes Community College
SUNY Chancellor’s Award for Excellence in Classified Service, 2015-16

DR. ALEX BITTERMAN (2014) - Professor, Architecture and Design
BS - SUNY Buffalo State
MARCH, PhD - University at Buffalo

MELISSA BLAKE (2005) - Associate Professor, Business
AAS, BBA - SUNY College of Technology at Alfred
MBA - SUNY Institute of Technology at Utica-Rome

TAMMY EDWARDS (2003) - Senior Staff Assistant, Continuing Education, Recruitment and Training Coordinator
AA - SUNY College of Technology at Alfred
BA - Alfred University
EVAN ENKE (1998) - Assistant Professor and Chair, Computer and Information Technology
BS, MPS - Alfred University
SUNY Chancellor’s Award for Excellence in Teaching, 2002-03

JENNIFER ENKE (2013) - Associate Director of Athletics, Athletics
BS - Canisius College
MS - Alfred University

ADAM FITZPATRICK (2020) - Instructor, Building Trades
AOS - SUNY College of Technology at Alfred

DR. DORTHEA FITZSIMMONS (2002) - Assistant Professor and Coordinator of Animal Science, Agriculture and Veterinary Technology
BS, DVM - Cornell University
MS - University of Wisconsin

STEPHEN FONASH (2018) - Assistant Professor, English and Humanities
BA - Pennsylvania State University
MA - University of Delaware

NICHOLAS FORD (2018) - Instructor, Civil Engineering Technology
BS - SUNY College of Technology at Alfred

MICHELLE FRANCISCO (1998) - Staff Associate, Business Affairs
AAS - SUNY College of Technology at Alfred
BA - St. Bonaventure University

JOHN M. GARIPPA (1994) - Associate Professor, Automotive Trades
AOS - SUNY College of Technology at Alfred
ASE Master Certification, Auto
ASE Advance Level Certification
ASE Alternative Fuels Certification

KANDI GEIBEL (1995) - Director of Admissions and Enrollment, Admissions
AA - SUNY College of Technology at Alfred
BA, MS - Alfred University
SUNY Chancellor’s Award for Excellence in Professional Service, 2006-07

LAURA GEORGE (2014) - Financial Aid Advisor, Student Records and Financial Services
AAS, BS - SUNY College of Technology at Alfred

DILAN GILLLULY (2014) - Staff Assistant, Help Desk/Client Services, Technology Services
AOS - SUNY College of Technology at Alfred

MICHAEL GIRARD (2019) - Programmer Analyst, Technology Services
BT - SUNY College of Technology at Alfred

DENNY GLASS (2015) - Fire and Life Safety Coordinator, Facilities Services
AAS - SUNY College of Technology at Alfred

RAY GLEASON (2003) - Instructional Support Technician, School of Architecture, Management and Engineering Technology
AAS - SUNY College of Technology at Alfred

KEITH GLOVER (2015) - Assistant Professor, Culinary Arts
AOS - SUNY College of Technology at Alfred

CLINTON J. GRAY (2017) - Instructor, Building Trades
AS - Pennsylvania College of Technology

DANIELLE GREEN (2011) - Assistant Professor, Business
AAS, BBA - SUNY College of Technology at Alfred
SUNY Chancellor’s Award for Excellence in Faculty Service, 2019-20

CASEY GROSS (2000) - Associate Dean, Judicial Affairs
BA - SUNY Fredonia

JENNIFER GUTHRIE (2016) - Instructional Support Associate, Nursing
AA - Jamestown Community College

ROBERT HALEY (2004) - Staff Associate, Facilities Services
AAS - SUNY College of Technology at Alfred

DR. HOLLIE M. HALL (2007) - Director of Counseling, Health and Wellness Services
MA - Alfred University
EdD - St. John Fisher College

ROBIN HARRINGTON (1990) - Senior Financial Aid Adviser, Student Records and Financial Services
BA - St. Bonaventure University

BRANDON G. HARRISON (2019) - Assistant Professor, Business
BS - Saint John Fisher College
MBA - Alfred University

SARAH HASKINS (2013) - Coordinator of Opportunity Programs, Student Success Center
MA - SUNY Cortland

TIMOTHY HAUBER (2011) - Senior Staff Assistant, Technology Services
AAS - Corning Community College
