General College Information

THE COLLEGE
Located in Western New York, Alfred State College of Technology - State University of New York (SUNY) is in a vibrant community surrounded by scenic countryside. In the charming Village of Alfred, college students greatly outnumber permanent residents. This quintessential college town is 15 miles north of the Pennsylvania border, 70 miles south of Rochester, and 90 miles southeast of Buffalo.

Alfred State started as a state school of agriculture in 1908. Then in 1948 it was incorporated into the newly organized SUNY system. The college was authorized by SUNY to award the degree of Associate in Applied Science in 1951, the Associate in Arts and Associate in Science degrees in 1967, and the Associate in Occupational Studies in 1973. Bachelor's degrees were added in 1991.

The college enrolls more than 3,500 undergraduate students annually. There are approximately 400 teaching faculty and staff members supporting the college’s 80 programs in agriculture, allied health, applied technology, architecture, business, engineering technology, liberal arts, nursing, and sciences.

At Alfred State, we call ourselves pioneers, individuals who prove their fundamental drive, dogged determination, and ability to overcome obstacles. These admirable traits help pioneers put their skills to work to build a brighter future. The college is proud that 98 percent of our recent graduates have jobs or are continuing their education in their chosen field. Employers tell us that Alfred State students:

Hit the ground running®...

COLLEGE VISION
Alfred State will be THE premier regional college of technology, creating opportunity for our students to achieve successful careers and purposeful lives.

COLLEGE MISSION
Alfred State delivers outstanding associate and baccalaureate degree programs through hands-on learning, preparing in-demand and involved students in a caring community.

CORE VALUES
- Respect - Showing that something is important, serious, etc., and should be treated appropriately.
- Integrity - The quality of being honest, fair, and adhering to a code of moral values.
- Service - Donating time, skills, and energy as a way to contribute to the welfare of others.
- Dedication - A very strong feeling of support, loyalty, and devotion to someone or something.

PRINCIPLES OF COMMUNITY
As members of Alfred State, we choose to be part of an academic community dedicated to those principles that foster personal and professional integrity, civility, and inclusion.

We strive toward lives of personal integrity and academic excellence – We will encourage in ourselves, and in one another, those responsible actions which lead to lives of productive work, personal enrichment, and useful citizenship in an increasingly interdependent world.

We commit to treat one another with civility – Recognizing that there will be differences of opinion, we will explore these differences in a courteous and forthright manner, always acknowledging individual rights to freedom of expression and association.

We support inclusion – We encourage those of all cultures, orientations, and backgrounds to understand and respect one another in a safe and supporting educational environment.

This set of principles set forth by the college is supported by policies including the Student Code of Conduct and the Policy on Academic Integrity.

STATE UNIVERSITY OF NEW YORK (SUNY)
SUNY’s 64 geographically dispersed campuses bring educational opportunity within commuting distance of virtually all New York citizens and comprise the nation’s largest, centrally managed system of public higher education.

Nearly 400,000 students are pursuing traditional study in classrooms or are working at home, at their own pace, utilizing distance education. SUNY is governed by a board of trustees, appointed by the governor, which directly determines the policies to be followed by the state-operated campuses.

DEGREES AND ACCREDITATIONS
I. Degrees Granted by New York State Department of Education.

Authorization is granted by the Division of Higher Education of the NYS Department of Education to confer the degree of Associate in Applied Science (AAS), Associate in Science (AS), and Associate in Arts (AA). Section 5 of the Commissioner of Education’s Regulations, Paragraph 7, reads as follows:

“Courses of Study. The course of study shall cover two years of standard college work, and shall be so organized and conducted and shall be of such scope and content as to warrant acceptance with full credit upon advanced standing by degree-conferring institutions. Such terminal courses as it offers shall be distinctly of collegiate grade. All courses of study shall contain the subject matter implied by the announced objectives of the institution.”

Authorization is also granted by the Division of Higher Education to confer the degree of Bachelor of Science (BS) in engineering technology, the degree of Bachelor of Technology (BTech), and the degree of Bachelor in Business Administration (BBA).

Authorization is also granted by the Division of Higher Education to confer the degree of Associate in Occupational Studies (AOS) under Section 52.2 of the Regulations of the Commissioner of Education (Chapter II of Title 8 of the Official Compilation of Codes, Rules, and Regulations of the State of New York).

State University criteria state that “a course of study leading to the AOS degree should be an organized postsecondary lower-division program leading to occupational competence. It should have a distinct identity, independent of established Associate in Applied Science degree or certificate offered by an institution.
The program must require a minimum of 60 semester credit hours or the equivalent of completion and may consist solely of specialized course work and related subjects.”

II. The college is an accredited institution by the Middle States Commission on Higher Education (MSCHE), 1007 North Orange Street, 4th Floor, MB #166, Wilmington, DE 19801, 267-284-5011, [http://www.msche.org](http://www.msche.org). The Commission on Higher Education is an institutional accrediting agency recognized by the US Secretary of Education and the Council for Higher Education Accreditation (CHEA).

III. The following Associate in Applied Science degree programs in engineering technology are accredited by the Engineering Technology Accreditation Commission of ABET, [http://www.abet.org](http://www.abet.org):

<table>
<thead>
<tr>
<th>Computer Engineering Technology</th>
<th>Mechanical Engineering Technology</th>
</tr>
</thead>
<tbody>
<tr>
<td>Construction Engineering Technology</td>
<td>Surveying Engineering Technology</td>
</tr>
<tr>
<td>Electrical Engineering Technology</td>
<td></td>
</tr>
</tbody>
</table>

IV. The following Bachelor of Science degree programs in engineering technology are accredited by the Engineering Technology Accreditation Commission of ABET, [http://www.abet.org](http://www.abet.org):

<table>
<thead>
<tr>
<th>Computer Engineering Technology</th>
<th>Mechanical Engineering Technology</th>

</thead>
<tbody>
<tr>
<td>Electrical Engineering Technology</td>
<td>Surveying and Geomatics Engineering Technology</td>
</tr>
</tbody>
</table>

V. The court and realtime reporting program is approved by the National Court Reporters Association. This approval indicates that this program has met the general requirements and minimum standards established by the Board on Approved Reporter Training of the National Court Reporters Association [8224 Old Courthouse Rd., Vienna, VA 22182-3808; 800-272-6272].

VI. The associate nursing program at Alfred State College, SUNY College of Technology, located in Alfred, NY is accredited by the Accreditation Commission for Education in Nursing (ACEN), 3390 Peachtree Road NE, Suite 1400, Atlanta, GA 30325 (404)975-5000. The most recent accreditation decision made by the ACEN Board of Commissioners for the associate nursing program is Continuing Accreditation. Alfred State’s baccalaureate degree program in nursing is accredited by the Commission on Collegiate Nursing Education (CCNE) [One Dupont Circle, NW Suite 530, Washington, DC 20036; 202-887-6791].

VII. The health information technology program is accredited by the Commission on the Accreditation for Health Informatics and Information Management (CAHIIM) [233 N. Michigan Ave., 21st Floor, Chicago, IL 60601-5800, 312-233-1100, www.cahiim.org]. CAHIIM is an independent accrediting organization that enforces quality accreditation standards for health informatics and health information management (HIM) educational programs through accreditation. CAHIIM accredits associate and baccalaureate degree programs in health information management, and master’s degree programs in the health informatics and health information management professions. CAHIIM is recognized by the Council for Higher Education and Accreditation (CHEA) [One Dupont Circle NW, Suite 510, Washington, DC 20036, 202-955-6126, chea@chea.org]. CHEA is a nationally recognized non-governmental higher education organization that undertakes recognition of accrediting bodies.

VIII. The following programs in applied technology are ASE Master Certified by the National Institute of Automotive Service Excellence (ASE) [13505 Dullies Technology Dr., Suite 2, Herndon, VA 20171-3421; 703-713-3800; [https://www.ase.com](https://www.ase.com)]:

<table>
<thead>
<tr>
<th>Autobody Repair</th>
<th>Heavy Equipment, Truck and Diesel Technician</th>

</thead>
<tbody>
<tr>
<td>Automotive Service Technician</td>
<td></td>
</tr>
</tbody>
</table>

IX. The following programs in applied technology are certified by the National Automotive Technicians Education Foundation (NATEF) [101 Blue Seal Dr., S.E. Suite 101, Leesburg, VA 20175; 703-669-6650, fax 703-669-6125; [http://www.natef.org](http://www.natef.org)]:

<table>
<thead>
<tr>
<th>Autobody Repair</th>
<th>Automotive Service Technician</th>
</tr>
</thead>
</table>

X. The automotive service technician program in applied technology is certified by the National Alternative Fuels Training Consortium (NAFTC) [West Virginia University, 1100 Frederick Lane, Morgantown, WV 26508; 304-293-7882, fax 304-293-6944; [http://www.naftc.wvu.edu](http://www.naftc.wvu.edu)].

XI. The heavy equipment, truck and diesel technician program is one of nine national Association of Diesel Specialists (ADS) TechSmart programs. The heavy equipment, truck and diesel technician program is the only program in New York and New England that is approved by the ADS [International Headquarters, 9140 Ward Parkway, Kansas City, MO 64114; 816-444-3500, fax 816-444-0330].

XII. The welding technology program in applied technology is certified by the American Welding Society (AWS) [8669 NW 36 St., #130, Miami, FL 33166-6672; 800-443-9353; [http://www.adda.org](http://www.adda.org)].

XIII. The veterinary technology program is accredited by the American Veterinary Medical Association’s (AVMA) Committee on Veterinary Technician Education and Activities (CVTEA) [1931 N. Meacham Rd., Suite 100, Schaumburg, IL 60173-4360; 800-248-2862]. The AVMA CVTEA is responsible for the specialized accreditation of all veterinary technician education programs in the United States. It has also extended its accreditation to Canadian veterinary technician education programs.

XIV. The construction management (BS) program is accredited by the American Council for Construction Education (ACCE), 1717 North Loop Road 1604 East, Suite 320, San Antonio, TX 78232.

XV. The BBA financial planning program is registered with the Certified Financial Planner Board of Standards, Inc. (CFP®).

XVI. In the United States, most state registration boards require a degree from an accredited professional degree program as a prerequisite for licensure. The National Architectural Accrediting Board (NAAB), which is the sole agency authorized to accredit US professional degree programs in architecture, recognizes three types of degrees: the Bachelor of Architecture, the Master of Architecture, and the Doctor of Architecture. A program may be granted a six-year, three-year, or two-year term of accreditation, depending on the extent of its conformance with established educational standards.

Doctor of Architecture and Master of Architecture degree programs may consist of a pre-professional undergraduate degree and a professional graduate degree that, when earned sequentially, constitute an accredited professional education. However, the pre-professional degree is not, by itself, recognized as an accredited degree.

Alfred State, School of Architecture, Management and Engineering Technology, Department of Architecture and Design offers the following NAAB accredited degree program: BArch (157 undergraduate credits).

The Department of Architecture and Design at Alfred State College is authorized by the New York State Office of the Professions and the New York State Department of Education to award the BArch degree.
and technical educational opportunities, without regard to sex, race, color, age, national origin, sexual orientation, gender identity and expression, and disability.

Alfred State College hereby advises students, parents, employees, and the general public that it offers employment and educational opportunities, including career and technical educational opportunities, without regard to sex, race, color, age, national origin, sexual orientation, gender identity and expression, and disability.

Student Right-To-Know and Campus Security Act

On July 1, 1992, the Student Right-to-Know and Campus Security Act went into effect, requiring institutions receiving federal student aid funds to make available to prospective students information regarding graduation, retention, and attrition rates beginning in July 1993. Successful outcomes of students' academic performance are measured by graduates, transfers, persisters, and those receiving a certificate.

Information is available for review on the Alfred State website: www.alfredstate.edu/student-consumer-information or by contacting the Student Records and Financial Services Office. You may also view this information by visiting the College Navigator website: http://nces.ed.gov/collegenavigator/.

The most recent Annual Security and Fire Safety Report includes Alfred State's summaries of the college's personal safety and security procedures in addition to the three-year summary for the Campus Crime Report which is excerpted on the following pages. The information is available in its entirety for review and/or duplication on the college's website at www.alfredstate.edu, on the University Police website at www.alfredstate.edu/university-police/annual-security-and-fire-safety-report, on reserve in both the Hinkle and Applied Technology campus libraries, and from the following campus offices: Admissions, Student Life, University Police, and the Vice President for Student Affairs.

The Campus Safety Advisory Committee will provide, upon request, all campus crime statistics as reported to the US Department of Education.

You may also visit the US Department of Education's website, which contains all campus crime statistics, at http://ope.ed.gov/security/ to obtain more information.

Campus Crime Statistics

The Advisory Committee on Campus Safety and/or the University Police department will provide, upon request, all campus crime statistics as reported to the US Department of Education. The US Department of Education maintains campus crime statistic information on its website at http://www.ope.ed.gov/security. You may also obtain the full annual security report, which includes all campus crime statistics, through the University Police Department at 607-587-3999 or access it through the college website at www.alfredstate.edu/university-police/annual-security-and-fire-safety-report.

STUDENT RECORDS

The Family Educational Rights and Privacy Act (FERPA) is a federal law that protects the privacy of student education records. FERPA gives parents certain rights with respect to their children's education records. These rights transfer to the student when he or she reaches the age of 18 or attends a school beyond the high school level. Parents or eligible students have:

1. The right to inspect and review the student’s education records maintained by the school;
2. The right to request that a school correct records which they believe to be inaccurate or misleading;
3. The right to consent to disclosures of personally identifiable information contained within the student's education records, except to the extent that FERPA authorizes disclosure without consent. Schools may disclose records, without consent, to the following parties or under the following conditions:
   a. School officials with a legitimate educational interest as defined in detail within the policy;
   b. Other schools to which a student is transferring;
   c. Specified officials for audit or evaluation purposes;
   d. Organizations conducting certain studies for or on behalf of the school;
   e. Accrediting organizations;
   f. To comply with a judicial order or lawfully issued subpoena;
   g. Appropriate officials in cases of health and safety emergencies; and
   h. State and local authorities, within a juvenile justice system, pursuant to specific State law.
4. The right to file a complaint concerning alleged failure by Alfred State to comply with the requirements of FERPA. Written complaints may be addressed to the Family Policy Compliance Office, US Department of Education, 400 Maryland Ave. SW, Washington, DC 20202-8520.
5. The right to obtain a copy of Alfred State's student records policy. A complete copy of this policy is available at my.AlfredState.edu/registration under Student Privacy.

Directory Information

Directory information (as defined by Alfred State) includes name, Alfred State email address, address and telephone number, dates of attendance, date and place of birth, college major, expected date of graduation, degrees and awards received, photographs, enrollment status, participation in officially recognized sports and activities, weights and heights of athletes, and most recent previous educational institution attended. The college can release this information without the student's written request. However, under the Family Educational Rights and Privacy Act (FERPA), students have the right to refuse to permit disclosure of any or all of those items without their prior written consent. Students who prefer not to have their directory information disclosed must sign a statement so attesting. This can be done in the Student Records and Financial Services Office before 11 a.m. of the census date and to continue in effect, must be done each and every semester of the student's attendance. Under FERPA, if the Student Records and Financial Services Office does not hear from a student by that time, the student's directory information may be released.

Civil Rights Policy

Questions may be directed to the chief diversity officer/Title IX coordinator, or director of Human Resources, Alfred State, Alfred, NY 14802.

Non-Discrimination Notice

Alfred State College hereby advises students, parents, employees, and the general public that it offers employment and educational opportunities, including career and technical educational opportunities, without regard to sex, race, color, age, national origin, sexual orientation, gender identity and expression, and disability.
For admission, applicants must possess a recognized high school diploma or its equivalent and meet standards of academic achievement such as a minimum high school average and transfer grade point average.

Applications are evaluated individually using a holistic review considering a variety of factors such as individual program requirements, standardized test scores, letters of recommendation, strength of academic program, and co-curricular activities.

Grievance procedures are available to interested persons by contacting either of the compliance officers/coordinates listed below. Inquiries regarding this nondiscrimination policy may be directed to:

Matthew Ryan
Interim Diversity Officer and Title IX Coordinator
Alfred State College
10 Upper College Drive
Alfred, NY 14802

Admission to Alfred State

Admission into one of Alfred State’s academic programs is based on the academic qualifications of the applicant without regard to age, sex, marital or military status, race, color, creed, religion, national origin, disability, or sexual orientation. Admission will be offered to qualified applicants whose academic preparation has prepared them for success in their chosen field.

APPLICATION PROCESS

All applicants must complete an application that may be submitted online at:

www.alfredstate.edu  www.suny.edu  www.commonapp.org

High school graduates who have not attended a postsecondary institution are encouraged to submit an essay directly to the Alfred State College Admissions Office.

A high school transcript must be supplied to the Admissions Office. Students attending high school in one of the five boroughs of New York City may submit their transcript by entering their NYC DOE OSIS number on the SUNY application. This is a nine-digit number issued to all students who attend a New York City public school and can be found on the student ID card or transcript.

Applicants with previous college experience must submit an official college transcript from all institutions attended.

Additional information to explain special or extenuating circumstances is encouraged.

Applications for the next calendar year are available beginning Aug. 1. Fall semester application decisions are mailed starting mid-October and continue on a rolling basis according to space availability. Spring and summer semester applications for those programs open for admission (contact the Alfred State College Admissions Office) are also considered on a rolling basis according to availability of space.

Students with disabilities should contact the Admissions Office to inquire about special accommodations to assist them with the application process and paperwork.

Consistent with college policy, any deliberate falsification or omission of data on any admissions document may result in denial of admission, revocation of acceptance decision, or administrative dismissal from the college.

INTERNATIONAL STUDENTS

Alfred State welcomes applications for admission from international students and is authorized under federal law to enroll nonimmigrant students.

In addition to the admission application (www.suny.edu or www.commonapp.org), international students must also submit official academic and financial records. For students whose native language is not English, evidence of English proficiency must be shown by taking one of the following:

- Test of English as a Foreign Language (TOEFL)
- International English Language Testing System (IELTS) exam
- Duolingo English test
- Pearson Test of English Academic (PTE Academic) examination
- Scholastic Aptitude Test (SAT)

All application materials must be submitted well in advance of the intended first semester at Alfred State.

Students who have completed college/university-level course work and would like to have their courses evaluated for possible transfer credit must submit to Alfred State an official college transcript and course descriptions (written in English) for courses to be evaluated. In addition, students must also provide a course-by-course credential evaluation completed by an approved credential evaluation service. The information available from World Education Service (WES), located at www.wes.org, provides information on the service we feel best meets the needs of the applicant and Alfred State. However, we will accept a course-by-course credential evaluation from an approved member of the National Association of Credential Evaluation Services (NACES) [www.naces.org]. Please note that course descriptions and the course-by-course evaluation are not necessary if an articulation agreement exists between your previous college/university and Alfred State.

TRANSFER STUDENTS

Students who have attended other colleges following high school graduation, either full- or part-time, are classified as transfer students and may receive advanced standing. In addition to completing the SUNY application and providing an official high school transcript, transfer students must submit official transcripts from all institutions. These transcripts should be sent to the Alfred State College Admissions Office at the time of application. It is recommended that students who have completed college-level course work during high school submit official transcripts so that appropriate transfer credit may be awarded.

Parallel and equivalent courses will be reviewed and transferred in accordance with academic regulation 305. Only credit hours and honor points earned at this college will be considered when computing a student’s index.

HOME-SCHOOLED STUDENTS

Alfred State College admits as matriculated students only persons who have a high school diploma or its recognized equivalent. Because of this requirement, Alfred State has established a specific admission policy with respect to home-schooled students. The purpose of the policy is to ensure that home-schooled students are treated fairly yet in accordance with the requirements set forth by the college. The policy deals exclusively with the criteria for eligibility to be considered as an applicant for admission. Once eligibility for consideration is established, the applicant must also meet both campus and curriculum-specific admissions requirements.

Applicants 16 years of age or over (i.e. beyond the age of compulsory attendance)

These home-schooled students will be eligible for further consideration as an applicant to matriculated status if they can provide one of the following: (1) a passing score on the general comprehensive examination for the state high school equivalency diploma (TASC/GED) and the diploma itself if the student is eligible to receive one; (2) a statement from the superintendent of the school district in which the student resides, attesting to the student’s completion of a program of home instruction that is substantially equivalent to a four-year high school program meeting the requirements of Section 100.10 of the Regulations of the Commissioner of Education - please note that this option cannot be used if the student completed an online high school program of instruction, unless the online high school curriculum was used solely to support the IHIP (Individualized Home Instruction Plan); (3) official verification of successful completion (a grade of
"C" or better) of 24 college credit hours in the distribution of 6 credits in English language arts, 3 credits in natural science, 3 credits in humanities, 3 credits in mathematics, 3 credits in social science, and 6 credits in approved general education courses - please note that students admitted through this option are not eligible for federal financial aid unless the TASC/GED diploma has been earned; (4) official verification of having earned a degree from an accredited college or university; (5) evidence of having passed with a grade of 65 or better the New York State regents exams for English language arts, mathematics, U.S. history, a science, and global history - please note that students admitted through this option are not eligible for state or federal financial aid.

Applicants under the age of compulsory attendance (i.e. below 16 years of age)

These home-schooled students will be eligible for consideration as applicants for admission to a matriculated status only if the student can provide a statement from the superintendent of the school district in which the student resides, attesting to the student's completion of a program of home instruction that is substantially equivalent to a four-year high school program meeting the requirements of Section 100.10 of the Regulations of the Commissioner of Education - please note that this option cannot be used if the student completed an online high school program of instruction.

TRANSFER AGREEMENTS

Agreements have been established between Alfred State College and two-year colleges, which permit a student to complete an associate degree at the two-year college and transfer to Alfred State College to complete a baccalaureate degree. Transfer is guaranteed if the student successfully completes, in accordance with the specific articulation agreement, the prescribed schedule of courses. Any questions regarding transfer of courses should be directed to the transfer adviser within the Student Records and Financial Services Office at Alfred State College. The student must provide an official transcript from the two-year college to Alfred State. Refer to www.alfredstate.edu/transfer-students/articulation-agreements for a listing of articulation agreements.

JOINT ADMISSIONS

Alfred State has established Joint Admission Agreements from several of our associate degree programs into our baccalaureate degree programs. Alfred State students interested in pursuing a sequential advanced degree should complete a SUNY Joint Admissions/Intent to Enroll form, available at the Alfred State College Admissions Office. This form should be filed during the final semester of the student's associate degree.

ACCES-VR

Students who may be working through ACCES-VR should contact their ACCES-VR counselor prior to beginning the application process at Alfred State.

CONCURRENT ADMISSIONS PROGRAM (CON AP)

The Concurrent Admissions Program (CON AP) is conducted by colleges and universities that are members of the Service Members Opportunity Colleges (SOC). Concurrent with their enlistment in the Army, new soldiers are encouraged to express an interest in attending Alfred State following completion of their military obligation.

After completing a two-, three-, or four-year enlistment, the new veteran will be encouraged to enroll at Alfred State. This program also applies to soldiers enlisting in the Army Reserve.

Those interested in the CON AP program are encouraged to contact their military recruiter.

READMISSION

Students who have not yet graduated from the college and wish to apply for readmission must complete a readmission application available from the Alfred State College website. The completed application, as well as official transcripts from any colleges attended since enrollment at Alfred State College, must be submitted to the Admissions Office. Applicants who are or will be graduates of the college and wish to apply to return for a non-sequential major must complete either the SUNY Application or the Common Application, and process it through the SUNY Application Services Center for a new program of study. The new program must be significantly different from the program from which the student graduated. Please contact the Admissions Office for further information on this requirement.

DISCIPLINARY APPLICANTS

Applicants must affirm a prior disciplinary dismissal from another institution of higher education on their application for admission. Individuals who have been previously dismissed for disciplinary reasons will have their application reviewed under college policy established through the Admissions Office and the Office of Judicial Affairs. Copies of this policy are available from the Admissions Office.

ADMISSION REQUIREMENTS

1. Applicants must possess a recognized high school diploma or its equivalent (please note that distance learning degrees/diplomas do not satisfy this requirement for New York State residents). Verification must be supplied to the Admissions Office. Applicants with a CDOS commencement credential or IEP certificate/diploma will not be accepted. These students are advised to take the GED exam. A score of 660 or better on the GED exam (if taken after January 2022) is recommended for consideration.

2. Applications are evaluated individually using a “holistic review” to make the best decision for both the applicant and the college. A variety of factors are considered (e.g., individual program requirements, standardized test scores, letters of recommendation, strength of academic program, and extracurricular activities).

3. To be considered for admission into programs taught on the Alfred campus, the recommended minimum overall high school average is a 75. For programs taught in the School of Applied Technology (Wellsville campus) or at the Northland Workforce Training Center, the recommended minimum overall average is a 72. Applicants for programs taught on the Alfred campus who do not meet specified program requirements but who show potential for success may be considered for admission through the Alfred State Opportunity Program (ASOP) or the Educational Opportunity Program (EOP).

4. In addition to meeting individual program requirements, it is recommended that transfer applicants have a 2.0 cumulative grade point average as well as a grade of "C" or better in each course taken during the most recent semester of attendance.

5. Financial need is not considered as part of the admission process.

Note: Alfred State is test optional for the spring 2023, fall 2023, and spring 2024 semesters. Therefore, it is not necessary to take the SAT or ACT exam to be considered for admission to all majors as well as for merit-based scholarships.

PROGRAMS OF STUDY

Applications are filed for admission into one of the following programs rather than a general freshman-year program. Enrollment in other than registered or otherwise approved programs may jeopardize a student's eligibility for student aid awards. In addition to course entrance requirements listed, it is recommended that students have a minimum overall high school average of 75 for Alfred campus programs and a 72 for Wellsville campus or Northland Workforce Training
Center programs to be considered for admission. It is recommended that transfer students have a 2.0 cumulative grade point average as well as a grade of "C" or better in each course taken during the most recent semester of attendance.

Students graduating from any two-year associate degree program (AAS, AA, AS, and AOS) may enter directly into the corresponding baccalaureate degree program(s) or the technology management Bachelor of Business Administration degree program.

Notes for the Programs of Study Chart:

* Portfolio is required to enter junior-year studio courses.

**It is recommended that students have knowledge of basic math skills.

***Letters of recommendation, an essay, and a resume indicating related work experience and/or knowledge of field are required.

****Interview with academic department is required.

The Alfred State Athletic Department is an NCAA Division III member. With the move to the NCAA, incoming freshmen students who wish to participate in intercollegiate athletics must be admitted into a four-year program OR have a 75 or 2.1/4.0 high school average to be immediately eligible their first semester. Incoming transfer students should consult the Alfred State Athletic Department for information on athletic eligibility requirements.
Educational Opportunity Program (EOP)
The Educational Opportunity Program (EOP) offers higher education opportunities to high school graduates or to holders of high school equivalency diplomas who do not meet normally applied admission criteria but who have the potential for college success. Students must also meet family income guidelines printed in the SUNY Viewbook and must complete the EOP financial information form, which is available on the Alfred State website.

EOP is typically an extended program with course work paced to enhance student success. Students study full time, enrolling in at least 12 credit hours per semester. The first-year schedule will include courses in English; math; college skills and/or reading; social, physical, or life science; and/or program course(s). To comply with program requirements, EOP students may be required to repeat courses in which they have earned a grade of "D" or "D+.”

Students are required to participate in a 4-6 week summer prep program as part of their entrance process and expected to engage in consistent tutoring and advising sessions throughout their studies at Alfred State.

Essential to EOP is direct financial aid. For each student, a financial aid package is planned, which may include grants from EOP, Pell, and Tuition Assistance Program (TAP). All EOP students must submit the Free Application for Federal Student Aid (FAFSA).

Advanced Standing
Previous Credit
A student who has taken college-level courses after high school is considered a transfer student (See Transfer Students section).

Students who are taking college courses while in high school must submit official transcript(s) in order to receive transfer credit.

Course Challenges
Any student wishing to challenge a course is responsible for furnishing material, approved by faculty administering the exam, to be used in the challenge examination. The challenge exam fee includes a $15 recording fee and $10 per contact hour compensation fee. The challenge must be approved by the department chair or designee in which the course is offered. A student may not challenge a course for which they have already earned a final grade at the college.

Credit From U.S. Armed Forces
The college may grant credit, upon the recommendation of a department chair, for courses of study satisfactorily completed under this program in those cases where such courses have application to a student’s program. Credit is treated as transfer credit.

Alfred State Opportunity Program (ASOP)
The Alfred State Opportunity Program (ASOP) is a special admissions program that offers higher education to high school graduates or holders of high school equivalency diplomas who do not meet traditional admission criteria but who possess the potential for college success. Unlike the Educational Opportunity Program (EOP), students are not required to meet financial need criteria. The program is designed to help students reach their educational goals by providing additional academic support and/or time to reach these goals. Academic success coaching, tutoring, supplemental instruction, and subject and academic skills development courses are offered.

Course work is paced to enhance student success. The first semester schedule is composed of 12 to 15 credit hours, which might include courses in English; math; reading and/or college skills; social, physical, or life science; and/or program course(s). Assistance is available for tutoring, counseling, and academic advising. To comply with program requirements, students may be required to repeat courses in which they have earned a grade of "D" or "D+.”

Registration Process
In order to finalize enrollment at Alfred State, students should refer to the following information:

Orientation
Orientation programs are designed to assist new students in adapting to the college. Orientation aims to increase a student’s success by fostering positive relationships among students and faculty/staff. Orientation is a college-wide initiative, inclusive of academics, student services, and support services of the college.

Student Health Forms/Immunizations
Prior to registration, students must provide the required information to Alfred State Health and Wellness Services as noted on the Student Health Portal. Accepted students receive directions for accessing the Student Health Portal in their acceptance materials.

Academic Advisement
Each student is assigned a faculty adviser within his/her program of study. The adviser helps students plan their program of course work, reviews interim grades with students, and answers questions about personal academic goals, requirements, and academic regulations.

Class Schedule/Course Registration
A tentative schedule will be prepared during orientation. Final class schedules will be available for new, transfer, and readmitted students on final registration day. These final schedules will indicate if students need to process their bills with the Student Records and Financial Services Office. Students are not considered registered until they have picked up their final schedule and paid/processed their bill.

Continuing students will meet with their academic adviser during a designated time each semester to discuss course selection for the next semester and to receive their alternate registration PIN. Continuing students will print their own schedules from BannerWeb and adjustments to this schedule may be made during Add/ Drop.

Note: Courses are dropped for students who do not process their bills by the due date.

The Honors Program at Alfred State
The Honors Program at Alfred State was created to encourage motivated, curious, academically superior students to explore some aspect of their program in greater depth and to broaden and deepen their awareness of themselves as responsible, contributing members of a larger community. Honors Program participants complete a series of seminars, as well as a substantial honors project and 10 hours of volunteer community service. The permanent college transcript of students completing program requirements will read “Honors Program Graduate.”
Application
The Honors Program coordinator reviews academic records of current and incoming freshmen and invites students with a record of strong academic achievement to apply for Honors Program status. The coordinator makes the final decision based on the application, including the required student essay, letters of recommendation from two educators, and meeting with the student. Any current Alfred State student with a GPA of 3.5 (of a possible 4.0) or better and at least one year remaining at the college is welcome to apply to the program. Students accepted into the Honors Program remain in the program of their choice for degree purposes.

Program Requirements
Honors Program participants are required to

- earn an overall 3.25 GPA by graduation, with no more than one semester’s GPA falling below 3.0;
- enroll in honors courses offered by various departments, schedules permitting;
- work with a faculty or staff member to complete an honors project, usually a technical or research project related to the student’s personal or career plans;
- participate in at least two honors seminars per semester - short, informal opportunities to interact with some of the college’s most respected teachers;
- attend and participate in the college’s speakers series, especially those sponsored by the Honors Program;
- complete 10 hours of volunteer, unpaid service of genuine benefit to the community or individuals in the community.

Program Benefits
The Honors Program coordinator will

- offer interesting, challenging, credit-bearing honors courses, informal honors seminars, and speakers of interest from the professional world;
- facilitate arrangements for the honors project and community service requirements, if requested;
- negotiate special Honors Program privileges: one-week laptop loans, “faculty” library borrowing privileges, and first-day course registration privileges;
- write letters to transfer colleges explaining the Alfred State Honors Program and recommending students to the honors program at those colleges;
- indicate “Honors Program Graduate” on the students’ permanent college transcripts.

Interested students should contact:
Assistant Professor Janice Stafford, Honors Program Coordinator
607-587-4799 staffojl@alfredstate.edu

Credit by Advanced Placement Examination (AP) and College Level Examination Program (CLEP)
Students who successfully complete either Advanced Placement (AP) or College Level Examination Program (CLEP) examinations shall be granted transfer credit, as predetermined by the respective department chairs. Students must request that an official transcript of their grades (a copy of a grade report is not acceptable) be sent to this college. Students contemplating taking an AP or CLEP examination should be aware that Alfred State requires the student to take the “Subject” examination and, if applicable, the optional essay section. Alfred State is a testing center for CLEP. For further information regarding the testing center, please contact the Center for Community Education & Training.
COMMUNITY EDUCATION & TRAINING (CCET)

Community Education & Training (CCET)

Email - ccet@alfredstate.edu
607-587-4015

CONTINUING EDUCATION/PART-TIME STUDENTS
Credit courses are open to all who might benefit from study and are qualified by previous education or work experience. High school graduation is not required. Financial aid is not available.

The college’s refund policy is followed for all credit courses.

Students may enroll in regular day and evening courses, online, summer school, winter session, or a combination of all. Advising and referral services are available.

SUMMER SCHOOL/WINTER SESSION
Summer sessions provide students with the opportunity to take courses in preparation for entering their freshman semester, getting ahead in their program, or lightening their semester load. Courses are conducted on an accelerated schedule, allowing the student to take multiple courses.

Summer housing is available for those students from out of the area who are attending on-campus summer sessions.

Winter session provides students with the opportunity to take online courses to get ahead in their program or to lighten their semester load. Courses are conducted on an accelerated schedule.

COOPERATIVE COLLEGE-LEVEL PROGRAM FOR HIGH SCHOOL STUDENTS
This program offers high school juniors and seniors the opportunity to take college-level courses on the Alfred campus with college students. This is a collaborative program and is open only to participating high schools. Financial aid is not available.

Course availability is based on classroom seat availability.

NONCREDIT ON/OFF CAMPUS COURSES
CCET coordinates and oversees all noncredit academic, personal development, and contract programs offered by the college. These programs are open to all with no requirements of previous education or work experience.

ONLINE NONCREDIT COURSES
CCET offers noncredit online courses in RHIT/coding exam prep, essentials of anatomy and physiology, computer, writing, personal enrichment, test preparation, small business, paralegal, health care professional, large business/management, project management, and more through a Web-based delivery system. Internet access, email address, and web browser are needed.

CLEP
CCET administers College Level Examination Program (CLEP) examinations, which allow students to receive transfer credit for specific courses upon attaining the required scores.

BUSINESS/INDUSTRY PROGRAMS
The CCET provides training and consulting services to support economic and personal development throughout the Southern Tier. CCET contracts with small to large business, industry, and government agencies to provide pre-employment skills training, job skills upgrade, and programs to increase competitiveness and retain employees.

The New York State Department of Transportation (NYSDOT) and the Quality Control/Quality Assurance (QC/QA) Task Force of New York Construction Materials Association collaborate with the college through CCET to conduct the QC/QA Technician Certification Program for Hot Mix Asphalt in New York State. This program is held every spring on the Alfred State campus.

Alfred State and the Associated General Contractors of America collaborate through the CCET to conduct the New York State Hot Mix Asphalt (NYS HMA) Density Inspector Certification program. This program is scheduled multiple times per year around New York State.

Alfred State and the NYSDOT collaborate through the CCET to conduct the NYSDOT welding certification program. This program is scheduled multiple times per year in Wellsville, NY; other sessions are also scheduled around Western New York.

The college, through CCET, is a training provider for the NYS Office of Alcoholism and Substance Abuse Services. The program provides training for those who wish to maintain or begin a career in the field of alcohol and chemical dependency counseling, including the Credentialed Alcoholism and Substance Abuse Counselor (CASAC), the Credentialed Prevention Professional (CPP), and Credentialed Prevention Specialist (CPS) designations. For more information on CASAC, visit http://oasas.ny.gov/.
## Financial Information

### COLLEGE COSTS

Alfred State strives to keep tuition and fees at reasonable rates. Charges may vary due to different room and meal choices, program costs, and fees selected. The following chart is designed to give you an idea of the average student’s charges and expenses.

### New York State Residency: The Student Records and Financial Services Office will determine New York State residency per SUNY guidelines. If NYS residency status is in question, the student will be charged out-of-state tuition until the student provides proof of NYS residency. Forms are available in the Student Records and Financial Services Office and online.

Certain nonresident students may be eligible for the resident tuition rate if they meet the following requirements:

1. Are not non-immigrant aliens within the meaning of 8 USC §1101(a)(15), and
2. Attended an approved New York State high school for two or more years, graduated from an approved New York State high school and applied for admission to the university within five years of receiving a New York State high school diploma; or
3. Attended an approved New York State program for a General Equivalency Diploma (GED) exam preparation, received a GED and applied for admission to the university within five years of receiving the GED; and
4. If the student is without lawful immigration status, the student submits to the campus a notarized affidavit stating that the student has filed an application to legalize his or her immigration status, or will file such an application as soon as he or she is eligible to do so (See NYS Education Law §355(h) (8)).
5. Members of the U.S. Armed Forces while on full-time active duty and stationed within New York State, as well as their dependents and spouse.
6. Dependents of full-time active duty personnel who are stationed outside New York State qualify for resident tuition if the service member's "Home of Record" is New York.
7. Individuals who meet the eligibility requirements for educational assistance under federal GI bills, even if the individual is not actually receiving or using such benefits, as well as their dependents and spouse.
   a. In order to prove veteran status, a student must provide U.S. Department of Defense Form DD214 or a Certificate of Eligibility from the U.S. Department of Defense or the Veterans Administration.
8. Individuals using education assistance under the U.S. Department of Veterans Affairs for the "Vocational Rehabilitation and Employment Program" (VR&E Program) (See 38 USC §3679(c)).

### PART-TIME STUDENTS

NYS residents enrolled in day or evening programs carrying fewer than 12 credit hours are charged $295 per credit hour. Tuition for non-residents enrolled on campus is $472 per credit hour for associate degree programs or $708 per credit hour for bachelor degree programs. Tuition for non-residents online who have not resided in New York State during the current fiscal year is $295 per credit hour for associate degree programs or $353 per credit hour for bachelor's degree programs. Part-time students are also charged mandatory fees (prorated per credit hour).

*Costs are based on information at the time of printing and are subject to change.

### EXPLANATION OF FEES & PAYMENT OPTIONS

**Student Comprehensive Fee** - This fee is paid by all students in order to provide quality services to everyone. The services are available to students whether or not the student chooses to take advantage of them. The fee comprises:

- **Activities Fee** - Established by students through their incorporated Student Government Association (Student Senate). This fee supports club and organization programming, the student newspaper, peer tutoring, Homecoming/Family Weekend, cultural life, intramurals, civic engagement, and much more.
- **Athletic Fee** - Supports the college’s intercollegiate sports teams and entitles students to free admission to all campus sporting events.
- **College Fee** - Established by the SUNY Board of Trustees.
- **Fitness Center Fee** - For use of the fitness centers (located on the ground floor of Orvis and the second floor of Pioneer). They offer top-of-the-line selectorized weight machines, computerized fitness and aerobic equipment, and an expanded free-weight area.
- **Health Fee** - Allows students to receive medications, physician consultations, and all available health services for no additional fee.
- **Technology Fee** - Supports computer technology operations, upgrades, and improvements.
- **Transcript Fee** - Guarantees students unlimited copies of their transcripts.
- **Transportation Fee** - Supports student transportation services.

**Orientation Fee** - A mandatory one-time orientation fee is billed to all full- and part-time new and transfer students to cover the cost of programs, food, and registration requirements. Internet and readmission students are not required to attend and will not be charged the orientation fee.

### Optional Fees:

**Graduation Fee** - Commencement Policy - All students must pay the Graduation fee in order to participate in the Commencement Ceremony. This charge is removed only if the student withdraws during first four weeks of classes. No charges will be removed after the fourth week. This fee will be imposed per ceremony attended. Students receiving more than one degree may also be charged for additional accoutrements at the Campus Store. All students graduating from a bachelor program must pay an additional cost for the bachelor hoods. Students must attend the ceremony to receive diploma cover and/or honor cord. **Please note:** bachelor graduates will be required to pay $30 at the Campus Store for their bachelor hoods when they pick up their regalia.
FINANCIAL INFORMATION

Vehicle Registration Fee - Mandatory on all vehicles parked on campus. Vehicles must be registered online at my.AlfredState.edu/studentlife or by visiting the University Police Department (located in the Theta Gamma House) where vehicle hang tags are issued.

Foreign Medical Insurance - Enrolls student in an accident and health insurance program. If you have questions about this plan, you may call the Student Records and Financial Services Office at 607-587-4253. Enrolling in the Foreign Insurance Program is mandatory when studying internationally.

Meal Plans - Students living on campus MUST have a meal plan unless living in a Townhouse or MacKenzie Quad apartment. (Student will need to contact ACES). Meal plans are also available for commuters. Carefully review your plan choice on BannerWeb and change the amount if necessary. If you have specific meal plan questions, you may call the ACES Office at 607-587-4084.

PAYMENT OPTIONS
Fall semester bills are available online July 1 (or the first business day if the 1st falls on a weekend); spring bills are available online in November. Both are given a due date well before classes begin. Payment is due on this date for the students to be pre-registered and avoid a $50 late registration fee and cancellation of their course registration.

Temporary deferment of payment may be granted at bill-processing time for students who have proof of financial aid or scholarships that will cover the billed amounts. Balances can be paid by cash, check, MasterCard, VISA, Discover, or wire transfer. As financial payments are received by the college, they will first be applied to any outstanding balance. Refunds will be issued only when the bill is paid in full. In a continuing effort to assist our customers, Alfred State also offers monthly payment plan options. Information regarding payment plan options is available online at www.alfredstate.edu/monthly-pay.

Students Receiving Title IV aid need to know: Students need to authorize the use of Title IV financial aid (federal grants and loans) to pay non-institutional charges (optional fees and vehicle registration). If you choose not to provide this authorization, you will be responsible for paying your optional fees even if you have a credit balance from Title IV financial aid. You will be asked your preference for this authorization during bill processing at my.AlfredState.edu/finances.

Note: Parent Borrowers (PLUS) must complete a separate authorization in order for PLUS loan funds to pay non-institutional charges.

STUDENT CONSUMER INFORMATION

REGISTRATION

Importance of Proper Registration - Students must properly register and pay by the appropriate deadline for all courses for which they expect to receive credit. Students are cautioned that simply attending classes and completing course requirements does not entitle anyone to register after the deadline has passed or to claim credit for a course in which they participated as an unregistered or a deregistered student. Students must resolve all problems regarding registration with the Student Records and Financial Services Office.

De-registration - Students who do not comply with published tuition payment deadlines or who have other major obligations to the college may be de-registered, or automatically dropped, from the courses for which they have registered prior to the new academic period. They may also be blocked from receiving college services such as diploma and enrollment verifications.

Deadlines - Courses may be added and dropped according to academic regulations. Please refer to www.alfredstate.edu/academics/academic-regulations. Courses dropped on or after the first day of classes shall be liable for charges based on the Liability Schedule below.

LIABILITY POLICY

All tuition and fee liabilities are calculated based on the date of separation as recorded in the Student Records and Financial Services Office. Students who will be separating from the college must file the appropriate paperwork with the Student Records and Financial Services Office. The last date of academic attendance will be used for students who unofficially withdraw by ceasing to attend classes. The period midpoint will be used if the last date of academic attendance cannot be determined through our attendance monitoring process. Following is a liability schedule based upon the “official” withdrawal date or date the class is dropped. Students begin incurring charges when their scheduled courses begin.

A student who is dismissed from Alfred State for academic or disciplinary reasons prior to the end of the academic term shall be liable for all costs for that term and shall not be eligible for a reduction of charges or a refund of payment made.

*For liability purposes, the first day that classes are offered, as scheduled by the campus, shall be considered the first day of the semester, quarter or other term, and the first week of classes for purposes of this section, shall be deemed to have ended when seven calendar days, including the first day of scheduled classes, have elapsed.

Orientation Fee and College Fee: 100% liable as of the first day of class.

Late Registration Fee: 100% liable after the first week.

Transcript Fee: Non-refundable once liable for semester tuition charges.
Graduation Fee and Vehicle Registration Fee: Charges are removed only if the student withdraws during the first four weeks of classes. The vehicle hang tag must be returned. After the fourth week, all charges will remain on the student’s bill.

*Students holding Residential Student Staff positions will receive credit from their start date in the position through their termination date as determined by the Office of Residential Life.

Meal Plan; Campus Spending Account: Unused portions are refunded by the ACES Office or credited to the student's bill.

RETURN OF TITLE IV FUNDS

If a student withdraws, is dismissed, or takes a leave of absence prior to the 60 percent point of the semester, Title IV funds must be returned to the source based on federal regulations unless a student meets one of the withdrawal exemptions for programs offered in modules. For the purpose of the return of Title IV funds, Federal Title IV aid is PELL, SEOG, subsidized and unsubsidized Federal Direct Loans, and PLUS loans. Students who do not complete at least 60 percent of the semester and are receiving Title IV aid may owe a bill after funds are returned to the source. A student will be reviewed to determine if they are an unofficial withdrawal at the end of the semester due to receiving failing grades in all of their course work. If no last date of academic attendance can be determined through our attendance monitoring process, the period midpoint will be used. The student must repay funds credited to their account as determined by the Federal Return of Title IV Aid Calculation.

ADJUSTMENTS TO BILL

Removal of charges from a student’s bill must be made before or at the time of processing. Any student not requesting a correction to the bill prior to the end of the first week of classes will be liable for those charges.

Any appeal of a fee must be in writing, with justification, and submitted to the Student Records and Financial Services Office by the end of the first week of the semester.

Late Registration Fee: Any students who have not registered for classes, paid their bill, or processed their bill by the bill due date, will be assessed a $50 late registration fee. This fee is nonrefundable.

Penalties for Nonpayment: Nonpayment of charges will result in current semester registration being dropped, late fees assessed, the holding of diplomas and possible denial of future registration. Unpaid accounts will be forwarded to a collection agency or to the Office of the Attorney General.

Late Payment Fee: A monthly late payment fee of up to $50 is assessed to any account with an outstanding balance. This fee will be added to any account turned over for collection purposes.

Returned Payments: A fee of $20 will be charged for payments returned for insufficient funds.

Disbursement of Loans, Grants, Scholarships: The college may receive funds for a student from various sources. All monies are applied to the student’s account as received until the bill is satisfied. If the college receives funds that result in a refund for the student, a direct deposit will be initiated for those enrolled in E-Refund. Those not enrolled will be issued a refund check. For Alfred campus students, the refund check will be available for pickup in the Student Records and Financial Services Office for one week. Wellsieville campus students can pick up their refund checks at the Zero Energy House. Checks for students studying online or at the Northland Campus will be mailed. Any remaining refund checks not picked up after one week will be mailed to the student’s home address.

FINANCIAL AID

Financial aid comes from a variety of sources. Students must file a Free Application for Federal Student Aid (FAFSA) as soon after Oct. 1 as possible for each academic year in which they want to receive federal Title IV financial aid. The FAFSA can be completed online at https://studentaid.gov/. Once the form is submitted, students can print a confirmation page as receipt of the application. While on the FAFSA confirmation page, New York State residents who plan to enroll full time can apply for the NYS Tap Grant. TAP can also be applied for online at www.tap.hesc.ny.gov. Eligible New York State residents can apply for the Excelsior Scholarship online at www.hesc.ny.gov. Alfred State’s school codes for financial aid are:

- 002854 for the FAFSA
- 3005 for TAP associate degree programs
- 6005 for TAP baccalaureate degree programs

YOUR FINANCIAL AID PLAN

All students are considered for all types of aid, and financial aid plans are made according to a student’s eligibility in each program as determined by federal and state regulations. Offers are determined by financial need based on data provided by the student on the FAFSA. Financial aid is conditional based upon continuation of legislative authority and availability of appropriated funds.

Financial need is calculated using the following formula: Cost of Attendance (tuition, room, meals, fees, books and supplies, transportation) - Expected Family Contribution (EFC determined by FAFSA) = Financial Need.

Financial aid can be categorized into three types:

1. **Scholarship and grant aid are considered gifts and generally do not need to be repaid.** These include the Federal Pell Grant, Federal Supplemental Educational Opportunity Grant (SEOG), NYS Tuition Assistance Program (TAP) for NYS residents enrolled full-time, Aid for Part-time Study (APTS) and part-time TAP for NYS residents enrolled part-time, and the Educational Opportunity Program (EOP) for NYS residents who meet established academic and economic guidelines. Students should contact the NYS Higher Education Services Corp. for information on scholarships for Excelsior, STEM, volunteer firefighters, victims of the World Trade Center disaster, and certain types of military and public service. Contact information can be found on the web at www.hesc.ny.gov.

   - Students receiving veterans’ educational benefits through the Department of Veterans’ Affairs must provide a copy of their Certificate of Release or Discharge from Active Duty (DD214) or their certificate of eligibility for benefits to the veterans’ certifying official in the Student Financial Services Office.
Records and Financial Services Office. Here students will receive required forms and enrollment certification for the completion of their application for veterans’ educational benefits. Alfred State is a participating member of the Yellow Ribbon Program.

- Campus scholarships are primarily given out by the Admissions Office. Scholarship opportunities and requirements can be viewed on the web at www.alfredstate.edu/financial-aid/scholarships. Links to free outside scholarship search services are also provided. Students are encouraged to also seek scholarships and grants through their local high schools, civic organizations, and employers.

2. **Loans do need to be repaid** and should be considered as serious commitments. These include the Federal Subsidized and Unsubsidized Direct Loans, and Federal Nursing Loan. These loans are in the student’s name and eligibility is determined by financial need based on the FAFSA. Students are directed by the college to complete an electronic Master Promissory Note (MPN). Under an MPN, students can receive subsequent loan disbursements at the same school for up to 10 years without having to complete another promissory note. Interest rates and terms are set by the federal government, on an annual basis and students must be enrolled a minimum of six credit hours per semester in a matriculated degree-granting program. These loans have a grace period before repayment begins once the student is no longer enrolled or drops below half-time enrollment.

- The Federal Parent PLUS Loan is taken out in the parent’s name on behalf of the student. Repayment begins 60 days after the loan is fully disbursed. Options for deferment are also available. This loan is also applied for using an electronic Master Promissory Note (MPN). Interest rates and terms are set by the federal government on an annual basis and students must be enrolled a minimum of six credit hours per semester in a matriculated degree-granting program.

- Private Loans are nonfederal loans made by commercial lenders. Private Loans typically have higher fees and interest rates. Terms can vary by lender and loan product. Students must be at least 18 years old to apply in their own name and often require a credit-worthy cosigner.

3. **Federal College Work-Study** is a way for students to earn money through a part-time job in order to contribute toward their college costs. Work-study is offered to students with demonstrated financial need based on the FAFSA. Students are paid at an hourly rate every two weeks for the hours worked.

**METHODS OF NOTIFICATION**

Financial Aid Plans are sent via mail to accepted students with a valid FAFSA on file with the college. Students can also view their Financial Aid Plan at my.AlfredState.edu/finances. Detailed instructions are provided to students on how to accept and process their aid.

Accepted students with paid deposits are provided with an active Alfred State email account. Financial Aid Plan availability, requests for information, and notification of changes to the Financial Aid Plan are sent to students’ Alfred State email accounts. It is the students’ responsibility to regularly check their campus email and my.AlfredState.edu/finances for such updates and requests. Students should also be aware that they can view the status of their financial aid and requests for information anytime using the my.AlfredState.edu student portal.

**STUDENT LOAN COUNSELING**

**Entrance counseling** – First-time borrowers under the Federal Direct Loan Program are required to complete an online loan counseling session before loan funds can be disbursed. The session is designed to inform student borrowers of their rights and responsibilities under the Federal Direct Loan program. Nursing Student Loan borrowers must also complete online student loan counseling.

**Exit counseling** – Students separating from the college due to graduation, withdrawal, leave of absence, dismissal, or less-than-half-time enrollment are required to complete an online loan exit counseling session. The session is designed to help students avoid the pitfalls of default by informing them of their repayment obligations as well as their deferment and forbearance rights under the loan programs from which they borrowed.

**INCOME VERIFICATION AND OTHER REQUESTS FOR INFORMATION**

Under US Department of Education guidelines, a portion of students who apply for Federal Title IV aid will be selected for verification. This may include verification of household size and income. Title IV aid will not be processed until all requested documents have been received and reviewed by the Student Records and Financial Services Office.

**OVERAWARD POLICY**

Overawards occur when students receive financial aid resources in excess of their cost of attendance. In this instance, the Student Records and Financial Services Office is required under federal student aid regulations to reduce or cancel any resources affected by the overaward.

Students receive written notification by the Student Records and Financial Services Office when an overaward is identified and are advised which funds need to be adjusted. In some cases, this could leave a student owing a balance on the semester bill. Students are encouraged to notify the Student Records and Financial Services Office in writing immediately if they receive additional funds that were not included in their original Financial Aid Plan.

**ACADEMIC CRITERIA FOR FINANCIAL AID**

Alfred State is required to monitor the academic progress of students receiving federal and state financial aid. Students who are not maintaining satisfactory academic progress (SAP) and pursuit of program (POP) according to established guidelines are not eligible for federal Title IV and/or state financial aid. In addition, students cannot receive federal and/or state financial aid for courses not applicable to the major in which they are matriculated. More information is available at www.AlfredState.edu/grades-financial.

**Appeal Procedures**

Students who experienced extenuating circumstances that affected their academic progress resulting in the loss of their financial aid eligibility may file an appeal of SAP-POP and/or Title IV requirements. Students interested in filing an appeal are encouraged to contact the Student Records and Financial Services Office for instructions. Appeal procedures are also provided to students in writing when they receive their notice of ineligibility. Information is also available online at www.alfredstate.edu/financial-appeals.

**New York State Criteria/Requirements for Tuition Assistance Program (TAP):** Reviewed at end of each semester.

The chart below applies to non-remedial students first receiving NYS Aid in 2010-11 and thereafter.
Students Receiving TAP Need to Know:

TAP Aggregate – Students enrolled in associate degree programs can receive up to six semesters of TAP (six payment points per semester) for a total of 36 payment points. Bachelor’s degree students can receive up to eight semesters of TAP or 48 payment points. Students who qualify under the Educational Opportunity Program (EOP) and approved five (5) year programs (BArch) can receive up to 10 semesters or 60 payment points. TAP payments received at other schools are still counted in the aggregate when students transfer schools.

Repeating Courses – Students must enroll in a minimum of 12 new credit hours each semester to qualify for TAP. Repeating a course that previously received a passing grade cannot be included as part of the required credit hours for that semester when determining TAP eligibility. However, the following exceptions apply: (1) when a failed course is repeated; (2) when a grade received is passing at the institution, but is unacceptable in a particular program as stated in the college catalog by the academic department; and (3) when a course may be repeated and credit is earned each time. The Student Records and Financial Services Office determines if students are out of SAP-POP compliance as part of the TAP certification process. Students are notified of their ineligibility by the Student Records and Financial Services Office.

Withdrawal or Leave of Absence – Students who received TAP for a semester from which they withdrew or took a leave of absence and did not earn any academic credit are not considered to be fulfilling the pursuit of program requirements and would be made ineligible for TAP for the next enrollment period.

2.0 GPA – Students having received four semesters of TAP (24 payment points) must have a 2.0 cumulative GPA (out of a possible 4.0) to continue receiving TAP. This includes students who may have received TAP payments at another college prior to enrolling at Alfred State.

Sit-out – Students who become ineligible to receive state financial aid for a semester due to poor academic performance or failure to meet pursuit of program requirements may sit out for one year. Students would then be eligible to receive the state financial aid for which they qualify upon their return. Sit-out does not apply to the TAP 2.0 requirement.

Aid to Part-Time Study (APTS) – Students studying part-time may be eligible for APTS. APTS is deducted from a student’s available TAP payments. Two APTS payments (three points each) equal one TAP payment (six points).

Part-Time TAP – Similar to APTS, part-time TAP is also deducted from a student’s total available TAP payments. However, instead of using three points for each semester of part-time enrollment, points are used according to the actual number of part-time credit hours taken against the percentage of a full TAP award.

Federal Criteria/Requirements: Reviewed at the end of each semester.

Students Receiving Federal Title IV Aid Need to Know:

Degree Completion – Students must complete their degree or certificate within 150 percent of the normal credits required for completion. Students who change programs and are in good academic standing are considered to be at the semester level based on the number of transfer credits accepted by the new program. For any subsequent program changes or program changes due to poor academic standing all attempted hours will be considered. Example: If an AAS student needs 60 credit hours to complete a degree, they cannot receive aid after 90 credit hours have been attempted.

Federal Warning – Students found to be below the academic standards for federal aid eligibility will be placed on federal aid warning for one semester. Students who have not regained eligibility by the end of the warning semester will be ineligible for federal aid.

Remedial Courses

Alfred State offers credit and noncredit remedial courses which will be counted toward the number of credit hours attempted and taken for the purpose of financial aid. However, if a passing grade is not received remedial course work will not be counted in the number of credit hours earned.
Incomplete Course Work, Withdrawals, and Repeated Course Work

Course work that has not had a grade issued will not count in credit hours earned and may impact financial aid eligibility. Withdrawal from courses that will have a grade of withdrew passing/failing will be counted in hours attempted and/or earned. Courses repeated due to a failing grade will have the highest earned grade count in hours attempted and/or earned.

CROSS REGISTRATION/CONSORTIUM AGREEMENTS

Alfred State will process financial aid for its matriculated students who are also attempting course work as a 'visiting' student at another college or university. Prior approval is required by the Alfred State Transfer Advisor to ensure that the course work will transfer into Alfred State and meet the student’s graduation requirements. Complete procedures are available at www.alfredstate.edu/transfer-students/cross-registration.

Questions

Questions in regard to any of the above information can be directed to: Alfred State Student Records and Financial Services Office, 10 Upper College Drive, Alfred, NY 14802; phone 1-800-4-ALFRED; or email sfs@alfredstate.edu.

SCHOLARSHIPS AVAILABLE AT ALFRED STATE

Alfred State is proud of its commitment to recognize outstanding students by offering numerous scholarships. Since it is the desire of Alfred State to award scholarships to as many students as possible, typically students do not receive more than one scholarship. If a student qualifies for more than one award, the higher-value scholarship will be awarded. Enrollment deposits must be paid by the due date in order to maintain any scholarship awards.

When multiple SAT score reports are submitted for scholarship purposes, the exams will be superscored using the highest reading/writing and math scores; ACT exams are not superscored.

The Alfred State Athletic Department is an NCAA Division III member. Therefore, athletic ability or athletic accomplishments will not be considered in determining students' scholarship eligibility or financial aid packages.

The following scholarships are available to incoming students who have been accepted and will enroll for the fall semester into a regular program and will be studying full time on either the Alfred or Wellsville campus. Please note: students studying summer are not eligible for scholarships; scholarship funding is limited and meeting qualifications is not a guarantee of an award; the financial aid package, including scholarship awards, cannot exceed the cost of attendance.

Douglas & Carol Shay Acomb Endowed Scholarship2 - Awarded to an academically talented incoming student; applied to non-tuition expenses.

Agricultural Endowed Scholarship2 - Awarded to student enrolling in an agriculture program.

Alfred State Merit Scholarship Program:

Alfred State Scholars3 - up to $5,000 per year awarded to academically talented first-time, freshmen entering a baccalaureate-degree program; must be a New York State resident; specific value will be determined by strength of academic background and funding availability; applied to non-tuition expenses (e.g., books and supplies, fees, on-campus housing, transportation); preference given to students accepted by March 1; no scholarship application necessary.

Alfred State Pioneer Award1 - up to $2,500 per year awarded to academically talented first-time, freshmen entering an associate-degree program; must be a New York State resident; specific value will be determined by strength of academic background and funding availability; applied to non-tuition expenses (e.g., books and supplies, fees, on-campus housing, transportation); preference given to students accepted by March 1; no scholarship application necessary.

Alfred State Scholars—Out-of-State1 - up to $10,000 per year awarded to academically talented first-time, freshmen entering a baccalaureate-degree program; must reside and attend high school outside of New York State; specific value will be determined by strength of academic background and funding availability; preference given to students accepted by March 1; no scholarship application necessary.

Alfred State Pioneer Award-Out-of-State1 - up to $3,000 per year awarded to academically talented first-time, freshmen entering an associate-degree program; must reside and attend high school outside of New York State; specific value will be determined by strength of academic background and funding availability; preference given to students accepted by March 1; no scholarship application necessary.

Allegany County Counselors' Association Annual Scholarship3 - Awarded to a student attending high school in Allegany County; applications available in high school guidance offices in early spring.

Allegany County School Food Service Association Scholarship2 - $200 awarded to a student with a financial need from an Allegany County school district who is entering the culinary arts program; applied to non-tuition expenses.

Alpha Sigma Sorority Annual Scholarship4 - Awarded to an incoming female student who demonstrates civic engagement activity and participation; letter of interest should be sent to the Admissions Office by March 31.

Alumni Scholarship4 - Awarded to new first-year and transfer students who are the children or grandchildren of an Alfred State alumnus; applied to non-tuition expenses; multiple scholarships available; first-years must have at least an 83 high school average (through end of junior year) and transfers must have above a 2.0 cumulative GPA; a letter must be sent to Admissions Office indicating student’s name as well as the alumnus’ name at the time of graduation, the year graduated from Alfred State, and the student’s relationship to the alumnus; one-time award granted to eligible students until funding runs out.

Alumnus 1939 Endowed Scholarship— $1,000 awarded to incoming students enrolling in culinary arts or culinary arts: baking, production and management program; scholarship application available on the Alfred State website.

Evelyn C. and Rumsey C. Billings Memorial Endowed Scholarship2 - Awarded to academically talented incoming students from Steuben and Otsego counties.
Lee Brasted Engineering Technologies Endowed Scholarship - Awarded to a student enrolling in an engineering technology program.

Anthony C. Cappadonia Endowed Scholarship - Awarded to an incoming student with a musical background who was in high school choir and will participate in the Alfred State choir; must have an 80 or better high school average through the end of the junior year; letter of interest should be sent to Admissions by March 31.

Cross Connection Control Foundations of the Niagara Frontier, Inc., Annual Scholarship - Awarded to a student enrolling in the heating, ventilation, and air conditioning program.

Culinary Academic Scholarship - $1,200 awarded to an incoming student enrolling in culinary arts or culinary arts: baking, production and management program; scholarship application available on the Alfred State website.

Daniel DiFrancesco Memorial Endowed Scholarship - Awarded to an incoming student enrolling in an agriculture program who exhibits service to school and/or the community, exhibits a strong sense of responsibility to self and dedication to family, and possesses a love of the outdoors and demonstrates an appreciation of nature; letter of interest should be sent to the Admissions office by March 31.

The Drago Family Endowed Fund - Awarded to academically-talented incoming student; preference given to minority student who is first in family to attend college; applied to non-tuition expenses.

Dresser-Rand Endowed Scholarship - Awarded to an academically talented incoming student who resides in Allegany, Cattaraugus, Chautauqua, or Steuben counties in New York or from McKean, Potter, or Tioga counties in Pennsylvania.

East High School Partnership Scholarship - $500 awarded to graduates of East High School, Rochester, who are accepted to Alfred State by May 1 of their senior year; maximum of five awards each year; scholarship award begins second year of enrollment at Alfred State.

Max & Marian Farash Annual Scholarship - Awarded to student enrolling in mechanical engineering technology or the heating, ventilation, and air conditioning program.

Friendship Designated Scholarship - $500 awarded to graduates of Friendship Central School accepted into a regular program at Alfred State.

Genesee Valley Balloon Association Endowed Scholarship - Awarded to student from Western New York enrolling in an agriculture program.

Vernon Gleasman SAE Endowed Scholarship - Awarded to academically talented incoming student enrolling in mechanical engineering technology.

Michael K. Gowdy Memorial Endowed Scholarship - Awarded to academically talented students from Wellsville High School.

W.R. Grace & Company Endowed Scholarship - Awarded to a student enrolling in the biological science or forensic science technology program.

M.A. and C.A. Graham Nursing Memorial Endowed Scholarship - Awarded to incoming nursing students; preference given to students from LeRoy Central or Warsaw Central School districts, then to students from Wyoming County, then to students from the rest of New York State.

International Cultural Scholarship - Awards up to $3,000 to accepted international students with an overall high school or college grade point average of 2.5 or better.

International Excellence Scholarship - Awards up to $7,000 to international students who meet two of the following four criteria: 213 TOEFL exam score (79-80 on Internet-based exam, 550 on paper exam), 3.25 college cumulative grade point average (a 90 overall high school average may be substituted), 1270 combined reading/writing and math SAT, and/or are a current member of Phi Theta Kappa in good standing.

International Merit Scholarship - Awards up to $3,000 to international students who meet two of the following four criteria: 195 TOEFL exam score (71 on Internet-based exam, 525 on paper exam), 3.0 college cumulative grade point average (an 88 overall high school average may be substituted), 1170 combined reading/writing and math SAT, and/or are a member of Phi Theta Kappa in good standing.

Student Affairs

Student experiences at Alfred State are a mix of challenging academic course work and involvement in a spectrum of diverse social, recreational, and cultural activities. With focus on Well-being, Inclusion, Development and Engagement (WIDE model), students will complement their classroom experience by developing support systems and career-focused competency skills. An array of clubs, activities and opportunities are available, including 17 men's and women's intercollegiate athletic programs, leadership positions, career connected employment and intramural and competitive club sports.

At Alfred State students have access to more than 80 clubs and organizations, daily on campus experience such as movies, live music and comedy, concerts, cultural events, access to fitness centers, swimming pool, Esports and gaming spaces and much more! There's always something to do, In fact, there are so many options, the difficulty may be deciding what to do first.

CAREER DEVELOPMENT

Career Development offers a wide variety of services for students and alumni. These services include assistance with developing career plans and goals, resume development and critique, job/internships, interview preparation, mock interviewing, and a variety of classroom workshops. Career Development provides and maintains four major online branded services: JobLink (job postings for on-campus jobs, work study, internships and FT career jobs; on-campus recruitment; career fairs), OptimalResume (online resume, portfolio and website builder, interview prep), and CandidCareer (thousands of videos to help learn about different career paths and also videos to prepare for a successful job search and career). In addition to maintaining hundreds of job postings for full-time, part-time, and summer employment, Career Development also organizes and facilitates four to five career fairs each year.

STUDENT DISABILITY SERVICES

Academic and nonacademic assistance is provided to students with self-identified disabilities (permanent or temporary) who have provided appropriate documentation to the Office of Student Disabilities Services (Hunter Student Development Center, Alfred campus; Pioneer Student Union, Wellssville campus).

Academic services may include faculty conferencing, tutoring referrals, assistive technology, note takers, and testing accommodations. Non-academic services may include residence hall accommodations and agency referrals. Attendant care and personal assistive devices are not provided. Accommodations are decided by the counselors from Student Disabilities Services after reviewing the appropriate documentation and talking with the individual student. Please remember that self-advocacy is essential to receiving assistance.

CENTER FOR INTERCULTURAL UNITY

The Center for Intercultural Unity strives to provide an open-minded, welcoming, and safe environment for all of our Alfred State students. Through educational workshops/programs, professional trainings, advocacy and outreach, the Center for Intercultural Unity facilitates students’ self-awareness, learning, and growth regarding different cultures, viewpoints, and experiences. The center supports students in matters of academic, social, cultural, and personal well-being, and promotes all students’ understanding and appreciation of differences as well as similarities.

The Center for Intercultural Unity is committed to creating opportunities for Alfred State students to empower and educate themselves, their peers, and the community in which they live. We support and promote under-represented student organizations, including, but not limited to LGBTQ+, students of color, women, veterans and military service, international students, and faith-based groups. We are also deeply invested in the prevention, awareness, and eradication of sexual assault on college campuses and proactively provide programs, workshops, and campaigns that aim at keeping Alfred State safe from sexual violence. The Center for Intercultural Unity works closely with academic departments and Student Affairs offices on campus to create an empowering and enriching college experience here at Alfred State.

HEALTH AND WELLNESS SERVICES

Health and Wellness Services is located in TA Parish Hall on the Alfred campus and within the Pioneer Student Union on the Wellssville campus. Services offered include medical care, mental health counseling, and psychiatric services. Sexual and reproductive health care are also provided to students at no cost through a partnership with the Allegany Department of Health. Staff members included licensed health and counseling professionals, as well as registered nurses. The mandatory health fee allows students to obtain medication and medical supplies at no additional cost. Health and Wellness Services prides itself on upholding strict standards of confidentiality and ethical practice. Appointments can be made by calling 607-587-4200, or emailing healthandwellness@alfredstate.edu. For more information about Health and Wellness Services visit www.alfredstate.edu/student-life/health-and-wellness-services.

THE OASIS

Located in the Student Leadership Center, The Oasis is an alternative therapy space aimed at promoting self-care, stress management, and health and wellness programming. The Oasis offers massage chairs, aromatherapy, a self-help audio library, and access to events like yoga and meditation. The Oasis’ hours of operation and services offered vary each semester. More information can be found on our website www.alfredstate.edu/oasis

CAMPUS SHUTTLE SERVICE

The college provides a bus service that circles the main campus continuously throughout each class day 10 minutes to the hour from 8 a.m. - 5 p.m. including traveling to the farm and Vet Tech building. The college also provides a shuttle service back and forth each day to the Wellssville campus. These buses have various morning departure times from the Alfred campus and afternoon departures from the Wellssville campus. A daily shuttle schedule is posted online for quick and easy access.

STUDENT/VISITOR MOTOR VEHICLES

All licensed motor vehicles, including automobiles, trucks, motorbikes, motorcycles, and other motor vehicles to be operated or parked on college property, must be registered at the University Police Department in the Theta Gamma house on the Alfred campus. If you are on the Wellssville campus, you must register at Student Services. Visitors must register their vehicles immediately to avoid enforcement violations. Information and assistance regarding vehicle registration can be found 24 hours a day, seven days a week at the University Police Department.

UNIVERSITY POLICE

The University Police Office is located on Lower College Drive in the Theta Gamma House on the Alfred campus. University Police is open 24-hours a day, seven days a week. University Police maintains an office on the Wellssville campus. The Wellssville office is staffed during the academic year Monday - Friday, 8 a.m. - 4 p.m.

Alfred State’s University Police Department is a fully sworn and accredited, community-oriented and service-based police department that provides law enforcement and emergency services to all members of the Alfred State community. The University Police Department is responsible for enforcing all federal, state, and local laws on both the Alfred and Wellssville campuses.
The department prides itself on a level of professionalism, courtesy, and respect that meets the specialized needs of a college setting. With a 24-hour dispatch center, University Police serves as the primary point of contact for off-hours services such as electrical, plumbing, or other facility-based issues. In keeping with the educational mission of our setting, the department also encourages its members to continue their development through additional education and training.

University Police can be contacted at 607-587-3999 or simply 3999 from any campus phone. In an emergency dial 911 or use any of the emergency blue light phones located throughout campus.

ALUMNI COUNCIL
The Alumni Council exists to enhance the engagement of the college's alumni for their enjoyment through programs and services which build relationships and to support the institution's efforts in student recruitment, career placement, and friend/fund-raising.

The major objectives of the Alumni Council are to:

1. Promote and increase fellowship of students and alumni of Alfred State.
2. Serve as a liaison among Alfred State, its alumni, and students in order to foster and maintain close and mutually beneficial ties.
3. Maintain and promote loyalty of the alumni of Alfred State.
4. Assist and promote the interest of Alfred State, its students, and alumni.
5. Develop programs that support the goals and objectives of the campus, including campus fundraising, in conjunction with the Office of Institutional Advancement.

The Alumni Council provides a variety of programs and services to both alumni and students. Some of these include:

- Bi-annual alumni magazine
- Alumni records update service
- Annual alumni reunion – Homecoming
- Assistance with program-specific events
- Regional alumni events
- Scholarship program
- Career development assistance - posting job openings, seeking position, etc.

The Office of Alumni Relations is located on the Alfred campus in the Van Hall Alumni House. For additional information related to the above programs, please stop in, call 607-587-3931, or forward an email message to alumni@alfredstate.edu.

LIBRARIES
The libraries on the Alfred and Wellsville campuses are strongly committed to serving the information and research needs of students and faculty. The collections on both campuses encompass materials in a variety of formats - electronic, print, and visual media. To access the libraries' holdings, visit the library website at www.alfredstate.edu/hinkle-library. Materials not available locally may be requested through the interlibrary loan service.

The Walter C. Hinkle Memorial Library on the Alfred campus houses a collection of approximately 52,200 book volumes and 3,300 video titles and has print subscriptions to 12 newspapers and some 140 journals and magazines. The Wellsville campus library holds about 3,000 volumes, 30 current journal titles, and four daily newspapers. The library contains an extensive collection of automotive manuals in print and microfiche, as well as materials in a variety of audiovisual formats. Students and faculty on both campuses have access to more than 73,200 electronic journals and magazines available from 110 online databases. A good number of these are provided through SUNY Connect, an initiative to share library collections and services across most of the 64 SUNY campuses.

Also located in the Hinkle Library is the Jean B. Lang Western New York Historical Collection, a unique repository of historical and genealogical materials that focuses on Alfred, Allegany County, and western New York State. Both the Alfred and Wellsville campus libraries provide public access computers and printers. Laptop users in Alfred may take advantage of the wireless connectivity in the library, using their own laptops or those available for loan. Both the Alfred and Wellsville campus libraries are accessible to those with disabilities, and are open to the general public at no charge.

ATHLETICS, RECREATION, AND PHYSICAL EDUCATION
Alfred State Athletics offers intercollegiate sports and has great facilities for exercise or a quick game of pick-up. Whether you want to compete or just stay in shape, Alfred State has something for all Pioneers.

The Athletic Department sponsors 17 NCAA Division III intercollegiate varsity sports:

**Women's sports:** Basketball, Cross Country, Soccer, Softball, Swimming, Track & Field (Indoor/Outdoor), and Volleyball

**Men's sports:** Baseball, Basketball, Cross Country, Football, Soccer, Swimming, Track & Field (Indoor & Outdoor), and Wrestling

Alfred State is an NCAA Division III member; therefore, no consideration of athletic ability or athletic accomplishments will be considered in determining students’ scholarship eligibility or financial aid packages. With the move to NCAA, incoming first-year students who wish to participate in intercollegiate athletics must be admitted into a four-year program OR have a 75 or 2.1/4.0 high school average to be immediately eligible their first semester. Incoming transfer students should consult the Alfred State Athletic Department for information on athletic eligibility requirements.

Alfred State has three options for students of the college, faculty/staff, and members of the community to reach their fitness goals. The Pioneer Fitness Center located in the Pioneer Center houses cardiovascular equipment, resistive weight equipment, and a free weight area while the Orvis Strength and Conditioning Room houses free weights and power racks. The MacKenzie Fitness Center also houses cardiovascular equipment. Managed by a full-time certified director, the centers are staffed at all times to ensure a safe and effective workout for all participants regardless of fitness level.

The Orvis Activities Center is also home to the swimming pool. Open swimming hours are also available daily for student or community use.

Physical education classes are also offered by the Athletic Department. Each semester, a variety of physical fitness, sport classes, and health and wellness classes are taught.
AUXILIARY CAMPUS ENTERPRISES AND SERVICES

Auxiliary Campus Enterprises and Services (ACES) is a not-for-profit corporation responsible for many services on campus. A board of directors consisting of faculty, students, and administrators governs activities of the corporation. ACES manages campus food service, special events and catering, snack bars, campus stores, food/beverage and laundry vending services, Lake Lodge, cable TV services, transportation services, and accounting and bookkeeping services.

DINING SERVICES

Students living in residence halls are required to have a meal plan. Students living in the Townhouses or a MacKenzie apartment have the option to waive that requirement. Individuals may elect a program based on their specific needs from a variety of meal plan options as described in promotional material appearing on college websites and the student billing. Participants are allowed considerable flexibility, as they may eat at either dining hall, the food truck, or any other retail dining location by using a meal swipe, dining dollars, or campus spending account funds. All accounts are maintained and managed by ACES through their student campus ID.

CIVIC ENGAGEMENT & STUDENT LEADERSHIP PROGRAMS

The Center for Civic Leadership and Community Support (CCL&CS) is here to inspire involvement, facilitate learning, and help students make a positive difference in their community within and beyond campus. We work together with community partners to create opportunities to identify and address community challenges together - here in Alfred, regionally, and beyond. Regardless of your major, interests, and background, you will find opportunity to bring your learning to life by serving others. Our vision is for you to develop into a leader equipped to make a positive difference in the world.

We are located within the Student Leadership Center - a building dedicated to inspiring involvement in community and leadership opportunities. Students can plug into alternative fall/spring break trips, disaster relief trips, community service days, and other special events on and off campus. Most student clubs and organizations are involved in civic engagement which can be a great way to get involved.

CCLCS also supports students wishing to enhance their leadership skills through special events, programming, and honor societies. Leadership development can enhance your student experience and build the skills and experience that employers are seeking. Highlighted below are opportunities to get involved:

- National Society of Leadership and Success: NSLS is the nation’s largest leadership honor society and provides a step-by-step program for members to build their leadership skills. Upon completion of the program, members receive their leadership certificate and take their place among the top student leaders at their campus and across the country.
- SUNY Leadership Academy: Competitive program offered annually to several students to engage in learning alongside other SUNY students.
- Leadership Suites: Competitive space available for clubs/organizations that demonstrate a high level of civic leadership focused on a specific community.
- Leadership Micro-credential: This self-paced, non-credit online program is offered without cost. Successful completion results in a digital badge that can be displayed online.
- Leadership Series: Regularly scheduled speaker series highlights alumni, employers, and faculty/staff who focus on relevant topics.

Our commitment to civic engagement is deeply embedded in a hands-on approach to education through project-based learning experiences. By combining real-world learning situations with community engagement, Alfred State students make significant contributions to people and communities around the world. Annually, students contribute tens of thousands of service hours through volunteerism, civic leadership, and workforce-ready knowledge to communities in need. Join others in being part of the solution. Contact civicengagement@alfredstate.edu to learn more.

OFFICE OF STUDENT ENGAGEMENT

The Office of Student Engagement cultivates well-rounded students by preparing them to stand apart in a competitive workforce upon graduation. Consistent with the college’s mission of preparing involved students in a caring community, the Office of Student Engagement supports, encourages, and challenges students by providing opportunities for hands-on growth through activities in the following areas:

- Curriculum-based event opportunities
- A diverse offering of student clubs and organizations
- Indoor and outdoor recreational activities such as our rock-climbing wall, tubing hill, and recreational trips
- Social programming and intercampus event support
- Maintenance of a vibrant Student Leadership Center

Through these opportunities, the Office of Student Engagement enhances the student experience, while contributing to enrollment, student retention, and student success.

NEW STUDENT ORIENTATION

New Student Orientation is an important part of each incoming student’s experience here at Alfred State.

Orientation consists of interactive, engaging presentations and activities that help acclimate all incoming students to our campus community. New students and their families will hear from campus departments such as Admissions, Academics, Health and Wellness, Residential Life, Athletics, and more. Students will also receive their first-semester class schedule during each Orientation session.

PERFORMING ARTS

Performing Arts at Alfred State has a long and successful history. Students have the opportunity to engage their talents in drama, instrumental music, and vocal music organizations. Each student brings unique experiences and ideas to the club, building an exciting and ever-evolving creative atmosphere. As student-run organizations, there are many opportunities to contribute to each group and to experience first-hand the rewards of your involvement and contributions.

Within each group you can find multiple ways to participate in college and community events. Members of Drama Club may participate as actors, actresses, stage managers, and technical theatre designers and operators, to name a few. Vocalists have the opportunity to participate in a large choral group setting or in a smaller individual setting, as well as an a capella ensemble. Instrumental music allows instrumentalists to perform in concert, jazz, brass, woodwind, percussion, and pep ensembles.
PIONEER STUDENT UNION - WELLSVILLE

The Pioneer Student Union (PSU) is a space that allows for recreation, socialization, and an opportunity for students to benefit from professional resources located within the building. Activity options available to students include: billiards, ping pong, shuffleboard, foosball, horseshoes, and many other games. There are also opportunities to improve physical and mental well-being, as the building houses a full gymnasium with six basketball hoops, a racquetball court, and weight room.

The MindSpa in PSU is a space solely dedicated to stress reduction. The spa allows for quiet relaxation in a room equipped with massage chairs and other calming amenities. Also at the PSU, students may seek out medical attention or be connected with counseling services, as the Health and Wellness Services Office is located on the first floor of the building. In addition to services housed within the PSU, professional staff there are able to provide students with linkage and referral to any of the other offices located in Wellsville or Alfred based on the needs of the student.

Students may also use the PSU as a quiet study space, as there is a separate computer lab with network-connected computer stations. The Pioneer Student Union is utilized by students across all majors on the Wellsville campus and serves as a space dedicated to providing experiences guided by Alfred State Student Affairs initiatives.

RESIDENTIAL LIFE

Residential Life believes that a student’s residence hall experience should be as individually suited to the student’s needs and interests as possible. On this basis, Alfred State offers a lifestyle approach to residence hall living. Within the limits of college policy, various lifestyle areas are offered, and students may choose the area which best suits them. The following styles are located in designated areas of certain residence halls:

No Smoking – All of our residential facilities are smoke-free.

24 and Over Lifestyle – This lifestyle option was created to address the special needs of nontraditional students. Available in select areas within Main Gate B only.

Bachelor’s Degree Lifestyle – Available in MacKenzie South only. This lifestyle option provides an opportunity for students in the bachelor programs to reside together.

First-Year Housing – Burdick Hall, Braddon Hall, Shults Hall and Peet Hall only house first-year students. Limited space available in MacKenzie South and Main Gate A.

Gender Inclusive Housing – This option allows individuals who are not the same gender, who may identify outside the gender binary (male or female), who may be questioning aspects of their sexuality/gender, or who may be in the process of (or completed) a gender transition, to live in an environment that is safe and supportive. This living space, open to the entire campus community, is requested through an application process, and selected on a yearly basis by a committee dedicated to the oversight of that community.

Substance-free Lifestyle – This lifestyle is designed for the student interested in living within a tobacco-free and alcohol-free area. All guests and visitors are also required to abide by the substance-free lifestyle while visiting the area. Each student signs a contract pledging to remain substance free while living in this area. If you are not committed to the restrictions, this lifestyle is not for you.

Quiet Study – Members of this lifestyle all agree to uphold mandatory 24-hour quiet hours. Television and music are allowed in this area, but must be kept at a minimal and respectful volume. This lifestyle is available in certain suite-style and corridor-style residence halls.

Pet Friendly – Students may bring a family pet to live with them in selected areas on campus; dogs (under 40 pounds when fully grown), domestic cats, and rabbits. Pet registration takes place at the start of the fall and spring semester.

Townhouse and MacKenzie Commons Apartments – Apartment-style living for sophomores, juniors, and seniors. Services available in the residence halls include laundry and vending machines, kitchenette, study areas, and computer labs.

Our Four Living Learning Communities:

Architectural Living and Learning Community (ALLC) – Baccalaureate architecture students can study, live, work, and engage with their faculty, all in their own residence hall (Peet Hall). The ALLC provides access to architecture work labs, study space, and a gallery.

Creative House, LLC (DLLC) – Designed specifically for students in the digital media and animation or graphic and media design programs, this Living Learning Community (LLC) features studio work spaces for its residents. Students live and learn with like-minded colleagues in a space made for productive and creative collaboration. With large screen monitors, a production studio, a space to screen work, and other extras, students who live in the Creative House LLC are prepared to hit the ground running on their creative projects.

Nursing Living Learning Community (NLLC) – First-year nursing students have the opportunity to become part of a community within Burdick Hall dedicated to helping new students transition into the nursing curriculum. In addition to participating in a cohort seminar led by nursing faculty within their residence hall, the NLLC provides an atmosphere with enhanced opportunities to learn from and connect with their faculty.

Summer Prep Academy Living and Learning Community (SPA) – Students accepted into the EOP program will attend Summer Prep Academy four weeks throughout July and August. These first-year students will have the option of remaining in their summer housing building without the stress of relocating to another residence hall room for the fall semester. The SPA Living Learning Community will allow SPA students to continue to live with their EOP cohort and maintain regular contact with their summer SPA mentors throughout the academic year.

ON-CAMPUS HOUSING REQUIREMENTS/CAMPUS WAIVER PROCEDURES

Be advised that a prior felony conviction may impede a student’s ability to reside in campus-administered housing. Felony conviction will be considered on an individual basis. Students may be required to submit court records and other information as required by SUNY Board of Trustees Policy to be used in assessing their eligibility for on-campus housing.

SUNY – Board of Trustees’ Policy

Every student in full-time attendance at a state-operated unit of the university, other than married students or students residing with a parent(s), shall be required to live in a residence hall maintained and operated by such a unit or to have the permission under such provisions as may be made therefore by the chief administrative officer of such unit to live off campus.

Local Campus Policies
I. WAIVERS

Any full-time student who wishes to live off campus must request a waiver of the Board of Trustees’ Policy. This waiver form is available from the Office of Residential Services and/or online. All waiver requests will be considered in accordance with the SUNY policy and the Board of Trustees’ intent to maximize the educational process. Certain conditions, if met, assure an individual of permission to live off campus. These specific exceptions are as follows:

General Eligibility:

- Married students
- Students providing direct care for a legal dependent
- Students 23 years of age or older
- Students already possessing a baccalaureate degree (reviewed for verification)
- A student residing with a parent, grandparent, or court-appointed legal guardian at that person’s permanent home address who is commuting fewer than 50 miles one way (notarized statement and supplemental statement required).
- Honorably Discharged Veterans of the US Armed Forces: DD-214 must be provided as documentation.
- Meet Academic Eligibility criteria as outlined in the policies governing waiver eligibility. *Blackboard video required
- Internship – Academic adviser confirmation required. Send email to reslife@alfredstate.edu. *Blackboard video required

Academic Eligibility: Fourth-year students in baccalaureate programs are eligible for off-campus status subject to the following minimum requirements: good academic standing with at least 90 credits and minimum cumulative grade point average of 3.0 and no current disciplinary status through the time of off-campus occupancy. Or, fifth-year students in a five-year program must be in good academic standing with at least 120 credits.

II. DETERMINATION OF FULL-TIME STUDENT STATUS

- A full-time student is an individual enrolled for 12 or more credit hours (including credit hours added after registration day).
- Students initially registered in a part-time status who add sufficient courses to attain full-time status are subject to campus housing policies unless a waiver is approved.

III. WAIVER PROCEDURE

- Waiver processing will begin April 1 or as soon as predictable thereafter for fall semester consideration. Waiver processing will begin Nov. 1 or as soon as predictable thereafter for spring semester consideration.
- The License for Residence is a full academic year agreement and takes precedence over any waiver application. Interim requests for release are processed according to current campus policy.
- At the time a housing waiver application is submitted and approved, any predetermined housing assignment is released.
- Initial Request: Any individual who wishes to live off campus must submit their request in writing to the Office of Residential Services. The request should note the basis for requesting a waiver. If the reason is not one of the exceptions, a detailed explanation of the reason(s) must be included.
- Decisions based upon health or psychological grounds will be reviewed through Accommodative Housing. Any student who is requesting off-campus housing based on these grounds should provide corroborating documentation through either Health and Wellness Services or email documents to accommodativehousing@alfredstate.edu for review.
- Review: The Assistant Director of College Housing or their designee will review all requests and, with the intent of the Policy of the Board of Trustees and the stated purpose of the college policy, render a decision. This decision will be given within five (5) business days, when possible. Note: Missing documentation will delay processing.
- Appeal: A denied waiver may be appealed to the Senior Director of Residential Services. The appeal must be in writing and address the reason(s) given for the denial of the initial request. The appeal must be sent within five (5) business days of receipt of the initial decision.
- Appeal Decision: All appeals will be reviewed in accordance with the intent of the Policy of the Board of Trustees and the stated purpose of the college policy. A written decision will be given within five (5) business days, when possible. There is no appeal of the Senior Director’s decision.

Greek Organization Eligibility: Information relative to organization eligibility is available from Residential Services and Student Engagement. Individual members of eligible Greek organizations may apply for a housing waiver if all criteria are met:

- Individual members must possess a 2.50 cumulative grade point average and a 2.50 semester grade point average (prior semester) at the time a housing waiver is requested.
- Individual members may not be on any disciplinary sanction and must have completed any special conditions as a result of a past sanction (i.e., alcohol assessment, signals, community restitution projects, etc.) at the time a housing waiver is requested.
- The organization in which they are a member maintains continuing authorization for off-campus, communal residency.
- All other reasons will be reviewed according to the Reasons for Waiver stated on the form and will be considered according to uniformity and intent of the Board of Trustees’ policy. Submission of false or intentionally misleading statements may result in waiver revocation, campus disciplinary sanctions, and other penalties. All waivers are granted for the academic year or the remaining portion thereof. Each student must resubmit a waiver application each year they are in attendance.

STUDENT LEADERSHIP CENTER

The Student Leadership Center serves as a comprehensive, centralized connection point for students, staff, and faculty to access leadership opportunities on campus and in the greater Alfred community. The Student Leadership Center, located in the center of campus, is the premier place for students to gather throughout the day in a "one-of-a-kind" designed space. The Student Leadership Center places every student who enters the facility in the middle of a hub of activity that allows students from different majors, ages, and different levels of community involvement to be in direct contact with each other; an "in your face" flavor of student engagement. The Alfred State leadership experience is an interactive process that develops students who are committed to lifelong learning, community engagement, and having a positive impact on the Alfred State campus and in the greater community and beyond. We believe that every student has the potential and the capacity to serve their community through civic engagement.
WEEK OF WELCOME
Each August, new students arrive on campus up to a week before classes begin. Here at Alfred State, we can't wait to welcome them to campus with a week just for them! WOW is a week designed with new students in mind; we want this time to be fun and engaging, and more than anything, we want to help students feel at home. For more information on New Student Orientation, please visit www.alfredstate.edu/orientation.
Academic Information

Alfred State offers over 80 majors in programs based in the arts and sciences, applied technology, and management and engineering technology.

Administratively, the college is broken down into three schools:

- School of Arts & Sciences
- School of Architecture, Management & Engineering Technology
- School of Applied Technology

Faculty and staff focus on programs within their areas of expertise. Depending on the major, each student will find the majority of courses taught within a particular area of study. However, most students will also be required to take some courses within other disciplines.

INTERNSHIPS AND CAREER DEVELOPMENT

The time to begin thinking about your career is in your freshman year! Career development assistance begins with the identification of career goals and the development of a plan to meet those goals. Plans frequently include résumé assistance, identification of available experiential education opportunities, individual employment/career counseling, interview preparation, and workshops.

Students have the opportunity to meet with employers at fall and spring career fairs, information sessions, and on-campus interviews.

Job/internship opportunities are posted daily for current students and alumni on the Career Development webpage.

ACADEMIC MINORS

An academic minor at Alfred State is an optional program of study available to matriculated baccalaureate students. A minor may be used to complement the major course of study, broaden and enhance career opportunities, gain expertise in an area of interdisciplinary studies, or provide an in-depth study in a subject of special interest.

A minor is described as a thematically related set of academic courses, consisting of no fewer than 15 credit hours. A minor will be officially recorded on the transcript when a student has satisfied all requirements for the major baccalaureate program and the minor, and has attained a 2.50 grade point average in the courses approved for the minor.

General Considerations: Minors will likely require courses taken in sequence, and may necessitate student planning within their first year. Financial Aid Considerations: Courses that only apply to a minor do not meet financial aid eligibility requirements for Federal or New York State Aid. If a course applies both to the minor and meets a degree requirement (such as an elective), financial aid can be used. Minor courses can fill General Education, LAS and elective requirements within a degree program.

Alfred State has three types of minors including Field of Study, Interdisciplinary, and Program Specific.

Field of Study Minors

Field of Study minors allow students to complete a course of study in an additional content area of specialization. The course of study is primarily within a single department but may include closely related courses from another department.

Field of Study minors include:

- Agriculture, animation, applications software development, business, computer engineering technology, construction management, criminal justice, GIS (geographic information systems), graphic design, history, information security, information technology, interactive design, logistics and supply chain management, mathematics, media production, network administration, psychology, surveying engineering technology and web development.

Interdisciplinary Minors

These minors are developed to focus on contemporary areas of interest that will enhance students’ understanding of the world and their effectiveness in their future professional lives. These minors are usually designed by a committee of interested faculty and are often multi/interdisciplinary in scope combining courses from multiple departments. The courses in these minors may be General Education and LAS courses. Athletic coaching, building technology, global studies, interior design, sustainability, and urban design are interdisciplinary minors.

Students wishing to pursue minors should first discuss options with their advisers and meet with the department chair where the minor resides to determine specific course requirements. Students must apply for minors on degree application forms.

EMPLOYMENT AND CONTINUING EDUCATION

The Career Development Office surveyed the 886 members of the May 2020 graduating class. A 67 percent college-wide response was realized from the survey. Alfred State Technology Services generated the statistical information utilized in the preparation of this report in May 2021:

- 72 percent employed after graduation
- 89 percent employed in their field of study
- 26 percent continued their education
- Combined employment and continuing education rate of 98 percent

CROSS-REGISTRATION

Alfred State students may cross-register with other SUNY or Rochester Area Consortium Colleges. Cross-registration is available for undergraduate courses during the Fall or Spring terms only. Students may cross-register for a maximum of six credit hours per semester and may not exceed 19 credits total between the host and home institutions. More information on how to apply is available at www.alfredstate.edu/transfer-students/cross-registration.

COURSE CANCELLATION POLICY

Alfred State reserves the right to cancel any course without prior notice due to insufficient enrollment or unforeseen circumstances.
STUDENTS UNABLE TO ATTEND CLASSES
1. No person shall be expelled from or be refused admission as a student for the reason that he or she is unable, because of religious beliefs, to attend classes or to participate in any examination, study or work requirements on a particular day or days.
2. Any student who is unable, because of religious beliefs, to attend classes on a particular day or days shall, because of such absence on the particular day or days, be excused from any examination or any study or work requirements.
3. It shall be the responsibility of the faculty and of the administrative officials to make available to each student who is absent from school, because of religious beliefs, an equivalent opportunity to make up any examination, study or work requirements which may have been missed because of such absence on any particular day or days. No fees of any kind shall be charged for making available to the said student such equivalent opportunity.
4. If classes, examinations, study, or work requirements are held on Friday after 4 p.m. or on Saturday, similar or makeup classes, examinations, study or work requirements shall be made available on other days, where it is possible and practicable to do so. No special fees shall be charged to the student for these classes, examinations, study, or work requirements held on other days.
5. In enforcing the provisions of this section, it shall be the duty of the faculty and administration to exercise the fullest measure of good faith. No adverse or prejudicial effects shall result to any students who avail themselves of the provisions of this section.
6. Any student who is aggrieved by the alleged failure of any faculty or administrative officials to comply in good faith with the provisions of this section shall be entitled to maintain an action or proceeding in the county Supreme Court.

LEAVE OF ABSENCE POLICIES
Students who need to interrupt their studies during a semester already in progress or for a future semester can protect their matriculated status by applying for a leave of absence for up to one year. Leaving without officially withdrawing from college may result in the student’s receiving a grade of "F" for all their course work and may result in an academic dismissal.

WITHDRAWALS
Students who need to withdraw from the college before the end of an academic term must officially withdraw from classes. Leaving without officially withdrawing from college will result in the student’s receiving a grade of "F" for all their course work and may result in an academic dismissal.

CURRICULUM CHANGES
Continuing students will use a Degree Program Change Form to switch from one program to another or to include or exclude previously earned credits into a new program. Once the decision has been made to change programs, students must notify both their present department chair and the department chair of the new program. Both department chairs will sign the request and the new department chair will specify which classes to exclude from the new program. Only courses not required in the new program may be excluded. The form must be received and processed by the Student Records and Financial Services Office. Students may not process a curriculum change after the fourth week of classes for the current semester. New students who wish to change their program after applying for admission but prior to enrollment must do so in writing to the Admissions Office.

COURSE AUDITING
Course auditors must secure permission to take a class from the instructor of the class. Approval forms are available from the Student Records and Financial Services Office or can be printed from the portal at my.AlfredState.edu/forms. The approved form must be returned to the Student Records and Financial Services Office before the last day to register.

Course auditors will be permitted to audit courses on a space-available basis. Enrolled students receiving credit will be given priority. Auditors will attend without credit or grade, will attend without formal recognitions, and will not be required to meet the course requirements. Audited courses are not eligible for financial aid. Auditors are responsible for all associated costs of the course. A student may retake such a course for credit in a subsequent semester.

Course auditors who are currently enrolled at the college will not be charged tuition. A nonrefundable $50 registration fee will be charged to auditors who are not enrolled at the college. Special auditors, individuals over the age of 60, are invited to audit classes with no registration fees. Texts and/or class materials are at the expense of the auditor. Contact the Student Records and Financial Services Office for more information.

ADD/DROP
Students wishing to add or drop a course after the start of classes must submit the appropriate Course Change Notice form with the required signatures to the Student Records and Financial Services Office. Courses will not be dropped by simply not attending classes. Additional information may be found on the Course Change Notice form available from the student’s adviser or department chair. If classes are not dropped appropriately, a grade of "F" will be received for the course. Dropping below full-time enrollment may affect current or future financial aid eligibility. Contact the Student Records and Financial Services Office for more information.

STUDENT PORTAL (MY.ALFREDSTATE.EDU)
Students will use the portal to view and update information, as well as perform a number of functions. Functions and information available on the student portal include:

- Register for classes
- View/print student schedules
- Apply to graduate
- Check to see if you have registration holds
- View interim and final grades and academic standing
- View your unofficial academic transcript
- Learn the status of your financial aid award package
- View and update your personal information
- View bill processing information

DEVELOPMENTAL/REMEDIAL COURSES
Per SUNY policy, courses designated developmental/remedial shall not be awarded academic credit (noncredit) and thus cannot be applied as credit toward a college degree. Developmental/remedial courses and grades in such courses are designated with an asterisk (*).
STUDENT DEMOGRAPHIC INFORMATION
Students must update their personal/demographic information electronically via my.AlfredState.edu/registration. This can be done by logging into the portal and selecting “Personal Information”. If the data reflected is accurate, updates need not be submitted. Only inaccurate information should be updated. Information that students should check includes mailing address, telephone number, emergency contact information, and marital status. Students who wish to change their legal name or correct their social security number must present legal documentation to the Student Records and Financial Services Office. Students can add a preferred name by completing the “Preferred First Name Change Request” form available at my.AlfredState.edu/forms.

GRADUATION REQUIREMENTS
Individual programs are listed in the college catalog and these listings include both the general and technical components necessary for completion of degree requirements. All programs must meet the Middle State Commission on Higher Education (MSCHE) General Education requirements and all, except the AOS degree programs, have Alfred State College minimum requirements that must be met in the Liberal Arts and Sciences. Furthermore, with the exception of AOS and AAS degree programs, all programs have specific SUNY General Education requirements. The Alfred State General Education program allows students to develop the competences and skills necessary to become civic minded, globally aware, ethical and productive employees and citizens in today’s world. The program focuses on the MSCHE general education expectations, SUNY General Education requirements, the ASC mission/core values/principles of community, and Institutional Student Learning Outcomes embedded within each degree program. For more information regarding the specific graduation requirements for your program, contact your adviser or department chair. Further information regarding SUNY/ASC General Education requirements as well as the list of courses approved for General Education and a list of courses approved for Liberal Arts and Sciences can be found online.

In addition, all students who plan to graduate must apply for graduation online through BannerWeb or must submit a Degree Application Form to the Student Records and Financial Services Office. Online access and forms are available to all students during restricted times throughout the semester in which they expect to graduate.

Students are expected to meet regularly with their academic advisers who will assist with academic problems and monitor progress toward satisfaction of graduation requirements for the degree. Degree audits can be viewed at my.AlfredState.edu/registration.

It is important for students to know the current graduation requirements for their program. Per Academic Regulation 102, “Each individual student has ultimate responsibility for understanding and adhering to each of these regulations and for meeting the requirements for graduation as stated herein.” Please see Academic Regulation 200 Graduation Requirements for complete information. Further, students who readmit must comply with degree requirements at the time of readmission. Students should direct specific questions to their advisers/department chairs.

The graduation eligibility of expected graduates is checked and finalized by academic departments. Final graduation lists are submitted to the registrar by academic departments per the published End of the Semester Timetable.

ACADEMIC TRANSCRIPTS
Transcript ordering options are available at www.AlfredState.edu/transcript_ordering_options. Alfred State cannot release copies of a student’s transcript from other institutions. These must be requested from the schools previously attended.

VETERANS INFORMATION
If you are eligible for a GI Bill benefit, you should provide the Student Records and Financial Services office with a copy of your Certificate of Eligibility or Statement of Benefits. An enrollment certification will be submitted to the U.S. Department of Veterans Affairs after you provide either of these documents and register for classes. If you have not applied for your GI Bill benefit you should apply on the VA.gov website. If you do not have web access, you can contact the U.S. Dept. of Veterans Affairs at 888-442-4551 for a paper application or complete the application at a VA regional office.

The following procedures to monitor attendance have been approved by the State Education Department Bureau of Veterans' Education:

• Veterans are required to attend classes in order to receive educational benefits.
• Veterans receiving benefits must complete the VA School Certification form each semester they wish to be certified for benefits. Furthermore, veterans must contact the certifying official in the Student Records and Financial Services Office to ensure paperwork is properly completed whenever they add or drop a course, change their major, withdraw from the college, and/or are enrolled in courses that have non-punitive grades (“S” or “U”).

TUTORING SERVICES
Alfred State offers free peer tutoring services for most courses. Peer tutors are students who have earned a grade of “A” or “B” in a course and have received special training.

Professional Writing Tutor
Professional tutoring is available in writing and grammar for any course offered at Alfred State.

Math Lab
Many student proctors and members of the Math and Physics Department volunteer in the math lab.

Professional ESL Tutor
A professional ESL tutor is available on a part-time basis.

ARTICULATION AGREEMENTS
An articulation agreement is a formal agreement between Alfred State and another institution documenting the transfer pathway for a specific degree program. A list of active articulation agreements can be found at www.alfredstate.edu/transfer-students/articulation-agreements.

Note: Alfred State graduates from any two-year associate degree program (AAS, AA, AS, and AOS) may enter directly into the corresponding baccalaureate degree program.

DEAN’S LIST
To be named to the semester dean’s list, a student must have taken a minimum of 12 credit hours of course work and have earned at least 3.5 semester index.
HONOR SOCIETIES

CHI ALPHA EPSILON NATIONAL HONOR SOCIETY
Chi Alpha Epsilon (XAE) is a national honor society with membership offered through local campus chapters to eligible students. Full-time students who hold a 3.0 cumulative GPA for two consecutive semesters and who were admitted to the college through developmental / opportunity programs are eligible for membership.

MU ALPHA THETA NATIONAL HONOR SOCIETY
Mu Alpha Theta is a National High School and Two-Year College Mathematics Honor Society dedicated to inspiring a keen interest in mathematics, developing strong scholarship in the subject, and promoting the enjoyment of mathematics in high school and two-year college students.

PHI KAPPA PHI NATIONAL HONOR SOCIETY
Phi Kappa Phi is the nation’s oldest and most selective multidisciplinary collegiate honor society initiating more than 30,000 members a year on 300 campuses in the United States and the Philippines. More than 1.25 million members have joined its ranks since Phi Kappa Phi’s founding in 1897 at the University of Maine. It is a global network of the best and brightest, a community of scholars and professionals building an enduring legacy for all generations. Phi Kappa Phi membership is earned. Admission is invitation-only and requires nomination approval by a chapter. Phi Kappa Phi recognizes and promotes academic excellence in all fields of higher education and engages the community of scholars in service to others.

PHI THETA KAPPA INTERNATIONAL HONOR SOCIETY
Phi Theta Kappa Society is the only international honor society serving two-year colleges. It was founded in 1918 and has more than 1,275 chapters worldwide. Alfred State’s chapter was chartered in spring 1991. The goal of Phi Theta Kappa is to recognize and encourage scholarship among associate degree students by providing opportunities for leadership, fellowship, and service. To qualify for membership in this international honor society, candidates must have earned at least 24 semester hours of credit at Alfred State maintaining a GPA of 3.5 or above, or a student must have earned at least 12 semester hours of credit at Alfred State maintaining a GPA of 3.75 or above.

PSI BETA NATIONAL HONOR SOCIETY
Since 1987, Alfred State has been a charter member of Psi Beta, the National Honor Society in Psychology for Community and Junior Colleges. Annually, the Alfred State Department of Social and Behavioral Sciences has inducted members into this society, which includes more than 140 chapters and 12,000 members nationwide.

To be eligible, candidates must possess both an interest in and have completed nine credit hours in psychology (taken at Alfred State). They must also possess a 3.0 GPA in these courses and a 3.0 GPA overall. In addition, they must also have the recommendation of a Social and Behavioral Sciences faculty member. If the inductee is transferring to a four-year college that has a sister chapter of Psi Chi, the member is usually enrolled in that society with only a letter of introduction from the Psi Beta adviser.

RHO ALPHA SIGMA NATIONAL HONOR SOCIETY
The National Residence Assistant Honor Society exists to recognize the outstanding efforts and achievements of the student Resident Assistant staff that go above and beyond an institution’s expectations. The Greek letters for Rho Alpha Sigma were chosen to correspond to Residence Advisor/Assistant Service. Rho Alpha Sigma offers the opportunity to promote excellence, leadership, community and service within the Resident Advisor cadre, campus, and community. SALUTE Veterans National Honor Society

SALUTE VETERANS NATIONAL HONOR SOCIETY
SALUTE is the first national honor society established for student veterans and military members in 2-year and 4-year institutions of higher education. The SALUTE acronym stands for service, academics, leadership, unity, tribute and excellence. It creates the foundation for the SALUTE honor society. SALUTE recognizes the hard work and dedication of those students. Students inducted into SALUTE are from every branch of the armed forces, veterans and active, who are excelling in higher education.

SIGMA ALPHA PI NATIONAL HONOR SOCIETY
Founded with a passion for building leaders who make a better world, Sigma Alpha Pi — primarily known as the National Society of Leadership and Success (NSLS) — is the nation’s largest leadership honor society. The Greek letters of Sigma Alpha Pi (#A#) stand for Success, Action and Purpose — Success coming from continual Action towards one’s Purpose. While Sigma Alpha Pi (NSLS) uses Greek letters to represent itself, it’s not affiliated with Greek life. Students are selected by their college for membership based on either academic standing or leadership potential.

SIGMA LAMBDA CHI INTERNATIONAL HONOR SOCIETY
Sigma Lambda Chi International Honor Society provides recognition to outstanding students in 4-year and graduate construction management curricula. Membership is offered to students that have completed two years of college, who rank academically in the upper 20% of their program, have a minimum of one season of construction industry experience, and participate in extracurricular activities at their campus.

SIGMA TAU EPSILON NATIONAL HONOR SOCIETY
To qualify for membership in this scholastic honor society, a chapter of the National Vocational Technical Honor Society, a person must be a full-time student with a 3.5 cumulative index and be enrolled in an applied technology program. Students are elected by members of the society.

TAU ALPHA PI NATIONAL HONOR SOCIETY
The Tau Alpha Pi National Honor Society was founded in 1953 and is now chartered at 133 colleges and universities. Its purpose is to recognize desirable personal and intellectual qualities of engineering technology students. Student nominees must have 30 credit hours with at least a 3.5 quality point average index in an Engineering Technology Accreditation Commission of the Accreditation Board for Engineering and Technology (ETAC/ABET) accredited program.

ROTC
The US Army ROTC program at Alfred State is an affiliate of the Seneca Battalion program headquartered at nearby St. Bonaventure University.

TRANSFER CREDIT:
The transfer credit procedure is initiated in the Student Records and Financial Services Office under the coordination of the Transfer Advisor. Courses completed at an accredited institution recognized by the Department of Education and that can be applied toward graduation requirements at Alfred State will be reviewed for transfer approval by the department chair in which the course resides. Students are notified of their approved transfer credit through their Alfred State
email account once they have been accepted for admission and an official college transcript is reviewed. More information on transfer credit is available at www.alfredstate.edu/transfer-students/transfer-credit.
ACADEMIC DEPARTMENTS BY SCHOOL

School of Arts and Sciences
- Agriculture and Veterinary Technology
- Allied Health
- English and Humanities
- Individual Studies
- Mathematics & Physics
- Nursing
- Physical and Life Sciences
- Social and Behavioral Sciences

School of Architecture, Management & Engineering Technology
- Architecture and Design
- Business
- Civil Engineering Technology
- Computer and Information Technology
- Digital Media and Animation
- Mechanical and Electrical Engineering Technology

School of Applied Technology
- Automotive Trades
- Building Trades
- Culinary Arts
- Electrical, Machine Tool, and Welding Technology

Feel free to contact the department chair, program coordinator, or the dean's office at any one of our three schools if you have additional questions regarding academic programs.
Agriculture students participate in hands-on experiences working with crops, plants, animals, facilities, and equipment. Graduates leave our programs with a true feel for the industry they plan to enter. Veterinary technology students are prepared to sit for the Veterinary Technology National Exam (VTNE) through intensive lecture and laboratory courses. Passage of this exam is required for licensure as a veterinary technician. Veterinary technology students are also required to complete a 240-hour preceptorship (work experience), which gives them real, practical experience between completing their first year and graduation. Students have many opportunities to help tell the story of agriculture at college-hosted events for elementary and high school students, educators, and the general public. Through the agricultural and veterinary technology clubs, students help organize dairy and livestock shows, consignment sales, judging competitions, agricultural skills contests, tours, and other educational events.

MISSION
The Department of Agriculture and Veterinary Technology will facilitate learning and engage communities in the practices of sustainable food production and animal welfare. We will develop graduates who will sustainably and profitably manage animals and natural resources for a secure society.

FACILITIES
• Agriculture Science Building – This facility contains laboratories specializing in soils, botany, and animal anatomy and physiology. A 5,300-square-foot greenhouse produces hydroponic vegetables, and herbs and contains a tropical room, desert room, and plant propagation areas.
• 800-acre college farm – The farm serves as a field laboratory to provide practical instruction in production agriculture and to produce feed for the college’s livestock. It is home to registered dairy and beef herds, horses, swine, poultry, sheep, and meat goats used for instruction in animal care and management. The farm is also used for soils, botany, feeds, and nutrition, and field and forage crops classes. Students have the opportunity to work on the farm as interns. Other facilities there focus on high-tunnel vegetable production, row crop production, and agroforestry practices.
• Center for Organic and Sustainable Agriculture (COSA) – The center, located at the college farm, features an organic dairy herd with which students gain experience in management intensive grazing and a robotic milking system. Other facilities include a 300-acre farm in Sonyea, where we produce forages.
• Veterinary Technology Center – This state-of-the-art facility includes surgical and radiography laboratories, a classroom area for Introduction to veterinary technology, animal health care and laboratory animal management laboratories, and animal housing facilities.

DEPARTMENT PROGRAMS
Agricultural Automation and Robotics (AAS)
Agricultural Business (AAS)
Agricultural Entrepreneurship (BTech)
Agricultural Technology (AAS)
Veterinary Technology (AAS)
The Allied Health Department at Alfred State provides students with a strong education in a wide range of allied health disciplines through online and on-campus curricular offerings. Allied Health consists of a diverse range of specialized occupations that fall outside the traditional medical and healthcare professions like doctors, nurses, and dentists. Some careers involve direct care of patients, usually as a member of a multidisciplinary healthcare team, and others involve office work and administration. The faculty and staff bring a plethora of industry experience from laboratories and healthcare settings to their work with students. They share the common goal of effectively delivering the practical and theoretical foundations of disciplines through a rich blend of interactive lectures, informal discussion, meaningful laboratory inquiries, and professional practice or clinical experiences. The department offers students direct use of modern laboratory/clinical equipment in real-world or simulated settings and provides the highest-level virtual laboratory experiences.

**MISSION**

Through rigorous course work, exposure to state-of-the-art equipment, and professional practice and clinical experiences, the Allied Health Department prepares students for employment or continuing education in the technical areas of healthcare.

**FACILITIES**

**Physical & Health Sciences Building** – The Allied Health Department is partially located in the recently renovated PHS Building. Four science-ready lecture rooms are on the first floor with eight laboratories found on the second and third floors. The laboratories are outfitted with state-of-the-art equipment and instrumentation, anatomic models, and the latest application software for teaching and learning.

**Agriculture Science Building** – There are two programs located in the Bethesda Foundation Imaging Suite on the third floor. The radiologic technology program laboratories are equipped with a nonenergized X-ray unit for students to learn proper patient positioning and a digital energized X-ray unit for students to acquire proper imaging skills and shielding with skeletons and pixies. The diagnostic medical sonography program's laboratory has three ultrasound units for students to obtain competency in effective scanning. Students also have access to ultrasound pathology simulation utilizing SonoSym.

The healthcare management and health information technology curricula are completely online programs.

**DEPARTMENT PROGRAMS**

- **Computed Tomography** (Certificate)
- **Diagnostic Medical Sonography** (AAS)
- **Health Information Technology** (AAS)
- **Healthcare Management** (BTech)
- **Magnetic Resonance Imaging** (Certificate)
- **Radiologic Technology** (AAS)
The Department of Architecture + Design offers a five-year first-professional Bachelor of Architecture degree (BArch) degree, a four-year Bachelor of Science degree in architectural technology, and a two-year Associate in Applied Science degree in architectural technology. These degrees are designed to serve various professional objectives for graduates entering the practice and profession of architecture. The BArch degree is the only fully accredited first professional undergraduate degree program available in the SUNY system.

The department also offers a two-year Associate of Applied Science degree in interior design which provides graduates with fundamental knowledge and skills for entry-level positions in interior design.

The department emphasizes socially responsible design for the social good. This mission is enthusiastically supported by the faculty and the students.

The primary focus of our faculty is teaching – personal instruction that makes meaningful life-long connection with students – that has a powerful professional impact. Instructors bring a diverse blend of advanced architectural education, theoretical inquiry, practical experience, and professional credentials into the studio, making our faculty uniquely qualified to mentor students in design thinking, development, and production.

All aspects of design, building technology, social responsibility, and sustainability are integrated into the program through design studios which focus on the critical examination of the built environment and the role of the architect and designer as an agent of positive change. Students engage tectonic explorations alongside Building Information Modeling software which is situated within a broader digital fabrication continuum. This multi-faceted approach encourages students to create inspiring designs that are grounded in the realities of professional practice, better preparing graduates for the demands of the profession and workplace.

An Alfred State architectural education is a powerful platform upon which to build a career. Our students participate in hands-on opportunities to examine the regional built environment and learn through civic engagement projects in each design studio, which is the cornerstone of the Alfred State experience. Students explore their social responsibility as emerging professionals – to make the world a better place through design and professional conduct – in real-world environments from rural communities in New York’s Southern Tier, across the region and the world including the department’s signature study abroad program in Sorrento, Italy.

MISSION

The Alfred State architecture experience goes beyond the design studio - cultivating engaged and collaborative life-long learners who build meaningful connections with the dynamic regional, national and global communities that surround us. Students develop into emerging professionals through a carefully planned sequence of applied learning and civic engagement experiences, and apply sustainable solutions to address social and environmental challenges using integrated and innovative digital and building technologies.

FEATURES & FACILITIES

Most departmental facilities, workshops, the MakerSpace, and all design studios are accessible 24 hours a day by secure swipcard for student convenience. Each design studio is laptop-ready, and has customizable work stations. Studios also have networked printers, desktop scanners, white marker boards, floor-to-ceiling wallmounted pin-up/display panels, flat file storage, model storage, and high-resolution digital projectors. Students also have access to the department’s MakerSpace, digital fabrication lab, Center for Architecture and Remote Sensing, interior design product library, computer lab, and architecture library, in addition to the plotter room; HOPR, and soils, concrete, and material testing lab, which is maintained by another department within the school.

Please note: All students in both the architecture and interior design programs are required to purchase a computer before the beginning of the second year in addition to other equipment. Typically the costs of these purchases can be covered using financial aid. Please consult a financial aid counselor for further details.

Laptop specifications are available at http://www.alfredstate.edu/required-laptops.

DEPARTMENT PROGRAMS

Architecture (BArch)
Architectural Technology (AAS)
Architectural Technology (BS)
Interior Design (AAS)
Today, more than ever, the highly skilled automotive service technician has an increasingly important role in the efficient operation of our society. The four automotive trades areas offered by the Automotive Trades Department—automotive service technician; heavy equipment, truck & diesel technician; autobody repair; and motorsports technology—prepare technicians for the ever-expanding and highly specialized trade industry.

All programs meet stringent national standards. The automotive service technician program is master certified by the National Automotive Training Educational Foundation (NATEF); the autobody repair program is Inter-Industry Conference on Automotive Collision Repair (ICAR) certified; and the heavy equipment, truck & diesel technician program is ADS affiliated, and we are a National Alternative Fuels Training Consortium training center. Automotive Service Excellence (ASE) certification and NYS inspection exams are offered on campus as well.

MISSION
Provide instruction and practical, hands-on experience, to students interested in a variety of automotive trades, including automotive service, autobody repair, truck and diesel service, and motorsports. The education acquired will prepare the student for entry-level employment. Students will be provided opportunities to maximize their individual potential and achieve a level of competence adequate to enter the automotive field and maintain gainful employment. In addition to hands-on skills, attitudes will be developed that will help enforce sound judgment, good work habits, planning and foresight, ingenuity, efficiency, and safety as they apply to the duties and skills of the trade. We will nurture an appreciation of and a desire for craftsmanship and professionalism. We will strive to instill positive attitudes of community and leadership that will carry beyond the workplace and help our students to live productively and successfully in today’s society.

FACILITIES
- **Autobody facility** – This facility on the Wellsville campus contains down-draft bake-paint booths, paint mixing room, frame-straightening machines, computerized estimating, and computerized measuring systems.
- **Automotive service facilities** – These buildings, located on the Wellsville campus, contain the latest equipment, including computerized front-end aligners, brake equipment, computerized engine analyzers, automatic transmission dynamometer and computer specification and service information terminals in all shops.
- **Heavy equipment, truck & diesel facility** – This facility, located on the Wellsville campus, is equipped with: specialized fuel injection overhauling and test lab; engine rebuilding equipment; multispeed transmission and rear axle repair area; engine tune-up area containing computer-operated late model diesel engines; handheld diagnostic scanners; and computerized specifications and service information systems.
- **Motorsports facility** – Students perform extensive hands-on work in a newly remodeled, newly equipped facility located in the village of Alfred. First-year courses are taught at the School of Applied Technology campus in Wellsville.

TECHNICAL STANDARDS
Applicants for all programs in the Automotive Trades Department must meet the following physical requirements:

1. Must be able to lift 50 pounds to eye level.
2. Must be able to effectively communicate with a person six (6) to ten (10) feet away.
3. Must be able to visually decipher small images on a monitor or digital display.
4. Must be able to distinguish sounds associated with mechanical failures.
5. Must be able to comprehend written information found in service repair manuals.
6. Must have a valid motor vehicle driver's license.

DEPARTMENT PROGRAMS
- **Autobody Repair (AOS)**
- **Automotive Service Technician (AOS)**
- **Heavy Equipment, Truck & Diesel Technician (AOS)**
- **Motorsports Technology (AOS)**

REQUIRED TOOLS/EQUIPMENT
A list of required tools, equipment, PPE, etc. for all of the programs mentioned above can be found at: [www.alfredstate.edu/tool-lists](http://www.alfredstate.edu/tool-lists).
The Building Trades Department is composed of four programs: building construction; heavy equipment operations; masonry; and heating, ventilation, and air conditioning. Rewarding careers in the construction industry are open to students graduating from the building trades programs. With the continual development of new building methods and materials, the craftsperson finds it necessary to keep abreast of these developments. Construction, as in many other occupations, is becoming a field of specialists. Coupled with hands-on experience working at off-campus construction sites, the programs provide the necessary theory as well as instruction in blueprint reading, cost and materials, estimating, safety, and the use of newly developed equipment and materials.

MISSION
Educate students to meet the changing needs of the construction industry by using real-world projects and utilizing the most up-to-date equipment, systems, and materials. We strive to improve the lives of our graduates by incorporating work ethics, communication skills, and developing leadership as part of their training.

FACILITIES
The 30,000-square-foot Workforce Development Center serves as a resource for each of the four programs within the Building Trades Department and was built specifically to support the construction industry demand for Alfred State's skilled trade graduates. Enhancing the facility are student learning projects and hands-on applications of student work that have been integrated as part of the facility. These projects serve as a showpiece and testimonial to the high level of education students receive. The program serves students with nearly every power and hand construction tool available to instruct students in every phase of the construction trade. All students participate in off-campus construction of full-scale homes and building renovations each year. This experience provides graduates with significant real-world training to apply concepts learned in the classroom.

TECHNICAL STANDARDS
Applicants in the Building Trades Department programs must be able to meet the following physical requirements:

1. Must be able to lift 50 pounds to shoulder height.
2. Must be able to perform safely in the laboratory.
3. Must be able to effectively communicate with a person 20 feet away.
4. Must be able to climb a ladder and/or able to climb, un-aided, onto and off equipment using three points of contact.
5. Must be able to safely respond to a backup warning alarm.

REQUIRED TOOLS/EQUIPMENT
A list of required tools, equipment, PPE, etc. for all of the programs mentioned above can be found at http://www.alfredstate.edu/tool-lists.

DEPARTMENT PROGRAMS
Building Trades: Building Construction (AOS)
Heating, Ventilation, and Air Conditioning (AOS)
Heavy Equipment Operations (AOS)
Masonry (AOS)
The department offers 10 programs for students desiring immediate employment, wishing to pursue a four-year degree, or looking to continue on with graduate studies. Courses during the first year in virtually all business programs are almost identical. This core block of courses enables students, during freshman year, to easily transfer from one business program to another with no loss of academic credit. Students may enter the programs in either the fall or spring semesters.

Technical accounting knowledge, communication and interpersonal skills, and career-related computer literacy are stressed throughout the programs. Many associate degree graduates go on to pursue bachelor’s degrees in business or business education, while graduates of the Bachelor of Business Administration (BBA) programs often go on to pursue master’s degrees. Students completing virtually any Business Department two-year degree may easily transfer into one of our own bachelor’s degree programs. Students in technology management, financial planning, or sport management (BBA) programs also have the advantage of participating in a semester-long, 12-credit internship during their last semester.

The Business Department at SUNY College of Technology at Alfred has received specialized accreditation for its business programs through the International Accreditation Council for Business Education (IACBE) located at 11374 Strang Line Road in Lenexa, KS, USA. [https://iacbe.org/memberpdf/SUNYAlfredStateCollege.pdf](https://iacbe.org/memberpdf/SUNYAlfredStateCollege.pdf).

MISSION

Our faculty employ their real-world experiences to lead, motivate, and empower students to succeed in all aspects of business and life, and to positively impact their communities, as well as their respective disciplines.

FACILITIES

- **High-tech classrooms** – These settings are equipped with up-to-date electronic equipment. Computer technology has been integrated into course content.
- **Court and realtime reporting laboratory** – This lab is equipped with computer-aided translation equipment at every student work station. All students receive hands-on instruction using computer-aided translation (CAT) equipment. This real-time translation skill enables the graduate to take advantage of closed-captioning employment opportunities.

DEPARTMENT PROGRAMS

- Accounting (AAS)
- Business Administration (AS)
- Business Administration (BBA)
- Court and Realtime Reporting (AAS)
- Court Reporting and Captioning (Certificate)
- Financial Planning (BBA)
- Marketing (AAS)
- Sport Management (AS)
- Sport Management (BBA)
- Technology Management (BBA)
Civil Engineering Technology

Erin Vitale, Chair
Phone: 607-587-4612
Fax: 607-587-4620
Administrative Assistant Phone: 607-587-4617
Email: vitaleem@alfredstate.edu

The Civil Engineering Technology Department offers a bachelor’s degree program in construction management, a Bachelor of Technology degree program in construction supervision, as well as an associate degree program in construction engineering technology. Additionally, it offers an associate in surveying engineering technology and a bachelor’s in surveying and geomatics engineering technology.

MISSION
Provide graduates with the skills necessary to have a successful career in their chosen field, have a better understanding of the world we live in, and improve their own lives.

FACILITIES

- **Joe Laraiso Construction & Geomatics Lab** – This state of the art software lab is equipped with 20 computer work stations arranged in a true team environment to enhance our project based learning. Construction students use estimating, scheduling and project administration software in conjunction with real plans and specifications, performing tasks required on jobsites. The lab is also conducive to Lean Last Planner System planning. Surveying & Geomatics students have access to full-scale Carlson software to perform industry standard mapping tasks. All civil engineering technology department students benefit from AutoCAD and Revit software to create 2D and 3D models of sites and the built environment.

- **Doc Bruce Construction Materials Lab** – This lab provides a meaningful experience in laboratory and field testing of various construction materials and structural systems. The equipment enables students to learn procedures that meet recognized field testing procedures of the American Concrete Institute (ACI), the American Society for Testing and Materials (ASTM), and NYS Asphalt Testing Certification.

- **The National Fuel Construction Management Student Conference Room** - Student conference room for group work on project based learning activities. This room is equipped with large format wall monitor, wifi, and whiteboard to facilitate group work. In addition, it is available for employers to conduct interviews and students participate in virtual interviews with employers.

- **Surveying Computations Laboratory** – The surveying computations lab contains work stations, digitizers, and overhead projection systems. It is designed to support the 'field-to-finish' concept of surveying data collection, data reduction, and analysis, as well as computer-aided drafting and design. Students use this facility to work with land development and design software, geographic information system software, and the reduction of satellite data. This lab enables students to do word processing, spreadsheet analysis, programming, data analysis, networked computer-aided design and drafting, and advanced 3-D modeling.

- **Surveying Laboratory and Equipment Room** – The surveying lab serves as the basic laboratory/lecture area for surveying field/design projects. Adjacent to this lab is the room housing a myriad of equipment, including electronic total stations, global positioning satellite equipment, theodolites, transit, and levels.

**Please note:** Students are required to have laptops. The laptops allow students wireless access to the college network from any location on campus. [https://www.alfredstate.edu/required-laptops](https://www.alfredstate.edu/required-laptops)

- **Construction Management** (BS)
- **Construction Supervision** (BTech)
- **Surveying Engineering Technology** (AAS)
- **Surveying and Geomatics Engineering Technology** (BS)
Computer and Information Technology

Evan Enke, Chair
Phone: 607-587-3419
Administrative Assistant Phone: 607-587-4696
Email: enkeeg@alfredstate.edu

The Computer and Information Technology Department offers associate degrees in computer information systems and computer science. Students who earn the computer information systems degree may continue in any of the department's four Bachelor of Technology (BTech) degree programs. The computer science degree program is primarily designed to allow students to transfer into a college that offers a Bachelor of Science degree program in computer science; however, after completing their first year of study, computer science students have the opportunity to transfer into either our computer information systems AAS degree or one of our four BTech degrees.

The department offers four Bachelor of Technology degree programs in network administration, applications software development, web development, and cyber security. Students may enter these programs as freshmen or transfer in as juniors from related associate degree programs. Articulation agreements have been developed with several community colleges to facilitate transfers. All of our degree programs provide our students with a solid foundation in the four core areas of information technology: application programming, web programming, network administration, and information security. At the end of their sophomore year, students are then allowed to select the BTech degree that best matches their academic interests. Our degrees incorporate the latest technology, including mobile application development, secure software development, life cycle processes, cloud computing, wireless networking, and neural programming. Our programs also stress the soft skills necessary in the working environment by requiring students to take courses in business management, technical writing, speech, business communications, project management, and business accounting.

MISSION

To provide a technical and professional education is provided with dynamic, up-to-date topics and prepare graduates to meet the needs of an increasingly technologically society. Our programs also stress the related skills necessary in the working environment by requiring students to take courses in business management, technical writing, speech, business communications, project management, and business accounting.

Brief Overview

The Computer and Information Technology Department offers two associate degrees and four Bachelor of Technology (BTech) degrees. The Computer Science AS program is designed to lead into one of the Electrical engineering technology programs or into one of the four Computer and Information Technology BTech programs with minimal additional courses. The Computer Information Systems AAS degree transfers flawlessly into our BTech degrees. The four Bachelor of Technology degree programs include Network Administration, Application Software Development, Web Development, and Cyber Security. Students who pursue a BTech degree are encouraged to earn a minor. The decision of what minor to take can include any that Alfred State offers or take one of the minors that the Computer and Information Technology Department has to offer: Network Administration, Application Software Development, Web Development, and Cyber Security.

FACILITIES

• Laboratories - Students are allowed 24-hour access to department laboratories.
  o The application software network and web development labs have 12 CISCO Routers and 12 CISCO Switches along with state-of-the-art computer workstations. Both labs have access to our server farm running a VMware operating system in which we can run hundreds of windows and Linux machines. Students also have access to the Netlab software which supports lab activities to learn many of the CompTIA disciplines, VMware software, Palo-Alto, Juniper, and open-source software.
  o The Cyber Security lab has a dedicated servers and a server farm of its own to practice hackers and admins and other cyber security disciplines. The room also features computer work stations and two high quality wall mounted monitors for use in practicing and researching cyber security.

• Software, certifications, licenses, etc. - The college has academic licenses for VMWare software products, all Microsoft software, a blade server with 128 gigabytes of RAM and a 12-terabyte storage array, a Cisco Certified Academy, three Cisco-certified instructors, Cisco Adaptive Security firewalls, Juniper application firewalls, Juniper routers, Juniper SSL VPN concentrators and an Oracle blade server, a certified Juniper academy and VMWare IT academy, an academic license with Oracle, Adobe Creative Suite 6.0, a dedicated systems lab used for microcomputer configuration, and a Pearson VUE, Prometric and Certified Internet Web Professional certification testing center.

Academies and Other Academic Sources

The department has access to several academies that the students can explore including CISCO, Palo-Alto Security, Juniper, VMware, and open-source. Alfred State has the only student community for Palo-Alto: Fuel Palo-Alto networks.

The Computer and Information Technology Department maintains several professional affiliations including the Association of Computerized Machinery (ACM), the National Support Center for Systems Security and Information Assurance (CSSIA), the Center for Infrastructure Assurance and Security (CIAS), Northeast Collegiate Cyber Defense League (NECCDL), and more.

Certifications

The department highly encourages and supports students to obtain professional certifications through an industry sponsored exams. In addition to course work, the Department sponsors courses which prepare candidates to be successful.

The Alfred State Certification Center is open for students to sit for their certification exam. The Center hosts all the Pearson Vue tests and Prometric: Automotive Service of Excellence. The student has access through Alfred State College to have a discount on CompTIA study material, practice tests and certification tests and includes A+, Sec+ and Network+.

Please note: All entering students must purchase a windows laptop computer. All the Computer Information and Technology disciplines are all Microsoft based. Apple computers are highly encouraged in this department.
DEPARTMENT PROGRAMS

- Computer Information Systems (AAS)
- Computer Science (AS)
- Cyber Security (BTech)
- Information Technology: Applications Software Development (BTech)
- Information Technology: Network Administration (BTech)
- Information Technology: Web Development (BTech)
The culinary industry offers a wide range of career opportunities; the list is endless, from health care to management positions in large companies. The department includes two programs: culinary arts - focusing on food production and management and baking, production and management - focusing on retail baking production. The department also offers a three-year dual degree program, along with an opportunity to obtain a baccalaureate degree in technology management in the following two years.

MISSION
The Culinary Arts Department is focused on developing skills needed for competent culinary professionals for an evolving industry.

TECHNICAL STANDARDS
Applicants to the Culinary Arts Department programs must meet the following curriculum requirements:

1. Perform all lab functions.
2. Capability to lift 50 pounds.
3. Identify degree of product doneness.
4. Operate all kitchen equipment, including knives.

REQUIRED TOOLS/EQUIPMENT
A list of required tools, equipment, PPE, etc. for all of the programs mentioned above can be found at www.alfredstate.edu/tool-lists.

FACILITIES
- **Production lab** – This lab gives students the opportunity to learn quantity food production and service through the preparation and service of 700 institutional meals for customers daily.
- **The Refinery Restaurant lab** – A well-equipped dining room and kitchen, this lab has virtually all the equipment used in commercial restaurants. Students prepare and serve meals to order for patrons daily.
- **Bakery lab** – This is reputed to be the best-equipped training facility of its kind in the state. The student has access to many types of baking equipment used commercially to produce baked goods for the Wellsville campus student dining hall (The Rig) and The Refinery Restaurant. Students produce baked goods in freshman and senior labs, which are sold and served to many. In addition, the preparation and presentation of elaborate creations, common in upscale restaurants, offers students the opportunity to develop their talents.

DIGITAL MEDIA & ANIMATION

Digital Media and Animation
Tammy Brackett, Chair
Phone: 607-587-4659
Administrative Assistant Phone: 607-587-4696
Email: bracketr@alfredstate.edu

The Digital Media and Animation Department offers Associate of Applied Science and Bachelor of Science degrees in digital media and animation, Associate of Science and Bachelor of Science degrees in graphic and media design, and Associate of Science and Bachelor of Science degrees in game and interactive design.

MISSION
Prepares graduates for immediate employment or continued educational opportunities in a range of design and technology-related disciplines. The department provides quality technical education that integrates theory and practice with a foundation in the arts and sciences.

FACILITIES
• Studios – Students in DMA programs have access to a large traditional studio space for foundations in traditional materials, figure drawing, and 2D and 3D design. They also have access to a highly sophisticated computer lab that provides industry-standard capability in 2D graphics, web design, interactive media, motion graphics, 2D and 3D animation, screen printing, large format printing, laser engraving/cutting, and 3D printing. Students enrolled in a DMA degree program have 24-hour access to these studios.
• Video and sound production studio – This studio contains industry-standard hardware and software.
• Virtual reality and 3D sculpting studio – This studio utilizes the latest virtual reality technology for interactive design and 3D modeling.
• Other equipment and software – Digital cameras, production light kits, microphones, digital audio recorders, HD video cameras, drawing tablets, and other pieces of high-end equipment are available for students to sign out.

Please note: All entering students in the Digital Media and Animation Department programs are required to purchase a laptop computer. www.alfredstate.edu/required-laptops

From electrical contractors to welders and machine tool operators, Alfred State offers a variety of programs that prepare students to launch careers in high-demand professions. Each program provides 1,800 hours of related course work, theory, and hands-on practice, providing graduates with the necessary skills to be successful in these dynamic fields.

ELECTRICAL CONSTRUCTION & MAINTENANCE ELECTRICIAN PROGRAM

The hands-on electrical training provided in the first year consists of actual wiring projects off campus, as well as residential wiring projects in our laboratories. Our senior electrical students receive real-life experiences working with the campus maintenance department, troubleshoot campus equipment, rewire existing facilities, and designing and installing the electrical systems in the new facilities. Seniors will also design and install photovoltaic systems and wind turbine systems. They will work in the laboratories designing and installing automated projects (incorporating relay logic), PLCs, pneumatics, hydraulics, process control systems, three-phase transformer systems, industrial distribution, and motor theory and repair. All of the freshmen and senior students will utilize the National Electrical Code.

MISSION FOR ELECTRICAL CONSTRUCTION & MAINTENANCE ELECTRICIAN

Educate and instill in our students within a two-year time frame all of the information necessary to be successful in the electrical trades. This includes interpreting and understanding the National Electrical Code, electrical theory, mathematics, electrical nomenclature, wiring methods, and troubleshooting as it applies to residential, commercial, industrial wiring, and sustainable electrical systems. This also includes the necessity to work safely, be responsible, be dependable, and take pride in their craftsmanship.

TECHNICAL STANDARDS FOR THE ELECTRICAL CONSTRUCTION & MAINTENANCE ELECTRICIAN PROGRAM

Math sequence I & II recommended for all programs, plus the following requirements:

1. Must be able to visually translate information on analog or digital meters and other test equipment.
2. Must be able to lift 50 pounds to eye level.
3. Must be able to communicate orally with a person 6 to 10 feet away.
4. Must be able to read and decipher information found in technical manuals.
5. Must be able to adhere to and perform all safety requirements.

MISSION FOR WELDING AND CNC MANUFACTURING & MACHINING TECHNICIANS

Strive to provide employers with entry-level technicians who are capable of functioning in and adapting to a rapidly changing environment.

TECHNICAL STANDARDS FOR WELDING & CNC MANUFACTURING & MACHINING PROGRAMS

1. Must be able to perform safely in the shop.
2. Must be able to lift 50 pounds to eye level.
3. Must be able to communicate orally with a person between 6 and 10 feet away in a shop environment.
4. Must be able to visually decipher an oscilloscope monitor and digital/analog meter, and scan tool displays.
5. Must be able to diagnose mechanical failures that are distinguished audibly.
6. Must be able to understand and retain information found in service manuals and use diagnostic flow charts.
7. Must be able to visually read an LCD display on welding equipment.
8. Must have dexterity and mobility to weld in all the welding positions to meet all requirements.
9. Good eyesight is recommended.
10. Must be able to stand for long periods of time.

DEPARTMENT FACILITIES

- **Electrical Trades Labs** - Our electrical trades laboratories are well equipped with the latest in electrical test equipment. Students will facilitate learning by direct hands-on applications of the theory, knowledge, and skills presented in lecture. In this program, approximately 50 percent or more of each day is spent working hands on in the laboratory or at a job site. Computer technology has been integrated into all of the courses.
- **Machine Tool/Manufacturing Labs** - The first-year lab is equipped with lathes, mills, shapers, grinders, etc., and appropriate tools acquired from a $1 million grant from the Gleason Foundation. In the second year of the CNC Manufacturing and Machining program, learning takes place in a state-of-the-art laboratory, where students are instructed in the use of multiple CNC machines that expand their experience to best prepare them for the manufacturing shop environment.
- **Sustainable Advanced Manufacturing Center** - This $5 million, 16,000 square-foot facility houses freshman and senior welding students and senior CNC Manufacturing and Machining students, who train for in-demand jobs, while learning state-of-the-art sustainable practices in advanced manufacturing through more efficient processes. The building includes classrooms, a computer lab, a welding booth shop, a welding fabrication shop, material handling and preparation space, a CNC machine shop, and metrology and inspection space.

REQUIRED TOOLS/EQUIPMENT

A list of required tools, equipment, PPE, etc. for all of the programs mentioned above can be found at [www.alfredstate.edu/tool-lists](http://www.alfredstate.edu/tool-lists).

DEPARTMENT PROGRAMS

- Electrical Construction and Maintenance Electrician (AOS)
- CNC Manufacturing and Machining (AOS)
- Welding Technology (AOS)
The English and Humanities Department offers courses in composition, foreign language, fine art, speech, philosophy, and literature for the entire college. Colleges, universities, and large corporations have been increasingly emphasizing the significance of a liberal arts and sciences education in providing a solid foundation upon which careers are built. The liberal arts and sciences: humanities program prepares students for life by stressing the importance of reading, writing, and thinking, while developing in them an appreciation of the arts and of the wisdom of great minds.

MISSION
Instruct students in written and oral communication and impart an appreciation and understanding of the humanities and their role in the life of human beings living in a diverse world.

FACILITIES
The department is housed in the Hunter Student Development Center, where mathematics, computer, and study skills labs, as well as classrooms are equipped with the most recent technological teaching aids.

DEPARTMENT PROGRAMS
Liberal Arts and Sciences: Humanities (AA)
MISSION STATEMENT

The individual studies associate’s degree, offered on campus or online, provides an opportunity to earn the degree, explore majors, career options, and futures. It is also excellent preparation for transfer into four-year programs or various colleges and universities, and can be tailored to fulfill a career goal that cannot be met by traditional programs offerings.

The Individual Studies Department offers curriculums that allow students to explore majors, and career options and create a specialized degree program. The department houses three curricula: individual studies (AS), interdisciplinary studies (BTech) and the undeclared major.

The undeclared major gives students the opportunity to try different options and select a course of study the first two semesters that fits students’ individual interests and background. Along the way, students take advantage of extensive support services, including career planning and counseling, offered by caring faculty and staff throughout the program. Students enrolled in the undeclared major must transfer to a degree-granting program within two semesters. The program includes both a component of core courses and a component of elective courses.

The individual studies program, offered on campus or online, gives students the opportunity to explore majors, career options, and futures. It is also excellent preparation for transfer into four-year programs or various colleges and universities and can be tailored to fulfill a career goal that cannot be met by traditional program offerings. It allows students to sample courses from different fields.

The bachelor of technology in interdisciplinary studies program is designed to provide a four-year curriculum in which students are empowered to personalize, within specified core and concentration areas, their technology-based program of study. The program is founded in academic flexibility by provided two sets of broad-based academic options. Students start with a core set of courses selected for years one and two of the program and two concentration areas by years three and four. Year one and two core areas include: STEM, management, design, health/agricultural/science, humanities/social sciences, and technical communication. Years three and four concentration areas include: STEM, management, technical communication/design, humanities/social science, and health/science.

FACILITIES

The department is housed within the Academic Advising Center in the Hunter Student Development Center, where mathematics, computer, and study skills labs, as well as classrooms, are equipped with the most recent technological teaching assistance.

The Mathematics and Physics Department offers a variety of courses, including pre-algebra, algebra, trigonometry, statistics, calculus, differential equations, astronomy, physics, and physical science. Students are recommended for placement in mathematics on the basis of their high school preparation and their placement test score. The department faculty serve as advisers for students majoring in the areas of mathematics and/or science and for those in the pre-environmental science and forestry programs. They also serve as advisers for undeclared majors. Physics and physical science courses develop within the student an understanding of basic physical principles and an appreciation of the natural environment. Technical programs require a firm foundation in fundamental physics. To that end, courses also encourage and develop the student’s competence in the use of logical procedures in problem solving. Math courses are taught to develop students’ abilities in logical reasoning, problem solving, and critical thinking, as well as to build algebraic reasoning and calculus skills.

MISSION
Provides mathematics and physics foundation courses for engineering and engineering technology students. The department also provides general education mathematics and natural science courses for all students.

FACILITIES
- Physics labs – These labs are well equipped with apparatus to facilitate learning by direct experience and to provide students with an opportunity to discover many principles on their own. The laboratory instructor is a member of the regular teaching staff and, in most cases, is the same instructor the student has for the physics lecture session. Facilities include a linear air track, lasers, air table, X-ray recorders, gamma spectrometers, oscilloscopes, precision electrical measuring devices, strobe lights, precision timers, and an 8-inch Cassegrain telescope, as well as a large collection of traditional physics apparatus, many of which are used directly by the students in their laboratory work.

DEPARTMENT PROGRAMS

Email: rashidr@alfredstate.edu

The Mechanical and Electrical Engineering Technology Department has several programs that prepare graduates to join the workforce as successful technical and management professionals in a variety of industries, including electrical engineering technology, mechanical engineering technology, computer engineering technology, and mechatronics technology. Because the department maintains active contact with related industries and professional societies and works closely with them to assist graduates in exploring their profession and creating contacts for employment, graduate placement is excellent. Educational opportunities also occur through projects, competitions, and field trips in addition to memberships in several active professional society student chapters.

MISSION
To prepare graduates for immediate employment and continued educational opportunities through a quality technical and experience-based education.

FACILITIES

- **Advanced Electronics Laboratory** – (SET 456) Each work station in this laboratory has a computer that controls automated test equipment stations with a waveform generator, digitizing oscilloscope, multi-meter, and power supplies. Students can capture the oscilloscope display, run automatic frequency response, or measure device characteristics and insert these results into their laboratory reports. The work stations have programs for data analysis and circuit simulation such as Excel, MATLAB, LabVIEW, Multisim and Ultiboard. Internet connections allow quick reference to manufacturer’s data sheets. In addition to the general-purpose and automated test equipment, the laboratory also contains radio frequency (RF) test equipment such as a spectrum analyzer and data communications test equipment to investigate modulation and transmission.

- **Automated Manufacturing Laboratory** – (SET 369) Provides direct experience with computer numerical control (CNC) machines, robotics, and the integration of robotic concepts to automated manufacturing. This includes a 3-axis HAAS mini mill, HAAS mini CNC lathe and an Emco 155 vertical mill. Part design and programs for operation of the CNC systems are prepared and executed. This lab is also equipped with a 3-axis coordinate measuring machine (CMM) for parts inspection and reverse engineering.

- **Computer-Aided, Mechanism, and Mechanical Design Laboratory** – (SET 396) Provides a true design environment that is supported by the latest software for drafting, solid modeling, product design, mechanism and system design, calculations, presentations, and analysis. Labs consist of either “stand alone” desktop computers or student laptops. The laboratory is also equipped as a standard industrial research and development laboratory in the area of mechanical systems dynamics. This facility enables students to analyze rotational equipment, industrial power transmission devices, and various mechanical linkage designs. Using a “learn-by-doing” approach, students are able to apply the theoretical concepts conveyed during lecture to complete rigorous laboratory assignments.

- **Data Acquisition Laboratory** – (SET 449B) Here students are introduced to general characteristics of electromechanical sensors and transducers, electrical measurement systems, electronic signal conditioning, data acquisition systems, and response characteristics of instruments. Industrial equipment, such as a punch press, drill press, and metal lathe are equipped with sensors that are configured to measure physical quantities such as force, strain, displacement, velocity and acceleration. Computers in the laboratory running LabVIEW software perform data acquisition, calculation and report generation with a graphical user interface. Utilizing renewable energy sources requires environmental monitoring. Laboratory activities could include using transducers to measure wind speed and direction, solar radiation, and temperature along with voltage, current and power measurement.

- **Electronic Fabrication Laboratory** – (SET 462A) This is a freshman "skills" laboratory covering a wide range of basic electronic fabrication techniques. It introduces the student to layout and design software tools for sheet metal chassis and printed circuit boards (PCBs) designs, electronic component identification, the proper use of soldering/de-soldering tools, wire-wrapping, schematic layout, and PCB design and fabrication techniques, as well as familiarization with a wide range of hand and power tools and proper safety practices. The laboratory is equipped with a kick-shear, punch press, bending brake, drill presses, Pace solder stations, and CNC rapid prototype machine. The laboratory contains a safety chemical vapor hood used for chemical etching of PCBs. The soldering work stations also feature individual ventilation fans. Once students learn the foundational techniques, students are allowed to use the fabrication resources for later class projects.

- **Electrical Machines Laboratory** – (SET 454) Electrical machines convert electrical energy into mechanical energy or vice versa. A fundamental distinction can be drawn between DC, AC, and three-phase machines. The machines used for training in electrical engineering are designed so that nearly all of the circuitry and drives found in industry, and at home can be conveyed in a didactic fashion in hands-on training. Using the servo drive and braking system, it is possible to easily determine all of the relevant data for electrical machines. Electrical Machines modules include DC machines, shunt-wound, series-wound and compound-wound machines 300W (EEM 2-3), AC machines 300W, universal motor 300W, single-phase induction motor with operating and auxiliary capacitor 300W and split-pole motor 300W (EEM 3-3), asynchronous machines 300W and three-phase induction motor with squirrel cage and distinct pull-out torque 300W (EEM 4-3), and synchronous machines and mains synchronization 300W, synchronous machines 300W and mains (grid power) synchronization 300W (EEM 5-3).

- **Embedded Controller Laboratory** – (SET 449A) This laboratory provides an integrated engineering systems approach toward understanding automation principles with emphasis on embedded microcontrollers. Exposure to electrical, mechanical, and process control areas is integrated into this laboratory allowing for evaluation of embedded controller applications using motion control and peripheral devices such as dc and stepper motors, pushbuttons, switches, seven segment and liquid crystal displays (LCD), matrix keypads, analog to digital converters, speakers and radio frequency (RF) and infrared (IR) interface links.

- **Energy Storage and Conversion Laboratory** – (SET 246) Provides hands-on experience in the areas of fluid mechanics, heat transfer, and thermodynamics. Classroom theory is reinforced through the application to HVAC systems, wind turbines, solar-thermal, fuel cells, batteries, and other thermal-fluids process equipment. The characteristics of the laboratory systems are investigated, tested, and evaluated for component and overall efficiencies. Students gain experience in the operation of data acquisition, process control, temperature, pressure, fluid flow control, combustion, and system-level test equipment.

- **Fluid Power Laboratory** – (SET 252) This lab is used for both lower- and upper-division fluid power courses. Lab facilities include fully functional pneumatic and hydraulic system components. Students design and fabricate working fluid power circuits to reinforce topics covered in the classroom setting. Upper-division students use the hydraulic laboratory facilities to prepare for an optional industry certification offered at the end of the semester.

- **General Purpose Laboratories** – (EJ 414, EJ 415, EJ 417) General purpose laboratories are equipped with web, office, and programming software. They are used for a variety of courses such as programming, web, database, and microcomputer applications.

- **Industrial Controls Laboratory** – (SET 454) This laboratory contains multiuse work areas. When used as an introductory electrical circuits and a digital electronics laboratory, students bring in their breadboard notebook constructed in the fabrication lab and use it to build and test simple circuits to develop an understanding of the fundamentals of circuit theory and digital electronics. Other test equipment such as oscilloscopes, meters, power supplies, and signal generators are on each workstation. This laboratory is also equipped with eight matched sets of AC and DC fractional horsepower machines and the test

The impending shortage of practitioners and current critical shortage of educators is leading to multiple options for those interested in the nursing profession. Jobs are available nationwide in a wide range of settings with excellent salaries and opportunities for growth. At Alfred State, we are preparing students to be designers, coordinators, and managers of health care. Our students graduate as leaders contributing to the advancement of health care and the profession itself. The Nursing Department offers an associate degree nursing program accredited by the Accreditation Commission for Education in Nursing (ACEN).

The associate degree is designed to prepare individuals to become registered nurses (RNs). Students of this program become eligible to take the NCLEX-RN licensing exam and receive excellent clinical preparation in a variety of settings.

Alfred State nursing AAS graduates may enter directly into the Alfred State bachelor's degree program in nursing. The AAS program can be completed full-time in two years or part-time as the student desires and is a face-to-face model. The upper-level nursing courses are offered in an online format.

The baccalaureate degree program in nursing at The State University of New York College of Technology at Alfred is accredited by the Commission on Collegiate Nursing Education, 655 K Street, NW, Suite 750, Washington, DC 20001, 202-887-6791. Jessica Lippa, DNP, FNP-C, RN, CNE, is the nursing program administrator.

MISSION
Foster the development and growth of professional nurses in a rural environment. Nursing practice exhibits compassion, caring, and lifelong learning.

FACILITIES
• Physical & Health Sciences Building – This beautiful showcase facility, which opened in 2012 following an $18.5 million renovation project, houses the Nursing Department.
• Nursing skills lab – The lab utilizes state-of-the-art equipment including mid-fidelity manikins, newborn manikin SimNewB, and a PROMPT Birthing Simulator to complement and reinforce the learning that takes place in clinical experiences at area hospitals. This lab simulates a hospital floor setting with six stations and six VitalSim™ manikins. Each station is fully equipped for the student to learn and practice clinical skills in an acute care setting.
• High-fidelity simulation labs – These two high-fidelity simulation labs each house a SimMan 3G® manikin. The simulation observation room is equipped with computers and monitors to record simulation activities.
• Practice lab – Students have access to two stations that simulate a hospital floor setting, four examination stations, and two VitalSim™ manikins within this lab.
• Public Health Simulation – In addition to the above skills labs, there are facilities for students in Nursing and Allied Health to participate in simulations to promote learning in settings outside of acute care.

Nursing Dual Degree (AAS to BS in Nursing)
RN to BS in Nursing
Physical and Life Sciences

Dr. Kathryn Link, Department Chair
Administrative Assistant Phone: 607-587-3672
Email: linkka@alfredstate.edu

The Physical and Life Sciences Department at Alfred State provides students with a strong education in a wide range of scientific and technical disciplines through online and on-campus curricular offerings. Faculty specializations span a spectrum of molecular and cell biology, genetics/genomics, nutrition science, forensic science, chemical instrumentation, microbiology, and physical chemistry. While diverse, the faculty and staff share the common goal of effectively delivering the practical and theoretical foundations of disciplines through a rich blend of interactive lectures, informal discussion, meaningful laboratory inquiries, and internships. In addition to discipline-related course work, each program is complemented by a broad array of general education courses aimed at equipping students with insights and background that will help fulfill their roles in greater society. Emphasis is also placed on lifelong learning, as reflected by the many articulation agreements assuring seamless transition to other programs within Alfred State and to other institutions of higher learning.

The department offers students direct use of modern laboratory/clinical equipment in real-world or simulated settings. Practical, hands-on competencies, critical reasoning skills, and, where pertinent, team-based problem solving, are emphasized. If a student expresses an interest outside of a discipline’s normal scope, independent study options may also be developed.

In some programs there are physical ability requirements based on individualized assessment rooted in current medical evidence or the best objective evidence. See each program for specific physical requirements. If a student's physical ability compromises or threatens their success in a program, or the health and safety of others, they may be denied enrollment or continuation in the program.

MISSION

To be recognized for employing a comprehensive plan for recruiting and admitting, orienting and advising, retaining, graduating, and placing students of its degree programs.

FACILITIES

Physical & Health Sciences Building – The Physical and Life Sciences Department is located in this facility. Four science-ready lecture rooms are on the first floor with eight laboratories found on the second and third floors for the biological science, health science, and the forensic science technology programs. The laboratories are outfitted with state-of-the-art equipment and instrumentation, anatomic models, and the latest application software for teaching and learning as well as for independent study and research.

DEPARTMENT PROGRAMS

Biological Science (AAS)
Forensic Science Technology (BS)
Health Sciences (BS)
The Social and Behavioral Sciences Department offers courses in anthropology, criminal justice, education, history, human services, political science, psychology, and sociology. It coordinates six curricula: criminal justice (AS and BS), human services management, human services, liberal arts and sciences: social science, and liberal arts and sciences: adolescent education (teacher education transfer).

The criminal justice associate degree program provides graduates a solid foundation in the field of criminal justice and its basic components. The program offers practical knowledge that is integrated across core criminal justice courses and that is then combined with other relevant course work. The program emphasizes the development, structure, and function of the criminal justice system within the US, as well as ethical law enforcement practices and community relations. In addition, the program’s professional course work includes a management component that helps prepare graduates for administrative and leadership positions within the criminal justice system.

The criminal justice bachelor’s degree program provides graduates a solid foundation in the field of criminal justice, both its essential components and emerging areas, with a focus on leadership and applied learning. With strong preparation in conceptual knowledge, students gain practical experience in criminal justice, including the opportunity to complete either an internship or a lab-based criminal investigation course in their final semester. In order to prepare graduates for a wide variety of careers, the program emphasizes several areas within criminal justice: ethical law enforcement practices, decision-making, community relations, working with diverse populations, public safety, and criminal justice leadership and administration.

The human services management bachelor’s degree program prepares graduates for mid-level positions in human services and social services agencies requiring skills in both direct service to clients and in management. It also prepares them for transfer into graduate-level programs in such areas as human services, public administration, and social work administration.

The human services associate-level program prepares students for entry-level career positions in a variety of human service occupations or to continue their education in baccalaureate programs. Students who pursue careers upon graduation often work with the elderly or in programs that focus on early childhood, chemical dependency, or the mentally and developmentally disabled. Students who transfer often select baccalaureate majors in human services management, social work, criminal justice, education, human services, psychology, and sociology.

The liberal arts and sciences: social science associate degree program is a transfer program that provides flexibility to students in their choice of future major. Students take considerable course work in psychology, sociology, and history, and additional courses in mathematics, English, the humanities, and the natural sciences. When transferring, students often select baccalaureate majors in psychology, anthropology, sociology, political science, history, gerontology, communications, early childhood/childhood education, adolescent education, and criminal justice.

The liberal arts and sciences: adolescent education (teacher education transfer) associate-level program prepares graduates to transfer to a four-year adolescent education program at a public or private college or university. Students may select one of six concentrations: history/social studies, English, math, physics, biology, or chemistry.

MISSION
Develop and offer excellent academic programs in criminal justice, human services, social sciences, and education, and to develop and offer high-quality courses in the social and behavioral sciences that meet the program needs of the students of Alfred State.

FACILITIES
The department is housed in the Hunter Student Development Center, where mathematics, computer, and study skills labs, as well as classrooms, are equipped with the most recent technological teaching aids.

ACCOUNTING

AAS DEGREE – CODE #0630
Holly Chase, Program Coordinator
Email address: chasehs@alfredstate.edu

The accounting program is one of our most established and respected within the business discipline. It is a computer-based program in which the latest accounting theory and real-world practice receive equal emphasis as applied to both financial and managerial accounting issues. If you’re looking to enter the job market upon graduation or if you’re considering an advanced degree, this major is tailor-made for you.

ADVANTAGES
• Required course work covers areas critical to success in today’s business workplace: technical accounting knowledge, communication and interpersonal skills, career-related computer literacy.
• High-tech classrooms with computer technology integrated into course content.

PROGRAM STUDENT LEARNING OUTCOMES
• Recognize the primary theories within the principle functional areas of business.
• Demonstrate professional business communication.
• Illustrate critical thinking and effective decision-making within the principle functional areas of accounting.
• Identify ethical issues within accounting.

DIRECT ENTRY INTO BACCALAUREATE DEGREE PROGRAMS
Alfred State accounting graduates may enter directly into either the business administration BBA, financial planning BBA, the interdisciplinary studies B'Tech, or technology management BBA degree program.

CONTINUING EDUCATION OPPORTUNITIES
Students may transfer directly into one of our own BBA degree programs or to another college. Students are encouraged to make their intentions known to their academic adviser during their freshman year. Through the careful use of elective courses, students can realize excellent transfer credit.

The Business Department has established many formal articulation agreements with local four-year institutions, although graduates may transfer to colleges virtually anywhere. Historically, accounting graduates have done very well after leaving Alfred State, whether they enter the workforce or transfer to an advanced program.

OCCUPATIONAL OPPORTUNITIES
• Banking
• Manufacturing
• Retail
• Government and other not-for-profit entities
• Tax agencies
• Financial services

EMPLOYMENT STATISTICS
Employment and transfer rate of 100 percent – 100 percent continued their education.

GRADUATION REQUIREMENTS
62 semester hours, including 20 hours in major field with a 2.0 cumulative index in such courses, as well as six credit hours of math.

END-OF-PROGRAM EXAM REQUIREMENTS
All students are required to complete an end-of-program exam. This exam will be taken in the capstone course for the student’s specific program in ACCT 4523 Intermediate Accounting II. The end-of-program exam will also be considered an assignment in the capstone course. The benefit of taking the end-of-program exam is to test the student’s knowledge at the time of graduation. Students may include the progress from the end-of-program exams on their resume. Taking the end-of-program exam will have some fees, which are currently $23 per exam. Exams will be taken once and they will impact the student’s capstone course grade by 5%. Please refer to the syllabi for the relevant capstone course to know the grading scale for the end-of-program exam.

The end-of-program exams are required, not optional.

Information on how to take the exams will be given in the course prior to the end-of-program exam.
How should I prepare for the assessment exam?

The comprehensive end-of-program exam covers topics taught throughout the degree program, which are aligned to the topics required for accreditation. The preparation for the exam comes from your educational experience with the school, specifically through the required courses for your degree. The exam assesses the foundational knowledge areas for your discipline.
AGRICULTURAL AUTOMATION AND ROBOTICS

AAS DEGREE - CODE #122

Dr. Philip Schroeder, Department Chair and Program Coordinator
Email Address: schreepd@alfredstate.edu

Careers related to agriculture are diverse and constantly changing. Today’s students need the flexibility to tailor a degree to suit their needs. That’s why our agricultural automation and robotics curriculum has been designed to prepare students to enter the workforce as an agricultural automation technician or continue their education in one of Alfred State’s baccalaureate programs.

ADVANTAGES

• Opportunities for hands-on experience with automated milking equipment.
• Hands-on experience and class work in both agriculture and engineering.
• The only program of its kind in the US.

DIRECT ENTRY INTO BACCALAUREATE DEGREE PROGRAMS

Alfred State agricultural automation and robotics graduates may also enter directly into either the agricultural entrepreneurship BTech, interdisciplinary studies BTech, or the technology management BBA degree program.

RELATED CLUBS AND ACTIVITIES

Students have the opportunity to participate in the Collegiate Agricultural Leaders (CAL) Club, Collegiate FFA, Equestrian Club, Dairy Judging Team, Agricultural Skills Day, Spring Fling Consignment Sale, Community Supported Agriculture projects, local foods projects, showmanship contests, and Robotics Club.

CONTINUING EDUCATION OPPORTUNITIES

Many schools, including Cornell University, grant full credit to students wishing to transfer to four-year programs. A formal articulation agreement exists between Alfred State and Cornell University for transfer options.

OCCUPATIONAL OPPORTUNITIES

• Installation and maintenance of agricultural automation equipment
• Agricultural automation equipment operations
• Agricultural automation equipment research and development
• Salespeople and consultants for agricultural equipment distributors

Students must:

• Successfully complete the prescribed sequence of courses.
• Achieve a minimum index of 2.0 in their core courses.
• Achieve a minimum index of 2.0 overall.
• Be recommended by the department faculty.
AGRICULTURAL BUSINESS

AAS DEGREE - CODE #0511

Dr. Dorothea Fitzsimmons, Program Coordinator
Email address: fitzsidd@alfredstate.edu

It’s an exciting time to be an agricultural business student. In fact, one out of every six jobs in the American economy is related to agriculture and food industries. So we’ve designed our agricultural business curriculum to provide you with the technical and business skills necessary to be successful in this dynamic field. Career opportunities in agribusiness range from managing a farm to working in the timber, banking, or publishing industries.

ADVANTAGE
- Our graduates have the technical knowledge of agricultural production practices, land and water resources, management, and agricultural markets necessary to enter nearly any facet of the agribusiness field.

PROGRAM STUDENT LEARNING OUTCOMES
- Demonstrate essential technical knowledge of animal husbandry methods.
- Demonstrate essential technical knowledge of crops, soils, and growing conditions.
- Demonstrate the ability to analyze information, and compare and contrast agricultural business management systems.
- Demonstrate the ability to find and use information related to agricultural business management.
- Demonstrate written and oral communication skills appropriate for agricultural business.
- Apply critical thinking and reasoning to agricultural business management.

DIRECT ENTRY INTO BACCALAUREATE DEGREE PROGRAMS
Alfred State agricultural business graduates may enter directly into either the agricultural entrepreneurship BTech, interdisciplinary studies BTech, or the technology management BBA degree program.

RELATED CLUBS AND ACTIVITIES
Students have the opportunity to participate in the Collegiate Agricultural Leaders (CAL) Club, Collegiate FFA, Equestrian Club, Dairy Judging Team, Agricultural Skills Day, Spring Fling Consignment Sale, Community-Supported Agriculture projects, local foods projects, showmanship contests, and Sustainability Club.

CONTINUING EDUCATION OPPORTUNITIES
Many schools, including Cornell University, grant full credit to students wishing to transfer to four-year programs.

A formal articulation agreement exists between Alfred State and Cornell University for transfer options.

OCCUPATIONAL OPPORTUNITIES
- Management or ownership of commercial farms
- Agricultural credit officers for banks, government, loan agencies, and farm cooperative loan agencies
- Feed, seed, and fertilizer sales technicians
- Writers of technical publications, radio and TV scripts, news items for magazines and newspapers, education and public relations materials
- Manager/assistant managers of farm supply stores
- Warehouse managers for farm chemicals, feed, seed, and fertilizers
- Chain store and retail food management
- Agricultural consulting services

EMPLOYMENT STATISTICS
Employment and continuing education rate of 100 percent – 75 percent are employed; 25 percent continued their education.

GRADUATION REQUIREMENTS
Students must:

- successfully complete the prescribed sequence of courses
- achieve a minimum index of 2.0 in their core courses
- achieve a minimum index of 2.0 overall
- be recommended by the department faculty
The Bachelor of Technology in agricultural entrepreneurship (AE-BT) program is designed to provide you, tomorrow’s agricultural entrepreneurs, with the skills to make local agriculture economically viable through the application of traditional production practices and the development of value-added (VA) products. You will take production courses to build a strong foundation in agriculture, value-added courses to develop non-traditional agriculture skills, and business courses to understand marketing and financial management.

This program will appeal to both traditional agriculture students who come from a farm background and to students who are new to agriculture. This program will prepare students to be successful in their efforts to improve the profitability of an existing farm or start a new agricultural venture.

ADVANTAGES
- Our graduates have the technical knowledge of agricultural production practices, land and water resources, management, and agricultural markets necessary to enter nearly any facet of the agribusiness field.
- Our students have hands-on experience with modern automated agricultural production systems, organic farming methods, and value added agriculture.
- Our students have the opportunity to work on the college farm and learn first-hand how to manage multiple species in modern high-tech facilities.
- Our students also learn the application of fundamental business management skills to agriculture.

RELATED CLUBS AND ACTIVITIES
Students have the opportunity to participate in the Collegiate Agricultural Leaders (CAL) Club, Collegiate FFA, Equestrian Club, Dairy Judging Team, Agricultural Skills Day, Spring Fling Consignment Sale, Community-Supported Agriculture projects, local foods projects, showmanship contests, and Sustainability Club.

OCCUPATIONAL OPPORTUNITIES
- Management or ownership of commercial farms
- Agricultural credit officers for banks, government, loan agencies, and farm cooperative loan agencies.
- High school agriculture teacher/agriculture educator
- Writers of technical publications, radio and TV scripts, news items for magazines and newspapers, education and public relations materials
- Manager/assistant managers of farm supply stores
- Warehouse managers for farm chemicals, feed, seed, and fertilizers
- Chain store and retail food management
- Agricultural consulting services
- Ag education
- Cooperative Extension

EMPLOYMENT STATISTICS

**Graduation Requirements**

- Total minimum credit hours for graduation is 120.
- A cumulative overall index of at least 2.0 is required in order to graduate.
- 30 credit hours of the 45 upper-level credit hours for this degree must be taken at Alfred State.

**Additional Program Information**

- Seven of the 10 SUNY-approved General Education categories must be fulfilled.
AGRICULTURAL TECHNOLOGY

AAS DEGREE - CODE #0510
Dr. Philip Schroeder, Department Chair and Program Coordinator
Email: Schroepd@alfredstate.edu

Careers related to agriculture are diverse and constantly changing. Today’s students need the flexibility to tailor a degree to suit their needs. That’s why our agricultural technology curriculum has been designed to let you select the elective courses that fit your career goals. You can choose concentrations of courses in animal science, enhancing your knowledge of animal agriculture and/or dairy science, or enhance your knowledge of crops and plant sciences, including fruit and vegetable production.

ADVANTAGES
- Opportunities for hands-on experience with organic farming.
- Animal science concentration is a progressive practical program emphasizing dairy cattle management and provides both a science and a business background.
- Plant science concentration focuses on the management of soil to increase production of both human and animal food crops and the science and business behind it. It includes an emphasis on sustainability.

PROGRAM STUDENT LEARNING OUTCOMES
- Demonstrate essential technical knowledge of animal husbandry methods.
- Demonstrate essential technical knowledge of crops, soils, and growing conditions.
- Demonstrate the ability to analyze information, and compare and contrast agricultural management systems.
- Demonstrate the ability to find and use information related to agricultural production systems.
- Demonstrate written and oral communication skills appropriate for agricultural production systems.
- Apply critical thinking and reasoning to agricultural business management.

DIRECT ENTRY INTO BACCALAUREATE DEGREE PROGRAMS
Alfred State agricultural technology graduates may enter directly into either the agricultural entrepreneurship BTech, interdisciplinary studies BTech, or the technology management BBA degree program.

ANIMAL/DAIRY SCIENCE CONCENTRATION
The animal science concentration is a progressive practical program emphasizing dairy cattle management. The program offers both managerial and hands-on experiences. This concentration’s courses provide a science and business background. A strong emphasis is placed on application of these principles with a free-stall housed organic herd milked by a robot and our herds of Angus and Herford cattle, sheep, and meat goats. The farm also houses horses, pigs, and poultry that are used to extend learning opportunities for our students.

PLANT/CROPS/FRUIT/VEGETABLE CONCENTRATION
This curriculum emphasizes management of the soil to increase production of food crops for both human and livestock consumption. Students are usually interested in crop farming or market gardening careers. Students are taught conventional, natural, and organic food production systems. This concentration’s courses provide a science and business background. A strong emphasis is placed on application of sustainability principles on our farm, research plots, gardens, hydroponic systems, greenhouses, and high tunnels.

SHOWMANSHIP DAY
All students enrolled in agriculture classes truly enjoy participating in the annual showmanship activities each spring. Students can select a species of animal (cattle, horses, swine, alpacas, or sheep) to train, groom, and show in this annual competition. Family, friends, and alumni are invited to enjoy the competition and the awards barbecue following the showmanship contest.

RELATED CLUBS AND ACTIVITIES
Students have the opportunity to participate in the Collegiate Agricultural Leaders (CAL) Club, Collegiate FFA, Equestrian Club, Dairy Judging Team, Agricultural Skills Day, Spring Fling Consignment Sale, Community Supported Agriculture projects, local foods projects, showmanship contests, and Sustainability Club.

CONTINUING EDUCATION OPPORTUNITIES
Many schools, including Cornell University, grant full credit to students wishing to transfer to four-year programs. A formal articulation agreement exists between Alfred State and Cornell University for transfer options.

OCCUPATIONAL OPPORTUNITIES
- Owners, operators, managers, and herdsmen for dairy cattle and meat animal farms
- Fruit, vegetable, and field crop production
- Food industry
- Salespeople and consultants for feed, fertilizer, agricultural, and veterinary supply companies
- Agricultural banking and lending
- Inspectors of agricultural products
- Laboratory and field technicians for artificial insemination and veterinary supply companies
- Dairy farm inspectors

EMPLOYMENT STATISTICS
Employment and continuing education rate of 100 percent – 40 percent are employed; 60% continued their education.

ENTRANCE REQUIREMENTS/RECOMMENDATIONS
Required: Algebra
Recommended: Geometry, Algebra 2, Biology, Chemistry

OFFICE OF ACCESSIBILITY SERVICES
Students who believe they need a reasonable accommodation to properly participate in this program may contact Melanie Ryan in the Office of Accessibility Services. This office may be contacted by email at oas@alfredstate.edu or by phone at 607-587-4506. Please keep in mind that some accommodations may take time to implement, so students seeking accommodations are encouraged to contact OAS as early as possible.

### GRADUATION REQUIREMENTS

Students must:
- successfully complete the prescribed sequence of courses
- achieve a minimum index of 2.0 in core courses
- achieve a minimum index of 2.0 overall
- be recommended by the department faculty
ARCHITECTURAL TECHNOLOGY

BS DEGREE - CODE #1452

Alan Vlakancic, Program Coordinator
Email Address: vlakanah@alfredstate.edu

Our four-year Bachelor of Science in architectural technology program is designed to provide students with a comprehensive architectural education. While the two-year AAS degree in architectural technology offers a broad range of skills, the four-year program continues the course of study by combining a holistic perspective of the built environment with an applied technical knowledge of construction systems and materials acquired throughout a four-year studio sequence.

All architecture degree programs share course work across the first two years, while the BS and BArch have some shared course work in the third and fourth years. This alignment demands that the AAS and BS in architectural technology are required to meet the same NAAB “Student Criteria” and “Program Criteria” that apply to the BArch program. The BArch program is the first and only fully accredited undergraduate professional architecture degree program in the SUNY system.

ADVANTAGES

• Broad exposure gives students the ability to be conversant with and/or seek employment within the architectural field, and also in related professions that engage the built environment.
• The degree may be accepted for credit toward professional licensure in New York State.
• Alfred State offers multiple study abroad options through our signature 12-week semester study abroad program (offered in conjunction with Sant’Anna Institute in Sorrento, Italy) and other programs offered in conjunction with SUNY partners. To learn more, see www.alfredstate.edu/study-abroad.

PROGRAM STUDENT LEARNING OUTCOMES

• PSLO.1. = NAAB PC.1. Career Paths — The program helps students understand the path to becoming a licensed architect in the United States and the range of career opportunities available to them that utilize the discipline’s skills and knowledge.
• PSLO.2. = NAAB PC.2 Design — The program promotes the role of design in shaping the built environment and conveys the methods by which design integrates multiple factors, in different settings and scales of development.
• PSLO.3. = NAAB PC.3 Ecological Knowledge and Responsibility — The program provides a holistic understanding of the dynamic between built and natural environments, enabling future architects to responsibly mitigate climate change by leveraging ecological, advanced building performance, adaptation, and resilience principles in their work and advocacy activities.
• PSLO.4. = NAAB PC.4 History and Theory — The program prepares students to understand the histories and theories of architecture and urbanism, framed by broad social, cultural, economic, and political forces.
• PSLO.5. = NAAB PC.5 Innovation — The program expands students’ understanding of the field and encourages exploration, risk-taking, and inventiveness.
• PSLO.6. = NAAB PC.6 Leadership and Collaboration — The program helps students understand approaches to leadership in multidisciplinary teams, diverse stakeholder constituents, and dynamic physical and social contexts, and learn how to apply effective collaboration skills to solve complex problems.
• PSLO.7. = NAAB PC.7 Learning and Teaching Culture — The program fosters a positive and respectful environment that encourages optimism, respect, sharing, engagement, and innovation among the members of its faculty, student body, administration, staff, and the profession.
• PSLO.8. = NAAB PC.8 Social Equity and Inclusive Environments — The program deepens students understanding of diverse cultural and social contexts and helps students translate that into built environments that support and include people who have different backgrounds, resources, and abilities.
• PSLO.9. = NAAB SC.1 Health, Safety, and Welfare in the Built Environment — How the program promotes students’ understanding of the role of the built environment in human health, safety, and welfare at multiple scales.
• PSLO.10. = NAAB SC.2 Professional Practice — How the program fosters an understanding of professional ethics, the regulatory standards, and the fundamental business processes relevant to architectural practice in the United States.
• PSLO.11. = NAAB SC.3 Regulatory Context — How the program enables students to understand the fundamental principles of life safety systems and related regulations that apply to buildings and sites within the US, and the evaluative criteria architects use to assess those regulations as part of a project.
• PSLO.12. = NAAB SC.4 Technical Knowledge — How the program prepares students to understand the established and emerging systems, technologies, and assemblies of building construction, and the criteria architects use to assess those technologies against the design and performance objectives of projects.
• PSLO.13. = NAAB SC.5 Design Synthesis — Ability to make design decisions within an architectural project while demonstrating broad synthesis and consideration of user requirements, regulatory requirements, site conditions, ecological concerns, and accessible design.
• PSLO.14. = NAAB SC.6 Building Integration — Ability to make design decisions within an architectural project while demonstrating broad integration and consideration of building envelope systems and assemblies, structural systems, environmental control systems and life safety systems.

CONTINUING EDUCATION OPPORTUNITIES

Graduates wishing to continue their education may choose to apply to master’s programs in architecture or related disciplines. The lengths of such programs vary and depend on institutional requirements.

CAREER OPPORTUNITIES

• Architectural designer
• Registered Architect
• 3D modeler/ animator
• Building Information Modeling (BIM) manager
• Specifications writer
• Code enforcement official

EMPLOYMENT STATISTICS

Employment and continuing education rate of 90 percent – 60 percent are employed; 30 percent continued their education.

RELATED PROGRAMS

Construction Management

ENTRANCE REQUIREMENTS/RECOMMENDATIONS

Required: Algebra, Geometry, Algebra 2

Recommended: Pre-calculus, Physics

OFFICE OF ACCESSIBILITY SERVICES

Students who believe they need a reasonable accommodation to properly participate in this program may contact Melanie Ryan in the Office of Accessibility Services. This office may be contacted by email at oas@alfredstate.edu or by phone at 607-587-4506. Please keep in mind that some accommodations may take time to implement, so students seeking accommodations are encouraged to contact OAS as early as possible.

TRANSFER STUDENTS

Prior to studio placement within the BS architectural technology program, applicants from schools or programs with which Alfred State College does not have an active an articulation agreement must submit a comprehensive academic portfolio for review. This portfolio will include examples of student work, course syllabi, assignments, and grade reports and will be evaluated along with the student’s overall grade point average and studio course grades.

Students applying for transfer from schools with which Alfred State College has an existing and active articulation agreement (SUNY Delhi, Dutchess CC, Erie CC, Finger Lakes CC, Hudson Valley CC, SUNY Morrisville, Onondaga CC, Orange County CC) may submit a condensed design portfolio.

Alfred State College uses SlideRoom to collect portfolio details, which will guide all students through the process of assembling the correct materials for the portfolio.
**TYPICAL PROGRAM**
In the first and second years, a typical day consists of two one-hour lectures and a two-hour studio. At the third-year and fourth-year levels, the studio meeting times are three hours. Students can expect to spend additional time working on projects and course work out of studio.

**REQUIRED EQUIPMENT**
All students in both the architecture and interior design programs are required to purchase a computer in addition to other equipment. Typically the costs of these purchases can be covered using financial aid. Please consult a financial aid counselor for further details. A tier 2 laptop computer is required for students entering this degree program. Laptop specifications are available at www.alfredstate.edu/required-laptops.

**GENERAL NOTES:**
In the first and second years, a typical day consists of two one-hour lectures and a two-hour studio. At the third- and fourth-year levels, the studio meeting times are three hours. Students can expect to spend additional time working on projects and course work out of studio.

Entry level of student into math and composition/literature sequences is a function of student’s high school preparation and mathematics and English placement examinations.

Math through Technical Calculus I must be completed. Students who start at a higher level of math must meet SUNY general education and campus liberal arts and sciences course credit requirements for graduation.

Minimum combined GPA of 3.0 is required in Alfred State studio courses (ARCH 1184, ARCH 2394, ARCH 3104, and ARCH 4304) or comparable courses at another institution to guarantee admission into ARCH 5306 - Design Studio 3. A portfolio review is required of all continuing or transfer students not meeting this requirement.

If entry-level math requirement is met, take LAS elective to complete degree requirements of 3 or 4 credits, otherwise take free elective.

Students must complete at least one course from seven of the 10 SUNY General Education knowledge areas.

Minimum grade of “C” is required for ARCH 5306, ARCH 6306, ARCH 7306, and ARCH 8306.

**GRADUATION REQUIREMENTS**
Successfully complete all courses in the prescribed eight-semester program and earn a minimum cumulative index of 2.0.

**ARCHITECTURAL TECHNOLOGY - BS DEGREE**

Be advised that a prior felony conviction may impede a student’s ability to participate in an internship and/or to pursue licensure.
ARCHITECTURAL TECHNOLOGY (AAS)

AAS DEGREE - CODE #0538

Bryan Toepfer, Program Coordinator
Email Address: toepfebe@alfredstate.edu

The AAS architectural technology program is structured to provide students with knowledge and skills for entry-level positions in the architectural office and related disciplines. The program consists of a core graphics sequence with additional courses in appropriate technical areas. Digital tools are integrated throughout the four-semester program.

All architecture degree programs share course work across the first two years, while the BS and BArch have some shared course work in the third and fourth years. This alignment demands that the AAS and BS in architectural technology are required to meet the same NAAB “Student Criteria” and “Program Criteria” that apply to the BArch program. The BArch program is the first and only fully accredited undergraduate professional architecture degree program in the SUNY system.

ADVANTAGES

• Students gain an understanding of how design solutions affect and are impacted by construction systems, mechanical, electrical and plumbing systems, structures, building methods, and materials.
• Broad exposure gives students the ability to be conversant with and/or seek employment with all related professions within the architectural field.
• The degree may be accepted for credit toward professional licensure in New York State.

PROGRAM STUDENT LEARNING OUTCOMES

• PSLO.1. = NAAB PC.1. Career Paths — The program helps students understand the path to becoming a licensed architect in the United States and the range of career opportunities available to them that utilize the discipline’s skills and knowledge.
• PSLO.2. = NAAB PC.2 Design — The program promotes the role of design in shaping the built environment, and conveys the methods by which design integrates multiple factors, in different settings and scales of development.
• PSLO.3. = NAAB PC.3 Ecological Knowledge and Responsibility — The program provides a holistic understanding of the dynamic between built and natural environments, enabling future architects to responsibly mitigate climate change by leveraging ecological, advanced building performance, adaptation, and resilience principles in their work and advocacy activities.
• PSLO.4. = NAAB PC.4 History and Theory — The program prepares students to understand the histories and theories of architecture and urbanism, framed by broad social, cultural, economic, and political forces.
• PSLO.5. = NAAB PC.5 Innovation — The program expands students’ understanding of the field and encourages exploration, risk-taking, and inventiveness.
• PSLO.6. = NAAB PC.6 Leadership and Collaboration — The program helps students understand approaches to leadership in multidisciplinary teams, diverse stakeholder constituents, and dynamic physical and social contexts, and learn how to apply effective collaboration skills to solve complex problems.
• PSLO.7. = NAAB PC.7 Learning and Teaching Culture — The program fosters a positive and respectful environment that encourages optimism, respect, sharing, engagement, and innovation among the members of its faculty, student body, administration, staff, and the profession.
• PSLO.8. = NAAB PC.8 Social Equity and Inclusive Environments — The program deepens students’ understanding of diverse cultural and social contexts and helps students translate that into built environments that support and include people who have different backgrounds, resources, and abilities.
• PSLO.9. = NAAB SC.1 Health, Safety, and Welfare in the Built Environment — How the program promotes students’ understanding of the role of the built environment in human health, safety, and welfare at multiple scales.
• PSLO.10. = NAAB SC.2 Professional Practice — How the program fosters an understanding of professional ethics, the regulatory standards, and the fundamental business processes relevant to architectural practice in the United States.
• PSLO.11. = NAAB SC.3 Regulatory Context — How the program enables students to understand the fundamental principles of life safety, land use, and related regulations that apply to buildings and sites within the US, and the evaluative criteria architects use to assess those regulations as part of a project.

• PSLO.12. = NAAB SC.4 Technical Knowledge — How the program prepares students to understand the established and emerging systems, technologies, and assemblies of building construction, and the criteria architects use to assess those technologies against the design and performance objectives of projects.
• PSLO.13. = NAAB SC.5 Design Synthesis — Ability to make design decisions within an-architectural project while demonstrating broad synthesis and consideration of user requirements, regulatory requirements, site conditions, ecological concerns, and accessible design.
• PSLO.14. = NAAB SC.6 Building Integration — Ability to make design decisions within an architectural project while demonstrating broad integration and consideration of building envelope systems and assemblies, structural systems, environmental control systems and life safety systems.

DIRECT ENTRY INTO BACCALAUREATE DEGREE PROGRAMS

Alfred State architectural technology AAS graduates may enter directly into either the architectural technology BS or the architecture BArch programs (portfolio review may be required). AAS students who elect to apply for internal transfer to BS or BArch programs need to have completed either MATH 2043 (College Trigonometry) or MATH 1054 (Precalculus). Please note that a minimum combined GPA of 3.0 is required in Alfred State studio courses (ARCH 1184, ARCH 2394, ARCH 3104, and ARCH 4304) to guarantee admission into ARCH 5306 - Design Studio 3. Architectural technology AAS graduates may also enter directly into the construction supervision BTech, the interdisciplinary studies BTech, or the technology management BBA degree program.

CONTINUING EDUCATION OPPORTUNITIES

Graduates may enter the workforce or may continue in Alfred State’s architectural technology BS or BArch programs. Graduates may also transfer to professional or pre-professional degree programs at other institutions. Transfer is contingent on program and institution.

CAREER OPPORTUNITIES

• Architectural technician
• Architectural drifter
• Product detailer
• Space planner
• Estimator
• Manufacturer’s sales representative

EMPLOYMENT STATISTICS

Employment and continuing education rate of 100 percent – 40 percent are employed; 60 percent continued their education.

RELATED PROGRAMS

Construction Engineering Technology
Interior Design

ENTRANCE REQUIREMENTS/RECOMMENDATIONS

Required: Algebra, Geometry, Algebra 2
Recommended: Physics

OFFICE OF ACCESSIBILITY SERVICES

Students who believe they need a reasonable accommodation to properly participate in this program may contact Melanie Ryan in the Office of Accessibility Services. This office may be contacted by email at oas@alfredstate.edu or by phone at 607-587-4506. Please keep in mind that some accommodations may take time to implement, so students seeking accommodations are encouraged to contact OAS as early as possible.

TYPICAL PROGRAM

In the first and second years, a typical day consists of two one-hour lectures and a two-hour studio. Students can expect to spend additional time working on projects and course work out of studio.

GENERAL NOTES:

Students must complete at least one course from each of five SUNY General Education knowledge areas.
Entry level of student into math and composition/literature sequences is a function of student’s high school preparation and mathematics and English placement examinations.

Math through Technical Calculus I must be completed. Students who start at a higher level in math must meet all SUNY general education and campus liberal arts and sciences course credit requirements for graduation.

Minimum grade of "C" is required for ARCH 1184, ARCH 2394, ARCH 3104, and ARCH 4304.

If entry-level math requirement is met, take LAS elective to complete degree requirements of 3 credits, otherwise take free elective.

**GRADUATION REQUIREMENTS**

A student must successfully complete all courses in the prescribed four-semester program and earn a minimum cumulative index of 2.0, which is equivalent to a "C" average.

**REQUIRED EQUIPMENT**

All students in both the architecture and interior design programs are required to purchase a computer in addition to other equipment. Typically the costs of these purchases can be covered using financial aid. Please consult a financial aid counselor for further details. A tier 3 or 4 laptop computer is required for students entering this degree program. Laptop specifications are available at www.alfredstate.edu/required-laptops.

ARCHITECTURE

BARCH DEGREE – CODE 0135

Matthew DiRado, Program Coordinator
Email Address: diradoma@alfredstate.edu

You’re considering studying architecture? You have found the right place! The Bachelor of Architecture (BArch) program helps prepare students to be well-rounded, creative, and socially responsible architects who shape our world through the design of meaningful and inspirational spaces. The BArch is a fully accredited professional program, preparing students for employment and the opportunity to pursue licensure shortly after graduation, reducing the need for further graduate education or an advanced degree.

ADVANTAGES

• Students enrolled in the BArch program have had the opportunity to select a "cognate area of focus to allow them to develop additional expertise."

A list of options is available in the department office or from an academic advisor.

• Upon successful completion of the BArch degree, graduates may begin an internship and the other professional steps leading to licensure as a registered, practicing architect. Students may participate in the Architectural Experience Program (AXP) while enrolled at Alfred State.

• The BArch program provides a career-focused, project-based education integrating theory and practice with a strong multidisciplinary foundation that draws upon an institutional heritage of building and technology.

• Alfred State offers multiple study abroad options through our signature 12-week semester study abroad program (offered in conjunction with Sant’Anna Institute in Sorrento, Italy) and other programs offered in conjunction with SUNY partners. To learn more, see www.alfredstate.edu/study-abroad.

NAAB ACCREDITATION INFORMATION

In the United States, most state registration boards require a degree from an accredited professional degree program as a prerequisite for licensure. The National Architectural Accrediting Board (NAAB), which is the sole agency authorized to accredit professional degree programs in architecture offered by institutions with US regional accreditation, recognizes three types of degrees: the Bachelor of Architecture, the Master of Architecture, and the Doctor of Architecture. A program may be granted an eight-year term, an eight-year term with conditions, or two-year term of continuing accreditation, or a three-year term of initial accreditation, depending on the extent of its conformance with established educational standards. Doctor of Architecture and Master of Architecture degree programs may require a non-accredited undergraduate degree in architecture for admission. However, the non-accredited degree is not, by itself, recognized as an accredited degree.

Alfred State Department of Architecture and Design offers the following NAAB-accredited degree program: Bachelor of Architecture (BArch) 156 Credit Hours

A detailed archive of NAAB-related accreditation documents is available on our website.

POST-GRADUATE STUDIES

BArch graduates who wish to continue academic study may choose to apply at another institution to master's or doctoral programs in architecture or related disciplines.

CAREER OPPORTUNITIES

A wide range of career opportunities are available to graduates of this accredited degree: intern architect, practicing architect (after successfully meeting state registration requirements), or practitioner in related sub-fields that include, but not limited to: sustainable architecture, urban design, interior architecture, adaptive reuse and historic preservation, building construction management, hospitality design, lighting design, acoustical design, religious building design, and others.

PROGRAM STUDENT LEARNING OUTCOMES

• PSL0.1. = NAAB PC.1. Career Paths — The program helps students understand the path to becoming a licensed architect in the United States and the range of career opportunities available to them that utilize the discipline’s skills and knowledge.

• PSL0.2. = NAAB PC.2 Design — The program promotes the role of design in shaping the built environment, and conveys the methods by which design integrates multiple factors, in different settings and scales of development.

• PSL0.3. = NAAB PC.3 Ecological Knowledge and Responsibility — The program provides a holistic understanding of the dynamic between built and natural environments, enabling future architects to responsibly mitigate climate change by leveraging ecological, advanced building performance, adaptation, and resilience principles in their work and advocacy activities.

• PSL0.4. = NAAB PC.4 History and Theory — The program prepares students to understand the histories and theories of architecture and urbanism, framed by broad social, cultural, economic, and political forces.

• PSL0.5. = NAAB PC.5 Innovation — The program expands students’ understanding of the field and encourages exploration, risk-taking, and inventiveness.

• PSL0.6. = NAAB PC.6 Leadership and Collaboration — The program helps students understand approaches to leadership in multidisciplinary teams, diverse stakeholder constituents, and dynamic physical and social contexts, and learn how to apply effective collaboration skills to solve complex problems.

• PSL0.7. = NAAB PC.7 Learning and Teaching Culture — The program fosters a positive and respectful environment that encourages optimism, respect, sharing, engagement, and innovation among the members of its faculty, student body, administration, staff, and the profession.

• PSL0.8. = NAAB PC.8 Social Equity and Inclusive Environments — The program deepens students understanding of diverse cultural and social contexts and helps students translate that into built environments that support and include people who have different backgrounds, resources, and abilities.

• PSL0.9. = NAAB SC.1 Health, Safety, and Welfare in the Built Environment — How the program prepares students’ understanding of the role of the built environment in human health, safety, and welfare at multiple scales.

• PSL0.10. = NAAB SC.2 Professional Practice — How the program fosters an understanding of professional ethics, the regulatory standards, and the fundamental business processes relevant to architectural practice in the United States.

• PSL0.11. = NAAB SC.3 Regulatory Context — How the program enables students to understand the fundamental principles of life safety, land use, and related regulations that apply to buildings and sites within the US, and the evaluative criteria architects use to assess those regulations as part of a project.

• PSL0.12. = NAAB SC.4 Technical Knowledge — How the program prepares students to understand the established and emerging systems, technologies, and assemblies of building construction, and the criteria architects use to assess those technologies against the design and performance objectives of projects.

• PSL0.13. = NAAB SC.5 Design Synthesis — Ability to make design decisions within an architectural project while demonstrating broad synthesis and consideration of user requirements, regulatory requirements, site conditions, ecological concerns, and accessible design.

• PSL0.14. = NAAB SC.6 Building Integration — Ability to make design decisions within an architectural project while demonstrating broad integration and consideration of building envelope systems and assemblies, structural systems, environmental control systems and life safety systems.

ENTRANCE REQUIREMENTS/RECOMMENDATIONS

Required: Algebra, Geometry, Algebra 2 , and Pre-Calculus.

Recommended: Physics is strongly recommended.

OFFICE OF ACCESSIBILITY SERVICES

Students who believe they need a reasonable accommodation to properly participate in this program may contact Melanie Ryan in the Office of Accessibility Services. This office may be contacted by email at oas@alfredstate.edu or by phone at 607-587-4506. Please keep in mind that some accommodations may take time to implement, so students seeking accommodations are encouraged to contact OAS as early as possible.

PORTFOLIO REQUIREMENTS

All students who apply to the BArch program are required to submit a portfolio of creative work that demonstrates their interest in design and the built environment.
Through the portfolio, the department hopes to get a sense of the applicant as a creative individual. We understand that the portfolio will not demonstrate mastery of architecture, but instead present a student’s potential through explorations and representation of the built environment, which may be presented as art work such as drawings, sketches, models, sculpture, or photographs. The portfolio should focus mainly on the representation of space, but may also include a small representation of creative work such as woodworking, crafts, graphic design, and/or other creative endeavors (e.g., high school, college course) or from personal pursuits (e.g., employment, hobbies). Each portfolio should be a balanced representation of both two- and three-dimensional works.

Alfred State College uses SlideRoom to collect portfolio details, which will guide all students — new or transfer — through the process of assembling the correct materials for the portfolio.

PORTFOLIO REQUIREMENTS FOR TRANSFER STUDENTS

Prior to studio placement within the architectural technology BArch program, applicants from schools or programs with which Alfred State College does not have an active an articulation agreement must submit a comprehensive academic portfolio for review. This portfolio will include examples of student work, course syllabi, assignments, and grade reports and will be evaluated along with the student’s overall grade point average and studio course grades.

Students applying for transfer from schools with which Alfred State College has an existing and active articulation agreement (SUNY Delhi, Dutchess CC, Erie CC, Finger Lakes CC, Hudson Valley CC, SUNY Morrisville, Onondaga CC, Orange County CC) may submit a condensed design portfolio.

Alfred State College uses SlideRoom to collect portfolio details, which will guide all students — new or transfer — through the process of assembling the correct materials for the portfolio.

EMPLOYMENT STATISTICS

Employment and continuing education rate of 100 percent – 92 percent are employed; 8 percent continued their education.

TYPICAL PROGRAM

In the first and second years, a typical day consists of two one-hour lectures and a two-hour studio. At the third-year, fourth-year, and fifth-year levels, the studio meeting times are three hours. Students can expect to spend additional time working on projects and course work outside of studio.

GENERAL NOTES:

Students must complete at least one course from seven of the 10 SUNY General Education knowledge areas.

All students who transfer in courses from another institution must undergo an academic portfolio review before placement in any studio course.

Minimum of "C" is required to continue from one studio course to the next. (This includes: ARCH 1184, ARCH 2394, ARCH 3104, ARCH 4304, ARCH 5306, ARCH 6306, ARCH 7306, ARCH 8306, ARCH 8716, and ARCH 8776.)

Entry level of student into math and composition/literature sequences is a function of student’s high school preparation and mathematics and English placement examinations.

Math through Technical Calculus I must be completed. Students who start at a higher level of math must meet all SUNY general education and campus liberal arts and sciences course credit requirements for graduation.

GRADUATION REQUIREMENTS

Successfully complete all courses in the prescribed 10-semester program at a minimum cumulative index of 2.5, which is equivalent to a "C+" average.

REQUIRED EQUIPMENT

All students in both the architecture and interior design programs are required to purchase a computer in addition to other equipment. Typically the costs of these purchases can be covered using financial aid. Please consult a financial aid counselor for further details. A tier 3 or 4 computer is required for students entering this degree program. Laptop specifications are available at www.alfredstate.edu/required-laptops.

Eric Wilmot, Department Chair and Program Coordinator
Email address: wilmote@alfredstate.edu

This specialization will prepare you with 1,800 hours of practical experience and classroom training applicable to the dynamic autobody repair field. Your laboratory experience will range from spot repair, total wreck repair, and specialized paint jobs to estimating, panel replacement, and frame straightening.

Advantages
- Inter-Industry Conference on Automotive Collision Repair (ICAR) certified.
- Students successfully completing autobody repair may wish to remain at Alfred State in the automotive service technician; heavy equipment, truck and diesel technician; or motorsports programs for another one-and-one-half years to receive a second degree upon successful completion of course. This requires department chair’s approval.

program student learning outcomes
- Demonstrate a focused, coherent, organized written report.
- Perform mathematical calculations required for entry-level automotive employment.
- Demonstrate a functional ability to read and retain/apply written instructions and specifications relevant to their work environment.
- Demonstrate critical thinking and program-solving skills to work with sheet metal repair.
- Demonstrate ability to identify different types of frame damage.
- Demonstrate painting skills for B/C and single stage painting.
- Demonstrate the ability to repair frame and structure collision damage.
- Demonstrate the ability to identify, evaluate, remove, and replace various mechanical components.

Office of accessibility services
Students who believe they need a reasonable accommodation to properly participate in this program may contact Melanie Ryan in the Office of Accessibility Services. This office may be contacted by email at oas@alfredstate.edu or by phone at 607-587-4506. Please keep in mind that some accommodations may take time to implement, so students seeking accommodations are encouraged to contact OAS as early as possible.

Direct entry into baccalaureate degree program
Alfred State autobody repair graduates may enter directly into the technology management BBA degree program. Graduates who have credit for freshman composition, statistics, literature, history, and speech may complete the BBA program in two additional years; others may complete the BBA program in two-and-one-half years.

Occupational opportunities
- Autobody repair specialist
- Automotive refinisher
- Body shop owner
- Frame straightening specialist
- Shop foreman
- Service manager
- Wheel alignment specialist

Employment statistics
Employment and continuing education rate of 100 percent – 83 percent are employed; 17 percent continued their education.

Related programs
Automotive service technician
Heavy equipment, truck and diesel technician
Mechanical engineering technology
Motorsports technology
Welding technology

Entrance requirements/recommendations
Recommended: Algebra

Required tools/equipment
A list of required tools, equipment, PPE, etc. for all of the programs mentioned above can be found at http://www.alfredstate.edu/tool-lists.

A tier 1 laptop computer is required for students entering this degree program. Laptop specifications are available at www.alfredstate.edu/required-laptops.

Technical standards
Applicants in the autobody repair program must meet the following physical requirements:
- Must be able to lift 50 pounds to eye level.
- Must be able to effectively communicate with a person 6 to 10 feet away.
- Must be able to visually decipher small images on a monitor or digital display.
- Must be able to distinguish sounds associated with mechanical failures.
- Must be able to comprehend written information found in service repair manuals.
- Must have a valid motor vehicle driver's license.

Certification or licensure
Graduates may take Automotive Service Excellence (ASE) certification exams. Graduates are also eligible to take the New York State inspection certification. Students may take the ASE exam for certification in refrigerant recycling and recovery during their senior year.

Graduation requirements
A student must successfully complete all courses in the prescribed four-semester program and earn a minimum cumulative index of 2.0, which is equivalent to a “C” average.
AUTOMOTIVE SERVICE TECHNICIAN

AOS DEGREE – CODE #0451

Eric Wilmot, Department Chair and Program Coordinator

Email address: wilmotej@alfredstate.edu

This specialization includes 1,800 hours of practical and classroom training in general automotive repair geared to automotive dealership and independent garage practice. You will receive hands-on experience with all types of automobiles, including domestic, imported, gasoline, diesel, and alternative fuels with labs taught by experts in the field. All systems of the automobile are covered in the instruction, including the latest gasoline fuel injection, electronic controls, emission controls, and automatic transmission overhaul.

ADVANTAGES

- Master certified by the National Automotive Technicians Educational Foundation, Inc. (NATEF).
- NYS Licensed Inspection Station.
- Students successfully completing the general automotive service technician program may return for a third year (senior year) in heavy equipment, truck and diesel technician, motorsports technology, or motorcycle and power sports technology and earn a second associate degree.

PROGRAM STUDENT LEARNING OUTCOMES

- Demonstrate a focused, coherent, organized written report.
- Perform mathematical calculations required for entry-level automotive employment.
- Demonstrate a functional ability to read and retain/apply written instructions and specifications relevant to their work environment.
- Demonstrate the ability to understand operation and diagnostic procedures of modern vehicle electrical and electronic systems.
- Demonstrate the ability to describe operation, diagnose, and repair automotive drive train systems.
- Demonstrate the ability to describe operation, diagnose, and repair modern engines.
- Demonstrate the ability to describe operation, diagnose, and repair modern automotive steering, brakes, and suspension systems.

OFFICE OF ACCESSIBILITY SERVICES

Students who believe they need a reasonable accommodation to properly participate in this program may contact Melanie Ryan in the Office of Accessibility Services. This office may be contacted by email at oas@alfredstate.edu or by phone at 607-587-4506. Please keep in mind that some accommodations may take time to implement, so students seeking accommodations are encouraged to contact OAS as early as possible.

DIRECT ENTRY INTO BACCALAUREATE DEGREE PROGRAM

Alfred State automotive service technician graduates may enter directly into the technology management BBA degree program. Graduates who have credit for freshman composition, statistics, literature, history, and speech may complete the BBA program in two additional years; others may complete the BBA program in two-and-one-half years.

OCCUPATIONAL OPPORTUNITIES

- Automatic transmission technician
- Automotive technician specialist
- Automotive diagnostic specialist
- Brake specialist
- Drivability specialist
- Fuel system specialist
- Independent repair shop owner
- Manufacturer’s service representative
- Marine engine service specialist
- Service manager
- Service salesperson
- Shop foreman
- Wheel alignment specialist

EMPLOYMENT STATISTICS

Employment and continuing education rate of 100 percent – 68 percent are employed; 32 percent continued their education.

RELATED PROGRAMS

- Autobody Repair
- Heavy Equipment, Truck and Diesel Technician
- Mechanical Engineering Technology
- Motorsports Technology
- Welding Technology

REQUIRED TOOLS/EQUIPMENT

A list of required tools, equipment, PPE, etc. for all of the program mentioned above can be found at http://www.alfredstate.edu/tool-lists.

A tier 1 laptop computer is required for students entering this degree program. Laptop specifications are available at https://www.alfredstate.edu/required-laptops.

ENTRANCE REQUIREMENTS/RECOMMENDATIONS

Recommended: Algebra

TECHNICAL STANDARDS

Applicants in the automotive service technician program must meet the following physical requirements:

- Must be able to lift 50 pounds to eye level.
- Must be able to effectively communicate with a person 6 to 10 feet away.
- Must be able to visually decipher small images on a monitor or digital display.
- Must be able to distinguish sounds associated with mechanical failures.
- Must be able to comprehend written information found in service repair manuals.
- Must have a valid motor vehicle driver's license.

CERTIFICATION OR LICENSURE

Graduates may take Automotive Service Excellence (ASE) certification exams. Students are eligible to take the New York State inspection certification upon successful completion of their freshman year.

BIOLOGICAL SCIENCE

AAS DEGREE - CODE #1554

Stephen Bauer, Program Coordinator
Email address: bauersm@alfredstate.edu

The biological science degree is a hands-on program designed to prepare you to excel in various scientific laboratories or to continue your education in a number of science or pre-professional fields. The program provides a foundation in biology, chemistry, and mathematics as well as a common core of general education courses.

ADVANTAGES

Biological science is a flexible program that can be tailored to fit the educational requirements of a variety of laboratory-related occupations and transfer opportunities.

PROGRAM STUDENT LEARNING OUTCOMES

- Explain and apply the scientific method in order to document, interpret, and present results of an experiment.
- Evaluate scientific literature to summarize current thinking on a significant topic.
- Display effective interpersonal communication and work skills in the lecture and laboratory setting.
- Choose and employ proper safety practices in the laboratory.
- Demonstrate the calibration and operation of scientific instrumentation.
- Utilize gravimetric and volumetric methods to determine the physical and chemical properties of matter.
- Make both organic and inorganic compounds according to prescribed multi-step syntheses.
- Use microbiological techniques to isolate organisms in pure culture.
- Describe the association of structure and function of plants and animals.
- Classify groups of organisms according to taxonomic criteria and evolutionary relationships.

DIRECT ENTRY INTO BACCALAUREATE DEGREE PROGRAMS

Alfred State biological science graduates may enter directly into the forensic science technology BS, health sciences BS, the interdisciplinary studies BTech, or the technology management BBA degree program.

CONTINUING EDUCATION OPPORTUNITIES

The program also enables graduates to transfer to four-year programs in biology and chemistry as well as programs such as sports medicine, medical technology, ultrasound technology, and pre-professional programs (medicine, veterinary, dentistry, and pharmacy).

OCCUPATIONAL OPPORTUNITIES

- Environmental monitoring
- Pharmaceutical testing
- Wastewater treatment
- Laboratory technician

EMPLOYMENT STATISTICS

Employment and continuing education rate of 100 percent – 0 percent are employed; 100 percent continued their education.

RELATED PROGRAMS

Forensic Science Technology (BS)
Health Sciences (BS)

ENTEACE REQUIREMENTS/RECOMMENDATIONS

Required: Algebra, Geometry, Algebra 2, Biology, Chemistry

OFFICE OF ACCESSIBILITY SERVICES

Students who believe they need a reasonable accommodation to properly participate in this program may contact Melanie Ryan in the Office of Accessibility Services. This office may be contacted by email at oas@alfredstate.edu or by phone at 607-587-4506. Please keep in mind that some accommodations may take time to implement, so students seeking accommodations are encouraged to contact OAS as early as possible.

TECHNICAL STANDARDS

It is essential that students in this degree program are able to fully and safely participate, with or without reasonable accommodation, in all classroom, laboratory, field, internship, and research experiences required for completion of the program. Students in this degree program should be able to:

- Function in a safe manner, not placing themselves, faculty, staff, or other students in jeopardy.
- Appropriately and safely use standard laboratory equipment, materials, and instrumentation to include possession of fine motor skills and mobility.
- Make sensory visual and auditory observations during, and interpret data from, all required laboratory assignments.
- Communicate effectively, both orally and in writing.

GRADUATION REQUIREMENTS

A minimum of 63 credit hours is required for graduation, with an overall cumulative index of 2.0. A grade of “C” or better is required in the core science courses (those which have BIOL or CHEM prefixes).

All laboratory-based courses for this academic program must be completed in an in-person format. Laboratory-based courses in the on-line format will not fulfill degree requirements

REQUIRED EQUIPMENT

A tier 1 laptop computer is required for students entering this degree program. Laptop specifications are available at www.alfredstate.edu/required-laptops.

BUILDING TRADES: BUILDING CONSTRUCTION
AOS DEGREE – CODE #0420
Clinton Gray, Department Chair
Email address: GrayCJ@alfredstate.edu
Tim Rohrer, Program Coordinator
Email address: roherta@alfredstate.edu

The building construction program will provide you with instruction in the basic skills required of the carpenter and the mason in the construction of residential or other light-frame commercial and masonry buildings. You will also gain extensive experience in building layout, foundations, framing, sheathing, exterior and interior trim, block work, brick, and concrete construction.

ADVANTAGES
- Coupled with practical experience, the program provides the necessary theory connected with carpentry and masonry operations, as well as blueprint reading, cost and materials estimating, surveying for building layout and control, and safety on the job.
- A large part of the program is actual on-the-job training under the supervision of qualified instructors. Frequently, concrete and lumber companies instruct students in the uses of their products.

PROGRAM STUDENT LEARNING OUTCOMES
- Measure, layout, and cut materials accurately and build various construction systems.
- Safely set up and operate construction tools and equipment.
- Accurately estimate materials for a project and explain how to manage materials and supervise people.
- Read and interpret construction prints.
- Demonstrate essential problem-solving skills generally employed in the construction industry.
- Demonstrate effective written construction communication.
- Demonstrate effective oral communication.
- Perform common mathematical construction calculations.
- Demonstrate the proper selection and installation of materials used to build various construction projects.
- Perform computer-based research and communication.

OFFICE OF ACCESSIBILITY SERVICES
Students who believe they need a reasonable accommodation to properly participate in this program may contact Melanie Ryan in the Office of Accessibility Services. This office may be contacted by email at oas@alfredstate.edu or by phone at 607-587-4506. Please keep in mind that some accommodations may take time to implement, so students seeking accommodations are encouraged to contact OAS as early as possible.

DIRECT ENTRY INTO BACCALAUREATE DEGREE PROGRAM
Alfred State building trades: building construction graduates may enter directly into the construction supervision BTech or technology management BBA degree program. Graduates who have credit for freshman composition, statistics, literature, history, and speech may complete the baccalaureate program in two additional years; others may complete the program in two-and-one-half years.

OCCUPATIONAL OPPORTUNITIES
- Manufacturers
- Cabinetmaker
- Sales
- Shop foreman
- Installer (cabinets, etc.)
- Dealers
- Maintenance supervisor
- Carpenter
- Contractor
- Self-employment
- Expediter
- Construction superintendent
- Construction foreman
- Mason
- Estimator

EMPLOYMENT STATISTICS
Employment and continuing education rate of 100 percent – 53 percent are employed; 47 percent continued their education.

RELATED PROGRAMS
- Heating, Ventilation, and Air Conditioning Architectural Technology
- Construction Engineering Technology
- Electrical Construction and Maintenance Electrician Masonry
- Surveying Engineering Technology

REQUIRED TOOLS/EQUIPMENT
A list of required tools, equipment, PPE, etc. for all of the programs mentioned above can be found at http://www.alfredstate.edu/tool-lists.
A tier 1 laptop computer is required for students entering this degree program. Laptop specifications are available at www.alfredstate.edu/required-laptops.

Technical Standards
Applicants in the building trades: building construction program must be able to meet the following physical requirements:

- Must be able to lift 50 pounds to shoulder height.
- Must be able to perform safely in the laboratory.
- Must be able to effectively communicate with a person 20 feet away.
- Must be able to climb a ladder and/or able to climb, un-aided, onto and off of equipment using three points of contact.
- Must be able to safely respond to a backup warning alarm.

GRADUATION REQUIREMENTS

A student must successfully complete all courses in the prescribed four-semester program and earn a minimum cumulative index of 2.0, which is equivalent to a “C” average.
BUSINESS ADMINISTRATION

AS DEGREE – CODE #0671

James McGee, Program Coordinator
Email address: mcgeej@alfredstate.edu

Whether you’re interested in the management, administrative, or technical side of modern business, our degree programs will prepare you with the hands-on courses and real-world skills necessary to succeed in this ever-evolving field. Our business administration AS (transfer) program is designed primarily to provide you with the foundation needed to continue your formal education in the business field in a four-year program.

ADVANTAGES

• Prepares graduates for the rapid pace of technological advancement and an increasingly global society by emphasizing managerial and technical skills and the ability to stay abreast in the dynamic field of business in today’s economy.
• Students gain a thorough foundation in written and oral communication, presentation, and decision-making skills, as well as experience working as part of a team.

Program Student Learning Outcomes

• Recognize the primary theories within the principle functional areas of business.
• Demonstrate professional business communication.
• Illustrate critical thinking and effective decision-making within the principle functional areas of business.
• Identify ethical issues within business.

DIRECT ENTRY INTO BACCALAUREATE DEGREE PROGRAMS

Alfred State business administration graduates may enter directly into either the business administration BBA, the financial planning BBA, the interdisciplinary studies BTech, or the technology management BBA degree program at Alfred State.

CONTINUING EDUCATION OPPORTUNITIES

Students may transfer directly into one of our own BBA degree programs or to another college. Although not limited to these schools, common transfer institutions include: Alfred University, St. Bonaventure University, Rochester Institute of Technology, St. John Fisher College, SUNY at Albany, University at Buffalo, SUNY College at Brockport, SUNY College at Geneseo, SUNY College at Oneonta, SUNY College at Oswego, SUNY at Binghamton, Cornell University, Canisius College, Niagara University, and Hilbert College.

EMPLOYMENT STATISTICS

Employment and continuing education rate of 100 percent – 9 percent are employed; 91 percent continued their education.

* Calculus I is essential to achieving junior status in business programs at the following SUNY campuses: the University at Buffalo, Binghamton University, and the University at Albany. Therefore, Calculus I is recommended if you are continuing your education at any one of those universities.

GRADUATION REQUIREMENTS

62 semester hours with a 2.0 cumulative index.

END-OF-PROGRAM EXAM REQUIREMENTS

All students are required to complete an end-of-program exam. This exam will be taken in the capstone course for the student’s specific program in BUAD 4053 Business Law II. The end-of-program exam will also be considered an assignment in the capstone course. The benefit of taking the end-of-program exam is to test the student’s knowledge at the time of graduation. Students may include the progress from the end-of-program exams on their resume.

Taking the end-of-program exam will have some fees, which are currently $23 per exam. Exams will be taken once and they will impact the student’s capstone course grade by 5%. Please refer to the syllabi for the relevant capstone course to know the grading scale for the end-of-program exam.

The end-of-program exams are required, not optional.

Information on how to take the exams will be given in the course prior to the end-of-program exam.

How should I prepare for the assessment exam?

The comprehensive end-of-program exam covers topics taught throughout the degree program, which are aligned to the topics required for accreditation. The preparation for the exam comes from your educational experience with the school, specifically through the required courses for your degree. The exam assesses the foundational knowledge areas for your discipline.
Whether you're interested in the management, administrative, or technical side of modern business, our degree programs will prepare you with the hands-on courses and real-world skills necessary to succeed in this ever-evolving field. Our business administration BBA offers you preparation for positions of leadership and responsibility in business and industry, governmental and not-for-profit organizations, and graduate study. Students develop important analytical and critical thinking skills necessary for success in today's business environment.

ADVANTAGES

- Prepares graduates for the rapid pace of technological advancement and an increasingly global society by emphasizing managerial and technical skills and the ability to stay abreast in the dynamic field of business in today's economy.
- The BBA degree in business administration is designed to allow students to enter as freshmen or to transfer in after earning their AAS or AS business degree.
- An accelerated three-year option exists for highly motivated and academically talented students.

PROGRAM STUDENT LEARNING OUTCOMES

- Demonstrate technical competence in domestic and global environments within the principle functional areas of business.
- Analyze business problems and devise solutions using critical thinking, decision-making processes, and decision-support tools.
- Formulate a strategic plan using effective teamwork while integrating the major functional areas of business and innovation.
- Evaluate software, technology, and information systems in regards to business operations.
- Identify comprehensive business issues and communicate findings and solutions.
- Identify the strategic management environment in relation to the current financial, legal, economic, and social environments.
- Analyze the role of ethics, government regulations, and legalities in management processes.

OCCUPATIONAL OPPORTUNITIES

- Administrative services manager
- Business managers of artists/athletes
- Business operations specialist
- Financial analysts/managers/specialists
- General and operations managers
- Human resource specialist
- Loan counselors/officers
- Management analysts
- Marketing managers
- Sales managers

EMPLOYMENT STATISTICS

Employment and continuing education rate of 100 percent – 86 percent are employed; 14 percent continued their education.

## BUSINESS ADMINISTRATION ACCELERATED (3-YEAR) PROGRAM

### TYPICAL THREE-YEAR PROGRAM STRUCTURE

#### Year 1 - Semester 1 - Fall
- **ACCT 1124** Financial Accounting 4
- **CISY xxx3** Computer Elective 3
- **MKTG 2073** Principles of Marketing 3
- **MATH xxx3** Math Elective 3
- **COMP 1503** Freshman Composition 3

#### Year 1 - Winter Session
- **BUAD 3153** Fundamentals of Management 3

#### Year 1 - Semester 2 - Spring
- **ACCT 2224** Managerial Accounting 4
- **ECON 1013** Principles of Macroeconomics 3
- **LITR xxx3** Literature Elective 3
- **MATH xxx3** Statistics I or Statistical Methods 3
- **SPCH 1083** Effective Speaking 3

#### Year 1 - Summer Session
- **XXXX xxx3** Free Elective 3
- **XXXX xxx3** Gen Ed Elective 3

#### Year 2 - Semester 3 - Fall
- **ECON 2023** Principles of Microeconomics 3
- **XXXX xxx3** Business Elective 3
- **BUAD 2033** Business Communication 3
- **BUAD 3043** Business Law I 3
- **BUAD 5003** Management Communications 3
- **XXXX xxx3** Open Elective 3

#### Year 2 - Winter Session
- **XXXX xxx3** Gen Ed Elective 3

#### Year 2 - Semester 4 - Spring
- **BUAD 7273** Organizational Behavior 3
- **BUAD 5013** Principles of Leadership 3
- **BUAD 6113** Strategic & Creative Prob Solv 3
- **BUAD 5023** Human Resource Management 3
- **XXXX xxx3** Gen Ed or Business Elective 3
- **XXXX xxx3** Business Elective 3

#### Year 2 - Summer Session
- **XXXX xxx3** Gen Ed Elective 3
- **XXXX xxx3** Free Elective 3

#### Year 3 - Semester 5 - Fall
- **BUAD 7023** Legal Environment of Business 3
- **XXXX xxx3** Business Elective (Upper) 3
- **BUAD 7033** Operations Management 3
- **BUAD 6003** Managerial Finance 3
- **XXXX xxx3** Business Elective 3

#### Year 3 - Winter Session
- **XXXX xxx3** Gen Ed or Business Elective 3

#### Year 3 - Semester 6 - Spring
- **BUAD 8003** Management Info Systems - MIS 3
- **BUAD 8013** International Business 3
- **BUAD 5043** Business Ethics 3
- **BUAD 8023** Strategic Management Capstone 3
- **XXXX xxx3** Business Elective (Upper) 3

### GRADUATION REQUIREMENTS
- 122 credit hours
- 30 credit hours of the 45 upper-level credit hours for this degree must be taken at Alfred State
- Cumulative overall index of at least 2.0
- Seven of the 10 SUNY approved General Education categories must be fulfilled

### END-OF-PROGRAM EXAM REQUIREMENTS

All students are required to complete an end-of-program exam. This exam will be taken in the capstone course for the student’s specific program in BUAD 8023 Strategic Management Capstone. The end-of-program exam will also be considered an assignment in the capstone course. The benefit of taking the end-of-program exam is to test the student’s knowledge at the time of graduation. Students may include the progress from the end-of-program exams on their resume. Taking the end-of-program exam will have some fees, which are currently $45 per exam. Exams will be taken once and they will impact the student’s capstone course grade by 5%. Please refer to the syllabi for the relevant capstone course to know the grading scale for the end-of-program exam.

The end-of-program exams are required, not optional.

Information on how to take the exams will be given in the course prior to the end-of-program exam.

**How should I prepare for the assessment exam?**

The comprehensive end-of-program exam covers topics taught throughout the degree program, which are aligned to the topics required for accreditation. The preparation for the exam comes from your educational experience with the school, specifically through the required courses for your degree. The exam assesses the foundational knowledge areas for your discipline.
CNC MANUFACTURING AND MACHINING
AOS DEGREE – CODE #0551
Bradley Thompson, Department Chair
Email address: thompsbj@alfredstate.edu

Did you know that the average salary for a machinist in industry today is ranked the seventh highest among all American professions (including doctors, lawyers, etc.), and is higher than the average salary for all four-year college graduates? If earning a high salary is on your list for selecting occupational opportunities, you need to look at CNC manufacturing and machining. More than 50 percent of all machinists in America today will retire in the next 10 to 15 years. This fact alone shows the tremendous opportunity that awaits the trained and well-qualified machinist.

The CNC manufacturing and machining program features instruction in the safe operation of all basic machine tools, such as lathes, milling machines, drill presses, various saws, and grinding equipment, as well as proper measurement and inspection of parts. Interpreting engineering drawings and mathematical calculations required by all machinists is also presented.

The second year includes shop math and CNC (Computer Numerical Controls) programming with an emphasis on hands-on skills using advanced machine tools. A strong emphasis on shop safety is an integral part of the program. The AOS degree program includes operation of CNC lathes (turning centers), and CNC milling machines (machining centers). This includes set-up, as well as operation of the machines. Interpreting engineering drawings and control documents will also be emphasized. The understanding of quality control and how to conduct appropriate measurements and inspection will be integrated into the course work. The intent is to graduate someone with overall advanced machine shop skills.

PROGRAM STUDENT LEARNING OUTCOMES

• Demonstrate and apply safe operation of all machine tools.
• Student will be proficient in basic lathe operation.
• Student will be proficient in basic milling operation.
• Demonstrate mathematical operations using accepted mathematical applications.
• Demonstrate ability to perform advanced procedures on assigned projects.
• Student will be proficient in writing CNC programs for lathe.
• Student will be proficient in writing CNC programs for milling machine.
• Student will be proficient and apply GDT to all projects.
• Student will demonstrate ability to operate CNC equipment.
• Student will demonstrate all knowledge in capstone project.

OFFICE OF ACCESSIBILITY SERVICES
Students who believe they need a reasonable accommodation to properly participate in this program may contact Melanie Ryan in the Office of Accessibility Services. This office may be contacted by email at oas@alfredstate.edu or by phone at 607-587-4506. Please keep in mind that some accommodations may take time to implement, so students seeking accommodations are encouraged to contact OAS as early as possible.

DIRECT ENTRY INTO BACCALAUREATE DEGREE PROGRAM
Alfred State CNC manufacturing and machining graduates may enter directly into the technology management BBA degree program. Graduates who have credit for freshman composition, statistics, literature, history, and speech may complete the BBA program in two additional years; others may complete the BBA program in two-and-one-half years.

OCCUPATIONAL OPPORTUNITIES

• CNC programmers, machinists, and engineers
• Tool and die makers
• Machine setters and operators
• Machinists
• Mold makers

EMPLOYMENT STATISTICS
Employment and continuing education rate of 80 percent – 80 percent are employed.

GARADUATION REQUIREMENTS
A student must successfully complete all courses in the prescribed four-semester program and earn a minimum cumulative index of 2.0, which is equivalent to a “C” average. Students are required to have earned a minimum grade of “C” in MACH. CALC. I & II, and in the MATT 4003 senior project. (Articulation is available in MACH. CALC. area.)

RELATED PROGRAMS
Welding Technology

REQUIRED TOOLS/EQUIPMENT
A list of required tools, equipment, PPE, etc. for all of the programs mentioned above can be found at http://www.alfredstate.edu/tool-lists.

ENTRANCE REQUIREMENTS/RECOMMENDATIONS
Recommended: Algebra

TECHNICAL STANDARDS
Applicants for the CNC manufacturing and machining program must meet the following physical requirements:

• Must be able to perform safely in the shop.
• Must be able to lift 50 pounds up to eye level.
• Must be able to communicate orally with a person 6 to 10 feet away in a shop environment.
• Must be able to visually decipher an oscilloscope monitor and digital/analog meter, and scan tool displays.
• Must be able to diagnose mechanical failures that are distinguished audibly.
• Must be able to understand and retain information found in service repair manuals and use diagnostic flow charts.
• Must be able to stand for long periods of time.

Good eyesight is recommended.
CIVIL ENGINEERING TECHNOLOGY
DEGREE - CODE #1102
Erin Vitale, Department Chair and Program Coordinator
Email address: vitaleem@alfredstate.edu

ADVANTAGES
• Curriculum developed with Industry.
• Strong connection to the construction of civil works.

PROGRAM STUDENT LEARNING OUTCOMES
• Utilize principles, hardware, and software that are appropriate to produce
drawings, reports, quantity estimates, and other documents related to civil
engineering.
• Conduct standardized field and laboratory tests related to civil engineering.
• Utilize surveying methods appropriate for land measurement and/or
construction layout.
• Apply fundamental computational methods and elementary analytical
techniques in sub-disciplines related to civil engineering.
• Plan and prepare documents appropriate for design and construction.
• Perform economic analysis and cost estimates related to design,
construction, operations, and maintenance of systems associated with civil
engineering.
• Select appropriate engineering materials and practices.
• Perform standard analysis and design in transportation, water and
development.

PROGRAM EDUCATIONAL OBJECTIVES
Program educational objectives were established with the assistance of
the Industrial Advisory Committee and are reviewed periodically. The civil
engineering technology program produces graduates who:
• Apply knowledge, techniques, skills and modern tools of mathematics,
science, engineering, and technology to solve broadly-defined engineering
problems appropriate to the civil engineering technology discipline.
• Design systems, components, or processes meeting specified needs for
broadly-defined engineering problems appropriate to the civil engineering
technology discipline.
• Apply written, oral, and graphical communication in broadly defined
technical and non-technical environments; and an ability to identify and
use appropriate technical literature.
• Conduct standard tests, measurements, and experiments and to analyze
and interpret the results to improve processes.
• Function effectively as a member as well as a leader on technical teams.

OCCUPATIONAL OPPORTUNITIES
• Civil Engineer

EMPLOYMENT STATISTICS
New program, no employment data available.

Related Programs
• Construction Engineering Technology
• Construction Management Technology
• Survey Engineering Technology
• Survey and Geomatics Engineering Technology

ENTRANCE REQUIREMENTS/RECOMMENDATIONS
Required: Algebra, Geometry, Algebra 2
Recommended: Physics

OFFICE OF ACCESSIBILITY SERVICES
Students who believe they need a reasonable accommodation to
properly participate in this program may contact Melanie Ryan in the
Office of Accessibility Services. This office may be contacted by email
at oas@alfredstate.edu or by phone at 607-587-4506. Please keep in mind
that some accommodations may take time to implement, so students seeking
accommodations are encouraged to contact OAS as early as possible.

TECHNICAL STANDARDS
Students in the civil engineering technology program must meet the following
requirements:
• Students must have the ability to use industry-standard software and
computers.
• Students must have the ability to traverse varying types of construction
sites.

REQUIRED EQUIPMENT
A tier 2 laptop computer will be required of all students. See laptop
specifications at www.alfredstate.edu/required-laptops.

#### GENERAL NOTES:

Students receiving credit for math classes shown in the typical eight-semester program may require additional LAS electives to complete degree requirements.

Must meet seven of the 10 General Education areas.

#### GRADUATION REQUIREMENTS

2.0 cumulative grade point average, and department requirement of 2.0 grade point average in major courses (CIVL).
COMPUTED TOMOGRAPHY
CERTIFICATE – CODE #3060
Jenna Zetwick, Program Coordinator
Email address: zetwick@alfredstate.edu

The certificate program in computed tomography (CT) is an upper-level online program that will produce graduates who are capable of working under the supervision of a physician, and who are proficient in the application of computed tomography imaging equipment and techniques to gather critical radiologic data to enable the diagnosis of a variety of conditions and diseases. The program targets the acquisition of specialized CT certification by place-bound college graduates currently employed in the medical field as licensed radiological technologists.

The curriculum will include instruction in obtaining, reviewing, and integrating patient histories and data; patient instruction and care; anatomic, physiologic and pathologic data recording; radiologic data processing; computed tomography equipment operation; and professional standards and ethics. Students in the program complete both didactic classes online and a clinical rotation at designated hospitals and clinics. The computed tomography program is a two-semester (15 credits in total) program. Upon successful completion of the program requirements, students will be eligible to sit for national certification examinations for computed tomography.

ADVANTAGES
The CT certificate program targets existing radiologic technologists who wish to expand and diversify their clinical skills within the healthcare market place. With the exception of the clinical requirement, the program is designed to be an online experience.

PROGRAM STUDENT LEARNING OUTCOMES
- Demonstrate correct positioning skills.
- Select proper technical factors.
- Utilize appropriate radiation protection techniques.
- Exhibit patient-centered skills.
- Critique images to determine diagnostic quality.
- Display proper work ethics.
- Adapt standard procedures for non-routine patients.
- Apply written communication skills to the construction of documents of record that are established professional guidelines.
- Apply oral communication skills to the explanation of ideas and scientific terminology.
- Use technological resources effectively and appropriately, synthesize theory and concepts from the liberal education domain and other professions into computed tomography.

CONTINUING EDUCATION OPPORTUNITIES
Students may transfer directly into one of our own BS or BTech degree programs or to another college.

OCCUPATIONAL OPPORTUNITIES
- Hospitals
- Government agencies
- Clinics
- Private physician offices

EMPLOYMENT STATISTICS
Employment of computed tomography clinicians is projected to grow 13 percent from 2016 to 2026, much faster than the average for all occupations. Nationally in 2016, there were 241,700 employed as noted by the United States Bureau of Labor Statistics.

RELATED PROGRAMS
Health Sciences
Interdisciplinary Studies
Healthcare Management

ENTRANCE REQUIREMENTS/RECOMMENDATIONS
Required: Associate degree in radiologic technology or certificate of completion from JRCERT program. Must provide proof of ARRT certification.

REQUIRED EQUIPMENT
A tier 1 laptop computer is required for students entering the accounting program. Laptop specifications are available at http://www.alfredstate.edu/required-laptops.

Graduation Requirements
- 16 total semester credit hours
- 2.0 minimum cumulative grade point average
- Approval of department faculty
The computer engineering technology program will provide you with the cutting-edge industry knowledge and hands-on skills necessary to secure a career as an applied engineer capable of installing, designing, supporting, and maintaining computer systems and networks. This is an active, technically oriented program with a focus on computer system hardware and network infrastructure, as well as software development and operating systems. We’ve designed these degrees to prepare you for professional examinations leading to certifications such as the CompTIA A+ and Network+, Microsoft Certified System Administrator (MCSA), Microsoft Certified System Engineer (MCSE), and Cisco Certified Network Associate (CCNA).

ADVANTAGES

• Both AAS and BS programs are accredited by the Engineering Technology Accreditation Commission of ABET, http://www.abet.org.
• In the first year of the program, students gain a foundation of knowledge in digital and electronic circuits followed by the development of skills in computer hardware, operating systems, and networking.

DIRECT ENTRY INTO BACCALAUREATE DEGREE PROGRAMS

Alfred State computer engineering technology AAS graduates may enter directly into either the computer engineering technology BS, the interdisciplinary studies BTech, or technology management BBA degree program.

CONTINUING EDUCATION OPPORTUNITIES

Graduates from the AAS computer engineering technology program are eligible to continue their education by enrolling in a baccalaureate program in computer engineering technology at Alfred State or elsewhere. Our computer engineering technology AAS two-year degree program is the same as the first two years of the computer engineering technology BS four-year program.

OCCUPATIONAL OPPORTUNITIES

• Computer network technician/technologist (2/4 years)
• Software/web programmer and developer (4 years)
• Electrical or electronics technician/technologist (2/4 years)
• Communication Technologist (4 years)
• Network administrator (4 years)
• Cyber security technologist (4 years)
• Embedded systems and robotics technician/technologist (2/4 years)

EMPLOYMENT STATISTICS

Employment and continuing education rate:

Computer engineering technology (AAS degree): 100 percent are employed.

Computer engineering technology (BS degree): 80 percent are employed.

RELATED PROGRAMS

Computer Information Systems
Computer Science
Cyber Security
Electrical Engineering Technology
Information Technology: Network Administration

CERTIFICATION OR LICENSURE

The Bachelor of Science in computer engineering technology is recognized as a "professional degree" that qualifies for experience/education credit toward Professional Engineering (PE) licensure. Graduates from Alfred State’s program are allowed six years of the required 12 years of education/experience credit, and are eligible to take the Fundamentals of Engineering (FE), formerly called Engineer-in-Training (EIT), examination upon graduation.

ENTRANCE REQUIREMENTS/RECOMMENDATIONS (AAS)

Required: Algebra, Geometry, Algebra 2

Recommended: Physics

OFFICE OF ACCESSIBILITY SERVICES

Students who believe they need a reasonable accommodation to properly participate in this program may contact Melanie Ryan in the Office of Accessibility Services. This office may be contacted by email at oas@alfredstate.edu or by phone at 607-587-4506. Please keep in mind that some accommodations may take time to implement, so students seeking accommodations are encouraged to contact OAS as early as possible.

GRADUATION REQUIREMENTS - AAS DEGREE

• 62 semester credit hours in program as listed above
• 25 semester credit hours of liberal arts and sciences
• Four of 10 General Education areas
• 2.0 or above cumulative grade point average
• 2.0 or above grade point average in major courses (ELET, CISY)
• Approval of department faculty.

GRADUATION REQUIREMENTS - BS DEGREE

• 126 semester credit hours in eight-semester program
• 60 semester credit hours of liberal arts and sciences
• Seven of 10 General Education areas
• Minimum 45 upper-division credit hours
• Minimum 24 hours upper division in major
• Minimum of 30 hours upper division in residence
• 2.0 or above cumulative grade point average
• 2.0 or above grade point average in major courses (BSET, CISY, ELET)
• Approval of department faculty

REQUIRED EQUIPMENT

A tier 2 laptop computer is required for students in the computer engineering technology programs. Laptop specifications are available at www.alfredstate.edu/required-laptops. Some courses may require specialized tools and/or electronic components.

If not required to take MATH 1033 and MATH 2043, take LAS elective to complete degree requirements of 3 credits; otherwise take free elective.

Be advised that a prior felony conviction may impede a student's ability to receive licensure.
As more organizations install and employ computer networks, a need has developed for the “resident expert” to administer the system, install software, establish security, and train others. As a graduate of the computer information systems (CIS) program, you will be well positioned to serve that need with a foundation in programming, databases, and networking.

**ADVANTAGES**

- Students can complete the Cisco Certified Network Association curriculum and have a strong foundation to pursue professional certifications for CompTIA A+, Network+, and CCNA. The college has a Pearson Vue testing center.
- Our laboratories provide students with ample hands-on experience, giving them a considerable edge in the highly competitive computer and information technology job market.

**PROGRAM STUDENT LEARNING OUTCOMES**

- Communicate effectively and efficiently, both orally and in writing.
- Employ critical thinking and problem-solving skills in developing solutions to problems.
- Create and modify functional, clear, concise software design and implementation with current programming languages.
- Install, configure, troubleshoot, and administer a simple network.
- Demonstrate proficiency either in two or more operating systems or two or more database systems.
- Demonstrate proficiency in basic office automation software.
- Solve problems in a team setting as a team member.
- Identify issues of professional ethics, including copyright laws, plagiarism, and professional etiquette.
- Solve applied mathematical problems.

**DIRECT ENTRY INTO BACCALAUREATE DEGREE PROGRAMS**

Alfred State computer information systems graduates may enter directly into either the cyber security BTech, information technology: applications software development BTech, information technology: network administration BTech, information technology: web development BTech, the interdisciplinary studies BBA degree program, or any of the major BBA programs.

**CONTINUING EDUCATION OPPORTUNITIES**

To facilitate the transfer of graduates choosing to continue their education at the baccalaureate level, students are encouraged to make their intentions known to their academic adviser during their freshman year. Through the careful use of elective courses, students can realize excellent transfer credit.

Transfer into the information technology programs: network administration, web development, and applications software development will place them at junior status.

**OCCUPATIONAL OPPORTUNITIES**

- Network management
- Systems administration
- Computer technology
- Computer support
- Computer programming
- Web development
- Network administrators

**EMPLOYMENT STATISTICS**

Employment and continuing education rate of 100 percent – 100 percent continued their education.

**RELATED PROGRAMS**

- Computer Engineering Technology
- Computer Science
- Cyber Security
- Information Technology: Applications Software Development

**ENTRANCE REQUIREMENTS/RECOMMENDATIONS**

- Required: Algebra, Geometry*
- Recommended: Algebra 2
- * Students who place into intermediate algebra will be required to take one additional mathematics course.

**OFFICE OF ACCESSIBILITY SERVICES**

Students who believe they need a reasonable accommodation to properly participate in this program may contact Melanie Ryan in the Office of Accessibility Services. This office may be contacted by email at oas@alfredstate.edu or by phone at 607-587-4506. Please keep in mind that some accommodations may take time to implement, so students seeking accommodations are encouraged to contact OAS as early as possible.

**REQUIRED EQUIPMENT**

A tier 2 laptop computer is required for students entering the computer information systems program. Laptop specifications are available at www.alfredstate.edu/required-laptops.

* If not required, take LAS elective to complete degree requirements of 3 credits, otherwise take free elective.

Adviser-approved mathematics courses do not include MATH 1004, MATH 1104, MATH 1014, or MATH 1143.

Professional electives may include CISY, business, and selected courses from math or engineering as approved by the adviser.

GRADUATION REQUIREMENTS

Must complete a minimum of 24 credit hours of required CISY courses and nine credit hours of professional electives approved by adviser with a minimum 2.0 cumulative index. Twenty credit hours of liberal arts courses, a minimum overall cumulative index of 2.0, along with other requirements as stated in the College Academic Regulations, must be met by candidates of the AAS degree. Must successfully complete a minimum of 61 credit hours of course work.
COMPUTER SCIENCE
AS DEGREE – CODE #0532
Ronald Keeney, Program Coordinator
Email address: keeneyrh@alfredstate.edu

The computer science program at Alfred State was one of the originally established programs in the SUNY system. It is a comprehensive program, which will prepare you for this fast-moving field with courses in the underlying theories of computing, as well as the specific applications of information manipulation and problem solving.

ADVANTAGES
Students develop strong written and oral communication, critical thinking, and problem-solving skills.

PROGRAM STUDENT LEARNING OUTCOMES
- Communicate effectively and efficiently, both orally and in writing.
- Employ critical thinking and problem-solving skills in developing solutions to problems.
- Create and modify functional, clear, concise software design and implementation with current programming languages.
- Create functional webpages using web scripting languages.
- Demonstrate the scientific method in one area of natural science.
- Assess and implement appropriate data structures within a programming project.
- Demonstrate proficiency in basic office automation software.
- Solve problems in a team setting as a team member.
- Identify issues of professional ethics, including copyright laws, plagiarism, and professional etiquette.
- Demonstrate proficiency with mathematical principles through the level of calculus or discrete mathematics.

DIRECT ENTRY INTO BACCALAUREATE DEGREE PROGRAMS
Alfred State computer science graduates may enter directly into either the information technology: applications software development BTech, interdisciplinary studies BTech or technology management BBA degree program.

CONTINUING EDUCATION OPPORTUNITIES
The primary focus of the computer science program is transfer. The AS degree granted is specifically designed to maximize transfer credit to four-year programs. Transfer into the information technology programs: network administration, web development, and applications software development is possible with junior status with careful selection of courses for electives.

OCCUPATIONAL OPPORTUNITIES
- Network management
- Systems administration
- Computer engineering technology
- Computer support
- Computer programming
- Database administration
- Web development

EMPLOYMENT STATISTICS
Employment and continuing education rate of 100 percent – 100 percent continued their education.

GRADUATION REQUIREMENTS
Must complete a minimum of 24 credit hours of required CISY courses and one professional elective approved by adviser with a 2.0 cumulative index. A minimum cumulative index of 2.0, along with other requirements as stated in the College Academic Regulations, must be met by candidates for the AS degree. A minimum of 62 credit hours of course work with 30 credit hours in liberal arts is required.
CONSTRUCTION ENGINEERING TECHNOLOGY

AAS DEGREE – CODE #0577

Erin Vitale, Program Coordinator
Email address: vitaleem@alfredstate.edu

The program in construction engineering technology includes a well-designed balance of theoretical and laboratory studies, providing students with a broad knowledge of civil engineering technology and the construction fields. This field is expanding rapidly, and our technical curricula will give you a broad-based education, as well as the hands-on skills and experience needed for leadership in today’s construction business.

ADVANTAGES

• The college offers testing and certification with the American Concrete Institute that students can earn their first semester.
• Students develop the ability to function effectively as a member of a technical team, as well as the ability to apply written, oral, and graphical communication in both technical and nontechnical environments.
• This program is accredited by the Engineering Technology Accreditation Commission of ABET, http://www.abet.org.

A student who completes the AAS degree can complete the bachelor’s degree in two additional years.

PROGRAM STUDENT LEARNING OUTCOMES

• An ability to apply knowledge, techniques, skills and modern tools of mathematics, science, engineering, and technology to solve well-defined engineering problems appropriate to the discipline.
• An ability to design solutions for well-defined technical problems and assist with the engineering design of systems, components, or processes appropriate to the discipline.
• An ability to apply written, oral, and graphical communication in well-defined technical and non-technical environments; and an ability to identify and use appropriate technical literature.
• An ability to conduct standard tests, measurements, and experiments and to analyze and interpret the results.
• An ability to function effectively as a member of a technical team.

PROGRAM EDUCATIONAL OBJECTIVES

Program educational objectives were established with the assistance of the Industrial Advisory Committee and are reviewed periodically. The construction engineering technology program produces graduates who:

• Write, read, and orally present technical reports, letters, and projects that meet the standards of the profession.
• Understand and are able to complete various activities related to construction such as interpret construction documents, draw plans using computer-aided drafting, complete an estimate, manage project activities, and be able to technically review construction materials used on the project.
• Recognize the need for and have an ability to engage in continued formal education as well as lifelong learning.

DIRECT ENTRY INTO BACCALAUREATE DEGREE PROGRAMS

Alfred State construction engineering technology graduates may enter directly into either the construction management BS, the construction supervision BTech, the interdisciplinary studies BTech, or the technology management BBA degree program.

ENTRANCE REQUIREMENTS/RECOMMENDATIONS

Required: Algebra, Geometry, Algebra 2
Recommended: Physics

RECOMMENDED EQUIPMENT

A tier 2 laptop computer is required for students entering the construction engineering technology program. Laptop specifications are available at www.alfredstate.edu/required-laptops.

Entry level of student into math and composition/literature sequences is a function of student’s high school preparation and mathematics and English placement examinations.

Students receiving credit for math classes shown in the typical four-semester program may require additional LAS electives to complete degree requirements.

Students must complete two technical electives and two General Education electives.

Suggested Technical Electives:

- CIVL 2204  Surveying II
- CIVL 6113  Environmental Technical Concepts
- CIVL 7103  Land Development and Design
- ARCH 4013  Municipal Codes & Regulations
- Other technical electives by department approval.

GRADUATION REQUIREMENTS

2.0 cumulative grade point average, and department requirement of 2.0 grade point average in major courses (CIVL).
CONSTRUCTION MANAGEMENT

BS DEGREE – CODE #1761
Reza Yadollahi, PhD, Program Coordinator
Email address: yadollahim@alfredstate.edu

Do you dream of a leadership role in the construction industry? Then this program is for you. Our expert faculty have designed a series of courses that will familiarize you with all aspects of construction management. Technical course work is combined with specific construction management courses as well as several business courses, giving you a broad-based education.

ADVANTAGES
• Alfred State students compete annually in the Associated Schools of Construction Northeast Region student competition.
• Students can compete for scholarships given by the Associated General Contractors of New York.
• Seniors in the BS program are required to take the Associate Constructor Level I exam prior to graduation.
• This program is accredited by the American Council for Construction Education (ACCE), [1717 North Loop Road 1604 East, Suite 320, San Antonio, TX 78232].
• This program is accredited by the Applied and Natural Science Accreditation Commission of ABET, www.abet.org
• Students typically gain work experience through summer employment with construction companies.

PROGRAM STUDENT LEARNING OUTCOMES (ACCE ACCREDITATION)
• Create written communications appropriate to the construction discipline.
• Create oral presentations appropriate to the construction discipline.
• Create a construction project safety plan.
• Create construction project cost estimates.
• Create construction project schedules.
• Analyze professional decisions based on ethical principles.
• Analyze construction documents for planning and management of construction processes.
• Analyze methods, materials, and equipment used to construct projects.
• Apply construction management skills as a member of a multi-disciplinary team.
• Apply electronic-based technology to manage the construction process.
• Apply basic surveying techniques for construction layout and control.
• Understand different methods of project delivery and the roles and responsibility of all constituencies involved in the design and construction process.
• Understand construction risk management.
• Understand construction accounting and cost control.
• Understand construction quality assurance and control.
• Understand construction project control processes.
• Understand the basic principles of sustainable construction.
• Understand the basic principles of structural behavior.
• Understand the basic principles of mechanical, electrical, and piping systems.

ENTERPRISE REQUIREMENTS/RECOMMENDATIONS
Required: Algebra, Geometry, Algebra 2
Recommended: Physics

OFFICE OF ACCESSIBILITY SERVICES
Students who believe they need a reasonable accommodation to properly participate in this program may contact Melanie Ryan in the Office of Accessibility Services. This office may be contacted by email at oas@alfredstate.edu or by phone at 607-587-4506. Please keep in mind that some accommodations may take time to implement, so students seeking accommodations are encouraged to contact OAS as early as possible.

TECHNICAL STANDARDS
Students in the construction management program must meet the following requirements:
• Students must have the ability to traverse various types of construction sites.
• Students must have the ability to use industry standard software and computers.

REQUIRED EQUIPMENT
A tier 2 laptop computer is required for students entering the construction management program. Laptop specifications are available at www.alfredstate.edu/required-laptops.

### GENERAL NOTES:

Students receiving credit for math classes shown in the typical eight-semester program may require additional LAS electives to compete degree requirements.

Must meet seven of the 10 General Education areas.

### GRADUATION REQUIREMENTS

2.0 cumulative grade point average, and department requirement of 2.0 grade point average in major courses (CIVL).
CONSTRUCTION SUPERVISION

BTECH DEGREE – CODE #2649

Erin Vitale, Department Chair and Program Coordinator
Email address: vitaleem@alfredstate.edu

The Bachelor of Technology (BTECH) in construction supervision is a completion degree that will add valuable construction business skills to a technical background. Students with carpentry, heavy equipment, electrical, mechanical, and architecture skills, to name a few, will be able to see how their skills are utilized to build the environment in which they live. The BTECH in construction supervision will give graduates a working knowledge of construction estimating, scheduling, and contract law. These skills along with their technical competency will make graduates a prized asset to companies that are involved in the construction industry. The program includes a full-semester internship.

The program is set up as a completion degree, meaning students entering must have an associate degree or 60 credits in a related curriculum. A true 2+2 can be achieved with 21 credits of liberal arts and sciences, including five silos of SUNY General Education completed before entering the program.

ADVANTAGES

• Students take their distinct technical background and apply it in the construction industry through project-based learning.
• With a cohort of students from many different fields of prior study, students will gain an interdisciplinary appreciation of the construction industry.
• Students will gain a strong background in construction contractual requirements.
• Students will expand their understanding of construction job site cost control.

PROGRAM STUDENT LEARNING OUTCOMES

• Create written communication appropriate to the construction discipline.
• Create oral presentations.
• Create a construction project safety plan.
• Create construction project cost estimates.
• Create construction project schedules.
• Analyze professional decisions based on ethical principles.
• Understand different methods of project delivery and the roles and responsibilities of all constituencies involved in the design and construction process.
• Understand construction accounting and cost control.

OCCUPATIONAL OPPORTUNITIES

• Assistant superintendent
• Equipment and material sales
• Project manager for specialty trade contractors
• Superintendent

EMPLOYMENT STATISTICS

Employment and continuing education rate of 100 percent – 100 percent are employed.

ARTICULATION

Alfred State accepts students from other two-year institutions as juniors into the construction supervision BTECH program with appropriate course work and grade point average.

GRADUATION REQUIREMENTS

• 2.0 cumulative GPA and 2.0 in major courses (CIVL)
• 30 credits liberal arts and sciences
• Seven of 10 General Education silos with math silo required

RELATED PROGRAMS

• Mechanical Engineering Technology

ENTRANCE REQUIREMENTS/RECOMMENDATIONS

• Required: Successful completion of an associate degree in a construction-related field or at least 60 transferrable credit hours, and a minimum cumulative GPA of 2.0. Other majors can be considered with construction related work experience. Applicants who have gone through a certified apprentice program and have obtained a journeyman’s card with a recognized trade union may also be considered.
• Recommended: A minimum of 21 credits in liberal arts and sciences, and five different general education fields covered (BC and MA included).
• Students without the required college credits can come into the individual studies (AS) program as a bridge program to the construction supervision (BTECH) program.
• Please Note: Students entering from an AOS degree program are accepted in the program as ASOP students to facilitate completion of the five bridge courses (15 credits) in Liberal Arts and Sciences/General Education. The Civil Engineering Technology Department chair or curriculum coordinator will review all college credits earned and will recommend specific courses to complete this bridge.

OFFICE OF ACCESSIBILITY SERVICES

Students who believe they need a reasonable accommodation to properly participate in this program may contact Melanie Ryan in the Office of Accessibility Services. This office may be contacted by email at oas@alfredstate.edu or by phone at 607-587-4506. Please keep in mind that some accommodations may take time to implement, so students seeking accommodations are encouraged to contact OAS as early as possible.

TECHNICAL STANDARDS

Students in the construction supervision program must meet the following requirements:

• Students must have the ability to use industry-standard software and computers.
• Students must have the ability to traverse varying types of construction sites.

REQUIRED EQUIPMENT

A tier 2 laptop computer will be required of all students. See laptop specifications at www.alfredstate.edu/required-laptops.

Be advised that a prior felony conviction may impede a student’s ability to participate in an internship.
This program, approved by the National Court Reporters Association, will prepare you for a career in various court reporting fields—from official to freelance to realtime and closed captioning for the hearing impaired.

**ATTRIBUTES**
- Independence
- Great lifestyle
- Prestige
- Flexibility
- Mobility
- Exciting work environments

**ADVANTAGES**
- Development of high-speed recording skills to 225-plus words per minute through the use of realtime translation machine shorthand and computer aided transcription (CAT).
- In the first year, students learn realtime shorthand theory and develop computer skills that will enhance their overall employability.
- Development of skills in recording and transcribing specialized court reporting matter starts in the summer term and continues through the second year.
- The college offers court reporting courses online, making it possible for students who transfer in credit or attend other colleges to earn their degree from Alfred State in court and realtime reporting. This approach is perfect for working professionals, adult and returning students, and anyone who needs high flexibility in their academic schedule.

**PROGRAM STUDENT LEARNING OUTCOMES**
- Develop a shorthand recording speed on five minutes of unfamiliar dictation with at least 95 percent accuracy.
- Write a dictated list with 95 percent accuracy using advanced shorthand theory, special abbreviations, and phrasing principles.
- Perform readback and analysis of shorthand notes.
- Perform proper transcription and various other functions using the computer.
- Translate two-voice and multi-voice testimony.
- Analyze and describe various aspects of the technology of court reporting and captioning.
- Apply the rules of grammar, spelling, and punctuation, and capitalization of transcripts.

**DIRECT ENTRY INTO BACCALAUREATE DEGREE PROGRAM**
Alfred State court and realtime reporting AAS graduates may enter directly into either the interdisciplinary studies BTech or technology management BBA degree program at Alfred State.

**OCCUPATIONAL OPPORTUNITIES**
- Official court and hearing reporters
- General freelance reporters
- Realtime and closed-captioning reporters
- Scoping

**PROFESSIONAL OUTLOOK**
- According to the Bureau of Labor Statistics Occupational Outlook Handbook, the national median salary for court reporters and simultaneous captioners was $61,660 in 2020.
- The US Department of Labor projects that court reporting job opportunities will grow fastest in the careers that help the deaf or the hard of hearing, such as realtime captioning and communication access realtime translation (CART).

**EMPLOYMENT STATISTICS**
Employment and continuing education rate of 100 percent – 100 percent are employed.

Total Credit Hours: 64

Be advised that a prior felony conviction may impede a student’s ability to participate in an internship and complete the program.

ADDITIONAL PROGRAM INFORMATION

- All students are required to take CTRP 3163 in the summer.

GRADUATION REQUIREMENTS

- A cumulative overall index of at least 2.0 is required in order to graduate.
- All CTRP skill writing classes must be taken and passed at Alfred State with a passing grade of “C” or better.
- Court reporting students must also meet all the NCRA requirements as stated in the course objectives, including the passing of three, five-minute tests on unfamiliar matter with 95 percent accuracy on two-voice material at 225 wpm, jury charge material at 200 wpm, and literary material at 180 wpm; the completion of 40 verified hours of internship experience, including the production of a 40-page transcript; the transcription of a simulated RPR skills test at RPR speed levels in three hours; and the production of accurate transcripts using computer-aided technology as stated in the course outlines.
COURT REPORTING & CAPTIONING
CERTIFICATE – CODE #2152

Melissa Blake, Program Coordinator
Email address: blakemj@alfredstate.edu

This program, approved by the National Court Reporters Association, will prepare you for a career in various court reporting fields—from official to freelance to realtime and closed captioning for the hearing impaired.

ATTRIBUTES
- Independence
- Great lifestyle
- Prestige
- Flexibility
- Mobility
- Exciting work environments

ADVANTAGES
- Development of high-speed recording skills to 225-plus words per minute through the use of realtime translation machine shorthand and computer aided transcription (CAT).
- In the first year, students learn realtime shorthand theory and develop computer skills that will enhance their overall employability.
- Development of skills in recording and transcribing specialized court reporting matter starts in the summer term and continues through the second year.
- The college offers court reporting courses online, making it possible for students who transfer in credit or attend other colleges to earn their certificate from Alfred State in court and realtime reporting. The online approach still requires two years of course work and does not change any of the standards reflected in graduation requirements for all students. This approach is perfect for working professionals, adult and returning students, and anyone who needs high flexibility in their academic schedule.

PROGRAM STUDENT LEARNING OUTCOMES
- Develop a shorthand recording speed on five minutes of unfamiliar dictation with at least 95 percent accuracy.
- Write a dictated list with 95 percent accuracy using advanced shorthand theory, special abbreviations, and phrasing principles.
- Perform readback and analysis of shorthand notes.
- Perform proper transcription and various other functions using the computer.
- Translate two-voice and multi-voice testimony.
- Analyze and describe various aspects of the technology of court reporting and captioning.
- Apply the rules of grammar, spelling, and punctuation, and capitalization of transcripts.

OCCUPATIONAL OPPORTUNITIES
- Official court and hearing reporters
- General freelance reporters
- Realtime and closed-captioning reporters
- Scoping

EMPLOYMENT STATISTICS
Employment and continuing education rate of 100 percent – 100 percent are employed. Survey data can be found here.

Total Credit Hours: 43

Be advised that a prior felony conviction may impede a student's ability to participate in an internship and complete the program.

GRADUATION REQUIREMENTS
- A cumulative overall index of at least 2.0 is required in order to graduate.
- All CTRP skill writing classes must be taken and passed at Alfred State with a passing grade of "C" or better.

105
• Court reporting students must also meet all the NCRA requirements as stated in the course objectives, including the passing of three, five-minute tests on unfamiliar matter with 95 percent accuracy on two-voice material at 225 wpm, jury charge material at 200 wpm, and literary material at 180 wpm; the completion of 40 verified hours of internship experience, including the production of a 40-page transcript; the transcription of a simulated RPR skills test at RPR speed levels in three hours; and the production of accurate transcripts using computer-aided technology as stated in the course outlines.

ADDITIONAL PROGRAM INFORMATION
• The internship course (CTRP 4602) is completed off campus.
CRIMINAL JUSTICE
AS DEGREE – CODE #2279
Dr. Jill Priest Amati, Program Coordinator
Email address: amatijp@alfredstate.edu

The Associate in Science (AS) degree in criminal justice provides graduates with a solid foundation in the field of criminal justice and its basic components. The program offers practical knowledge that is integrated across core criminal justice courses and that is then combined with other relevant course work. The program emphasizes the development, structure, and function of the criminal justice system within the US, as well as ethical law enforcement practices and community relations. In addition, the program’s professional course work includes a management component that helps prepare graduates for administrative and leadership positions within the criminal justice system.

ADVANTAGES
AS program students can attend the Police Academy and receive up to six credits toward their degrees for two three-credit open electives.

Police Academy - http://www.alfredstate.edu/police-academy

PROGRAM STUDENT LEARNING OUTCOMES
• Apply critical thinking skills in the context of professional practice.
• Perform the basic operations of personal computer use, as well as employ basic research techniques to locate, evaluate, and synthesize information from a variety of sources.
• Communicate effectively and appropriately in oral and written forms.
• Explain the importance of ethical behavior by criminal justice professionals as part of the social contract between a diverse citizenry and the criminal justice system.
• Apply basic management practices to the topical issues facing the police, court, and correction systems.
• Demonstrate basic knowledge of the New York State Penal Code and of Criminal Law Procedure.
• Demonstrate knowledge of the causes and consequences of crime.

DIRECT ENTRY INTO BACCALAUREATE DEGREE PROGRAM
Alfred State criminal justice graduates may enter directly into the criminal justice BS, interdisciplinary studies BTech, or the technology management BBA degree program.

CONTINUING EDUCATION OPPORTUNITIES
Graduates are well prepared to enter a police academy or to seamlessly transfer into Alfred State’s criminal justice program at the baccalaureate level.

EMPLOYMENT STATISTICS
Employment and continuing education rate of 100 percent – 0 percent are employed; 100 percent continued their education.

RELATED PROGRAMS

Liberal Arts and Sciences: Social Science

ENTRANCE REQUIREMENTS/RECOMMENDATIONS
Required: Algebra
Recommended: Geometry and Biology

OFFICE OF ACCESSIBILITY SERVICES
Students who believe they need a reasonable accommodation to properly participate in this program may contact Melanie Ryan in the Office of Accessibility Services. This office may be contacted by email at oas@alfredstate.edu or by phone at 607-587-4506. Please keep in mind that some accommodations may take time to implement, so students seeking accommodations are encouraged to contact OAS as early as possible.
The Bachelor of Science (BS) degree in criminal justice provides graduates with a solid foundation in the field of criminal justice, both its essential components and emerging areas, with a focus on leadership and applied learning. With strong preparation in conceptual knowledge, students gain practical experience in criminal justice, including the opportunity to complete either an internship or a lab-based criminal investigation course in their final semester. In order to prepare graduates for a wide variety of careers, the program emphasizes several areas within criminal justice:

- Ethical law enforcement practices
- Decision-making
- Community relations
- Working with diverse populations
- Public safety
- Criminal justice leadership and administration

ADVANTAGES

BS program students can attend the Police Academy and receive up to 13 credits toward their degrees for two three-credit open electives, two three-credit professional electives and one one-credit physical education class.

Police Academy: [http://www.alfredstate.edu/police-academy](http://www.alfredstate.edu/police-academy)

PROGRAM STUDENT LEARNING OUTCOMES

- Communicate effectively and appropriately in written and oral form.
- Apply critical thinking to modern criminal justice practices, procedures, and policies, as well as other disciplines.
- Perform the basic operations of personal computer use and employ basic research techniques to locate, evaluate, and synthesize information from a variety of sources.
- Describe the development of the US criminal justice system, its structures, laws, and functions, and how the system fits within the US democratic system.
- Explain the importance of ethical behavior by criminal justice professionals as part of the social contract between a diverse citizenry and the criminal justice system.
- Apply contemporary management and leadership concepts and theories.
- Show how theories of crime, crime prevention, treatment, and punishment have impacted public policy in the US.
- Show the connections between US constitutional law and state and local criminal law and procedures.
- Examine the importance of diversity training for criminal justice professionals across all levels and parts of the US system.
- Demonstrate knowledge of the causes and consequences of crime.

EMPLOYMENT OPPORTUNITIES

The US Bureau of Labor Statistics and the New York State Department of Labor predict that job opportunities will exist over the next decade in law enforcement at the local, county, state, and federal levels, and in correctional institutions, parole and probation departments, private security companies, and police science organizations, among others. Though the numbers point to no more than a stable projected job market over the next few years, the sheer volume of criminal justice positions should ensure ample opportunities for graduates possessing expertise in the field.

EMPLOYMENT STATISTICS

Employment and continuing education rate of 100 percent – 50 percent are employed; 50 percent have continued their education.

### INTERNSHIP REQUIREMENTS

Students who elect to go the internship route will be responsible for locating and securing the internship. The internships (three-hour and 12-hour) require a minimum of either 120 or 480 hours of work experience in an approved public safety agency, commonly defined as police, courts, corrections, fire service, or in a commercial/industrial security agency. The agency or industry selected must be approved by the internship coordinator and the department chair and be specifically related to the curriculum of the student. Students must be in good academic standing (cumulative GPA of 2.0 or higher) and be able to pass any required background check.

Be advised that a prior felony conviction may impede a student’s ability to participate in an internship and complete the program.

### GRADUATION REQUIREMENTS

- Good academic standing (cumulative GPA of 2.0 or higher)
- Successful completion of all courses in the prescribed eight-semester plan
- Submission of the college’s degree application form
CULINARY ARTS
AOS DEGREE – CODE #0578
Debra Burch, Department Chair and Program Coordinator
Email address: burchda@alfredstate.edu

The courses train students in the principles applied to culinary arts. The goal is to prepare men and women for supervisory positions, and culinary positions that require special skills and knowledge of food and business. By learning fundamental and advanced culinary principles in the food service industry and employing the techniques of menu planning, preparation, and supervision in the lab classes, the students develop skills, confidence, and critical thinking.

ADVANTAGES
- Students may earn manager sanitation certification from the Educational Foundation of the National Restaurant Association as part of the program.
- Graduates have the option of applying for readmission into a dual-degree program, whereby they may obtain a second degree in baking, production and management in one additional year.

PROGRAM STUDENT LEARNING OUTCOMES
- Interpret and comply with prevailing food safety regulations.
- Create products from complex recipes.
- Successfully vie for employment or continuing education in the food service industry.
- Productively utilize typical culinary equipment.
- Establish product and plate cost for menu items.
- Demonstrate the relationship among menu, equipment, layout, and design.

DIRECT ENTRY INTO BACCALAUREATE DEGREE PROGRAM
Alfred State culinary arts graduates may enter directly into the technology management BBA degree program. Graduates who have credit for freshman composition, statistics, literature, history, and speech may complete the BBA program in two additional years; others may complete the BBA program in two-and-one-half years.

OCCUPATIONAL OPPORTUNITIES
- Chef Manager
- Cook
- Sous Chef
- Chef
- Production Manager
- Health Care
- Food Service Manager
- School Servicer
- Caterer
- Food Sales Representative
- Food Marketing
- Dining Room Manager

EMPLOYMENT STATISTICS
Employment and continuing education rate of 100 percent – 25 percent are employed; 75 percent continued their education.

EXPENSES
In addition to regular college expenses, the student must purchase a probe thermometer, calculator, uniform package, and uniform laundry service from the Alfred State Campus Store. Uniforms may cost approximately $360 to $460. The uniform laundry service is approximately $60 per semester. It is mandatory for all culinary arts students to have at least a five-meal, meal plan. First-semester textbooks cost approximately $500, and approximately $100 each succeeding semester.

RELATED PROGRAMS
Culinary Arts: Baking, Production and Management

REQUIRED TOOLS/EQUIPMENT
A list of required tools, equipment, PPE, etc. for the program mentioned above can be found at http://www.alfredstate.edu/tool-lists.

A tier 1 laptop computer is required for students entering this degree program. Laptop specifications are available at www.alfredstate.edu/required-laptops.

ENTRANCE REQUIREMENTS/RECOMMENDATIONS
Recommended: Knowledge of basic math, reading, and writing skills.

OFFICE OF ACCESSIBILITY SERVICES
Students who believe they need a reasonable accommodation to properly participate in this program may contact Melanie Ryan in the Office of Accessibility Services. This office may be contacted by email at oas@alfredstate.edu or by phone at 607-587-4506. Please keep in mind that some accommodations may take time to implement, so students seeking accommodations are encouraged to contact OAS as early as possible.

TECHNICAL STANDARDS
Applicants in the culinary arts program must meet the following curriculum requirements:
- Perform all lab functions.
- Work in a high-paced and crowded lab environment for several hours a day.
- Capability to lift 50 pounds.
- Identify degree of product doneness.
- Operate all kitchen equipment, including knives.

CERTIFICATION OR LICENSURE
Students may earn manager sanitation certification from the Educational Foundation of the National Restaurant Association as part of the program.

GRADUATION REQUIREMENTS
A student must successfully complete all courses in the prescribed four-semester program and earn a minimum cumulative index of 2.0, which is equivalent to a "C" average.
CULINARY ARTS: BAKING, PRODUCTION & MANAGEMENT

AOS DEGREE – CODE #0423
Debra Burch, Department Chair and Program Coordinator
Email address: burchda@alfredstate.edu

There’s never been greater demand for skilled bakers. Our program will prepare you for this exciting field with 1,350 hours of hands-on production experience, of which approximately 80 percent is concentrated in bakery training. The major includes detailed instruction in methods, ingredients, measurements, controls, equipment, and merchandising. And the production for breakfast, lunch, and dinner requirements is built into one daily schedule.

ADVANTAGES
- Students may earn sanitation certification from the Educational Foundation of the National Restaurant Association as part of the program.
- Graduates have the option of applying for readmission into a dual-degree program whereby they may obtain a second degree in culinary arts in one additional year.

PROGRAM STUDENT LEARNING OUTCOMES
- Interpret and comply with prevailing food safety regulations.
- Create products from complex formulas.
- Successfully vie for employment or continuing education in the food service industry.
- Competently utilize typical bakery equipment.
- Establish product and plate cost for bakery menu items.
- Demonstrate the relationship among menu, equipment, layout, and design.

DIRECT ENTRY INTO BACCALAUREATE DEGREE PROGRAM
Alfred State culinary arts: baking, production and management graduates may enter directly into the technology management BBA degree program. Graduates who have credit for freshman composition, statistics, literature, history, and speech may complete the BBA program in two additional years; others may complete the BBA program in two-and-one-half years.

OCCUPATIONAL OPPORTUNITIES
- Baker
- Caterer
- Pastry chef
- Sales representative
- Commercial baker and management
- Management
- Product developer
- Entrepreneur

EMPLOYMENT STATISTICS
Employment and continuing education rate of 100 percent – 57 percent are employed; 43 percent continued their education.

EXPENSES
In addition to the regular college expenses, the student must purchase decorating tips, a probe thermometer, calculator, uniform package, and uniform laundry service from the Alfred State Campus Store. Uniforms may cost approximately $360 to $460. The uniform laundry service is approximately $60 per semester. It is mandatory that all culinary arts: baking, production and management students have at least a five-meal, meal plan. First-semester textbooks cost approximately $500, and approximately $100 each succeeding semester.

RELATED PROGRAMS
Culinary Arts

REQUIRED TOOLS/EQUIPMENT
A list of required tools, equipment, PPE, etc. for the program mentioned above can be found at http://www.alfredstate.edu/tool-lists.

A tier 1 laptop computer is required for students entering this degree program. Laptop specifications are available at www.alfredstate.edu/required-laptops.

ENTRANCE REQUIREMENTS/RECOMMENDATIONS
Recommended: Knowledge of basic math, reading, and writing skills.
The Bachelor of Technology degree in cyber security at Alfred State is designed to prepare you to enter the workforce as an information security professional—one of the fastest-growing computer and information technology career paths—with a special emphasis in network and host security, secure programming, secure database applications, mobile device security, and cloud security. From courses in security, to programming language sequences such as .NET, Java, and C++, this program will help you meet the needs of today’s and tomorrow’s information security industry. You will also receive a sound foundation in web development, networking, and microcomputer systems. And in order to give you the hands-on experience employers are looking for, a full-semester internship is included.

ADVANTAGES

• Organizations of all types and sizes need information technology professionals, and emphasis on security has never been higher.
• Due to the solid foundation in all the major fields of information technology, the job opportunities for graduates are wide and numerous.

PROGRAM STUDENT LEARNING OUTCOMES

• Demonstrate troubleshooting strategies with a variety of security problems.
• Install and configure web, database, file, and application servers.
• Develop and implement effective security and disaster recovery systems and policies.
• Develop and maintain technical documentation and procedures for security management.
• Demonstrate effective research, planning, and security management of software updates and fixes.
• Apply accumulated knowledge and skills in an actual industry environment.
• Demonstrate effectiveness in the use of computer forensic tools, procedures, techniques, and hardware, as well as maintain physical evidence.
• Demonstrate effectiveness in configuring authentication schemes, such as NAT, content security and content vectoring, SYNDefender, and VPNs using industry standard firewalls.
• Demonstrate effectiveness in the use and scan of a network with heterogeneous operating systems and identify security vulnerabilities.
• Demonstrate knowledge of multiple areas within the liberal arts arena.
• Demonstrate knowledge in design and configuration of Windows security.
• Demonstrate effectiveness in tracking and monitoring attacks against Linux servers and how to prevent them.

CONTINUING EDUCATION OPPORTUNITIES

Articulation agreements have been established with many community colleges and additional agreements are in development. It is possible, with careful selection of courses, to transfer from a variety of associate degrees, including computer information systems, information technology, computer science, and others. Upon completion of the bachelor’s degree, students will be prepared to pursue a graduate degree in information technology. The computer information systems degree (AAS) at Alfred State is especially well suited for transfer into the bachelor's degree at the junior level.

OCCUPATIONAL OPPORTUNITIES

Organizations of all types and sizes need information technology professionals and emphasis on security has never been higher. The primary employment field includes security IT specialists, Virtual Private Network administrators, authentication specialists, database administrators, programmers, and system analysts. Due to the solid foundation in other areas, graduates will not be limited to these areas; thus, the job opportunities are wide and numerous.

EMPLOYMENT STATISTICS

Employment and continuing education rate of 100 percent – 100 percent are employed.

* If not required, take LAS elective to complete degree requirements of three credits; otherwise take free elective.

** BUAD 4003 or BUAD 6113 recommended.

GPA of 2.5 or higher is required in major courses; GPA of 2.0 minimum overall is required.

Internship is student-initiated.

Be advised that a prior felony conviction may impede a student’s ability to participate in an internship and complete the program.

**GRADUATION REQUIREMENTS**

- 124 credit hours
- 39 credit hours in major field required courses
- 24 credit hours in professional courses
- 18 credit hours in core concentration
- 30 credit hours in liberal arts/general education courses
- A 2.5 grade point average in the major is needed for the required internship
- Other requirements as stated in college academic regulations
- Seven general education areas are required, including three of the following five: art, language, other world civilizations, American history, or western civilization
Program Student Learning Outcomes

- Demonstrate appropriate technical and effective skills in the clinical setting.
- Demonstrate patient-centered, age-specific skills.
- Analyze images to determine diagnostic quality.
- Demonstrate proper work ethics.
- Examine the value of leadership, professional development, and growth.
- Demonstrate critical thinking and problem-solving skills in both the didactic and clinical setting.
- Apply written communication skills to the construction of documents of record that are established professional guidelines.
- Apply communication skills to the explanation of ideas and scientific terminology.
- Using technological resources effectively and appropriately, synthesize theory and concepts from the liberal education domain and other professions into radiologic technology.
- Explain cultural diversity and evaluate the role of cultural competency, values, and ethics in the patient care setting.

Employment Statistics

Employment and continuing education rate of 100 percent — 80 percent are employed; 20 percent have continued their education.

Entrance Requirements/Recommendaations

Applicants for the diagnostic medical sonography program must possess a recognized high school diploma or its equivalent. A standardized test (SAT or ACT) is not required but recommended. Specific high school course requirements and recommendations are:

- Required: Algebra, Geometry, Algebra 2, Biology, Physics, Interview with the academic department.
- Recommended: Chemistry
- Applicants with previous college experience must submit an official college transcript and their success at the college level will be an admissions consideration. Due to the technical and science rigor, entrance requirements are higher than those of the institution.

Office of Accessibility Services

Students who believe they need a reasonable accommodation to properly participate in this program may contact Melanie Ryan in the Office of Accessibility Services. This office may be contacted by email at oas@alfredstate.edu or by phone at 607-587-4506. Please keep in mind that some accommodations may take time to implement, so students seeking accommodations are encouraged to contact OAS as early as possible.

Technical Standards

To participate in the program, the applicant must possess specific non-academic skills. The technical standards described below are consistent with the technical and science rigor, entrance requirements are higher than those of the institution.

- Ability with reasonable accommodation, if necessary, to reach and position the patients on the exam table.
- Ability with reasonable accommodation, if necessary, to move, adjust, and manipulate equipment to perform imaging procedures.
- Ability to communicate effectively with patients, doctors, and other personnel so that the patient is not placed in an “at-risk” situation.
- Ability to make proper decisions involving patient and co-worker safety.
- Ability with reasonable accommodation, if necessary, to use sounds that are necessary to assess patient’s health status.

Continuing Education Opportunities

The program allows graduates to transfer to a four-year program in imaging science or healthcare management.

Occupational Opportunities

- Hospital Sonography Department Staff Technologist
- Advanced Sonography Modalities - Cardiac, Vascular, and Musculoskeletal
- Sonography Education
- Sonography Department Management
- Industry
- Private Physician Offices

Direct Entry Into Baccalaureate Degree Program

Graduates may enter directly into either the healthcare management BTech, the interdisciplinary studies BTech, or technology management BBA degree program.

Grade of “C+” or better required for all SONO, BIOL and RADT prefix courses.

Required Equipment

A tier 1 laptop computer is required for students entering this degree program. Laptop specifications are available at www.alfredstate.edu/required-laptops.

Be advised that a prior felony conviction may impede a student’s ability to participate in a required clinical experience.

## GRADUATION REQUIREMENTS

The AAS degree in diagnostic medical sonography has finely prescribed courses reflective of accreditation standards for students to be prepared for admission to the American Registry of Diagnostic Medical Sonography (ARDMS) Certification Examination. Specific graduation requirements are:

- 64 total semester credit hours
- Minimum of 20 credit hours of liberal arts and sciences from three of the 10 SUNY General Education categories
- 2.0 cumulative GPA and a grade of “C+” or better in the core science courses (SONO and BIOL prefixes)
- Approval of department faculty
The emerging field of computer imaging and animation is impacting virtually every industry and profession. The digital media and animation program will provide you with a broad range of technical, creative, and problem-solving skills to facilitate your employment in new media and animation. At the core of the program is a sequence of studio courses that enhances individual artistic creativity and provides instruction in the traditional arts and industry-standard computer graphics software.

ADVANTAGES
- Students develop critical thinking skills by completing rigorous problem-solving activities.
- Gain experience creating a professional presentation, as well as evaluating, revising, and defending ideas and artistic decisions in presented work.

PROGRAM STUDENT LEARNING OUTCOMES
- Demonstrate adaptability/flexibility with technology.
- Illustrate critical thinking by completing course work.
- Demonstrate a strong work ethic through time management and quality works.
- Visually analyze their own work, as well as the work of others, in critiques, presentations, writing, and other activities.
- Apply knowledge of the history and theory relevant to digital media and animation through studio work.
- Communicate verbally using specific terminology associated with the software, hardware, and industry.

OCCUPATIONAL OPPORTUNITIES
- Animation
- Interactive media
- Digital imaging
- Media Design
- Fine art

RELATED PROGRAMS

Information Technology: Web Development

ENTRANCE REQUIREMENT/RECOMMENDATIONS
Required: Algebra, Geometry
Recommended: Algebra 2

OFFICE OF ACCESSIBILITY SERVICES
Students who believe they need a reasonable accommodation to properly participate in this program may contact Melanie Ryan in the Office of Accessibility Services. This office may be contacted by email at oas@alfredstate.edu or by phone at 607-587-4506. Please keep in mind that some accommodations may take time to implement, so students seeking accommodations are encouraged to contact OAS as early as possible.

GENERAL NOTES
Entry level of student into math and composition/literature sequences is a function of student's high school preparation and mathematics and English placement examinations.

Minimum of "C" is required for all core courses. A 2.0 GPA or greater in core courses or comparable courses at another institution is required to guarantee admission into DGMA 5103, 5403, and 5603.

Students must complete at least one course from seven of the 10 SUNY General Education silos.

Students are required to complete a digital portfolio assignment and annual reviews to meet graduation requirements.

DIGITAL MEDIA AND ANIMATION

AAS DEGREE – CODE #1212

Larry Neuberger, Program Coordinator
Email address: neuberl@alfredstate.edu

The emerging field of computer imaging and animation is impacting virtually every industry and profession. The digital media and animation program will provide you with a broad range of technical, creative, and problem-solving skills to facilitate your employment in new media and animation. At the core of the program is a sequence of studio courses that enhances individual artistic creativity and provides instruction in the traditional arts and industry-standard computer graphics software.

ADVANTAGES

- Students develop critical thinking skills by completing rigorous problem-solving activities.
- Gain experience creating a professional presentation, as well as evaluating, revising, and defending ideas and artistic decisions in presented work.

PROGRAM STUDENT LEARNING OUTCOMES

- Demonstrate adaptability/flexibility with technology.
- Illustrate critical thinking by completing course work.
- Demonstrate a strong work ethic through time management and quality works.
- Visually analyze their own work, as well as the work of others, in critiques, presentations, writing, and other activities.
- Apply knowledge of the history and theory relevant to digital media and animation through studio work.
- Communicate verbally using specific terminology associated with the software, hardware, and industry.

DIRECT ENTRY INTO BACCALAUREATE DEGREE PROGRAMS

Alfred State digital media and animation AAS graduates may enter directly into the digital media and animation BS, the interdisciplinary studies BTech, or the technology management BBA degree program.

OCCUPATIONAL OPPORTUNITIES

- Animation
- Interactive media
- Digital imaging
- Media design
- Fine art

ELECTRICAL CONSTRUCTION AND MAINTENANCE ELECTRICIAN

AOS DEGREE – CODE #0498

Bradley Thompson, Department Chair and Program Coordinator
Email address: thompbsj@alfredstate.edu

This program provides in-depth instruction in the theories and principles of electricity. Principles of operation for electrical devices and equipment, and correct and safe operation of tools are covered. You will study and learn to interpret and apply the requirements of the National Electric Code for designing electrical layouts, installation methods, and the maintenance, troubleshooting, and repair of electrical circuits and equipment.

Practical (hands-on) application of the classroom theory is the main emphasis of the laboratory work. As an electrical construction and maintenance electrician student, you will assist in the design and installation of the electrical installations of many projects both on and off campus. Approximately one-third of lab time is spent on actual work sites, gaining real-life work experience.

In your senior year, you will create completely automated projects in the lab using PLCs, pneumatics, electronics, and process controls.

ADVANTAGES
• Summer internships are available to selected students through the International Brotherhood of Electrical Workers, Village of Wellsville Electric Department, and RADEC Corporation in Rochester, allowing students to gain additional, valuable trade experience.
• Various IBEW Locals have agreed to award qualified graduates from Alfred State’s electrical construction and maintenance electrician program advanced placement in their apprenticeship programs. The degree of advanced placement to be awarded will be determined after review by the joint apprenticeship committee and after all conditions of the joint apprenticeship standards have been met.

PROGRAM STUDENT LEARNING OUTCOMES
• Read, interpret, and apply technical information from the National Electrical Code.
• Perform basic and complex mathematical equations as they apply to the electrical trade.
• Perform layout, design, and installation for commercial and industrial wiring systems.
• Perform entry-level layout, design, and installation of residential wiring systems.
• Apply combined knowledge to perform maintenance and troubleshooting procedures within the electrical trade.
• Students will develop an understanding of efficiency, design, and NEC requirements as pertaining to renewable energy systems.
• Design, sizing, layout, and selection of equipment for the electrical systems within a residential dwelling.

DIRECT ENTRY INTO BACCALAUREATE DEGREE PROGRAM
Alfred State electrical construction and maintenance electrician graduates may enter directly into the construction supervision BTech or technology management BBA degree program. Graduates who have credit for freshman composition, statistics, literature, history, and speech may complete the baccalaureate program in two additional years; others may complete the program in two-and-one-half years.

CONTINUING EDUCATION OPPORTUNITIES
The following local chapters of the International Brotherhood of Electrical Workers (IBEW) have signed articulation agreements with the electrical construction and maintenance electrician program at Alfred State.

IBEW Local 86, Rochester
IBEW Local 241, Ithaca
IBEW Local 237, Niagara Falls

OCCUPATIONAL OPPORTUNITIES
• Designer
• Installer
• Construction site electrician
• Electrical estimator
• Electrical inspector
• PLC programmer
• Salesperson
• Electrical trade union or non-union apprentice

• Electric motor control technician
• Private contractor (residential, commercial)
• Industrial maintenance electrician
• Technical field representative
• Wholesale representative
• Electrical technician
• Wind turbine technician/installer
• Photovoltaic technician/installer

EMPLOYMENT STATISTICS
Employment and continuing education rate of 90 percent – 82 percent are employed; 8 percent continued their education.

RELATED PROGRAMS
Building Trades: Building Construction
Electrical Engineering Technology

REQUIRED TOOLS/EQUIPMENT
A list of required tools, equipment, PPE, etc. for all of the programs listed above can be found at http://www.alfredstate.edu/tool-lists.

A tier 1 laptop computer is required for students entering this degree program. Laptop specifications are available at www.alfredstate.edu/required-laptops.

ENTRANCE REQUIREMENTS/RECOMMENDATIONS
Recommended: Algebra; good writing and reading comprehension skills

OFFICE OF ACCESSIBILITY SERVICES
Students who believe they need a reasonable accommodation to properly participate in this program may contact Melanie Ryan in the Office of Accessibility Services. This office may be contacted by email at oas@alfredstate.edu or by phone at 607-587-4506. Please keep in mind that some accommodations may take time to implement, so students seeking accommodations are encouraged to contact OAS as early as possible.

TECHNICAL STANDARDS
Applicants in the electrical construction and maintenance electrician program must meet the following physical requirements:
• Must be able to visually translate information on analog or digital meters and other test equipment.
• Must be able to lift 50 pounds to eye level.
• Must be able to communicate orally with a person 6 to 10 feet away.
• Must be able to read and decipher information found in technical manuals.
• Must be able to adhere to and perform all safety requirements.

OFFICE OF ACCESSIBILITY SERVICES
Recommended: Algebra; good writing and reading comprehension skills

Note: Seniors will rotate through the six courses listed in the third and fourth semesters. These six are taught both semesters.

#### GRADUATION REQUIREMENTS

A student must successfully complete all courses in the prescribed four-semester program and earn a minimum cumulative index of 2.0, which is equivalent to a "C" average.
The electrical engineering technology AAS and BS programs provide the skills and occupational competence necessary for entry into the field as an applied engineer who works with and is responsible for all the electronic equipment in the field. Thus, in addition to a firm foundation in electrical circuit concepts, the program provides a robust laboratory experience.

This program will prepare you by emphasizing basic knowledge and skills during the first year of the program. Studies include fundamental DC and AC circuit analysis and digital circuit logic to develop skills in use of electronic test equipment and in use of tools and printed circuit fabrication equipment. Laboratory experiments supplement classroom instruction and problem solving. Computer problem solving and simulation aid in course instruction.

The second year of the associate degree program continues the study of fundamental electronic circuits. The areas of study include microcontroller circuitry and programming, electronic communication circuits and systems, and IC circuit fabrication on silicon wafers.

ADVANTAGES
- The understanding of general processes gained through laboratory experiences prepares students to either continue their education or enter the workforce in the fields of microcontrollers, power systems, and microelectronics.
- Both electrical engineering technology programs are accredited by the Engineering Technology Accreditation Commission of ABET, http://www.abet.org
- The Bachelor of Science degree in electrical engineering technology is recognized as a "professional degree" that qualifies for experience/education credit toward New York Professional Engineering Licensure.

PROGRAM STUDENT LEARNING OUTCOMES (PSLOS) - AAS DEGREE
- An ability to apply the knowledge, techniques, skills, and modern tools of the discipline to narrowly defined engineering technology activities.
- An ability to apply a knowledge of mathematics, science, engineering, and technology to engineering technology problems that require limited application of principles but extensive practical knowledge.
- An ability to conduct standard tests and measurements and to conduct, analyze, and interpret experiments.
- An ability to function effectively as a member of a technical team.
- An ability to identify, analyze, and solve narrowly defined engineering technology problems.
- An ability to apply written, oral, and graphical communication in both technical and non-technical environments, and an ability to identify and use appropriate technical literature.
- An understanding of the need for and an ability to engage in self-directed continuing professional development.
- An understanding of and a commitment to address professional and ethical responsibilities, including a respect for diversity.
- An ability to design systems, components, or processes for broadly defined engineering technology problems appropriate to program educational objectives.
- An ability to function effectively as a member or leader on a technical team.
- An ability to identify, analyze, and solve broadly defined engineering technology problems.
- An ability to apply written, oral, and graphical communication in both technical and non-technical environments, and an ability to identify and use appropriate technical literature.
- An understanding of the need for and an ability to engage in self-directed continuing professional development.
- An understanding of and a commitment to address professional and ethical responsibilities, including a respect for diversity.
- A knowledge of the impact of engineering technology solutions in a societal and global context.
- A commitment to quality, timelines, and continuous improvement.
- The application of circuit analysis and design, computer programming, associated software, analog and digital electronics, and microcomputers, and engineering standards to the building, testing, operation, and maintenance of electrical/electronic(s) systems.
- The applications of physics or chemistry to electrical/electronic(s) circuits in a rigorous mathematical environment at or above the level of algebra and trigonometry.
- The ability to analyze, design, and implement control systems, instrumentation systems, communications systems, computer systems, or power systems.
- The ability to apply project management techniques to electrical/electronic(s) systems.
- The ability to utilize statistics/probability, transform methods, discrete mathematics, or applied differential equations in support of electrical/electronic(s) systems.

PROGRAM STUDENT LEARNING OUTCOMES (PSLOS) - BS DEGREE
- An ability to conduct standard tests and measurements; to conduct, analyze, and interpret experiments; and to apply experimental results to improve processes.
- An ability to design systems, components, or processes for broadly defined engineering technology problems appropriate to program educational objectives.
- An ability to function effectively as a member or leader on a technical team.
- An ability to identify, analyze, and solve broadly defined engineering technology problems.
- An ability to apply written, oral, and graphical communication in both technical and non-technical environments, and an ability to identify and use appropriate technical literature.
- An understanding of the need for and an ability to engage in self-directed continuing professional development.
- An understanding of and a commitment to address professional and ethical responsibilities, including a respect for diversity.
- A knowledge of the impact of engineering technology solutions in a societal and global context.
- A commitment to quality, timelines, and continuous improvement.
- The application of circuit analysis and design, computer programming, associated software, analog and digital electronics, and microcomputers, and engineering standards to the building, testing, operation, and maintenance of electrical/electronic(s) systems.
- The applications of physics or chemistry to electrical/electronic(s) circuits in a rigorous mathematical environment at or above the level of algebra and trigonometry.
- The ability to analyze, design, and implement control systems, instrumentation systems, communications systems, computer systems, or power systems.
- The ability to apply project management techniques to electrical/electronic(s) systems.
- The ability to utilize statistics/probability, transform methods, discrete mathematics, or applied differential equations in support of electrical/electronic(s) systems.

DIRECT ENTRY INTO BACCALAUREATE DEGREE PROGRAM
Alfred State electrical engineering technology AAS graduates may enter directly into either the construction supervision BTech, the electrical engineering technology BS, the interdisciplinary studies BTech, or technology management BBA degree program.

OCCUPATIONAL OPPORTUNITIES
- Electrical or electronics technician (two-year)
- Electrical or electronics technologist (four-year)
- Communications technician/technologist
- Computer technician/technologist
- Semiconductor manufacturing technician/technologist
- Electrical power technician/technologist

EMPLOYMENT STATISTICS
Employment and continuing education rate of 100 percent:
- Electrical Engineering Technology (AAS degree): 100 percent – 25 percent are employed; 75 percent continued their education.
- Electrical Engineering Technology (BS degree): 100 percent – 100 percent are employed.

RELATED PROGRAMS

- Computer Engineering Technology
- Electrical Construction and Maintenance Electrician

CERTIFICATION OR LICENSURE

The Bachelor of Science degree in electrical engineering technology is recognized as a "professional degree" that qualifies for experience/education credit toward New York Professional Engineering Licensure. Graduates from Alfred State's program are allowed six years of the required 12 years of education/experience credit and are eligible to take the Fundamentals of Engineering (FE), formerly called Engineer-in-Training (EIT), examination upon graduation.

Be advised that a prior felony conviction may impede a student's ability to receive licensure.

ENTRANCE REQUIREMENTS/RECOMMENDATIONS (AAS)

Required: Algebra, Geometry, Algebra 2
Recommended: Physics

ENTRANCE REQUIREMENT/RECOMMENDATIONS (BS)

Required: Algebra, Geometry, Algebra 2.
Recommended: Physics

OFFICE OF ACCESSIBILITY SERVICES

Students who believe they need a reasonable accommodation to properly participate in this program may contact Melanie Ryan in the Office of Accessibility Services. This office may be contacted by email at oas@alfredstate.edu or by phone at 607-587-4506. Please keep in mind that some accommodations may take time to implement, so students seeking accommodations are encouraged to contact OAS as early as possible.

Courses that repeat or significantly overlap those taken in the student’s associate degree program cannot be taken for upper-level credit. If the associate degree covered the subject matter in one of the required baccalaureate courses, a different course must be substituted and approved by the faculty adviser.

REQUIRED EQUIPMENT

A tier 2 laptop computer is required for students entering the electrical engineering technology programs. Laptop specifications are available at www.alfredstate.edu/required-laptops. Some courses require specialized tools and/or electronic components.

### GRADUATION REQUIREMENTS - BS DEGREE

- 126 semester credit hours
- 60 semester credit hours of liberal arts and sciences from at least seven of the General Education content groups: mathematics, natural sciences, social sciences, humanities, western civilization, American history, other world civilization, arts, foreign language, and basic communications (must include COMP 1503)
- Minimum of 45 hours upper division
- Minimum of 24 hours upper division in major
- Minimum of 30 hours upper division in residence
- 2.0 grade point average in major courses
- 2.0 cumulative grade point average
- Approval of department faculty
FINANCIAL PLANNING

BBA DEGREE – CODE #1938

Scott DuMonde, Program Coordinator
Email address: dumondsr@alfredstate.edu

Personal financial services is one of the most lucrative and rapidly expanding professions in existence. By combining expertise in estate planning, investment planning, risk management, insurance evaluation, tax planning, retirement planning, and employee benefits planning, the CERTIFIED FINANCIAL PLANNER™ professional offers one-stop comprehensive expert advice that would have formerly required a variety of different professionals. As a student completing this four-year degree, you will be eligible to sit for the CERTIFIED FINANCIAL PLANNER™ examination. While there are numerous job opportunities for employment in various types of financial institutions - banks, investment firms, and the insurance industry - perhaps the greatest earnings potential lies in becoming a self-employed CFP® practitioner.

ADVANTAGES

- Students receiving their AAS or AS degree in virtually any business concentration will be able to seamlessly transfer into this program and receive the BBA degree in four more semesters, which includes a full-semester internship in the field.
- Students develop the ability to integrate and synthesize the knowledge identified by the CFP® Board’s required topic list and gained from core courses, into decision making, critical thinking, and problem-solving skills.
- This program is registered with the Certified Financial Planner Board of Standards, Inc.

PROGRAM STUDENT LEARNING OUTCOMES

- Demonstrate competence in domestic and global environments within the principle functional areas of business.
- Analyze personal finance problems and devise solutions using critical thinking, decision-making processes, and decision-support tools.
- Formulate a financial plan while integrating the major functional areas of business and personal finance.
- Incorporate software, technology, and information systems into personal finance.
- Identify comprehensive personal finance issues and communicate findings and solutions.
- Identify the personal finance environment in relation to the current financial, legal, economic, and social environments.
- Analyze the role of ethics, government regulations, and legalities in personal financial planning processes.

OCCUPATIONAL OPPORTUNITIES

- Banking
- Insurance
- Investment firms
- Financial planning firms
- Attorneys’ offices
- Self-employment
- Employee benefits specialists
- Accounting firms
- Wealth management firms
- Broker-dealer (securities) firms

EMPLOYMENT STATISTICS

Employment and continuing education rate of 100 percent – 100 percent are employed.

Business Administration
Marketing

ENTRANCE REQUIREMENTS/RECOMMENDATIONS

Required: Algebra, Geometry, Algebra 2

OFFICE OF ACCESSIBILITY SERVICES

Students who believe they need a reasonable accommodation to properly participate in this program may contact Melanie Ryan in the Office of Accessibility Services. This office may be contacted by email at oas@alfredstate.edu or by phone at 607-587-4506. Please keep in mind that some accommodations may take time to implement, so students seeking accommodations are encouraged to contact OAS as early as possible.

REQUIRED EQUIPMENT

A tier 1 laptop computer is required for students entering this degree program. Laptop specifications are available at www.alfredstate.edu/required-laptops.

CERTIFIED FINANCIAL PLANNER®: THE HIGHEST STANDARD

Today more than ever, CFP® pros are an essential resource. From budgeting, to planning for retirement, to saving for education, to managing your taxes and your insurance coverage, "finances" doesn’t mean just one thing for most Americans - and "financial planning" means much more than just investing. Bringing all the pieces of your financial life together is a challenging task.

Although many professionals may call themselves “financial planners,” CFP® professionals have completed extensive training and experience requirements and are held to rigorous ethical standards. They understand all the complexities of the changing financial climate and are required to make financial planning recommendations in your best interest.

WHY CERTIFICATION MATTERS

Most people think all financial planners are "certified," but this isn’t true, nor are all certifications the same. Anyone may call him or herself a "financial planner," but only those who have fulfilled the certification and renewal requirements of the CFP Board can display the CFP® certification marks, which represent a high level of competency, ethics, and professionalism. CFP Board’s Standards of Professional Conduct require CFP® pros to look out for your interests above their own when delivering financial planning advice.

EDUCATION

Unlike many financial advisors, CFP® pros are required to develop their theoretical and practical knowledge by completing a comprehensive course of study at a college or university with a curriculum approved by the CFP Board. Planning professionals with training outside of the CFP Board’s approved list may meet the education requirement through a review process, which looks at transcripts, previous course work, and other professional designations.

EXAMINATION

CFP® professionals must pass the comprehensive CFP® Certification Exam, which tests their ability to apply financial planning knowledge to real-life situations. The exam covers the financial planning process, tax planning, employee benefits and retirement planning, estate planning, investment management and insurance. The average pass rate for this difficult exam is only 55 percent to 60 percent. This comprehensive exam ensures that CFP® professionals are highly qualified to develop a plan for your finances.

EXPERIENCE

CFP® professionals must have a minimum of three years’ experience in the financial planning process prior to earning the right to use the CFP® certification marks. This hands-on experience guarantees that CFP® professionals have practical planning knowledge, so you can count on them to help you create a realistic financial plan that fits your individual needs.

ETHICS

When it comes to financial planning, CFP® professionals are held to the highest of standards. CFP Board’s Code of Ethics outlines CFP® professionals’ obligations to uphold principles of integrity, objectivity, competence, fairness, confidentiality, professionalism and diligence. The Rules of Conduct require CFP® professionals to put clients’ interests above their own, and to provide their financial planning services as a “fiduciary” — acting in the best interest of their financial planning clients. CFP® professionals are subject to sanctions if they violate these standards.

ENFORCEMENT

CFP Board’s rigorous enforcement of its Standards of Professional Conduct — including releasing disciplinary information to the public — distinguishes the CFP® certification from the many other designations in the financial services industry. Anyone who seeks CFP® certification is subject to a background check, and those whose past conduct falls short of CFP Board’s ethical and practice standards can be barred from becoming certified. After attaining certification, a CFP® professional who violates CFP Board’s ethical and practice standards becomes subject to disciplinary action, which could include
the permanent revocation of certification. Through diligent enforcement of its ethical and practice standards, CFP Board provides you with the confidence that your CFP Professional is both competent and ethical.

GRADUATION REQUIREMENTS

- 122 credit hours
- 30 credit hours of the 45 upper-level credit hours for this degree must be taken at Alfred State
- Cumulative overall index of at least 2.0
- Seven of the 10 SUNY approved General Education categories must be fulfilled

END-OF-PROGRAM EXAM REQUIREMENTS

All students are required to complete an end-of-program exam. This exam will be taken in the capstone course for the student’s specific program in FSMA 7123 Personal Financial Planning Capstone. The end-of-program exam will also be considered an assignment in the capstone course. The benefit of taking the end-of-program exam is to test the student’s knowledge at the time of graduation. Students may include the progress from the end-of-program exams on their resume. Taking the end-of-program exam will have some fees, which are currently $45 per exam. Exams will be taken once and they will impact the student’s capstone course grade by 5%. Please refer to the syllabi for the relevant capstone course to know the grading scale for the end-of-program exam.

The end-of-program exams are **required**, not optional.

Information on how to take the exams will be given in the course prior to the end-of-program exam.

How should I prepare for the assessment exam?

The comprehensive end-of-program exam covers topics taught throughout the degree program, which are aligned to the topics required for accreditation. The preparation for the exam comes from your educational experience with the school, specifically through the required courses for your degree. The exam assesses the foundational knowledge areas for your discipline.
FORENSIC SCIENCE TECHNOLOGY

BS DEGREE - CODE #2023

Wayne Bensley, Program Director
Email address: benslew@alfredstate.edu

The forensic science technology major is a technically rigorous four-year program culminating in a Bachelor of Science degree. Students in this laboratory-based on-campus program will complete classwork focusing on three areas of physical evidence analysis:

- Biological applications within forensics, e.g., DNA technologies, genetic analysis, and microbiology.
- Chemical practicalities, notably: physicochemical analysis and identification of drugs, poisons, and fire debris.
- Microscopic-based examinations, including the analysis of fingerprints, firearms evidence, and trace evidence.

The forensic science technology program is fully accredited by FEPAC (Forensic Science Education Programs Accreditation Commission).

MISSION STATEMENT

The mission of the forensic science technology program at Alfred State is to provide our students with a strong foundation in the natural and physical sciences. This includes not only theoretical didactic delivery, but also a wealth of hands-on laboratory-based forensic analytical techniques. Graduates of the program will be equipped with the knowledge and skills necessary to obtain entry-level positions as laboratory technicians, scientists, or examiners in a variety of governmental, institutional, and industrial settings, or with the background necessary for successful transfer into graduate-level programs in the forensic, biological, and chemical sciences or related subjects.

VISION STATEMENT

Through a rigorous hands-on curriculum rooted in the natural and physical sciences, the forensic science technology program at Alfred State strives to produce graduates prepared to be active contributors in a variety of career and educational options.

ADVANTAGES

- All students in the program are required to take a core course load that includes preparation in chemistry, biology, physics, and mathematics as well as more advanced training in organic chemistry, genetics, biochemistry, instrumental methods, analytical chemistry, microbiology, biotechniques, evidentiary law, public speaking, and technical writing.
- Students are trained in the usage and theory of modern instrumental techniques that are utilized by employees in crime laboratories nationwide.
- Students have the opportunity to broaden and deepen their training by selecting from a list of approved technical elective course work.
- All students in the program are required to complete either an off-campus internship or on-campus directed research experience. Students selecting the internship option will be exposed to a workplace setting and may complete this course at a multitude of off-campus locations offering laboratory testing services.
- Students selecting the directed research option will receive preparatory training for future graduate and/or professional school options. In addition, these students will have the opportunity to present their research at both on- and off-campus conferences and/or showcases.

PROGRAM STUDENT LEARNING OUTCOMES

- Apply the scientific principles of chemistry, biology, and physics to specific applications in forensic science.
- Explain and show competency in basic chemical and biological lab procedures, including the identification of and the synthesis of various compounds and the forensic analysis of DNA.
- Demonstrate an understanding of the capabilities, use, potential, and limitations of various laboratory instrumental techniques widely utilized in forensic science.
- Recognize and use appropriate professional and ethical behavior as defined by the forensic science community.
- Demonstrate an understanding of the scientific principles of crime scene investigation and reconstruction, including evidence collection, preservation, and documentation.
- Summarize the criminal justice system and explain the role of the forensic scientist and physical evidence within the criminal justice system.
- Evaluate scientific literature to distinguish fact from opinion, develop informed and reasonable conclusions, apply knowledge and understanding to problems, develop rational and reasonable interpretations, suspend beliefs and remain open to new information and methods, and assimilate information learned into knowledge base.
- Use technological resources effectively and appropriately to communicate, collaborate, and retrieve information; determine when technology is useful and select the appropriate tool(s) and technology resources to address a variety of tasks and problems.
- Apply written communication skills to the construction documents of record that are well organized and contain appropriate format, grammar, punctuation, sentence structure, and spelling in accordance with established professional guidelines.
- Apply oral communication skills to the explanation of ideas, scientific terminology, and results of scientific examinations in a competent and confident manner.

OCCUPATIONAL OPPORTUNITIES

- Government crime laboratories and medical examiner’s offices
- Private forensic testing laboratories
- Industrial laboratories employing chemical or biological technologists
- Quality control/quality assurance positions in testing laboratories

Examples of locations where our graduates have obtained employment include:

- New York City Office of the Chief Medical Examiner
- New York Police Department Crime Laboratory
- National Security Agency
- United States Army Criminal Investigations Division
- Hamilton County (Ohio) Coroner's Office
- Onondaga County Medical Investigations Division
- Erie County Crime Lab
- Erie County Medical Examiner’s Office
- NMS Labs

FUTURE EDUCATIONAL OPPORTUNITIES

- Graduate-Level Forensic Science Programs
- Medicine
- Dentistry
- Pharmacy
- Biology
- Chemistry
- LECOM Early Acceptance Program

Graduates of the program have been accepted into master’s or doctorate level programs from several universities including:

- Syracuse University
- Cedar Crest College
- University of Buffalo
- University of Albany
- George Washington University

LECOM EARLY ACCEPTANCE PROGRAM

- Alfred State's Forensic Science Technology program has an affiliation agreement with Lake Erie College of Osteopathic Medicine (LECOM).
- As a high school senior you can apply to both Alfred State College and LECOM's Early Acceptance Program (EAP) for the College of Osteopathic Medicine of the College of Pharmacy.
- Current Alfred State Forensic Science Technology students with at least two years remaining can also apply to LECOM's EAP.
- Through the 4+4 program, students who earn a BS in Forensic Science Technology at Alfred State College will continue their education at LECOM. For more information visit https://lecom.edu/academics/early-acceptance-program/.

Health Sciences

INTERNSHIP OPPORTUNITIES
Students have completed internship experiences at various locations, including the FBI, ATF, New York State Police Crime Laboratories, multiple county and municipal crime laboratories both inside and outside of New York State, private testing and industrial laboratories, and hospital clinical laboratories.

ENTRANCE REQUIREMENTS/RECOMMENDATIONS
Required: Algebra, Geometry, Algebra 2, Biology, Chemistry
Recommended: Physics

OFFICE OF ACCESSIBILITY SERVICES
Students who believe they need a reasonable accommodation to properly participate in this program may contact Melanie Ryan in the Office of Accessibility Services. This office may be contacted by email at oas@alfredstate.edu or by phone at 607-587-4506. Please keep in mind that some accommodations may take time to implement, so students seeking accommodations are encouraged to contact OAS as early as possible.

REQUIRED EQUIPMENT
A tier 1 laptop computer is required for students entering this degree program. Laptop specifications are available at www.alfredstate.edu/required-laptops.

FORENSIC SCIENCE TECHNOLOGY - BS DEGREE

TYPICAL EIGHT-SEMESTER PROGRAM

First
| FRSC  | 1001 | Intro to Forensic Science Tech I | 1 |
| CHEM  | 1984 | Chemical Principles I | 4 |
| BIOL  | 1104 | General Biology I | 4 |
| COMP  | 1503 | Freshman Composition | 3 |
| MATH  | 1084 | Calculus I | 4 |

Second
| FRSC  | 2001 | Intro to Forensic Science Tech II | 1 |
| CHEM  | 2984 | Chemical Principles II | 4 |
| BIOL  | 2004 | General Biology II | 4 |
| SPCH  | 1083 | Effective Speaking | 3 |
| GLST  | 2113 | Global Perspectives: Sped Topic | 3 |

Third
| FRSC  | 3001 | Topics in Forensic Science I | 1 |
| CHEM  | 3514 | Organic Chemistry I | 4 |
| PHYS  | 1044 | College Physics I | 4 |
| LITR  | xxx3 | Literature Elective | 3 |
| XXXX  | xxx3 | General Education Elective | 3 |

Fourth
| FRSC  | 4001 | Topics in Forensic Science II | 1 |
| CHEM  | 4524 | Organic Chemistry II | 4 |
| PHYS  | 2044 | College Physics II | 4 |
| MATH  | 2124 | Statistical Methods & Analysis | 4 |
| XXXX  | xxx3 | General Education Elective | 3 |

Fifth
| CJUS  | 1003 | Intro to Criminal Justice | 3 |
| CHEM  | 7784 | Biochemistry | 4 |
| BIOL  | 5254 | Microbiology | 4 |
| COMP  | 5703 | Technical Writing II | 3 |
| XXXX  | xxx3 | Technical Elective | 3 |

Sixth
| BIOL  | 6534 | Genetics | 4 |
| CHEM  | 6614 | Instrumental Analysis | 4 |
| CJUS  | 6003 | Law & Criminal Evidence | 3 |
| FRSC  | 6214 | Forensic and Criminalistics | 4 |

Seventh
| FRSC  | 7214 | Forensic Chemistry | 4 |
| CHEM  | 5414 | Analytical Principles | 4 |
| XXXX  | xxx3 | Technical Elective | 3 |
| XXXX  | xxx3 | Technical Elective | 3 |

Eighth
| FRSC  | 8214 | Forensic Biology | 4 |
| FRSC  | 8111 | Forensic Science Tech Capstone | 1 |
| FRSC  | 8113 | Forensic Sci Tech Prof Prepar | 3 |
| FRSC  | 8703 | Senior Research Project | 3 |
| FRSC  | 8713 | Forensic Sci Tech Internship | 3 |
| BIOL  | 5013 | Biotechniques | 3 |

Approved Technical Electives:
ANTH 5333 Medical Anthropology
BIOL 1304 Botany
BIOL 1404 Anatomy & Physiology I
Students pursuing a career in forensic biology/DNA are advised that the following three courses are required at the undergraduate level: Biochemistry, Genetics, and Molecular and Cell Biology.

TECHNICAL STANDARDS

It is essential that students in this degree program are able to fully and safely participate, with or without reasonable accommodation, in all classroom, laboratory, field, internship, and research experiences required for completion of the program. Students in this degree program should be able to:

• Function in a safe manner, not placing themselves, faculty, staff, or other students in jeopardy.
• Appropriately and safely use standard laboratory equipment, materials, and instrumentation to include possession of fine motor skills and mobility.
• Make sensory visual and auditory observations during, and interpret data from, all required laboratory assignments.
• Communicate effectively, both orally and in writing.

In addition, this degree program requires students to complete either an off-campus internship experience or a research project. Students in this degree program are expected to meet the following professional standards:

• Maintain confidentiality in professional workplace settings.
• Maintain professional composure at all times.

Be advised that a prior felony conviction may impede a student's ability to participate in an internship experience. In addition, students desiring careers within the field of forensic science should be aware that they will likely have to undergo background checks prior to being offered employment or an internship at a crime laboratory. These background checks are often similar to those required for law enforcement officers and may include questions regarding drug usage, criminal history, driving records, credit history, personal associations, and/or past work performance. In addition, they may include drug tests, polygraph examinations, and physical and medical examinations.

GRADUATION REQUIREMENTS

• Minimum of 122 total semester credit hours
• Completion of at least one course from seven of the 10 SUNY General Education categories
• 30 credits of general education
• 60 Liberal Arts & Science credits
• Minimum of 45 upper-division semester credit hours
• Minimum of 30 upper-division semester credit hours in residence
• 3 credit hours of research or internship
• 2.0 cumulative grade point average
• Grade of "C" or higher in courses with BIOL, CHEM, and FRSC prefixes
• Completion of a "mock trial" capstone experience
• Approval of department faculty

All laboratory-based courses for this academic program must be completed in an in-person format. Laboratory-based courses in the on-line format will not fulfill degree requirements.
GAME & INTERACTIVE DESIGN

BS - CODE #2919

Joshua Stutts, Program Coordinator
Email address: stuttsj@alfredstate.edu

The game and interactive design (G&ID) program offers a hands-on, studio-based approach to design, programming, and storytelling. Course work covers the breadth of interactive design from AAA (triple A) game titles to the interactions of application interfaces. Skills developed in the program are applicable to the growing fields of user experience (UX) design, application design, web design, data visualization, and interactive entertainment.

ADVANTAGES

Graduates of the game and interactive design Bachelor of Science program will possess the skills and technical knowledge base necessary to be proficient and capable in both the design and development of interactive media. They will be well prepared for entry-level positions in the fields of experience (UX) design, application design, web design, data visualization, and interactive entertainment. The program’s strength is in the versatility and flexibility of the graduating student, allowing employment opportunities to expand well beyond a singular field of design.

PROGRAM STUDENT LEARNING OUTCOMES

- Demonstrate proficiency and flexibility with technology associated with game and interactive design.
- Organize and produce works of interactive media in a team environment.
- Create quality works of game design and interactive media that utilize relevant history and theory.
- Analyze their own work, as well as the work of others in critiques, presentations, writings, and other activities.
- Demonstrate a strong work ethic through time management and quality works.
- Demonstrate critical thinking by completing problem-solving activities.

OCCUPATIONAL OPPORTUNITIES

- Game design
- UX (user experience design)
- Interactive entertainment
- Application design
- Data visualization
- Web design

EMPLOYMENT STATISTICS

No data available.

RELATED PROGRAMS

- Digital Media and Animation
- Graphic and Media Design
- Information Technology: Web Development

ENTRANCE REQUIREMENTS/RECOMMENDATIONS

Required: Algebra and Geometry. Transfer applicants must possess a 2.0 cumulative grade point average as well as a grade of "C" or better in each course taken during the most recent semester of attendance. Individuals with less than a 2.0 cumulative grade point average may be considered with additional documentation.

Recommended: Algebra 2, Physics

OFFICE OF ACCESSIBILITY SERVICES

Students who believe they need a reasonable accommodation to properly participate in this program may contact Melanie Ryan in the Office of Accessibility Services. This office may be contacted by email at oas@alfredstate.edu or by phone at 607-587-4506. Please keep in mind that some accommodations may take time to implement, so students seeking accommodations are encouraged to contact OAS as early as possible.

REQUIRED EQUIPMENT

A tier 4 or Apple MacBook Pro laptop computer is required for students entering the game and interactive design program. Laptop specifications are available at www.alfredstate.edu/required-laptops.

BS DEGREE GRADUATION REQUIREMENTS

• Complete 121 total semester credit hours
• 60 credit hours of liberal arts and sciences from eight of the 10 SUNY general education categories
• 2.0 cumulative GPA
• Grade of "C" or better in core courses (DGMA and CISY prefixes)
• Students are also required to complete a digital portfolio assignment and annual reviews to meet graduation requirements.
The game and interactive design (AS) program will offer a hands-on, studio-based approach to design, programming, and storytelling. Course work covers the breadth of interactive design from AAA (triple A) game titles to the interactions of application interfaces. Skills developed in the program are applicable to the growing fields of user experience (UX) design, application design, web design, data visualization and interactive entertainment. The program will develop foundational skills, yet provide versatility and flexibility in the graduating student, allowing employment opportunities to expand well beyond a singular field of design.

ADVANTAGES

Graduates of the game and interactive design Associate in Science (AS) program will possess the skills and technical knowledge base necessary to be proficient and capable in both the design and development of interactive media. They will be prepared for entry-level positions in the fields of experience (UX) design, application design, web design, data visualization, and interactive entertainment, as well as prepared for transfer to a bachelor's-level program.

PROGRAM STUDENT LEARNING OUTCOMES

Graduates of the program will be able to:

- Demonstrate proficiency with the technology associated with game and interactive design.
- Organize and produce works of interactive media.
- Create quality works of game design and interactive media.
- Analyze their own work, as well as the work of others in critiques, presentations, writings, and other activities.
- Demonstrate a strong work ethic through time management and quality works.
- Demonstrate critical thinking by completing problem-solving activities.

DIRECT ENTRY INTO BACCALAUREATE DEGREE PROGRAMS

Alfred State game and interactive design AS graduates may enter directly into the game and interactive design BS, the interdisciplinary studies BTech, or the technology management BBA degree program.

OCCUPATIONAL OPPORTUNITIES

- Game design
- UX (user experience design)
- Interactive entertainment
- Application design
- Data visualization
- Web design

EMPLOYMENT STATISTICS

No data available.

Please keep in mind that some accommodations may take time to implement, so students seeking accommodations are encouraged to contact OAS as early as possible.
GRAPHIC AND MEDIA DESIGN

AS DEGREE - CODE #2557

Kylan Sattler, Program Coordinator
Email Address: sattlek@alfredstate.edu

The graphic and media design (AS) program provides graduates with foundational knowledge in graphic design for screen-based and print media. The program focuses on developing the contemporary problem-solving and design skills needed to apply the elements and principles of design, drawing, and visual communication. An awareness of design history is combined with the latest topics in graphic and media design to provide an informed student aimed at innovation in the field.

Graduates will possess the skills necessary to be well rounded in both design and production across a wide variety of print and digital media. They will be prepared for entry-level positions at design firms and in-house design and/or production departments within larger companies.

ADVANTAGES

The Alfred State graphic and media design (GMD) program is different from other such programs because it is constructed to meet the current needs for design in a time-based, screen-filled world. From cellphones to video billboards, new venues are demanding movement and interaction. This program is built to take advantage of new and ever-changing technologies and remain at the leading edge of design.

Because designers are being asked to design for print and screen, this requires new thinking, new versatility, and a new type of creative problem-solver. A new versatile designer is what Alfred State's graphic and media design program is designed to produce.

PROGRAM STUDENT LEARNING OUTCOMES

- Demonstrate proficiency and flexibility with technology associated with graphic and media design.
- Demonstrate use of a professional design process to conceptualize and create a finished design project.
- Analyze their own work, as well as others through critiques, presentations, and other activities.
- Employ critical thinking to complete problem-solving activities.
- Create quality graphic and media design that utilizes relevant design history and theory.

DIRECT ENTRY INTO BACCALAUREATE DEGREE PROGRAM

Graphic and media design AS graduates may enter directly into either the graphic and media design BS, the interdisciplinary studies BTech, or the technology management BBA degree program.

CONTINUING EDUCATION OPPORTUNITIES

Graduates will be well prepared to continue into baccalaureate programs in graphic design, media production, and education.

FACILITIES

- Video and audio production studio
- High-end computer labs
- Screen printing
- Large-format printing
- Traditional materials studios
- 24-hour studio access
- HD video and surround-sound in each studio
- Real-world collaborative studio environments
- Virtual reality and 3D sculpting studio
- 3D printing and laser cutting lab

## Graduation Requirements

To fulfill degree requirements, each student must complete 124 total semester credit hours, including a minimum of 60 credit hours of liberal arts and sciences from eight of the 10 State University of New York general education categories, and earn a 2.0 cumulative GPA and a grade of "C" or better in the core courses (DGMA and FNAT prefixes).

Students are required to complete a digital portfolio assignment and annual review to meet graduation requirements.

A typical day consists of two, one-hour lectures and a two-hour studio in the freshman and sophomore years.
HEALTH INFORMATION TECHNOLOGY

AAS DEGREE – CODE #1969

Erica Matteson, RHIA, Program Coordinator
Email address: matteses@alfredstate.edu

Health information technology (HIT) professionals play a key role in the planning, implementation, and management of the electronic health record (EHR), and with today’s growing reliance on computer-based records, this profession has become one of the fastest-growing in the nation. HIT professionals are educated in the leadership and management of health information, and are considered the custodians of health information. In this career, your primary function will be to make sure all the medical information collected about an individual is complete, accurate, and protected, while, at the same time, readily available for health care providers when it is needed.

Alfred State offers an online Associate in Applied Science degree in health information technology, which combines a profession in health care with information technology. As an HIT professional, you will be responsible for maintaining components of health information systems consistent with medical, legal, accreditation, and regulatory requirements of the health care delivery system. You will also maintain, collect, and analyze data crucial to the delivery of quality patient care.

ADVANTAGES

• Graduates are eligible to take the national certification examination to become a registered health information technician (RHIT). Since the program was created in 1968, Alfred State HIT graduates have traditionally achieved a passing rate above the national average.
• Teaching faculty in HIT curriculum have real-world Health Information Management (HIM) industry experience.

PROGRAM STUDENT LEARNING OBJECTIVES

• Apply biomedical knowledge (including medical terminology, anatomy & physiology, pathophysiology, and pharmacology) to apply diagnosis/procedure codes (ICD-9-CM, ICD-10-CM, ICD-10-PCS, CPT, and HCPCS level II according to current nomenclature).
• Use established federal guidelines, accreditation standards, and APC and DRG calculator/grouper software to comply with health care documentation (review), reimbursement, and reporting requirements.
• Apply HIM knowledge as defined by organizational policy and external regulations (e.g., Medicare, Medicaid, managed care) and standards to maintain the accuracy and completeness of the patient record.
• Apply HIM knowledge of policies and procedures for confidentiality and security measures regarding the access and disclosure of protected health information (PHI) to authorized users.
• Apply HIM knowledge in the collection, maintenance, and reporting of data for clinical indices/databases/registries to meet specific organizational and regulatory needs for the purposes of medical research and education.
• Organize and present data for quality management, utilization management, risk management, and other related studies.
• Apply HIM knowledge of legal, ethical, accreditation and certification standards as appropriate for the management of patient information.
• Apply basic methods when calculating descriptive, institutional, and health care vital statistics.
• Apply the use of common software applications (e.g., spreadsheets, databases, word processing, graphics, presentation, email, and so on) and HIM-related software applications (e.g., release of information, electronic health record, patient record abstracting, and so on).
• Apply HIM knowledge to promote ethical standards of practice to health information management and coding.
• Demonstrate effective written and oral communication as appropriate to health information management and coding practices. Communicate effectively with consumers, providers, and other health care professionals.
• Demonstrate critical thinking to problem solving and reasoning skills to health information management and coding practices.

PROFESSIONAL PRACTICE EXPERIENCES

Students complete non-paid professional practice experiences (PPEs) in the Health Information Department of a health care facility (160 hours) in their study. PPE arrangements are made in consultation with each student to identify locations considered to be within a reasonable distance. Students are not a substitute for paid staff during PPEs, which means they are expected to receive appropriate supervision and mentoring during completion of all tasks.

The professional practical experience (PPE) includes the completion of on-site hours in the Health Information Management (HIM) Department of a hospital (or other health care facility) with adequate facilities to provide varied work opportunities in HIM.

The Joint Commission Hospital Accreditation Standards Manual requires hospitals to implement “a process to ensure that a person’s qualifications are consistent with their job responsibilities.” This standard “applies to staff, students, and volunteers,” and if further states the hospital is responsible for verifying “the following according to law, regulation, or hospital policy: information on criminal background.” As such, Alfred State students who complete PPEs in the HIT program may be required to undergo a criminal background check prior to placement at the facility.

The PPE facility may require students to undergo a physical examination (on-site at the facility or by the student’s primary care provider) prior to beginning the professional practice experience. The physical examination includes drug screening, a TB test, and/or DTB, hepatitis B, and/or MMRV immunization or status. Students may be required to incur costs associated with the criminal background check and/or physical examination. Be advised that a prior felony conviction may impede a student’s ability to participate in a required professional practice experience. Students may be required to attend an on-site orientation at the professional practice facility, which could be several days in length beyond the 160 PPE hours. NOTE: Students must make appropriate arrangements with their current employer to complete the 160 hours at the PPE host site.

ARTICULATION AGREEMENTS

One-plus-one transfer agreements exist among Alfred State and Jamestown and American Samoa Community Colleges. Students complete their first year of study at the local community college and transfer to Alfred State for their second year. Transfer is guaranteed if a student successfully completes the prescribed first-year schedule of courses with a 2.0 cumulative index.

CONTINUING EDUCATION OPPORTUNITIES

Although not limited to these schools, common transfer institutions for HIT bachelor’s degree programs include SUNY Polytechnic, Stephens College, St. Scholastica, Regis University, University of Cincinnati, and Saint Joseph’s College of Maine.

DIRECT ENTRY INTO BACCALAUREATE DEGREE PROGRAMS

Alfred State health information technology AAS graduates may enter directly into the healthcare management BTech, the interdisciplinary studies BTech, or the technology management BBA degree program.

NOTE: This program is not accredited by the Commission on Accreditation for Health Informatics and Information Management Education (CAHIIM) and will not yield RHIA eligibility.

CERTIFICATION

Graduates are eligible to take the Registered Health Information Technician (RHIT), Certified Coding Specialist (CCS, CCS-P), and Certified Professional Coder (CPC, CPC-A, CPC-H, CPC-H, CPC-P) exams.

OCCUPATIONAL OPPORTUNITIES

• Hospitals and other health care facilities
• Clinics and physicians’ offices
• Insurance companies
• State and federal agencies
• Law firms
• Software companies
• Consulting

EMPLOYMENT STATISTICS

Employment and continuing education rate of 100 percent – 91 percent are employed; 9 percent continued their education.

RHIT EXAMINATION

The RHIT examination pass rate for the 2019-2020 reporting period is 86 percent. Six of seven first-time RHIT examination test-takers passed on their first attempt.

ENTRANCE REQUIREMENTS/RECOMMENDATIONS

Required: Biology, Algebra
Recommended: Keyboarding and knowledge of Microsoft Office Professional
Must be able to attend Professional Practice Experience (PPE) courses including 160 hours at a health care facility within reasonable driving/travel distance to their home.

OFFICE OF ACCESSIBILITY SERVICES
Students who believe they need a reasonable accommodation to properly participate in this program may contact Melanie Ryan in the Office of Accessibility Services. This office may be contacted by email at oas@alfredstate.edu or by phone at 607-587-4506. Please keep in mind that some accommodations may take time to implement, so students seeking accommodations are encouraged to contact OAS as early as possible.

GENERAL NOTES
• Working in the Health Information Management HIM profession requires long periods of standing and/or sitting.
• Job duties typically include handling paper documents and use of computer screens.
• Near vision reading of paper records or computer screens, including the use of multiple computer applications, is required 95 percent of the time.
• Documents are handwritten on paper, and other documents and information used are on computer screens, including scanned documents and images.
• The computer screen fonts may be small. The extensive use of a computer keyboard and mouse is required.
• HIM professionals spend the greater portion of the work day reading and analyzing both handwritten and computerized documents and use multiple software applications such as the electronic health record.
• Individuals should assess their personal limitations and abilities within these working environments, as HIM candidates will be assessed in all of these skill sets during the hiring process.

REQUIRED EQUIPMENT
A tier 1 laptop computer is required for students entering this degree program. Laptop specifications are available at www.alfredstate.edu/required-laptops. (A desktop of similar specifications can be used instead of a laptop for specified courses).

HIT students are required to earn a grade of at least a “C” or better in each BIOL and MEDR prefix course prior to placement in the PPEs. Students must also earn a grade of at least a “C” in all BIOL, MEDR, and COMP 1503 courses to graduate from the HIT program. Students receiving a grade of D/ F in MEDR or BIOL courses may attempt the course a second time. If the second attempt results in the grade of D/F, the student will be dismissed from the program.
The Bachelor of Science in health sciences program is a rigorous four-year baccalaureate degree in biological sciences designed to satisfy requirements for students entering health care professions or graduate-level biomedical research. Students in the program will be exposed to a rich offering of liberal arts courses and will advance from basic biology, chemistry, and physics courses to upper-level courses in biology, chemistry, health care, and research. The program further provides opportunities to select from a wide range of health-related technical electives to enhance and broaden the student’s expertise. These will prepare the graduate for working with future colleagues from the health care professions and the diverse population that will require their services. In addition, this program will prepare the graduate to seek transfer options to graduate-level or initial professional degree programs.

ADVANTAGES

- Students will build a solid foundation in biology and chemistry courses.
- Students will be able to internally and seamlessly transfer from Alfred State’s biological science (AAS) degree.
- Students will further advance knowledge and skills in biology, chemistry, health care, and research through courses, including microbiology, genetics, bio-techniques, molecular and cellular biology, biochemistry, culture of health care, ethical issues in health care, and research methods.
- Students will have the opportunity to enhance and broaden their training by selecting from a list of approved health-related technical electives such as advanced pharmacology, complementary and alternative medicine, genomics, instrumental analysis, medical anthropology, and more.
- Students will conceptualize and implement their knowledge and skills through a directed research experience or professional internship.

PROGRAM STUDENT LEARNING OUTCOMES (PSLOS)

- Apply the scientific principles of biology and chemistry to specific applications in health sciences.
- Explain and show competency in basic biological and chemical laboratory procedures.
- Demonstrate an understanding of the capabilities, use, potential, and limitations of various laboratory instrumental techniques widely utilized in health sciences.
- Recognize and use appropriate professional and ethical behavior as defined by the health sciences community.
- Evaluate scientific literature to distinguish fact from opinion, develop informed and reasonable conclusions, apply knowledge and understanding to problems, develop rational and reasonable interpretations, suspend beliefs and remain open to new information and methods, and assimilate information learned into knowledge base.
- Use technological resources effectively and appropriately to communicate, collaborate, and retrieve information; determine when technology is useful; and select the appropriate tool(s) and technology resources to address a variety of tasks and problems.
- Apply written communication skills to construct documents of record that are well organized and contain appropriate format, grammar, punctuation, sentence structure, and spelling in accordance with established professional guidelines.
- Apply oral communication skills to the explanation of ideas, scientific terminology, and results of scientific examinations in a competent and confident manner.
- Synthesize theory and concepts from the liberal arts education domain and other professions into health sciences.

FUTURE EDUCATIONAL OPPORTUNITIES

- Medicine
- Physician assistant
- Dentistry
- Optometry
- Osteopathy
- Pharmacy
- Audiology
- Physical therapy
- Occupational therapy
- Chiropractic
- Clinical psychology
- Graduate level biology, chemistry, or biomedical science

LECOM EARLY ACCEPTANCE PROGRAM

Alfred State's health sciences program has an affiliation agreement with Lake Erie College of Osteopathic Medicine (LECOM).

As a high school senior you can apply to both Alfred State College and LECOM’s Early Acceptance Program (EAP) for the College of Osteopathic Medicine or the College of Pharmacy.

Current Alfred State health science students with at least two years remaining can also apply to LECOM's EAP.

Through this 4+4 program, students who earn a BS in health sciences at Alfred State College will continue their education at LECOM. For more information visit [https://lecom.edu/academics/early-acceptance-program/](https://lecom.edu/academics/early-acceptance-program/).

EMPLOYMENT STATISTICS

Employment and continuing education rate of 100 percent – 50 percent are employed; 50 percent continued their education.

RELATED PROGRAMS

- Biological Science
- Forensic Science Technology

INTERNSHIP OPPORTUNITIES

- Academic or industrial research laboratory
- Health care or clinical laboratory
- Pharmacy
- Health care practitioner's office

ENTRANCE REQUIREMENTS/RECOMMENDATIONS

Specific high school course requirements and recommendations are:

- Required: Algebra, Geometry, Algebra 2, Biology, Chemistry
- Recommended: Physics

OFFICE OF ACCESSIBILITY SERVICES

Students who believe they need a reasonable accommodation to properly participate in this program may contact Melanie Ryan at [oas@alfredstate.edu](mailto:oas@alfredstate.edu) or by phone at 607-587-4506. Please keep in mind that some accommodations may take time to implement, so students seeking accommodations are encouraged to contact OAS as early as possible.

TECHNICAL STANDARDS

It is essential that students in this degree program are able to fully and safely participate, with or without reasonable accommodation, in all classroom, laboratory, field, internship, and research experiences required for completion of the program. Students in this degree program should be able to:

- Function in a safe manner, not placing themselves, faculty, staff, or other students in jeopardy.
- Appropriately and safely use standard laboratory equipment, materials, and instrumentation to include possession of fine motor skills and mobility.
- Make sensory visual and auditory observations during, and interpret data from, all required laboratory assignments.
- Communicate effectively, both orally and in writing.
In addition, this degree program requires students to complete either an off-campus internship experience or a research project. Students in this degree program are expected to meet the following professional standards:

- Maintain confidentiality in professional workplace settings.
- Maintain professional composure at all times.

Be advised that a prior felony conviction may impede a student’s ability to participate in an internship experience.

**GRADUATION REQUIREMENTS**

- 124 total semester credit hours
- Completion of at least one course from seven of the 10 SUNY Gen Ed categories.
- Minimum of 30 semester credit hours of general education courses.
- Minimum of 60 semester credit hours of Liberal Arts & Science credit hours.
- 48 upper-division credit hours
- 42 upper-division credit hours in the major
- Minimum of 30 upper-division credit hours in residence
- 3 credit hours of research or internship
- 2.0 cumulative grade point average
- Grade of “C” or higher in core courses with BIOL, CHEM, HLSC, and HLTH prefixes
- Approval of department faculty

All laboratory-based courses for this academic program must be completed in an in-person format. Laboratory-based courses in the online format will not fulfill degree requirements.

**REQUIRED EQUIPMENT**

A tier 1 laptop computer is required for students entering this degree program. Laptop specifications are available at [www.alfredstate.edu/required-laptops](http://www.alfredstate.edu/required-laptops).

HEALTHCARE MANAGEMENT

BTECH DEGREE – CODE #2647

Kathy Young, Department Chair
(607) 587-4129
Email address: youngk@alfredstate.edu

The Bachelor of Technology in healthcare management (HCM-BT) is an online, upper-division program designed to allow a student or working professional who has earned an associate degree (AAS, AA, or AS) in a health-related area (or at least 60 credits toward such a degree) to complete a bachelor’s degree. Individuals may currently be working in a laboratory, radiology, records, occupational therapy, surgical technology, paramedic, or ultrasound setting, and seeking advancement into management or administrative positions. The HCM-BT will open doors for these working adults by providing flexible online courses and laddering with all health-related two-year degrees granted by both colleges of technology and community colleges. The program emphasizes the development of managerial skills through a set of core courses and a wide array of electives to address areas such as healthcare finance/accounting, the culture of healthcare, human resources, communications, healthcare law and ethics and policies, information systems, marketing, and quality control. This degree will also provide an opportunity for students to continue their education toward an MBA to become a CNO, CEO, or COO.

ADVANTAGES
• Students will build a solid foundation in healthcare-related management courses from those currently working in the field.
• Students will be able to internally, seamlessly transfer from Alfred State’s radiologic technology, diagnostic medical sonography, health information technology, and nursing AAS degrees.
• Students will have the opportunity to enhance and broaden their training by selecting from a list of approved healthcare technical electives.

PROGRAM STUDENT LEARNING OUTCOMES
• Apply an understanding of self, as well as an understanding of the dynamics of groups and team interaction.
• Discuss and apply the methods used to plan, organize, and lead a healthcare facility.
• Analyze and use the appropriate skills and techniques needed for problem solving and decision making.
• Analyze and explain the application of employment laws and the legal system to the healthcare environment.
• Communicate effectively: oral, written, and nonverbal, using current technology where appropriate.
• Illustrate basic accounting methods and apply them using current technology.
• Perform financial and statistical analysis.
• Discuss the uses of and be able to prepare a comprehensive healthcare marketing plan.

OCCUPATIONAL OPPORTUNITIES
• Medical and health services department managers
• Public relations and fundraising managers
• Administrative services managers
• Training and development managers

FUTURE EDUCATIONAL OPPORTUNITIES
• Master of Business Administration (MBA)
• Master of Science (MS) Health Services Administration
• Master of Science (MS) Healthcare Management
• Doctorate of Philosophy (PhD) Healthcare Administration

EMPLOYMENT STATISTICS
Employment and continuing education rate of 100 percent – 71 percent are employed; 29 percent continued their education.

RELATED PROGRAMS
Diagnostic Medical Sonography (AAS)
Health Information Technology (AAS)
Radiologic Technology (AAS)
Technology Management (BTech)

ENTRANCE REQUIREMENTS/RECOMMENDATIONS
• Required: Successful completion of an associate degree in a health-related field or at least 60 transferrable credit hours, and a minimum GPA of 2.00.
• Recommended: A minimum of 21 credits in liberal arts and sciences, and five different general education fields covered.
• Students without the required college credits can come into the individual studies (AS) program as a bridge program.

OFFICE OF ACCESSIBILITY SERVICES
Students who believe they need a reasonable accommodation to properly participate in this program may contact Melanie Ryan in the Office of Accessibility Services. This office may be contacted by email at oas@alfredstate.edu or by phone at 607-587-4506. HEATING, VENTILATION, AND AIR CONDITIONING
AOS DEGREE - CODE #0464
Clinton Gray, Department Chair
Email address: GrayCJ@alfredstate.edu

The heating, ventilation, and air conditioning program will prepare you for this growing field with courses on all phases of residential and commercial installation, maintenance, troubleshooting, and repair. It includes forced air, hot water and steam heating, gas and oil burner systems, along with hands-on air conditioning and heat pump technology.

The plumbing aspect of the program provides instruction in the basic skills required by the plumber in the construction of residential housing and commercial buildings. The program ranges from the installation of waste and sewage lines to the installation of potable water lines and plumbing fixtures.

ADVANTAGES
• The program provides the necessary theory connected with plumbing and HVAC, as well as on-the-job training experience overseen by expert tradesmen.
• Students will take the National Refrigerant Handling Certification Course and Test and the National ARRI HVAC (Air Conditioning & Refrigeration Institute Heating Ventilation & Air Conditioning) Competency Test.

PROGRAM STUDENT LEARNING OUTCOMES
• Accurately measure and layout HVAC (plumbing, heating, ventilation, and air conditioning) projects.
• Apply safe practices to hand tools, power tools, and the environment.
• Select and apply the various materials used in the HVAC trade.
• Perform appropriate trade-related math, including interpretation of charts and graphs.
• Perform installation service and troubleshooting of fuels and emergency sources used in residential and commercial HVAC.
• Effectively communicate orally.
• Use the computer to access equipment information and operating specifications.
• Effectively communicate in writing.

DIRECT ENTRY INTO BACCALAUREATE DEGREE PROGRAM
Alfred State heating, ventilation, and air conditioning graduates may enter directly into the construction supervision BTech or technology management BBA degree program. Graduates who have credit for freshman composition, statistics, literature, history, and speech may complete the baccalaureate program in two additional years; others may complete the program in two-and-one-half years.

OCCUPATIONAL OPPORTUNITIES
• Maintenance personnel
• Maintenance supervisor
• Sheet metal fabricator
• Sales representative
• Pipe fitter
• Sprinkler installer
• HVAC mechanic or troubleshooter
• Water or sewer plant operator
• Private contractor

EMPLOYMENT STATISTICS
Employment and continuing education rate of 81 percent – 81 percent are employed.

RELATED PROGRAMS
Building Trades: Building Construction
Masonry

REQUIRED TOOLS/EQUIPMENT
A list of required tools, equipment, PPE, etc. for all of the programs mentioned above can be found at http://www.alfredstate.edu/tool-lists.

A tier 1 laptop computer is required for students entering this degree program. Laptop specifications are available at www.alfredstate.edu/required-laptops.

HEATING, VENTILATION, AND AIR CONDITIONING
ENTRANCE REQUIREMENTS/RECOMMENDATIONS
Recommended: Algebra and Geometry

OFFICE OF ACCESSIBILITY SERVICES
Students who believe they need a reasonable accommodation to properly participate in this program may contact Melanie Ryan in the Office of Accessibility Services. This office may be contacted by email at oas@alfredstate.edu or by phone at 607-587-4506. Please keep in mind that some accommodations may take time to implement, so students seeking accommodations are encouraged to contact OAS as early as possible.

TECHNICAL STANDARDS
Applicants in the heating, ventilation, and air conditioning program must meet the following physical requirements:
• Must be able to lift 50 pounds to shoulder height.
• Must be able to perform safely in the laboratory.
• Must be able to effectively communicate with a person 20 feet away.
• Must be able to climb a ladder and/or able to climb, unaided, onto and off equipment using three points of contact.
• Must be able to safely respond to a backup warning alarm.

**GRADUATION REQUIREMENTS**

A student must successfully complete all courses in the prescribed four-semester program and earn a minimum cumulative index of 2.0, which is equivalent to a "C" average.
HEAVY EQUIPMENT OPERATIONS
AOS DEGREE – CODE #1908
Clinton Gray, Department Chair
Email address: GrayCJ@alfredstate.edu

This program will provide you with the hands-on skills and expert training required by heavy equipment operators for the light construction and heavy highway industries. Instruction is provided in heavy equipment operations theory, as well as grades, soils, blueprint reading, safety, and supervision.

You will spend approximately 25 percent of your lab time operating real, industry-standard equipment; the balance of the lab time is spent on equipment inspection, maintenance, grades, lot layout, operation support, and estimating.

ADVANTAGES
Programs leading to an AOS degree are hands-on and do not include liberal arts and sciences courses. Offered at the School of Applied Technology campus in Wellsville, heavy equipment operations is geared toward a person who would like to enter the heavy equipment operation industry following graduation.

PROGRAM STUDENT LEARNING OUTCOMES
• Select the correct piece of equipment and demonstrate the proper use for an earth moving or excavation project.
• Select and use the necessary PPE for a given construction project.
• Demonstrate the proper set-up and use of various types of survey equipment.
• Read and interpret blueprints.
• Accurately estimate materials for a project.
• Demonstrate essential problem-solving and supervisory skills.
• Perform common mathematical calculations.
• Demonstrate how to excavate to meet construction and OSHA standards, based on the soil type.
• Safely operate various equipment utilized in the construction industry.
• Perform computer-based research and communication.

DIRECT ENTRY INTO BACCALAUREATE DEGREE PROGRAM
Alfred State heavy equipment operations graduates may enter directly into the construction supervision BTech or technology management BBA degree program. Graduates who have credit for freshman composition, statistics, literature, history, and speech may complete the baccalaureate program in two additional years; others may complete the program in two-and-one-half years.

OCCUPATIONAL OPPORTUNITIES
• Town, village, or county department of public works
• NYS Department of Transportation
• Highway and heavy construction companies
• Mining companies
• Logging companies
• Energy industry
• Self-employment
• Equipment operator
• Construction foreman
• Construction superintendent

EMPLOYMENT STATISTICS
Employment and continuing education rate of 100 percent – 97 percent are employed; 3 percent continued their education.

GRADUATION REQUIREMENTS

A student must successfully complete all courses in the prescribed four-semester program and earn a minimum cumulative index of 2.0, which is equivalent to a “C” average.
HEAVY EQUIPMENT, TRUCK & DIESEL TECHNICIAN

AOS DEGREE – CODE #0452

Eric Wilmot, Department Chair and Program Coordinator
Email address: wilmote@alfredstate.edu

One of our most popular programs, this specialization includes 1,800 hours of practical experience and classroom training designed to prepare you to enter the dynamic field of heavy equipment maintenance and repair. You will receive a strong foundation on all types of vehicles during your first year, followed by a year of concentration on trucks, bulldozers, earthmovers, farm tractors, and other diesel-powered equipment during your senior year.

ADVANTAGES
• Our heavy equipment, truck and diesel technician program is the only program in New York and New England that is approved by the Association of Diesel Specialists (ADS). The heavy equipment, truck and diesel technician program is one of only nine national ADS TechSmart training programs.
• Students successfully completing the heavy equipment, truck and diesel technician program may return for a third year (senior year) in automotive service technician or motorsports technology and earn a second associate degree. They may be admitted to autobody repair with the department chair’s approval.

PROGRAM STUDENT LEARNING OUTCOMES
• Demonstrate a focused, coherent, organized written report.
• Perform mathematical calculations required for entry-level automotive employment.
• Demonstrate a functional ability to read and retain/apply written instructions and specifications relevant to their work environment.
• Demonstrate the ability to diagnose and repair heavy equipment/truck drive trains.
• Demonstrate the ability to diagnose and repair heavy equipment/truck electrical and electronic systems.
• Demonstrate the ability to diagnose and repair heavy equipment/truck gas engines.
• Demonstrate the ability to diagnose and repair heavy equipment/truck brakes, steering, and suspension systems.

DIRECT ENTRY INTO BACCALAUREATE DEGREE PROGRAM
Alfred State heavy equipment, truck and diesel technician graduates may enter directly into the technology management BBA degree program. Graduates who have credit for freshman composition, statistics, literature, history, and speech may complete the BBA program in two-and-one-half years. Students successfully completing the heavy equipment, truck & diesel technician program receive first priority for space if they wish a third year (senior year) in automotive service technician.

OCCUPATIONAL OPPORTUNITIES
• Agricultural equipment mechanic
• Service manager
• Diesel engine specialist
• Diesel fuel system specialist
• Shop foreman
• Heavy equipment mechanic
• Truck fleet mechanic
• Industrial equipment mechanic
• Marine engine service technician

EMPLOYMENT STATISTICS
Employment and continuing education rate of 97 percent – 97 percent are employed.

RELATED PROGRAMS
Autobody Repair
Automotive Service Technician
Mechanical Engineering Technology
Welding Technology

REQUIRED TOOLS/EQUIPMENT
A list of required tools, equipment, PPE, etc. for all of the programs mentioned above can be found at http://www.alfredstate.edu/tool-lists.

A tier 1 laptop computer is required for students entering this degree program. Laptop specifications are available at www.alfredstate.edu/required-laptops.

ENTRANCE REQUIREMENTS/RECOMMENDATIONS
Recommended: Algebra

OFFICE OF ACCESSIBILITY SERVICES
Students who believe they need a reasonable accommodation to properly participate in this program may contact Melanie Ryan in the Office of Accessibility Services. This office may be contacted by email at oas@alfredstate.edu or by phone at 607-587-4506. Please keep in mind that some accommodations may take time to implement, so students seeking accommodations are encouraged to contact OAS as early as possible.

TECHNICAL STANDARDS
Applicants for all programs in the Automotive Trades Department must meet the following physical requirements:
• Must be able to lift 50 pounds to eye level.
• Must be able to effectively communicate with a person 6 to 10 feet away.
• Must be able to visually decipher small images on a monitor or digital display.
• Must be able to distinguish sounds associated with mechanical failures.
• Must be able to comprehend written information found in service repair manuals.
• Must have a valid motor vehicle driver’s license.

CERTIFICATION OR LICENSURE
Students may take Automotive Service Excellence (ASE) certification exams in eight areas and the ADS TechCert test. Students are eligible for New York State inspection certification upon successful completion of their freshman year. In their senior year, students may take the test for certification in Basic Engine Theory through the Association of Diesel Specialists.

CONTINUING STUDENTS
Students successfully completing the heavy equipment, truck & diesel technician program receive first priority for space if they wish a third year (senior year) in automotive service technician. They may be admitted to autobody repair with the department chair’s approval.

GRADUATION REQUIREMENTS
A student must successfully complete all courses in the prescribed four-semester program and earn a minimum cumulative index of 2.0, which is equivalent to a “C” average.
The human services program is a broadly based, applied program emphasizing both professional course work in the human services and course work in the social sciences and liberal arts. As a student, you will take courses that provide you with the skills and knowledge to be successful when working in a variety of human services agencies. You will also have the opportunity to take electives in specialty areas such as education, substance abuse, criminal justice, and gerontology.

**PROGRAM STUDENT LEARNING OUTCOMES**

- Apply critical thinking skills in the context of professional practice.
- Perform the basic operations of personal computer use, as well as employ basic research techniques to locate, evaluate, and synthesize information from a variety of sources.
- Communicate effectively and appropriately in oral and written forms.
- Demonstrate ethical professional behaviors.
- Identify the components of one’s own belief systems and the assumptions underlying them.
- Analyze the impact of social policies on client systems, workers, and agencies.
- Identify the bio-psycho-social variables that affect individual and group development and behavior.
- Examine the role of diversity in the human services field.

**DIRECT ENTRY INTO BACCALAUREATE DEGREE PROGRAMS**

Alfred State human services graduates may enter directly into either the human services management BS, the interdisciplinary studies BTech, or the technology management BBA degree program.

**CONTINUING EDUCATION OPPORTUNITIES**

The human services program offers excellent transfer potential in fields such as psychology, human services, human services management, education, social work, sociology, criminal justice, gerontology, and communications. Among the colleges to which recent graduates have successfully transferred are: Alfred University, Mansfield University, Hilbert College, SUNY at Brockport, University of Buffalo, and SUNY at Stony Brook.

**INTERNSHIP OPPORTUNITIES**

In Practicum (HUSR 1074) students complete a substantial internship providing direct service to clients at one local/regional human services agency. Agencies include Accord Corp., Alfred Montessori School, Allegany County ARC, Allegany County Department of Health, Allegany County Office of the Aging, Allegany Rehabilitation Associates, Inc., Catholic Charities, Hornell Area Concern for Youth, Trapping Brook House, and the YMCA of Hornell.

Be advised that a prior felony conviction may impede a student’s ability to participate in an internship and complete the program.

**OCCUPATIONAL OPPORTUNITIES**

- Early childhood programs
- Education
- Social services
- Youth services
- Elderly services
- Criminal justice
- Disability services
- Substance abuse programs
- Activity directors

**EMPLOYMENT STATISTICS**

Employment and continuing education rate of 100 percent – 25 percent are employed; 75 percent continued their education.

**RELATED PROGRAMS**

- Human Services Management
- Individual Studies
- Interdisciplinary Studies
- Liberal Arts & Sciences: Social Science
**ABILITY**

**STANDARD**

- Physical Demands/Motor Skills
  - Students must possess physical ability to navigate in the classroom, intern site, and community.

- Critical Thinking/Observation/Sensory/Reasoning Skills
  - Demonstrate remembering, understanding, applying, analyzing, and evaluating human services-related skills.

- Emotional and Mental
  - Demonstrate emotional and mental regulation.

- Behavioral/Social Skills and Professionalism
  - Capacity to work with individuals, families, groups, and colleagues from a variety of social/emotional agencies/organizations that support them.

- Communication Skills
  - Communication skills sufficient to communicate in class and in human services agencies/organizations.

**EXAMPLES of necessary activities (not all-inclusive)**

- Attend and perform safely and satisfactorily in the classroom and in a human/social services agency/organization.
- Meet the physical demands of internship placement, including demands related to the use of sensory and motor skills.
- Accurately observe clients to effectively assess their situations.
- Have sensory abilities to carry out necessary assessment activities.
- Think critically, analyze, and interpret objective and subjective data.
- Apply effective problem-solving skills.
- Use appropriate self-care.
- Evaluate and appropriately modify behavior for medical or emotional problems that interfere with academic and internship performance.
- Demonstrate appropriate use of self-disclosure.
- Resolve ethical dilemmas that may occur among classmates, other students, faculty, clients, and other professionals.
- Adhere to the Ethical Standards for Human Services Professionals (NOHS).
- Adhere to college policies on academic integrity and code of conduct.
- Ability to pass a background check.*
- Communicate effectively with other students, faculty, clients, and other professionals.
- Have a willingness to listen attentively.
- Communicate effectively through presentations, written assignments, small group settings, and through electronic means.
- Perceive and interpret nonverbal communication.
- Demonstrate competency in writing skills.

- "Students must sign a document indicating they understand that if they have a felony conviction they may not pass a background check for employment in human services.

Also required: One credit hour of physical education.

**PRACTICUM (HUSR 1074) PREREQUISITES**

- Good academic standing (cumulative GPA of 2.0 or higher)
- Completion of PSYC 1063 and either HUSR 2083 or HUSR 4033 with a "C" or higher grade
- Submission of HUSR 1074 practicum application form to the departmental practicum coordinator
- Approval of the department faculty
- Ability to pass any agency required background check

**GRADUATION REQUIREMENTS**

- Good academic standing (cumulative GPA of 2.0 or higher)
- Successful completion of all courses in the prescribed four-semester plan
- "C" average or higher needed in HUSR 2083, HUSR 4033, and PSYC 1063
- HUSR 1074 with a “B” or higher
- Submission of the college’s degree application form
HUMAN SERVICES MANAGEMENT

BS DEGREE – CODE #2153

BS Degree - Accelerated - 3 year - Code #2603

Dr. Jill Priest Amati, Department Chair and Program Coordinator
Email address: amatijp@alfredstate.edu

The US Bureau of Labor Statistics expects demand for bachelor-prepared human services professionals to grow faster than average through the next decade, especially in rural areas that already face a significant shortage of human services professionals.

The baccalaureate degree (BS) program in human services management will prepare you as a generalist who can work with clients in a wide range of human services agencies and also can employ sound management practices. This interdisciplinary program will not only instruct you on how to offer direct service to clients, but also how to build a strong foundation in the basics of program management and supervision. The program requires you to take lower- and upper-level courses in the human services and additional courses in management, accounting, and leadership.

ADVANTAGES

- Internship opportunities are available. See details below.
- Graduate-level programs exist in areas including human services, human services administration, social work, social work administration, business administration, and non-profit public administration.
- An accelerated three-year option exists for highly motivated and academically talented students.

PROGRAM STUDENT LEARNING OUTCOMES

- Apply critical thinking skills in the context of professional practices.
- Perform the basic operations of personal computer use and employ basic research techniques to locate, evaluate, and synthesize information from a variety of sources.
- Communicate effectively and appropriately in oral and written forms.
- Apply a core set of management skills in human resources, finance, operations, and leadership.
- Apply a core set of generalist practice skills in planning, implementing, and evaluating client interventions.
- Adhere to professional ethical standards and value diversity in all areas of practice, including the supervised field practicum, academic experiences, and community involvement.
- Analyze and design intervention strategies to improve social policies impacting client systems at individual, organizational, and community levels.
- Construct a professional portfolio to prepare for employment or graduate study.

FUTURE EDUCATIONAL OPPORTUNITIES

Graduate-level programs in areas including human services, human services administration, social work, social work administration, business administration, and non-profit public administration.

OCCUPATIONAL OPPORTUNITIES

- Case, program, or residential manager
- Human services supervisor
- Aftercare coordinator
- Quality assurance specialist
- Outreach coordinator
- Grants management and organizational development specialist
- Program planner

EMPLOYMENT STATISTICS

Employment and continuing education rate of 100 percent - 80 percent employed; 20 percent decided to continue their education.

The US Bureau of Labor Statistics expects demand for bachelor-prepared human services professionals to grow faster than average through the next decade, especially in rural areas that already face a significant shortage of human services professionals.

RELATED PROGRAMS

Business Administration

Liberal Arts and Sciences: Social Science

INTERNSHIP OPPORTUNITIES

In Field Practicum (HUSR 5314) students complete 400 hours of a management-focused internship. Internship opportunities exist with a number of local and regional human services agencies including, but not limited to, ACCORD Corp., Adelphi Behavioral Sciences, Alfred Montessori School, Allegany County ARC, Allegany County Department of Health, Allegany County Department of Social Services, Allegany County Office for the Aging, Allegany Rehabilitation Associates, Inc., Catholic Charities, Hillside Children's Services, Hornell Area Concern for Youth, St. James Mercy Healthcare, Trapping Brook House, and the YMCA of Hornell.

ENTRANCE REQUIREMENTS/RECOMMENDATIONS

- Applicants are informed that many human services agencies require that field practicum students pass background checks before being allowed to begin their field placements.
- While the program allows students to pursue their degrees on a part-time basis, applicants should be aware that they must enroll as full-time students in the semester in which they take their senior fieldwork (HUSR 5314).

Required: Algebra
Recommended: Geometry, Biology

OFFICE OF ACCESSIBILITY SERVICES

Students who believe they need a reasonable accommodation to properly participate in this program may contact Melanie Ryan in the Office of Accessibility Services. This office may be contacted by email at oas@alfredstate.edu or by phone at 607-587-4506. Please keep in mind that some accommodations may take time to implement, so students seeking accommodations are encouraged to contact OAS as early as possible.

Technical Standards - Human Services Management

These technical standards have been established to inform students of the skills and standards necessary for completion of the human services program and as a professional in the field of human services.
GRADUATION REQUIREMENTS

- Grade of "C" or higher in all upper-level courses

Practicum (HUSR 1074) Prerequisites

- Good academic standing (cumulative GPA of 2.0 or higher)
- Completion of PSYC 1063 and either HUSR 2083 or HUSR 4033 with a grade of "C" or higher
- Submission of HUSR 1074 practicum application form to the departmental practicum coordinator
- Approval of the department faculty
- Ability to pass any agency required background check

Practicum (HUSR 5314) Prerequisites

- Good academic standing (cumulative GPA of 2.0 or higher)
- Completion of at least three of the following four courses - HUSR 5003, HUSR 5103, HUSR 5203, HUSR 5213 - with a "C" or higher grade in each of the three
- Submission of HUSR 5314 practicum application form to the departmental practicum coordinator
- Approval of the department faculty
- Ability to pass any required background check
- Completion of HUSR 1074 with a grade of "B" or higher

For all human services management programs: Be advised that a prior felony conviction may impede a student's ability to participate in an internship and complete the program.

Note:

* Any non-required course designated as "Liberal Arts and Sciences" in the college catalog.

** Any non-required course taught in the Department of Social & Behavioral Sciences.

*** HUSR 1074 requires a "C" or higher between PSYC 1063 and either HUSR 2083 or HUSR 4033.

**** One of HIST 1143 (American History I), HIST 2143 (American History II), PLSC 1043 (American Government) or GEAH 9100.
INDIVIDUAL STUDIES – CODE #0688

Francine Staba, Interim Department Chair
Email address: advising@alfredstate.edu

This program, offered on campus or online, will give you the opportunity to explore majors, career options, and futures. It is also excellent preparation for transfer into four-year programs or various colleges and universities, and can be tailored to fulfill a career goal that cannot be met by traditional program offerings.

ADVANTAGES
- Flexibility to choose online courses that fit your needs.
- Ability to sample or select courses from different fields.
- Excellent preparation for transfer or tailoring to specific goals.

PROGRAM STUDENT LEARNING OUTCOMES
- Create written communication (including the appropriate use of technology) appropriate for degree type and level that meets standards of style, clarity, and grammatical correctness as described in the Writing Rubric.
- Demonstrate oral communication proficiency.
- Demonstrate foundational knowledge required to be an informed citizen in a global community by successfully completing ("C" or better) seven of the 10 SUNY General Education skill areas.
- Complete 15 credit hours in a concentration and describe their coherent sequence of study and transfer focus.
- Critical thinking (problem-solving, reasoning skills appropriate to degree level and type).
- Use library, online, and other resources to locate and evaluate scholarly articles and other research materials. Perform the basic operations of personal computer use, understand and use basic research techniques and locate, evaluate, and synthesize information from a variety of sources.
- Demonstrate competence in arithmetic, algebra, geometry, data analysis, and quantitative reasoning. Employ basic problem-solving strategies.

DIRECT ENTRY INTO BACCALAUREATE DEGREE PROGRAMS
Alfred State individual studies graduates may enter directly into either the interdisciplinary studies B Tech or the technology management BBA degree program.

EMPLOYMENT STATISTICS
Employment and continuing education rate of 100 percent – 29 percent are employed; 71 percent continued their education.

*Depending on student's career area, additional general education and/or liberal arts credits may be needed to reach the 30-credit-hour requirement of each. If met by career area courses, these are open electives.

GRADUATION REQUIREMENTS
- A minimum of 61 hours is required for graduation, with a cumulative index of 2.0.
- Students must have a clear career or transfer focus with at least 15 credit hours, with a 2.0 GPA
- Students must complete at least 30 credit hours in general education with at least seven of the 10 SUNY GE knowledge areas met (two of which must include math and written and oral communication).
- Students must complete at least 30 liberal arts and sciences credits
- HPED
INFORMATION TECHNOLOGY: APPLICATIONS SOFTWARE DEVELOPMENT

BTECH DEGREE – CODE #1502

Evan Enke, Program Coordinator
Email address: enkeeg@alfredstate.edu

The Bachelor of Technology degree in information technology: applications software development at Alfred State is designed to prepare you to enter the workforce as an IT professional with a special emphasis in the fast-moving field of programming and database applications. From database application to programming language sequences, including C#, Java, and C++, our expert faculty have created a curriculum to help you meet your career goals. You will also receive a sound foundation in web development, networking, and microcomputer systems. And a full-semester internship will give you the hands-on experience employers are looking for.

ADVANTAGES

Due to the solid foundation in all the major fields of information technology, the job opportunities for graduates are wide and numerous.

PROGRAM STUDENT LEARNING OUTCOMES

- Produce object-oriented application software with current development programming languages.
- Produce functional databases with current DBMS such as Oracle, MySQL, Access, etc.
- Use the appropriate database design methodologies.
- Perform the full life cycle of software development.
- Develop an outline for an information system project.
- Install, configure, and troubleshoot basic hardware.
- Identify and utilize business principles and problem-solving techniques.
- Demonstrate and use managerial principles of business.
- Demonstrate knowledge of multiple areas within the liberal arts arena.
- Apply accumulated knowledge and skills in an actual industry environment.

CONTINUING EDUCATION OPPORTUNITIES

Articulation agreements have been established with many community colleges and additional agreements are in development. It is possible, with careful selection of courses, to transfer from a variety of associate degrees, including computer information systems, information technology, computer science, and others. Upon completion of the bachelor’s degree, students will be prepared to pursue a graduate degree in information technology. The computer information systems degree (AAS) at Alfred State is especially well suited for transfer into the bachelor’s degree at the junior level.

OCCUPATIONAL OPPORTUNITIES

Organizations of all types and sizes need computer professionals. The primary employment field includes database administrators, programmers, and systems analysts. Due to the solid foundation in all the major fields of information technology, the job opportunities for graduates are wide and numerous. They include database administrators, software developers, network support, project managers, user support, web developers, IT managers, technical sales, and technical support staff, to name a few.

EMPLOYMENT STATISTICS

Employment and continuing education rate of 83 percent – 83 percent are employed.

RELATED PROGRAMS

- Computer Engineering Technology
- Computer Information Systems
- Computer Science
- Cyber Security
- Information Technology: Network Administration
- Information Technology: Web Development

ENTRANCE REQUIREMENTS/RECOMMENDATIONS

Required: Algebra, Geometry, Algebra 2

OFFICE OF ACCESSIBILITY SERVICES

Students who believe they need a reasonable accommodation to properly participate in this program may contact Melanie Ryan in the Office of Accessibility Services. This office may be contacted by email at oas@alfredstate.edu or by phone at 607-587-4506. Please keep in mind that some accommodations may take time to implement, so students seeking accommodations are encouraged to contact OAS as early as possible.

REQUIRED EQUIPMENT

A tier 2 laptop computer is required for students entering the information technology: applications software development program. Laptop specifications are available at www.alfredstate.edu/required-laptops.

*If not required, take LAS elective to complete degree requirements of three credits; otherwise take free elective.

GPA of 2.5 or higher required in major courses; GPA of 2.0 minimum overall; internship is student-initiated.

Be advised that a prior felony conviction may impede a student’s ability to participate in an internship and complete the program.

### Graduation Requirements

- 124 credit hours
- 39 credit hours in major field required courses
- 24 credit hours in professional courses
- 18 credit hours in core concentration
- 30 credit hours in liberal arts courses
- A 2.5 grade point average in the major is needed for the required internship
- Other requirements as stated in college academic regulations
- Seven general education areas are required, including three of the following five: art, language, other world civilizations, American history, or western civilization
The Bachelor of Technology degree in information technology: network administration at Alfred State is designed to prepare you to enter the workforce as an IT professional with a special emphasis in the growing field of networking. After completing the course work, you will have a strong foundation to obtain professional certification in: Cisco Certified Network Association (CCNA), CCNA Security, Microsoft Certified Technology Specialist, CompTIA A+, and Network+. Core courses will also provide you with a foundation in other essential areas, including web server administration, programming, database applications, and microcomputer systems. And a full-semester internship will give you the hands-on experience employers are looking for.

ADVANTAGES
Due to the solid foundation in all the major fields of information technology, the job opportunities for graduates are wide and numerous.

PROGRAM STUDENT LEARNING OUTCOMES
• Demonstrate troubleshooting strategies and techniques with a variety of networking problems.
• Identify and configure a variety of networking topologies and protocols.
• Demonstrate effective network operation and management.
• Install and configure both client and server networking software.
• Demonstrate effective network design for LAN and WAN.
• Install and configure web, database, file, and application servers.
• Develop and implement effective security and disaster recovery systems and policies.
• Develop and maintain technical documentation and procedures for network management.
• Demonstrate knowledge of multiple areas within the liberal arts arena.
• Apply accumulated knowledge and skills in an actual industry environment.
• Identify and utilize business principles and problem-solving techniques.

CONTINUING EDUCATION OPPORTUNITIES
Articulation agreements have been established with many community colleges and additional agreements are in development. It is possible, with careful selection of courses, to transfer from a variety of associate degrees, including computer information systems, information technology, computer science, and others. The computer information systems degree (AAS) at Alfred State is especially well suited for transfer into this degree at the junior level.

OCCUPATIONAL OPPORTUNITIES
Organizations of all types and sizes need computer professionals. Due to the solid foundation in all the major areas of computer information technology and systems, job opportunities for graduates are wide and numerous. They include network administrators, systems analysts, project managers, user support, web developers, security specialists, IT managers, and technical support staff, to name just a few.

EMPLOYMENT STATISTICS
Employment and continuing education rate of 100 percent – 88 percent are employed; 12 percent continued their education.

The Bachelor of Technology degree in information technology: web development at Alfred State is designed to prepare you to enter the workforce as an IT professional with a special emphasis in web development and applications, web publishing, programming, and web server administration constitute the upper level of courses. Additionally, the web is integrated across the entire program, beginning with the very first course. Through core courses, you will also be given an essential foundation in programming, database administration, networking, and microcomputer systems. And a full-semester internship will give you the hands-on experience employers are seeking.

ADVANTAGES
Due to the solid foundation in other areas, graduates will find that job opportunities are wide and numerous.

PROGRAM STUDENT LEARNING OUTCOMES
- Produce dynamically functional software with web development and scripting languages.
- Perform full life cycle of web software development.
- Create and use a database with appropriate web design principles.
- Produce functional web applications using web composing software.
- Analyze and create interface design.
- Install, configure, and troubleshoot basic hardware.
- Identify and utilize business principles and problem-solving techniques.
- Demonstrate and use managerial principles of business.
- Demonstrate knowledge of multiple areas within the liberal arts arena.
- Apply accumulated knowledge and skills in an actual industry environment.

- 18 credit hours in core concentration
- 30 credit hours in liberal arts/general education courses
- A 2.5 grade point average in the major is needed for the required internship
- Other requirements as stated in college academic regulations
- Seven general education areas are required, including three of the following five: art, language, other world civilizations, American history, or western civilization

GPA of 2.5 or higher required in major courses; GPA of 2.0 minimum overall; internship is student-initiated.

Be advised that a prior felony conviction may impede a student’s ability to participate in an internship and complete the program.

### GRADUATION REQUIREMENTS

- 124 credit hours
- 39 credit hours in major field required courses
- 24 credit hours in professional courses
- 18 credit hours in core concentration
- 30 credit hours in liberal arts/general education courses
- A 2.5 grade point average in the major is needed for the required internship
- Other requirements as stated in college academic regulations
- Seven general education areas are required, including three of the following five: art, language, other world civilizations, American history, or western civilization

GPA of 2.5 or higher required in major courses; GPA of 2.0 minimum overall; internship is student-initiated.

Be advised that a prior felony conviction may impede a student’s ability to participate in an internship and complete the program.
The Bachelor of Technology in interdisciplinary studies program is designed to provide a four-year curriculum in which students are empowered to personalize, within specified core and concentration areas, their technology-based program of study. The program is founded in academic flexibility by providing two sets of broad-based academic options. Students start with a core set of courses selected for years one and two of the program and two concentration areas for years three and four. The general academic categories are as follows:

YEARS ONE AND TWO CORE AREAS (SELECT ONE):
- Science/Technology/Engineering/Math (STEM)
- Management
- Design
- Health/Agriculture/Science (HAS)
- Humanities/Social Sciences
- Technical Communication

YEARS THREE AND FOUR CONCENTRATION AREAS (SELECT TWO):
- Science/Technology/Engineering/Math (STEM)
- Management
- Technical Communication/Design
- Humanities/Social Sciences
- Health/Science

ADVANTAGES
- Students must complete 18 credit hours in a core area during the first two years of the program; most associate degrees will satisfy this.
- Students must also satisfy a minimum of 12 credit hours in each of two academic concentrations during the junior and senior years. Courses satisfying these requirements are identified and categorized by prefix.
- The program affords students the opportunity to design and complete a rigorous, yet flexible interdisciplinary course of study in technology-based disciplines.
- The program will provide an avenue by which students can pursue precise career interests that cannot be accommodated within typical majors.
- With appropriate advisement, graduates will be well prepared to enter and succeed in a wide range of technology-based careers.

PROGRAM STUDENT LEARNING OUTCOMES
- Evaluate the value of the lower-level courses and analyze the relationship of those in the context of the interdisciplinary nature of the degree.
- Synthesize two or more upper-level concentration areas within an approved interdisciplinary course of study.
- Employ written communication skills (including the appropriate use of technology) appropriate for the degree type and level that meets standards of style, clarity, and grammatical correctness.
- Employ verbal communication skills (including the appropriate use of technology) appropriate for the degree type and level that meets standards of style, clarity, and grammatical correctness.
- Employ problem solving, reasoning and critical thinking skills to a situation relevant to the concentration choices.
- Demonstrate foundational knowledge required to be an informed citizen in a global community. (VED)
- Use library, online, and other resources to locate and evaluate scholarly articles and other research materials.
- Competently employ computer technology to present and manage data.

OCCUPATIONAL OPPORTUNITIES
The nature of the program allows for many occupational opportunities. Some of the more common interest areas are as follows:
- Technical writer
- Health office manager
- Sales engineer
- Logician
- Purchasing manager (i.e., for a hospital)
- Health and safety engineer
- Cost estimator
- Training and development specialist
- Computer systems analyst
- Occupational health and safety specialist
- Graphic designer
- Self-employed

EMPLOYMENT STATISTICS
Employment and continuing education rate of 100 percent – 83 percent are employed; 17 percent continued their education.

ENTRANCE REQUIREMENTS/RECOMMENDATIONS
Required: Algebra, Second Year of Advanced Math, Two Units of Science

OFFICE OF ACCESSIBILITY SERVICES
Students who believe they need a reasonable accommodation to properly participate in this program may contact Melanie Ryan in the Office of Accessibility Services. This office may be contacted by email at oas@alfredstate.edu or by phone at 607-587-4506. Please keep in mind that some accommodations may take time to implement, so students seeking accommodations are encouraged to contact OAS as early as possible.

GRADUATION REQUIREMENTS – BT DEGREE
- 124 total semester credit hours
- 30 semester credit hours of liberal arts
- 30 semester credit hours of general education from seven of 10 SUNY General Education categories (must include math as well as written and oral communication)
- 48 upper-division credit hours from the approved list
- Good academic standing and at least a 2.0 cumulative grade point average
- Approval of the advising committee
INTERIOR DESIGN

AAS DEGREE – CODE #0656

David Carli, Program Coordinator
Email address: CarliDI@alfredstate.edu

The AAS interior design program is designed to provide students with knowledge and skills for entry-level positions in the interior design discipline. The program consists of a core graphics sequence with additional courses in appropriate technical areas. Digital tools are integrated throughout the four-semester program.

ADVANTAGES

- The faculty consists of expert interior designers, as well as licensed architects and engineers.
- Students develop the ability to think creatively, visually, and volumetrically, exhibiting a variety of ideas, approaches, and concepts when designing interior projects.
- Students gain an understanding of how design solutions affect and are impacted by construction systems, power and mechanical, lighting and ceiling systems, acoustics, building methods, and materials.

PROGRAM STUDENT LEARNING OUTCOMES

- Think creatively, visually and volumetrically, exhibiting a variety of ideas, approaches, and concepts when designing interior projects.
- Understand and utilize color principles, theories, and systems in design projects.
- Demonstrate competent design skills in selection of interior finishes, layout of furniture, lighting, and decorative elements.
- Demonstrate understanding of ergonomics and the relationship between human behavior and the built environment.
- Demonstrate understanding of the history of art, architecture, interiors, and furnishings.
- Apply 2- and 3-dimensional design principles and elements in the development of the spatial envelope.
- Demonstrate programming skills, including identifying the problem, client and user needs, and gathering and analyzing information.
- Demonstrate competence in manual and computer-aided graphic presentation of interior design projects.
- Express ideas clearly in oral presentations and critiques, and communicate clearly in writing concept statements, reports, and research.
- Understand that design solutions affect and are impacted by construction systems.

DIRECT ENTRY INTO BACCALAUREATE DEGREE PROGRAMS

Alfred State interior design graduates may enter directly into the technology management BBA or the interdisciplinary studies BTech degree program.

CONTINUING EDUCATION OPPORTUNITIES

An articulation agreement exists between Alfred State and Villa Maria College (with placement based on a portfolio review and an interview).

CAREER OPPORTUNITIES

- Interior designer (after successfully passing the NCIDQ and completing internship requirements)
- Kitchen and bath designer
- Space planner
- Product showroom manager
- Product specifier
- Manufacturer's representative
- Facilities manager

EMPLOYMENT STATISTICS

Employment and continuing education rate of 100 percent – 25 percent are employed; 75 percent continued their education.

ENTRANCE REQUIREMENTS/RECOMMENDATIONS

Required: Algebra, Geometry

Recommended: Algebra 2

OFFICE OF ACCESSIBILITY SERVICES

Students who believe they need a reasonable accommodation to properly participate in this program may contact Melanie Ryan in the Office of Accessibility Services. This office may be contacted by email at oas@alfredstate.edu or by phone at 607-587-4506. Please keep in mind that some accommodations may take time to implement, so students seeking accommodations are encouraged to contact OAS as early as possible.

TYPICAL PROGRAM

In the first and second years, a typical day consists of two one-hour lectures and a two-hour studio. Students can expect to spend additional time working on projects and course work out of studio.

GENERAL NOTES

Entry level of student into math and composition/literature sequences is a function of student’s high school preparation and mathematics and English placement examinations.

Minimum of “C” is required to continue from one studio course to the next. (This includes: ARCH 1184, ARCH 2394, DSGN 2204, and DSGN 2304).

GRADUATION REQUIREMENTS

A student must successfully complete all courses in the prescribed four-semester program and earn a minimum cumulative index of 2.0, which is equivalent to a “C” average.

REQUIRED EQUIPMENT

All students in both the architecture and interior design programs are required to purchase a laptop computer in addition to other equipment. A tier 2 laptop computer is required for students entering this degree program. Typically the costs of these purchases can be covered using financial aid. Please consult a financial aid counselor for further details. Laptop specifications are available at www.alfredstate.edu/required-laptops.

Design Fundamentals 2

Completion of the program provides a strong foundation for students who wish to enter the field of interior design and for those who plan to continue their education by entering a bachelor’s degree program.
This transfer program will prepare you to enter into baccalaureate programs in adolescent education at public and private colleges and universities. As a graduate, you will have satisfied all of SUNY’s general education knowledge requirements and will have completed two courses in a foreign language, one course in adolescent development, one in foundations of education, and at least four courses in one of six concentrations – history/social studies, biology, chemistry, English, math, or physics.

ADVANTAGES

• Students have the benefit of small classes taught by expert faculty who take an interest in each student’s success and are advised by faculty within their concentration area.
• The US Department of Labor expects employment for secondary school teachers to grow 8 percent through 2026.

PROGRAM STUDENT LEARNING OUTCOMES

• Apply critical thinking skills to the analysis of typical issues in education.
• Perform the basic operations of personal computer use and employ basic research techniques to locate, evaluate, and synthesize information from a variety of sources.
• Communicate effectively and appropriately in written and oral forms.
• Demonstrate competence of subject matter in the content area of specialization.
• Identify the basic concepts and theories in adolescent development.
• Identify basic pedagogical terms and theories.
• Demonstrate competence in all 10 general education knowledge areas defined by SUNY.

DIRECT ENTRY INTO BACCALAUREATE DEGREE PROGRAMS

Alfred State liberal arts and sciences: adolescent education (teacher education transfer) graduates may enter directly into either the interdisciplinary studies BTech or the technology management BBA degree program.

CONTINUING EDUCATION OPPORTUNITIES

Transfer requirements for students in adolescent education vary across public and private colleges and universities. Therefore, students should work closely with their faculty adviser to ensure that they meet the particular entrance requirements of their transfer college of choice. The minimum cumulative grade point average for admission as a transfer student in adolescent education to SUNY colleges and universities varies from 2.5 to 3.0, with some transfer colleges also setting minimum grade point averages in concentration courses and in courses in adolescent development and foundations of education.

EMPLOYMENT STATISTICS

Employment and continuing education rate of 100 percent – 0 percent are employed; 100 percent continued their education.

If you’re planning on continuing your education at another four-year college or university, the liberal arts and sciences: humanities program might be for you. By careful selection of elective credits, you will be qualified to enter a baccalaureate program as a third-year student in a wide variety of fields. The program also serves an exploratory function if you have not decided on a field of study or a specific career.

ADVANTAGES

• The liberal arts and sciences: humanities program prepares students for life by stressing the importance of reading, writing, and thinking while developing in them an appreciation of the arts and the wisdom of great minds.

• Colleges, universities, and large corporations are increasingly emphasizing the importance of a liberal arts education upon which to build a career.

PROGRAM STUDENT LEARNING OUTCOMES

• Create written communication appropriate for audience and purpose and that meets standards of style, clarity, and grammatical correctness as described in the Writing Rubric.

• Create oral communication appropriate for audience and purpose and which meets standards of presentation as described in the Effective Speaking Rubric.

• Construct and recognize arguments in both written and oral formats that are free from logical defects, as described in the Critical Thinking Rubric.

• Use library, online, and other resources to locate and evaluate scholarly articles and other research materials.

• Create research-based prose in literature, history, philosophy, or the arts.

• Articulate the relevance of the humanities to the self and society.

• Complete eight of the 10 SUNY General Education requirements and meet the two infused competencies.

• Evaluate self and demonstrate sensitivity to others of different cultures or perceptions to work constructively in a pluralistic society

• Analyze and appraise moral and ethical dilemmas.

• Analyze and evaluate the obligations of knowledge to promote common good.

DIRECT ENTRY INTO BACCALAUREATE DEGREE PROGRAMS

Alfred State liberal arts and sciences: humanities graduates may enter directly into either the interdisciplinary studies BTech or the technology management BBA degree program.

EMPLOYMENT STATISTICS

Employment and continuing education stats not reported.

RELATED PROGRAMS

OFFICE OF ACCESSIBILITY SERVICES

Students who believe they need a reasonable accommodation to properly participate in this program may contact Melanie Ryan in the Office of Accessibility Services. This office may be contacted by email at oas@alfredstate.edu or by phone at 607-587-4506. Please keep in mind that some accommodations may take time to implement, so students seeking accommodations are encouraged to contact OAS as early as possible.

All students must pass COMP 1503 Freshman Composition with a "C" or better.

Humanities electives can be chosen from among the following course prefixes: COMP, FNAT, ITAL, JAPN, LITR, PHIL, RELG, SPAN, or SPCH.

Also required: writing portfolio and one unit of physical education.

GRADUATION REQUIREMENTS

Each student must successfully complete 61 credit hours (excluding HPE) with a minimum grade point average of 2.0.
LIBERAL ARTS & SCIENCES: MATH & SCIENCE

AA DEGREE – CODE #0645

Simon Whitehouse, Department Chair and Program Coordinator
Email address: whitehs@alfredstate.edu

The mathematics and science emphasis will provide you with a solid foundation in mathematics and/or science, perfect for transferring and entering into career programs that depend on those skills.

PROGRAM STUDENT LEARNING OUTCOMES

• Demonstrate competence in arithmetic, algebra, geometry, data analysis, and quantitative reasoning.
• Demonstrate methods scientists use to explore natural phenomena, including observation, hypothesis development, measurement and data collection, experimentation, evaluation of evidence, and employment of mathematical analysis.
• Employ proficient written and verbal communication skills.
• Students will identify, analyze, and evaluate arguments as they occur in their own and others' work and develop well-reasoned arguments.
• Students will perform the basic operations of personal computer use, understand and use basic research techniques and locate, evaluate, and synthesize information from a variety of sources.
• Students will successfully transfer to a bachelor's or terminal associate degree.

DIRECT ENTRY INTO BACCALAUREATE DEGREE PROGRAMS

Alfred State liberal arts and sciences: math and science graduates may enter directly into either the interdisciplinary studies BTech or the technology management BBA degree program.

CONTINUING EDUCATION OPPORTUNITIES

This program is designed in such a way that the student and adviser work together to match courses at Alfred State with first- and second-year courses at the desired transfer school so that the student may enter a baccalaureate program as a full third-year student. Some typical fields of study that graduates choose to enter are mathematics, statistics, math or science education, physical education, biology, chemistry, physics, physical therapy, athletic training, engineering, pre-med, pre-vet, dentistry, or pharmacy.

EMPLOYMENT STATISTICS

Employment and continuing education rate of 100 percent – 33% are employed; 67% continued their education.

GRADUATION REQUIREMENTS

A minimum of 61 credit hours is required for graduation with a cumulative index of 2.0. Students must also have a cumulative index of at least 2.0 in mathematics and science sequence courses.
LIBERAL ARTS & SCIENCES: SOCIAL SCIENCE

AA DEGREE – CODE #0212

Dr. Jill Priest Amati, Department Chair and Program Coordinator
Email address: amatijp@alfredstate.edu

This transfer program emphasizes course work in the social and behavioral sciences and in the liberal arts. By careful selection of electives, you will be well placed to enter baccalaureate programs at the third-year level with all your general education requirements met.

ADVANTAGES

- Students have the benefit of small classes taught by expert faculty who take an interest in each student’s success, and are advised by faculty within their concentration area.
- Students interested in education, criminal justice, psychology, sociology, history, or political science may enroll in advanced courses at Alfred University through cross-registration at no extra cost.

PROGRAM STUDENT LEARNING OUTCOMES

- Apply critical thinking skills to the analysis of topical issues in the social sciences.
- Perform the basic operations of personal computer use, as well as employ basic research techniques to locate, evaluate, and synthesize information from a variety of sources.
- Communicate effectively and appropriately in oral and written forms.
- Discuss the social, psychological, and historical influences on human behavior.
- Identify the steps of the scientific method and discuss the research methods employed by social scientists.
- Recognize the effects of globalization.
- Identify the terminology related to theories of and research in the social sciences.

DIRECT ENTRY INTO BACCALAUREATE DEGREE PROGRAMS

Alfred State liberal arts and sciences: social science graduates may enter directly into either the interdisciplinary studies BTech or the technology management BBA degree program.

CONTINUING EDUCATION OPPORTUNITIES

Graduates are qualified to enter baccalaureate programs in a variety of academic disciplines such as psychology, sociology, anthropology, history, and political science, as well as professional fields such as early childhood education, adolescent education, criminal justice, pre-law, human services management, and business administration. Among the colleges to which recent graduates have successfully transferred are Alfred University, University of Buffalo, Cornell University, SUNY Cortland, SUNY Fredonia, SUNY Geneseo, and St. Bonaventure University.

EMPLOYMENT STATISTICS

Employment and continuing education rate of 100 percent – 0 percent are employed; 100 percent continued their education.

- Successful completion of all courses in the prescribed four-semester plan
- Submission of the college’s degree application form

167
MAGNETIC RESONANCE IMAGING
CERTIFICATE – CODE #3061
Jenna Zetwick, Program Coordinator
Email address: zetwick@alfredstate.edu

The certificate program in magnetic resonance imaging (MRI) is an upper-level, online program that will produce graduates, who are capable of working under the supervision of a physician, and who are proficient in the application of magnetic resonance imaging equipment and techniques to gather critical radiologic data to enable the diagnosis of a variety of conditions and diseases.

The program targets the acquisition of specialized MRI certification by place-bound college graduates currently employed in the medical field as licensed radiological technologists. It will consist of 15 credits total, delivered online, over a minimum of two academic semesters.

The curriculum will include: Instruction in pathologic data recording; magnetic resonance imaging data processing; magnetic resonance imaging equipment operation; and professional standards and ethics. Students in the program will complete didactic courses online, as well as clinical rotations at designated hospitals and imaging centers.

ADVANTAGES
The MRI certificate program targets existing radiologic technologists who wish to expand and diversify their clinical skills within the healthcare market place. With the exception of the clinical requirement, the program is designed to be an online experience.

PROGRAM STUDENT LEARNING OUTCOMES
Graduates of the magnetic resonance imaging (MRI) will be able to:

- Demonstrate correct positioning skills.
- Select proper technical factors.
- Utilize appropriate radiation protection techniques.
- Exhibit patient-centered skills.
- Critique images to determine diagnostic quality.
- Display proper work ethics.
- Adapt standard procedures for non-routine patients.
- Apply written communication skills to the construction of documents of record that are established professional guidelines.
- Apply oral communication skills to the explanation of ideas and scientific terminology.
- Using technological resources effectively and appropriately, synthesize theory and concepts from the liberal education domain and other professions into MRI.
- Upon successful completion of the program, students will be eligible to sit for the national certification examination of the American Registry of Radiologic Technologists (ARRT).

CONTINUING EDUCATION OPPORTUNITIES
Students may transfer directly into one of our own BS or BTech degree programs or to another college.

Occupational Opportunities
- Clinics
- Diagnostic medical centers
- Government agencies
- Hospitals
- Private physician offices

EMPLEYMENT STATISTICS
Employment of magnetic resonance imaging clinicians is projected to grow 13 percent from 2016 to 2026, much faster than the average for all occupations. Nationwide in 2016, there were 241,700 employed as noted by the United States Bureau of Labor Statistics.

According to the New York State Department of Labor, there are currently 2,140 magnetic resonance imaging technicians employed in the state (2017 statistics).

RELATED PROGRAMS

MARKETING

AAS DEGREE – CODE #0633

Susan Gorman, Program Coordinator
Email address: gormansf@alfredstate.edu

The American Marketing Association defines marketing as “the process of planning and executing the conception, promotion, and distribution of ideas, goods, and services to create exchanges that satisfy individual and organizational objectives.” Marketing is a fast-moving, diverse field that includes the numerous business activities required to satisfy the needs of both the consumer and the industrial buyer. Our program will help you develop a strong background in communication, management, accounting, advertising, consumer behavior, industrial marketing, and salesmanship. And the degree’s liberal arts foundation will provide you with a solid basis for the human relations elements in the study of marketing.

ADVANTAGES

Students gain a thorough understanding of many areas, including the design and implementation of a sales presentation, consumer-buying behavior, the use of technology in marketing communications, and much more.

PROGRAM STUDENT LEARNING OUTCOMES

- Recognize the primary theories within the principle functional areas of business.
- Demonstrate professional business communication.
- Illustrate critical thinking and effective decision-making within the principle functional areas of marketing.
- Identify ethical issues within marketing.

DIRECT ENTRY INTO BACCALAUREATE DEGREE PROGRAMS

Alfred State marketing graduates may enter directly into the business administration BBA, the interdisciplinary studies B Tech, or the technology management BBA degree program at Alfred State.

CONTINUING EDUCATION OPPORTUNITIES

Students may transfer directly into one of our own BBA degree programs or to another college. Although not limited to these schools, common transfer institutions include Alfred University, St. Bonaventure University, Rochester Institute of Technology, St. John Fisher College, SUNY at Albany, University at Buffalo, SUNY College at Brockport, SUNY College at Fredonia, SUNY College at Genesee, SUNY College at Oneonta, SUNY College at Oswego, SUNY at Binghamton, Canisius College, Niagara University, and Hilbert College.

OCCUPATIONAL OPPORTUNITIES

- Consumer and industrial sales
- Service institutions
- Banks
- Advertising agencies
- Financial and credit agencies
- Insurance companies
- Recreational businesses
- Tourist bureaus

EMPLOYMENT STATISTICS

Employment and continuing education rate of 100 percent – 100 percent are employed.

GRADUATION REQUIREMENTS

62 semester hours with a 2.0 cumulative index

END-OF-PROGRAM EXAM REQUIREMENTS

All students are required to complete an end-of-program exam. This exam will be taken in the capstone course for the student’s specific program in MKTG 3152 Web Design & Marketing. The end-of-program exam will also be considered an assignment in the capstone course. The benefit of taking the end-of-program exam is to test the student’s knowledge at the time of graduation. Students may include the progress from the end-of-program exams on their resume. Taking the end-of-program exam will have some fees, which are currently $23 per exam. Exams will be taken once and they will impact the student’s capstone course grade by 5%. Please refer to the syllabi for the relevant capstone course to know the grading scale for the end-of-program exam.

The end-of-program exams are required, not optional.

Information on how to take the exams will be given in the course prior to the end-of-program exam.

How should I prepare for the assessment exam?
The comprehensive end-of-program exam covers topics taught throughout the degree program, which are aligned to the topics required for accreditation. The preparation for the exam comes from your educational experience with the school, specifically through the required courses for your degree. The exam assesses the foundational knowledge areas for your discipline.
MASONRY
AOS DEGREE – CODE #0401
Clinton Gray, Department Chair
Email address: GrayCJ@alfredstate.edu

Stephen Richard, Program Coordinator
Email address: richarsb@alfredstate.edu

Each year, more and more students and employers have asked for additional instruction and skills-based training in masonry beyond what is provided by the building construction program. Our masonry program was designed with these desires in mind. It will provide you with extensive instruction after completing the common first-year building construction curricula.

PROGRAM STUDENT LEARNING OUTCOMES
• Estimate, layout, and build various masonry and concrete flatwork systems and explain how to supervise people.
• Properly choose and implement personal and job site safety and access equipment.
• Read and interpret construction drawings and specifications.
• Communicate construction details and estimates with written documents and scale shop drawings.
• Lay out, prepare, and install various concrete flatwork, block work, stone work, and brick work.
• Use the computer to access trade-related specifications.
• Perform computer-based research and communication.
• Demonstrate effective oral communication.

DIRECT ENTRY INTO BACCALAUREATE DEGREE PROGRAM
Alfred State masonry graduates may enter directly into the construction supervision BTech or technology management BBA degree program. Graduates who have credit for freshman composition, statistics, literature, history, and speech may complete the baccalaureate program in two additional years; others may complete the BBA program in two-and-one-half years.

OCCUPATIONAL OPPORTUNITIES
• Brick or stone salesman
• Klin mason
• Construction foreman
• Estimator
• Salesperson
• Private or commercial remodeler
• Maintenance supervisor
• Construction superintendent
• Concrete foreman
• Expediter
• Contractor
• Mason

EMPLOYMENT STATISTICS
Employment and continuing education rate of 100 percent – 100 percent are employed.

RELATED PROGRAMS
Heating, Ventilation, and Air Conditioning
Building Trades: Building Construction
Electrical Construction and Maintenance Electrician

REQUIRED TOOLS/EQUIPMENT
A list of required tools, equipment, PPE, etc. for all of the programs mentioned above can be found at http://www.alfredstate.edu/tool-lists.

A tier 1 laptop computer is required for students entering this degree program. Laptop specifications are available at www.alfredstate.edu/required-laptops.

ENTRANCE REQUIREMENTS/RECOMMENDATIONS
Recommended: Algebra and Geometry

OFFICE OF ACCESSIBILITY SERVICES
Students who believe they need a reasonable accommodation to properly participate in this program may contact Melanie Ryan in the Office of Accessibility Services. This office may be contacted by email at oas@alfredstate.edu or by phone at 607-587-4506. Please keep in mind that some accommodations may take time to implement, so students seeking accommodations are encouraged to contact OAS as early as possible.

TECHNICAL STANDARDS
Applicants in the masonry program must be able to meet the following physical requirements:
• Must be able to lift 50 pounds to shoulder height.
• Must be able to perform safely in the laboratory.
• Must be able to effectively communicate with a person 20 feet away.
• Must be able to climb a ladder and/or be able to climb, unaided, onto and off equipment using three points of contact.
• Must be able to safely respond to a backup warning alarm.

Dr. Reza Rashidi, Department Chair and BS Program Co-Coordinator
Email address: rashidr@alfredstate.edu

As a mechanical engineering technology program graduate, you will be well prepared to be a mechanical engineer (B.S.) or technician (AAS) for the industry in engineering-related areas, including automotive component design; heating, ventilation, and air conditioning (HVAC); process and component design; mechanical systems design; energy systems; product development; and technical support and sales. You will be able to design, specify, test, analyze, and install mechanical systems. This broad content exposure occurs through the development of analytical skills and theory in the classroom and experience working with engines, complete energy systems, compressors, fans, pumps, controls, instrumentation, engineering graphics, and material testing.

ADVANTAGES

- Both the AAS and BS mechanical engineering technology programs are accredited by the Engineering Technology Accreditation Commission of ABET, http://www.abet.org.
- The Bachelor of Science in mechanical engineering technology is recognized as a "professional degree" that qualifies for experience/education credit toward Professional Engineering (PE) licensure.

PROGRAM STUDENT LEARNING OUTCOMES (PSLOS) - AAS DEGREE

- An ability to apply the knowledge, techniques, skills, and modern tools of mathematics, science, engineering, and technology to solve well-defined engineering problems appropriate to the discipline;
- An ability to design solutions for well-defined technical problems and assist with the engineering design of systems, components, or processes appropriate to the discipline;
- An ability to apply written, oral, and graphical communication in well-defined technical and non-technical environments; and an ability to identify and use appropriate technical literature;
- An ability to conduct standard tests and measurements, and experiments and to analyze and interpret the results; and
- An ability to function effectively as a member of a technical team.

PROGRAM STUDENT LEARNING OUTCOMES (PSLOS) - BS DEGREE

- An ability to apply knowledge, techniques, skills, and modern tools of mathematics, science, engineering, and technology to solve broadly-defined engineering problems appropriate to the discipline;
- An ability to apply written, oral, and graphical communication in broadly-defined technical and non-technical environments; and an ability to identify and use appropriate technical literature;
- An ability to conduct standard tests and measurements, and experiments and to analyze and interpret the results; and
- An ability to function effectively as a member of a technical team.

DIRECT ENTRY INTO BACCALAUREATE DEGREE PROGRAMS

Alfred State mechanical engineering technology AAS graduates may enter directly into the construction supervision BTech, the interdisciplinary studies BTech, the mechanical engineering technology BS, or the technology management BBA degree program.

CONTINUING EDUCATION OPPORTUNITIES

A cooperative/transfer program involving one year of appropriate study in either mechanical engineering technology or engineering science at selected regional community colleges, together with a second year of study at Alfred State, will result in the awarding of the AAS degree to qualified graduates. Graduates from the associate-level mechanical engineering technology program are eligible to continue their education by enrolling in a baccalaureate degree program in mechanical or related engineering technology at Alfred State or elsewhere. Our mechanical engineering technology AAS two-year degree program is the same as the first two years of the mechanical engineering technology BS four-year degree program.

OCCUPATIONAL OPPORTUNITIES

- Automotive industry
- HVAC & R industry
- Field service
- Installation supervision
- Aerospace industry
- Utility companies
- Defense Industry
- Sales and applications
- Manufacturing
- Petroleum industry
- Engineering aide
- Test technicians
- Process equipment
- MEMS and Microfabrication
- Energy Industry

EMPLOYMENT STATISTICS

Employment and continuing education rate of 100 percent:

- Mechanical engineering technology (AAS degree): 100 percent – 100 percent continued their education.
- Mechanical engineering technology (BS degree): 100 percent – 97 percent are employed; 3 percent continued their education.

CERTIFICATION OR LICENSURE

The Bachelor of Science in mechanical engineering technology is recognized as a "professional degree" that qualifies for experience/education credit toward Professional Engineering (PE) licensure. Graduates from Alfred State’s program are allowed six years of the required 12 years of education/experience credit and are eligible to take the Fundamentals of Engineering (FE), formerly called Engineer-in-Training (EIT), examination upon graduation. Be advised that a prior felony conviction may impede a student’s ability to receive licensure.

ENTRANCE REQUIREMENTS/RECOMMENDATIONS (AAS)

Required: Algebra, Geometry, Algebra 2
Recommended: Physics

ENTRANCE REQUIREMENTS/RECOMMENDATIONS (BS)

Required: Algebra, Geometry, Algebra 2
MECHANICAL ENGINEERING TECHNOLOGY

GRADUATION REQUIREMENTS

Courses that repeat or significantly overlap those taken in the student’s associate degree program cannot be taken for upper-level credit. If the associate degree covered the subject matter in one of the required baccalaureate courses, a different course must be substituted and approved by the faculty adviser.

OFFICE OF ACCESSIBILITY SERVICES

Students who believe they need a reasonable accommodation to properly participate in this program may contact Melanie Ryan in the Office of Accessibility Services. This office may be contacted by email at oas@alfredstate.edu or by phone at 607-587-4506. Please keep in mind that some accommodations may take time to implement, so students seeking accommodations are encouraged to contact OAS as early as possible.

REQUISITE EQUIPMENT

A tier 3 laptop computer is required for students entering the mechanical engineering technology programs. Laptop specifications are available at www.alfredstate.edu/required-laptops.

MECHATRONICS TECHNOLOGY
AAS DEGREE – CODE #2729

BS DEGREE - CODE #2882

Timothy Cochran, Program Coordinator (AAS and BS)
Email address: cochratj@alfredstate.edu

Mechatronics interweaves electrical, mechanical, and computer engineering technology with applications in automated industrial processes and robotics. Mechatronics professionals are the technicians and engineers who design and maintain automated equipment. Technicians and engineers conduct their work in laboratories, offices or on-site at manufacturing plants. These professionals work toward the same goal of producing safe and efficient automated equipment. While technicians primarily maintain machinery, engineers are more concerned with the design and development of components and products. A mechatronics technology graduate will design, adapt, and troubleshoot electro-mechanical systems that are controlled by programmable digital devices.

ADVANTAGES

• Combines strength in electrical and mechanical engineering technology.
• Broad background to fit many possibilities and small employers.
• Learn in laboratories outfitted with excellent electronic test equipment.
• Hands-on metal and circuit board fabrication facilities.
• Program different devices to perform electromechanical tasks.

DIRECT ENTRY INTO BACCALAUREATE DEGREE PROGRAM

Alfred State mechatronics technology AAS graduates may enter directly into the construction supervision BTech, the interdisciplinary studies BTech, the mechatronics technology BS, or technology management BBA degree program.

OCCUPATIONAL OPPORTUNITIES

• Robotics Testing Technician
• Mechatronics Technician
• Industrial Robotics Mechanic
• Programmable Logic Controller Assembler
• Electromechanical Technician

Employment and continuing education rate of 100 percent:

Mechatronics technology (AAS degree): 100 percent – 100 percent continued their education.

Mechatronics technology (BS degree): 100 percent – 97 percent are employed; 3 percent continued their education.

RELATED PROGRAMS

### BS Degree Graduation Requirements
- Completion of above courses
- 126 credit hours
- 52 upper-division credit hours
- 60 credit hours of liberal arts and sciences
- 2.0 grade point average in major courses
- 2.0 cumulative grade point average
- Approval of department faculty
- Seven of 10 General Education areas
MOTORSPORTS TECHNOLOGY
AOS DEGREE - CODE #1619
Eric Wilmot, Department Chair and Program Coordinator
Email address: wilmotej@alfredstate.edu

This specialization includes 1,800 hours of practical experience and classroom training designed to prepare you for the exciting, fast-paced motorsports field. Our high-tech program includes brake systems, alignment procedures, electronic controls, engine overhaul, and transmission overhaul. Ever dream of learning how to work on real race vehicles alongside industry experts? A major component of our curriculum involves the fabrication and set-up of various types of these incredible machines.

ADVANTAGES
- Students may take Automotive Service Excellence (ASE) certification exams.
- First-year courses are certified by NATEF (National Automotive Technicians Educational Foundation, Inc.).
- Students successfully completing the motorsports technology program may return for a third year (senior year) in the automotive service technician program and earn a second associate degree.

PROGRAM STUDENT LEARNING OUTCOMES
- Demonstrate a focused, coherent, organized written report.
- Perform mathematic calculations required for entry-level automotive employment.
- Demonstrate a functional ability to read and retain/apply written instructions and specifications relevant to their work environment.
- Demonstrate the ability to describe operation of, diagnose, and repair race automotive drive train systems.
- Demonstrate the ability to describe operation of, diagnose, and repair race engines.
- Demonstrate the ability to describe operation of, diagnose, and repair race automotive steering, brakes, and suspension systems.
- Demonstrate the ability to fabricate materials required to build and maintain race vehicle chassis, bodies, and components.

DIRECT ENTRY INTO BACCALAUREATE DEGREE PROGRAM
Alfred State motorsports technology graduates may enter directly into the technology management BBA degree program. Graduates who have credit for freshman composition, statistics, literature, history, and speech may complete the BBA program in two additional years; others may complete the BBA program in two-and-one-half years.

OCCUPATIONAL OPPORTUNITIES
- Chassis specialist
- High performance motorsport technician
- Crew foreman
- Pit crew member
- Engine builder
- Transmission builder

EMPLOYMENT STATISTICS
Employment and continuing education rate of 83 percent – 83 percent are employed.

RELATED PROGRAMS
Autobody Repair
Automotive Service Technician
Mechanical Engineering Technology
Welding Technology

REQUIRED TOOLS/EQUIPMENT
A list of required tools, equipment, PPE, etc. for all of the programs mentioned above can be found at http://www.alfredstate.edu/admissions/accepted-students/required-tools-supplies.

A tier 1 laptop computer is required for students entering this degree program. Laptop specifications are available at www.alfredstate.edu/required-laptops.

ENTRANCE REQUIREMENTS/RECOMMENDATIONS
Recommended: Algebra

OFFICE OF ACCESSIBILITY SERVICES
Students who believe they need a reasonable accommodation to properly participate in this program may contact Melanie Ryan in the Office of Accessibility Services. This office may be contacted by email at oas@alfredstate.edu or by phone at 607-587-4506. Please keep in mind that some accommodations may take time to implement, so students seeking accommodations are encouraged to contact OAS as early as possible.

TECHNICAL STANDARDS
Applicants in the motorsports technology program must meet the following physical requirements:
- Must be able to lift 50 pounds to eye level.
- Must be able to effectively communicate with a person 6 to 10 feet away.
- Must be able to visually decipher small images on a monitor or digital display.
- Must be able to distinguish sounds associated with mechanical failures.
- Must be able to comprehend written information found in service repair manuals.
- Must have a valid motor vehicle driver’s license.

CERTIFICATION OR LICENSURE
Students may take Automotive Service Excellence (ASE) certification exams.

GRADUATION REQUIREMENTS
A student must successfully complete all courses in the prescribed four-semester program and earn a minimum cumulative index of 2.0, which is equivalent to a “C” average.
The nursing AAS program will prepare you to become a registered nurse — one of the fastest-growing fields in the country. Courses are sequential and progress from simple to more complex situations, with specialized content in obstetrics, mental health, and pediatric nursing. Learning is enhanced through the use of skill practice for a hands-on approach to gain expertise. During the first year, there is a seven-hour per week clinical experience. During the second year, the clinical experience increases in time and complexity. Simulation is incorporated into the laboratory experience.

Clinical experience, an essential part of each nursing course, further enables students to gain technical competence to apply theoretical knowledge with practice. Clinical experiences are gained through a variety of health care facilities.

**ADVANTAGES**
- The associate degree in nursing (AAS) is currently being offered in different educational pathways:
  - The traditional two-year program
  - Within a dual-degree format (AAS to BS in Nursing)
- Graduates of the AAS degree may directly enroll in the RN-BS in Nursing program after filling out the “Joint Intent to Enroll” form.
- Graduates of the AAS degree are eligible to apply for licensure as a registered nurse.

**FACILITIES**
Facilities used for clinical experiences may include: Cuba Memorial Hospital, Elderwood, Guthrie Healthcare Hospital, Highland Park Rehabilitation & Nursing Center, Jones Memorial Hospital, Noyes Memorial Hospital, Olean General Hospital, St. James Hospital, Unity Hospital, Wyoming County Community Hospital, Hornell Gardens, as well as other area facilities and community sites.

**PROGRAM STUDENT LEARNING OUTCOMES**
- **Patient-centered care** – Acquires self-empowerment to provide holistic care to a diverse population while providing health education using learner-centered focused principles.
- **Teamwork and collaboration** – Demonstrates accountability and effective interpersonal relationships with clients and members of the health care team, and works collaboratively in professional practice.
- **Evidence-based practice** – Implements evidence-based practice to promote a caring environment that ensures client’s safety, comfort, dignity, and self-esteem consistent with his/her developmental stage in an effective and efficient manner.
- **Quality improvement** – Demonstrates responsibility for continued learning and further growth.
- **Safety** – Manages care for clients while evaluating own performance to improve professional practice, quality of care, and safety in a timely and cost-effective manner.
- **Informatics** – Applies technology and information management skills to retrieve data, communicate, support decision making, and submit information.

**OFFICE OF ACCESSIBILITY SERVICES**
Students who believe they need a reasonable accommodation to properly participate in this program may contact Melanie Ryan in the Office of Accessibility Services. This office may be contacted by email at oas@alfredstate.edu or by phone at 607-587-4506. Please keep in mind that some accommodations may take time to implement, so students seeking accommodations are encouraged to contact OAS as early as possible.

**DIRECT ENTRY INTO BACCALAUREATE DEGREE PROGRAM**
Alfred State nursing graduates may enter directly into either the healthcare management BTech, the interdisciplinary studies BTech, the BS in Nursing, or the technology management BBA degree program.

**PROFESSIONAL OPPORTUNITIES**
- Ambulatory settings
- Health insurance providers
- Hospitals
- Long-term care facilities

**EMPLOYMENT STATISTICS**

**LICENSURE**
Graduates are eligible to apply for licensure in any state as well as sit for the NCLEX-RN. Completion of the AAS nursing program does not assure licensure as a registered nurse. Graduates of this AAS nursing program meet the education requirements for admittance to the NCLEX-RN licensure exam; however, there is a requirement that the applicant be of “good moral character” and a fee must be paid for the test and license.

To be licensed and registered as a RN in New York State, you must:
- Be of good moral character
- Be at least eighteen years of age
- Graduate from a nursing education program acceptable to NYSED
• Pass the National Council Licensure Examination for Registered Nurses (NCLEX-RN) or another license examination acceptable to NYSED
• Apply for a RN License with NYSED

On the application for New York State licensure, the applicant is required to truthfully answer the following questions:

• Have you ever been found guilty after trial, or pleaded guilty, no contest, or nolo contendere to a crime (felony or misdemeanor) in any court?
• Are criminal charges pending against you in any court?
• Has any licensing or disciplinary authority refused to issue you a license or ever revoked, annulled, canceled, accepted surrender of, suspended, placed on probation, refused to renew a professional license or certificate held by you now or previously, or ever fined, censured, reprimanded, or otherwise disciplined you?
• Are charges pending against you in any jurisdiction for any sort of professional misconduct?
• Has any hospital or licensed facility or clinical laboratory restricted or terminated your professional training, employment or privileges or have you ever voluntarily or involuntarily resigned or withdrawn from such association to avoid imposition of such measures?

A “yes” answer to one or more of these questions will not necessarily disqualify you from a license or a registration in New York State. The New York State Education Department decides on a case-by-case basis whether prior criminal conviction(s) or other issues will disqualify the applicant from being licensed or registered as an RN in New York State. For more information: http://www.op.nysed.gov/prof/nurse/nursingrn.htm

ACCREDITATION
• Alfred State College is accredited by the Middle States Commission on Higher Education (MSCHE), 3624 Market St., Philadelphia, PA 19104; 215-662-5606, http://www.mschne.org. The MSCHE is an institutional accrediting agency recognized by the US Secretary of Education and the Council for Higher Education Accreditation (CHEA).
• The AAS nursing program at Alfred State College located in Alfred, NY is accredited by the Accreditation Commission for Education in Nursing (ACEN) 3343 Peachtree Road, Suite 850, Atlanta, GA 30326 phone 404-975-5000
• The most recent accreditation decision made by the ACEN Board of Commissioners for the AAS nursing program is Continuing Accreditation
• View the public information disclosed by the ACEN regarding this program at http://www.acenursing.com/accreditedprograms/programsearch.htm
• The AAS nursing program is registered by the New York State Education Department.

GENERAL NOTES:
A zero-tolerance for incivility is in effect at Alfred State nursing. Furthermore, if a student’s behavior compromises or threatens the health or safety of others, including clients, peers, faculty, and staff, the student may be denied enrollment or continuation in the program. A policy regarding chemical impairment is publicized to enrolled nursing students.

Background checks may be required by affiliated agencies. Background checks will be at the expense of the student. Any costs associated with clinical would be the responsibility of the student.

Nursing students are required to provide documentation of an annual two-step PPD and a self-report health assessment. Hepatitis B vaccine, flu vaccine, and other requirements may be specified by affiliated agencies. CPR certification is required before taking Nursing I and must remain active throughout the nursing program.

Specific policies related to progression in the nursing program and readmission to the nursing program are publicized to enrolled nursing students in the Nursing Student Handbook.

RN TRANSFER PROGRAM
Alfred State students may transfer to most New York State baccalaureate programs consistent with NYS transfer agreement.

REQUIRED EQUIPMENT
A tier 1 laptop computer is required for students entering this degree program, as it will be needed for on-campus exams and other educational purposes.

Microsoft Office is required; internet access is required. In addition, a handheld pocket-sized electronic device is required (i.e. smart phone) for downloading program software. The device must have the capability to turn off both phone and camera. Further system requirements will be sent via a newsletter in early June to newly admitted, transfer, and continuing students. Laptop specifications are available at www.alfredstate.edu/required-laptops.

• See our nursing website for full disclosure documentation at www.alfred.edu/nursing.

GRADUATION REQUIREMENTS
• 36 credits of nursing (nursing I, II, III, IV)
• 12 credits of natural science (anatomy & physiology I and II, microbiology)
• Nine credits of social science (general psychology, general sociology, human development)
• Six credits of English/humanities (freshman composition, literature)
PROGRAM STUDENT LEARNING OUTCOMES

The completion rate for the May 2019 graduates is 76 percent.

STUDENT ACHIEVEMENT DATA

The program will serve as a solid academic foundation for advanced study in nursing. The BS in Nursing program is offered in an online format, providing flexibility and learning style choices for the adult student and working professional.

The graduate will be prepared to assume a leadership role in the health care delivery system using gained experience, research, and technology for evidence-based decision making. The baccalaureate graduate will be able to deliver, design, and coordinate care for a variety of individuals from diverse backgrounds to improve client outcomes.

The core foundation nursing courses are arranged to increase the student's knowledge base and skill level for the expanded role as a baccalaureate-prepared practitioner.

A professional capstone course (NURS 8013) is required as a culminating educational experience of the BS in Nursing program. To further advance the student's knowledge base and skill level, there are clinical components integrated within the program.

Meeting the needs of registered nurses seeking a bachelor's degree, the BS in Nursing program is offered primarily as an online format. This provides flexibility and learning style choices for the adult student and working professional.

A computer with internet access, webcam, and Microsoft Office is required for the nursing program. Written work must be submitted in Word and APA format.

Students are permitted to repeat an upper-level (5000 or higher) nursing core course one time only. If a student is unsuccessful in the same nursing course twice, they will be unable to progress in the nursing program.

Bachelor-level students are expected to write at a BS level proficiency, using APA format. Writing proficiency, grammar, spelling, and APA formatting are all essential elements of every nursing course. Failure to write at a BS level may result in failure of nursing course work.

It is strongly recommended that clinical site affiliations are submitted at least two months prior to taking the course to ensure a clinical site agreement is in place. Clinical components will be required in the following courses:

- NURS 6003 - Nursing Leadership and Management
- NURS 6413 - Health Assessment and Promotion Across the Lifespan
- NURS 7004 - Population Focused Care in the Community

ADVANTAGES

The BS in nursing program can be taken entirely online, allowing the student to progress at their own pace. Articulation agreements are in place between multiple regional community colleges and Alfred State for the BS in Nursing program.

STUDENT ACHIEVEMENT DATA

The completion rate for the May 2019 graduates is 76 percent.

PROGRAM STUDENT LEARNING OUTCOMES

- Synthesize theory and concepts from nursing, the liberal education domain, and other professions to expand knowledge.
- Create a plan to foster social justice through civic engagement.
- Apply principles of critical reflection, inquiry, and evidence-based practice to resolve nursing issues.
- Integrate leadership principles to design, manage, and coordinate care for individuals and populations in complex and changing health care delivery systems.
- Appraise issues related to health promotion and disease prevention to promote healthy life for individuals, families, groups, and populations across the life span, with attention to rural communities, maintenance, and end of life.
- Apply knowledge of informatics to foster inter- and intra-professional communication and collaboration in the delivery of safe, quality health care.
- Create a philosophy as a foundation for commitment to the profession, advancement, and lifelong learning.
- Use a variety of methods to communicate in written and oral form throughout the program.

PROFESSIONAL OPPORTUNITIES

Leadership, management, research, education, and practice opportunities exist in a variety of health care settings and institutions throughout New York State and the US.

EMPLOYMENT STATISTICS

Employment and continuing education rate of 100 percent – 100 percent are employed; 0 percent are continuing their education.

ADMISSIONS REQUIREMENTS

Admission to the BS in Nursing program requires graduation from an accredited or state-approved associate degree in nursing or certified diploma program in nursing, and plans to secure licensure as a registered professional nurse by completion of the first semester in the program. The minimum GPA requirement for admission is 2.00. The applicant's associate degree course work must include the following:

- A minimum of 30 credits of nursing
- A minimum of 24 hours of liberal arts and sciences credit
- A minimum of three of 10 SUNY General Education categories
- Eight credits of anatomy and physiology (taken at the same school in a classroom setting)
- A lab course in microbiology in the classroom
- A minimum of three SUNY General Education categories
- Course work in composition, global studies or other world civilization, and psychology

It is essential that students are able to fully participate, with or without a reasonable accommodation, in clinical caring for clients as assigned. Nursing students should be able to:

- Function in a safe manner, not placing clients in jeopardy
- Maintain confidentiality in regard to professional practice
- Appropriately use standard medical equipment
- Interpret data from electronic devices in health care setting for the purpose of client care
- Maintain professional composure at all times
- Communicate effectively, orally and in writing

Students must have an active, unencumbered state license to progress into the second semester of BS in Nursing courses.

OFFICE OF ACCESSIBILITY SERVICES

Students who believe they need a reasonable accommodation to properly participate in this program may contact Melanie Ryan in the Office of Accessibility Services. This office may be contacted by email at oas@alfredstate.edu or by phone at 607-587-4506. Please keep in mind that some accommodations may take time to implement, so students seeking accommodations are encouraged to contact OAS as early as possible.

ACCREDITATION/CERTIFICATION

- Alfred State College is accredited by the Middle States Commission on Higher Education (MSCHE), 3624 Market St., Philadelphia, PA 19104; 215-662-5606, http://www.msche.org. The MSCHE is an institutional accrediting agency recognized by the U.S. Secretary of Education and the Council for Higher Education Accreditation (CHEA). Effective February 28, 2022 the Alfred State College BS in Nursing program is a candidate for initial accreditation by the Accreditation Commission for Education in Nursing. The candidacy status expires on February 28, 2024. Accreditation Commission for Education in Nursing (ACEN), 3390 Peachtree Road NE, Suite 1400, Atlanta, GA 30326 (404) 975-5000 http://
www.acenursing.com/candidates/candidacy.asp. **Note:** Upon granting of initial accreditation by the ACEN Board of Commissioners, the effective date of initial accreditation is the date on which the nursing program was approved by the ACEN as a candidate program that concluded in the Board of Commissioners granting initial accreditation.

- The baccalaureate degree program in nursing at The State University of New York College of Technology at Alfred is accredited by the Commission on Collegiate Nursing Education, 655 K Street, NW, Suite 750, Washington, DC 20001, 202-887-6791.
- The BS in Nursing program is registered by the NYS Education Department.

**General Notes:** A zero tolerance for incivility is in effect at Alfred State nursing. Furthermore, if a student's behavior compromises or threatens the health or safety of others, including clients, peers, faculty, and staff, the student may be denied enrollment or continuation in the program. A policy regarding chemical impairment is publicized to enrolled nursing students. Background checks may be required by affiliating agencies. Background checks will be at the expense of the student. Any costs associated with clinical would be the responsibility of the student. Nursing students are required to provide health related documentation or other requirements to the affiliating agencies. Student are permitted to repeat an upper-level (5000 or higher) nursing core course one time only. If a student is unsuccessful in any upper-level nursing course twice, they will be unable to progress in the nursing program. Bachelor-level students are expected to write at a BS level proficiency, using APA format. Writing proficiency, grammar, spelling, and APA formatting are all essential elements of every nursing course. Failure to write at a BS level may result in failure of nursing course work.

**GRADUATION REQUIREMENTS**
- **See our nursing website for full disclosure documentation at www.alfredstate.edu/nursing**
The demand for nurses with bachelor’s degrees has never been greater. According to the Health and Medicine Division’s (HMD) Future of Nursing: Leading Change, at a minimum, 80 percent of nurses should have at least a bachelor’s degree by 2020. In order to meet the recommended need, Alfred State now offers a dual degree.

The new dual degree nursing program is a model to meet the high demand for bachelor’s degrees in nursing, while allowing the student to earn both an associate and baccalaureate degree over four years. The graduates of the associate program are eligible to sit for the NCLEX-RN exam at the end of the third year. The nursing program will prepare you to become a registered nurse - one of the fastest-growing professions in the country. Courses are sequential and progress from simple to more complex situations, with specialized content in obstetrics, mental health, and pediatrics integrated into the program. Clinical experience, an essential part of each nursing course, further enables you to gain technical competence to apply theoretical knowledge with practice.

ADVANTAGES
Both the AAS and BS in nursing programs are registered by NYS Education Department. Graduates of the AAS degree are eligible to apply for licensure as a registered nurse and sit for the NCLEX-RN (RN National Boards) in any state.

Graduates of the AAS degree are eligible to apply for licensure as a registered nurse and sit for the NCLEX-RN in any state.

The BS in nursing program can be taken entirely online, allowing the student to progress at their own pace. The BS in Nursing Program is registered by the NYS Education Department.

Articulation agreements are in place between multiple regional community colleges and Alfred State for the BS in Nursing program.

FACILITIES
Facilities used for clinical experiences may include: Cuba Memorial Hospital, Elderwood, Guthrie Healthcare Hospital, Unity Hospital, FF Thompson Hospital, Highland Park Rehabilitation & Nursing Center, Jones Memorial Hospital, Noyes Memorial Hospital, Olean General Hospital, St. James Hospital, Wyoming County Community Hospital, Hornell Gardens, as well as other area facilities and community sites.

Students may be placed in day, evening, and night clinical placement, weekend and weekday rotations, and will be responsible for their own transportation.

The upper-division completion program will enhance your knowledge and skills foundation to function more autonomously and interdependently in diverse, complex, and dynamic health care environments. Moreover, the program will enhance your potential to expand your responsibilities in practice to become a leader, coordinator, and manager of care. Lastly, the program will serve as a solid academic foundation for advanced study in nursing at the graduate level. Some of the BSN core courses will begin to be offered in both an on-campus setting (for residential students), while online opportunities will be available for students not living on or near campus, providing flexibility and learning style choices for the adult student and working professional.

It is strongly recommended that clinical site affiliations are submitted at least two months prior to taking the course to ensure that a clinical site agreement is in place.

Clinical components will be required in the following courses:

- NURS 6003 - Nursing Leadership and Management
- NURS 6413 - Health Assessment and Promotion Across the Lifespan
- NURS 7004 - Population Focused Care in the Community

As a graduate of this program, you will be prepared to assume a leadership role in the health care delivery system using gained experience, research, and technology for evidence-based decision making. You will be equipped to deliver, lead, and coordinate care for a variety of individuals from diverse backgrounds to improve client outcomes.

PROGRAM STUDENT LEARNING OUTCOMES - AAS
- Patient-centered care – Acquires self-empowerment to provide holistic care to a diverse population while providing health education using learner-centered focused principles.
- Teamwork and collaboration – Demonstrates accountability and effective interpersonal relationships with clients and members of the health care team, and works collaboratively in professional practice.
- Evidence-based practice – Implements evidence-based practice to promote a caring environment that ensures client’s safety, comfort, dignity, and self-esteem consistent with his/her developmental stage in an effective and efficient manner.
- Quality improvement – Demonstrates responsibility for continued learning and further growth.
- Safety – Manages care for clients while evaluating own performance to improve professional practice, quality of care, and safety in a timely and cost-effective manner.
- Informatics – Applies technology and information management skills to retrieve data, communicate, support decision making, and submit information.

**students who complete the program within 1.5 times the length of program**

**ENTRANCE REQUIREMENTS**
Required: Algebra, Biology, Chemistry

Nursing students should be able to:
- Ambulate in a sufficient manner in order to appropriately and safely perform patient care.
- Lift at least 35 pounds.
- Function in a safe manner, not placing clients in jeopardy.
- Maintain confidentiality in regard to professional practice.
- Appropriately use standard medical equipment.
- Interpret data from electronic devices in a health care setting for the purpose of client care.
- Maintain professional composure at all times.
- Communicate effectively orally and in writing.

**REQUIRED EQUIPMENT**
A tier 1 laptop computer is required for students entering this degree program. Laptop specifications are available at www.alfredstate.edu/required-laptops.

A laptop is required for the nursing program as it will be needed for on-campus exams and other educational purposes. Microsoft Office is required; internet access is required. In addition, a handheld pocket-sized electronic device is required (i.e., smart phone) for downloading program software. The device must have the capability to turn off both phone and camera.

**LICENSURE**
Upon completion of the AAS degree portion of the dual degree program, graduates are eligible to apply for licensure. Completion of the AAS nursing program does not assure licensure as a registered professional nurse. Graduates of this portion of the dual degree nursing program meet the education requirements for admittance to the RN licensure exam; however, there is a requirement that the applicant be of “good moral character” and a fee must be paid for the test and license.

To be a licensed and registered as an RN in New York State, you must:
- Be of good moral character
- Be at least 18 years of age
- Graduate from a nursing education program acceptable to NYSED
- Complete New York State required infection control coursework and child abuse reporting coursework
- Pass the National Council Licensure Examination for Registered Nurses (NCLEX_RN) or another license examination acceptable to NYSED
- Apply for an RN license with NYSED

On the application for New York State licensure, the applicant is required to truthfully answer the following questions:
- Have you ever been found guilty after trial, or pleaded guilty, no contest, or nolo contendere to a crime (felony or misdemeanor) in any court?
- Are criminal charges pending against you in any court?
- Has any licensing or disciplinary authority refused to issue you a license or ever revoked, annulled, canceled, accepted surrender of, suspended, placed on probation, refused to renew a professional license or certificate held by you now or previously, or ever fined, censured, reprimanded, or otherwise disciplined you?
- Are charges pending against you in any jurisdiction for any sort of professional misconduct?
- Has any hospital or licensed facility restricted or terminated your professional training, employment of privileges, or have you ever voluntarily or involuntarily resigned or withdrawn from such association to avoid imposition of such measures?

**ACCREDITATION/CERTIFICATION**
- The AAS nursing program at Alfred State College located in Alfred, NY is accredited by the Accreditation Commission for Education in Nursing (ACEN), 3343 Peachtree Road, Suite 850, Atlanta, GA 30326 404-975-5000, www.acenursing.org
  - The most recent accreditation decision made by the ACEN Board of Commissioners for the AAS nursing program is Continuing Accreditation
  - View the public information disclosed by the ACEN regarding this program at http://www.acenursing.com/accreditedprograms/programsearch.htm.
- Effective Feb. 28, 2022, the Alfred State College BS in nursing program is a candidate for initial accreditation by the Accreditation Commission for Education in Nursing. This candidacy status expires on February 28, 2024. Accreditation Commission for Education in Nursing (ACEN), 3390 Peachtree Road NE, Suite 1400, Atlanta, GA 30326 (404) 975-5000 http://www.acenursing.com/candidates/candidacy.asp
- The baccalaureate degree program in nursing at SUNY Alfred is accredited by the Commission on Collegiate Nursing Education, 655 K Street NW, Suite 750, Washington, DC 20001, (202) 887-6791.
- Both the AAS and BS in Nursing Programs are registered by the NYS Education Department.

Dual Degree Program Nursing – AAS to BS in Nursing Degree

**TYPICAL FOUR-YEAR PROGRAM**
For the AAS Nursing courses students must earn a "C" in Nursing I (NURS 1055 and NURS 1133) and Nursing II (NURS 2055 and NURS 2133) and a "C+" in Nursing III (NURS 3055 and 3155) and Nursing IV (NURS 4055 and NURS 4155) to progress in the nursing program. Competency in medication clinical computation is required each semester and is tested as part of each nursing semester.

NOTE: BIOL 1404 Anatomy & Physiology I and BIOL 2504 Anatomy & Physiology II have to be completed with a "C+" and must be taken in the classroom with lab component at the same college in a face-to-face environment. Microbiology must be taken in the classroom with lab component at the same college in a face-to-face environment.
Specific policies related to progression in the nursing program and readmission to the nursing program are publicized to enrolled nursing students in the Nursing Student Handbook.

*See our nursing website for full disclosure documentation at www.alfredstate.edu/nursing

GRADUATION REQUIREMENTS

AAS
- 63 credit hours
- 36 credits of nursing (Nursing I, II, III, IV)
- 12 credits of natural science (Anatomy & Physiology I and II, Microbiology)
- 6 credits of social science (General Psychology, Human Development)
- 6 credits of humanities (Freshman Composition, Effective Speaking)
- Three credits of other world civilization (Global Perspectives)
- A student must successfully complete all courses in the prescribed four-semester program and earn a minimum cumulative GPA of 2.0 which is equivalent to a C average.

BS in nursing degree credits
- 124 credit hours
- 28 credits of upper-level nursing credits (36 hours from prior AAS degree)
- Three credits of natural science (Nutrition) (12 from prior AAS degree: Anatomy & Physiology I and II, Microbiology)
- Three credits of social science (General Sociology) (six from prior AAS Degree: General Psychology, Human Development)
- Three credits of humanities (Literature elective)
- Three credits of math (Statistics I or Statistical Methods)
- Three credits of a general education elective in American History, Western Civilization, Foreign Arts, or Foreign Language. From prior degree: Basic communication. A student must successfully complete all courses in the prescribed four-semester program and earn a minimum cumulative GPA of 2.0 which is equivalent to a C average.

Any student wishing for more information should contact the Nursing Department.
PRE-ENVIRONMENTAL SCIENCE AND FORESTRY

AA DEGREE - CODE #0645 (INDICATE P-ESF ON SPECIAL CAMPUS PROJECT LINE)

Simon Whitehouse, Department Chair
Email address: whitehs@alfredstate.edu

James Buell, Program Coordinator
Email address: buelljf@alfredstate.edu

Environmental science and forestry is a diverse field requiring professionals of many specialties. That's why we've designed this program to prepare you to enter into several areas—from environmental science to paper science engineering to forestry and natural resource conservation.

ADVANTAGES

• This program prepares graduates for the Bachelor of Science degree program in environmental science and/or the associate degree in forestry and natural resource conservation from the SUNY College of Environmental Science and Forestry (ESF).

• After the first two years of study at Alfred State, transfers to ESF may apply to a variety of programs. These include: the biological sciences (botany and forestry pathology, entomology, zoology, wildlife biology, and pest management); chemistry (natural and synthetic polymers, biochemistry, and natural products, environmental); forest engineering; paper science engineering; wood products engineering; and forestry (resource management, forest resource science, management science, environmental education and communications, urban forestry, world forestry, and applied resource management). The program in landscape architecture leads to a baccalaureate degree after one additional year, a Bachelor of Landscape Architecture degree (BLA).

• A student taking the pre-ESF 1+1 ranger option, forest technology, natural resources conservation, or land surveying, completes one year of required liberal arts and sciences courses at Alfred State, and then spends the second year at the Wanakena Campus of ESF. Successful completion of this program leads to an AAS degree in forest technology.

PROGRAM STUDENT LEARNING OUTCOMES

• MATHEMATICS: Demonstrate competence in arithmetic, algebra, geometry, data analysis, and quantitative reasoning.

• NATURAL SCIENCES: Demonstrate understanding of the methods scientists use to explore natural phenomena, including observation, hypothesis development, measurement and data collection, experimentation, evaluation of evidence, and employment of mathematical analysis.

• COMMUNICATION & INFORMATION: Employ proficient written and verbal communication skills, including the appropriate uses of technology.

• REASONING: Identify, analyze, and evaluate arguments as they occur in their own and others’ work, and develop well-reasoned arguments.

• INFORMATION MANAGEMENT: Perform the basic operations of personal computer use; understand and use basic research techniques; and locate, evaluate, and synthesize information from a variety of sources.

• TRANSFERABILITY: Students will successfully transfer to a bachelor's or associate degree.

DIRECT ENTRY INTO BACCALAUREATE DEGREE PROGRAM

Alfred State pre-environmental science and forestry graduates may enter directly into the interdisciplinary studies BTech or technology management BBA degree program.

CONTINUING EDUCATION OPPORTUNITIES

Students in this program spend two years at Alfred State, and then generally transfer to the SUNY College of Environmental Science and Forestry (ESF) at Syracuse. Those students who complete, with a “C” or better, the lower-division sequences prescribed by ESF, gain admission to ESF 1 with full junior status. An articulation agreement is available with SUNY ESF at Syracuse.

EMPLOYMENT STATISTICS

Employment and continuing education rate of 100 percent - 100 percent are employed.

Agricultural Technology
RADIOLOGIC TECHNOLOGY
AAS DEGREE - CODE #0628
Jenna Zetwick, Program Director
Email address: zetwickj@alfredstate.edu

Radiologic technology is a two-year AAS degree program preparing qualified students to become health professionals who administer ionizing radiation to produce photographic and digital anatomical images for diagnostic, therapeutic, and research applications. The program coordinates on-campus didactic and laboratory classes and clinical experiences at area hospitals to which students are responsible for their own transportation. Students must be able to demonstrate technical standards and pass clinical competencies as described by the American Registry of Radiologic Technologists (ARRT) and the Joint Review Committee on Education in Radiologic Technology (JRCERT), recognized by the United States Department of Education as the national accreditation agency of programs for radiographers. Upon graduation, students are prepared to take the American Registry Certification Exam administered by ARRT and be granted New York State licensure through the New York State Department of Health.

Clinical education is assigned to provide experiences consistent with the student’s level of achievement in different hospital environments. Through clinical assignments, students have opportunities to work with the most modern and specialized equipment available and knowledgeable staff with a wealth of experience in imaging. Clinical education assignments include eight clinical hours per week during the second semester of study and 24 clinical hours per week the third and fourth semesters. In addition, a 12-week (40 hours per week) summer session is required and provides valuable experience in developing clinical competency skills. Clinical placements are in hospitals near Alfred State, so students completing the summer session will require housing close enough to their clinical placements to travel there on a daily basis. For those who need it, summer housing is available at Alfred State; contact the Office of Residential Services for details.

The program currently admits 20 students each year, with a fall semester start date only. One student placement is reserved for an on-campus curriculum change, with the remaining 19 placements being filled by Admissions.

ADVANTAGES
• Prepares the student for the American Registry of Radiologic Technologists’ certification examination and New York State licensure.
• Energized laboratory on campus.
• Low student-to-faculty ratio.
• Major emphasis in the required courses is gaining proficiency in the technical skills necessary for radiologic technology.
• Extensive clinical experience in area hospitals.

PROGRAM STUDENT LEARNING OUTCOMES
• Demonstrate appropriate technical and affective skills in the clinical setting.
• Apply appropriate radiation protection techniques.
• Demonstrate patient-centered, age-specific skills.
• Analyze images to determine diagnostic quality.
• Demonstrate proper work ethics.
• Examine the value of leadership, professional development, and growth.
• Demonstrate critical thinking and problem-solving skills in both the didactic and clinical setting.
• Apply written communication skills to the construction of documents of record that are established professional guidelines.
• Apply oral communication skills to the explanation of ideas and scientific terminology.
• Using technological resources effectively and appropriately, synthesize theory and concepts from the liberal education domain and other professions into radiologic technology.
• Explain cultural diversity and evaluate the role of cultural competency, values, and ethics in the patient care setting.

MISSION STATEMENT
The radiologic technology program embraces the mission and vision statements of Alfred State. It enables students to become competent, efficient, and caring radiographers. The program also has the primary responsibility to ensure that the student has acquired the positive characteristics of dedication to duty, quality care, teamwork, and high ethical standards as they relate to the patient, their families, physicians, and other health care providers. The program embraces the mission and core values of Alfred State in its education of students enrolled in the program.

PROGRAM GOALS
• To develop competent practitioners capable of functioning in the highly technical and dynamic field of radiologic technology.
• To develop competent practitioners who demonstrate proficiency in communication skills.
• To develop competent practitioners who demonstrate proficiency in critical thinking skills and problem-solving skills.
• To develop practitioners who model professionalism.

DIRECT ENTRY INTO BACCALAUREATE DEGREE PROGRAMS
Alfred State radiologic technology graduates may enter directly into either the healthcare management BTech, the interdisciplinary studies BTech, or the technology management BBA degree program.

ACCREDITATION/CERTIFICATION
The radiologic technology program at Alfred State is fully accredited by JRCERT (the Joint Review Committee on Education in Radiologic Technology) through 2025. JRCERT is the only agency recognized by the U.S. Department of Education for accreditation of educational programs in radiologic technology.

EMPLOYMENT STATISTICS
Employment and continuing education rate of 100 percent – 100 percent are employed; 0 percent continued their education.
ENTRANCE REQUIREMENTS/RECOMMENDATIONS
Applicants for the radiologic technology program must possess a recognized high school diploma or its equivalent. A standardized test (SAT or ACT) is not required but recommended. Specific high school course requirements and recommendations are:

Required: Algebra, Geometry, Algebra 2, Biology, Interview with the academic department.
Recommended: Chemistry and Physics

Applicants with previous college experience must submit an official college transcript, as their success at the college level will be an admissions consideration. Due to the technical and science rigor, entrance requirements are higher than those of the institution.

OFFICE OF ACCESSIBILITY SERVICES
Students who believe they need a reasonable accommodation to properly participate in this program may contact Melanie Ryan in the Office of Accessibility Services. This office may be contacted by email at oas@alfredstate.edu or by phone at 607-587-4506. Please keep in mind that some accommodations may take time to implement, so students seeking accommodations are encouraged to contact OAS as early as possible.

TECHNICAL STANDARDS
To participate in the program, the applicant must possess specific non-academic skills. The technical standards described below are consistent with the duties of an entry-level sonographer in a professional position and are required in order to provide adequate patient care and produce a diagnostic image.

The applicant should have the:
• Ability with reasonable accommodation, if necessary, to reach and position the patients on the exam table.
• Ability with reasonable accommodation, if necessary, to move, adjust, and manipulate equipment to perform imaging procedures.
• Ability to review and evaluate recorded images to determine the quality of the image with reasonable accommodation.
• Ability to communicate effectively with patients, doctors, and other personnel so that the patient is not placed in an “at-risk” situation.
• Ability to make proper decisions involving patient and co-worker safety.
• Ability with reasonable accommodation, if necessary, to hear sounds that are necessary to assess patient’s health status.

FACILITIES
The program is located in the radiologic technology suite, which includes two lecture classrooms connected to a non-energized and an energized radiology laboratory. Clinical experience is at various local hospitals and clinic sites.

CONTINUING EDUCATION OPPORTUNITIES
The program allows graduates to transfer to a four-year program in radiologic science such as ultrasound, radiologic imaging, nuclear medicine, and radiation therapy.

OCcupational opportunities
• Hospital Radiology Department staff technologist
• Advanced imaging modalities - CT, cardiovascular intervention, mammography
• Radiology education
• Radiology Department management
• Industry
• Private physician offices

REQUIRED EQUIPMENT
A tier 1 laptop computer is required for students entering this degree program. Laptop specifications are available at www.alfredstate.edu/required-laptops.

POLICY: ACADEMIC STANDARDS AND GRADING
Students who do not maintain at least a C+ grade in all RADI and BIOL courses will not meet program requirements and will be unable to progress further into the program. Students are subject to warnings, probation, mandatory remedial study and/or dismissal if multiple failures (two or more courses) exist. A student will not be able to continue in the program until the prerequisites for the previous class have been successfully completed. Student support services and counseling are available for all students.

Be advised that a prior felony conviction may impede a student’s ability to participate in a required clinical experience.

GRADUATION REQUIREMENTS
The AAS degree in radiologic technology has finely prescribed courses reflective of accreditation standards for students to be prepared for admission to the American Registry of Radiologic Technologists’ Certification Examination and New York State licensure granted by the Department of Health. Specific graduation requirements are:
• 64 total semester credit hours
• Minimum of 20 credit hours of liberal arts and sciences from three of the 10 SUNY General Education categories
• 2.0 cumulative GPA and a grade of “C+” or better in the core science courses (RADT and BIOL prefixes)
• Approval of department faculty
SPORT MANAGEMENT
AS DEGREE - CODE #1396
Brandon Harrison, Program Coordinator
Email address: harrisbg@alfredstate.edu

The growing emphasis on athletics, coupled with the increasing amount of leisure time the public now enjoys, has made the world of sports one of the fastest-growing segments of American business. The sports industry requires a great variety of people with expertise in business. The goal of this program is to prepare you — using both hands-on and theory-based training — for a career in many areas of sport management and administration.

ADVANTAGES
Students obtain a holistic and in-depth understanding in many areas, such as principles of facility management, the unique aspects of sports marketing, promotions, finance, law, media relations, ticket sales, and sponsorship.

PROGRAM STUDENT LEARNING OUTCOMES
- Recognize the primary theories within the principle functional areas of business and sport management.
- Demonstrate professional business communication.
- Illustrate critical thinking and effective decision-making within the principle functional areas of sport management.
- Identify ethical issues within sport management
- 2020-2021 SLO Matrix

DIRECT ENTRY INTO BACCALAUREATE DEGREE PROGRAMS
Alfred State sport management graduates may enter directly into the business administration BBA, the interdisciplinary studies BTech, the sport management BBA, or the technology management BBA program.

CONTINUING EDUCATION OPPORTUNITIES
Students may transfer directly into our four-year sport management program, which results in a BBA degree.

OCCUPATIONAL OPPORTUNITIES
- Professional sports
- College sports
- Minor league sports
- Olympic organizations
- Recreational sport organizations
- Philanthropic sport organizations
- International sport organizations
- Ticket sales
- Sports marketing and promotions
- Sports sponsorship
- Media relations and sports broadcasting
- Sports law and sports agencies
- Facilities and event management

EMPLOYMENT STATISTICS
Employment and continuing education rate of 100 percent – 100 percent continued their education.

GRADUATION REQUIREMENTS
64 semester hours with a 2.0 cumulative index.

END-OF-PROGRAM EXAM REQUIREMENTS
All students are required to complete an end-of-program exam. This exam will be taken in the capstone course for the student’s specific program in SPMG 4123 Sport Facility Management. The end-of-program exam will also be considered an assignment in the capstone course. The benefit of taking the end-of-program exam is to test the student’s knowledge at the time of graduation. Students may include the progress from the end-of-program exams on their resume. Taking the end-of-program exam will have some fees, which are currently $23 per exam. Exams will be taken once and they will impact the student’s capstone course grade by 5%. Please refer to the syllabi for the relevant capstone course to know the grading scale for the end-of-program exam.

The end-of-program exams are required, not optional.

Information on how to take the exams will be given in the course prior to the end-of-program exam.

How should I prepare for the assessment exam?

The comprehensive end-of-program exam covers topics taught throughout the degree program, which are aligned to the topics required for accreditation. The preparation for the exam comes from your educational experience with the school, specifically through the required courses for your degree. The exam assesses the foundational knowledge areas for your discipline.

Brandon Harrison, Program Coordinator
Email address: harrisbg@alfredstate.edu

The growing emphasis on athletics, coupled with the increasing amount of leisure time the public now enjoys, has made the world of sports one of the fastest-growing segments of American business. The sports industry requires a great variety of people with expertise in business. The goal of this program is to prepare you — using both hands-on and theory-based training — for a career in the areas of administration, marketing, sales, fund development, finance, event promotion and management, communication, and facility management.

ADVANTAGES
• BBA students will complete a specialization in marketing and event promotion field experiences during the second year, and a full-semester internship in the senior year.
• Students will study the core body of knowledge in sport management, a sport management specialization, and the required SUNY general education component.

PROGRAM STUDENT LEARNING OUTCOMES
• Demonstrate technical competence in domestic and global environments within the principle functional areas of business.
• Analyze sport-related business problems and devise solutions using critical thinking, decision-making processes, and decision-support tools.
• Formulate solutions to current sport issues by incorporating the major functional areas of business and sport management.
• Incorporate software, technology, and information systems into sport-related operations.
• Identify comprehensive sport management issues and communicate findings and solutions.
• Identify the sport management environment in relation to the current financial, legal, economic, and social environments.
• Analyze the role of ethics, industry-based organizational regulations, and legalities in sport management processes.

OCCUPATIONAL OPPORTUNITIES
• Professional sports
• College sports
• Minor league sports
• Olympic organizations
• Recreational sport organizations
• Philanthropic sport organizations
• International sport organizations
• Ticket sales
• Sports marketing and promotions
• Sports sponsorships
• Media relations and sports broadcasting
• Sports law and sports agencies
• Facilities and event management

EMPLOYMENT STATISTICS
Employment and continuing education rate of 100 percent – 100 percent are employed.

RELATED PROGRAMS

Marketing

ENTRANCE REQUIREMENTS/RECOMMENDATIONS
Required: Algebra, Geometry
Recommended: Algebra 2

OFFICE OF ACCESSIBILITY SERVICES
Students who believe they need a reasonable accommodation to properly participate in this program may contact Melanie Ryan in the Office of Accessibility Services. This office may be contacted by email at oas@alfredstate.edu or by phone at 607-587-4506. Please keep in mind that some accommodations may take time to implement, so students seeking accommodations are encouraged to contact OAS as early as possible.

REQUIRED EQUIPMENT
A tier 1 laptop computer is required for students entering this degree program. Laptop specifications are available at www.alfredstate.edu/required-laptops.
Be advised that a prior felony conviction may impede a student's ability to participate in an internship and complete the program.

### Graduation Requirements
- 122 credit hours
- 30 credit hours of the 45 upper-level credit hours for this degree must be taken at Alfred State
- Cumulative overall index of at least 2.0
- Seven of the 10 SUNY approved General Education categories must be fulfilled

### End-of-Program Exam Requirements
All students are required to complete an end-of-program exam. This exam will be taken in the capstone course for the student’s specific program in SPMG 7013 Sport Management Capstone. The end-of-program exam will also be considered an assignment in the capstone course. The benefit of taking the end-of-program exam is to test the student’s knowledge at the time of graduation. Students may include the progress from the end-of-program exams on their resume. Taking the end-of-program exam will have some fees, which are currently $45 per exam. Exams will be taken once and they will impact the student's capstone course grade by 5%. Please refer to the syllabi for the relevant capstone course to know the grading scale for the end-of-program exam.

The end-of-program exams are required, not optional.

Information on how to take the exams will be given in the course prior to the end-of-program exam.

### How should I prepare for the assessment exam?
The comprehensive end-of-program exam covers topics taught throughout the degree program, which are aligned to the topics required for accreditation. The preparation for the exam comes from your educational experience with the school, specifically through the required courses for your degree. The exam assessments the foundational knowledge areas for your discipline.
SURVEYING AND GEOMATICS ENGINEERING TECHNOLOGY
BS DEGREE - CODE #1046
Richard Carlson, Program Coordinator
Email address: carlsorw@alfredstate.edu

Governmental agencies, private industries, and individuals all benefit from the surveying and mapping of our natural resources and planning of transportation systems, recreational facilities, new cities, and land subdivisions. Using advanced surveying equipment such as the electronic total stations to measure angles and distances, the modern surveyor has learned to increase his/her productivity and measurement accuracy. Particularly exciting about the future of the surveying profession are the emerging technologies of Global Positioning Systems (GPS), Geographic Information Systems (GIS), and Land Information Systems (LIS).

This program will provide you with a thorough understanding of the basic sciences of mathematics and physics, as well as applied subjects such as graphics and computer-aided drafting and design. The knowledge obtained from these basic courses is applied to a well-rounded study of modern surveying theory and practice.

ADVANTAGES
• The student constantly applies theoretical knowledge in meaningful and comprehensive laboratory sessions. Graduates are educated in a two-fold sense, both theoretically and practically.
• Both the surveying engineering technology (AAS) and the surveying and geomatics engineering technology (BS) programs are accredited by the Engineering Technology Accreditation Commission of ABET, http://www.abet.org.

PROGRAM STUDENT LEARNING OUTCOMES
• An ability to apply knowledge, techniques, skills and modern tools of mathematics, science, engineering, and technology to solve broadly defined engineering problems appropriate to the discipline.
• An ability to design systems, components, or processes meeting specified needs for broadly defined engineering problems appropriate to the discipline.
• An ability to apply written, oral, and graphical communication in broadly defined technical and non-technical environments; and an ability to identify and use appropriate technical literature.
• An ability to conduct standard tests, measurements, and experiments and to analyze and interpret the results to improve processes.
• An ability to function effectively as a member and a leader on technical teams.

PROGRAM EDUCATIONAL OBJECTIVES
Program educational objectives were established with the assistance of the Industrial Advisory Committee and are reviewed periodically. The surveying and geomatics engineering technology program produces graduates who:
• Write, read, and orally present technical reports, letters, and projects that meet the standards of the profession.
• Recognize the need for, and an ability to engage in, continued formal education as well as lifelong learning.
• Will be capable of siting successfully for the Land Surveyor Examination.
• Have the skills to perform a land title survey in all its complexity.
• Will be capable of employing state-of-the-art surveying techniques in leading a survey crew to the accomplishment of its goal.

OCCUPATIONAL OPPORTUNITIES
• Land surveyor (after successfully meeting state requirements)
• Surveying engineering technician
• Project surveyor
• Party chief
• Mapping technologist
• GPS surveyor

EMPLOYMENT STATISTICS
Employment and continuing education rate of 100 percent – 100 percent are employed.

CERTIFICATION OR LICENSURE

Both the surveying engineering technology (AAS) and the surveying and geomatics engineering technology (BS) are accredited by the Engineering Technology Accreditation Commission of ABET, http://www.abet.org. Accreditation means that the graduates from the AAS program will receive two years of credit toward the total statutory time requirement for licensure as a land surveyor in New York State.

Graduates of the BS program will receive four years of credit toward the total statutory time requirement for licensure as a land surveyor in New York State. The BS graduates are eligible to take the first part of the NCEES licensing exam for land surveying in their senior year, eighth semester, if within 20 semester credit hours of graduation.

Additionally, graduates of the BS program will receive six years of credit toward the statutory time for licensure as a professional engineer in New York State. The BS graduates are eligible to take the first part of the NCEES licensing exam for professional engineer in the fall following their graduation.

ARTICULATION AGREEMENTS

Alfred State accepts students from other two-year institutions as juniors into the BS surveying and geomatics engineering technology program with appropriate course work and grade point averages.

ENTRANCE REQUIREMENTS/RECOMMENDATIONS

Required: Algebra, Geometry, Algebra 2
Recommended: Physics

OFFICE OF ACCESSIBILITY SERVICES

Students who believe they need a reasonable accommodation to properly participate in this program may contact Melanie Ryan in the Office of Accessibility Services. This office may be contacted by email at oas@alfredstate.edu or by phone at 607-587-4506. Please keep in mind that some accommodations may take time to implement, so students seeking accommodations are encouraged to contact OAS as early as possible.

TECHNICAL STANDARDS

Students in the surveying and geomatics program must meet the following:

• Students must have the ability to complete field work over natural terrain.
• Students must have the ability to use standard software of the profession.

GRADUATION REQUIREMENTS

2.0 cumulative grade point average and department requirement of 2.0 grade point average in major courses (CIVL).

REQUIRED EQUIPMENT

A tier 2 laptop computer is required for students entering the surveying engineering technology programs. Laptop specifications are available at www.alfredstate.edu/required-laptops.

SURVEYING ENGINEERING TECHNOLOGY
AAS DEGREE - CODE #1039
Nicholas Ford, Program Coordinator
Email address: fordnb@alfredstate.edu

Governmental agencies, private industries, and individuals all benefit from the surveying and mapping of our natural resources and planning of transportation systems, recreational facilities, new cities, and land subdivisions. Using advanced surveying equipment such as the electronic total stations to measure angles and distances, the modern surveyor has learned to increase his/her productivity and measurement accuracy. Particularly exciting about the future of the surveying profession are the emerging technologies of Global Positioning Systems (GPS), Geographic Information Systems (GIS), and Land Information Systems (LIS).

This program will provide you with a thorough understanding of the basic sciences of mathematics and physics, as well as applied subjects such as graphics and computer-aided drafting and design. The knowledge obtained from these basic courses is applied to a well-rounded study of modern surveying theory and practice.

A tier 2 laptop computer is required for students entering the surveying engineering technology program. Laptop specifications are available at www.alfredstate.edu/required-laptops.

ADVANTAGES
- The student constantly applies theoretical knowledge in meaningful and comprehensive laboratory sessions. Graduates are educated in a two-fold sense, both theoretically and practically.
- Both the surveying engineering technology (AAS) and the surveying and geomatics engineering technology (BS) programs are accredited by the Engineering Technology Accreditation Commission of ABET, http://www.abet.org.

PROGRAM STUDENT LEARNING OUTCOMES
- An ability to apply knowledge, techniques, skills and modern tools of mathematics, science, engineering, and technology to solve well-defined engineering problems appropriate to the discipline.
- An ability to design solutions for well-defined technical problems and to assist with the engineering design of systems, components, or processes appropriate to the discipline.
- An ability to apply written, oral, and graphical communication in well-defined technical and non-technical environments; and an ability to identify and use appropriate technical literature.
- An ability to conduct standard tests, measurements, and experiments and to analyze and interpret the results.
- An ability to function effectively as a member of a technical team.

PROGRAM EDUCATIONAL OBJECTIVES
Program educational objectives were established with the assistance of the Industrial Advisory Committee and are reviewed periodically. The surveying engineering technology program produces graduates who:
- Write, read, and orally present technical reports, letters, and projects that meet the standards of the profession.
- Have an understanding of and are able to implement basic field and office survey procedures.
- Are capable of performing elementary research.
- Are competent in surveying techniques.
- Recognize the need for engagement and an ability to engage in continued formal education, as well as lifelong learning.

DIRECT ENTRY INTO BACCALAUREATE DEGREE PROGRAMS
Alfred State surveying engineering technology AAS graduates may enter directly into the construction supervision BTech, the interdisciplinary studies BTech, the surveying and geomatics engineering technology BS, or the technology management BBA degree program.

OCCUPATIONAL OPPORTUNITIES
- Office assistant
- Instrument person
- Mapping technologist

EMPLOYMENT STATISTICS
Employment and continuing education rate of 100 percent – 100 percent continued their education.

- Construction Supervision

CERTIFICATION OR LICENSURE
The surveying engineering technology (AAS) program is accredited by the Engineering Technology Accreditation Commission of ABET, http://www.abet.org. Accreditation means that the graduates from the AAS program will receive two years of credit toward the total statutory time requirement for licensure as a land surveyor in New York State.

ENTRANCE REQUIREMENTS/RECOMMENDATIONS
Required: Algebra, Geometry, Algebra 2

Recommended: Physics

Entry level of student into math and composition/literature sequences is a function of student’s high school preparation and mathematics and English placement examinations. Math through technical calculus I must be completed. Freshman composition and introduction to literature must be taken.

OFFICE OF ACCESSIBILITY SERVICES
Students who believe they need a reasonable accommodation to properly participate in this program may contact Melanie Ryan in the Office of Accessibility Services. This office may be contacted by email at oas@alfredstate.edu or by phone at 607-587-4506. Please keep in mind that some accommodations may take time to implement, so students seeking accommodations are encouraged to contact OAS as early as possible.

TECHNICAL STANDARDS
Students in the surveying engineering technology program must meet the following:
- Students must have the ability to complete field work over natural terrain.
- Students must have the ability to use standard software of the profession.

- CIVL 1013
- CIVL 2154
- CIVL 6113
- Other technical electives approved by department.
TECHNOLOGY MANAGEMENT

BBA DEGREE - CODE #1318

Susan Gorman, Interim Program Coordinator
Email address: gormansf@alfredstate.edu

The technology management BBA is designed to allow you to take your professional/technical degree to new heights. We’ve constructed this program to provide you with the hands-on business, administrative, and technological course work necessary to advance into management and supervisory positions in your field. That means you’ll have the skills necessary to run a small-to-medium-sized business, manage a department or a division, or own and manage your own business.

In order to earn the bachelor’s degree, students entering the program with an earned associate degree must complete all specified upper-level requirements for the bachelor’s degree, fulfill all required prerequisites for upper-level courses, and earn a minimum of 60 credits beyond the associate degree. The student will take courses that will result in the fulfillment of seven SUNY General Education course areas.

ADVANTAGES

• The technology management degree is designed to allow a student who has earned an associate degree (AAS, AA, AS, or AOS) in a technical or professional area (or at least 60 credits toward such a degree) to complete a bachelor’s degree through this upper-division program.

• The program includes an internship in the final semester of the senior year.

• Graduates of this program are eligible for employment in many industries that require both a technical and business background.

• The college offers technology management courses online, making it possible for students who transfer in credit or attend other colleges to earn their degree from Alfred State in technology management. This approach is perfect for working professionals, adult and returning students, or anyone who needs high flexibility in their academic schedule.

PROGRAM STUDENT LEARNING OUTCOMES

• Demonstrate technical competence in domestic and global environments within the principle functional areas of business.

• Analyze business problems and devise solutions using critical thinking, decision-making processes, and decision-support tools.

• Formulate a strategic plan using effective teamwork while integrating the major functional areas of business and innovation.

• Demonstrate and incorporate software, technology, and information systems into business operations.

• Identify comprehensive business issues and communicate findings and solutions.

• Identify the technology-related business environment in relation to the current financial, legal, economic, and social environments.

• Analyze the role of ethics, government regulations, and legalities in management processes.

EMPLOYMENT STATISTICS

Employment and continuing education rate of 100 percent – 85 percent are employed; 15 percent continued their education.

ENTRANCE REQUIREMENTS/RECOMMENDATIONS

• Required: Successful completion of an associate degree (AAS, AA, AS, or AOS), or at least 60 transferrable credit hours, and a minimum cumulative GPA of 2.0. Applicants who have gone through a certified apprentice program and have obtained a journeyman’s card with a recognized trade union may also be considered.

• Recommended: A minimum of 21 credits in liberal arts and sciences, and five different general education fields covered.

• Please note: Students entering this major from an AOS degree program are accepted in the program as ASAP students to facilitate completion of the five bridge courses (15 credits) in Liberal Arts and Sciences/General Education. The Business Department chair will review all college credits earned and will recommend specific courses to complete this bridge.

OFFICE OF ACCESSIBILITY SERVICES

Students who believe they need a reasonable accommodation to properly participate in this program may contact Melanie Ryan in the Office of Accessibility Services. This office may be contacted by email at oas@alfredstate.edu or by phone at 607-587-4506. Please keep in mind that some accommodations may take time to implement, so students seeking accommodations are encouraged to contact OAS as early as possible.

REQUIRED EQUIPMENT

A tier 1 laptop computer will be required of all students. See laptop specifications at www.alfredstate.edu/required-laptops.

Students seeking permission to take four upper-level classes in lieu of completing an internship must submit an appeal form with their justification, along with a faculty member’s statement of support. Internship appeal forms should be emailed or hand-delivered to the department secretary and will be reviewed by Business Department faculty. Appeal forms are due no later than Oct. 15 for the fall semester and March 15 for the spring semester.

Be advised that a prior felony conviction may impede a student’s ability to participate in an internship.

GRADUATION REQUIREMENTS

• Total minimum credit hours for graduation is 123.

• A cumulative overall index of at least 2.0 is required in order to graduate.

• 30 credit hours of the 45 upper-level credit hours for this degree must be taken at Alfred State.
• Seven of the 10 SUNY approved General Education categories must be fulfilled.

ADDITIONAL PROGRAM INFORMATION

• 12 credit hours may be transferred back within a seven-year period if you leave Alfred State prior to completing your degree.

END-OF-PROGRAM EXAM REQUIREMENTS

All students are required to complete an end-of-program exam. This exam will be taken in the capstone course for the student’s specific program in TMGT 7003 Managing Technology & Innovation Capstone. The end-of-program exam will also be considered an assignment in the capstone course. The benefit of taking the end-of-program exam is to test the student’s knowledge at the time of graduation. Students may include the progress from the end-of-program exams on their resume. Taking the end-of-program exam will have some fees, which are currently $45 per exam. Exams will be taken once and they will impact the student’s capstone course grade by 5%. Please refer to the syllabi for the relevant capstone course to know the grading scale for the end-of-program exam.

The end-of-program exams are **required**, not optional.

Information on how to take the exams will be given in the course prior to the end-of-program exam.

**How should I prepare for the assessment exam?**

The comprehensive end-of-program exam covers topics taught throughout the degree program, which are aligned to the topics required for accreditation. The preparation for the exam comes from your educational experience with the school, specifically through the required courses for your degree. The exam assesses the foundational knowledge areas for your discipline.
UNDECLARED MAJOR
CODE # 0000
Francine Staba, Interim Department Chair
Email address: advising@alfredstate.edu

If you’re undecided about your career goals, the undeclared major may be right for you. This program gives you the opportunity to try different options and select a course of study the first two semesters that fits your interests and background. Along the way, you can take advantage of extensive support services, including career planning and counseling, offered by caring faculty and staff throughout the program.

Since the primary goal of the program is to explore various academic areas of interest, individual course schedules will vary. The suggested program includes both a component of core courses (English, math, social science) and a component of electives in support of your interests.

Students enrolled in the undeclared major must transfer to a degree-granting program within two semesters. Depending on the choice of major, students may enter the workforce upon graduation, or continue their education in a bachelor’s degree program.

ENTRANCE REQUIREMENTS/RECOMMENDATIONS
Required: Algebra
Recommended: Biology

OFFICE OF ACCESSIBILITY SERVICES
Students who believe they need a reasonable accommodation to properly participate in this program may contact Melanie Ryan in the Office of Accessibility Services. This office may be contacted by email at oas@alfredstate.edu or by phone at 607-587-4506. Please keep in mind that some accommodations may take time to implement, so students seeking accommodations are encouraged to contact OAS as early as possible.

Licensed veterinary technicians are indispensable members of the veterinary medical team, capable of providing everything from life support and surgical assistance to physical therapy and nutritional management. Our program is designed to provide you with extensive training in the theory and principles, reinforced with the hands-on technical, animal, and laboratory experience needed to prepare you for this exciting field.

ADVANTAGES
- This program has full accreditation status as granted by the American Veterinary Medical Association, Committee on Veterinary Technician Education and Activities, Education and Research Division, [1931 N. Meacham Road, Suite 100, Schaumburg, IL 60173-4360; 847-925-8070].
- Students are eligible to sit for the Veterinary Technician National Exam (VTNE), the state licensing exam for veterinary technicians. Demand for licensed veterinary technicians is strong across the country.

VETERINARY TECHNICIAN NATIONAL EXAM PERFORMANCE
VTNE Accreditation Test
July 1, 2017 – June 30, 2020
Number of first-time candidates that have taken the VTNE 92
Three year VTNE pass percentage 93.5%

PROGRAM STUDENT LEARNING OUTCOMES
- Demonstrate a working knowledge of anatomy and physiology of domestic, laboratory, and exotic animal species encountered in veterinary medicine.
- Successfully perform animal care and husbandry, restraint, imaging, surgical, anesthetic and laboratory specimen analyses commonly encountered in veterinary clinical practice.
- Demonstrate written and oral communication skills appropriate for animal health care professionals.
- Critically think and reason when calculating and administering therapeutic agents used in veterinary medicine.
- Follow and uphold applicable laws and the veterinary technology profession's ethical codes to provide high-quality patient care.
- Troubleshoot and safely utilize all instruments and equipment commonly utilized in veterinary clinical practice.
- Display the knowledge and skills necessary to successfully pass the Veterinary Technician National Exam.

DIRECT ENTRY INTO BACCALAUREATE DEGREE PROGRAMS
Alfred State veterinary technology graduates may enter directly into the interdisciplinary studies BTech, the technology management BBA, or the healthcare management BTech degree program.

EXPENSES
Rabies vaccinations are required for all veterinary technology students. Textbooks are the primary annual expense, with the cost averaging $1,000 to $1,200 each year.

CONTINUING EDUCATION OPPORTUNITIES
The Alfred State veterinary technology program has an established transfer agreement with Cornell University's College of Agriculture. Students have also successfully transferred into the Purdue University BS veterinary technology program.

OCCUPATIONAL OPPORTUNITIES
- Veterinary hospitals (small animal, large animal, mixed animal, and exotic animal)
- Biomedical research institutions
- Zoological parks
- Educational institutions
- Specialized dairy calf or cow management
- Colleges of Veterinary Medicine

EMPLOYMENT STATISTICS
Employment and continuing education rate of 100 percent – 85 percent are employed; 15 percent continued their education.

CERTIFICATION OR LICENSURE
The veterinary technology program at Alfred State is a two-year educational course leading to an Associate in Applied Science degree and students are eligible to sit for the Veterinary Technology National Exam (VTNE). The VTNE is the New York State licensing exam for veterinary technicians. The demand for graduate-licensed or license-eligible veterinary technicians is strong across the country.

*Preceptorship* of 240 hours, either during summer or semester break after successful completion of second semester course requirements. Preceptorship hours can be fulfilled through part-time employment at an appropriate facility.

---

In order to progress in the veterinary technology program, students must earn a "C" or better in each required veterinary technology course, with the exception of VETS 1214 Animal Anatomy and Physiology I, which requires a minimum of a "D" to pass the course. Students receiving an "F" in two or more required courses will be required to change majors.

ASOP students must earn a "C" or better in the Introduction to Veterinary Technology course and the Domestic Animal Anatomy and Physiology course in order to progress to the next level of core veterinary courses.

Be advised that a prior felony conviction may impede a student's ability to participate in an internship.

---

**GRADUATION REQUIREMENTS**

Students must:

- Successfully complete the prescribed sequence of courses.
- Achieve a minimum of 2.0 in their core courses and a minimum of 2.0 overall.
- Be recommended by the department faculty.
- Complete the 240-hour preceptorship.

*The 240-hour preceptorship is a program requirement and a graduation requirement.

The Admissions and Performance Standards discussed in the following paragraphs define performance expectations that must be met for successful completion of the veterinary technology program at Alfred State. It is the policy of Alfred State to provide reasonable accommodations for those with disabilities as defined under the Americans with Disabilities Act. If you need an accommodation due to a disability under the Americans with Disabilities Act, please contact the Student Success Center office at 607-587-4122. Some accommodations may require up to six weeks to prepare. For progression in the veterinary technology program, students are expected to meet the following performance standards:
### Critical Thinking
Critical thinking sufficient for clinical judgment.  
- Identify cause-effect relationships in clinical situations.  
- Develop nursing care plans.  
- Demonstrate problem-solving skills.  
- Adapt to stressful situations.

### Interpersonal
Interpersonal abilities sufficient to interact with patients, clients, families, and groups from a variety of social, emotional, cultural, and intellectual backgrounds.  
- Establish rapport with patients/clients and colleagues.  
- Recognize appropriate boundaries in relationships with patients/clients and colleagues.

### Communication
Communication abilities for interaction with others orally and in writing.  
- Explain treatment procedures, initiate health teaching, document and interpret nursing actions and patient/client responses.  
- Team-building skills.

### Mobility
Physical abilities sufficient to move from room to room, maneuver in small spaces, and provide assistance to patients.  
- Move around in patient and treatment areas.  
- Administer CPR.  
- Provide physical assistance to clients and colleagues to ensure safety within the environment.  
- Ability to prevent or escape injury caused by animals (e.g., biting, kicking, stampeding).

### Motor Skills
Gross and fine motor abilities sufficient to provide safe, effective nursing care in a timely manner.  
- Use of instruments, supplies, safety devices, and communication equipment in the care of patients.  
- Performance of nursing care, surgical assistance, and laboratory techniques.

### Hearing
Auditory ability sufficient to monitor and assess health needs.  
- Auditory ability sufficient to hear auscultatory sounds, monitor alarms, and monitor and assess health emergency signals and cries for help.  
- Hear needs/warning sounds from animals and humans of impending danger/injury.

### Visual
Visual ability sufficient for observation and assessment necessary in nursing care.  
- Observe patients for expected and unexpected physical and emotional responses to nursing and medical treatment regimens.  
- Use of diagnostic equipment such as a microscope, thermometer, refractometer, etc.

### Tactile
Tactile ability sufficient for physical assessment and performance of nursing duties in a timely manner.  
- Perform palpation functions of physical exam.  
- Administrate oral, intramuscular, subcutaneous, and intravenous medications.  
- Insert and remove tubes and perform wound care management.  
- Surgical assistance.

### Physical Condition
Physical ability and stamina sufficient to restrain, lift, and assist in the care of a variety of species of animals.  
- Ability to stand for extended periods of time.  
- Ability to withstand extreme weather conditions.  
- Immune system competence.  
- Safely lift, position, and restrain animals and supplies for treatment.  
- Surgical assistance.  
- Daily clinical routine.  
- Year-round treatment and care of outdoor animals.  
- Exposure to a wide range of chemical and biological agents.
**WELDING TECHNOLOGY**

**AOS DEGREE - CODE #0666**

Bradley Thompson, Department Chair

Email address: thompsbj@alfredstate.edu

This high-tech program focuses on welding processes performed in all positions on both plate and pipe. You will learn proper safety methods, required math, related skills, layout and fit up, welding codes and standards, welding inspection, testing, and drawing/welding symbol interpretation.

The first year, students will complete AWS Level I standards for an entry-level welder. The second year will take students toward AWS Level II - advanced welder and expert welder. Additional techniques such as high-pressure vessel and high-pressure pipe will be taught, as well as other advanced welding techniques.

**ADVANTAGES**

The welding technology program is taught according to the standards set by the American Welders Society (AWS) and is AWS-certified.

**PROGRAM STUDENT LEARNING OUTCOMES**

- Demonstrate mathematical operations using accepted mathematical applications.
- Practice shop safety and welding safety.
- Perform straight and bevel cuts using manual and automatic oxyfuel and plasma equipment.
- Set up and operate constant current welding equipment.
- Set up and operate constant voltage welding equipment.
- Perform fillet and groove welds in all positions on carbon steel plate.
- Perform fillet and groove welds on pipe in all positions.
- Identify and describe the heat relationship to the grain structure of various metals.
- Maintain and develop testing and inspection records.
- Demonstrate layout and fabrication skills resulting from the previous materials used in program.

**DIRECT ENTRY INTO BACCALAUREATE DEGREE PROGRAM**

Alfred State welding technology graduates may enter directly into the technology management BBA degree program. Graduates who have credit for freshman composition, statistics, literature, history, and speech may complete the BBA program in two additional years; others may complete the BBA program in two-and-a-half years.

**OCCUPATIONAL OPPORTUNITIES**

- Industrial welder
- Steel construction
- Equipment repair
- Self-employment
- Fabrication welder
- Structural welder

**EMPLOYMENT STATISTICS**

Employment and continuing education rate of 100 percent – 83 percent are employed; 17 percent continued their education.

**RELATED PROGRAMS**

- Autobody Repair
- CNC Manufacturing and Machining
- Heating, Ventilation, and Air Conditioning
- Mechanical Engineering Technology

**REQUIRED TOOLS/EQUIPMENT**

A list of required tools, equipment, PPE, etc. for all of the programs mentioned above can be found at [http://www.alfredstate.edu/tool-lists](http://www.alfredstate.edu/tool-lists).

A tier 1 laptop computer is required for students entering this degree program. Laptop specifications are available at [www.alfredstate.edu/required-laptops](http://www.alfredstate.edu/required-laptops).

**ENTRANCE REQUIREMENTS/RECOMMENDATIONS**

Recommended: In-depth knowledge of basic math skills.

**OFFICE OF ACCESSIBILITY SERVICES**

Students who believe they need a reasonable accommodation to properly participate in this program may contact Melanie Ryan in the Office of Accessibility Services. This office may be contacted by email at oas@alfredstate.edu or by phone at 607-587-4506. Please keep in mind that some accommodations may take time to implement, so students seeking accommodations are encouraged to contact OAS as early as possible.

**TECHNICAL STANDARDS**

Applicants for the welding program must meet the following physical requirements:

- Must be able to perform safely in the shop.
- Must be able to lift 50 pounds to eye level.
- Must be able to communicate orally with a person 6 to 10 feet away in a shop environment.
- Must be able to diagnose mechanical failures that are distinguished audibly.
- Must be able to understand and retain information found in service repair manuals and use diagnostic flow charts.
- Must be able to visually read an LCD display on welding equipment.
- Must have the dexterity and mobility to weld in all the welding positions to meet all requirements.
- Good eyesight is recommended.
- Must be able to stand for long periods of time.

**GRADUATION REQUIREMENTS**

A student must successfully complete all courses in the prescribed four-semester program and earn a minimum cumulative index of 2.0, which is equivalent to a “C” average. Students are required to earn a grade of “C” or higher in WELD 1723 to be eligible for graduation. (Articulation is available in this area.)

A “C” or higher must also be received for WELD 4013.
Course Descriptions

ACCT - ACCOUNTING

ACCT - 1124 Financial Accounting, 4.00 Credits
Level: Lower
Topics included in this course are the fundamental principles of accounting, the accounting cycle and basic procedures, statement of financial position, determination and reporting of periodic earnings, cash and accrual basis of accounting; accounting for a merchandising firm and inventory valuation, principles of internal control. Other topics include accounting for the acquisition, depreciation, and disposition of property, plant, and equipment.

ACCT - 2224 Managerial Accounting, 4.00 Credits
Prerequisite(s): ACCT 1124 with D or better
Level: Lower
Topics include: Cost benefits analysis, direct and indirect costs, variable, fixed, and mixed costs, current liabilities; nature of corporations and related equity and income reporting issues; long-term liabilities; statement of cash flows; nature and behavior of manufacturing costs; introduction to cost accounting concepts and systems; cost-volume-profit relationships; introduction to budgetary and activity based costing systems and planning.

ACCT - 3423 Intermediate Accounting I, 3.00 Credits
Prerequisite(s): ACCT 2224 with D or better
Level: Lower
This course provides an in-depth examination of accounting theory in the treatment of assets, liabilities and stockholder's equity. The accounting cycle is reviewed in detail and a full examination and analysis of financial statement development and usage is undertaken. Continual focus will be on fundamental accounting concepts and principles with special emphasis on the second half of the course examines managerial accounting topics, with the primary emphasis being the fulfillment of the needs of management. The course would be particularly beneficial to individuals in engineering technology, management, marketing, and vocational technical curriculums where the student will not actually be expected to do accounting, but will be expected to effectively comprehend accounting reports and statements as well as communicate with accounting personnel. Students will complete a major research project on applying technology to chosen career path.

ACCT - 3453 Tax Accounting I, 3.00 Credits
Prerequisite(s): ACCT 1124 with D or better
Level: Lower
This course will focus on fundamental income tax concepts related to understanding and completing individual federal income tax returns. Manual and computerized income tax preparation will be required. Coverage will include: income tax formula for individuals, gross income and exclusions, taxation of self-employed individuals, retirement plans, rental properties, standard vs itemized deductions, tax credits and additional taxes, depreciation, and capital gains/losses. Students will apply course theory to a contemporary tax software product through the computerized completion of progressively challenging federal tax returns.

ACCT - 4523 Intermediate Accounting II, 3.00 Credits
Prerequisite(s): ACCT 3423 with D or better
Level: Lower
Continuation of ACCT 3423. Topics include: long-term investments, fixed assets, current and long-term debt, and stockholder's equity. Special problems of income determination, statement of cash flow and statements from incomplete records. Students must complete an end-of-program exam hosted by an external vendor.

AGPS - AGRONOMY/PLANT SCIENCE

AGPS - 1103 Soils, 3.00 Credits
Level: Lower
Prerequisite(s): AGPS 1104 with D or better
Gen Ed - Natural Sciences, Liberal Arts and Science
Fundamental principles of soil science are studied in an effort to relate soil characteristics to plant growth; plant growth as influenced by soil factors. Soil parent materials and soil formation, physical and chemical properties of soils and soil surveys, life in the soil, soil water, and water conservation, plant nutrition, lime and liming practices are all covered in this course. Laboratory components complement lecture material.

AGPS - 1104 Soils, 4.00 Credits
Level: Lower
Prerequisite(s): AGPS 1103 with D or better
Applied Learning-Practicum, Course Fee $24.00
Gen Ed - Natural Sciences, Liberal Arts and Science
Fundamental principles of soil science are studied in an effort to relate soil characteristics to plant growth; plant growth as influenced by soil factors. Soil parent materials and soil formation, physical, chemical and colloidal properties of soils and soil surveys, life in the soil, soil water, and water conservation, plant nutrition, lime and liming practices are all covered in this course. Laboratory components complement lecture material.

AGPS - 2113 Field & Forage Crops, 3.00 Credits
Level: Lower
Prerequisite(s): AGPS 1103 with D or better
Applied Learning-Field Study
This course will combine fundamental knowledge of field crop physiology with practical training in crop production. Crop interactions with other organisms, both beneficial and deleterious (pests), will be studied. Management of synthetic inputs will be included in this course. Emphasis will be given to cultural (or biological) crop management strategies that reduce input costs in crop production and reduce fluctuations (risks) to crop performance and the environment.

AGPS - 3004 Soil Fertility, 4.00 Credits
Prerequisite(s): AGPS 1103 with D or better
Applied Learning-Field Study, Course Fee $24.00
This course is a comprehensive study of the management of plant nutrients in agronomic systems for economic response and environmental protection. Topics include diagnosis of nutrient availability and prediction of crop response to fertilizers, interactions between nutrient response and chemical, physical, and biological properties of soils.

AGPS - 5003 Integrated Pest Management, 3.00 Credits
Prerequisite(s): AGPS 1104 with D or better or BIOL 1304 with D or better or BIOL 1104 with D or better or BIOL 2803 with D or better
Level: Upper
Applied Learning-Practicum, Course Fee $24.00, Upper Level
This course is an introduction to Integrated Pest Management (IPM): the study of plant pest protection on an interdisciplinary basis. Ecological, biological and economic principles will be emphasized from a participatory discipline: entomology, nematology, plant pathology, weed science, engineering, and economics. Reasons and principles for establishing pest management programs will be discussed. Computer-aided instruction is used in portions of the course. The objectives of the course are to: introduce the student to the principles of pest management; develop an understanding of vocabulary and basic concepts; develop an understanding of tactics associated with pest management; and create an awareness of interdisciplinary complexity and necessity of systems approach in IPM.

AGEC - AGRICULTURE ECON/BUS

AGEC - 2011 Farm Records, 1.00 Credit
Prerequisite(s): ACCT 2224 with D or better
Level: Lower
This course will provide training in the fundamentals of record keeping as a tool to determine the success of a farm operation. Students will learn how to allocate resources to various farm enterprises and determine the success of the enterprise. The use of computer software to analyze farm records will be emphasized. In addition, students will learn how to identify areas for improvement and develop plans to enhance their farm's profitability.

AGEC - 3213 Farm & Rural Business Mgmt I, 3.00 Credits
Level: Lower
This is the first in a two semester series where both the production management and financial management of a rural or farm business are studied. The course emphasizes the skills needed to manage a profitable business including analysis of financial statements, record keeping, key production management areas, leadership and decision-making skills.

AGEC - 4303 Farm & Rural Business Mgmt II, 3.00 Credits
Prerequisite(s): AGEC 3213 with D or better
Level: Lower
This is the second in a two semester series where both the production management and financial management of a rural or farm business are studied. The course emphasizes the skills needed to manage a profitable business including analysis of financial statements, record keeping, key production management areas, leadership and decision-making skills.

AGEC - 5003 Agricultural Policy, 3.00 Credits
Prerequisite(s): AGEC 4303 with D or better
Level: Upper
Upper Level
This course includes an analysis of the causes, nature, and effects of government participation in agriculture; and the relationship of the American agriculture and agricbusiness sector with the political and economic system, public administration, and interest group representation.
AGRI - 3202 Rabbit Production, 2.00 Credits
Prerequisite(s): AGRI 1104 with D or better or AGRI 2013 with D or better or BIOL 1304 with D or better or BIOL 1104 with D or better
Level: Upper
Applied Learning-Practicum, Upper Level
Students will learn how to site, design and manage a small-scale fruit farm using organic and/or other sustainable practices. Particular attention will be paid to fruit crops that are suitable for the climate and soils of New York. Proper orchard site selection, soil preparation, how to choose appropriate varieties, proper planting, fertilizing and watering, pruning, grafting, common pests and diseases, harvesting and storage of fruit are all topics that will be discussed. Laboratories will include instruction on techniques important to fruit production, such as grafting, pruning and pest control. Field trips to area fruit growers will be used to supplement student learning.
AGPS - 6204 Soil Fertility, 4.00 Credits
Prerequisite(s): AGIS 1104 with D or better
Level: Upper
Upper Level
This course is a comprehensive study of the management of plant nutrients in agronomic systems or economic response and environmental protection; diagnosis of nutrient availability and prediction of crop response to fertilizers; interactions between nutrient response and chemical, physical, and biological properties of soils.
AGRI - AGRICULTURE
AGRI - 1001 Farm Practicum I, 1.00 Credit
Level: Lower
Applied Learning-Practicum
Students enrolled in this course will work 45 hours at the college farm. They will learn practical farming skills such as mixing feed, spreading manure, milking cows, and other daily duties as assigned by the farm manager. Students will keep a daily journal of their experiences and develop proficiency in basic farm skills. Formal management and team building training will also be incorporated into the experience.
AGRI - 2001 Farm Practicum II, 1.00 Credit
Level: Lower
Applied Learning-Practicum
Students enrolled in this course will work 45 hours at the college farm. They will learn practical farming skills such as mixing feed, spreading manure, milking cows, and other daily duties as assigned by the farm manager. Students will keep a daily journal of their experiences and develop proficiency in basic farm skills. Formal management and team building training will also be incorporated into the experience.
AGRI - 2013 Organic & Sustainable Ag Tech, 3.00 Credits
Level: Lower
This course will introduce students to environmentally sound methods of agriculture. The goal is to help students understand methods and technologies for using water, soil, pest and animal resources in ways that create a biologically healthy landscape for animals and for society. This course will introduce students to a more natural approach to animal agriculture as well as to explore the synergy of an integrated organic cropping and animal agriculture system.
AGRI - 2101 Sophomore Seminar, 1.00 Credit
Level: Lower
This course enables the student to develop career professionalism, job finding techniques and the personal and social skills necessary for success in the world of work. A job search will be organized, resumes prepared with cover letters, and practice interviews will be conducted. Many types of jobs relating to agriculture will be studied using successful graduates. Professional and personal goals will be discussed.
AGRI - 3001 Farm Practicum III, 1.00 Credit
Level: Lower
Applied Learning-Practicum
Students enrolled in this course will work 45 hours at the college farm. They will learn practical farming skills such as mixing feed, spreading manure, milking cows, and other daily duties as assigned by the farm manager. Students will keep a daily journal of their experiences and develop proficiency in basic farm skills. Formal management and team building training will also be incorporated into the experience.
AGRI - 3102 Value Added Dairy Products, 2.00 Credits
Level: Lower
Applied Learning-Practicum
Students enrolled in this course will work 45 hours at the college farm. They will learn practical farming skills such as mixing feed, spreading manure, milking cows, and other daily duties as assigned by the farm manager. Students will keep a daily journal of their experiences and develop proficiency in basic farm skills. Formal management and team building training will also be incorporated into the experience.
AGRI - 3202 Rabbit Production, 2.00 Credits
Level: Lower
Applied Learning-Practicum, Course Fee $32.00
Students enrolled in this course will learn how to raise rabbits at a commercial and hobby level. They will learn practical skills such as a breeding, feeding and marketing of rabbits.
AGRI - 3351 Live Animal Evaluation, 1.00 Credit
Level: Lower
Applied Learning-Practicum
The efficiency of animal husbandry depends on the ability of an individual to evaluate, judge and select animals based on their productive and reproductive abilities. Communication, both oral and written, makes the judges reasons much more effective.
AGRI - 4001 Farm Practicum IV, 1.00 Credit
Level: Lower
Applied Learning-Practicum
Students enrolled in this course will work 45 hours at the college farm. They will learn practical farming skills such as mixing feed, spreading manure, milking cows, and other daily duties as assigned by the farm manager. Students will keep a daily journal of their experiences and develop proficiency in basic farm skills. Formal management and team building training will also be incorporated into the experience.
AGRI - 4012 Internship, 12.00 Credits
Level: Lower
Applied Learning-Internship
This internship is designed to assist the student in making the transition from the classroom to industry. This integration of work allows a degree of independence and an element of learning that is not possible in a conventional classroom. The intent of the internship is to provide each student with an experiential learning opportunity in an agricultural automation and robotics business or farm that employs automation. Students will carry out a planned program of education experiences under the direct supervision of an owner, manager or supervisor in their technical field or professional area. The interns will also be supervised by a faculty member who serves as Internship Coordinator. Written and oral reports, along with a journal of work activities and experiences, will be required.
AGRI - 4103 Constructn Technqs for Agricr, 3.00 Credits
Level: Lower
Applied Learning-Practicum
This course is designed for students planning for careers requiring general knowledge and basic skills in agricultural building construction and maintenance. The course content consists of proper and safe hand tool and power tool utilization. Safe utilization of these tools in lab will be a hands-on experience. Various building materials will be explained and demonstrated throughout this course. Construction techniques and methods will be presented in lecture and performed in each lab.
AGRI - 4202 Value Added Meat Products, 2.00 Credits
Level: Lower
Applied Learning-Practicum
Students enrolled in this course will learn how to produce, package, and market value added meat products. They will learn practical skills such as a meat cutting, sausage making, meat curing, and jerky production.
AGRI - 4900 Directed Study, 1.00 TO 4.00 Credits
Level: Lower
Students must have permission of their advisor and the department chairperson before enrollment. An outline of the study must be submitted before enrollment. Directed study provides an opportunity to continue study in an area of special interest. Study may be carried out within any curriculum in the department in which the student is enrolled.
AGRI - 6103 Precision Agriculture, 3.00 Credits
Level: Upper
Upper Level
This course covers the acquisition and analysis of geographically referenced data for the management of crop production systems. Topics include: mapping, map projections, implementation of global positioning systems, data formats, geographic information systems, grid sampling, soil fertility and physical properties, yield monitoring, variable-rate application, and economics.
AGRI - 7002 Senior Seminar/Capstone Proj, 2.00 Credits
Level: Upper
Applied Learning-Practicum, Upper Level
This course enables the student to develop career professionalism, professional and personal goal setting skills and how to plan for the achievement of their goals. Students develop and present a capstone project reflective of their educational experiences and career goals.
AGRI - 8012 Agriculture Internship, 12.00 Credits
Level: Upper
Applied Learning-Internship, Upper Level
This internship is designed to assist the student in making the transition from the classroom to industry. This integration of work allows a degree of independence and an element of learning that is not possible in a conventional classroom. The intent of the internship is to provide each student with an experiential learning opportunity in an agricultural management situation as a pre-professional supervisor or manager. Students will complete supervised field work in a selected business, industry, government or educational setting. Students carry out a planned program of education experiences under the direct supervision of the owner, manager or supervisor in their technical field or professional area. The interns will also be supervised by a faculty member who serves as Internship Coordinator. Written and oral reports, along with a journal of work activities and experiences, will be required. Evaluation will be based on the quality of experiences gained from the internship and student work performance. Enrollment in this course is dependent on faculty approval.
ANSC - ANIMAL HUSBANDRY/SCIENCE
ANSC - 1204 Introduction to Animal Science, 4.00 Credits
Level: Lower
Applied Learning-Practicum, Course Fee $33.00, Liberal Arts and Science
This course provides a survey of the Dairy Cattle and Livestock industry, including beef, sheep, swine, and horses. Breeding and feeding systems, disease control measures, housing and basic management practices. The selection of animals for production, market, and breeding. Characteristics of the major breeds, their economic importance and marketing trends of their products will be covered.
ANSC - 2102 Dairy Cattle Reprod & ATech, 2.00 Credits
Prerequisite(s): ANSC 1204 with D+ or better or VETS 3204 with C or better
Level: Lower
Applied Learning-Practicum, Course Fee $24.00

This course will provide the student with a basic understanding of reproduction and artificial insemination (A.I.) techniques in dairy cattle. The student will gain an understanding of the anatomy of the bovine reproductive tract through examination and palpation of both slaughterhouse specimens and live animal palpation. The student will learn to read sire summaries, use linear scoring, apply recordkeeping approaches and analysis of herd reproductive performance. Common reproductive diseases will be discussed as well as the latest information on heat detection and synchronization programs. The labs and two required field trips will provide individual student A.I. training and practice sessions needed for the National Association of Animal Breeders (NAAB) certification.

ANSC - 2114 Dom Animal Anat & Phys, 4.00 Credits
Level: Lower
Applied Learning-Other, Course Fee $24.00, Liberal Arts and Science

This course is a systems approach to the study of anatomy and physiology of common domestic animals, emphasizing Rum mitt, Equine, Swine, Canine and Feline as the animal models. The on-line course materials will provide the student with a complete overview of how each body system functions in the maintenance of a normal healthy animal. The on-line course materials will be reinforced in the laboratory where skeletons, models and prosected specimen will allow the student to gain applied perspectives of the gross anatomy and normal physiology. Histologic slides, kodachromes, radiographs and live animals will also be used to enhance student understanding. Computer simulated dissection materials will also be used to provide the opportunity for the students to refine their understanding of the required information.

ANSC - 3003 Feeds and Nutrition, 3.00 Credits
Level: Lower
Applied Learning-Practicum, Course Fee $24.00, Liberal Arts and Science

This course provides the student with an understanding of animal nutrition. Students will learn feeding farm animals for growth, production, and profit, nutrient content and physiological value of feeds; nutrient requirements of farm livestock; physiology of digestion and absorption of nutrients; and ration formulation. The course will include supervised laboratory experiences to examine animal feed, formulate diets, and develop and evaluate diets.

ANSC - 3103 Animal Disease Control, 3.00 Credits
Prerequisite(s): ANSC 2104 with D+ or better
Level: Lower

In this course, fundamental information on the nature of disease and its control and prevention will be studied. Students will learn the causes, symptoms, prevention and treatment of common diseases as well as to the life cycles, damage, diagnosis, control and treatment of various internal and external parasites.

ANSC - 3103 Livestock Mgmt & Production, 3.00 Credits
Level: Lower
Applied Learning-Field Study

This course introduces the student to the management and production of assorted species of livestock. Breeds of sheep, beef, and swine will be studied as well as the skills in selecting and judging these species. Feeding and management of each of these species, as well as housing and equipment requirements for animals in specific types of operations will be examined. Students will be introduced to diseases and parasites that may be encountered when managing a species-specific livestock operation. Students will also gain insight into different types of marketing used in livestock production.

ANSC - 3203 Dairy Cattle Production I, 3.00 Credits
Prerequisite(s): ANSC 2104 with D+ or better or VETS 3204 with D or better
Level: Lower
Applied Learning-Field Study

This course is an introduction to fundamental design, architectural design drawing, written and verbal communication skills and applied drawing techniques. Students are instructed in drawing techniques of architectural design and drafting. Students will learn to use techniques of architectural design and drafting. Students will also learn to use the latest computer-aided design software to enhance the design process and architectural theory. The course will introduce the student to the management and production of assorted species of livestock. Breeds of sheep, beef, and swine will be studied as well as the skills in selecting and judging these species. Feeding and management of each of these species, as well as housing and equipment requirements for animals in specific types of operations will be examined. Students will be introduced to diseases and parasites that may be encountered when managing a species-specific livestock operation. Students will also gain insight into different types of marketing used in livestock production.

ANTH - ANTHROPOLOGY

ANTH - 1013 Cultural Anthropology, 3.00 Credits
Level: Lower
Gen Ed - Other World Civilized, Gen Ed - Social Sciences, Liberal Arts and Science

This course promotes understanding of the world's cultures by providing an introduction to cultural anthropology and the study of contemporary cultures worldwide, with an emphasis on non-western cultures. This course will introduce the student to anthropological methods, theories, and concepts. It is a broad survey of a variety of belief systems, social and family structures, and different ways anthropologists understand individuals and cultures. Case studies are selected for specific ethnographic focus, through which to explore different approaches to life. The experiences of cross-cultural encounters are examined. After completion of this class the student should be able to define basic anthropological concepts, understand theories of cultural anthropology and critically reflect on personal assumptions you may have about human beings and cultural.

ANTH - 5113 Cross-Cultural Encounters, 3.00 Credits
Level: Upper
Gen Ed - Other World Civilized, Liberal Arts and Science, Upper Level

This course develops a framework for cross-cultural literacy - understanding different cultural contexts and the dynamics of cross-cultural communication. Attention is paid to the challenges that might be encountered in multi-cultural environments and how they might be resolved. Leading social, economic, and political institutions of specific cultures will be examined. The course is writing-intensive and a project is required.

ANTH - 5223 Archaeology - Cities of Fire, 3.00 Credits
Level: Upper
Gen Ed - Social Sciences, Liberal Arts and Science, Upper Level

The discovery of the buried city of Pompeii in the 18th century gave birth to the modern science of archaeology, and at the same time added greatly to our understanding of Roman civilization. "Cities of Fire," the ancient cities excavated in the study abroad program in Sorrento, Italy, and takes advantage of the unique cultural heritage of Campania (the region surrounding the Gulf of Naples). The course is a survey of the techniques of archaeology, the culture of the region, and the history and culture of the Mediterranean civilization. Field lectures at sites including Pompeii, Herculaneum, Baia, Cuma, Puteoli, Mt. Vesuvius and Napoli enrich classroom presentations, and provide a first-hand experience of the ancient cultures of Greece and Rome. Students investigate specific aspects of Roman architecture, city planning, and culture, and present their findings in research reports during field visits.

ANTH - 5333 Medical Anthropology, 3.00 Credits
Level: Upper
Gen Ed - Other World Civilized, Liberal Arts and Science, Upper Level

This course will introduce students to the diversity in health seeking practices and beliefs across the globe. Students will learn how to analyze medical practice, including biomedicine, as a cultural institution. We will explore how culture shapes our perceptions of what it means to be sick or healthy. This course will provide a context for understanding the way in which culture can play an integral role in understanding, diagnosing and treating illness. We will also examine how social structures and cultural misunderstandings can lead to inequalities in health outcomes and healthcare experiences.

ARCH - ARCHITECTURE AND DESIGN

ARCH - 1184 Design Fundamentals 1, 4.00 Credits
Level: Lower
Course Fee $53.00

This course is an introduction to fundamental design, architectural design drawing, written and verbal communication skills and applied drawing techniques. Students are instructed in the techniques of architectural design and drafting. Students are instructed in the techniques of architectural design and drafting. Students are instructed in drawing techniques of architectural design and drafting. Students will learn to use techniques of architectural design and drafting. Students will also learn to use the latest computer-aided design software to enhance the design process and architectural theory. Students explore and practice, observational sketching, depicting light, texture and depth, analytical drawing, orthographic projection systems, and professional standards for layout, lettering, use of line weights, and dimensioning of architectural drawings.

ARCH - 2014 Computer Visualization, 4.00 Credits
Level: Lower
Applied Learning-Practicum

This is an introductory course that examines the practical and theoretical issues of architectural modeling software (BIM) as a tool for all aspects of the architectural design and development process. Students learn to create and execute projects populated with elements of "process and technique" that will form a foundation tool for sequence courses.

ARCH - 2394 Design Fundamentals 2, 4.00 Credits
Prerequisite(s): ARCH 1184 with C or better or CIAT 1184 with C or better
Level: Lower
Course Fee $53.00

An introductory course designed to expose students to fundamental design and communication skills, research, site analysis skills, and assessment tools, use of precedent studies, design program development, color theory, and site planning. Students also continue to develop their understanding and application of the design process, spatial relationships, design ordering systems and design principles. The course examines these topics through readings and quizzes, and design projects incorporating graphic, written and verbal presentation skills. Students also explore the characteristics of materials through hands on material alteration and model building.

ARCH - 3003 Environmental Controls 1, 3.00 Credits
Prerequisite(s): ARCH 2014 with D or better
Level: Lower

This course introduces the student to the fundamental principles of mechanical, electrical and plumbing (MEP) systems for small buildings. Students will explore passive design strategies and their effects on active MEP building systems. The course will emphasize holistic analyses of sites, buildings and small building systems with respect to geographic regions. Instruction will focus on impacts of the built environment on global resources. Tests, calculations and delineation of building systems will form the basis of instruction.

COURSE DESCRIPTIONS
ARCH - 3014 Construction Technology 1, 4.00 Credits
Prerequisite(s): ARCH 2054 with D or better
Level: Lower
This course introduces students to the materials, methods and systems commonly used in residential construction. Students will study the inherent qualities of materials and develop an understanding of their use and integration within a residential structure. The process of construction and the resulting assemblies will be graphically explored using Building Information Modeling (BIM). Emphasis will be placed on the graphic standards used in the architectural industry and developing a basic understanding of construction documents. As the course progresses, each student will apply their understanding of residential construction technology, materials and the software environment by producing a series of architectural documentation. At the end of the semester, the students will be exposed to the scheduling process through the Southern Tier Architectural Resource (STAR) Center. Each semester the project(s) for this course will change depending on the projects that the STAR Center receives from the public. Students will be given a "real-world" project within the Southern Tier Region to complete with an advising instructor and a client. The student should produce a final product that will be presented to the client at the end of the semester.

ARCH - 3006 Design Studio 4, 6.00 Credits
Prerequisite(s): ARCH 5066 with C or better or CIAT 5066 with C or better
Level: Upper
Applied Learning-Field Study, Course Fee $106.00, Upper Level
This course is intended to develop the student’s ability to visualize architectural solutions to complex architectural problems. This advanced course is designed to provide the future practitioner with a comprehensive study of the business and practice of architecture and design. Students will be expected to progress through the schematic design, design development phases of short-term and extended design projects. Conventional media and three-dimensional computer modeling will be used to define, analyze and present solutions to complex architectural problems. Assignments and in-class exercises related to design, theory, technology and criticism will also be used to reinforce topics discussed in class.

ARCH - 3006 Studio Sorrento, 6.00 Credits
Prerequisite(s): ARCH 5066 with C or better
Level: Upper
Applied Learning-Intl/Dom Trvl, Upper Level
Studio Sorrento is intended solely for students enrolled in the Third-Year Study Abroad Program in Sorrento, Italy. The course will be structured around the experiences, field trips and other learning opportunities during the semester of study abroad. Particular attention will focus on elements of traditional town design, sustainable building strategies, historic building analysis, and adaptive/reuse of historic structures. Students will work for the semester to include: the development of a journal of site visits and analyses, photographic and metric documentation, reflective writing, and small design projects within the Sorrento environment.

ARCH - 3003 Design Studio 2, 6.00 Credits
Prerequisite(s): ARCH 3003 with C or better and ARCH 3004 with C or better
Level: Upper
Course Fee $106.00
This course explores the programming, schematic design and design development phases of the architect’s design services. This course presents students with a systematic approach to architectural design methods. Methods of graphic thinking are introduced as a means of exploring and evaluating issues related to the design process. Architectural form is investigated relative to human needs and environmental context. Student verbal and graphic communication skills are refined in project presentations.

ARCH - 3004 Construction Technology 2, 4.00 Credits
Prerequisite(s): ARCH 3004 with D or better
Level: Lower
Course Fee $106.00
This course builds on the construction topics begun in Construction Technology 1. The course is focused on construction techniques for commercial buildings. Topics covered include structural systems, reinforcement concrete, pre-cast concrete and building enveloping systems. Emphasis is placed on contemporary details and methods of construction. Student evaluations are based on Building Information Modeling (BIM) computer generated projects and periodic tests.

ARCH - 4004 Design Studio 2, 4.00 Credits
Prerequisite(s): ARCH 3004 with C or better or CIAT 3004 with C or better
Level: Lower
Course Fee $106.00
This course concentrates on problem-solving methods for a variety of architectural project types and sizes. Students working individually and in teams explore and document their work through sketches, study models and preliminary working drawings. The students are encouraged to develop a professional approach to investigating, analyzing and solving architectural problems. This is the second studio course and will help students in preparing for more advanced and challenging studio coursework in the curriculum.

ARCH - 4013 Municipal Codes & Regulations, 3.00 Credits
Prerequisite(s): ARCH 4013 with D or better
Level: Upper
Course Fee $106.00
This course covers the municipal code review process and definition of model building and zoning codes. The course emphasizes use and occupancy, special use and occupancy, building heights and types, areas of construction, fire-resistive construction, interior finishes, fire-protection systems, means of egress, accessibility, interior environment, energy efficiency, exterior walls, assemblies, structural provisions, building maintenance systems and existing structures as described in the Building Code of New York State.

ARCH - 4014 Construction Technology 3, 6.00 Credits
Prerequisite(s): ARCH 4014 with D or better
Level: Upper
Course Fee $106.00, Upper Level
This studio focuses on the design of buildings and places in an urban setting that require an intense concentration of support systems. The course provides and exploration and study of architectural technology and planning principles is designed to bridge the gap between architectural theory and practice through the design of structures and places for human use and inspiration. Students will be expected to progress through the design process and the potential new building projects. Conventional media and three-dimensional computer modeling will be used to define, analyze and present solutions to complex architectural problems. Assignments and in-class exercises related to design, theory, technology and criticism will also be used to reinforce topics discussed in class.

ARCH - 4015 Construction Technology 4, 4.00 Credits
Prerequisite(s): ARCH 4015 with D or better
Level: Upper
Course Fee $106.00, Upper Level
This course explores the programming, schematic design and design development phases of the architect’s design services. This course presents students with a systematic approach to architectural design methods. Methods of graphic thinking are introduced as a means of exploring and evaluating issues related to the design process. Architectural form is investigated relative to human needs and environmental context. Student verbal and graphic communication skills are refined in project presentations.

ARCH - 5006 Design Studio 4, 6.00 Credits
Prerequisite(s): ARCH 4014 with D or better
Level: Upper
Course Fee $150.00, Upper Level
This studio focuses on the design of buildings and places in an urban setting that require an intense concentration of support systems. The course provides and exploration and study of architectural technology and planning principles is designed to bridge the gap between architectural theory and practice through the design of structures and places for human use and inspiration. Students will be expected to progress through the design process and the potential new building projects. Conventional media and three-dimensional computer modeling will be used to define, analyze and present solutions to complex architectural problems. Assignments and in-class exercises related to design, theory, technology and criticism will also be used to reinforce topics discussed in class.

ARCH - 5006 Studio Sorrento, 6.00 Credits
Prerequisite(s): ARCH 5066 with C or better
Level: Upper
Applied Learning-Intl/Dom Trvl, Upper Level
Studio Sorrento is intended solely for students enrolled in the Third-Year Study Abroad Program in Sorrento, Italy. The course will be structured around the experiences, field trips and other learning opportunities during the semester of study abroad. Particular attention will focus on elements of traditional town design, sustainable building strategies, historic building analysis, and adaptive/reuse of historic structures. Students will work for the semester to include: the development of a journal of site visits and analyses, photographic and metric documentation, reflective writing, and small design projects within the Sorrento environment.

ARCH - 6006 Urban Sketching & Journaling, 3.00 Credits
Level: Upper
Urban sketching and Journaling is offered to students enrolled at Sant’Anna Institute as part of the study abroad program in Sorrento, Italy. The course is designed to augment the experience of future students’ exposure to the experience of developing drawing skills and observational acuity. Emphasis is placed on the advanced use of drawing as an invaluable tool for seeing, learning, thinking, and communicating. Lectures are centered on the use of graphite, pen, pencil, and watercolor, for observational sketching and note-taking. Lab exercises will capitalize on the unique urban environments of Sorrento and southern Italy. Students are required to keep a running journal that documents their thoughts and experiences throughout the semester.

ARCH - 7003 Environmental Controls 1, 3.00 Credits
Course Fee $106.00, Upper Level
This course concentrates on developing student critical thinking and problem solving skills associated with historic building projects, guided by treatments set forth by the federal and state governments. Over the course of the semester, students synthesize building research, analysis, and documentation in the scope of potential new building program requirements. As warranted, students may formulate schematic design proposals for future use. Projects will involve researching the historical evolution of the building, documentation of the existing, the analysis of building materials and conditions, understanding the building’s relationship to its wider physical, social and cultural environment and making appropriate design decisions with respect to future use.

ARCH - 7003 Design Studio 5, 6.00 Credits
Prerequisite(s): ARCH 6006 with C or better or ARCH 6006 with C or better
Level: Upper
Course Fee $150.00, Upper Level
This course is intended to develop the student’s ability to function within the design professions and/or related disciplines. It will enhance the student’s ability to conceptualize and develop a comprehensive design solution to a panel of faculty and visiting professionals, and defend the decision-making processes that gave rise to their solution.
ARCH - 8716 Design Studio 7-Thesis Defnln, 6.00 Credits
Prerequisite(s): ARCH 8306 with C or better
Level: Upper
Applied Learning-Creative Work, Course Fee $159.00, Upper Level

ARCH - 8733 Modern Architectural Theory, 3.00 Credits
Prerequisite(s): Prerequisite(s): FNAT 5033 with C or better and ( ARCH 8306 with C or better or CIAT 8306 with C or better )
Level: Upper
Upper Level
This seminar introduces the students to theories and criticisms of contemporary architecture from the beginnings of the modern period to contemporary issues. This seminar course is designed to be highly interactive and will consist of facilitated discussion, weekly writing assignments, in-class exercises and presentations. Students will have the responsibility of initiating weekly discussion of the assigned readings. In-class discussion includes discussion and analysis of the central arguments and conclusions of the theoretical constructs presented in the readings made relevant to the contemporary and future practice of architecture. Students will prepare a series of long research papers that analyze and synthesize the arguments presented in the selected readings for the course. A brief oral presentation will accompany each term paper to engage classmates and invited guests in critical commentary.

ARCH - 8753 Advanced Structural Concepts, 3.00 Credits
Prerequisite(s): Prerequisite(s): CIVL 5213 with C or better
Level: Upper
Upper Level
This course addresses advanced architectural structures, exterior building envelopes and production technologies. It explores structural elements and expands to include more complex forms, material and systems. Materials covered are; glass, steel and advanced composites. Material performance and detailing of the exterior envelope are emphasized with digital projects utilizing node based parametric programming and pattern based surface development.

ARCH - 8776 Design Studio 8-Thesis Develop, 6.00 Credits
Prerequisite(s): Prerequisite(s): ARCH 8716 with C or better
Level: Upper
Applied Learning-Creative Work, Course Fee $159.00, Upper Level
This course is the capstone of the two-semester sequence of architectural design studios. Building upon the thesis research completed during the previous semester in Design Studio 7 – Studio Definition, students will finalize the design of their thesis. The course will carry out a comprehensive design development of their thesis project. Students will present their design solution to a panel of faculty and visiting professionals, and defend the decision-making process that gave rise to their design. The student is expected to show command and care in the economic and technological solutions and in the creation of a livable, efficient, and contextually appropriate structure.

ARCH - 8793 Professional Development, 3.00 Credits
Prerequisite(s): Prerequisite(s): ARCH 8003 with C or better or CIAT 8003 with C or better
Level: Upper
Upper Level
This comprehensive course will enhance the student's exposure to the architect's professional role based on case studies of real-world experiences. It expands upon previously introduced architectural business practices such as marketing, responding to client requests for services, assembling project teams, working with the appropriate consultants, and delivering a project, all within financial constraints of both project and business management. The changing role of the architect in nontraditional practice types and project delivery methods will also be explored. Throughout the course, professional written, verbal and graphic communication skills will be emphasized in relation to their importance in the business setting.

ASDC - ALFRED STU SUCCESS CENTER

ASDC - 1012 College and Life Skills*, 2.00 Credits
Level: Remedial
Remedial
This course will assist students in making the transition to college and in completing collegiate work successfully. In this course the student will learn strategies for: making use of campus resources; self-awareness and exploration; academic success; effective communication on a college level; time management, health, and financial resources. Students will read and respond to articles, participate in class discussions, summarize topics verbally or in writing, and complete a short research project.

ASDC - 1092 Methods of Inquiry, 2.00 Credits
Level: Lower
This college level course introduces students to current and proven research on learning and intelligence. Students will set personal and academic goals and apply methods to reach them through mindsets, critical thinking, and self-management of pathways and strategies. Students will also be presented with basic information literacy skills, study techniques, as well as effective strategies for critical thinking, problem solving, listening, note taking, test taking, and communication. This course will build on the summer bridge program, incorporate information management aspects, integrate blackboard and include preliminary development of a portfolio.

ASDC - 1201 Structured Learning-Soc Sci*, 1.00 Credit
Level: Remedial
Pass/Fail, Remedial
This course is supplemental instruction and recitation for students who need more structured study and development time, taught by faculty, professional tutor, and/or student success staff. The instructor develops additional review problems to match homework and topics of need while study skills, specific to discipline, are integrated. This course will coincide with and compliment a student's registered course (e.g. history, psychology, criminal justice). This course will be graded Pass/Fail.

ASDC - 1301 Structured Learning-Eng Tech*, 1.00 Credit
Level: Remedial
Pass/Fail, Remedial
This course is supplemental instruction and recitation for students who need more structured study and development time, taught by faculty, professional tutor, and/or student success staff. The instructor develops additional review problems to match homework and topics of need while study skills, specific to discipline, are integrated. This course will coincide with and compliment a student's registered course (e.g. civil, mechanical, architecture). This course will be graded Pass/Fail.

ASDC - 1401 Structured Learning-Science*, 1.00 Credit
Level: Remedial
Pass/Fail, Remedial
This course is supplemental instruction and recitation for students who need more structured study and development time, taught by faculty, professional tutor, and/or student success staff. The instructor develops additional review problems to match homework and topics of need while study skills, specific to discipline, are integrated. This course will coincide with and compliment a student's registered course (e.g. microcomputer applications, computer programming). This course will be graded Pass/Fail.

ASDC - 2011 Career Exploration & Planning*, 1.00 Credit
Level: Remedial
Pass/Fail, Remedial
This course will assist students with exploring and selecting a college major and/or career goal. The students will learn a decision making model designed to make appropriate, well-informed career/life choices. Students will engage in a variety of assessments using software programs and self-directed career search and explore career options and will develop their own marketing materials such as resumes, cover letters, and career portfolios. This is a pass/ fail course.

ASDC - 2061 Structured Learning-Computer*, 1.00 Credit
Level: Remedial
Pass/Fail, Remedial
This course is supplemental instruction and recitation for students who need more structured study and development time, taught by faculty, professional tutor, and/or student success staff. The instructor develops additional review problems to match homework and topics of need while study skills, specific to discipline, are integrated. This course will coincide with and compliment a student's registered course (e.g. microcomputer applications, computer programming). This course will be graded Pass/Fail.

ASDC - 2091 Structured Learning-Math*, 1.00 Credit
Level: Remedial
Pass/Fail, Remedial
This course is supplemental instruction and recitation for students who need more structured study and development time, taught by faculty, professional tutor, and/or student success staff. The instructor develops additional review problems to match homework and topics of need while study skills, specific to discipline, are integrated. This course will coincide with and compliment a student's registered course (e.g. college algebra, calculus, statistics). This course will be graded Pass/Fail.

ASDC - 2011 Career Exploration & Planning*, 1.00 Credit
Level: Remedial
Pass/Fail, Remedial
This course will assist students in exploring and selecting a college major and/or career area. The students will engage in a variety of assessments using software programs and self-directed career searches. Students will complete out of class assignments designed to integrate self-awareness with knowledge of careers and the working world. Students will develop their own networking skills through an informational interview and development of an elevator pitch that highlights their strengths. The students will learn a decision-making model designed to make appropriate, well-informed career/life choices, as well as identify strategies for developing beneficial skills and/or experiences related to their major and/or career area.

ASDC - 2193 Intro to Academic Literacy, 3.00 Credits
Level: Lower
This course focuses on the continued improvement of literacy skills - reading comprehension skills, reading efficiency and flexibility, critical thinking, development of a college-level vocabulary, and the grammar, writing, and study skills needed for success with college course work. Students may be placed in this course on the basis of their placement test scores or may take it as an elective to expand their basic literacy skill levels.

ASDC - 2900 Directed Study, 1.00 TO 4.00 Credits
Level: Lower
A student may contract for one to four credit hours of independent study through an arrangement with an instructor who agrees to direct such a study. The student will submit a plan acceptable to the instructor and to the department chairperson. The instructor and student will confer regularly regarding the process of the study. This will be a credit bearing college-level set of material such as developing critical thinking skills, building information management and technology skills, or building reading strategies.
AUTO - AUTOMOTIVE

AUTO - 1109 Brakes, Steering & Susp Sys, 9.00 Credits
Level: Lower
Applied Learning-Practicum
This course is designed to train students in the service and diagnosis of: automotive brake systems, suspension systems, vehicle alignment, tire changing, tire balancing, and vibration diagnosis.

AUTO - 1124 Automotive Welding, 4.00 Credits
Level: Lower
Applied Learning-Practicum, Course Fee $66.00
This course covers all facets of welding as they apply to the servicing of cars and light trucks. Methods covered are: SMAW, GTAW, and GMAW. The safe use of the cutting torch and plasma cutter and "booth time" is supplemented by the use of various processes in the actual repair of vehicles and equipment. The students are required to do outside research for a written and oral report.

AUTO - 1135 Auto Bsc Elect & Compt Ovrhl, 5.00 Credits
Level: Lower
Applied Learning-Practicum
This course includes lecture and lab instruction on the diagnosis and repair of automotive cooling, heating, and air conditioning systems. In addition automotive preventive maintenance, exhaust system service, and annual safety inspection checks are also covered.

AUTO - 1169 Auto Electric, Fuel & Emission, 9.00 Credits
Level: Lower
Applied Learning-Practicum
This course begins with instruction on basic electrical theory and progresses through the operation and diagnosis of many of the advanced electrical and electronic systems used on modern vehicles. Topics covered include: basic electrical theory, circuit design, common electrical components, fuel, ignition, emission control and electronic engine controls systems.

AUTO - 1219 Truck Brake, Steer & Sus Sys, 9.00 Credits
Level: Lower
Applied Learning-Practicum
This course is designed to train students in the service and diagnosis of: automotive brake systems, suspension systems, vehicle alignment, tire changing, tire balancing, and vibration diagnosis.

AUTO - 1224 Welding, 4.00 Credits
Level: Lower
Applied Learning-Practicum, Course Fee $67.00
This course covers all facets of welding as they apply to the servicing of cars and light trucks. Methods covered are: SMAW, GTAW, and GMAW. The safe use of the cutting torch and plasma cutter and "booth time" is supplemented by the use of various processes in the actual repair of vehicle and equipment. The students are required to do outside research for a written and oral report.

AUTO - 1239 Trk Insp, Maint, AC Htg & Clng, 9.00 Credits
Level: Lower
Applied Learning-Practicum
This course includes lecture and lab instruction on the diagnosis and repair of automotive cooling, heating, and air conditioning systems. In addition automotive preventive maintenance, exhaust system service, and annual safety inspection checks are also covered.

AUTO - 1245 Trk Bsc Elctrns & Cmpnt Ovrhl, 5.00 Credits
Level: Lower
Applied Learning-Practicum
This course includes the construction and testing of electronic circuits, alternators, and starters. The student will also use Ohm's Law to calculate voltage drop, current and resistance in electrical circuits. Air bag, power window motor and power door lock actuator testing and diagnosis will be investigated.

AUTO - 1251 Truck Brake, Steer & Sus Sys, 9.00 Credits
Level: Lower
Applied Learning-Practicum
This course is designed to train students in the service and diagnosis of: automotive brake systems, suspension systems, vehicle alignment, tire changing, tire balancing, and vibration diagnosis.

AUTO - 1254 Trk Bsc Elctrmn & Cmpt Ovrhl, 5.00 Credits
Level: Lower
Applied Learning-Practicum
This course includes the construction and testing of electronic circuits, alternators, and starters. The student will also use Ohm's Law to calculate voltage drop, current and resistance in electrical circuits. Air bag, power window motor and power door lock actuator testing and diagnosis will be investigated.

AUTO - 1306 Rust Repair, 6.00 Credits
Level: Lower
Applied Learning-Practicum
This course introduces the student to the basic skills of the refinishing industry and provides the technical knowledge of different types of finishes as well as the sequence of foundation coats.

AUTO - 1344 Redctnng & Mechncl Cmpnts, 4.00 Credits
Level: Lower
Applied Learning-Practicum
Designed to acquaint trainee with the proper process of reconditioning a vehicle before customer delivery. Students will learn how to remove and install seat upholstery as well as interior trim panels and hardware.

AUTO - 2169 Truck Electrical, Fuel & Emiss, 9.00 Credits
Level: Lower
Applied Learning-Practicum
This course begins with instruction on basic electrical theory and progresses through the operation and diagnosis of many of the advanced electrical and electronic systems used on modern vehicles. Topics covered include: basic electrical theory, circuit design, common electrical components, fuel, ignition, emission control and electronic engine controls systems.

AUTO - 2309 Brakes, Susp & Strctrl Anlys, 9.00 Credits
Level: Lower
Applied Learning-Practicum
This unit of instruction is designed to train high school graduates and adult learners in the service and diagnosis of automotive brake and suspension systems as they relate to collision repair. Vehicle alignment, tire balancing, and vibration diagnosis are included. Students will be trained to operate a variety of brake, suspension, and alignment equipment while performing actual repairs, adjustments, and diagnosis. In addition, identification and analysis of structural damage, as well as frame and body measuring techniques are covered. This training will supplement the students' auto-body education in preparation for entry-level employment.

AUTO - 2365 Chassis Electrical, 5.00 Credits
Level: Lower
Applied Learning-Practicum
This unit of instruction is designed to enable trainees to become proficient in chassis electrical testing, repair, and component replacement.

AUTO - 2503 Prev Maint for Hvy Tk & Diesel, 3.00 Credits
Level: Lower
Applied Learning-Practicum
This course is designed to teach the student the advanced skills of tuning the race car for fuels and modified delivery. Laboratory exercises emphasize technique and skill development for success at organized auto racing events.

AUTO - 3429 Adv Electr & Engine Perfrrnc, 9.00 Credits
Level: Lower
Applied Learning-Practicum
Lecture sessions cover most areas of the automobile except engine and drive train repairs. Designed to update and bring together earlier training with emphasis on diagnosing sophisticated automotive electrical, drivability and emission-related problems. This is an extremely critical area with enhanced inspection programs and OBDII systems.

AUTO - 3504 Motorsport Fabrication I, 4.00 Credits
Level: Lower
Applied Learning-Practicum
Theorv of operation and repair procedures of gasoline engine valve trains, crankshaft and bearings, connecting rods, cylinders, and pistons, diagnosis of engine malfunctions. Repair procedures, cooling system repairs and diagnosis, cylinder boring, piston pin fitting, connecting rod reconditioning, valve guide resizing and replacing, valve seat replacement, and other machine work and service procedures.

AUTO - 3506 Introduction to Motorsports, 6.00 Credits
Level: Lower
Applied Learning-Practicum
This course is designed to teach the student the fundamental skills of team organization and management. Major topics include introduction to motor sports, team structure, budgeting and finance. Laboratory exercises emphasize technique and skill development for success at the track. A sponsorship proposal is developed by each student.

AUTO - 3514 Racing Suspension Dynamics, 4.00 Credits
Level: Lower
Applied Learning-Practicum
This course is designed to teach the student advanced skills in race car chassis. Major topics include principles of suspension set-up, development and weight transfer. Laboratory exercises emphasize technique and skill development in modified suspension and steering geometry to build race cars.

AUTO - 3524 Hgh Prfmnce Tune-up/Electrcms, 4.00 Credits
Level: Lower
Applied Learning-Practicum
This course is designed to teach the student advanced skills in race car chassis. Major topics include principles of suspension set-up, development and weight transfer. Laboratory exercises emphasize technique and skill development in modified suspension and steering geometry to build race cars.

AUTO - 3534 Hgh Permnce Sterng/Bks/Chasis, 4.00 Credits
Level: Lower
Applied Learning-Practicum
This course is designed to teach the student the principles of modifying race car brakes and steering. Major topics include the principles of modifying chassis, brakes, and steering. Laboratory exercises emphasize technique and skill development in the different modified demands.
AUTO - 3535 Hgh Prfmnce Engine Building, 5.00 Credits
Level: Lower
Applied Learning-Practicum
This course is designed to teach the student the advanced skills needed to rebuild a high performance engine. Related topics include engine building, dynamometer testing, laboratory exercises emphasize technique and skill development in engine assembly and dynamometer testing.

AUTO - 3544 Motorsports Aerodynamics, 4.00 Credits
Level: Lower
Applied Learning-Practicum
This course is designed to teach the student the fundamental principles of aerodynamics for racing and performance cars. Major topics include principles of aerodynamic effects on brake take up, drag and lift coefficients. Laboratory exercises emphasize technique and skill development to build race cars.

AUTO - 3609 Heavy Duty Drive Train, 9.00 Credits
Level: Lower
Applied Learning-Practicum
This course consists of the service and repair of heavy duty clutches, transmissions, drive line and rear axle, leaf, torsion bar, and air suspensions, the alignment of front and rear axle, also alignment of trailer suspension and on-vehicle tire balancing. This will include Eaton and Meritor clutches, Mack and Eaton transmissions, and Meritor, Eaton and Mack rear axles. Also covered are Road Ranger auto shift transmissions.

AUTO - 3623 Air Brake Service, 3.00 Credits
Level: Lower
Applied Learning-Practicum
This course consists of maintenance and repair of air brake systems including compressors, valves, tubing, and circuitry. This course will also include troubleshooting of foundation brakes and related components. Also covered is air ABS brake components, operation and troubleshooting.

AUTO - 3649 Diesel Engine Service, 9.00 Credits
Level: Lower
Applied Learning-Practicum
This nine credit hour course covers the procedures needed to understand, test, repair, and overhaul diesel engines and their related components. Major emphasis is placed on the mid-range and heavy duty diesels of the following makes: Cummins, Caterpillar, Detroit Diesel, Mack, John Deere, and Navistar. Covered is the use of special tools and equipment necessary to troubleshoot, maintain, and overhaul these engines and their related components.

AUTO - 3809 Inspec, Gen Alignment & AC, 9.00 Credits
Level: Lower
Applied Learning-Practicum
Includes lab application of body panel alignment and mandated annual safety inspection, repair techniques to ensure customer satisfaction with component fit and operation, keeping customer safety in mind when components are replaced, and techniques to ensure customer comfort and engine efficiency through control of heat as they apply to auto cooling, heating and air conditioning systems.

AUTO - 3819 Auto Body Skls/Computrzed Est, 9.00 Credits
Level: Lower
Applied Learning-Practicum, Course Fee $106.00
Includes the different states of repair: metal analysis, metal straightening, filling and metal finishing, glass replacement, alignment problems, fender and door replacement, any and all small, quick, one or two day jobs. Also includes how to make manual and computerized estimates.

AUTO - 4383 Heavy Duty Elec/Hydr Special, 3.00 Credits
Level: Lower
Applied Learning-Practicum
This three credit hour course consists of the service and troubleshooting of electrical systems as they pertain to heavy equipment, truck and diesel. This will include series parallel circuits including 12 and 24 volt systems. Included in this course is the service and troubleshooting of hydraulic systems as found in heavy equipment, truck and diesel. This will include pumps, valves, actuators, accumulators and other related components in today's hydraulic systems.

AUTO - 4439 Shop Management & Enhanced Sys, 9.00 Credits
Level: Lower
Applied Learning-Practicum
This course will provide insight into other aspects of the automotive trade. Covered in shop management is repair order writing, duties of a shop adviser, customer relations, customer communications, questioning and follow-up, estimating repair costs, checking for recalls, searching for technician service bulletins, researching new product information, motorist's bill of rights, lemon laws and understanding the nature of the automotive business and reviewing Hybrid vehicles information. The lab portion allows the student to perform as a service manager in one of our many automotive shops. Work scheduling, quality control, maintenance, and record keeping are stressed as part of this program.

AUTO - 4449 Drive Train Service, 9.00 Credits
Level: Lower
Applied Learning-Practicum
Study and actual repair of standard, automatic, and automatic transmissions and transaxes with emphasis on overdrive and electronically controlled units. Full coverage of clutches, axles, drivelines, C-V joints, and 4 x 4 transfer cases, as well as open, limited-slip, and front drive differentials. Extensive hands-on work in a busy "line shop" situation. This is a seven and one-half (7 1/2) week course.

AUTO - 4603 Heavy Duty Electrical Systems, 3.00 Credits
Level: Lower
Applied Learning-Practicum
This course covers the service and troubleshooting of electrical equipment pertaining to heavy equipment, truck, and diesel. This will include 12-48 volt electrical systems, multiplexing, GPS guidance, and traction motors.

AUTO - 4613 Heavy Duty Hydraulic Systems, 3.00 Credits
Level: Lower
Applied Learning-Practicum
This course consists of the service and troubleshooting of hydraulic systems pertaining to heavy equipment, truck and diesel. This will include operation of open center and closed center systems, pumps, valves, actuators, accumulators, and the relation of electrical multiplexing and today's hydraulic systems. This course will also include preventative maintenance of hydraulic systems.

AUTO - 4623 Heavy Duty HVAC, 3.00 Credits
Level: Lower
Applied Learning-Practicum
This course consists of the service and troubleshooting of HVAC (Heating Ventilation & Air Conditioning) as they pertain to heavy equipment, truck and refrigeration trailers for commercial usage. This will include MACS (Mobile Air Conditioning Society) certification review and testing for a national recognized Section 609 certification and basic HVAC systems used in refrigeration trailers.

AUTO - 4629 Major Refinishing, 9.00 Credits
Level: Lower
Applied Learning-Practicum
This course is designed to further the student's knowledge and practical experience in the use of painting and refinishing equipment, blending paints, metallic finishes, and hard to match colors, correcting paint failures, custom refinishing and how to solve their problems.

AUTO - 4639 Major Collision Repair, 9.00 Credits
Level: Lower
Applied Learning-Practicum
Provides instruction in the repair procedures of vehicles considered by appraisers to be totals, or near totals. Study and repair of frame and uni-body damage, suspension repairs. This includes computerized measuring systems, plastic welding, use of structural adhesives, and complete vehicle refinishing.

AUTO - 4669 Diesel Fuel System Service, 9.00 Credits
Level: Lower
Applied Learning-Practicum
This nine credit hour course is intended for heavy equipment, truck and diesel mechanic majors. Coverage will include the fundamentals of diesel fuel systems, both mechanical and computer controlled. Engine tune-up procedures, and diesel fuel system troubleshooting and computer usage will be included. Injection pumps, governors, injectors, emission control devices, automatic advance units and transfer pumps of the following systems will be covered: American Bosch, Caterpillar, Detroit Diesel, Cummins and Navistar.

BIOL - BIOLGY

BIOL - 1013 Essentials of Exercise Physiol, 3.00 Credits
Level: Lower
Gen Ed - Natural Sciences, Liberal Arts and Science
This is an internet-based course intended for both science and non-science majors covering the basic study of exercise physiology. Topics include the role of nutrition in energy-producing pathways and human growth and development; nutritional and common pharmacological aids used to support and enhance exercise and athletic performance; study of metabolic production of energy and its application in the human capacity for work; and study of select body systems and the principles of exercise training with resultant physiological adaptations that could be expected from such training. The course concludes with a study of the role of exercise in the maintenance of health and the prevention of disease.

BIOL - 1101 Topics in General Biology, 1.00 Credit
Corequisites(s):
Level: Lower
A one-credit hour course to supplement the General Biology (BIOL 1104) course for biology majors. The focus of this course is to expand on topics discussed during the lecture/ laboratory portions of BIOL 1104 and to discuss current topics of interest to biology students. The format of the course is reading and discussion. Each participant will be responsible for being a discussion leader at least once during the semester. The discussion leader's role is to introduce the topic, provide background information about the subject, and encourage the group to offer comments and ask questions. Topics for discussion may be directly related to lecture material or may originate from current media sources, as long as that topic was already introduced in the BIOL 1104 class lecture or lab and the students have some familiarity with the subject.

BIOL - 1104 General Biology I, 4.00 Credits
Level: Lower
Applied Learning-Other, Course Fee $20.00, Gen Ed - Natural Sciences, Liberal Arts and Science
This course incorporates a survey of molecular, cellular, and hereditary principles. Topics include the chemistry and physics of cellular activities; the ultra-structure of cells, photosynthesis and cellular metabolism; the structure and function of DNA; recent developments in DNA bio-technology; and the basic aspects of genetic principles.

BIOL - 1113 Biology of Human Sexuality, 3.00 Credits
Level: Lower
Gen Ed - Natural Sciences, Liberal Arts and Science
This internet-based course studying human sexuality, approaches the subject from the perspective of health and the discipline of biology, with attention given to the historical and contemporary perspectives concerning the topic. Reproductive anatomy is examined, along with the physiological response of sexual arousal. The events of fertilization, pregnancy and childbirth are studied along with examples of the contraceptives used to prevent it. Puberty and sexual development is considered and the role of biology is examined in the areas of gender, sexuality, attraction and love. The course concludes with an overview of common sexual difficulties, a study of sexually transmitted diseases and defines the acts of rape and sexual assault.

208
BIOL - 1114 Human Anat & Physiology I, 4.00 Credits
Level: Lower
Gen Ed · Natural Sciences, Liberal Arts and Science
This is a lecture and lab based online course that is the first in a two-semester sequence, including laboratory components, that covers the structure and function of the human body. General study covers the organization, covering, support, and movement of the body. Topics include an orientation to the human body, chemistry of life, cells and tissues, and the integumentary, musculoskeletal, nervous, and sensory systems.

BIOL - 1133 Marine Biology, 3.00 Credits
Level: Lower
Applied Learning Into/Dom Trvl, Liberal Arts and Science
This course focuses on the biology of organisms residing in the sea, from the diversity of planktonic communities to marine megafauna, taking into consideration the ecological principles that govern marine life. The course aims to provide a solid educational background in basic and applied marine biology. Emphasis will be placed on marine environment issues and the adaptive and evolutionary mechanisms of organisms that allow them to occupy marine habitats. In particular, the Mediterranean Sea will play a central role in the course subjects, profiling from the availability of unique ecosystems and a nearby renowned marine research institute to conduct thematic field trips and practical tutorials.

BIOL - 1233 Introduction to Forestry, 3.00 Credits
Level: Lower
Applied Learning-Field Study, Course Fee $3.00, Gen Ed · Natural Sciences, Liberal Arts and Science
This course is designed to familiarize students with the sustainable management of New York hardwood forests. Students are introduced to the history of forests and forestry practices in North America and New York State, as well as basic tree biology, silvicultural systems, and forest management. Major emphases are placed on practical management strategies for maintaining and developing wood lots and farm forests for a variety of desired outcomes, including timber, fuel, conservation control, and wildlife habitat. The financial aspects of various forestry strategies also are discussed. As part of the practical component of the course, students will be required to complete a detailed forest management plan.

BIOL - 1304 Botany, 4.00 Credits
Level: Lower
Applied Learning-Other, Course Fee $10.00, Gen Ed · Natural Sciences, Liberal Arts and Science
Each of us is intimately involved with plants. We wear them, ingest them, exchange gas molecules with them, live under them, etc. In this course students will develop knowledge of plant morphology (form) and function that later enhances their lives. Topics include the study of human food, ornamental plants, feed, forestry, and any other use of plants to sustain life on the planet Earth or provide other ecosystem services. The laboratory portion of the course includes field ecology and classification of important plant groups in addition to morphological and anatomical study of the major plant organs. Use of the laboratory, the college farm, field trips, and the plant science greenhouse integrates various teaching methods for the above subjects.

BIOL - 1313 Nutrition, 3.00 Credits
Level: Lower
Gen Ed · Natural Sciences, Liberal Arts and Science
This course is intended for both the science and non-science major. Coverage will include the fundamental biochemical aspects of the essential nutrients and their effects when consumed in less than recommended or excessive amounts. These nutritional facts will help answer some of the questions brought forward concerning the relationship between food and heart disease, weight control, preservatives, cancer, athletic performance, vegetarianism, pregnancy and lactation, just to name a few. Beyond these facts will be the understanding of the non-nutrient characteristics of food as related to culture, family and society. Most importantly, this course will provide the tools necessary to properly evaluate the purchase and preparation of nutritious foods via personal assessment.

BIOL - 1404 Anatomy & Physiology I, 4.00 Credits
Level: Lower
Applied Learning-Other, Course Fee $12.00, Gen Ed · Natural Sciences, Liberal Arts and Science
This course is the study of the gross and microscopic anatomy of various human systems, emphasizing how structure facilitates function. The areas emphasized are: basic anatomical and directional terminology; fundamental concepts and principles of cell biology; histology; the integumentary system; the nervous system and special senses; the skeletal system; and the muscular system.

BIOL - 2111 Biological Sciences Seminar, 1.00 Credit
Prerequisite(s): BIOL 1101 with D or better and BIOL 2204 with D or better and CHEM 2894 with D or better
Level: Lower
Applied Learning-Creative Work
This course is intended for students typically in their fourth semester of the two-year Biological Sciences curriculum. The course is designed to prepare the student for transfer to a four-year institution and/or enter the workforce. Students are introduced to the historical, ethical and practical aspects of preparing and delivering a full-feature (40-45 minute length) presentation on a given topic within the realm of a biological discipline.

BIOL - 2204 General Biology II, 4.00 Credits
Prerequisite(s): BIOL 1104 with D or better
Level: Lower
Applied Learning-Other, Course Fee $15.00, Gen Ed · Natural Sciences, Liberal Arts and Science
A continuation of BIOL 1104 (General Biology I), with emphasis on animal and plant systematics, evolution and ecology. Laboratory topics include the study of the following mammalian organ systems: digestion, respiration, circulation, homeostasis, reproduction, chemical and nervous control, and musculoskeletal structure and function. Lecture topics include systematics, evolution, ecosystems, and biogeography, including human impacts on the environment.

BIOL - 2214 Human Anat & Physiology II, 4.00 Credits
Prerequisite(s): BIOL 1114 with C or better or BIOL 1404 with C or better
Level: Lower
Liberal Arts and Science
The second in a two-semester Internet-based course sequence, including laboratory components, that covers the structure and function of the human body. General issues include the maintenance of the human body, pregnancy, human development and heredity. Topics include the endocrine, cardiovascular, lymphatic, immune, respiratory, digestive, urinary, and reproductive body systems.

BIOL - 2301 Human Biology Laboratory, 1.00 Credit
Prerequisite(s): BIOL 2303 with D or better *
Level: Lower
Applied Learning-Other, Course Fee $24.00, Liberal Arts and Science
This course is a group of laboratory exercises to aid in the study of human systems and their physiology. The laboratory sessions are designed to provide students with a basic understanding of the structure and functions of cells, tissues, organs and systems. The goals of the course are to promote an appreciation for the remarkable complexity of our bodies, to develop a proficiency in the use of laboratory equipment and the proper handling of materials, and to foster the development of self-sufficiency in the conduct of laboratory experiments and observations. This course is to be taken either concurrent with, or following completion of, BIOL 2303.

BIOL - 2303 Human Biology, 3.00 Credits
Level: Lower
Gen Ed · Natural Sciences, Liberal Arts and Science
An introduction study of human systems and their physiology. Included in the course are examination of how the body normally functions at the cellular, tissue, organ system levels. Topics will include basic chemistry, cell structure and biochemistry, digestion, circulation and blood, immunity, respiration, excretion, nervous integration, senses, endocrine system, and reproduction. Sexually transmitted diseases also will be discussed. Students cannot receive credit for BIOL 2303 if BIOL 1404 or BIOL 1114 is concurrently or previously taken.

BIOL - 2504 Anatomy & Physiology II, 4.00 Credits
Prerequisite(s): BIOL 1404 with D or better
Level: Lower
Applied Learning-Other, Course Fee $17.00, Gen Ed · Natural Sciences, Liberal Arts and Science
This course is a continuation of Anatomy and Physiology I (BIOL 1404). It is a study of the gross and microscopic anatomy of various human systems, emphasizing how structure facilitates function. The areas emphasized are the endocrine, cardiovascular, lymphatic, immune, respiratory, digestive, urinary, and reproductive systems.

BIOL - 2633 Histotechnology, 3.00 Credits
Prerequisite(s): BIOL 1104 with D or better or BIOL 1404 with D or better or BIOL 1114 with D or better or ANSC 1214 with D or better or VENTS 2014 with D or better
Level: Lower
Course Fee $129.00
An applied and theoretical technology course which provides instruction and hands-on experiences in the preparation of tissues for microscopic examination by paraffin, and frozen section and smear techniques. Normal and diseased animal and plant tissues will be used to provide the students an opportunity to use a variety of techniques involved in processing tissues. Tissue identification and classification will be used as preparation procedures. Care, maintenance, and use of instrumentation in tissue preparation will be stressed. One-hour lecture and two 2-hour laboratories per week with significant additional supervised time spent in the lab by students.

BIOL - 2801 Environmental Sciences Lab, 1.00 Credit
Prerequisite(s): BIOL 2803 with D or better *
Level: Lower
Applied Learning-Field Study, Course Fee $96.00, Liberal Arts and Science
This course is a series of field-oriented laboratory experiences involving analyses of various local ecosystems. Topics to be stressed include identification of organisms, use of environmental monitoring equipment, and collection and interpretation of field data.

BIOL - 2803 Environmental Science, 3.00 Credits
Level: Lower
Gen Ed · Natural Sciences, Liberal Arts and Science
This course is an introduction to the science of ecology and the interrelationship between humans and their environment. The physical environment of the Earth's climate, geographic and geologic systems, and the cycling of minerals and water are described. The biology of populations, species, ecosystems and biomes section deals with organisms and their interactions with one another and their environment. The world's human populations, and their role in the ecosystems is investigated including the history of human populations, current demographic trends, and projected future population parameters. The impacts of human populations on the environment are covered as well.

BIOL - 2833 Environmental Science, 3.00 Credits
Level: Lower
Applied Learning-Other, Gen Ed · Natural Sciences, Liberal Arts and Science
This course provides an introduction to the science of ecology and the interrelationship between humans and their environment. The physical environment of the Earth's climate, geographic and geologic systems, and the cycling of minerals and water are described. The biology of populations, species, ecosystems and biomes section deals with organisms and their interactions with one another and their environment. The world's human populations, and their role in the ecosystems is investigated including the history of human populations, current demographic trends, and projected future population parameters. The impacts of human populations on the environment are covered as well. The course also includes a series of field-oriented laboratory experiences involving analyses of various local ecosystems. Topics stressed in the laboratory portion of the course include the identification of organisms, the use of environmental monitoring equipment and the collection and interpretation of field data.

BIOL - 3403 Essentials - Pathopharmacology, 3.00 Credits
Prerequisite(s): ( BIOL 1114 with C or better or BIOL 1404 with C or better ) and MEDR 1333 with C or better and ( BIOL 2214 with C or better or BIOL 2504 with C or better )
Level: Lower
This is a lecture-based online course which introduces students to the basics of pharmacology, pathopharmacology, and the pharmacologic agents that are utilized in the treatment of diseases. By the end of the course, students will have been exposed to pathophysiology of the different organ systems, including concepts of pharmacology, regulatory agencies and legislation, and review of pharmacologic agents utilized to treat specific diseases.
BIOL - 4003 Pathophysiology, 3.00 Credits
Prerequisite(s): BIOL 2214 with C or better
Level: Upper
This course is designed to provide an introductory survey to the various microorganisms, prions, viruses, bacteria, protozoans, and multicellular parasites, their structures, physiology, identification, with the various medical and non-medical implications in our daily lives. Lecture topics include prokaryotic cell structure and function, biochemical processes, physical and chemical factors that affect cell growth, classification and identification, physical and chemical methods of control. A major portion of the course deals with the pathogenic properties of microorganisms and the body's defense mechanisms including the functions of the immune systems. Laboratory topics include bacterial culture and staining, metabolism and biochemical reactions, physiological characteristics, patient specimen collection and processing as done in a microbiology laboratory and pathogen identification and antibiotic sensitivity determination.

BIOL - 5254 Principles of Microbiology, 4.00 Credits
Prerequisite(s): ( BIOL 2024 with C or better or BIOL 2504 with C or better ) or ( VETS 2013 with C or better or VETS 2014 with C or better or VETS 1203 with C or better ) or VETS 1214 with D or better ) or ( BIOL 1104 with C or better or BIOL 1404 with C or better )
Level: Upper
A survey of microorganisms, their structures, physiology, and identification, with the various medical and non-medical implications in our daily lives. Topics include prokaryotic cell structure and function, biochemical processes, physical and chemical factors that affect cell growth, classification and identification, and physical and chemical methods of control. A major portion of the course deals with the pathogenic properties of microorganisms and the body's defense mechanisms including the functions of the immune systems. Laboratory topics include bacterial culture and staining, metabolism and biochemical reactions, physiological characteristics, patient specimen collection and processing as done in a microbiology laboratory and pathogen identification and antibiotic sensitivity determination.

BIOL - 5900 Directed Study, 1.00 TO 6.00 Credits
Level: Upper
Upper Level
A student may contract for one to six credit hours of independent study through an arrangement with an instructor who agrees to direct such a study. The student will submit a plan acceptable to the instructor and to the department chairperson. The instructor and student will confer regularly regarding the progress of the study.

BIOL - 6003 Molecular and Cell Biology, 3.00 Credits
Prerequisite(s): BIOL 6534 with D or better
Level: Upper
Liberal Arts and Science, Upper Level
This course will provide a firm foundation on the principles of modern molecular and cellular biology. The first half of the course will focus on the molecular structure and function of DNA, RNA, and proteins and the processes that allow these molecules to work together. The second half of the course will focus on the fundamental processes that enable cells to grow, move, and communicate as well as introduce the processes underlying tissue formation and cell death. During recitation the students will read and analyze primary journal articles, create a short oral presentation on a topic and submit a short "News and Views" article written for a general audience.

BIOL - 6113 Diet and Disease, 3.00 Credits
Prerequisite(s): ( BIOL 1313 with D or better or HLTH 1313 with D or better ) and ( BIOL 2504 with D or better or BIOL 2214 with D or better )
Level: Upper
Liberal Arts and Science, Upper Level
This course examines abnormal human physiology in a clinical context, with intent to develop specific intellectual skills related to nursing and other allied health professions. Pathophysiology is considered from a systemic perspective, with emphasis given to cellular abnormalities, disruptions of homeostasis, infectious disease, inflammation and disorders of the blood, immune, cardiovascular, respiratory, digestive, endocrine, neurological, musculoskeletal, integumentary, renal, genitourinary, and reproductive systems. The course concludes with case studies presentations to allow students to derive and analyze correlations among clinical healthcare or other related disciplinary settings.

BIOL - 6534 Genetics, 4.00 Credits
Prerequisite(s): BIOL 1104 with C or better or BIOL 1304 with C or better or BIOL 1404 with C or better or VETS 1214 with C or better
Level: Upper
Liberal Arts and Science, Upper Level
This course focuses on the development of advanced practical skills, competencies, and knowledge in laboratory techniques commonly used across the biological sciences in research and industry. It is based on a "hands on" approach where all students undertake a variety of practical exercises derived principally from the areas of DNA science, cellular biology, protein analysis and tissue preparation. This course requires the student to use appropriate professional laboratory protocols that will lead to advanced study and employment.

BIOL - 7723 Research Methods in Health Sci, 3.00 Credits
Prerequisite(s): BIOL 2024 with C or better and CHEM 4524 with C or better
Level: Upper
Liberal Arts and Science, Upper Level
This course familiarizes the student with laboratory protocols, safety, and experimental design. It covers searching for, reading, writing, and presenting scientific literature. Students also learn skills for exploring and obtaining careers in the health professions.

BCLT - 1002 Intro to Construction Safety, 2.00 Credits
Level: Lower
This course explores the safety hazards associated with the construction trades. Part of this course will follow the training requirements set forth by the Occupational Safety & Health Administration (OSHA) Construction Safety Outreach Program, including OSHA's Focus Four Hazards, personal protective equipment, and hazard control in construction. During this course, students may have the opportunity to obtain an OSHA 10 card for the construction industry. Students will develop an understanding of construction safety beyond basic OSHA 10 industry training.

210
of drywall and concealing fasteners and joints (finishing) drywall. Students learn of various tools and fasteners related to the industry.

**BLCT - 2206 Building Construction Lab II, 6.00 Credits**
Prerequisite(s): BLCT 1206 with D or better
Level: Lower
Applied Learning-Practicum, Course Fee $93.00
This hands-on applied learning lab is a continuation of skills learned in BLCT 1206. It will include the application of practices used in residential and light commercial construction and wood fabrication. Students will learn to safely set up and operate stationary power tools as well as construction equipment commonly used on the job site. Students will develop the ability to interpret construction drawings and assemble projects based on shop drawings and models. There will be continued advancement in the application of residential and light commercial building practices. This course will have an emphasis on interior and exterior systems. Subject matter will include masonry, residential wall systems, and shop fabrication. Much of the lab will be conducted on genuine construction job sites. Throughout the semester, students will be required to demonstrate learned competency through a series of proficiency assessments.

**BLCT - 2211 Exterior Building Envelope, 2.00 Credits**
Level: Lower
This course provides the student with basic knowledge of windows, doors, and weather resistant barriers in residential construction. Subject matter will include applicable terminology, comparisons, and installation methods. Attention will be given to proper flashing techniques, code requirements, and associated condensation issues inside conventional wall systems. A survey of developing technologies in wall systems will also be conducted.

**BLCT - 2232 Siding and Cornices, 2.00 Credits**
Level: Lower
This course provides the student with basic knowledge of siding and cornice systems in residential construction. Subject matter will include applicable terminology, comparisons of various siding and cornice systems, and installation methods. Emerging technologies in exterior cladding systems will also be covered.

**BLCT - 2242 Wood Products & Fabrication, 2.00 Credits**
Level: Lower
This course covers basic construction communication through residential print reading. Students will learn how to perform material takeoffs and apply costs based on construction drawings. The course will also cover common scales, symbols, line types, and abbreviations used in construction drawings. Basic construction drafting principles will be introduced. The course will familiarize students with the purpose of building codes and zoning laws and how they are demonstrated in a set of working drawings for a house.

**BLCT - 2262 Masonry, 2.00 Credits**
Prerequisite(s): BLCT 1212 with D or better
Level: Lower
This course covers the installation of masonry, its tools and materials, and the use of labor skills utilized in the masonry industry. Throughout the semester, students will be required to demonstrate learned competency through a series of proficiency assessments.

**BLCT - 2202 Insulation and Drywall, 2.00 Credits**
Level: Lower
This course is an introduction to thermal and acoustical insulation, condensation and required ventilation in residential building. This course also includes drywall products and installation of drywall and concealing fasteners and joints (finishing) drywall. Students learn of various tools and fasteners related to the industry.
COURSE DESCRIPTIONS

BLCT - 2332 Operations - Part II, 2.00 Credits
Prerequisite(s): BLCT 2331 with D or better
Level: Lower
This course continues the study of tractors, dump trucks, and front-end loaders. Safe operation practices as well as preventive maintenance requirements will be covered for each piece of equipment. Common uses of each piece of equipment and their attachments will also be discussed.

BLCT - 2342 Soils, 2.00 Credits
Level: Lower
This course describes basic soil classification methods, details factors affecting classification, and presents soil density and compaction requirements for highway and building construction.

BLCT - 2352 Compaction & Stabilization, 2.00 Credits
Level: Lower
This course presents the use, safe operation, and specialization of compaction equipment to include pneumatic tire compactor, steel-wheel compactor, vibratory compactor and sheepfoot compactor. The use of compaction and stabilization equipment for leveling and compacting soils, compacting cement and asphalt will be explained and demonstrated. A discussion of soil stabilization methods and erosion control methods will be included.

BLCT - 3302 Blueprint Reading & Grades III, 2.00 Credits
Prerequisite(s): BLCT 2312 with D or better
Level: Lower
This course covers the equipment and supplies required to perform structural work. Discussions include the following topics: bridge types and materials, bridge substructures, bridge superstructures, structural concrete and structural steel. Reading and interpreting site plans will also be reinforced.

BLCT - 3306 Heavy Equipment Lab III, 6.00 Credits
Prerequisite(s): BLCT 2336 with D or better
Level: Lower
Applied Learning-Practicum
This course builds on the content of HEQ lab part II. Additional highway and bridge construction techniques, as well as advanced pieces of heavy equipment will be introduced. Labs will include practice with record keeping, estimation and project management.

BLCT - 3312 Introduction to Grading, 2.00 Credits
Level: Lower
This course contains information using various grading instruments and tools. A laser level, engineer's level, and GPS are used to establish grades for surface and sub-surface construction sites. Students will place and correctly mark appropriate grades stakes used at industry standard work sites.

BLCT - 3322 Advanced Operations, 2.00 Credits
Prerequisite(s): BLCT 2322 with D or better
Level: Lower
This course presents the use, safe operation, and maintenance of excavators, trucks, and trailers. The course content will explain and demonstrate the use of excavators in ditching, grading, and slope-finishing operations, describing various operating techniques, and describes the types of trucks used in highway/bridge construction; these include rigid frame trucks, such as dump trucks, trans-mix trucks, and tractor-trailer trucks. The trailers discussed include bulk haulers and flatbed trucks. Truck controls and components, preventive maintenance and operation, and required licensing regulations are also covered. This course will continue to reinforce the operation of backhoes, bulldozers, and front-end loaders.

BLCT - 3332 Highway Surfaces, 2.00 Credits
Level: Lower
This course includes the processing, preparation and application of asphalt and concrete to a highway surface. Also covered is the operation of asphalt pavers and all equipment required to perform paving and concrete applications.

BLCT - 3342 Construction Proj Supervision, 2.00 Credits
Level: Lower
This course will discuss the principles of project planning, scheduling, estimating, and management. The student will practice different roles and skills required for supervising personnel. Students will be required to understand and utilize computer-based applications during the course.

BLCT - 3352 Tracked Finishing & Grading, 2.00 Credits
Level: Lower
This course includes the use of tracked equipment used in the process of finishing and grading of a construction site. Types of equipment available, proper selection and operating techniques will be discussed.

BLCT - 3413 Blueprint Reading-Bldg Construct, 3.00 Credits
Corequisite(s): Level: Lower
This course covers instruction in blueprint reading, concentrating on plumbing blueprints, building blueprints, and instruction in the use of the architect's scale for taking measurements. The course covers all components of a wood frame structure including foundations. Students will be taught the proper installation of piping and fixtures so as not to jeopardize the building's structural integrity.

BLCT - 3423 Pipe Fitting - Math Estimating, 3.00 Credits
Corequisite(s): Level: Lower
This course covers basic math and materials estimating the plumbing trades. Pipe fitting math is practiced and applied to ensure proper plumbing drainage, as well as water and gas line pipe length installations. Material lists and job estimating is also taught as it pertains to various plumbing systems and fixtures. The students are given instruction on materials mark up for profit, proper customer billing, and required income and sales tax as it pertains to a self-run plumbing business.

BLCT - 3433 Cop Pipe & Tub, Water Sys Des, 3.00 Credits
Corequisite(s): Level: Lower
This course covers the study and installation of various types of copper pipe and tubing and proper methods of joining. Also includes instruction on fitting use and proper code applications. The methods of testing potable water lines are also covered.

BLCT - 3443 Drainage Systems & Piping, 3.00 Credits
Corequisite(s): Level: Lower
Applied Learning-Practicum
This course covers the instruction in the design, joining, installation, and proper application of various types of drainage piping used in drainage and venting systems. Also covered will be instruction and study of public and private sewage systems, their make-up, various aspects of troubleshooting and maintenance.

BLCT - 3453 Plumb Trade History & Safety, 3.00 Credits
Level: Lower
This course covers the study of safety practices and OSHA training related to the plumbing trades. All students obtain a 10-hour OSHA training card upon successful completion of the course. The history of plumbing and how plumbing systems and codes originated is covered. This course also covers the instruction in the proper use, care, use, and application of various hand and power tools used in the plumbing trade.

BLCT - 3463 Watr Heats-Plumb Fix Inst/Rpr, 3.00 Credits
Corequisite(s): Level: Lower
This course covers the instruction and study of selection and installation of water heaters for industry standards. Instruction is also given on gas and electric water heater troubleshooting and repairs. This course also covers the instruction of plumbing fixture specifications and installation. Fixture troubleshooting and repair is also covered in this course.

BLCT - 3473 Heating Fuels-Comb Theo&Troub, 3.00 Credits
Prerequisite(s): BLCT 3453 with D or better
Level: Lower
This course is an introduction to the various fuels used in the heating trades and the methods of converting fuels for various applications. The theory of combustion and combustion troubleshooting is also covered in the course. Common forced air furnace parts and components are discussed and various manufactured retrofit products are applied. This course also includes basic wiring of conventional forced air furnaces and principles and troubleshooting of furnace electronic ignition.

BLCT - 3483 Electrical Fundamentals, 3.00 Credits
Prerequisite(s): BLCT 3453 with D or better
Level: Lower
The objective of this course is to develop knowledge of electricity and the units used to describe and measure it. The course will also show how different types of electrical circuits function and what different electrical components do in those circuits. Special emphasis is placed on temperature controls and switching. Elementary wiring diagrams are introduced.

BLCT - 3493 Forced Air Furnace Controls, 3.00 Credits
Prerequisite(s): BLCT 3453 with D or better
Level: Lower
The objective of this course is to develop skills in the installation and service of electrical components of gas and oil forced air furnaces. This includes gas standing pilot and electronic ignition systems. It applies to both 80% and 90% efficient furnaces including those with integrated circuit boards.

BLCT - 3503 Hydro Comp, Circ Pump&HT Emit, 3.00 Credits
Prerequisite(s): BLCT 3453 with D or better
Level: Lower
Applied Learning-Practicum
The purpose of the course is to develop an understanding of piping materials, fittings and various components used in hydronic heating systems. This includes knowledge about types and performance of circulating pumps. Also included are heat emitters which have been used in the past and several new types which are currently gaining popularity.

BLCT - 3513 Hydronic Controls and Motors, 3.00 Credits
Prerequisite(s): BLCT 3453 with D or better
Level: Lower
This course introduces students to basic thermodynamic principles. The course will explore the advantages of hot water and steam heating, as well as the various types of boilers used in the industry.

BLCT - 3523 Hydronic Funda & Heat Sources, 3.00 Credits
Prerequisite(s): BLCT 3453 with D or better
Level: Lower
This course will introduce students to basic thermodynamic principles. The course will also discuss the various fuels used in the heating trades and the methods of converting fuels for various applications. The theory of combustion and combustion troubleshooting is also covered in the course. Common forced air furnace parts and components are discussed and various manufactured retrofit products are applied. This course also includes basic wiring of conventional forced air furnaces and principles and troubleshooting of furnace electronic ignition.

BLCT - 3532 Residential Remodel, 2.00 Credits
Level: Lower
This course covers the application of various piping materials, fittings and various components used in hydronic heating systems. This includes knowledge about types and performance of circulating pumps. Also included are heat emitters which have been used in the past and several new types which are currently gaining popularity.

BLCT - 3533 Hydronic Piping Systems, 3.00 Credits
Prerequisite(s): BLCT 3453 with D or better
Level: Lower
The objective of this course is to develop an understanding of various piping systems used in hydronic heating systems including series loop, one pipe two pipe (direct and return return) and primary-secondary piping. The course will also cover the applications and installations available for a variety of radiant heating systems.

BLCT - 3602 Residential Remodel, 2.00 Credits
Level: Lower
This course also covers the evaluation of overall conditions found in existing buildings. Students will learn about the construction techniques used in remodeling and how they differ from new construction. This will include the process of identifying and handling hazardous materials, historical framing styles, and replication of existing interior and exterior trim.
BLCT - 3606 Building Construction Lab III, 6.00 Credits
Prerequisite(s): BLCT 2206 with D or better
Level: Lower
Applied Learning Practicum
This hands-on applied learning lab is a continuation of skills learned in BLCT 2206. Specific subject matter will include advanced framing principles, interior and exterior details, and roofing systems. Students will participate in a remodeling project where they will use critical thinking skills to apply understanding that was developed in previous courses. There will be continual advancement in construction estimating and print reading, and work with computer aided drafting and design. Much of the lab will be conducted on genuine construction job sites. Throughout the semester, students will be required to demonstrate learned competency through a series of proficiency assessments.

BLCT - 3612 Roofing Systems, 2.00 Credits
Level: Lower
This course will cover the theory and application of different roofing materials and techniques for residential and commercial construction. Emphasis is placed on basic principles of step flashing and water proofing for all types of roofing systems.

BLCT - 3622 Advanced Print-reading & Estim, 2.00 Credits
Prerequisite(s): BLCT 2252 with D or better
Level: Lower
This course gives specific information on the contractor's role in preparing quantity take-off estimates for final bid offerings. The course will build from the foundational information given in Introduction to Print Reading and Estimation (BLCT 2252). Students will learn the full extent of all contract documents, with an emphasis on drawing and reading blueprints, understanding building codes, identifying symbols, and gaining a full understanding of the specifications for a given project.

BLCT - 3632 Exterior Construction Details, 2.00 Credits
Level: Lower
This course covers the methods used in the construction and installation of residential exterior elements. The course content includes the construction of porches, decks, patios, and breezeways. Students will learn about exterior elements such as flooring/decking materials, different types of entrance doors and their installation, garage doors, pier footings, metal roofing systems, rain systems and structural supports, as well as building code requirements for these systems.

BLCT - 3642 Interior Trims, 2.00 Credits
Level: Lower
This course is a survey of the skills necessary to perform quality installation and fabrication of interior trim, doors, windows, and stair components. Course work also includes the design, fabrication, and installation practices of closet shelving.

BLCT - 3652 Advanced Framing, 2.00 Credits
Prerequisite(s): BLCT 1242 with D or better
Level: Lower
This course will cover the theory and application of framing techniques in residential and light commercial construction. Emphasis will be placed on basic framing principles and development of skills used in construction operations to safely perform layout, measurement, cutting, and installation processes. This hands-on applied learning lab will include the masonry elements of brick, CMU, stone, pavers and concrete flatwork as related to masonry construction. The lab experience will include the proper and safe erection of scaffolding. Throughout the semester students will be required to demonstrate learned competency through a series of proficiency assessments.

BLCT - 3712 Building Stone, 2.00 Credits
Prerequisite(s): BLCT 2262 with D or better
Level: Lower
This course presents to the student the proper knowledge, techniques, and tool and equipment use to construct stonewall, facades and building elements of natural and cast stone.

BLCT - 3722 Fireplace & Hearth Oven Design, 2.00 Credits
Prerequisite(s): BLCT 2262 with D or better
Level: Lower
This course presents the proper knowledge and techniques to construct site-built fireplaces and hearth ovens. The course will also cover the installation of various refractory products.

BLCT - 3732 Masonry Restoration, 2.00 Credits
Prerequisite(s): BLCT 2262 with D or better
Level: Lower
This course covers the knowledge and techniques to analyze, prepare and restore deteriorated or damaged masonry. Cleaning, caulking and tuck-pointing are included in this course.

BLCT - 3742 Sustainability w/Masonry Const, 2.00 Credits
Prerequisite(s): BLCT 2262 with D or better
Level: Lower
This course presents to the student the proper knowledge to install sustainable masonry paving and wall systems. Sustainable masonry products can contribute to a longer life cycle of a building, as well as the safe occupancy and use of a building. Run-off reducing permeable paving systems are included in this course.

BLCT - 3752 All Weather Masonry, 2.00 Credits
Prerequisite(s): BLCT 2262 with D or better
Level: Lower
This course covers the proper knowledge, planning, mobilization and techniques to construct masonry in cold/freezing weather and the extremes of hot weather.

BLCT - 4002 Below Grade Construction, 2.00 Credits
Level: Lower
This course discusses the below grade construction processes that are necessary to perform highway/heavy construction. Excavation support systems, excavation safety, underground piping materials and fittings, joining methods for underground pipe, box culverts, and catch basins are covered.

BLCT - 4143 Basic House Wiring-Forec Air, 3.00 Credits
Prerequisite(s): BLCT 3453 with D or better
Level: Lower
Course Fee $13.00
This course offers instruction and application of basic house wiring and theory. The student is also introduced to the heating trade and to the theory of proper furnace installation. Reasons for human comfort and discomfort as it pertains to forced air heat are discussed. Troubleshooting of disturbing and distressing noises and conditions as well as indoor air quality is also covered in this course.

BLCT - 4153 Sheet Metal Fabrication, 3.00 Credits
Prerequisite(s): BLCT 3453 with D or better
Level: Lower
Course Fee $24.00
This course covers the installation and application of various materials of the sheet metal trade. Students are also instructed in the forming and use of different seams and edges required for various applications. Instruction and proper application of methods of joining sheet metal such as riveting, welding, brazing, and soldering is also covered.

BLCT - 4163 Mid & Hi Effy Furn-Air Warm Ar, 3.00 Credits
Prerequisite(s): BLCT 3453 with D or better
Level: Lower
This course further develops concepts introduced in BLCT 2252. The student will be introduced to different sheet metal types and their proper applications as perimeter, area, and volume is also included in this course.

BLCT - 4183 Sheet Metal Trade Safety, 3.00 Credits
Prerequisite(s): BLCT 3453 with D or better
Level: Lower
This course covers instruction in the proper use and application of various hand and power tools used in the sheet metal trade. Sheet metal trade and tool safety is also covered in this unit. Students will be introduced to different sheet metal types and their proper applications as well as mechanical drawing. Students will develop and lay out patterns for sheet metal to be cut and formed.

BLCT - 4173 Sheet Mtl Air Dist System &Vnt, 3.00 Credits
Prerequisite(s): BLCT 3453 with D or better
Level: Lower
This course presents the theory and application of framing techniques in residential and light commercial construction. Emphasis will be placed on basic framing principles and development of skills used in construction operations to safely perform layout, measurement, cutting, and installation processes. This hands-on applied learning lab will include the masonry elements of brick, CMU, stone, pavers and concrete flatwork as related to masonry construction. The lab experience will include the proper and safe erection of scaffolding. Throughout the semester students will be required to demonstrate learned competency through a series of proficiency assessments.

BLCT - 4203 Air Cond Components & Install, 3.00 Credits
Level: Lower
Students will learn about air conditioning components and accessories. Students will learn how to install air conditioning including pressure testing, evacuation, and charging.

BLCT - 4213 Air Conditioning Fundamentals, 3.00 Credits
Level: Lower
This course teaches the fundamentals of air conditioning and how the components of the system work together to perform the cooling process. This includes an examination of types of systems, and detailed look at the types and performance of evaporators and compressors.

BLCT - 4223 Air Cond Perf & Trou & Hi Pmp, 3.00 Credits
Level: Lower
This course teaches electrical and mechanical troubleshooting capabilities that are usable in real life applications. Students will also study heat pumps and a variety of applications in which they are feasible.

BLCT - 4233 Heat Loss & Heat Gain, 3.00 Credits
Prerequisite(s): BLCT 3523 with D or better
Level: Lower
Students will determine the heat loss and heat gain in a residential or small commercial building, which would allow a technician to determine what size equipment and to select size heating and cooling ductwork and diffusers.

BLCT - 4243 Refrigeration Handling Cert., 3.00 Credits
Level: Lower
This course prepares students to take the EPA Refrigerant Handling Certification test.

BLCT - 4253 Residential Duct System Design, 3.00 Credits
Prerequisite(s): BLCT 4233 with D or better
Level: Lower
This course covers the proper evaluation and installation of mid and high efficiency furnaces. Fuel oil burner breakdown, maintenance, and installations are covered in this course. Instruction is given on the proper sizing and installation of natural gas and propane gas distribution pipelines. Alternates warm air heating systems, types, and installations are also taught. Proper trade practices of the HVAC technician, heat system analysis, and maintenance are also covered in this course.

BLCT - 4302 Basic CAD-Residential Drawing, 2.00 Credits
Prerequisite(s): BLCT 3523 with D or better
Level: Lower
This course will cover the instruction and the application of various materials of the sheet metal trade. Students are also instructed in the forming and use of different seams and edges required for various applications. Instruction and proper application of methods of joining sheet metal such as riveting, welding, brazing, and soldering is also covered.

BLCT - 4323 Heat Loss & Heat Gain, 3.00 Credits
Prerequisite(s): BLCT 3523 with D or better
Level: Lower
This course will cover the theory and application of different roofing materials and techniques for residential and commercial construction. Emphasis is placed on basic principles of step flashing and water proofing for all types of roofing systems.

BLCT - 4363 Mid & Hi Effy Furn-Air Warm Ar, 3.00 Credits
Prerequisite(s): BLCT 3453 with D or better
Level: Lower
This course further develops concepts introduced in BLCT 2252. The student will be introduced to different sheet metal types and their proper applications as perimeter, area, and volume is also included in this course.

BLCT - 4383 Sheet Metal Trade Safety, 3.00 Credits
Prerequisite(s): BLCT 3453 with D or better
Level: Lower
This course covers instruction in the proper use and application of various hand and power tools used in the sheet metal trade. Sheet metal trade and tool safety is also covered in this unit. Students will be introduced to different sheet metal types and their proper applications as well as mechanical drawing. Students will develop and lay out patterns for sheet metal to be cut and formed.

BLCT - 4403 Basic CAD-Residential Drawing, 2.00 Credits
Prerequisite(s): BLCT 3622 with D or better
Level: Lower
This course is a survey of the skills necessary to perform quality installation and fabrication of interior trim, doors, windows, and stair components. Course work also includes the design, fabrication, and installation practices of closet shelving.

BLCT - 4535 Residential Duct System Design, 3.00 Credits
Prerequisite(s): BLCT 4233 with D or better
Level: Lower
This course focuses on the principles of heat transfer and energy conservation. Emphasis is placed on the proper selection, installation, and operation of heating and cooling systems for residential and commercial applications. Course work will include the evaluation of existing systems and the design of new systems. Students will use computer-aided drafting (CAD) techniques. This course utilizes AutoCAD, incorporating the student's knowledge of blueprint reading and the use of computer-aided design software to create detailed drawings. Topics covered include the design of heating and cooling systems, ductwork layout and sizing, and the selection and installation of HVAC equipment. Manual skills and the use of hand tools are also emphasized.
BLCT - 4303 Interior Surfaces, 3.00 Credits  
Prerequisite(s): BLCT 3306 with D or better  
Level: Lower  
This course covers the installation of finished ceiling, floor, and wall materials as well as the principles of stair building. The student will install floor and wall materials as well as calculate, cut, and assemble stair parts in the laboratory.

BLCT - 4306 Building Construction Lab IV, 6.00 Credits  
Prerequisite(s): BLCT 3306 with D or better  
Level: Lower  
Applied Learning-Practicum  
This hands-on applied learning lab is a continuation of skills learned in Building Construction Lab III. Subject matter expands on an understanding of construction systems within the carpentry discipline and links other aspects of the construction industry to better prepare students for the job market. Students will produce a finish-quality cabinet, develop skills in the installation of interior finishes, and learn about mechanical systems to include electrical and plumbing. Students will also explore career paths in the construction industry which may include commercial construction, green building, small business ownership, and more. Much of the lab will be conducted on genuine construction job sites. Throughout the semester, students will be required to demonstrate learned competency through a series of proficiency assessments.

BLCT - 4332 Green Building & Bldg Science, 2.00 Credits  
Level: Lower  
This course is an introduction to the concepts of green building and building sciences, which includes alternative building techniques designed to allow building practices that result in energy efficient, healthier and economically sustainable buildings. Students will learn about alternative sources of heating and cooling, electricity, water, and energy efficient technology. Students will employ critical thinking skills in the study of building science and learn the concepts behind moisture and thermal control and building envelope systems. Course content also includes study of energy efficiency rating systems such as LEED (Leadership in Energy and Environmental Design) and its impact on the current construction industry.

BLCT - 4342 Mechanical Systems, 2.00 Credits  
Level: Lower  
This course is the study of electrical, HVAC, and building systems to develop jobsite coordination and cooperation among various trades working at a construction site. Students will develop an understanding necessary to perform fundamental tasks with regard to electrical and plumbing.

BLCT - 4352 Interior Finishes, 2.00 Credits  
Level: Lower  
This course is the study of interior finishes used in the building trades. Students will learn terminology and techniques and employ critical thinking skills in the study of wall and ceiling finishes, ceramic tile, wood flooring and resilient tile. Study also includes finish cabinet installation as well as countertop installation, including plastic laminate, solid surface and granite tops. Safe handling of materials, tools and equipment will be included in this course of study.

BLCT - 4362 Cabinetry, 2.00 Credits  
Level: Lower  
This course introduces students to cabinet construction. Course content includes cabinet designs, components needed for fabrication, kitchen layouts, and cabinet installation. This course also explores a variety of countertop and how they are manufactured and installed.

BLCT - 4372 Timber Framing, 2.00 Credits  
Level: Lower  
This course will focus on the progression of timber framing traditions and practices from the Far East, Europe, and America. We will begin with an in-depth look at the centuries-old techniques employed in timber framing, and then follow the progression through braced-frame and balloon-frame buildings. Layout procedures covered and employed include scribe rule, centerline, and square rule. Specific engineering principles and appropriate joint design will be thoroughly covered.

BLCT - 4402 Wheeled Finishing & Grading, 2.00 Credits  
Level: Lower  
In this course students will learn how motor grader controls work and function at industry standards as well as the various types of controls for motor graders. Students will learn about wheeled dozers and their effects as well as various controls and types. Students will learn about wheeled excavators and how they are used in grading.

BLCT - 4406 Heavy Equipment Lab IV, 6.00 Credits  
Prerequisite(s): BLCT 3306 with D or better  
Level: Lower  
Applied Learning-Practicum  
Course Fee $136.00  
This applied learning lab builds off skills acquired in HEO Lab pt. III. Students will gain understanding of underground excavation and wiring, while graduating to a more complex pipe laying system. Students will be required to produce hands-on documentation and drawings and apply knowledge to real-world projects. Throughout the semester, students will be required to demonstrate learned competency through proficiency assessments.

BLCT - 4432 Advanced Safety, 2.00 Credits  
Level: Lower  
This course teaches advanced safety techniques and requirements for heavy equipment operators. Emphasis is placed on organizing and conducting safety meetings. OSHA hazardous material requirements and safe operation of equipment will be discussed. Safety reporting, inspections, and investigations will also be covered.

BLCT - 4442 Machine Control Technology, 2.00 Credits  
Level: Lower  
This course discusses advanced grading techniques utilizing both indicate and machine control technology. The use of the dual slope laser in conjunction with machine-mounted receivers will be reinforced. The course also describes the available technology and discusses its use in the field.

BLCT - 4482 Construction Entrepreneur, 2.00 Credits  
Level: Lower  
This course will explore entrepreneurial opportunities available in the construction industry. The course will include an overview of the basic requirements of ownership of a small business. Participants will focus on financial, law, regulation, permitting, insurance, and employee payroll will be discussed. In addition, students will study the relationships between general contractors, vendors, and sub-contractors.

BLCT - 4492 Commercial Construction, 2.00 Credits  
Level: Lower  
This course is a study of the methods used in commercial construction. Course study includes commercial print reading, foundations, structural practices, exterior and interior finishes, and roofing systems. Students will study different employment and career opportunities associated with the commercial construction industry. Students will engage critical thinking skills in the study of safety issues and how to correct them in relation to commercial construction.

BLCT - 4502 ACI Concrete Testing, 2.00 Credits  
Prerequisite(s): BLCT 3706 with D or better  
Level: Lower  
This course presents the student with the proper knowledge and techniques to perform American Concrete Institute (ACI) quality control field tests on freshly mixed concrete and masonry grout. Upon completion, the student may elect to take the ACI field technician exam provided by a qualified ACI examiner.

BLCT - 4506 Masonry Construction Lab IV, 6.00 Credits  
Prerequisite(s): BLCT 3706 with D or better  
Level: Lower  
Applied Learning-Practicum  
This course builds upon the skills learned in BLCT 3706 - Masonry Construction Lab III. Emphasis will be placed on advanced principles and further development of skills used in masonry construction operations to safely perform layout, measurement, cutting, and installation processes. This hands-on applied learning lab will include masonry and forming work on real-world projects and authentic constructions sites. Throughout the semester, students will be required to demonstrate learned competency through a series of proficiency assessments.

BLCT - 4512 Masonry Stairs & Ramps, 2.00 Credits  
Prerequisite(s): BLCT 3706 with D or better  
Level: Lower  
This course presents the student with the proper knowledge and techniques to build masonry and concrete stairs and ramps that comply with the applicable building codes.

BLCT - 4522 Hardscaping with Masonry, 2.00 Credits  
Prerequisite(s): BLCT 3706 with D or better  
Level: Lower  
This course presents the student with the proper knowledge and techniques to build outdoor masonry patios, walls, low-rise retaining walls, and outdoor kitchens with segmental retaining wall blocks, concrete and brick pavers and natural stone.

BLCT - 4532 Print Reading for Masonry, 2.00 Credits  
Prerequisite(s): BLCT 3706 with D or better  
Level: Lower  
This course presents the student with the proper knowledge and techniques to read, interpret, and navigate commercial building plans and shop drawings related to masonry construction.

BLCT - 4542 Masonry Sketching & Detailing, 2.00 Credits  
Prerequisite(s): BLCT 3706 with D or better  
Level: Lower  
This course presents the student with the proper knowledge, skill and techniques to produce simple sketches and/or shop drawings of masonry details as they pertain specifically to the masonry trade.

BLCT - 4552 Business Planning Masonry/Concrete, 2.00 Credits  
Prerequisite(s): BLCT 3706 with D or better  
Level: Lower  
This course presents the student with the general knowledge of bidding, evaluating production costs, and presenting a detailed, concise proposal to a customer. An introduction to recordkeeping and overhead cost is presented to the student.

BSET - BACHELOR OF SCI ENGR TECH  
BSET - 7001 Senior Seminar & Project Des, 1.00 Credit  
Prerequisite(s): COMP 3703 with D or better and SPCH 1083 with D or better and ( MECH 3334 with D or better or MCT 5004 with D or better )  
Level: Upper  
Applied Learning, Upper Level  
First of a two-semester sequence required for all mechanical engineering technology, electrical engineering technology, computer engineering technology and mechatronics technology Bachelor of Science seniors. Students will design and build a technical project to be continued in BSET 8003. This weekly seminar also deals with various aspects of post-graduation professional employment. Each student must complete a formal oral presentation. The project is subject to the department approval. Each student chooses or is assigned at least a project advisor, industry or faculty advisor.
BUAD - BUSINES ADMINISTRATION

BUAD - 1043 Occupational Experience, 3.00 Credits
Level: Lower
Applied Learning-Internship, Pass/Fail
This is a semester-long experience where a business student can gain hands-on work experience in a sponsor company. Students benefit from this employer-employee relationship as an extension of classroom theory/applications and learn to work within corporate rules/regulations as expected of a newly hired worker. Satisfactory completion of this training, as well as related assignments, is required.

BUAD - 1543 Grammar for Court Reporters, 3.00 Credits
Level: Lower
In this course, students will develop a high-level ability in spelling, vocabulary, sentence structure, word choice, capitalization and punctuation with direct application to business writing and speaking. This course encourages application of this knowledge through editing activities. Grammar practice will be given to developing positive, negative and persuasive messages, written and oral reports. Emphasis is also given to preparing students for the job search, application and interview process in the digital age as students complete professional LinkedIn profiles, business resumes, and mock interviews. Generational communication will be introduced through digital and written understanding.

BUAD - 2033 Business Communication, 3.00 Credits
Prerequisite(s): COMP 1503 with D or better
Level: Lower
Gen Ed - BC-COMP1503/BUAD2033, Gen Ed - BC-COMP3503/BUAD2033
Students will develop skills in communicating in the digital age workplace. In addition to learning fundamentals of communication theory and principles, special attention is given to the business writing process, preparing short workplace messages and digital messages, preparing positive, negative and persuasive messages, written and oral reports. Emphasis is also given to preparing students for the job search, application and interview process in the digital age as students complete professional LinkedIn profiles, business resumes, and mock interviews. Generational communication will be introduced through digital and written understanding.

BUAD - 3043 Business Law I, 3.00 Credits
Level: Lower
This course offers a general inquiry into the nature of law and the legal system in the United States. Areas covered include, but are not limited to, the different schools of jurisprudential thought, the Common Law Tradition, Alternative Dispute Resolution, court procedures, legal research and case citations. Special attention is given to Constitutional Law and business, Torts and Crimes, Intellectual Property and the Common Law of Contracts.

BUAD - 3114 Intl Tourism: Ital Food & Geog, 4.00 Credits
Level: Lower
This course offers an introduction to the nature of law and the legal system in the United States. Areas covered include, but are not limited to, the different schools of jurisprudential thought, the Common Law Tradition, Alternative Dispute Resolution, court procedures, legal research and case citations. Special attention is given to Constitutional Law and business, Torts and Crimes, Intellectual Property and the Common Law of Contracts. The course is relevant to students of all backgrounds but was designed specifically for students of hospitality, business, and culinary arts. Students will study international organizations operating in tourism (i.e., WTO) and the different types of tourism, with particular attention paid to sustainable tourism. Students will be asked to investigate the tourism geography of Italy, becoming familiar with the most important tourist sites in Italy and Campania (through several excursions). The third module of the course will be dedicated to a very important kind of tourism in Italy and of the Campania Region: Food and Wine Tourism. Students are expected actively participate and contribute to class discussion. Students will learn about marketing and/or sales activities such as marketing research and advertising, promotional campaign organization, and media relations connected with the promotion of tourism in Italy and Campania.

BUAD - 5111 Fundamentals of Management, 3.00 Credits
Level: Lower
This course deals with the skills necessary to become a manager. The students will develop an understanding of management theories and management skills through an examination of the basic functions of management. The concepts of planning, organizing, leading, and controlling a business organization are examined to show how these basic principles can be used to create a healthy and thriving organization in today's global environment. Special attention will be given to decision making, problem solving, and leadership in an environment where productively improvements are a major concern.

BUAD - 4004 Ess of Enterp & Sm Bus Mgmt, 4.00 Credits
Level: Lower
This course offers the student a step-by-step approach to starting a business. The course covers the fundamental principles of marketing, law, management, and office administration as applied to beginning a new venture. The class will be divided into teams that will prepare a comprehensive individual business plan to include a market profile, site analysis, competitive analysis, financials, goals and objectives, pricing and marketing strategies, and executive summary. A major focus of this course is to explore each step necessary in structuring and launching a new venture, and discussing ways of recruiting the necessary resources to accomplish this venture.

BUAD - 4053 Business Law II, 3.00 Credits
Level: Lower
This course is an examination of the law of sales, commercial paper, agency-employment relationships, business organizations and government regulation of same. Article 2 of the UCC is used in the sales area with special attention paid to contract formation, title and risk of loss, performance and present intent. In examining commercial paper, Article 3 of the UCC is referenced with emphasis on function and form, holders in due course and liability and discharge. Attention is also given to employer/employee relationships, and distinguishing between sole proprietorships, partnerships, limited liability partnerships and corporations. Finally, government regulation of business is examined, especially in the areas of anti-trust and restraint of trade.

BUAD - 4133 Investments, 3.00 Credits
Level: Lower
This course is designed to be an introductory course in investments. Topics covered are sources of information, establishing investment goals, investment returns and risks, time value of money, investing in common stocks, bonds, and mutual funds, tax aspects of investing, analysis of financial statements, portfolio management techniques, and introduction to futures and options.

BUAD - 4193 Insurance and Risk Management, 3.00 Credits
Level: Lower
This course will describe the techniques a financial planner/risk manager/consumer will use to analyze risk and assess alternate strategies for managing risk. The course begins by examining the pervasive nature of risk and its impact on both the individual and society. It also demonstrates the ways in which insurance can be used to deal with the problems posed by such risk. The course is designed to be consumer oriented with the main emphasis on the use of insurance within the risk management framework. The course can be useful in preparation for a career in the fields of life insurance, health and disability insurance, as well as property and casualty insurance.

BUAD - 4203 Intro Personal Financial Plan, 3.00 Credits
Level: Lower
Applied Learning-Practicum
This course is an introduction to personal finance covering those areas that are necessary for an individual to make better financial decisions throughout one's lifetime. Topics include: developing financial statements, plans, budgets, time value of money, money management, credit management, tax planning, insurance, investments, retirement planning, and estate planning. Computer, business calculator applications, and case studies will be used throughout the course. The creation of a comprehensive plan will be required.

BUAD - 4403 Business Computer Applications, 3.00 Credits
Level: Lower
Applied Learning-Practicum
This course will introduce the student to multiple aspects of business computer applications including the representation, storage, manipulation, and use of digital information. Topics include: essential applications; information collection and analysis; research methods; and using information to enhance presentations in the workplace. This course prepares students to work with Microsoft Office in a career setting. Students will be introduced to key ethical issues they will face in the context of using information technology. Students will develop electronic documents, spreadsheets, and databases. Students will also develop and present an electronic presentation in order to document the students' competence applying business solutions.

BUAD - 5003 Management Communications, 3.00 Credits
Prerequisite(s): COMP 1503 with D or better or BUAD 2033 with D or better
Level: Upper
This course is designed to provide the student with the range of communication issues a manager will face in the future. Enduring issues on how to write and speak effectively and devise a successful communications strategy, as well as how to make the best use of telecommunication technologies will be explored. Through lecture and application, the student will study such areas as handling feedback, managing meetings, communicating change, communicating with diverse populations and external audiences. Special emphasis will focus on how to use communications to achieve an organizational mission, how to adapt their communications to the specific needs of their audiences, and how to prepare for intercultural communication challenges.

BUAD - 5013 Principles of Leadership, 3.00 Credits
Prerequisite(s): BUAD 3153 with D or better or TMGT 7153 with D or better
Level: Upper
This course is an examination of the theory, practice, and principles of leadership within the realm of management. Major topics include the evolution of leadership theory, an examination of the major leadership theories operating in modern organizations, and the impact of each on organizational effectiveness. The development, refinement, and application of effective leadership principles and skills are also examined. Students will be expected to analyze the spectrum of leadership theories and formulate opinions as to the most effective and efficient forms of leadership given a specific situation or organizational context.

BUAD - 5023 Human Resource Management, 3.00 Credits
Prerequisite(s): BUAD 3153 with D or better or TMGT 7153 with D or better
Level: Upper
This course provides students with an understanding of human resource management, and how they can improve their use of human resources through management tactics. It will discuss what human resource management contributes to the organization in terms of effectiveness and competitiveness. Discussion and research will take place on some of the challenges and workforce issues being faced in this area. Some of the topics covered include equal opportunity and the legal environment, strategic human resource planning, recruiting and selection, staffing, training and development, compensation, performance appraisal, employee and labor relations, and workplace safety.

BUAD - 5033 Retirement Planning, 3.00 Credits
Prerequisite(s): BUAD 4203 with D or better
Level: Upper
This course provides an overview of the retirement planning process. It will describe the ongoing, systematic procedures a financial planner will utilize to assist a client in establishing meaningful retirement objectives and creating appropriate strategies. Topics will include employer sponsored retirement plans, Social Security, Medicare, Medicare, post retirement health and quality of life issues, as well as investment, estate, and tax planning strategies.
COURSE DESCRIPTIONS

BUAD - 5043 Business Ethics, 3.00 Credits
Prerequisite(s): BUAD 3153 with D or better or TMGT 7153 with D or better
Level: Upper
Upper Level
This course explores the complex nature of ethical issues confronted by modern business leaders and managers. It integrates perspectives from a variety of disciplines, including, but not limited to, philosophy, law, management, economics, marketing, and public policy. Coursework is designed to illustrate the ethical principles applicable in a business setting while considering policies concerning employees, customers, and stakeholders, as well as government efforts to regulate and monitor business practices, and the role of media in shaping public opinion.

BUAD - 6003 Managerial Finance, 3.00 Credits
Prerequisite(s): (ACCT 1124 with D or better and ACCT 2224 with D or better) OR ACCT 5043 with D or better
Level: Upper
Upper Level
This course is a comprehensive examination of the theoretical and practical approaches to financial management. Analyzing, planning, controlling investment and short and long term financing are examined for decision-making purposes. Topics include: the financial environment, risk and rates of return, capital budgeting techniques, the cost of capital and capital structure, analysis of financial statements, financial planning and control, and ethics in finance.

BUAD - 6113 Strategic & Creative Prob SOLv, 3.00 Credits
Prerequisite(s): TMGT 7153 with D or better or BUAD 3153 with D or better
Level: Upper
Upper Level
The focus of this course is the analysis of issues that managers typically address in technology-based environments and application of creative problem solving techniques. Emphasis is on fostering creative thinking as a way to approach and solve problems, and analysis of personal thinking styles. Problem presentation, identification, and decision analysis techniques will be used. Preparation and presentation of written and oral reports is required. The course offers an opportunity for students to practice communication of ideas and accomplishments through informal discussion, formal presentation, team decision-making and team learning using collaborative efforts to achieve a common goal. The applied problems explored in this course are based upon real and current industry problems.

BUAD - 6213 Business in the European Union, 3.00 Credits
Level: Upper
Applied Learning-Intl/Dom Trvl, Upper Level
The course describes how economic, political and social factors interrelate, and influence business in the European Union. Students will research sustainable business practices from different European Union member state's perspective. Guest lecturers and field trips are planned for students enrolled in the study abroad program.

BUAD - 6303 Mktg & Commng thru Socl Media, 3.00 Credits
Prerequisite(s): (CISY 1103 with D or better or CISY 1003 with D or better or CISY 1023 with D or better) AND (BUAD 3153 with D or better or TMGT 7153 with D or better)
Level: Upper
Upper Level
Upon completion of this course, the student will understand modern (quantitative and qualitative) concepts in production management and their application to problems relevant to today's workplace, for both industrial and service organizations. This course specifically addresses the impact of operational decisions on the firm and emphasizes cross-functional decision making. The course essentially deals with the process design, delivery systems, quality management, ERP, inventory control, scheduling and management of transformation processes to create and deliver value to customers by identifying opportunities and direction for change. This course will cover the terminology, problems, concepts and tools associated with managing operations. Special topics include: supply chain management, e-operations, service blueprinting, competency-based strategy, Six Sigma, lean systems, and mass customization.

BUAD - 7043 Quantitative Decision Making, 3.00 Credits
Prerequisite(s): MATH 1123 with D or better or MATH 1214 with D or better or MATH 1014 with D or better or MATH 1033 with D or better or MATH 1034 with D or better
Level: Upper
Upper Level
This course is an introduction to quantitative problem solving methods used in business applications. Topics include General Linear Programming and Sensitivity Analysis; Transportation, Assignment, and Transshipment Problems; Network Flow Algorithms; Project Scheduling: PERT/CPM; Inventory Models; Waiting Line Models; and Markov Processes. Software applications will be utilized whenever possible to aid students in the problem solving process.

BUAD - 7273 Organizational Behavior, 3.00 Credits
Prerequisite(s): TMGT 7153 with C or better or BUAD 3153 with C or better
Level: Upper
Upper Level
This course is designed to create an understanding of the behavior of people in organizations to help people be more productive and satisfied in organizational settings. It exposes students to advanced behavioral science theories and applications in management. Topics include work motivation, work attitudes and job satisfaction, personality and values, socialization, work teams, conflict resolution, power and politics, decision making, and management of change. The course will also focus on personal growth and development. Students will integrate their learning through active participation in experiential exercises, personal experiences, case analysis, and general behavior experiments and study.

BUAD - 8003 Management Info Systems - MIS, 3.00 Credits
Prerequisite(s): (CISY 1003 with D or better or CISY 1103 with D or better or CISY 1023 with D or better) AND (BUAD 3153 with D or better or TMGT 7153 with D or better)
Level: Upper
Upper Level
This course is an introduction to management perspective of information systems activity from development through implementation. The goal of this course is to help business students learn how to use and manage information technologies to revitalize business processes, improve business decision making, and gain competitive advantage. This course places major emphasis on up-to-date coverage of the essential role of Internet technologies in providing a platform for business, commerce, and collaboration processes among all business stakeholders in today's networked enterprises and global markets. This course places a major emphasis on the strategic role of information technology in providing business professionals with tools and resources for managing business operations, supporting decision making, and gaining competitive advantage.
CHEM - CHEMISTRY

CHEM - 2984 Chemical Principles II, 4.00 Credits
Prerequisite(s): ( BUAD 3153 with D or better or TMGT 7153 with D or better ) and BUAD 5023 with D or better and BUAD 6003 with D or better and ( MKTG 2073 with D or better or MKTG 6003 with D or better ) and BUAD 7003 with D or better
Level: Upper
Applied Learning-Creative Work, Upper Level
This course is an application of theoretical approaches to Strategic Management. Major concepts, tools, and processes will be explored through lecture, readings, team activities, and case study applications. Major topics include creating a competitive advantage, analyzing the external and internal environment of an organization, recognizing an organization’s intellectual assets, developing business level, corporate level, and international level strategies, strategic control and corporate governance, creating organizational designs, creating a learning organization and an ethical organization, and managing innovation and fostering corporate entrepreneurship. The completion of a business simulation will be required.

CHEM - 1013 Introductory Chemistry, 3.00 Credits
Level: Lower
Gen Ed - Natural Sciences, Liberal Arts and Science
This non-laboratory course is designed for students who need to understand the basic concepts of chemistry. Students will explore mathematical relationships using the factor labeling (conversion factor method), atomic and molecular structures (with emphasis on the special nature of carbon), pH, essential building block molecules, water, ions and ionization, and other topics of interest to those who live in our chemical world. Students cannot receive credit for CHEM 1013 if CHEM 1114 or CHEM 1144 is concurrently or previously taken.

CHEM - 1023 Foundations in Chemistry, 3.00 Credits
Level: Lower
Liberal Arts and Science
The course is specifically designed to service students who need more preparation to be successful in chemistry courses required for science majors including General Chemistry (CHEM 1114) and Chemical Principles (CHEM 1144). The class will provide a primer on the concepts, terminology and mathematics which are most commonly utilized in chemistry coursework. This course does not fulfill the Gen Ed - Natural Sciences requirement. Students cannot receive credit for CHEM 1023 if CHEM 1013, CHEM 1114 or CHEM 1144 is concurrently or previously taken.

CHEM - 1114 General Chemistry I, 4.00 Credits
Level: Lower
Applied Learning-Other, Course Fee $6.00, Gen Ed - Natural Sciences, Liberal Arts and Science
This course is designed for science majors particularly focused in the health or agricultural areas who have had high school chemistry. It can be a terminal course in chemistry for those seeking an AAS in veterinary technology. Topical coverage includes: metric units and conversions, atomic theory, periodicity, electronic bonding models (Lewis, Pauling, Gillespie VSEPR), inorganic nomenclature, inorganic reactions (metathesis, acid-base, redox), stoichiometry and the mole concept, gas laws, phase transitions (phase diagrams, cooling curves, critical phenomena, heat capacities, intermolecular interactions), equilibrium (calculations involving K, Le Chatelâtre's principle) and elementary kinetics (Arrhenius model).

CHEM - 1984 Chemical Principles I, 4.00 Credits
Level: Lower
Applied Learning-Other, Course Fee $8.00, Gen Ed - Natural Sciences, Liberal Arts and Science
This course is intended for physical science and engineering majors. While providing a general overview of modern chemistry, the course emphasizes the development of chemical concepts and problem-solving techniques that are essential in science. General topics include atomic structure of matter, chemical reactions, thermodynamics, atomic structure of the atom and chemical bonding.

CHEM - 2124 General Chemistry II, 4.00 Credits
Prerequisite(s): CHEM 1114 with D or better or CHEM 1984 with D or better
Level: Lower
Applied Learning-Other, Course Fee $27.00, Gen Ed - Natural Sciences, Liberal Arts and Science
This course is a continuation of General Chemistry I and is intended for science majors. It completes the presentation of topics started in General Chemistry I by surveying the topics of: Acids & Bases, Electrochemistry and Nuclear Chemistry. After these foundations are laid, the course will then explore two broad chemical themes: 1) Organic Chemistry, where the language and chemistry of selected functional groups (alkanes, alkenes, aromatics, alcohols, aldehydes, ketones, amines, and carboxylic acids) along with an exploration of chirality will be covered and 2) Biochemistry, where the chemistry and structure of carbohydrates, lipids and proteins will be surveyed.

CHEM - 2984 Chemical Principles II, 4.00 Credits
Prerequisite(s): CHEM 1984 with D or better or CHEM 1114 with D or better
Level: Lower
Applied Learning-Other, Course Fee $10.00, Gen Ed - Natural Sciences, Liberal Arts and Science
This course is a continuation of Chemical Principles I and is intended for physical science and engineering majors. Those basic concepts from the first semester are applied to more complex aspects of chemistry which include the states of matter, solutions, thermodynamics, equilibrium, electrochemistry and nuclear chemistry. In addition, the course is designed so that there will be more out-of-class activities related to these topical areas which are completed by a team of students.

CHEM - 2514 Organic Chemistry I, 4.00 Credits
Prerequisite(s): CHEM 2124 with D or better or CHEM 2984 with D or better
Level: Lower
Applied Learning-Other, Course Fee $33.00, Gen Ed - Natural Sciences, Liberal Arts and Science
This course is the first semester of a two semester sequence in organic chemistry and is a thorough introduction to the language, mechanisms, materials and concepts fundamental to organic chemistry. Lecture topics include: VSEPR and atomic orbital models; basic valence hybrid and molecular orbital theory; the language of stereochemistry; the basic "activated complex' model of Eyring and Polanyi; free radical reactions, notably as they occur in alkanes; alkene preparation and synthesis; SN1 and SN2 substitution reaction pathways notably as they occur in alkyl halides and alcohols; E1 and E2 elimination pathways; notably as they occur for alcohols and alkyl halides; the stereoreactivity and energetics of cycloalkanes, and an introduction to retrograde, multi-step synthesis. Lab skills taught include: principles and practice of simple, fractional and steam distillation; recrystallization, solvent extraction, melting point, refractive index determination, IR and GC instrumental characterizations of compounds. Students are also required to synthesize three different compounds, including a multi-step Grignard synthesis to 2-methyl-2-hexene starting from 2-propanone and 1-bromobutane.

CHEM - 4524 Organic Chemistry II, 4.00 Credits
Prerequisite(s): CHEM 3514 with D or better
Level: Lower
Applied Learning-Other, Course Fee $62.00, Gen Ed - Natural Sciences, Liberal Arts and Science
This course is the second semester of a two semester sequence in organic chemistry starting with Organic Chemistry I. Lecture topics include: synthetic routes to and from unsaturated aliphatics, notably: alkenes, alkenes, allylic and alkynalides with emphasis on accompanying mechanistic pictures notably: radical and carboxylation additions, concerted additions, radical substitutions; synthetic routes to and from substituted aromatic compounds with emphasis on the electrophilic substitution mechanism; synthetic routes to and from carbonyl compounds including aldehydes, ketones, and aromatic acids and the reactions that occur with particular focus on the special role played by the beta hydrogen; a brief survey of reactions and properties of amines, ester enolates, and a survey of carbohydrate structure and chemistry. A thorough introduction to stereochermical concepts not covered in the first semester is also carried out. Lab topics include mastery of organic techniques not covered in the first semester, e.g. NMR and polarimetry, mass spectroscopy and, hands-on experience with the various reactions discussed in lecture, notably: ring substitution, cycladdition, steroidation, carbonyl condensations, and esterification.

CHEM - 6614 Instrumental Analysis, 4.00 Credits
Prerequisite(s): MATH 1033 with C or better or MATH 1054 with D or better or MATH 1063 with D or better or MATH 1084 with D or better
Level: Upper
Applied Learning-Practicum, Course Fee $62.00, Upper Level
This course is an in-depth examination of the chemistry and mathematical underpinnings connected to classical chemical calculations and wet chemical methods that form the foundation of modern quantitative chemistry. Using only a balance, buret and various classical volumetric devices, students will develop skills and understanding of gravimetric, titrimetric, complexometric, argentometric and redox methodologies. The course contains a thorough coverage of the manifold concentration systems and conversions as well as complete treatment of the details of equilibrium equations connected to precipitation, acid-base reactions, buffers, complexation and redox. Non-ideal corrections, notably Debye-Huckel theory, will also be covered.

CHEM - 5414 Analytical Principles, 4.00 Credits
Prerequisite(s): CHEM 2124 with C or better or CHEM 2984 with C or better
Level: Upper
Applied Learning-Practicum, Course Fee $62.00, Upper Level
This course is an in-depth examination of the chemistry and mathematical underpinnings connected to classical chemical calculations and wet chemical methods that form the foundation of modern quantitative chemistry. Using only a balance, buret and various classical volumetric devices, students will develop skills and understanding of gravimetric, titrimetric, complexometric, argentometric and redox methodologies. The course contains a thorough coverage of the manifold concentration systems and conversions as well as complete treatment of the details of equilibrium equations connected to precipitation, acid-base reactions, buffers, complexation and redox. Non-ideal corrections, notably Debye-Huckel theory, will also be covered.

CHEM - 6614 Instrumental Analysis, 4.00 Credits
Prerequisite(s): CHEM 4524 with D or better
Level: Upper
Applied Learning-Practicum, Course Fee $85.00, Upper Level
A strongly lab-focused course devoted to providing students a thorough exposure to the most common instrumental methods found in modern chemistry and material science labs including: UV-VIS spectroscopy, Atomic Absorption Spectroscopy (AAS), Infrared Spectroscopy (IR), Gas Chromatography (GC), Mass Spectroscopy (MS), High Performance Liquid Chromatography (HPLC), optical and electron microscopy, calorimetric methods including Differential Scanning Calorimetry (DSC) and X-ray Diffraction (XRD). Additionally, fundamentals of glass, glass blowing and basic electronics including passive component behavior as well as some exposure to the fundamentals of semi-conductor devices (transistors, op amps) will be explored.
CHEM - 6854 Physical Chemistry, 4.00 Credits
Prerequisite(s): CHEM 4524 or C or better and PHYS 1064 with C or better and MATH 1114 with C or better
Level: Upper
Applied Learning-Practicum, Course Fee $57.00, Upper Level
This course provides students who plan future studies in forensic science technology, chemical sciences or chemical engineering a firm grounding in the quantum mechanical description of molecules, as well as a critical set of insights into thermochemical reasoning. The quantum mechanical focus will be on key model systems, notably the 1- and 2D particle-in-a-box, the rigid rotor, the harmonic oscillator and hydrogen atom. Selected approximation methods applicable to multi-electron atomic systems and applications of infrared and visible spectroscopy will be explored. Students will be given exercises in using current quantum calculation software to estimate optimal structures, predict IR spectra and estimate activated complex geometries. It is expected that students taking this course will have already taken a course of ordinary differential equations, but some of the course will also include mathematical excursions developing necessary mathematical tools, notably eigenvalue problems, series solutions of differentials and various matrix algebraic methods. The thermodynamic focus will be on efficiently developing the 4 laws of thermodynamics into useful forms whereby chemical equilibria and phase change of chemical systems can be predicted and described. A strong emphasis will be laid on using the practical chemical results of thermodynamic reasoning (K and Q predictions). Clausius-Clapeyron, Gibbs-Helmholtz and Nernst equation, phase rules and Gibbs-Duhem equations) rather than deriving the abstracted expressions of the several thermodynamic laws.

CHEM - 7784 Biochemistry, 4.00 Credits
Prerequisite(s): CHEM 4524 with C or better and BIOL 2204 with C or better
Level: Upper
Applied Learning-Practicum, Course Fee $109.00, Upper Level
This course is a comprehensive course intended for science majors. Topics covered include the basic structure and reactions of biological compounds (carbohydrates, lipids, proteins, enzymes, and nucleic acids), the digestion and absorption of nutrients, bioenergetic principles, and catabolic and anabolic metabolism of macrobiomolecules in the human body. The laboratory exercises include classic techniques in isolation, purification and assay of proteins, enzymes (and kinects), carbohydrates, lipids, and nucleic acids as well as polypeptide and polynucleotide sequencing and synthesis.

CISY - COMPUTER INFORM SYSTEMS

CISY - 1003 Intro to Microcomputer Appl, 3.00 Credits
Level: Lower
An introductory course in business computing, focusing on microcomputer technology utilizing operating system commands, word processing, spreadsheets, and database software used in business organizations.

CISY - 1022 Intro to Information Tech, 3.00 Credits
Level: Lower
Applied Learning-Practicum
This course covers the fundamentals of computer architecture and organization. Topics include: computer hardware and software fundamentals, essential application, networking and the Internet, and computer user security and risks. Students will develop skills in collecting, analyzing, and using information from a variety of resources in order to create complete projects.

CISY - 1103 Info Technology Management, 3.00 Credits
Level: Lower
Applied Learning-Practicum
This course introduces the student to multiple aspects of information technology management including: representing, storing, manipulating, and using digital information. Topics include: computer hardware and software fundamentals, essential applications, networking and the Internet, and computer user security and risks. Students will develop skills in collecting, analyzing, and using information from a variety of resources in order to complete project plans.

CISY - 1113 Computer Programming I, 3.00 Credits
Level: Lower
Applied Learning-Practicum
This introductory course in computer programming covers fundamental programming concepts (sequence, selection, iteration), algorithms for solving simple problems, tracing execution, subprograms/functions/methods, parameter passing, security coding techniques (criteria for selection of a specific type and use, input data validation), and professional behavior in response to ethical issues inherent in computing.

CISY - 1123 Intro to Programming for IT, 3.00 Credits
Level: Lower
Applied Learning-Practicum
An introductory programming course for information technology or CIS majors. The development of solutions through a set of logical steps and basic control structures (including selection and iteration) will be introduced. Students will write, debug and execute programs using a high level visual programming language.

CISY - 2133 Computer Programming II, 3.00 Credits
Prerequisite(s): CISY 1113 with D or better
Level: Upper
Applied Learning-Practicum
This course covers the fundamentals of algorithms and object oriented software development. Topics include: modern IDE for software development, primitive and reference data types, encapsulation, information hiding, selection, iteration, functions/methods, parameters, recursion, exception handling, generic linear data structures (arrays, records/ structs) and maps, file types, file I/O, simple GUIs with event trapping, user interface, lambda expressions, semantics of inheritance and use of polymorphism, relation with subtyping, search (sequential, binary), select (min, max), and sort (bubble, insertion, selection, algorithms, complexity notation, document generation using standard tools, program testing (unit testing) and debugging, reasoning about control flow in a program, and societal impacts related to computing and software.

CISY - 2141 Info Tech A+ Cert Prep, 1.00 Credit
Level: Lower
Applied Learning-Practicum
This course will prepare students to pass the Information Technology certification exam A+ CompTIA. Students will research testing preparatory tools and certification requirements. The student will find and use study materials to take pre-tests (if available) and evaluate test taking processes.

CISY - 2143 Microcomputer Systems I, 3.00 Credits
Prerequisite(s): CISY 1003 with D or better or CISY 1103 with D or better or CISY 1023 with D or better
Level: Lower
Applied Learning-Practicum
This course provides an exposure to computer operating systems and hardware. Topics include hardware, troubleshooting, operating system commands, system utilities, memory managers, graphical user interface (GUI) software and computer security.

CISY - 2153 Database Appl and Programing I, 3.00 Credits
Prerequisite(s): CISY 1023 with D or better
Level: Lower
Applied Learning-Creative Work
A comprehensive exposure to the use of database software concepts, capabilities and applications beyond the introductory level focusing on developing expertise in using a contemporary spreadsheet software package and companion products to develop business systems.

CISY - 3001 Info Tech Cert. Prep. Course, 1.00 Credit
Level: Lower
This course will prepare students to pass an Information Technology related certification exam related to a topic agreed upon by student and faculty member. Students will research testing preparatory tools and certification requirements. The student will find and use study materials to take pre-tests (if available) and evaluate test taking processes.

CISY - 3023 Advanced Microcompr Spreadsheets, 3.00 Credits
Prerequisite(s): CISY 1003 with D or better or CISY 1023 with D or better or CISY 1103 with D or better
Level: Lower
Applied Learning-Practicum
An introductory course in business computing, focusing on microcomputer technology utilizing operating system commands, word processing, spreadsheets, and database software used in business organizations.

CISY - 3193 Computer Architecture & Organi, 3.00 Credits
Prerequisite(s): CISY 1113 with D or better
Level: Lower
This course covers fundamentals of computer architecture and organization. Topics include: classical von Neumann machine, major functional units, primary memory, representation of numerical (integer and floating point) and non-numerical data, CPU architecture, instruction encoding, fetch-decode-execute cycle, instruction formats, addressing modes, symbolic assembler, assembly language programming, handling of subroutine calls at assembly level, mapping between assembly level language and assembly/machine language, interrupts and I/O operations, virtual memory management, and data access from a magnetic disk.

CISY - 3223 Intro to Web Page Development, 3.00 Credits
Prerequisite(s): CISY 1023 with D or better
Level: Lower
An introductory course in web page development with HTML, CSS, and JavaScript. Also includes the use of various software packages that automate the web page design process. This course may include Dreamweaver, Sublime, Bootstrap, and others. This course is suitable for anyone who would like to create simple, but useful web pages. Topics include: the internet, tables, frames, forms, scripting language(s), and multi-media.

CISY - 3283 Internetworking I, 3.00 Credits
Level: Lower
Applied Learning-Practicum
This is the first of two courses in a series to be offered covering the Cisco academy semesters 1 and 2. Students will develop skills and knowledge in Network media installation and testing, router and switch installation and configuration, and concepts of Local Area Networks (LANs) and Wide Area Networks (WANs). Instruction will be completed through on-line resources, lecture, and hands-on skills development. Students will be prepared for Cisco Certified Network Associate certification exams upon completion of both courses.

CISY - 4003 Comp Prgrmmg III/Data Structu, 3.00 Credits
Prerequisite(s): CISY 2133 with D or better
Level: Lower
Applied Learning-Practicum
This course covers the fundamentals of data structures and software modeling. Topics include: modern IDE for software development and code version management systems, design and development of reusable software, software modeling (class diagram, use case, CRC card), introduction to analysis of algorithms (order notation), abstract properties, implementation and use of stacks, queues, linked lists, binary trees, binary search trees, recursion and efficiency of recursive solutions. Additional focus will be given to range of searching (sequential, binary), selecting (min, max, median) and sorting algorithms (quick sort, merge sort, heap sort) and their time and space efficiencies. Software quality assurance (pre and post conditions, program testing), team development of software applications, and professional responsibilities and liabilities associated with software development will be discussed.

CISY - 4031 Info Tech Net+ (CompTIA) Cert., 1.00 Credit
Prerequisite(s): CISY 2133 with D or better
Level: Lower
Applied Learning-Practicum
This course will prepare students to pass the Information Technology certification exam Network+(CompTIA). Students will research testing preparatory tools and certification requirements. The student will find and use study materials to take pre-tests (if available) and evaluate test taking processes.
CISY - 4033 Networking I, 3.00 Credits  
Level: Lower  
Applied Learning-Practicum  
This is an introductory course in networking with a survey and evaluation of network media, access methods, topologies, and terminology. Topics will include end user perspective, network cabling, hardware and software protocols, internetworking, network operating systems, and system administration. Included will be basic server installation, configuration, and management. A variety of workstation and server operating systems will be explored through extensive hands-on labs with an emphasis on network security.

CISY - 4053 Linux/Unix Admin and Scripting, 3.00 Credits  
Prerequisite(s): CISY 4033 with D or better  
Level: Lower  
Applied Learning-Practicum  
This course takes an in-depth look at Linux and Unix-like system administration, including console and graphical interfaces. Major topics include file systems, text processing, installation, system configuration, software packages, network configuration, backup, and kernel management. A significant portion of the course will concentrate on script analysis and creation. Laboratory exercise will provide hands-on exercise in each of these topics.

CISY - 4063 Systems Analysis & Design, 3.00 Credits  
Prerequisite(s): CISY 1113 with D or better or CISY 1123 with D or better  
Level: Lower  
Applied Learning-Practicum  
This course covers the fundamental concepts underlying all business information systems including security. Emphasis is on a structured process in the design of computer-based information systems. Current tools and techniques are applied to a case study project.

CISY - 4103 Visual Programming & Develompnt, 3.00 Credits  
Prerequisite(s): CISY 1113 with D or better or CISY 1123 with D or better  
Level: Lower  
A visual programming environment will be used in a continuation of Computer Programming I. Emphasis will be placed on advanced algorithms, program design and development. Topics included will be sub-programs, arrays, files, and data abstraction. Debugging and proper program design and documentation will be stressed.

CISY - 4283 Internetworking II, 3.00 Credits  
Prerequisite(s): CISY 3263 with D or better  
Level: Lower  
Applied Learning-Practicum  
Students will develop skills and knowledge in network media installation and testing, router and switch installation, and concepts of Local Area Networks (LANs) and Wide Area Networks (WANs). Instruction will be completed through on-line resources, lecture, and hands-on skill development. Students will be prepared for Cisco Certified Network Associate certification exams upon completion of CISY 3283 and this course.

CISY - 4423 Intro to Mobile Robotics & Ani, 3.00 Credits  
Level: Lower  
Applied Learning-Practicum  
The course covers basic programming techniques of mobile and stationary robotic systems with respect to autonomous function and interaction with the environment. Topics include basic programming techniques, robot platforms, use of sensors, embedded control, pre-programmed problem solving, robot construction, and human-robot interaction. Students will complete programming and robot construction projects. Theoretical concepts presented in the lecture will be reinforced in the laboratory.

CISY - 4723 Essentials of Info Security, 3.00 Credits  
Prerequisite(s): CISY 4033 with D or better  
Level: Lower  
This course is a comprehensive survey of all aspects of computer security. This includes local host, network web, and database security as well as other objects that are prone to attack. Special focus will be given to the identification of security threats and countermeasures that can be taken to make these systems more secure. Students will develop a security plan for a small to mid-sized organization.

CISY - 5123 Scientific Programming, 3.00 Credits  
Prerequisite(s): or MATH 1033 with D or better or MATH 1034 with D or better or MATH 2043 with D or better or MATH 1033 with D or better or MATH 1034 with D or better or MATH 1084 with D or better  
Level: Upper  
Applied Learning-Practicum, Upper Level  
In this course students will learn structured programming techniques to solve scientific and engineering problems using conventional programming languages. Topics include data types, flow control structures, functions, I/O pointers, program design and maintenance, top-down design and programming techniques.

CISY - 5133 Sec Policies, Recov & Risk Man, 3.00 Credits  
Prerequisite(s): CISY 4053 with D or better or CISY 4723 with D or better or CISY 5403 with D or better  
Level: Upper  
Applied Learning-Practicum, Upper Level  
Students will be introduced to security policies, the tools and techniques used in security management, and risk management procedures. They will analyze risk and security threats in the organization as well as manage, test, and establish security policy. Topics such as information protection, code of practice for information security, risk management, security awareness and security evaluations will be explored. A final project in security assessment will be required.

CISY - 5203 Network Administration, 3.00 Credits  
Prerequisite(s): CISY 4033 with D or better  
Level: Upper  
Applied Learning-Practicum, Upper Level  
Students will use a variety of network management tools to manage, monitor, support and troubleshoot network operations. Topics will include performance issues, end-user accounts, data security, disaster recovery, supporting applications, and documentation.

CISY - 5233 Human Computer Interaction, 3.00 Credits  
Prerequisite(s): CISY 4103 with D or better and CISY 3223 with D or better  
Level: Upper  
Applied Learning-Practicum, Upper Level  
This course will cover the design, prototyping, and evaluation of user interface to computers. This will include the implementation of interactive computing systems for human use and the study of major phenomena surrounding them. In addition, the course will stress the importance of good interfaces and the relationship of user interface design to human-computer interaction within multi-disciplinary dynamics. Example systems, case studies, methodologies and models will be used to demonstrate the concepts and the importance of human computer interaction.

CISY - 5303 Web Programming I, 3.00 Credits  
Prerequisite(s): CISY 3263 with D or better  
Level: Upper  
Applied Learning-Practicum, Upper Level  
A comprehensive survey of HTML and web publishing software to create robust, functional web pages. This course will examine HTML standards, browser capabilities, information architecture, bandwidth considerations, image format, maps, frames, forms, and server/client side scripting. Topics of current interest will be included, such as: JavaScript, VBScript, ActiveX, Active Server Pages, Dynamic HTML, and Cascading Style Sheets.

CISY - 5403 Database Concepts, 3.00 Credits  
Prerequisite(s): CISY 2153 with D or better  
Applied Learning-Practicum, Upper Level  
This course is a study of the terminology, design, implementation and software associated with database systems. Topics include the need for database management systems, file organization, sequential and direct access methods and physical implementation. Other topics covered are relational database design, entity and semantic models, hierarchical and network models, SQL, database applications using the internet, and sharing enterprise data. Students will design, implement, test, and debug database management systems according to industry standards.

CISY - 5613 UNIX/Linux Server Admin, 3.00 Credits  
Prerequisite(s): CISY 4033 with D or better or ELET 2012 with D or better  
Level: Upper  
Upper Level  
This course will introduce students to the techniques and practices associated with the installation, configuration, troubleshooting, and maintenance of a UNIX/Linux based network. Students will create an operational UNIX/Linux server within a network domain to support DNS, DHCP, gateway, file, print, and other services. Applications will be installed and supported for network users. Operational practices including security, user and group management, backups, logging, script use, and documentation will be addressed as a final project.

CISY - 5723 Essentials of Info Security, 3.00 Credits  
Prerequisite(s): CISY 4033 with D or better or ELET 2012 with D or better  
Level: Upper  
Upper Level  
This is a comprehensive survey of all aspects of computer security. This will include local host, network, web, database security as well as other objects that are prone to attack. The student will focus on the identification of security threats and countermeasures that can be taken to make these systems more secure. Students will develop a security plan for a small to mid-size company.

CISY - 5813 Cloud Computing Architecture I, 3.00 Credits  
Prerequisite(s): CISY 2153 with D or better and CISY 3223 with D or better  
Level: Upper  
Upper Level  
This is an introductory course in the emerging field of cloud computing technologies. This course is the first course in a two course sequence which provides the student with a foundation and survey of the many new emerging cloud computing tools being used to create the internet. Topics will include scalable, fault-tolerant, distributed systems, data storage, Collaboration, Securing, and Disaster Recovery in the cloud. This course will be using industry leading cloud services and cloud datacenter technologies. A variety of cloud service provider's products and platforms will be explored through appropriate hands-on labs.

CISY - 5900 Directed Study, 1.00 TO 6.00 Credits  
Level: Upper  
Upper Level  
A capstone course which provides an integrative experience in applying the knowledge and skills of earlier course work, with particular emphasis on computer science management, information systems, and communications skills in an integrated/internship setting; requires student to present and defend, orally and in writing, solutions to experienced real-world problems encountered.

CISY - 6103 Web Server Administration, 3.00 Credits  
Prerequisite(s): CISY 4033 with D or better and CISY 3223 with D or better  
Level: Upper  
Applied Learning-Practicum, Upper Level  
This is a comprehensive survey of all aspects of web server administration. Students will gain hands-on experience by actually installing and administering their own web servers. Topics include: server installation and configuration, site planning, supporting dynamic content, security, and maintenance.

CISY - 6123 Adv Pro with Vid Game Des & Dev, 3.00 Credits  
Prerequisite(s): CISY 4033 with D or better or CISY 6503 with D or better  
Level: Upper  
Applied Learning-Practicum, Upper Level  
This course is an advanced study of programming using current tools to create video games. Topics covered include higher-level programming techniques, writing programs to use the windows user interface, and creating and using graphic objects. The gaming topics of data structures and algorithms, artificial intelligence, physics modeling, and mathematics will also be covered. A final project will be required incorporating AI and physics.
CISY - 6503 Object-Oriented Programming, 3.00 Credits
Prerequisite(s): CISY 2133 with D or better
Level: Upper
Applied Learning-Practicum, Upper Level
This course will give the student the basic skills necessary to complete dimensioned mathematical models that describe real-world situations. The course will be presented in written and oral formats.

CISY - 7033 Security Tools, 3.00 Credits
Prerequisite(s): CISY 5023 with D or better or CISY 4043 with D or better or CISY 4053 with D or better
Level: Upper
Applied Learning-Practicum, Upper Level
This course provides a practical, hands-on approach to the process of scientifically retrieving, examining and analyzing data from computer storage media so that data can be used as evidence in court. This course assumes a prerequisite knowledge of network operating systems and security concepts. A final project will be required.

CISY - 7033 Information Security Capstone, 3.00 Credits
Prerequisite(s): CISY 5133 with D or better or CISY 5033 with D or better or CISY 5023 with D or better
Level: Upper
Applied Learning-Practicum, Upper Level
This is a research-oriented and performance-oriented course. The course addresses critical (both theoretical and pragmatic) issues in information technology (IT). Issues of concern may include, but are not limited to, IT systems security, ethics of using IT systems, human-IT systems interface, and data analysis requirements at different organizational levels. Students are expected to conduct research, present their findings, accept feedback on their presentations, and document their knowledge of the topics. Students will also complete a project working with a cross-disciplinary team and prepare strategies/materials for an effective job search. Every student is expected to attend all class presentations and guest lectures.

CISY - 8703 Information Security Internship, 3.00 Credits
Prerequisite(s): CISY 5133 with D or better or CISY 5033 with D or better
Level: Upper
Applied Learning-Practicum, Upper Level
This course will provide a practical, hands-on approach to the security of both hosts and networks. The course will be presented in written and oral formats.

CIVL - 1011 Civil AutoCAD, 1.00 Credit
Prerequisite(s): CIVL 1010 with D or better
Level: Upper
Applied Learning-Practicum, Upper Level
This course will provide a practical, hands-on approach to the process of scientifically retrieving, examining and analyzing data from computer storage media so that data can be used as evidence in court. This course assumes a prerequisite knowledge of network operating systems and security concepts. A final project will be required.

CIVL - 1011 Civil AutoCAD, 1.00 Credit
Level: Upper
Applied Learning-Practicum, Pass/Fail, Upper Level
This course will give the student the basic skills necessary to complete dimensioned mathematical models that describe real-world situations. The course will be presented in written and oral formats.

CIVL - 1011 Civil AutoCAD, 1.00 Credit
Level: Lower
This course will give the student the basic skills necessary to complete dimensioned drawings in AutoCAD. Topics include: setting up a drawing, basic lines and coordinates, geometric shapes, layering, editing commands, dimensioning, creating text, hatching and plotting to scale.
CIVL - 4043 Contracts, Specs, & Estimating, 3.00 Credits
Prerequisite(s): CIVL 3553 with D or better or ARCH 4014 with D or better
Level: Lower
Applied Learning-Creative Work
This course is a study of contracts and specifications governing contractors in the construction phase of a project. Students will practice the estimating of earthwork, masonry, concrete, steel, and wood. Students will progress through manual takeoffs to electronic spreadsheets. At the completion of this course, the student will be able to create an estimate for a construction project.

CIVL - 4204 Subdivision Theory & Appli, 4.00 Credits
Prerequisite(s): CIVL 3204 with D or better
Level: Lower
Applied Learning-Practicum
This course is an introduction to the U.S. Public Lands Survey System, the laws of simultaneous conveyances, and subdivision of lands. Governmental regulations and environmental considerations will be addressed. Industry standard software will be utilized in the laboratory.

CIVL - 4214 Surveying Practicum, 4.00 Credits
Prerequisite(s): CIVL 3214 with D or better and CIVL 3204 with D or better
Level: Lower
Applied Learning-Practicum
This course consists of a series of field and office problems in surveying. Topics include research, field reconnaisance, data collection, deed interpretation, and mapping. Students are responsible for the execution of a comprehensive surveying project.

CIVL - 4243 Surveying Computer Appli, 3.00 Credits
Prerequisite(s): CIVL 1204 with D or better and CIVL 2004 with D or better
Level: Lower
Applied Learning-Practicum
This course is an introduction to the concepts of field to office automation, the use of coordinate geometry (COGO) software programs and computer aided drafting (CAD) software programs. Emphasis will be placed on the use of the computer in the solution of problems and projects that stress data analysis, data adjustment, mapping calculations and the application of computer graphics.

CIVL - 4273 Photogrammetry & Image Interpr, 3.00 Credits
Level: Lower
This course will introduce the advantages of photogrammetry, LiDAR and Remote Sensing as a mapping and planning tool. The types of photography, photo scale, flight planning techniques and specifications, displacement calculations and stereoscopic measurement are covered.

CIVL - 4900 Directed Study, 1.00 TO 6.00 Credits
Level: Lower
A student may contract for one to six credit hours of independent study through an arrangement with an instructor who agrees to direct such a study. The student will submit a plan acceptable to the instructor and to the department chairperson. The instructor and student will confer regularly regarding the process of the study.

CIVL - 5114 Land Surveying, 4.00 Credits
Prerequisite(s): CIVL 3204 with D or better
Level: Upper
Applied Learning-Practicum
A study of licensure requirements, professional liability and ethics. The legal concepts of the rules of evidence are presented and applied to written and unwritten transfers of land ownership. Riparian rights, reversionary rights, problems of appointment, procedures, both field and office, for locating written title boundaries and the writing of deed descriptions are discussed in both a theoretical and applied sense.

CIVL - 5213 Reinforced Concrete, 3.00 Credits
Prerequisite(s): CIVL 4104 with D or better or CIVL 4103 with D or better
Level: Upper
Applied Learning-Practicum
This course introduces students to basic design principles of reinforced concrete structural members such as beams, and slabs. Topics will include bending of single and doubly reinforced beams, T-beams, and slabs, as well as an introduction to the fundamentals of mechanics of bending. The design of tensile and compressive reinforcing bars in the members will be included as well. Students will learn methods and materials used in concrete work with attention given to the materials and methods of formwork construction. In addition, students will learn building code requirements for structural concrete of the American Concrete Institute (ACI).

CIVL - 5900 Directed Study, 1.00 TO 6.00 Credits
Level: Upper
A student may contract for one to six credit hours of independent study through an arrangement with an instructor who agrees to direct such a study. The student will submit a plan acceptable to the instructor and to the department chairperson. The instructor and student will confer regularly regarding the process of the study.

CIVL - 6104 Anlys & Adjmnts of Surv Mrmnts, 4.00 Credits
Prerequisite(s): CIVL 2004 with D or better and CIVL 2043 with D or better
Level: Upper
Applied Learning-Practicum
This course is an introduction to the adjustment of survey data, incorporating the use of theodolites, precision levels and total station measurement equipment are stressed. Projects are used to present underlying theory of field work, standards, specifications, and adjustment of horizontal and vertical data.

CIVL - 6106 Survey Comput & Data Manage, 4.00 Credits
Prerequisite(s): CIVL 3214 with D or better and CIVL 3204 with D or better
Level: Upper
Applied Learning-Practicum
Prerequisite(s): CIVL 2004 with D or better
Applied Learning-Practicum
This course consists of a series of field and office problems in surveying. Topics include research, field reconnaisance, data collection, deed interpretation, and mapping. Students are responsible for the execution of a comprehensive surveying project.

CIVL - 7118 Advanced Surveying, 3.00 Credits
Prerequisite(s): CIVL 3204 with D or better
Level: Lower
Applied Learning-Field Study
This course is an introductory course in construction/civil/surveying graphics. The student will be introduced to scales, dimensioning, surveying maps, house plans, building codes, and construction terminology. Contour maps, wall sections, foundation plans, floor plans, and house elevations will be drawn and plotted using industry standard software.

CIVL - 7119 Surveying Project Mgmt, 3.00 Credits
Prerequisite(s): CIVL 3204 with D or better
Level: Lower
Applied Learning-Practicum
Prerequisite(s): CIVL 3204 with D or better
Level: Lower
Applied Learning-Practicum
This course is an introduction to the U.S. Public Lands Survey System, the laws of simultaneous conveyances, and subdivision of lands. Governmental regulations and environmental considerations will be addressed. Industry standard software will be utilized in the laboratory.

CIVL - 7214 Surveying Computer Appli, 3.00 Credits
Prerequisite(s): CIVL 1204 with D or better and CIVL 2004 with D or better
Level: Lower
Applied Learning-Practicum
This course is an introduction to the concepts of field to office automation, the use of coordinate geometry (COGO) software programs and computer aided drafting (CAD) software programs. Emphasis will be placed on the use of the computer in the solution of problems and projects that stress data analysis, data adjustment, mapping calculations and the application of computer graphics.

CIVL - 7273 Photogrammetry & Image Interpr, 3.00 Credits
Level: Lower
This course will introduce the advantages of photogrammetry, LiDAR and Remote Sensing as a mapping and planning tool. The types of photography, photo scale, flight planning techniques and specifications, displacement calculations and stereoscopic measurement are covered.

CIVL - 7900 Directed Study, 1.00 TO 6.00 Credits
Level: Lower
A student may contract for one to six credit hours of independent study through an arrangement with an instructor who agrees to direct such a study. The student will submit a plan acceptable to the instructor and to the department chairperson. The instructor and student will confer regularly regarding the process of the study.

CIVL - 8104 Anlys & Adjmnts of Surv Mrmnts, 4.00 Credits
Prerequisite(s): CIVL 2004 with D or better and CIVL 2043 with D or better
Level: Upper
Applied Learning-Practicum
This course is an introduction to the adjustment of survey data, incorporating the use of theodolites, precision levels and total station measurement equipment are stressed. Projects are used to present underlying theory of field work, standards, specifications, and adjustment of horizontal and vertical data.

CIVL - 8106 Survey Comput & Data Manage, 4.00 Credits
Prerequisite(s): CIVL 3214 with D or better and CIVL 3204 with D or better
Level: Upper
Applied Learning-Practicum
Prerequisite(s): CIVL 2004 with D or better
Applied Learning-Practicum
This course consists of a series of field and office problems in surveying. Topics include research, field reconnaisance, data collection, deed interpretation, and mapping. Students are responsible for the execution of a comprehensive surveying project.

CIVL - 8214 Surveying Computer Appli, 3.00 Credits
Prerequisite(s): CIVL 1204 with D or better and CIVL 2004 with D or better
Level: Lower
Applied Learning-Practicum
This course is an introduction to the concepts of field to office automation, the use of coordinate geometry (COGO) software programs and computer aided drafting (CAD) software programs. Emphasis will be placed on the use of the computer in the solution of problems and projects that stress data analysis, data adjustment, mapping calculations and the application of computer graphics.

CIVL - 8273 Photogrammetry & Image Interpr, 3.00 Credits
Level: Lower
This course will introduce the advantages of photogrammetry, LiDAR and Remote Sensing as a mapping and planning tool. The types of photography, photo scale, flight planning techniques and specifications, displacement calculations and stereoscopic measurement are covered.

CIVL - 8900 Directed Study, 1.00 TO 6.00 Credits
Level: Lower
A student may contract for one to six credit hours of independent study through an arrangement with an instructor who agrees to direct such a study. The student will submit a plan acceptable to the instructor and to the department chairperson. The instructor and student will confer regularly regarding the process of the study.
CIVL - 6113 Environmental Tech Concepts, 3.00 Credits
Prerequisite(s): CIVL 1034 with D or better or CIVL 1034 with D or better or CIVL 1034 with D or better or MATH 2043 with D or better or MATH 1063 with D or better
Level: Upper
Upper Level
This course focuses on environmental technology systems. Topics covered will include: basic environmental concepts, water quality, water pollution, drinking water, storm water management, wastewater treatment, municipal solid waste, hazardous waste, air pollution, noise pollution, erosion control and environmental assessments. During the course, the student will analyze a site plan to determine the "best practice" solutions to storm water management challenges using industry standards. At the end of the course the student will be able to make decisions with regards to various environmental issues that will come both in the workplace and in the student's personal life. Leadership in Energy and Environmental Design, (LEED) criteria and sustainable building issues will also be addressed.

CIVL - 6122 Mechanical Systems, 3.00 Credits
Prerequisite(s): CIVL 3553 with D or better or CIVL 3554 with D or better
Level: Upper
Upper Level
An introduction to building equipment for single and multi-story projects including domestic water, sewer, heating and ventilating systems, and electrical systems. Students will design these systems for a residence or small office building. Students will review blueprints and analyze systems for a large commercial building.

CIVL - 6154 Supervisory Estimating, 4.00 Credits
Prerequisite(s): CIVL 3553 with D or better or CIVL 3503 with D or better
Level: Upper
Upper Level
This course provides in depth study of construction estimating as used in winning bids and the change order process during construction. The course teaches the student to use a quantity estimating software package and to incorporate advanced estimating techniques into a final project cost estimate. During the course, the students will complete estimates in several disciplines of construction.

CIVL - 6212 Construction Safety, 2.00 Credits
Prerequisite(s): CIVL 3553 with D or better or ARCH 4014 with D or better or CIVL 3053 with D or better
Level: Upper
Upper Level
This course is a comprehensive study of the requirements of an effective safety program that focuses on worker safety, improved productivity and accident risk management. The course will also provide students with an understanding of the Occupational Safety Health Administration (OSHA) standards and their application to the construction industry.

CIVL - 6214 Advanced Estimating, 4.00 Credits
Prerequisite(s): CIVL 4143 with D or better
Level: Upper
Applied Learning-Practicum, Upper Level
This course is an extension of topics learned in the basic estimating course. The course teaches students to use a database estimating software package to incorporate advanced estimating techniques into a final project cost estimate. During the course, the students will create estimates on several types of projects including commercial building and heavy civil projects. The students will also learn the concepts of database estimating including how to create and edit a database.

CIVL - 7001 Sr Seminar & Project Design 1, 1.00 Credit
Prerequisite(s): Applied Learning-Creative Work, Upper Level
Level: Upper
Applied Learning-Practicum, Upper Level
This course is the first of a two-semester sequence required for all Geomatics/Land Surveying Engineering Technology Bachelor seniors. Students design and implement a technical project for completion in CIVL 8002. Project proposal and oral reports are presented for initial approval by department faculty. The weekly seminar encompasses professional, licensure examination preparation, aspects of post-graduation professional employment, review of initial project proposal and consultation on project progress.

CIVL - 7013 Land Development & Design, 3.00 Credits
Prerequisite(s): CIVL 1204 with D or better and ( MATH 1054 with D or better or MATH 1063 with D or better or MATH 2043 with D or better or MATH 2074 with D or better and MATH 2094 with D or better )
Level: Upper
Upper Level
This course is intended to give the Civil Engineering Technology student an understanding of the issues related to site development and drainage issues for land development. Students will study and create land development plans including drainage calculation, street and road design, water distribution, and sewer design. Issues related to sustainable development will be integrated into the topics to provide the student with an appreciation of concerns related to energy, as well as material and land conservation.

CIVL - 7114 Geographic Information Systems, 4.00 Credits
Prerequisite(s): CIVL 3214 with D or better
Level: Upper
Upper Level
A broad-based introduction to GIS; especially the application of spatial analysis and modeling. Applications will cover hardware and software considerations, map overlays, automation in thematic and topographic mapping, raster/vector devices, data acquisition, and related database storage and algorithms. Advanced topics will include error modeling, data uncertainty, and new directions and impacts of GIS.

CIVL - 7213 Construction Systems, 3.00 Credits
Prerequisite(s): CIVL 4143 with D or better
Level: Upper
Upper Level
This course examines how people and machines interact to build efficient systems that improve productivity in the construction industry. This course will document existing and emerging construction systems and will delve extensively into production capacity and uses of construction equipment. This course culminates with a project to design equipment spreads for an earthwork project.

CIVL - 7223 Construction Project Planning, 3.00 Credits
Prerequisite(s): CIVL 3554 with D or better or CIVL 3553 with D or better
Level: Upper
Applied Learning-Creative Work, Upper Level
Students will develop a construction project management logic diagram for large multi-phased projects. The students will use software for scheduling, monitoring, and "crashing" projects to evaluate alternatives to reduce time to completion and to ensure cost effectiveness and safety considerations.

CIVL - 7503 Construction Supervision, 3.00 Credits
Prerequisite(s): COMP 1503 with D or better
Level: Upper
Upper Level
This course is an exploration of construction contract types and language. Managing resources such as time, labor, equipment, materials and budget are introduced. Additionally students will be introduced to the business of construction through construction job site cost accounting. Effective oral and written construction supervision communication will be addressed.

CIVL - 7523 Construction Scheduling, 3.00 Credits
Prerequisite(s): CIVL 7503 with D or better
Level: Upper
Applied Learning-Practicum, Upper Level
In this course, students will study job site construction scheduling. Software will be employed to produce Critical Path Method analysis. Topics include bar charts, basic scheduling networks, critical path method, resource allocation and leveling, scheduling update and project control, schedule compression techniques, and an introduction to Last Planner System. Students will be required to complete a scheduling project using appropriate industry documents and processes.

CIVL - 8003 Sr Seminar & Project Design 2, 3.00 Credits
Prerequisite(s): CIVL 7001 with D or better
Level: Upper
Upper Level
This course is an in-depth study of the documents and processes for construction project administration, including submittals, subcontracting, expediting, pay procedures, closeout and reporting.

CIVL - 8104 Global Positioning Systems, 4.00 Credits
Prerequisite(s): CIVL 3214 with D or better
Level: Upper
Upper Level
This course is designed to provide an introduction to the following topics: The U.S. Global Positioning System; other satellite-based navigation systems; GPS terminology; sources of error; GPS accuracy in forested conditions; post-process differential correction; WAAS, DGPS; and mission planning.

CIVL - 8123 Construction Project Admin, 3.00 Credits
Prerequisite(s): CIVL 4043 with D or better or CIVL 7503 with D or better
Level: Upper
Upper Level
This course is an in-depth study of the documents and processes for construction project administration, including submittals, subcontracting, expediting, pay procedures, closeout and reporting. This course culminates in a simulated construction project where students assume various stakeholder roles.

CIVL - 8512 Construction Mgmt Internship, 12.00 Credits
Prerequisite(s): CIVL 7503 with D or better
Level: Upper
Applied Learning-Internship, Upper Level
This course is a work experience designed to assist the student in making the transition from classroom to the construction industry. Students will complete an approved supervised work experience under the direct supervision of an owner, manager or supervisor in a construction related industry. Each student will have a planned work program of educational objectives approved by the student, site supervisor, and Internship Coordinator. Written and oral reports, along with a journal of work activities and experience, will be required.

CJUS - CRIMINAL JUSTICE

CJUS - 1003 Intro to Criminal Justice, 3.00 Credits
Level: Lower
This course examines the three segments of the criminal justice system in the U.S. - law enforcement, the courts and corrections. Included is study of their evolution, philosophy, structure, responsibilities, agencies, and ethical obligations. Also examined are the role of the U.S. Constitution and of state and federal laws, the role of the criminal justice system in a democratic society and current issues facing those who work in the criminal justice field.

CJUS - 2003 Introduction to Law, 3.00 Credits
Level: Lower
This course introduces students to civil and criminal law. It examines the historical development of laws in the United States, distinguishing between civil and criminal laws. It also examines the essential elements of substantive law, procedural law and civil processes, and how they interact, as well as the evolution of legal realism and legal interpretation. The roles of those involved with civil and criminal law to include types of courts, plaintiffs, defendants, police, prosecutors, judges and other court-related personnel are discussed. Special emphasis is placed on the basic principles to manage complex situations during the administration of justice.
COURSE DESCRIPTIONS

CJUS - 3003 Cybercrime, 3.00 Credits
Level: Lower
As emerging technologies continue to redefine the very nature of crime, the legal apparatus in the United States and around world must adapt accordingly. This course is designed to provide an overview of topics related to cybercrime. The theories and legal issues, with emphasis on technology will be used to address cybercrime issues and to apply critical thinking skills to modern criminal justice practices, procedures, and policies related to cybercrime. Topics include legalistic, enforcement, behavioral, social, and technological issues that are related to the cybercrime problem.

CJUS - 4003 Corrections Process in the U.S., 3.00 Credits
Prerequisite(s): CJUS 1003 with D or better
Level: Lower
This course provides an introduction to the corrections process and examines state, local and federal correctional programs in the United States. Included is the study of the evolution, philosophy, structure, responsibilities and types of correctional agencies as well as the roles and ethical obligations of those working in the corrections system. The impact of American Correctional Association Standards (ACA) on correctional agencies is examined. Attention also is paid to public policy as it relates to issues affecting the corrections process including incapacitation versus rehabilitation and offender versus victim rights.

CJUS - 4103 Policing in a Free Society, 3.00 Credits
Prerequisite(s): CJUS 1003 with C or better
Level: Lower
Applied Learning-Creative Work
This course is an introduction to the responsibilities of police and public agencies at the local, state and federal levels. Police operations are examined relative to their effectiveness in crime control, delivery of services and maintenance of order with particular emphasis on patrol operations and preserving the freedom of citizens. Principles of management as they relate to organizational structures and activities of public and private police and corresponding agencies in both internal and external sources. A case method is used to provide a variety of real world examples. This course may not be repeated for credit unless internal sources. A case method is used to provide a variety of real world examples. This course may not be repeated for credit.

CJUS - 5003 Constitutional Issues in Crim, 3.00 Credits
Prerequisite(s): CJUS 1003 with D or better
Level: Upper
Upper Level
A comprehensive examination of the U.S. Constitution and the impact of resulting case law on public policy relative to criminal and social systems, governmental authority and civil liberties. In this course students will research and analyze social and political policies resulting from these impacts in areas such as pornography, abortion, women’s rights, voting rights, sentencing equality, immigration, terrorism, juvenile death penalty, and the Patriot Act to name a few. This is a discussion-based course requiring students to participate in in-depth peer discussions. Students are required to analyze the impacts of case law on state and local law enforcement as it pertains to a specific topic culminating in a research project.

CJUS - 5103 Courts in Contemporary Society, 3.00 Credits
Prerequisite(s): CJUS 1003 with D or better
Level: Upper
Upper Level
The Courts in Contemporary Society is a comprehensive analysis of the courts: structure, process, and issues. This course provides a historical perspective of courts in America from past to present requiring students to critically analyze social policy affecting the courts’ transformation to contemporary functions including diversion, alternative dispute resolution, recidivism, and specialty courts. This examines the law and its origins, compares the federal and state court systems, and examines juvenile justice process in America.

CJUS - 5113 Contemp Public Safety Leader, 3.00 Credits
Prerequisite(s): BUAD 3153 with D or better or CJUS 4103 with D or better
Level: Upper
Upper Level
This course provides the evolution of leadership theorists and theories including behavioral, situational and contingency schools of thought. Students evaluate the various leadership styles and attributes of effective and ineffective leaders. Students must analyze the relationship between effective leadership and teamwork, organizational culture, diversity, ethics and interpersonal communications, organizational strategy, culture, technology, conflict resolution, and problem solving. This course culminates a synthesizing of leadership models for transformational change in a written practical exercise.

CJUS - 5303 Glob Persp in Crim Justice, 3.00 Credits
Prerequisite(s): (CJUS 1003 with C or better or SOCI 1163 with C or better)
Level: Upper
Upper Level
In this course, students will learn about criminal justice systems of other countries. Students will compare and contrast the American criminal justice system with various systems from around the world, which provides a global perspective. Topics include legal systems of the world, policing and corrections systems in other countries, ethical issues of other countries, criminal justice agencies, international courts, Interpol, and transnational crimes. Students will be divided into groups to conduct research on multiple international criminal justice systems.

CJUS - 6003 Law & Criminal Evidence, 3.00 Credits
Prerequisite(s): CJUS 1003 with D or better or SOCI 1243 with D or better
Level: Upper
Upper Level
This course examines the origin, development, philosophy, and legal bases of evidence, including a brief survey of the system of constitutional and procedural rules and standards affecting evidence collection and admissibility. Specific topics include evidence collection and presentation, the trial process, expert and lay testimony, scientific evidence, and confessions and admissions. The course requires a research paper.

CJUS - 6203 Ethics in Criminal Justice Adm, 3.00 Credits
Prerequisite(s): SOCI 1183 with C or better
Level: Upper
Upper Level
This course examines ethical issues in the criminal justice (CJ) field, including an analysis of diversity and situational events of persons employed in the criminal justice field. Students will evaluate leadership theory and the emerging issues and challenges confronting leaders in public safety/criminal justice. Students will also synthesize ethical philosophies and the responsibilities of CJ practitioners at the local, state, and federal levels. Research will be conducted such contemporary topics as immigration, terrorism, and police conduct in conjunction with the U.S. Constitution culminating with a written practical framework for successful and ethical leadership in a CJ setting.

CJUS - 7004 Criminal Investigation & Mgmt, 4.00 Credits
Prerequisite(s): CJUS 6003 with D or better
Level: Upper
Applied Learning-Practicum, Upper Level
This course is a comprehensive examination of contemporary techniques, principles, problems, and theories and management of the criminal investigation process. This course provides interactive experience between classroom and crime scene evaluation. Emphasizing initial response to a scene through the questioning of witnesses and suspects; collection and preservation of evidence; preparation of case evidence for courtroom testimony and the management of this discipline. This course requires a lab course in conjunction with classroom presentation and is an applied course.

CJUS - 8003 Criminal Investigation Capston, 3.00 Credits
Prerequisite(s): CJUS 7004 with D or better
Level: Upper
Applied Learning-Practicum, Upper Level
The Criminal Investigation Capstone course applies case law, evidence identification, and preservation of evidence from initial crime scene through courtroom testimony. This course evaluates the scientific aspects of criminal investigation from the crime scene to the crime laboratory. This includes the application of identifying, preserving and processing fingerprints; tool impressions; hair, fibers, blood and narcotics; casts and molds; and interview and interrogation techniques. This course utilizes law enforcement and crime lab experience in an applied setting. This capstone project requires student’s crime scene notes, logs, and investigative reports in a completed case file that identifies the crime, suspects, methods used to secure suspects and witnesses, as well as documentation of assistance to the law enforcement agency.

CJUS - 8012 Criminal Justice Internship, 12.00 Credits
Prerequisite(s): CJUS 1003 with C or better and CJUS 6203 with C or better
Level: Upper
Applied Learning-Internship, Upper Level
This course provides a minimum of 480 hours of work experience in an approved public safety agency, commonly defined as police, courts, corrections, or fire service, or in a commercial/industrial security agency. The agency or industry selected must be approved by the Department Chair and Internship Coordinator and be specifically related to the curriculum of the student. This course requires a comprehensive final report contrasting the selected agency with contemporary issues and the maintenance of a daily diary. Students must meet the standards of their cooperating agency in order to participate.

CJUS - 8103 Criminal Justice Internship, 3.00 Credits
Prerequisite(s): CJUS 1003 with C or better and CJUS 6203 with C or better
Level: Upper
Applied Learning-Internship, Upper Level
This course provides a minimum of 120 hours of work experience in an approved public safety agency, commonly defined as police, courts, corrections, or fire service, or in a commercial/industrial security agency. The agency or industry selected must be approved by the Internship Coordinator and be specifically related to the curriculum of the student. This course requires a comprehensive final report and daily diary.

CJUS - 8203 Pst Security Admin in America, 3.00 Credits
Prerequisite(s): CJUS 5003 with C or better
Level: Upper
Upper Level
This course examines management theories and concepts applied to private security. The examination of private security theories and principles is used to analyze effective security management schemes, ranging from leadership and supervision to recruitment, selection of employees, training, performance appraisal, labor relations and other issues. This course contrasts public sector policing and private security in America with student forecasting of the future of the private security industry.

COMP - COMPOSITION

COMP - 1403 English Fundamentals*, 3.00 Credits
Corequisite(s):
Level: Remedial
Remedial
Remedial
English Fundamentals is a course designed specifically for the study and for the improvement of basic writing skills and techniques. As such, English Fundamentals allows the student to master a variety of sentence constructions and paragraph types, culminating in the ability to create a multi-paragraph essay. The emphasis is on grammar, spelling, punctuation, sentence structure, vocabulary and sentence structure, and proofreading and editing skills. The course focuses on producing clear, concise, and information-rich sentences and paragraphs. This is a remedial/completion of the Freshman Composition Competency Exam will affect the final course grade. This course is a Co-Requisite course, and it must be taken with a paired COMP 1503: Freshman Composition course.

COMP - 1503 Freshman Composition, 3.00 Credits
Level: Lower
Freshman Composition is intended to enable students to express themselves in essays. They will generate ideas, develop thesis statements, plan paragraphs, organize compositions, and select rhetorical strategies. Essays and a reference paper are required. Readings stimulate language use, critical thinking, and critical reasoning, and students develop competent critical thinking, and critical reasoning, and students develop competent

COMP - 2703 Into to Tech Comm & Emer. Med, 3.00 Credits
Prerequisite(s): COMP 1503 with D or better
Level: Lower
Gen Ed - Humanities, Liberal Arts and Science
This course presents an introduction to the major in Technical Communication and Emergent Media and the related disciplines and professions. Students will explore the rhetorical situations of technical communication through various genres including reports, workplace and employment documentation, presentations, and visual communication. Emphasis will be placed on the media forms and intercultural contexts of technical communication.

223
COMP - 2000 Directed Study, 1.00 TO 4.00 Credits
Level: Lower
Liberal Arts and Science
The student may contract for one to four credit hours of independent study through an arrangement with the instructor. The student must submit a plan acceptable for the instructor and the department chairperson. To be substituted for the listed humanities requirements, a directed study course must be so designated by the department chair. Writing is continued in assignments related to readings, class discussions, and lectures.

COMP - 2900 Directed Study, 1.00 TO 4.00 Credits
Prerequisite(s): COMP 1503 with D or better and ( LITR 2603 with D or better or LITR 2033 with D or better or LITR 2343 with D or better or LITR 2703 with D or better or LITR 2813 with D or better or LITR 2903 with D or better or LITR 2913 with D or better or LITR 3233 with D or better or LITR 3333 with D or better or LITR 4333 with D or better or LITR 6003 with D or better or LITR 7003 with D or better or LITR 7013 with D or better or LITR 7023 with D or better )
Level: Lower
Gen Ed - Humanities, Liberal Arts and Science
Directed study course must be so designated by the department chair. Writing is continued in assignments related to readings, class discussions, and lectures.

COMP - 3503 Advanced Composition, 3.00 Credits
Prerequisite(s): COMP 1503 with C or better or LITR 2603 with C or better or LITR 2033 with C or better or LITR 2343 with C or better or LITR 2503 with C or better or LITR 2603 with C or better or LITR 2703 with C or better or LITR 2813 with C or better or LITR 2903 with C or better or LITR 2900 with C or better or LITR 2913 with C or better or LITR 3233 with C or better or LITR 4333 with C or better or LITR 7003 with C or better )
Level: Lower
This course focuses on developing the student’s ability to write at an advanced level about topics of broad cultural importance. Students will demonstrate awareness and skill in producing written communications on par with published prose. This class will go beyond the mechanics of proper English composition and explore concepts such as originality, honesty, the development of style, meant to enhance the student's skills in writing for a variety of contexts. Examples of successful writing for emergent media include writing for social media, blogs, and interactive formats. Students will also explore how media networks form discourse communities and discuss marginalized groups in a global society. Emphasis will be placed on using emergent media for social good in the context of a civic engagement project.

COMP - 3603 Writing for Emergent Media, 3.00 Credits
Prerequisite(s): COMP 1503 with D or better and ( LITR 2603 with D or better or LITR 2033 with D or better or LITR 2343 with D or better or LITR 2503 with D or better or LITR 2603 with D or better or LITR 2703 with D or better or LITR 2813 with D or better or LITR 2900 with D or better or LITR 2913 with D or better or LITR 3233 with D or better or LITR 4333 with D or better or LITR 7003 with D or better or LITR 7013 with D or better or LITR 7023 with D or better )
Level: Lower
Liberal Arts and Science
This course is an introduction to the theory and practice of writing for emergent media. Writing is emphasized in response to readings from accomplished essayists such as Plato, Montaigne, Johnson, Orwell, Emerson, Thoreau, Mencken, Didion, and Dillard, among others.

COMP - 5703 Technical Writing II, 3.00 Credits
Prerequisite(s): COMP 1503 with D or better and ( LITR 2603 with D or better or LITR 2033 with D or better or LITR 2343 with D or better or LITR 2503 with D or better or LITR 2603 with D or better or LITR 2703 with D or better or LITR 2813 with D or better or LITR 2900 with D or better or LITR 2913 with D or better or LITR 3233 with D or better or LITR 4333 with D or better or LITR 7003 with D or better or LITR 7013 with D or better or LITR 7023 with D or better )
Level: Upper
Applied Learning - Service-Learn, Gen Ed - Credit Only, Liberal Arts and Science, Upper Level
This course will introduce students to content management with an emphasis on editing digital content for multiple platforms and audiences. Students will learn about content life cycles, genres and tools central to content management, collaboration and accessibility, content analysis, and technical editing. Editing will be comprehensive and collaborative, with a focus on producing content for multiple platforms and audiences. Students will learn about digital content, genres and tools central to content management, collaboration and accessibility, content analysis, and technical editing. Editing will be comprehensive and collaborative, with a focus on producing content for multiple platforms and audiences.

COMP - 5803 Internship, 3.00 Credits
Prerequisite(s): COMP 2703 with D or better and SPCH 4003 with D or better and SPCH 5003 with D or better and COMP 5703 with D or better and COMP 6003 with D or better
Corequisite(s): COMP 2703 with D or better and SPCH 4003 with D or better and SPCH 5003 with D or better and COMP 5703 with D or better and COMP 6003 with D or better and COMP 7003 with D or better and COMP 7603 with D or better
Level: Upper
Liberal Arts and Science, Upper Level
This course is a capstone project within their area of concentration. Students will reflect on their academic experiences and career readiness through the completion of their degree portfolio.

COURSE DESCRIPTIONS

COMP - 7103 Design, & Ed. for Usability, 3.00 Credits
Prerequisite(s): COMP 2703 with D or better and COMP 3603 with D or better and COMP 4003 with D or better and COMP 5003 with D or better and COMP 5703 with D or better and COMP 6003 with D or better
Level: Upper
Gen Ed - Credit Only, Liberal Arts and Science, Upper Level

This course is a capstone project within their area of concentration. Students will reflect on their academic experiences and career readiness through the completion of their degree portfolio.

CTRP - COURT REPORTING

CTRP - 1113 Med & Legal Term for Court Rep, 3.00 Credits
Level: Lower
This course will teach the student the basics of legal and medical terminology as required by the National Court Reporters Association’s General Requirements and Minimum Standards (GRMS). Students will be able to use the terminology learned to build and enhance their personal dictionary and work with the shorthand writing machine to produce an instantaneous real-time translation of the terminology learned. The goal of the course is to give the student knowledge of anatomy and medical terminologies, including root words, prefixes, suffixes, body systems and functions, psychological and physical diseases, drugs, and methods of researching medical information, as well as knowledge of civil law, criminal law, the judicial system (e.g. discovery, trial, and appellate processes), and legal terms. Students will complete supervised and documented field work in a relevant industry, government, or educational setting. Written and oral reports, journaling, and the creation of other relevant artifacts for the completion of a professional ePortfolio will be required.

CTRP - 1162 Realtime Writing Theory Ia, 2.00 Credits
Level: Lower
Applied Learning - Practicum
Realtime Writing Theory I teaches students how to write the spoken word with punctuation by means of a conflict-free, realtime-ready shorthand theory and provide instantaneous translation. It includes the use of online computer-aided technology and teacher interaction; live practice dictation for speed and accuracy; read back and analysis of shorthand notes. NCRA requirements include the following: students are required to transcribe steno notes and speed takes under timed instructional supervision or, if Internet students, sign a sworn verification form stating that the test was completed without the aid of anyone present and without cheating. Speed takes shall be monitored and timed in the same way. Students are required to transcribe at least once a week. All speed takes and test recordings shall be determined by the student's computer immediately following tests. Internet students must sign a sworn statement verifying that the material has been deleted from their computers and no backup has been made. Students shall have access to the minimum grading criteria as set forth by the NCRA requirements. Successful completion of the course requires a grade of "C" or better. The course includes online computer-aided technology for realtime translation.
CTRP - 1172 Realtime Writing Theory Ia, 2.00 Credits Level: Lower
Applied Learning-Practicum
Realtime Writing Theory I teaches students how to write the spoken word with punctuation by means of a conflict-free, realtime-ready shorthand theory and provide instantaneous translation. It includes the use of online computer-aided technology and teacher interaction; live practice dictation for speed and accuracy; read back and analysis of shorthand notes. NCRA requirements include the following: students are required to transcribe steno notes and speed takes under timed institutional supervision or, if an internet student, sign a sworn statement verifying that the work was completed without the aid of anyone present and without cheating. Speed takes shall be monitored and timed in the same way. Students are required to transcribe at least once a week. All speed takes and test recordings shall be deleted immediately from the student's computer immediately following tests. Internet students must sign a sworn statement verifying that the work has been deleted from their computers and no backup has been made. Students shall have access to the minimum grading criteria as set forth by the NCRA requirements. Successful completion of the course requires a grade of "C" or better. This course includes online computer-aided technology for realtime translation.

CTRP - 1174 Realtime Writing Theory I, 4.00 Credits Level: Lower
Applied Learning-Practicum
Realtime Writing Theory I teaches students how to write the spoken word with punctuation by means of a conflict-free, realtime-ready shorthand theory and provide instantaneous translation. It includes the use of on-line computer-aided technology and teacher interaction; live practice dictation for speed and accuracy; read back and analysis of shorthand notes. NCRA requirements include the following: students are required to transcribe steno notes and speed takes under timed institutional supervision or if an internet student, sign a sworn verification form stating that the work was completed without the aid of anyone present and without cheating. Speed takes shall be monitored and timed in the same way. Students are required to transcribe at least once a week. All speed takes and tests shall be deleted immediately. Internet students must sign a sworn statement verifying the material has been deleted from their computer and no backup has been made. Students shall have access to the minimum grading criteria as set forth by the NCRA requirements.

CTRP - 1182 Realtime Writing Theory Iia, 2.00 Credits
Prerequisite(s): CTRP 1162 with C or better or CTRP 1172 with C or better Level: Lower
Applied Learning-Practicum
In a continuation of Realtime Writing Theory I, Realtime Writing Theory II teaches students how to write the spoken word with punctuation by means of conflict-free, realtime-ready shorthand theory and provide instantaneous translation. It includes the use of online computer-aided technology and teacher interaction; live practice dictation for speed and accuracy; read back and analysis of shorthand notes. NCRA requirements include the following: students are required to transcribe steno notes and speed takes under timed institutional supervision or, if internet students, sign a sworn verification form stating that the work was completed without the aid of anyone present and without cheating. Speed takes shall be monitored and timed in the same way. Students are required to transcribe at least once a week. All speed takes and test recordings shall be deleted from the student's computer immediately following tests. Internet students must sign a sworn statement verifying that the material has been deleted from their computers and no backup has been made. Students shall have access to the minimum grading criteria as set forth by the NCRA requirements. Successful completion of the course requires a grade of "C" or better. The course includes online computer-aided technology for realtime translation.

CTRP - 1192 Realtime Writing Theory Iib, 2.00 Credits
Prerequisite(s): CTRP 1162 with C or better or CTRP 1172 with C or better Level: Lower
Applied Learning-Practicum
In a continuation of Realtime Writing Theory I, Realtime Writing Theory II teaches students how to write the spoken word with punctuation by means of conflict-free, realtime-ready shorthand theory and provide instantaneous translation. It includes the use of online computer-aided technology and teacher interaction; live practice dictation for speed and accuracy; read back and analysis of shorthand notes. NCRA requirements include the following: students are required to transcribe steno notes and speed takes under timed institutional supervision or, if internet students, sign a sworn verification form stating that the work was completed without the aid of anyone present and without cheating. Speed takes shall be monitored and timed in the same way. Students are required to transcribe at least once a week. All speed takes and test recordings shall be deleted from the student's computer immediately following tests. Internet students must sign a sworn statement verifying that the work has been deleted from their computers and no backup has been made. Students shall have access to the minimum grading criteria as set forth by the NCRA requirements. Successful completion of the course requires a grade of "C" or better. The course includes online computer-aided technology for realtime translation.

CTRP - 1543 Grammar for Court Reporters, 3.00 Credits
Level: Lower
In this course students will develop a high level ability in spelling, vocabulary, sentence structure, word choice, capitalization and punctuation with direct application to business writing and speaking. This course encourages application of this knowledge through editing activities. Attention is given to diagnosing fragments, run-ons, comma splices and parallelism errors. Emphasis is placed on mastery of grammatical structure needed for effective writing of sentences, paragraphs, and essays. When this course serves as the prerequisite for another course, the student must receive a grade of "C" or better in this course.

CTRP - 2226 Realtime Writing Theory IIIa, 2.00 Credits
Prerequisite(s): ( CTRP 1162 with C or better or CTRP 1192 with C or better ) or CTRP 1174 with C or better Level: Lower
Applied Learning-Practicum
This course is a continuation of basic realtime writing theory. The student will continue to learn to write, read, and transcribe the spoken word by means of a conflict-free, realtime-ready shorthand theory and provide instantaneous translation. Students are required to transcribe steno notes and speed takes. NCRA requirements include the following: students are required to transcribe steno notes and speed takes under timed institutional supervision or, if internet students, sign a sworn verification form stating that the work was completed without the aid of anyone present and without cheating. Speed takes shall be monitored and timed in the same way. Students are required to transcribe at least once a week. All speed takes and test recordings shall be deleted from the student's computer immediately following tests. Internet students must sign a sworn statement verifying that the material has been deleted from their computers and no backup has been made. Students shall have access to the minimum grading criteria as set forth by the NCRA requirements. Successful completion of the course requires a grade of "C" or better. The course includes online computer-aided technology for realtime translation.

CTRP - 2227 Realtime Writing Theory IIIb, 2.00 Credits
Prerequisite(s): ( CTRP 1162 with C or better or CTRP 1192 with C or better ) or CTRP 1174 with C or better Level: Lower
Applied Learning-Practicum
This course is a continuation of basic realtime writing theory. The student will continue to learn to write, read, and transcribe the spoken word by means of a conflict-free, realtime-ready shorthand theory and provide instantaneous translation. Students are required to transcribe steno notes and speed takes. NCRA requirements include the following: students are required to transcribe steno notes and speed takes under timed institutional supervision or, if internet students, sign a sworn verification form stating that the work was completed without the aid of anyone present and without cheating. Speed takes shall be monitored and timed in the same way. Students are required to transcribe at least once a week. All speed takes and test recordings shall be deleted from the student's computer immediately following tests. Internet students must sign a sworn statement verifying that the material has been deleted from their computers and no backup has been made. Students shall have access to the minimum grading criteria as set forth by the NCRA requirements. Successful completion of the course requires a grade of "C" or better. The course includes online computer-aided technology for realtime translation.

CTRP - 2228 Realtime Writing Theory IVa, 2.00 Credits
Prerequisite(s): CTRP 2262 with C or better or CTRP 2227 with C or better Level: Lower
Applied Learning-Practicum
This course is a continuation of basic realtime writing theory. The student will continue to learn to write, read, and transcribe the spoken word by means of a conflict-free, realtime-ready shorthand theory and provide instantaneous translation. Students are required to transcribe steno notes and speed takes. NCRA requirements include the following: students are required to transcribe steno notes and speed takes under timed institutional supervision or, if internet students, sign a sworn verification form stating that the work was completed without the aid of anyone present and without cheating. Speed takes shall be monitored and timed in the same way. Students are required to transcribe at least once a week. All speed takes and test recordings shall be deleted from the student's computer immediately following tests. Internet students must sign a sworn statement verifying that the material has been deleted from their computers and no backup has been made. Students shall have access to the minimum grading criteria as set forth by the NCRA requirements. Successful completion of the course requires a grade of "C" or better. The course includes online computer-aided technology for realtime translation.
CTRP - 2292 Realtime Writing Theory IVb, 2.00 Credits
Prerequisite(s): CTRP 2262 with C or better or CTRP 2272 with C or better
Level: Lower
Applied Learning-Practicum
This course is a continuation of basic realtime writing theory. The student will continue to learn to write, read, transcribe the spoken word by means of conflict-free, realtime-ready shorthand theory and provide instantaneous translation. Students are required to transcribe steno notes and speed takes. NCRA requirements include the following: students are required to transcribe steno notes and speed takes under institutional supervision or if, internet students, sign a sworn verification form stating that the work was completed without the aid of anyone present and without cheating. Speed takes shall be monitored and timed in the same way. Students are required to transcribe at least once a week. All speed takes and test recordings shall be deleted from the student's computer immediately following tests. Internet students must sign a sworn statement verifying that the material has been deleted from their computers and no backup has been made. Students shall have access to the minimum grading criteria as set forth by the NCRA requirements. Successful completion of the course requires a grade of "C" or better. The course includes computer-aided technology for realtime translation.

CTRP - 2603 Persson Dictionary Prod & Maint, 3.00 Credits
Prerequisite(s): CTRP 2282 with C or better or CTRP 2274 with C or better or CTRP 2292 with C or better
Level: Lower
This course will be an extension of the material learned in Computer Aided Transcription course and is a direct application of the realtime techniques learned in Realtime Writing Theory I and II course and Realtime Writing Theory III and IV courses. The topics to be covered will include personal dictionaries; update area; D-Definitions, J-Definitions, R-Definitions and E-Definitions; job dictionaries; power definitions; phonetic tables; how to insert, modify, and delete entries; filtering dictionary; writing dictionary, backing up and restoring dictionaries, and dictionary maintenance. Students will build and maintain their personal dictionaries by adding new entries throughout the course.

CTRP - 3111 Transcript Production, 1.00 Credit
Prerequisite(s): CTRP 2274 with D or better
Level: Lower
Students will learn how to properly format and prepare judicial transcripts, including cover page, page numbering, page breaks, and exhibit indexes, question and answer, coloquy, parentheticals, jurats, and certification pages, as well as how to prepare ASCII disks and mini-transcripts.

CTRP - 3163 Speedbbldg I for Report & Capt, 3.00 Credits
Prerequisite(s): CTRP 2274 with C or better or CTRP 2292 with C or better or CTRP 2292 with C or better
Level: Lower
Applied Learning-Practicum
The student will continue to learn to write, read, and transcribe the spoken word by means of a conflict-free, realtime-ready shorthand theory. Students must be able to transcribe three-speed minute dictations of unfamiliar material in the following areas: 80 wpm on literary material, 100 wpm on jury charge material, and 120 wpm on two-voice material. All speed takes must be transcribed with a minimum of 95 percent accuracy or higher. Testing material used for speed takes will be given at incremental speeds on unfamiliar material; the same material will not be used more than once every six months. Internet students must sign a sworn verification form stating that the work was completed without the aid of anyone present and without cheating. Speed takes shall be monitored and timed in the same way. Students are required to transcribe at least once a week. All speed takes and tests shall be deleted immediately. Students must sign a sworn statement verifying that the material has been deleted from their computers and no backup has been made. Students shall have access to the minimum grading criteria as set forth by the NCRA. Successful completion of the course requires a grade of "C" or better. The course includes online computer-aided technology for realtime translation.

CTRP - 3263 Tech for Reporting/Captioning, 3.00 Credits
Prerequisite(s): CTRP 2274 with C or better or CTRP 2282 with C or better or CTRP 2292 with C or better
Level: Lower
This course will complement the Computer Aided Transcription course (CTRP 3373) to the extent that information pertaining to the computers, hardware, software, maintenance, and upkeep will be enhanced. The material covered in this class for reporting students will relate to reporting technology, computer operating systems, realtime applications, realtime reporting in the captioning/CART environment, litigation support, video recording, and information on related software packages used by judicial reporters. The material covered in this class for captioning students will relate to captioning technology, computer operating systems, online translation systems, basic setup and maintenance of broadcast captioner's equipment, broadcast news production preparation, preprinting, verbalm v. word substitutes, finger spelling, history of captioning, and information relating to the deaf and hard-of-hearing community.

CTRP - 3373 Computer Aided Transcription, 3.00 Credits
Level: Lower
This course will teach the student how the computer works with the shorthand writing machine to produce an instantaneous transcript using realtime translation. The course includes computer concepts and terminology and basic file management, saving, editing, and printing. The student will learn the basics of a computer application software program to a more advanced level of understanding and appreciation. The goal of the CAT course is to integrate computer concepts and English punctuation rules to produce an accurate and saleable work product. Students will review basic punctuation rules and apply them to transcript production.

CTRP - 4262 Speed Building Ila, 2.00 Credits
Prerequisite(s): CTRP 3163 with C or better
Level: Lower
Applied Learning-Practicum
This course is a continuation of Speed Building I for Reporters and Captioners. The student will continue to learn to write, read, and transcribe the spoken word by means of a conflict-free, realtime-ready shorthand theory. Reporting students must be able to transcribe five minutes of unfamiliar dictation with at least 95 percent accuracy in each of the areas listed: literary at 100 wpm, jury charge at 120 wpm, and two-voice at 140 wpm. Dictation includes two-voice and multi-voice testimony (including medical and technical material), literary, jury charge, and current events. Testing material used for speed takes will be given at incremental speeds on unfamiliar material; the same material will not be used more than once every six months. Students are required to transcribe steno notes and speed takes under institutional supervision or if online students, sign a sworn verification form stating that the work was completed without the aid of anyone present and without cheating. Speed takes shall be monitored and timed in the same way. Students are required to transcribe at least once a week. All speed takes and tests shall be deleted immediately. Online students must sign a sworn statement verifying that the material has been deleted from their computers and no backup has been made. Students shall have access to the minimum grading criteria as set forth by the NCRA. Successful completion of the course requires a grade of "C" or better. The course includes online computer-aided technology for realtime translation.

CTRP - 4272 Speed Building IIb, 2.00 Credits
Prerequisite(s): CTRP 3163 with C or better
Level: Lower
Applied Learning-Practicum
This course is a continuation of Speed Building I for Reporters and Captioners. The student will continue to learn to write, read, and transcribe the spoken word by means of a conflict-free, realtime-ready shorthand theory. Reporting students must be able to transcribe five minutes of unfamiliar dictation with at least 95 percent accuracy in each of the areas listed: literary at 130 wpm, jury charge at 150 wpm, and two-voice at 170 wpm. Dictation includes two-voice and multi-voice testimony (including medical and technical material), literary, jury charge, and current events. Testing material used for speed takes will be given at incremental speeds on unfamiliar material; the same material will not be used more than once every six months. Students are required to transcribe steno notes and speed takes under institutional supervision or if online students, sign a sworn verification form stating that the work was completed without the aid of anyone present and without cheating. Speed takes shall be monitored and timed in the same way. Students are required to transcribe at least once a week. All speed takes and tests shall be deleted immediately. Online students must sign a sworn statement verifying that the material has been deleted from their computers and no backup has been made. Students shall have access to the minimum grading criteria as set forth by the NCRA. Successful completion of the course requires a grade of "C" or better. The course includes online computer-aided technology for realtime translation.

CTRP - 4282 Speed Building Iilla, 2.00 Credits
Prerequisite(s): CTRP 4262 with C or better or CTRP 4272 with C or better
Level: Lower
This course is a continuation of Speed Building II for Reporters and Captioners. The student will continue to learn to write, read, and transcribe the spoken word by means of a conflict-free, realtime-ready shorthand theory. Reporting students must be able to transcribe five minutes of unfamiliar dictation with at least 95 percent accuracy in each of the areas listed: literary at 130 wpm, jury charge at 150 wpm, and two-voice at 170 wpm. Dictation includes two-voice and multi-voice testimony (including medical and technical material), literary, jury charge, and current events. Testing material used for speed takes will be given at incremental speeds on unfamiliar material; the same material will not be used more than once every six months. Students are required to transcribe steno notes and speed takes under institutional supervision or if online students, sign a sworn verification form stating that the work was completed without the aid of anyone present and without cheating. Speed takes shall be monitored and timed in the same way. Students are required to transcribe at least once a week. All speed takes and tests shall be deleted immediately. Online students must sign a sworn statement verifying that the recording material has been deleted from their computers and no backup has been made. Students shall have access to the minimum grading criteria as set forth by the NCRA. Successful completion of the course requires a grade of "C" or better. The course includes online computer-aided technology for realtime translation.
This course is a continuation of Speed Building III for Reporters and Captioners. The student will continue to learn to write, read, and transcribe the spoken word by means of a conflict-free, real-time shorthand theory. Reporting students must be able to transcribe five minutes of unfamiliar dictation with at least 95 percent accuracy; literary at 130 wpm, jury at 150 wpm, and two voice at 170 wpm. Dictation includes two-voice and multi-voice testimony (including medical and technical material), literary, jury and current events. Testing material used for speed takes will be given at incremental speeds on unfamiliar material; the same material will not be used more than once every six months. Students are required to transcribe steno notes and speed takes under institutional supervision or if online students, sign a sworn verification form stating that the work was completed without the aid of anyone present and without cheating. Speed takes shall be monitored and timed in the same way. Students are required to transcribe at least once a week. All speed takes and tests shall be deleted immediately. Online students must sign a sworn statement verifying that the material has been deleted from their computers and no backup has been made. Students shall have access to the minimum grading criteria as set forth by the NCRA. Successful completion of the course requires a grade of “C” or better. The course includes online computer-aided technology for realtime translation.

CTRP - 4293 Speed Building IIb, 2.00 Credits
Prerequisite(s): CTRP 4262 with C or better or CTRP 4272 with C or better
Level: Lower
Applied Learning-Practicum
This course is a continuation of Speed Building II for Reporters and Captioners. The student will continue to learn to write, read, and transcribe the spoken word by means of a conflict-free, real-time shorthand theory. Reporting students must be able to transcribe five minutes of unfamiliar dictation with at least 95 percent accuracy in each of the areas listed: literary at 130 wpm, jury charge at 150 wpm, and two voice at 170 wpm. Dictation includes two-voice and multi-voice testimony (including medical and technical material), literary, jury charge, and current events. Testing material used for speed takes will be given at incremental speeds on unfamiliar material; the same material will not be used more than once every six months. Students are required to transcribe steno notes and speed takes under institutional supervision or if online students, sign a sworn verification form stating that the work was completed without the aid of anyone present and without cheating. Speed takes shall be monitored and timed in the same way. Students are required to transcribe at least once a week. All speed takes and tests shall be deleted immediately. Online students must sign a sworn statement verifying that the material has been deleted from their computers and no backup has been made. Students shall have access to the minimum grading criteria as set forth by the NCRA. Successful completion of the course requires a grade of “C” or better. The course includes online computer-aided technology for realtime translation.

CTRP - 4293 Speed Building IIb, 2.00 Credits
Prerequisite(s): CTRP 4262 with C or better or CTRP 4272 with C or better
Level: Lower
Applied Learning-Practicum
This course is a continuation of Speed Building II for Reporters and Captioners. The student will continue to learn to write, read, and transcribe the spoken word by means of a conflict-free, real-time shorthand theory. Reporting students must be able to transcribe five minutes of unfamiliar dictation with at least 95 percent accuracy in each of the areas listed: literary at 130 wpm, jury charge at 150 wpm, and two voice at 170 wpm. Dictation includes two-voice and multi-voice testimony (including medical and technical material), literary, jury charge, and current events. Testing material used for speed takes will be given at incremental speeds on unfamiliar material; the same material will not be used more than once every six months. Students are required to transcribe steno notes and speed takes under institutional supervision or if online students, sign a sworn verification form stating that the work was completed without the aid of anyone present and without cheating. Speed takes shall be monitored and timed in the same way. Students are required to transcribe at least once a week. All speed takes and tests shall be deleted immediately. Online students must sign a sworn statement verifying that the material has been deleted from their computers and no backup has been made. Students shall have access to the minimum grading criteria as set forth by the NCRA. Successful completion of the course requires a grade of “C” or better. The course includes online computer-aided technology for realtime translation.

CTRP - 4382 Speed Building Va, 2.00 Credits
Prerequisite(s): CTRP 4362 with C or better or CTRP 4372 with C or better
Level: Lower
Applied Learning-Practicum
This course is a continuation of Speed Building IV for Reporters and Captioners. The student will continue to learn to write, read, and transcribe the spoken word by means of a conflict-free, real-time shorthand theory. In this course dictation includes two-voice and multi-voice testimony (including medical and technical material), literary, and jury charge. Students are required to perform a line-by-line edit/analysis of steno notes and perform readback for speed takes for speed take dictation and shorthand theory for professional material. Testing material used for speed takes will be given at incremental speeds on unfamiliar material. Students will be required to transcribe steno notes and speed takes under institutional supervision. NCRA requirements include the following: students are required to transcribe steno notes, speed takes under timed institutional supervision or, if internet students, sign a sworn verification form stating that the work was completed without the aid of anyone present and without cheating. Speed takes shall be monitored and timed in the same way. All speed and tests recordings shall be deleted from the student’s computer immediately following tests. Online students must sign a sworn statement verifying that the material has been deleted from their computers and no backup has been made. Students shall have access to the minimum grading criteria as set forth by the NCRA. Successful completion of the course requires a grade of “C” or better. Students must be able to pass three 5-minute dictations with 95% accuracy in each of the following areas: Q & A at 190 wpm, jury charge at 200 wpm, and literary at 180 wpm. The course includes online computer-aided technology for realtime translation.
CULN - 2043 Fundamentals of Nutrition, 3.00 Credits
Prerequisite(s): CULN 2463 with C or better or CULN 2473 with C or better
Level: Lower
Applied Learning-Practicum
This course is an introduction to the basic aspects of culinary arts sanitation with an emphasis on various types of food service operation. Students will be required to transcribe steno notes and speech takes under institutional supervision. NCRA requirements include the following: students are required to transcribe steno notes and speech takes under timed institutional supervision. If, or if students, sign a sworn verification form stating that the material was completed without the aid of anyone present and without cheating. Speech takes shall be monitored and timed in the same way. Students are required to transcribe at least once a week. All speech and test recordings shall be deleted from the student's computer immediately following tests. Internet students must sign a sworn statement verifying that the material has been deleted from their computers and no backup has been made. Students shall have access to minimum grading criteria as set forth by the NCRA requirements. Successful completion of the course requires a grade of "C" or better. Students must be able to pass three 5-minute dictations with 95% accuracy in each of the following areas: Q & A at 225 wpm, jury charge at 200 wpm, and literary at 180 wpm.

CULN - 2043 Proc for Reporters & Captioner, 4.00 Credits
Prerequisite(s): CULN 3163 with C or better
Level: Lower
This course is an introduction of court and realtime reporting procedures and practices for court reporting including: professional responsibilities of federal and state court systems; civil and criminal trials; logistics of reporting; reporting techniques; and transcription production. The course includes a description and discussion of the role of the captioner and CART provider. Included in this course will be a simulation of a deposition where the student will act in the role as the reporter and administer the oath, mark exhibits, and perform other responsibilities germane to transcription production. Students will be required to apply professional ethics to various situations and identify and use appropriate library and reference material used in transcription preparation including software and internet search engines. Students will also be required to simulate and transcribe the National Court Reporter's Association (NCRA) Registered Professional Reporter (RPR) test as well as the Certified Realtime Reporter (CRR) test.

CULN - 1579 Baking Fundamentals, 9.00 Credits
Level: Lower
Applied Learning-Practicum
This laboratory course introduces students to the fundamental aspects of baking. Students will learn about the preparation, use and safety considerations of baking equipment, and will get hands-on experience preparing fried bakery goods, yeast dough, quick breads, pies, cookies, cakes and icings. Students will rotate bi-weekly through experiences with general baking concepts, preparation, equipment use, safety, mixing, panning and finishing of the products.
CULN - 2183 Menu Planning, 3.00 Credits
Level: Lower
This course will cover the proper procedures for menu mixing, and equipment used in intermediate baked goods production. Topics include laminated doughs, frozen desserts, intermediate yeast raised products such as baguettes and brioche, as well as intermediate baked goods, cakes, icings, and specialty desserts. The course will also introduce students to basic chocolate work, including tempering and piping.

CULN - 2479 Culinary Preparations, 9.00 Credits
Prerequisite(s): CULN 1479 with D or better or FDSR 1478 with D or better
Prerequisite(s): CULN 1479 with D or better or FDSR 1478 with D or better
Level: Lower
Applied Learning-Practicum
This course is a continuation of Culinary Foundations (CULN 1143). This course aims to provide understanding of cooking theory and mastery of a set of manual skills. These are applied to a wide range of cooking styles and products.

CULN - 2273 Baking Techniques & Prep, 3.00 Credits
Prerequisite(s): CULN 1153 with D or better
Level: Lower
Applied Learning-Practicum
This course will cover the proper procedures for mixing methods, and equipment used in intermediate baked goods production. Topics include laminated doughs, frozen desserts, intermediate yeast raised products such as baguettes and brioche, as well as intermediate baked goods, cakes, icings, and specialty desserts. The course will also introduce students to basic chocolate work, including tempering and piping.

CULN - 2489 Baking Preparations, 9.00 Credits
Prerequisite(s): CULN 1579 with D or better or FDSR 1578 with D or better
Level: Lower
Applied Learning-Practicum, Course Fee $60.00
This lab section develops intermediate level skills in baking and production. Students will build on skills learned in CULN 1579 and will rotate bi-weekly through experiences with yeast dough, pastries, specially cookies, finishing and decorating.

CULN - 3162 Hospitality Accounting, 2.00 Credits
Prerequisite(s): CULN 1373 with D or better or FDSR 2183 with D or better and FDSR 2153 with D or better
Level: Lower
Applied Learning-Practicum
This course focuses on introductory accounting principles and practices specific to the hospitality industry. Activities in this class are directed toward developing and refining a professional fluency in budget and forecast preparation. This class will also explore operational performance analysis based upon income statements and balance sheets. Students will study basic accounting principles, rules, and standards. The course will introduce and raise awareness of the importance of business plans, tax implications, and cash controls.

CULN - 3173 Intvl Cook, Garde Manger & Baki, 3.00 Credits
Prerequisite(s): CULN 2263 with D or better
Level: Lower
Applied Learning-Practicum
This course introduces baking products, techniques, advanced food preparation and regional cuisines. It is broken down into three separate modules; each one dealing with those three areas. The course will establish a strong foundation in basic baking, advance ability in higher level food preparations, and develop an understanding and appreciation for global cuisine.

CULN - 3251 Beverages, 1.00 Credit
Level: Lower
Applied Learning-Practicum
Students will learn about the history, classification, methods of production, and the characteristics of wine, spirits and beers. Mixology, lounge service, systems of beverage controls, laws controlling beverage sales, nonalcoholic beverages, and profitability will also be covered in this course.

CULN - 3253 Beverage & Fermentation, 3.00 Credits
Level: Lower
Students will learn about the history and production of beer, wine and cheese through hands-on experience. They will develop an understanding of styles and characteristics of different types of beer, wine, and cheese. The course covers systems of beverage controls, laws controlling beverage sales, and nonalcoholic beverages.

CULN - 3293 Intntl Baking & Cooking Fundamen, 3.00 Credits
Prerequisite(s): CULN 2273 with D or better
Level: Lower
Applied Learning-Practicum
This course will teach students the proper baking procedures and mixing methods used to produce advanced baked goods. The course will cover specialty items such as mollusk puddings, and cream desserts, as well as merengues, advanced gateaux and tortes. Students will learn about advanced bakery techniques using gingerbread, marzipan, and specialty sauces. Ethnic desserts and baked goods will be a focus of the course. Baking students will also become familiar with fundamental culinary skills.

CULN - 3353 Hospitality Supervision, 3.00 Credits
Level: Lower
The emphasis of this course is on kitchen management techniques, cost control, employee hiring and supervision. A major focus will be budgets, including labor and product cost controls and analysis. The importance of internal and external communications, conflict management, and creative problem solving will be stressed. The hiring, training, and rating of employees, as well as the role of unions in the hospitality industry, will be covered. Each student will be prepared for job procurement through resume writing, cover letter creation and insights on interviewing.

CULN - 3479 Advanced Culinary Preparation, 9.00 Credits
Prerequisite(s): CULN 2479 with D or better or FDSR 2479 with D or better
Level: Lower
Applied Learning-Practicum, Course Fee $60.00
Students will practice menu planning and the preparation of restaurant items in the working labs of the program. This lab provides hands on experience in order to develop supervisory and management skills in the kitchens and dining room. In addition, the student is expected to develop a mastery of skills for a la carte and volume preparation of basic sauces, appetizers, vegetables, grains and pastas, salads, sandwiches, and a variety of entrees, with an emphasis on accepted culinary techniques and presentation.

CULN - 3489 Pastry Capstone, 9.00 Credits
Prerequisite(s): CULN 3489 with D or better or FDSR 3489 with D or better
Level: Lower
Applied Learning-Practicum, Course Fee $60.00
This course will introduce the student to specialized techniques in baking and pastry. Skill development covering petit fours, candy making, decorative sugar, wedding cakes, various ethnic ingredients, desserts, and pastries will be emphasized. The course will also introduce advanced techniques on the production of pastries and breads using formulation variables.

CULN - 3613 Advanced Pastry, 3.00 Credits
Prerequisite(s): CULN 3253 with D or better
Level: Lower
Applied Learning-Practicum
This course will introduce students to specialized techniques in baking and pastry. Skill development covering petit fours, candy making, decorative sugar, wedding cakes, various ethnic ingredients, desserts, and pastries will be emphasized. The course will also introduce advanced techniques on the production of pastries and breads using formulation variables.

CULN - 4163 Advanced Cuisine, 3.00 Credits
Prerequisite(s): CULN 3173 with D or better
Level: Lower
Applied Learning-Practicum
This course will focus on the basic principles of menu planning with an emphasis on classical cooking proteins to order and sophisticated plate presentation. Using the knowledge and experience gained through previous lecture and lab experiences, this capstone course provides students with hands-on managerial experience in the planning, organizing, and direction of kitchen production. Students will rotate through experiences as chef, station cook and dining room manager. These experiences will help students develop a personal/professional cooking style through creativity, innovation and synthesis based on previous lab exposures. The lab will emphasize refined sauce making, braising, smoking, cooking proteins to order and sophisticated plate presentation.

CULN - 4235 Hospitality Management, 3.00 Credits
Prerequisite(s): CULN 3353 with D or better
Level: Lower
Applied Learning-Practicum
This course builds on the supervisory elements covered in Hospitality Supervision. The fundamentals of personnel management relating to motivation, performance, employee rights and labor relations will be covered. In addition, the course will emphasize basic planning, organizing, staff development, and interfacing with government and the public. Students will be exposed to management and motivation theory, allowing them to begin developing management philosophies in both areas.

CULN - 4479 Culinary Capstone, 9.00 Credits
Prerequisite(s): CULN 3479 with D or better
Level: Lower
Applied Learning-Practicum, Course Fee $60.00
Using the knowledge and experience gained through previous lecture and lab experiences, this capstone course provides students with hands-on managerial experience in the planning, organizing and direction of kitchen production. Students will rotate through experiences as chef, station cook and dining room manager. These experiences will help students develop a personal/professional cooking style through creativity, innovation and synthesis based on previous lab exposures. The lab will emphasize refined sauce making, braising, smoking, cooking proteins to order and sophisticated plate presentation.

CULN - 4489 Pastry Capstone, 9.00 Credits
Prerequisite(s): CULN 3489 with D or better
Level: Lower
Applied Learning-Practicum, Course Fee $60.00
In this capstone course students will incorporate earlier lab and lecture experiences, and will demonstrate managerial level skills in the planning, organizing, and direction of bake shop production. Students will be encouraged to develop a personal/professional baking style through creativity, innovation, and synthesis. In weekly rotations in the lab, students will gain hands-on experience with a wide variety of pastry items including but not limited to plated desserts, cakes and tortes, chocolate sculpting, sugar artistry, and cake production. Inventory control, ordering, and pricing, as well as promotion and merchandising of bakery products will also be covered.

DGM - DIGITAL MEDIA & ANIMATION
DGM - 1333 Survey of Animat & Visual Eff, 3.00 Credits
Level: Lower
This course will take students through a comprehensive history of animated films beginning with their conception in the early 1900's through the present. Students will learn how the medium reflects social issues, political views as well as human creativity. The various types of animation and how they were created in different countries and cultures will be the major focus. The screenings and discussions will span various genres and styles of animation including anime, experimental, commercial, computer, and independent film as well as gaming.
DGMA - 1401 Freshman Seminar, 1.00 Credit
Level: Lower
This introductory course prepares students with basic skills that will help them succeed in the
Graphic & Media Design or Digital Media & Animation programs. These skills include but
are not limited to: time management, research practices, effective communication, and online portfolio management.

DGMA - 1403 Digital Foundations I, 3.00 Credits
Level: Lower
This is an introductory digital media course that focuses on the manipulation of both raster and
vector-based imagery. Students will learn the basics of Photoshop as well as digital imaging and use the software to develop their skills in the visualization of motion and time.
The course will have a strong emphasis on principles of lighting, layout and composition.

DGMA - 1413 Foundations/Space Rtnshp, 3.00 Credits
Level: Lower
This is a visual rendering course in the Digital Media and Animation major. Broad experience is
emphasized with diverse graphic tools and techniques to develop observation of and
analyze visual information. This course is designed to deconstruct preconceived ideas of
form/space relationships and replace them with objective understandings.

DGMA - 1423 Intro to Visual Communication, 3.00 Credits
Level: Lower
This course focuses on creative, technical, and environmental/collaborative issues involved in
visual communication. Building on the elements and principles of design/comunication the students work through increasingly difficult projects to their final cumulative piece. An investigation of color theory as it applies to traditional and computer generated images is also pursued.

DGMA - 2403 Introduction to 3D Animation, 3.00 Credits
Prerequisite(s): DGMA 1403 with C or better
Applied Learning-Practicum
This course provides an introduction to 3D modeling, texturing, lighting, and animating.
Students will use a variety of tools and techniques to create various hard and soft surface models that address specific design problems.

DGMA - 2503 Digital Foundations II, 3.00 Credits
Prerequisite(s): DGMA 1403 with C or better
Applied Learning-Practicum
This course expands upon the fundamental concepts behind visual communications introduced in previous courses. Emphasis will be placed on the creative process and design thinking using multiple models of visual communication. Students will explore technical and conceptual ideas associated with digital media communications through the production of time based and interactive projects.

DGMA - 2603 Media Forge I, 3.00 Credits
Prerequisite(s): DGMA 1403 with C or better
Applied Learning-Practicum
This course provides an introduction to media design studio practice. Students work within
design teams on real-world media design problems, with emphasis on video production, motion graphics and project management.

DGMA - 3111 Japanese Media, 1.00 Credit
Level: Lower
This course is an overview of Japanese art, cinema, animation and digital media. Students will
explore Japanese media in native and transnational contexts through a series of lectures and
research projects. Special emphasis is given on communication strategies for art and
digital media collaboration across cultures, with the goal of participation in a short-term study abroad program.

DGMA - 3113 Studio Tokyo, 3.00 Credits
Prerequisite(s): DGMA 3111 with D or better and JAPN 1203 with D or better
Level: Lower
Applied Learning-Int/l Dom Trvl
Students will explore Japanese art, cinema, animation and digital media through a study-
abroad program based in Tokyo. Students will create animation and digital media projects in
collaboration with local artists, and expand upon their research from Japanese Media (DGMA
3111) through screenings and site visits.

DGMA - 3203 Interactive Authoring, 3.00 Credits
Prerequisite(s): CIAT 2403 with C or better or DGMA 2403 with C or better
Level: Lower
This is a course that introduces the student to the art of creating cartoon-style animation
applicable to industry needs in graphic design, interactive media, the internet, film, and
television using Macromedia Flash. The course emphasizes student acquisition production
with both cameraless and computer-based techniques.

DGMA - 3303 Digital Photography, 3.00 Credits
Level: Lower
In this course, students will be introduced to digital photography covering basic to advanced
techniques necessary for the production of art work, as well as learning about the visual
arts, how to look at and critique photography, photographic vocabulary, and be introduced to
works by well known photographers. Students will also gain a better understanding of the use
of external hardware such as lenses, flashes, lights, and other equipment and their impact on
photography.

DGMA - 3403 Intermediate 3D Animation, 3.00 Credits
Prerequisite(s): DGMA 2403 with C or better
Level: Lower
This course delves deeper into 3D computer animation while reinforcing the modeling,
texturing, and lighting techniques learned in DGMA 2403. Various animation techniques will
be explored and applied through object and character animation, as well as rigging that
addresses specific animation problems. There will be a strong focus on the study of human
and animal anatomy and how they influence motion.

DGMA - 3503 Typography, 3.00 Credits
Level: Lower
This course introduces students to the fundamentals of typography. Students combine
research and design principles to move projects from concept to execution. Emphasis is
given to new technologies and modes of delivery.

DGMA - 3603 Production I, 3.00 Credits
Level: Lower
Applied Learning-Creative Work
This course will introduce the student to the use of current non-linear editing technology.
Class projects will develop an understanding of the methods used for creating, sampling and
storing digital video and audio and the constraints placed on these media assets when used
for media based products. Emphasis is placed upon the technology of digital video and audio,
including: formats, data rates and compression algorithms.

DGMA - 3703 2D Game Design, 3.00 Credits
Prerequisite(s): DGMA 1403 with C or better and CISY 1113 with C or better
Level: Lower
This course will introduce concepts fundamental to game design in a hands-on studio setting.
Through a series of experiments and projects, students will explore character design, level
design, behaviors, game mechanics, risk/reward balancing and testing processes. Additional
focus will be given to asset design and animation in 2D environments, including the principles
of animation and game-engine animation tools.

DGMA - 4003 2D Animation, 3.00 Credits
Prerequisite(s): DGMA 1333 with C or better or FNAT 2433 with C or better
Level: Lower
Applied Learning-Creative Work
This course covers techniques for 2D animation production. Topics include character
design, preproduction techniques, physical forces, the principles of animation, soundtrack
synchronization, and performance for animation. Students will use industry-standard software
to complete exercises and projects of their own design.

DGMA - 4103 Interactive Design, 3.00 Credits
Prerequisite(s): DGMA 1403 with C or better
Level: Lower
This course is an exploration of visual communication through interactive media and
interface design. Students will explore the fundamental concepts of interactivity and
visual perception concerning computer interfaces, focusing on design for websites, online media, and
digital games. Students will complete interactive titles of their own design with intuitive interfaces
that incorporate concepts covered in class.

DGMA - 4203 Color Theory, 3.00 Credits
Level: Lower
Students will explore the history and theories associated with the use of color in graphic
design, and develop design practices that utilize concept driven color solutions for projects.
Students will gain experience in the techniques and color management practices necessary
for the production of effective screen-based and print-based design.

DGMA - 4303 3D Game Design, 3.00 Credits
Prerequisite(s): DGMA 2403 with C or better and DGMA 3703 with C or better
Level: Lower
Applied Learning-Creative Work
This course will expand students' understanding of game design and 3D interactive
environments. Topics will include 3D character and level design, procedural generation in
level design, development of game mechanics, complex behaviors, engine-based physics
and development for virtual reality systems. Students will be required to create a game
utilizing a 3D game engine and principles covered in class.

DGMA - 4433 Advanced 3D Animation, 3.00 Credits
Prerequisite(s): DGMA 3403 with C or better
Level: Lower
Applied Learning-Practicum
This course focuses on rigging and animation for 3D. Students will continue their work with
modeling, texturing, lighting, rigging, and animation from previous courses, and apply it
wards creating an animated short.

DGMA - 4900 Directed Study, 1.00 TO 4.00 Credits
Level: Lower
A student may contract for one to four credit hours of independent study through an
arrangement with an instructor who agrees to direct such a study. The student will submit
a plan acceptable to the instructor and to the department chairperson. The instructor and
student will confer regularly regarding the process of the study.

DGMA - 5103 Production I, 3.00 Credits
Prerequisite(s): CIAT 4103 with C or better or DGMA 4103 with C or better ) or ( CIAT 4423
with C or better or DGMA 4423 with C or better )
Level: Upper
Applied Learning-Creative Work, Upper Level
This course will introduce the student to the use of current non-linear editing technology.
Class projects will develop an understanding of the methods used for creating, sampling and
storing digital video and audio and the constraints placed on these media assets when used
for media based products. Emphasis is placed upon the technology of digital video and audio,
including: formats, data rates and compression algorithms.

DGMA - 5113 Studio Tokyo II, 3.00 Credits
Prerequisite(s): DGMA 3113 with D or better and JAPN 1203 with D or better and ( DGMA
3113 with D or better or DGMA 6203 with D or better )
Level: Upper
Applied Learning-Int/l Dom Trvl, Upper Level
In this course, students will explore Japanese art, animation and digital media through a study-
abroad program based in Tokyo. Students will schedule and lead teams in the creation
of visual and interactive experiences in media production in Japan. Additional
focus will be given to linguistic, cultural and industrial differences in media production in Japan.
DGMA - 6503 Sound Design, 3.00 Credits  
Prerequisite(s): DGMA 2503 with C or better  
Level: Upper  
Upper Level  
This course will examine the theory, design and evaluation of digital game User Interface/  
User Experience (UI/UX). Students will explore game feel and UI/UX best practices through  
a series of case studies and studio experiments. Students will analyze existing professional  
interfaces and construct UI/UX of their own design focused on game feel and player  
immersion. Emphasis will be put on design for digital games using various input methods  
in addition to historical and current research in player experience.

DGMA - 6403 Game Design Studio I, 3.00 Credits  
Prerequisite(s): DGMA 6303 with C or better and CISY 1113 with C or better  
Level: Upper  
Upper Level  
Applied Learning-Creative Work, Upper Level  
In this course, students will collaborate in game production. Focus in this course will be  
placed on Agile software development. Production emphasis will include behavior design  
and scripting, asset design, interface testing, and effective professional communication. Students  
will be introduced to distribution processes for independent games.

DGMA - 6603 Media Forge II, 3.00 Credits  
Prerequisite(s): DGMA 2603 with C or better or DGMA 5103 with C or better  
Level: Upper  
Applied Learning-Practicum, Upper Level  
This course continues to develop the students' media design studio practice. Students in this  
upper level course lead design teams on real-world media design problems, with emphasis  
on video production, motion graphics, and project management.

DGMA - 7203 Senior Seminar, 3.00 Credits  
Level: Upper  
Upper Level  
This seminar will serve two purposes. The first is to enhance students' understanding of  
opportunities in the field of animation and digital media through presentations, workshops  
and discussions. The second is to generate new techniques for problem solving in digital media  
projects. The course will include in-class exercises, discussions and responses to visiting  
artist presentations.

DGMA - 7403 Senior Studio I, 1.30 Credits  
Prerequisite(s): DGMA 6103 with C or better and DGMA 6413 with C or better  
Level: Upper  
Applied Learning-Creative Work, Upper Level  
In this course, students will integrate aspects of their studies from the previous three years  
in a semester-long production. Students will use this semester to create a short animation,  
video or interactive piece from start to completion. Students will be responsible for all  
aspects of this project, including conceptualization, design, pre-production, animation,  
cinematography, sound design, post production and final delivery.

DGMA - 7503 Digital Media & Animation Internship, 3.00 Credits  
Level: Upper  
Applied Learning-Internship, Pass/Fail, Upper Level  
This course provides the students with practical application of skills in the Digital Media  
and Animation major. The internship provides valuable real-life experience while extending  
the skills of the student towards various businesses, organizations, and professionals. The  
student will be responsible for all aspects of the project for a business or organization.

DGMA - 7603 Advanced Motion Graphics, 3.00 Credits  
Prerequisite(s): DGMA 6203 with C or better  
Level: Upper  
Applied Learning-Creative Work, Upper Level  
This course builds on the knowledge and skills gained in Motion Graphics. Focus is on 3D  
motion graphics, special effects, and compositing. Students will complete projects using  
Motion Graphics software.

DGMA - 7703 Adv Topics Interactive Design, 3.00 Credits  
Prerequisite(s): DGMA 5603 with C or better  
Level: Upper  
Upper Level  
In this course students will expand on skills developed in Interactive Media, and apply them  
in interactive design projects that work across platforms. Students will build interactive projects  
both individually and in groups that visualize complex data sets and respond to active and  
passive user input. Special emphasis will be given to development of media for emerging  
technologies.

DGMA - 7803 Professional Practices, 3.00 Credits  
Prerequisite(s): DGMA 6103 with C or better  
Level: Upper  
Upper Level  
In this course there will be an exploration of the importance of integrity in professional  
relationships, which lies in all aspects of the design process. Students will examine multiple  
communication paths and how to maintain coherent communication that follows the design  
process from conception to completion. Forms, documents and ethical issues of the business  
relationship shall be covered.

DGMA - 8003 Senior Studio Project III, 3.00 Credits  
Prerequisite(s): DGMA 6103 with C or better or DGMA 6403 with C or better or DGMA 6203  
with C or better  
Level: Upper  
Upper Level  
In this course, students will integrate aspects of their studies in a semester-long production.  
Students will use this semester to create a work from start to completion. Students will be  
responsible for all aspects of this project, including conceptualization, design, pre-production,  
post-production and final delivery.

DGMA - 8103 Portfolio, 3.00 Credits  
Prerequisite(s): QAT 4703 with C or better or DGMA 7403 with C or better  
Level: Upper  
Upper Level  
This course will prepare students for the task of finding the next opportunity to advance  
their professional career be it graduate school, employment in industry, exhibition and/or  
freelance work. The students will develop a strategy to promote skills in an ever-changing  
field. Instruction will be given to develop a professional identity that is conveyed in the  
design of their portfolio. Current print and web design software will be utilized to produce  
an electronic portfolio detailing their work.
### COURSE DESCRIPTIONS

<td>Applied Learning-Creative Work, Upper Level</td>
</tr>
<tr>
<td>DSGN - 8203</td>
<td>Media Design Seminar</td>
<td>3.00</td>
<td>Upper</td>
<td>This is a cumulative two-semester studio where students will integrate aspects from their studies of the previous three years. Students will use this semester to create one of the following: a 3D animated film; a 2D animated film; and Experimental Animation film (Stop Motion, Mixture of 3D and 2D animation; a fully Interactive/Interactive Media project). Students will produce all pre-production work including proposal, storyboards and animatics. Students will also generate all post-production work including editing, sound mixing and final delivery format (using current technology) prior to a film screening.</td>
</tr>
<tr>
<td>DSGN - 8303</td>
<td>Game Design Studio 2</td>
<td>3.00</td>
<td>Upper</td>
<td>This seminar will introduce graphic media and Design seniors to transition into the professional world by focusing on critical self-evaluation. Students will examine their own body of work as well as the work of professionals in the field. Special focus will be given to a designer's responsibilities in social, cultural, and environmental contexts. This course will include field trips and lectures from visiting artists.</td>
</tr>
<tr>

<td>Color, Lighting and Acoustics</td>
<td>3.00</td>
<td>Lower</td>
<td>This course is a fundamental course that investigates the properties and principles of basic color theory and the interrelationship with lighting. The focus is on the psychological and physiological effects of color and lighting as it applies to the form, texture, and finish of interior spaces. Course content provides a basic understanding of lighting calculations, types of lamps, appropriate use and application. General acoustic principles with an exploration of material application are introduced.</td>

<td>Circuit Theory I</td>
<td>3.00</td>
<td>Lower</td>
<td>This course is an examination of strategies for success, including organizational and study skills, and electrically related career opportunities for engineering technology students. The class entails textbook and research readings followed by written assignments. Topics include the variety of engineering technology and engineering careers, diversity in society and the technical workplace, sustainability, and ethics. Students make personal assessments of goals, values, strengths and weaknesses as related to college and technical career success. Employment application techniques addressed in assignments include resume writing, and letters of application. Research assignments use library and internet resources.</td>

<tr>
<td>ELET - 1003</td>
<td>Seminar</td>
<td>1.00</td>
<td>Lower</td>
<td>This laboratory implements the theoretical principles of ELET 1113. Digital Logic. Students learn to build working circuits based upon design goals. Applications include examples of combinational and sequential logic such as adders, multipliers, counters and 7-segment displays. Logic solutions utilize programmable logic devices and external interfaces as well as transistor-transistor logic integrated circuits, and simulation software. Written laboratory reports are required.</td>
</tr>
<tr>
<td>ELET - 1133</td>
<td>Digital Logic</td>
<td>3.00</td>
<td>Lower</td>
<td>Digital Logic introduces a student to two-state logic. Logic analysis will use the binary number system and Boolean algebra. Both combinational (AND-OR) logic and sequential (flip-flop) logic are studied. Typical logic designs include 7-segment displays, adders, multipliers, and counters. Logic designs are implemented using simulation, programmable logic devices and transistor-transistor logic.</td>
</tr>

232
ELET - 4154 Microelectronics, 4.00 Credits
Prerequisite(s): ELET 1103 with D or better
Level: Lower
Applied Learning-Practicum, Course Fee $98.00
This course provides the student with a realistic experience in semiconductor manufacturing processes. Oxidation, diffusion, photolithography (spin/bake/expose/develop), etch, and vapor deposition equipment allow students the opportunity to design, build, and test simple solid-state devices in a cleanroom environment. Properties and characteristics of semiconductor materials will be studied. Introduction to fabrication processes, design rules, and semiconductor device models will be applied to the design and fabrication of resistors, capacitors, diodes, and transistors.

ELET - 4224 Alternative Energy Generation, 4.00 Credits
Level: Lower
Applied Learning-Practicum
The purpose of this course is to provide students with a realistic look at the potential and the limitations of electrical generation through energy conversion. The energy sources include solar, wind, and water. The course will include semiconductor properties of photovoltaic cells and the electronic circuits necessary for energy conversion. Using trigonometry, students will be able to calculate the position of the sun at any given place and calculate the energy available at different panel orientations. Students will have the beginning tools to design off-grid and on-grid photovoltaic energy systems. MATLAB and LabVIEW software will be used to analyze and measure the solar resource. Some background knowledge of trigonometry and basic electrical circuits is expected.

ELET - 4900 Directed Study, 1.00 TO 6.00 Credits
Level: Lower
A student may contract for one to six credit hours of independent study through an arrangement with an instructor who agrees to direct such a study. The student will submit a plan acceptable to the instructor and to the department chairperson. The instructor and student will confer regularly regarding the progress of the study.

ELET - 5113 Electronic Communications, 3.00 Credits
Prerequisite(s): ELET 2103 with D or better
Level: Upper
Applied Learning-Other, Upper Level
This course is the study of analog and digital communication concepts and systems. Students begin by learning the terminology and measurements used in the communications industry. The course includes analysis of AM and FM transmission and reception, Single-Sideband communications, Digital Wired and Wireless Communications, Network Communications, and Multiplexing and De-multiplexing techniques. Emphasis is on the system approach with block diagrams, with the presentation of theoretical fundamentals and study of the concepts within each diagram. The associated laboratory and projects augment the lecture theatre. Students investigate further by completing an individual project.

ELET - 5900 Directed Study, 1.00 TO 6.00 Credits
Level: Upper
A student may contract for one to six credit hours of independent study through an arrangement with an instructor who agrees to direct such a study. The student will submit a plan acceptable to the instructor and to the department chairperson. The instructor and student will confer regularly regarding the progress of the study.

ELET - 6004 Advanced Power Systems, 4.00 Credits
Prerequisite(s): ELET 2124 with D or better or ELET 2123 with D or better ) and ELET 2103 with D or better
Level: Upper
Applied Learning-Practicum, Upper Level
This course is the study of electrical power transmission and conversion. A project involves the design of a d-c-dc converter from theory through a completed printed circuit board. Circuit topologies studied include linear buck, boost and buck-boost converters. On the utility scale, ac-circuit theory is applied to grid power flow and transmission line models. Synchronous generators and transmission lines are modeled in theory and examined in the laboratory. Power electronics are analyzed for their role in conversion and transmission.

ELET - 6143 Electrical Machine and Control, 3.00 Credits
Prerequisite(s): ELET 1103 with D or better or ELET 1104 with D or better or MATH 2423 with D or better
Level: Upper
Applied Learning-Practicum, Upper Level
Students will study electromechanical machines through circuit models, mathematical analysis, and experimental measurements. Mechanical, electrical, and electromagnetic fundamentals are included as they are applied to motors and generators. Machine topologies studied include three-phase synchronous, generators and motors, three-phase induction motors, single-phase motors, and dc motors and generators. To control these machines, students will implement relay logic and programmable logic circuits. Variable frequency drives and SCR drives are analyzed and tested. Sustainable engineering is promoted in this course through the selection of the most efficient and appropriate machine and control system for the application.

ELET - 7104 Integrated Circuit Technology, 4.00 Credits
Prerequisite(s): MATH 1003 with D or better or MATH 1084 with D or better
Level: Upper
Applied Learning-Practicum, Course Fee $88.00, Upper Level
This course is an introduction to physics, chemistry and materials of integrated circuit fabrication. Topics include the basic process steps of crystal growth, oxidation, photolithography, diffusion, ion implantation, chemical vapor deposition (CVD) and metallization used to build integrated circuits. The laboratory project is a 4-level metal gate PMOS process to fabricate a working integrated circuit test chip and provide experience in design, process design, materials evaluation, in-process characterization and device testing.
ELTR - 7404 Embedded & Real Time Systems, 4.00 Credits
Prerequisite(s): ELET 2343 with D or better and ELTR 2156 with D or better Level: Lower
Applied Learning-Practicum, Course Fee $27.00

ELTR - 2156 Electrical Power Systems, 6.00 Credits
Prerequisite(s): ELTR 1156 with D or better and ELTR 1166 with D or better and ELTR 2176 with D or better and ELTR 2156 with D or better and ELTR 2166 with D or better and ELTR 2176 with D or better
Level: Lower
Applied Learning-Practicum, Course Fee $17.00

ELTR - 3325 Magnetic Motor Controls, 6.00 Credits
Prerequisite(s): ELTR 1156 with D or better and ELTR 1166 with D or better and ELTR 1176 with D or better and ELTR 2156 with D or better and ELTR 2166 with D or better and ELTR 2176 with D or better
Level: Lower
Applied Learning-Practicum, Course Fee $17.00

ELTR - 2176 Residential Wiring Lab II B, 6.00 Credits
Prerequisite(s): ELTR 1156 with D or better and ELTR 1166 with D or better Level: Lower
Applied Learning-Practicum, Course Fee $27.00

ELTR - 1156 Residential Wiring I, 6.00 Credits
Corequisite(s): Level: Lower
Applied Learning-Practicum, Course Fee $26.00

ELTR - 1166 Residential Wiring Lab IA, 6.00 Credits
Corequisite(s): Level: Lower
Applied Learning-Practicum, Course Fee $26.00

ELTR - 2156 Residential Wiring II, 6.00 Credits
Prerequisite(s): ELTR 1156 with D or better and ELTR 1166 with D or better and ELTR 1176 with D or better
Corequisite(s): ELTR 1156 with D or better and ELTR 1166 with D or better and ELTR 1176 with D or better
Level: Lower

ELTR - 1176 Residential Wiring Lab IB, 6.00 Credits
Corequisite(s): Level: Lower
Applied Learning-Practicum, Course Fee $26.00

ELTR - 2166 Residential Wiring Lab IIA, 6.00 Credits
Corequisite(s): ELTR 1156 with D or better and ELTR 1166 with D or better and ELTR 1176 with D or better
Corequisite(s): ELTR 1156 with D or better and ELTR 1166 with D or better and ELTR 1176 with D or better
Level: Lower
Applied Learning-Practicum, Course Fee $27.00

ELTR - 2176 Residential Wiring Lab IB, 6.00 Credits
Corequisite(s): ELTR 1156 with D or better and ELTR 1166 with D or better and ELTR 1176 with D or better
Corequisite(s): ELTR 1156 with D or better and ELTR 1166 with D or better and ELTR 1176 with D or better
Level: Lower
Applied Learning-Practicum, Course Fee $27.00

This course prepares the students for the design and implementation of a real-time operating system (RTOS) on an embedded microcontroller. The course is constructed around a project where each student is required to design and prototype a real-time traffic light using MicroC/OS-II operating system licensed on a PIC18F452 microcontroller. The lecture portion of the course is comprised of lectures and quizzes that support the course project. Lecture topics include basic characteristics of the real-time applications and real-time operating systems, hardware interfacing techniques, fixed and dynamic priority scheduling algorithms, concurrent thread management, intercommunication, synchronization, response-time analysis, Petri-net modeling, fixed-point computations, and optimization. The lab portion of the course consists of labs that provide the building blocks of the course project. Upon completion of the course project students will compare MicroC/OS-II with other similar operating systems such as FreeRTOS and Salvo.
EMET - ELECTROMECH ENGR TECH

EMET - 5004 Instrumentation, 4.00 Credits
Prerequisite(s): PHYS 2023 with D or better or PHYS 2044 with D or better and ( MATH 1063 with D or better or MATH 1084 with D or better )
Level: Upper

This course introduces the student to general characteristics of electromechanical sensors and transducers, electrical measurement systems, electronic signal conditioning, data acquisition systems, and response characteristics of instruments. The lectures focus on the selection, calibration techniques and applications of electromechanical transducers. The laboratory has industrial equipment, such as a punch press, drill press, and metal lathe, which are equipped with sensors that are configured to measure physical quantities such as force, strain, displacement, velocity, and acceleration. Data acquisition and real-time software applications are applied to the laboratory environment.

EMET - 6004 Feedback Control Systems, 4.00 Credits
Prerequisite(s): MATH 6114 with D or better
Level: Upper

Feedback control systems with topics in time response, stability, criteria, system representation, root locus diagrams, and compensation. The systems include electrical, mechanical, and electromechanical networks. The laboratory features simulation of electrical and mechanical systems using MATLAB and SIMULINK as well as a variety of physical controllers.

ENGR - ENGINEERING SCIENCE

ENGR - 1201 Engineering Sci Orientation, 1.00 Credit
Level: Lower

An examination of strategies for success, including organizational and study skills, and transfer and career opportunities for engineering students in industry. There will be at least a dozen textbook and research readings followed by written assignments on topics to include the value of engineering transfer institutions and engineering majors, diversity in society, and the technical workplace, personal assessments of goals, values, strengths and weaknesses as related to student and technical career success, employment application techniques such as resume writing, letters of application, interviewing, follow-up communications, and an introduction to MS word and Excel.

ENGR - 2001 Engineering Computing Applicns, 1.00 Credit
Prerequisite(s): MATH 1084 with D or better
Level: Lower

This is an introductory, software-oriented, engineering computing course using an interactive, high-performance, scientific and engineering software package which integrates computation and visualization in a programming environment to solve engineering analysis problems. Topics will include embedded mathematical functions, complex numbers, matrix manipulation, plotting, user defined script and function files, matrix algebra, numerical techniques and graphical user interfaces.

ENGR - 2201 Engineering Science Seminar, 1.00 Credit
Prerequisite(s): ENGR 1201 with D or better
Level: Lower

The purpose of this course is to assist sophomore engineering science students in choosing and transferring to the college or university of their choice in order to complete a baccalaureate degree in engineering. Transfer admissions visitors are invited to classes and there may be class trips to potential transfer institutions depending on the interest of the students. This is a required course for the Engineering Science associate degree.

ENGR - 3004 Circuit Analysis I, 4.00 Credits
Prerequisite(s): MATH 2048 with D or better
Corequisite(s): MATH 2049 with D or better
Level: Lower

This Calculus-based course covers dc circuit analysis including voltage, current, power, source energy. Circuit analysis techniques and Kirchhoff's laws are applied to series, parallel and combined circuits. Thevenin's, Norton's and Supercircuit theorems are applied to dc circuits. Operational amplifiers are introduced. Inductance and capacitance are introduced and the transient response of RL, RC and RLC circuits to step inputs is studied using differential equations. The laboratory incorporates the use of manual and computer-controlled equipment and simulation software to reinforce lecture concepts. Computational software is required for circuit calculations.

ENGR - 3213 Analytical Mechanics I, 3.00 Credits
Prerequisite(s): MATH 2094 with D or better and PHYS 1064 with D or better
Level: Lower

This course covers statics at the intermediate level. Equilibrium of particles and rigid bodies in two and three dimensions, centroids, centers of gravity, analysis of structures, friction, area and mass moments of inertia. Calculus and vector mathematics are employed throughout.

ENGR - 3254 Systems Dynamics I, 4.00 Credits
Prerequisite(s): MATH 6114 with D or better and PHYS 1064 with D or better
Level: Lower

Applied Learning-PRACTICUM

This course covers modeling and design of dynamic and feedback control systems using a common methodology regardless of physical discipline. Mathematical modeling, block diagrams, transfer functions, system excitation, response and stability of linear mechanical and electrical systems in both time and frequency domains will be studied using classical techniques, state space representation, matrix notation and Laplace transforms. The laboratory will include programming and simulation of independent and coupled, first and second order electrical and mechanical systems using appropriate software such as MATLAB and SIMULINK. An experimental project or simulation will be required.

ENGR - 4004 Circuit Analysis II, 4.00 Credits
Prerequisite(s): ENGR 3004 with D or better and MATH 6114 with D or better
Level: Lower

This course covers AC circuit analysis beginning with the study of sinusoidal steady-state solutions for circuits in the time domain. Nodal, loop and mesh methods of AC circuit analyses and the Thevenin, Norton and Supercircuit theorems are applied to the complex plane. AC power, transformers, mutual induction, three-phase circuits and two-port networks are introduced and used for analysis. Laplace and Fourier Transforms and the Fourier Series are applied to circuit analyses. Complex frequency analysis is introduced to enable discussion of transfer functions, frequency dependent behavior, resonance phenomenon and simple filter circuits. The laboratory incorporates use of manual and computer-controlled equipment and simulation software to reinforce lecture concepts. Computational software is required for circuit calculations.

ENGR - 4213 Analytical Mechanics II, 3.00 Credits
Prerequisite(s): ENGR 3213 with D or better
Level: Lower

This course covers dynamics at the intermediate level. Topics in kinematics and kinetics include particles, systems of particles and rigid bodies, mechanical vibrations, force, mass, acceleration, work and energy, impulse and momentum. Calculus and vector mathematics are employed throughout.

ENGR - 4264 Engr Mechanics of Materials, 4.00 Credits
Prerequisite(s): ENGR 3213 with D or better and ( MATH 2094 with D or better or MATH 2094 with D or better )
Level: Lower

Course Fee $46.00

This course is a calculus-based study of advanced concepts in Mechanics of Materials. It addresses the behavior of deformable mechanical components when subjected to tension, compression, torsion, flexure-bending or a combination of these loads. Extensive use is made of free body diagrams as well as Mohr's Circle for stress and strain. Experience is gained in the analysis of beam deflection, shafts in torsion, power, column buckling and thin walled pressure vessels. Analysis includes examination of stress concentrations, elastic and inelastic response, residual stresses, indeterminate structures and thermal effects. Superposition, singularity functions and theories of failure are studied. Laboratory experiences include traditional mechanical material testing and computer software applications.

ENGR - 4900 Directed Study, 1.00 TO 6.00 Credits
Level: Lower

A student may contract for one to six credit hours of independent study through an arrangement with an instructor who agrees to direct such study. The student will submit a plan acceptable to the instructor and to the department chairperson. The instructor and student will confer regularly regarding the process of the study.

ENVR - ENVIRONMENTAL TECHNOLOGY

ENVR - 4411 Environmental Capstone Seminar, 1.00 Credit
Prerequisite(s): ENVR 4424 with D or better *
Level: Lower

This course is intended for students in the last semester of the Environmental Technology program. Current environmental issues are considered by utilizing guest speakers, an alumni panel, and audiovisual resources. Field trips are made to regional sites of environmental interest. A job search is organized and resumes are prepared with cover letters.

ENVR - 4413 Environmental Law, 3.00 Credits
Prerequisite(s): BIOL 2801 with D or better and BIOL 2803 with D or better
Level: Lower

This course is a non-technical overview of environmental law and public policy. Included in the course are laws, regulations and policies governing water pollution, air pollution, solid waste, hazardous waste, global common, land use, pesticides, energy, and public lands. The social concerns of environmental regulation such as environmental economics, risk assessment and environmental impact statements are also explored. The conflict/perceived conflict between economic development with environmental protection is particularly stressed. In addition, environmental problems, public policy, administration, politics and philosophy are studied.

ENVR - 4424 Envrnnmntl Chem & Microbiology, 4.00 Credits
Prerequisite(s): BIOL 2801 with D or better and BIOL 2803 with D or better and ( CHEM 2094 with D or better or CHEM 2124 with D or better )
Level: Lower

Applied Learning-Field Study, Course Fee $118.00

This is the "capstone" course for students in the Environmental Technology curriculum. The course includes a survey of the techniques used for sampling and laboratory analysis of soil, water, and microbiological samples. Chemistry topics include a review of inorganic and organic chemicals of environmental concern. Microbiology topics include the biology of microorganisms in soil, water, and waste treatment.

ENVR - 4900 Directed Study, 1.00 TO 6.00 Credits
Level: Lower

A student may contract for one to six credit hours of independent study through an arrangement with an instructor who agrees to direct such a study. The student will submit a plan acceptable to the instructor and to the department chairperson. The instructor and student will confer regularly regarding the progress of the study.

GNRT - STARTING POINTS, 1.00 Credit

This course is the "capstone" course for students in the Environmental Technology curriculum. The course includes a survey of the techniques used for sampling and laboratory analysis of soil, water, and microbiological samples. Chemistry topics include a review of inorganic and organic chemicals of environmental concern. Microbiology topics include the biology of microorganisms in soil, water, and waste treatment.

EPLP - EMERGING PION R LDRSHIP PGM

EPLP - 1031 Social Change & Leadership, 1.00 Credit

Level: Upper

This first leadership development class and mentor-guided experience is designed to assist the student in learning about social change theory and their role in leading productive change. This initial stage of leadership development focuses on individual values. The mentoring relationship will provide the resources necessary to aid students in their individual, group, and community experiential growth and development. This learning experience focuses on the first 3 Cs of the Social Change Model of Leadership Development: Consciousness of Self, Congruence, and Commitment. Students will explore consciousness of self, congruence in how to become an ethical leader, and commitment to their passions as a leader.
This is a survey course of the origin and development of historically notable architecture throughout the world from 9000 BCE to 1900. From the settlement of Jericho in the Neolithic Period to the last C of the Social Change Theory - Citizenship and Personal Leadership within the Society/ Community. This capstone level experience creates the opportunity for students to engage in the concepts of active citizenship and leading positive change within their own community. Students learn about and apply these concepts by experiencing local government in action and by engaging in a local community challenge within the context of a small group. Civic Engagement Intensive (CEI) sections exist.

This is an introductory course that will teach proper service protocol, dining room etiquette, ordering and use of point of sales systems. As the semester progresses, other topics will include: basic principles of menu planning with emphasis on classical menu patterns; menu formats and relationship of the menu to the complete operation of a food service establishment, and pricing of basic menu items.

This course provides an in-depth study of the history of Italian Cinema from its beginnings in 1896 until the present. Students will study the various social, political, historical, and technological influences on Italian Cinema from its beginnings in the first decade of the 20th Century until the present. Students will study the various social, political, and historical changes in western cultures. The course will emphasize the Latin American, Caribbean, and Polynesian styles of-root (hybrid), folk, and traditional forms and will include the mechanics of motion.

This course builds upon the fundamental skills learned in the Foundations: Form/Space Relationship (DGA 1413) course through the use of the human model. Proporations, perspectives, plus structural and locomotion dynamics will be studied. Students will focus on the mechanics of motion.

This introductory course will teach the student to the meaning of what Art is and is about. Special emphasis is placed on open discussion to create an awareness of why men and women have valued the arts which have become a driving force as they developed and became civilized. Students will see how the arts are really part of their daily lives by reading, viewing slides and works of art, and by creating. Writing is continued in assignments related to readings, class discussions, and lectures.

This is an introductory course that will teach proper service protocol, dining room etiquette, ordering and use of point of sales systems. As the semester progresses, other topics will include: basic principles of menu planning with emphasis on classical menu patterns; menu formats and relationship of the menu to the complete operation of a food service establishment, and pricing of basic menu items.
The focus of this course is to expose students to peer-reviewed reference journal articles relevant to the field of forensic science and to expand on topics discussed during other curriculum coursework. The format of the course is reading and discussion, with each student accepting responsibility for serving as a discussion leader on a chosen journal article once during the semester. The discussion leaders' roles are to introduce the article topic, to provide background information about the topic, and to encourage the class to offer comments and ask questions.

FRSC - 4900 Directed Study, 1.00 TO 6.00 Credits
Level: Lower
A student may contract for one to six credit hours of independent study through an arrangement with an instructor who agrees to direct such a study. The student will submit a plan acceptable to the instructor and to the department chairperson. The instructor and student will confer regularly regarding the progress of the study.

FRSC - 5900 Directed Study, 1.00 TO 6.00 Credits
Level: Upper
Upper Level
A student may contract for one to six credit hours of independent study through an arrangement with an instructor who agrees to direct such a study. The student will submit a plan acceptable to the instructor and to the department chairperson. The instructor and student will confer regularly regarding the progress of the study.

FRSC - 6214 Microscopy and Criminalistics, 4.00 Credits
Prerequisite(s): Prerequisite(s): CHEM 4524 with C or better
Level: Upper
Applied Learning-Practicum, Course Fee $53.00, Upper Level
This course is an exploration of the basic theory and practice of traditional criminalistics and microscopic techniques commonly performed in forensic science. Topics covered include: crime scene investigation, evidence collection and handling; microscopic theory and techniques; analysis of trace evidence to include hair, fiber, paint, soil, and glass evidence; analysis of fingerprint evidence; analysis of firearms and ammunition; analysis of gunshot residue evidence; and analysis of bloodstain pattern and toolmark evidence.

FRSC - 7214 Forensic Chemistry, 4.00 Credits
Prerequisite(s): Prerequisite(s): FRSC 6214 with C or better and CHEM 6614 with C or better
Level: Upper
Applied Learning-Practicum, Course Fee $100.00, Upper Level
This course is an exploration of the basic theory and practice of commonly performed examinations on chemical evidence in forensic science. Topics covered include: principles of various chemical and instrumental separation techniques; sampling plans and uncertainty in measurements; an introduction to quality control and quality assurance concepts; principles and techniques of controlled substance examinations; principles and techniques of forensic toxicology; principles and techniques of fire debris and explosive evidence examinations; and principles and techniques of material analysis to include inks, dyes, colors, colorants and polymers.

FRSC - 8111 Forensic Science Tech Capstone, 1.00 Credit
Prerequisite(s): Prerequisite(s): FRSC 7214 with C or better
Corequisite(s): Prerequisite(s): FRSC 7214 with C or better
Level: Upper
Applied Learning-Creative Work, Upper Level
This course is intended for students to complete during the eighth and final semester of their enrollment in the forensic science technology program. It is to be taken concurrently with FRSC 8111. The course is designed to prepare the student to enter the workforce and/or continue their education at the graduate level. Students complete a capstone project requiring the analysis of physical evidence in a simulated casework setting. Students also apply the fundamentals of proper forensic laboratory report writing by producing a professional quality laboratory report suitable for admission into a court of law that communicates their findings. In addition, students are required to prepare and deliver expert witness testimony in a simulated courtroom setting.

FRSC - 8113 Forensic Science Tech Prof Prep Practicum, 0.00 Credits
Prerequisite(s): Prerequisite(s): FRSC 7214 with C or better
Corequisite(s): Prerequisite(s): FRSC 7214 with C or better
Level: Upper
Applied Learning-Practicum, Upper Level

FRSC - 8213 Forensic Biology, 3.00 Credits
Prerequisite(s): Prerequisite(s): FRSC 7214 with C or better
Level: Upper
Applied Learning-Practicum, Upper Level
This course is an exploration of the basic theory and practice of commonly performed examinations on biological evidence in forensic science. Topics covered include: principles and techniques of serological examinations to include identification of body fluids, species determinations, and enzymatic analysis; blood spatter evidence interpretation and crime scene reconstruction; principles and techniques of forensic DNA examinations to include polymerase chain reaction, variable number tandem repeat profiling, short tandem repeat profiling and an introduction to Y-STR and mitochondrial DNA; and introductory principles and techniques of forensic pathology and forensic photography.
FSMA - 5003 Investment Planning, 3.00 Credits
Prerequisite(s): BUAD 4133 with D or better and BUAD 4203 with D or better
Level: Upper
This course is designed to allow students to pursue advanced work in an area of special interest or obtain extended internship opportunities in Forensic Science Technology. A student may contract for one to six credit hours of independent study through an arrangement with an instructor who agrees to direct such a study. The student must be engaged in bona fide investment planning work in at least one of the six core areas of investment planning, tax planning, estate planning, retirement planning, employee benefit planning, or insurance/risk management. An oral and written presentation and the defense of the examination acquired and applied during the internship. This course is graded as a Pass/Fail option only.

FSMA - 5013 Tax Planning, 3.00 Credits
Prerequisite(s): ACCT 3453 with D or better
Level: Upper
This course is designed to allow students to pursue advanced work in an area of special interest or obtain extended internship opportunities in Forensic Science Technology. An oral and written presentation and the defense of the examination acquired and applied during the internship. This course is graded as a Pass/Fail option only.

FSMA - 5003 Investment Planning, 3.00 Credits
Prerequisite(s): BUAD 4133 with D or better and BUAD 4203 with D or better
Level: Upper
This course is designed to allow students to pursue advanced work in an area of special interest or obtain extended internship opportunities in Forensic Science Technology. A student may contract for one to six credit hours of independent study through an arrangement with an instructor who agrees to direct such a study. The student must be engaged in bona fide investment planning work in at least one of the six core areas of investment planning, tax planning, estate planning, retirement planning, employee benefit planning, or insurance/risk management. An oral and written presentation and the defense of the examination acquired and applied during the internship. This course is graded as a Pass/Fail option only.

FSMA - 5013 Tax Planning, 3.00 Credits
Prerequisite(s): ACCT 3453 with D or better
Level: Upper
This course is designed to allow students to pursue advanced work in an area of special interest or obtain extended internship opportunities in Forensic Science Technology. A student may contract for one to six credit hours of independent study through an arrangement with an instructor who agrees to direct such a study. The student must be engaged in bona fide investment planning work in at least one of the six core areas of investment planning, tax planning, estate planning, retirement planning, employee benefit planning, or insurance/risk management. An oral and written presentation and the defense of the examination acquired and applied during the internship. This course is graded as a Pass/Fail option only.

**COURSE DESCRIPTIONS**

**HIST - 1123 History of the Mafia, 3.00 Credits**  
**Level:** Lower  
**Liberal Arts and Science**  
The course examines the history of the Mafia from its origins to the present day. How the Mafia works and has succeeded as well as approaches, including those by civil society organizations, to combat the Mafia. Attention is paid to examples of Mafia enterprises, its past and present role in politics, and its evolution from a regional organization to one with an international reach. A research project, with both a paper and an oral presentation, is required.

**HIST - 1143 Surv of American History I, 3.00 Credits**  
**Level:** Lower  
**Gen Ed - American History, Liberal Arts and Science**  
This course is an introductory survey of American history from the early Native Americans and European colonization through the Civil War and Reconstruction. Topics include native cultures, European heritage, the colonial experience, revolution and the new republic. Emphasis will be placed on the formation of the constitution, reform movements and political compromises. Special attention will be paid to the common institutions in American society and their effects on different groups.

**HIST - 2153 Surv of American History II, 3.00 Credits**  
**Level:** Lower  
**Gen Ed - American History, Liberal Arts and Science**  
This is an introductory survey of American History from the Civil War and Reconstruction to the present. Topics include: the progression of African American populations, the process of decolonization, including its political, economic, and social consequences. The course will cover the social, political, cultural and economic life of the people of the United States, with a special focus on unity and diversity during the 19th and 20th centuries.

**HIST - 2900 Directed Study, 1.00 TO 4.00 Credits**  
**Level:** Lower  
**Liberal Arts and Science**  
This course allows students who have successfully completed a history course to continue study in that subject. A student may contract for one to four credit hours. However, directed study may be contracted by a student only with the approval of the directing instructor and the department chairperson.

**HIST - 3003 World History I, 3.00 Credits**  
**Level:** Lower  
**Gen Ed - Other World Civilization, Liberal Arts and Science**  
This course is designed to give the student a broad outline of world history. The students will study civilizations from the earliest humans through the classical world and beyond to the age of cross-cultural interaction and trade in the early 1500 CE. The student will be exposed to the traditions and cultures of the world to aid in weaving the story of human civilization. Early civilizations covered in the course include Mesopotamia, Indus, Chinese, Persian, Greek, Roman, Mesoamerican, European, as well as Islamic. Artistic and intellectual achievements and technological breakthroughs will be discussed throughout the course.

**HIST - 5003 World History II, 3.00 Credits**  
**Prerequisite(s): HIST 3003 with D or better**  
**Level:** Upper  
**Liberal Arts and Science**  
This course gives the students a broad outline of world history, from 1500 C.E. to the modern era. Emphasis will be on the transition from traditional cultures to modern cultures. The effect of modernization on different areas of the world will be examined. Colonialism, period of revolutions, industrialization, and the rise of the modern nation state will be covered. Artistic and intellectual achievements as well as technological breakthroughs will be discussed throughout the course. Student will complete a research paper.

**HIST - 5133 Africa and the West, 3.00 Credits**  
**Prerequisite(s): HIST 1113 with D or better**  
**Level:** Upper  
**Gen Ed - Other World Civilization, Liberal Arts and Science**  
This course will introduce students to the relationship between Western countries and sub-Saharan Africa over the last five centuries and today. Particular attention will be paid to the political, economic, and cultural links established between Europe and Africa, including the imperialist occupation and exploitation of Africa by Europeans. Historical topics covered will include the slave trade: European exploration of Africa; the diaspora of Africans in the West, and of Europeans in Africa; racial attitudes; patterns of economic development and impoverishment; the political evolution of European colonial regimes in Africa; and the process of decolonization, including its political, economic, and social consequences. Contemporary topics covered will include political instability and poverty in Africa; the AIDS crisis; the legacy of colonialism and white settlement; the democratization of African political systems; and competing approaches to African development.

**HIST - 6133 The World at War: 20th Century, 3.00 Credits**  
**Prerequisite(s): HIST 1113 with D or better or PLSC 1053 with D or better**  
**Level:** Upper  
**Liberal Arts and Science, Upper Level**  
This class surveys global military history during the 20th century, with particular emphasis on World War I, World War II, and the Cold War. It examines the origins of major and minor conflicts; the political, social, and economic context of modern warfare; changes in strategy, tactics, logistics, intelligence, battlefield technology, and other salient features of warfare; the contributions of political leaders and major military commanders; and the effects of modern warfare on soldiers and civilians. This class will feature student presentations and a research paper.

**HLSC - HEALTH SCIENCES**

**HLSC - 1101 Introduction to Health Science, 1.00 Credit**  
**Level:** Lower  
This course introduces the student to a sample of the broad array of health professions and allied health careers related to the field of study of health sciences. In addition to creating awareness of the career possibilities for the health science major, the course will focus on the typical education requirements, career paths and credentialing requirements of various health professions. Licensure and scope of practice laws will be considered for select professions, along with the regulating bodies and health service agencies that govern them and establish standards of practice. Contemporary topics in health science will be explored including healthcare systems, economics, insurance, research, ethical considerations and other current issues in healthcare. The course will conclude with the student conducting personal career exploration and related educational planning.

**HLSC - 4900 Directed Study, 1.00 TO 6.00 Credits**  
**Level:** Upper/Upper Level  
A student may contract for one to six credit hours of independent study through an arrangement with an instructor who agrees to direct such a study. The student will submit a plan acceptable to the instructor and the department chairperson. The instructor and student will confer regularly regarding the progress of the study.

**HLSC - 5900 Directed Study, 1.00 TO 6.00 Credits**  
**Level:** Upper/Upper Level  
A student may contract for one to six credit hours of independent study through an arrangement with an instructor who agrees to direct such a study. The student will submit a plan acceptable to the instructor and the department chairperson. The instructor and student will confer regularly regarding the progress of the study.

**HLSC - 8703 Senior Research Project, 3.00 Credits**  
**Prerequisite(s): BIOL 7723 with C or better or BIOL 8823 with C or better**  
**Level:** Upper  
**Applied Learning-Research, Upper Level**  
This course is intended for students in the final year of the four-year Health Sciences curriculum. Students are required to complete an approved research project in an area of special interest in health sciences. The student will submit a plan for research acceptable to the Health Sciences program director and to the department chair. The instructor and student will confer regularly regarding the progress of study and research. The student will be required to prepare a formal scientific paper and will be required to give a formal presentation to the campus community upon completion of the research project. Students will be encouraged to present their findings at a national or regional health science conference.

**HLSC - 8713 Prof Internship in Health Sci, 3.00 Credits**  
**Prerequisite(s): BIOL 7723 with C or better or BIOL 8823 with C or better**  
**Level:** Upper  
**Applied Learning-Internship, Pass/Fail, Upper Level**  
This course is intended for students in the final year of the Bachelor of Science in Health Science. A student completes a 3-credit hour (120 hour total) internship at an approved off-campus site. The student works under the guidance of a qualified professional, the onsite Internship Site Supervisor, while receiving college consultation from a Faculty Internship Coordinator. The internship is designed for a student to obtain health science-related research or work experience in theoretical and application-based procedures previously studied. The student submits required reports and evaluations. In addition, the student presents oral and written explanations and defense of the information acquired and applied during the internship. This course is graded as a Pass/Fail option only.

**HLTH - HEALTH TECHNOLOGY**

**HLTH - 5113 Complementary & Altv Medicine, 3.00 Credits**  
**Prerequisite(s): BIOL 2504 with D or better or BIOL 2214 with D or better**  
**Level:** Upper  
**Liberal Arts and Science, Upper Level**  
This internet based course is designed to study of complementary and alternative medicine most frequently encountered in contemporary western healthcare. The course will investigate specific disciplines of complementary and alternative medicine, their origins, histories, principles, current scientific evidence for or against them, indications and contraindications for their use, and typical clinical outcomes: along with an understanding of how they are integrated in a modern healthcare system.

**HLTH - 5203 End of Life Dilemmas, 3.00 Credits**  
**Level:** Upper  
**Liberal Arts and Science, Upper Level**  
This course is designed to provide the student with thought provoking, informed decision making for end of life care. All people have choices and options about how they will spend their time on earth. It is imperative that these options be thoroughly considered so that individual wishes and desires are planned for and carried out. Complex medical, ethical and legal matters at end of life will be explored. Interventions and therapies such as artificial hydration and nutrition, acute treatment modalities, cardiopulmonary resuscitation, and life support will be examined. Healthcare programs providing end of life care will be investigated, judging cost and quality of life versus quality of life. Assisted suicide and euthanasia will also be scrutinized and debated.

**HLTH - 5223 Info Systems in Healthcare, 3.00 Credits**  
**Level:** Upper  
**Liberal Arts and Science, Upper Level**  
An internet based course that examines how health information technology impacts healthcare delivery in all settings. This course explores a historical perspective of information technology through current day and beyond. What are the advantages, challenges, laws and regulations related to information systems? How do information systems impact healthcare? Emerging technologies such as electronic health record (EHR), telehealth and mobile applications are explored. The current healthcare landscape will be investigated to determine how healthcare informatics impacts quality outcome measures and private and governmental reinforcement methodology.
HLTH - 5233 The Culture of Healthcare, 3.00 Credits
Level: Upper
This course implements a two pronged approach to healthcare as an interface between the biology of health and health outcomes. Students will investigate questions on both the health and care of patients from a cultural perspective. Differences in the physiology and genetics of disease regionally in the U.S. and globally in other countries will be discussed as well as cultural differences in the care of patients and their families.

HLTH - 5323 Healthcare Law and Ethics, 3.00 Credits
Prerequisite(s): BUAD 5153 with D or better or TMGT 7153 with D or better
Level: Upper
Upper Level
This course is an introduction to the laws and ethics that affect healthcare decisions, relationships among professionals and patients, and the management aspects of healthcare delivery. It provides students with the knowledge and skills necessary to recognize legal and ethical issues that arise in healthcare practice, to be prepared to evaluate situations that may have legal or ethical implications, to know when to seek legal or ethics committee counsel, and to have an understanding of the implications of healthcare law on their own decision making, and the end of life care. Students will have the opportunity to discuss real world ideas, theories and applications of healthcare law and ethics. Students will have a working knowledge of pertinent law and ethical procedures and how to apply them in healthcare practice.

HLTH - 5433 Healthcare Marketing, 3.00 Credits
Level: Upper
Applied Learning-Other, Upper Level
This course is designed to provide a fundamental knowledge of the principles of marketing and their particular application in healthcare. The healthcare system poses a variety of marketing challenges due to new laws and policies, fresh innovations, and an increasingly educated health consumer. This course covers the fundamentals of marketing as they are applied across a broad spectrum of healthcare organizations to address these challenges. This course is divided into three key concepts: marketing process, understanding the consumer, and marketing mix. The goal of this course is to provide students with a strong foundation of marketing principles and tools and techniques to develop a marketing plan for any healthcare organization.

HLTH - 5900 Directed Study, 1.00 TO 6.00 Credits
Level: Upper
Upper Level
A student may contract for one to six credit hours of independent study through an arrangement with an instructor who agrees to direct such a study. The student will submit a plan acceptable to the instructor and to the department chairperson. The instructor and student will confer regularly regarding the process of the study.

HLTH - 6003 Healthcare Management, 3.00 Credits
Level: Upper
Upper Level
This is an online course which will provide an overview of the skills and concepts required to be a manager within the healthcare system. This course is designed to provide a general basic foundation of management, as well as specific issues pertaining to healthcare will be reviewed. Theories and models of leadership, financial structure, planning, legal/regulatory requirements, communication and emerging issues will be explored. The course will also provide the student with the basic understanding of the impact of human resources department including: challenges, education, safety, compensation and employee issues.

HLTH - 7003 Healthcare Compliance, 3.00 Credits
Level: Upper
Upper Level
This is an online course that includes a study of the key areas of risk for healthcare organizations in general. Compliance is an essential element of any healthcare organization. This course will prepare the student to understand the components of an effective compliance plan, the role of a compliance officer, specific legislation in regards to compliance in healthcare, the audit process and enable the student to author policies and procedures.

HPED - HEALTH & PHYSICAL EDUC
HPED - 1031 Volleyball, 1.00 Credit
Level: Lower
To develop the skills of passing, serving, spiking, and blocking.

HPED - 1111 Health and Wellness, 1.00 Credit
Level: Lower
To provide students with a better understanding of the human body and concepts, attitudes and behaviors. This course focuses on all the dimensions of Wellness.

HPED - 1121 Basketball, 1.00 Credit
Level: Lower
This course is designed to expose the student to the many basketball skills and types of playing.

HPED - 1131 Indoor Soccer, 1.00 Credit
Level: Lower
To develop skills, knowledge, and proper fitness levels pertaining to soccer.

HPED - 1171 Aerobics, 1.00 Credit
Level: Lower
Aerobics to music where the student will learn sound lifetime habits of fitness.

HPED - 1603 Prin of Org PE & Athletics, 3.00 Credits
Level: Lower
A course to provide each student with a workable frame of reference concerning the principles, organization, and philosophical aspects of physical education and athletics.

HPED - 2021 Personal Defense, 1.00 Credit
Level: Lower
Personal defense is a course teaching self-awareness, prevention, risk reduction, risk avoidance, and hands-on self-defense techniques. The course is inclusive of educational components comprised of lecture, discussion, and physical resistance strategy. Students will create risk assessments of their personal environments and propose solutions to potential risks.

HPED - 3003 Coaching Sports, 3.00 Credits
Level: Lower
This course is a lecture course designed to serve as a foundation for future coaching experiences. This course will enhance students' knowledge and understanding of concepts and techniques of coaching and their application to achieving important objectives in working with athletes. The class will help students develop an understanding of coaching philosophy and essential techniques including practice planning, program organization, coaching roles and instruction. This course will combine sport science theory and research with the practical knowledge and methods of expert coaches.

HPED - 3061 Physical Fitness, 1.00 Credit
Level: Lower
Pace/Fail
To learn the basic principles of conditioning. The student will be provided an individualized fitness program designed to improve muscular strength and endurance, cardio-vascular wellness, flexibility, and body composition.

HPED - 4103 Personal Health, 3.00 Credits
Level: Lower
This course provides students the opportunity to develop sound concepts in health and health-related areas in order to better understand the environment in which they live. Strong emphasis will be placed on current health issues in the area of human sexuality, mental and emotional health, drug and substance abuse, and the development of sound health practices for the individual in today's society.

HUMN - HUMANITIES
HUMN - 2114 Culture of Italy in Context, 4.00 Credits
Prerequisite(s): COMP 1103 with C or better and ( LITR 2103 with D or better or LITR 2243 with D or better or LITR 2053 with D or better or LITR 2183 with D or better or LITR 2900 with D or better or LITR 2900 with D or better or LITR 2913 with D or better or LITR 3233 with D or better or LITR 4333 with D or better or LITR 7003 with D or better )
Level: Lower
Gen Ed - Humanities, Liberal Arts and Science
This senior project course is designed to provide students with supervised work experience in human services agencies. In addition, students participate in a weekly class that combines the principles of small group dynamics with the acquired skills, knowledge and experience that students have obtained from their field experience. Students produce a final project and a portfolio to document learning. Students should consult the Practicum Pre-requisites listed in the Human Services program description section in the college catalog. Civic Engagement Intensive (CEI) sections exist.

HUSR - 1303 Intro Alcohol & Substnc Abuse, 3.00 Credits
Level: Lower
This course is intended to provide students with a basic yet comprehensive understanding of substance abuse and dependence. Attention will be given to understanding the effects of alcohol and other drugs on the mind and body, the components of addiction, the concept of alcoholism as a progressive disease, the recovery process, and the effects on society.

HUSR - 2083 Introduction to Human Services, 3.00 Credits
Level: Lower
Major issues related to the field of human services are discussed in this course. Emphasis is placed on the ethical standards within the field of Human Services. Students are expected to develop the necessary skills, values and knowledge to enhance their ability to gain employment and advance within the human service profession.

HUSR - 4033 Issues in Human Services, 3.00 Credits
Prerequisite(s): HUSR 2083 with C or better
Level: Upper
Applied Learning-Practicum
This senior project course is designed to provide students with supervised work experience in human services agencies. In addition, students participate in a weekly class that combines the principles of small group dynamics with the acquired skills, knowledge and experience that students have obtained from their field experience. Students produce a final project and a portfolio to document learning. Students should consult the Practicum Pre-requisites listed in the Human Services program description section in the college catalog. Civic Engagement Intensive (CEI) sections exist.

HUSR - 5003 Community Organizations, 3.00 Credits
Prerequisite(s): HUSR 1074 with B or better
Level: Upper
Applied Learning-Practicum
This senior project course is designed to provide students with supervised work experience in human services agencies. In addition, students participate in a weekly class that combines the principles of small group dynamics with the acquired skills, knowledge and experience that students have obtained from their field experience. Students produce a final project and a portfolio to document learning. Students should consult the Practicum Pre-requisites listed in the Human Services program description section in the college catalog. Civic Engagement Intensive (CEI) sections exist.
HUSR - 5103 Social Policy & Human Services, 3.00 Credits
Prerequisite(s): HUSR 1047 with B or better
Level: Upper
Upper Level
This course teaches the evolution of American social problems and the response of the social welfare policy systems and programs at the national, state, regional and local levels. A basic framework for comparison with international social welfare systems will also be provided. The course will focus on the following aspects of the social welfare system: impact of social policy on the delivery of human services, social welfare policy, and the systematic analysis of social welfare policy; understanding of social welfare policy analysis from both historical and current standpoints, and the organization, community and policy practice settings requiring advocacy and policy formulation; comprehension of social welfare policy analysis in the areas of welfare reform, homelessness/housing, poverty, mental health, substance abuse and health care; and individual communication skills in describing, analyzing, synthesizing and presenting a letter to the editor, a letter to a legislator, and a social welfare policy analysis response to a current societal problem. Applications in social welfare advocacy at all levels will be explored.

HUSR - 5203 Grants Contracts Organ Adv HS, 3.00 Credits
Level: Upper
Applied Learning Practicum, Upper Level
This course will provide students with the tools needed to be successful with proposal writing, program and strategic planning, fund raising and institutional advancement. Specific areas to be addressed will include how to identify appropriate funding sources, how to market and organize charitable fundraising events and campaigns, how to complete applications for funding assistance, and how to respond to requests for proposals from public and private resources. Civic Engagement Intensive (CEI) sections exist.

HUSR - 5213 Case Management Systems, 3.00 Credits
Prerequisite(s): HUSR 1047 with B or better
Level: Upper
Upper Level
This course in case management will familiarize students with various approaches used by human services professionals to meet the service needs of the client. The use of case management with children and families, elderly, chronically mentally ill, developmentally and physically disabled, and those in health care settings will be investigated. Approaches used to risk management will be compared with those used in chronic health conditions. Skills in case management will be demonstrated including networking, goal setting, recording, case monitoring, advocacy, and outcome evaluation. Use of automated data systems and electronic records in case management will be explored.

HUSR - 5314 Human Svcs Field Pract & Sem, 14.00 Credits
Prerequisite(s): ( HUSR 5003 with C or better and HUSR 5103 with C or better and HUSR 5203 with C or better or HUSR 5003 with C or better and HUSR 5103 with C or better and HUSR 5213 with C or better ) or ( HUSR 5003 with C or better and HUSR 5103 with C or better and HUSR 5203 with C or better ) or ( HUSR 5003 with C or better and HUSR 5213 with C or better ) or ( HUSR 5103 with C or better and HUSR 5203 with C or better and HUSR 5213 with C or better ) or ( HUSR 5103 with C or better and HUSR 5203 with C or better and HUSR 5213 with C or better ) and ( HUSR 5003 with C or better and IDST 5002 with D or better and IDST 5002 with D or better )
Level: Upper
Applied Learning Practicum, Upper Level
This seminar course is taken concurrently with a structured, supervised work experience in a human services agency. Students must successfully complete a minimum of 400 clock hours of work in human services management at an approved human services agency. In addition, students participate in this weekly seminar that synthesizes theoretical knowledge and didactic learning with the acquired skills, knowledge, and experience that the students have obtained through their field experience. The internship may be at distant locations. Faculty supervision and communication may be through various technologies that students must utilize. A complete list of practicum requirements is in Human Services Management program description in the college catalog. Civic Engagement Intensive (CEI) sections exist.

IDST - INTERDISCIPLINARY STUDIES

IDST - 1103 College and Career Success, 3.00 Credits
Level: Lower
This course has been designed for students to explore various components of life planning specific to age and stage readiness. In this course, students will learn strategies for learning new uses of resources; self-awareness and exploration; academic success; effective communication; and management of time, health, and financial resources. Further, this course teaches a decision-making model designed to help students make career/life choices. Students will read and respond to articles, participate in class discussions, and engage in a variety of career assessments/activities. Much of the work required to accomplish these components is experiential in nature and emphasizes application in both student's personal and professional development.

IDST - 4102 Individual Studies Capstone, 2.00 Credits
Prerequisite(s): COMP 1503 with D or better
Level: Lower
Applied Learning Civic Engage
In this course, students will investigate their concentration including current field entrance requirements, necessary skills and job opportunities. Students will create a capstone project demonstrating their skills and knowledge in their chosen concentration. Students will demonstrate their technology proficiency by creating an online portfolio. Students will identify their educational and career goals considering assessments related to their career interests, values, personality and personal strengths. Students will identify and investigate potential four-year transfer programs that will meet their educational and career pathway goals, utilizing information literacy skills. Students will explore the concept of citizenship through critical thinking and analyzing current challenges in their target work environment. Students will design and implement a proposal and plan that demonstrates critical thinking strategies and will promote positive civic outcomes.

IDST - 5002 Interdisc Studies Capstone Des, 2.00 Credits
Prerequisite(s): COMP 1503 with D or better
Level: Upper
Upper Level
In this semester students investigate the nature of interdisciplinary studies, complete personal assessments and reflect on their strengths and goals. A course-taking plan, based on extensive research and written justification, will be created. A portfolio will be designed to include a projection of their chosen concentration(s) along with a 4-semester registration plan, with justification and a collection of supporting documentation. Students will design an individual project demonstrating a plan for integrating their individual lower level core coursework with their upper level area(s) of concentration choices for completion in IDST 7001. Students will present these designs to the student's project supervisor/advisor.

IDST - 5900 Directed Study, 1.00 TO 4.00 Credits
Level: Upper
Upper Level
A student may contract for one to four credit hours of independent study through an arrangement with an instructor who agrees to direct such a study. The student will submit a plan acceptable to the instructor and to the department chairperson. The instructor and student will confer regularly regarding the process of the study.

IDST - 6103 Research Methods Interdisc Std, 3.00 Credits
Prerequisite(s): COMP 1503 with D or better and IDST 5002 with D or better
Level: Upper
Upper Level
In this course students expand their research knowledge via survey research language, research methods and ethical challenges in research. Students will apply an interdisciplinary approach by integrating at least two disciplines as they create an introduction to the problem, a substantial review of the literature and a research proposal. Students will apply the BROAD method of interdisciplinary research as they gather, organize, synthesize and analyze current literature and create an interdisciplinary research prospectus.

IDST - 7001 Interdisc Studies Capstone Prj, 1.00 Credit
Prerequisite(s): COMP 5703 with D or better and IDST 5002 with D or better
Level: Upper
Upper Level
This capstone course includes both proof of purpose and goals of a student's chosen coursework and an individual project demonstrating the integration of their core area with their areas of concentration. Projects may take a range of forms appropriate to the student's concentration and future goals, e.g., a research essay, dissertation, marketing study, computer program or curriculum design. Projects must be approved by the student's advisor and project supervisors. Students will present their projects to their faculty supervisors and peers at the end of the course.

IDST - 8006 Interdisc Studies Internship, 6.00 Credits
Prerequisite(s): IDST 5002 with D or better
Level: Upper
Applied Learning-Civic Engage, Upper Level
This internship will assist the student in making the transition from the classroom to the professional work environment. The intent of the internship is to provide students with the experiential learning opportunity to experience an interdisciplinary situation within their field(s) of study. This internship course will provide both proof of purpose and goals of a student's chosen course-work and the integration of their core area with their areas of concentration. Students will complete supervised fieldwork in a selected business, industry, government agency or other educational or professional setting related to their two concentration areas. Students carry out a planned program of educational experiences under direct supervision of an on-the-job employer or supervised professional area/field. Internship assignments and follow-up reports along with a journal of work experience activities will be required. Evaluation will be based on the quality of experiences gained from the internship, student work performance, and on-time completion of hours.

IMSC - IMAGING SCIENCE

IMSC - 5004 Cross Sect. Anat. in Med. Imag, 4.00 Credits
Level: Upper
The content of this course is designed to study sectional anatomy of computed tomography images, diagrams, textbook, and anatomical atlases (skateon). Knowledge of sectional anatomy is essential to the technologist in the practice of computed tomography in identifying areas of interest, what is normal imaging, and what is abnormal. Cross-Sectonal Anatomy is the study of sectional Anatomy for Imaging Professionals. The course is designed to provide the student with an overview of human anatomy, viewed in body sections, as it relates to the imaging professional.

IMSC - 6103 CT Clinical I, 3.00 Credits
Prerequisite(s): IMSC 5004 with D or better
Level: Upper
This course provides students with a hands-on application necessary to become a registered computed tomography technologist in a hospital and/or a radiology imaging environment. Recommendations are based on those requirements from the ARRT.

IMSC - 6303 MRI Clinical Experience I, 3.00 Credits
Prerequisite(s): IMSC 5004 with D or better
Level: Upper
Applies principles learned about Magnetic Resonance Imaging procedures. Clinical hours will be under the supervision of a qualified registered American Registry of Radiologic Technologists (ARRT) (MRI) technologist. Placement of clinical assignment approved by program coordinator. MRI exam competencies will be obtained and exam proficiency will be monitored.

ITAL - ITALIAN

ITAL - 1303 Italian I, 3.00 Credits
Level: Lower
Gen Ed - Foreign Language, Liberal Arts and Science
This course focuses on developing the student's ability to speak, to write, and to read Italian. Additional emphasis is given to learning about Italian culture. Instruction centers on oral communication, written communication, reading for comprehension, and cultural awareness. Writing and speaking are emphasized in assignments related to readings, class discussions, and lectures.

ITAL - 2303 Italian II, 3.00 Credits
Prerequisite(s): ITAL 1303 with D or better
Level: Lower
Gen Ed - Foreign Language, Liberal Arts and Science
This course focuses on developing the student's ability to understand Italian sentences and frequently used expressions that relate to personal and family information, shopping, local geography, and employment. Oral communication is emphasized in simple tasks that require a direct exchange of information on familiar and routine matters. Writing is emphasized in assignments related to readings, class discussions, and lectures. The course focuses on an intermediate level of reading, speaking, and writing in Italian.
ITAL - 5303 Italian III, 3.00 Credits
Prerequisite(s): ITAL 5003 with D or better
Level: Lower
Liberal Arts and Science
This course will focus on developing the student's ability to understand Italian sentences and frequently used expressions that relate to personal and family information, shopping, local geography, and employment. Oral communication will be emphasized in simple tasks that require a direct exchange of information on a limited number of routine matters or conversations about personal interests or employment. Writing will be emphasized in assignments centered on readings, class discussions, and lectures. The course will focus on an intermediate level of reading, speaking, and writing in Italian.

ITAL - 4503 Italian IV, 3.00 Credits
Prerequisite(s): ITAL 5003 with D or better
Level: Lower
Liberal Arts and Science
This intermediate course will focus on developing the student's ability to understand the main ideas found in complex texts in Italian on both concrete and abstract topics; this focus will include technical discussions in the student's field of specialization. The course will also focus on the student's ability to speak with fluency and spontaneity. The students will be able to engage in regular interaction with native speakers and produce clear, detailed text on a wide range of subjects.

ITAL - 5113 Contemporary Italian Literatur, 3.00 Credits
Prerequisite(s): ITAL 4303 with D or better
Level: Upper
Liberal Arts and Science, Upper Level
Students will study Italian literature of the 20th century. Students will critically analyze internationally renowned literary texts in the Italian language. Authors include Luigi Pirandello, Filippo Tommaso Marinetti, Gabriele D'Annunzio, Primo Levi, Salvatore Quasimodo, Giuseppe Ungaretti, Eugenio Montale, Pier Paolo Piscopo, Umberto Eco, and others. Students will read from these author's works and engage in a historical, literary, and rhetorical analysis of them while determining techniques of composition. Students will be expected to actively participate and contribute to class discussion. The course will be conducted in Italian; participants will do all written and oral work in Italian. A research paper will be required.

ITAL - 5223 Modern Italian Literature, 3.00 Credits
Prerequisite(s): ITAL 4303 with D or better
Level: Upper
Liberal Arts and Science, Upper Level
Students will study Italian literature from the 17th to the 19th century. Students will critically analyze internationally renowned literary texts in the Italian language. Authors include Galileo Galilei, Carlo Goldoni, Giuseppe Parini, Ugo Foscolo, Giacomo Leopardi, Alessandro Manzoni, Giovanni Verga, and others. Students will read from these author's works and engage in a historical, literary, and rhetorical analysis of them while determining techniques of composition. Students will be expected to actively participate and contribute to class discussion. The course will be conducted in Italian; participants will do all written and oral work in Italian. A research paper will be required.

ITAL - 5303 Italian V, 3.00 Credits
Prerequisite(s): ITAL 4303 with D or better
Level: Lower
Liberal Arts and Science, Upper Level
This advanced course will focus on developing the student's ability to understand a wide range of demanding, longer texts and recognize implicit meaning; the students will be able to express themselves fluently and spontaneously and use language flexibly and effectively for social, academic, and professional purposes. The students will be expected to produce clear and detailed text on complex subjects, and they will be expected to show controlled use of organizational patterns, connectors, and cohesive devices.

ITAL - 5333 Medieval Italian Literature I, 3.00 Credits
Prerequisite(s): ITAL 4303 with D or better
Level: Upper
Liberal Arts and Science, Upper Level
Dante Alighieri is the most important Italian poet, the father of the Italian language, and the principal figure of Medieval Literature in Europe. This course will examine Dante Alighieri's La Divina Commedia (The Divine Comedy) and some of his minor works such as La Vita Nuova (The New Life) and Il Convivio (The Banquet). Attention will be given to the Epistola a Cangrande della Scala (Letter to Cangrande della Scala) which is believed to be Alighieri's letter to his foremost patron. The course will allow students to examine these internationally renowned literary texts in their original language. Students will read from these author's works and engage in a historical, literary, and rhetorical analysis of them while determining techniques of composition. Students will be expected to actively participate and contribute to class discussion. The course will be conducted in Italian; participants will do all written and oral work in Italian. A research paper will be required.

ITAL - 5443 Medieval Italian Literature II, 3.00 Credits
Prerequisite(s): ITAL 4303 with D or better
Level: Upper
Liberal Arts and Science, Upper Level
Students will study Italian literature from the 14th to the 16th Century. Students will read and critically analyze internationally renowned literary texts in their original language. Authors include Francesco Petrarca (Petrarch), Giovanni Boccaccio, Ludovico Ariosto, Torquato Tasso, Niccolo Machiavelli, and others. Students will read from these author's works and engage in historical, literary, and rhetorical analysis of texts while determining techniques of composition. Students will also learn about the lives and historical context of the authors; they will critically determine how the author's lives influenced the masterpieces that they created. Students will be expected to actively participate and contribute to class discussion. The course will be conducted in Italian; participants will do all written and oral work in Italian. A research paper will be required.

ITAL - 6303 Italian VI, 3.00 Credits
Prerequisite(s): ITAL 5003 with D or better
Level: Upper
Liberal Arts and Science, Upper Level
This advanced course will enable students to read and write Italian fluently. Students will work with a wide range of spoken and written sources. Students will concentrate on the analysis of texts for argument structure, and they will be expected to summarize and coherently present arguments in oral presentations. Student work will require an advanced level of spontaneity when writing and speaking; students will be expected to precisely differentiate nuances of meaning in complex situations.

JAPN - JAPANESE

JAPN - 1203 Japanese I, 3.00 Credits
Level: Lower
Gen Ed - Foreign Language, Liberal Arts and Science
This course is an introduction to the spoken and written Japanese language and focuses on developing the student's ability to speak, to write, and to read Japanese. Additional emphasis is given to learning about Japanese culture. Instruction centers on oral communication, written communication, reading for comprehension, and cultural awareness. Writing and speaking are emphasized in assignments related to readings, class discussions, and lectures. This course also provides students with the ability to communicate in Japanese in their pursuit of travel, business, academic endeavors, and personal pleasure.

JAPN - 2203 Japanese II, 3.00 Credits
Prerequisite(s): JAPN 1203 with C or better
Level: Lower
Gen Ed - Foreign Language, Liberal Arts and Science
This course is designed as a continuation of JAPN 1203; this course further develops the student's ability to speak, to write, and to read Japanese. Additional emphasis is given to learning about Japanese culture. Instruction centers on oral communication, written communication, reading for comprehension, and cultural awareness. Writing and speaking are emphasized in assignments related to readings, class discussions, and lectures. This course also provides students with the ability to communicate in Japanese in their pursuit of travel, business, academic endeavors, and personal pleasure.

LITR - LITERATURE

LITR - 2703 Sci Fi in the 20th Century, 3.00 Credits
Prerequisite(s): COMP 1503 with D or better
Level: Lower
Gen Ed - Humanities, Liberal Arts and Science
This course is designed as an introduction to science fiction. The major works of science fiction are read and discussed. Works selected contain major themes present in science fiction in the 20th Century. Readings, class discussions, and lectures are the basis for oral reports and written assignments which continue training in composition and encourage a broadening of interest in science and technology. Writing is continued in assignments related to readings, class discussions, and lectures.

LITR - 2343 Children's Literature, 3.00 Credits
Prerequisite(s): COMP 1503 with D or better
Level: Lower
Gen Ed - Humanities, Liberal Arts and Science
This course is designed as an introduction to children's literature. Readings include stories by such masters as Joyce, Lawrence, Faulkner, Hemingway, and O'Connor, as well as recent works by Otsen, Paleo, and Bartheleme. Writing is continued in assignments related to readings, class discussions, and lectures.

LITR - 2603 Introduction to Literature, 3.00 Credits
Prerequisite(s): COMP 1503 with D or better
Level: Lower
Gen Ed - Humanities, Liberal Arts and Science
This course focuses on literature, thought, and language. Writing is continued in assignments related to readings, class discussions, and lectures. Selections include novels, short stories, poems, and plays.

LITR - 2703 Sci Fi in the 20th Century, 3.00 Credits
Prerequisite(s): COMP 1503 with D or better
Level: Lower
Gen Ed - Humanities, Liberal Arts and Science
This course focuses on the scientific, theoretical, and cultural aspects of science fiction. Works selected contain major themes present in science fiction in the 20th Century. Readings, class discussions, and lectures are the basis for oral reports and written assignments which continue training in composition and encourage a broadening of interest in science and technology. Writing is continued in assignments related to readings, class discussions, and lectures.

LITR - 2813 Introduction to Film, 3.00 Credits
Prerequisite(s): COMP 1503 with D or better
Level: Lower
Gen Ed - Humanities, Liberal Arts and Science
This course focuses on film, thought, and language through the viewing and analysis of representative fiction films. Writing is continued in assignments related to film viewing, class discussions, and lectures. From readings and lectures, the student will become acquainted with basic technical terms and film theory, thus facilitating analysis of the more complex aspects of film history and production. Permission of the instructor may supersede prerequisite. Writing is continued in assignments related to readings, class discussions, and lectures.

LITR - 2900 Directed Study, 1.00 TO 4.00 Credits
Level: Lower
Gen Ed - Humanities, Liberal Arts and Science
This course is designed as a continuation of JAPN 1203; this course further develops the student's ability to speak, to write, and to read Japanese. Additional emphasis is given to learning about Japanese culture. Instruction centers on oral communication, written communication, reading for comprehension, and cultural awareness. Writing and speaking are emphasized in assignments related to readings, class discussions, and lectures. This course also provides students with the ability to communicate in Japanese in their pursuit of travel, business, academic endeavors, and personal pleasure.
LITR - 2913 Introduction to Poetry, 3.00 Credits
Prerequisite(s): COMP 1503 with D or better
Level: Lower
Gen Ed - Humanities, Liberal Arts and Science
This course focuses on the canon of American poetry and its influential role in American culture. Students will analyze and interpret major poems from the 19th century to the present, discussing the writer's craft and the assigned readings, and critiquing student writing in a workshop setting.

LITR - 3323 Survey of American Lit I, 3.00 Credits
Prerequisite(s): COMP 1503 with D or better
Level: Lower
Gen Ed - Humanities, Liberal Arts and Science
This is the first of two courses surveying American literature from the time of the Puritans to the present. This course stresses the historical approach, the American cultural approach, and the biographical approach inculding the critical study of such authors as Edwards, Franklin, Poe, Whitman, Emerson, Thoreau, Hawthorne, and Melville.

LITR - 3333 Survey of British Literature I, 3.00 Credits
Prerequisite(s): COMP 1503 with D or better
Level: Lower
Gen Ed - Humanities, Liberal Arts and Science
Survey of British Literature I is the first of two courses surveying British literature from the Middle Ages to the present; this course examines literature in the Middle Ages, the Early Modern Period, and the Restoration and eighteenth century. Emphasis is placed on the critical study of works such as Beowulf and authors such as Malory, Chaucer, Julian of Norwich, Spenser, Marlowe, Shakespeare, Milton, Dryden, Defoe, Swift, Pope, Johnson, and Boswell. Writing is emphasized in assignments related to readings, class discussions, and lectures.

LITR - 4333 Survey of American Lit II, 3.00 Credits
Prerequisite(s): COMP 1503 with D or better and LITR 2603 with D or better
Level: Lower
Gen Ed - Humanities, Liberal Arts and Science
This course is a continuation of Survey of American Literature I with special attention to the works of Twain, Howells, Dickinson, James, Crane, Dreiser, Robinson, Frost, O'Neill, Eliot, Hemingway, Faulkner, Baldwin, and Updike. Writing is continued in assignments related to readings, class discussions, and lectures.

LITR - 4900 Directed Study, 1.00 TO 4.00 Credits
Level: Lower
Gen Ed - Humanities, Liberal Arts and Science
A student may contract for an independent study through an arrangement with an instructor who agrees to direct such a study. The student will submit a plan acceptable to the instructor and to the department chairperson. The instructor and student will confer regularly regarding the progress of the study.

LITR - 5133 Special Topics in Literature, 3.00 Credits
Prerequisite(s): COMP 1503 with C or better and ( LITR 2603 with C or better or LITR 2033 with C or better or LITR 2343 with C or better or LITR 2503 with C or better or LITR 2603 with C or better or LITR 2413 with C or better or LITR 2903 with C or better or LITR 2913 with C or better or LITR 3233 with C or better or LITR 3333 with C or better or LITR 4333 with C or better or LITR 7003 with C or better )
Level: Upper
Liberal Arts and Science, Upper Level
Students will study selected literature of the past five centuries through the lens of a particular special topic, such as the African-American experience, Life During Wartime, or Global Colonization, or the Women's Rights Movement, or Political Movements Left and Right. Students will be required to write a substantial research paper that analyzes an issue directly related to their major, and they will present their research at the end of the semester. Short writing exercises and exams will also be required. Class sessions will center on student participation and debate, and discussions and writing strategies will employ principles of sound reasoning, critical thinking, and Information Literacy skills.

LITR - 7033 Alternate World Literature, 3.00 Credits
Prerequisite(s): COMP 1503 with D or better and ( LITR 2603 with D or better or LITR 2343 with D or better or LITR 2503 with D or better or LITR 2703 with D or better or LITR 2813 with D or better or LITR 2903 with D or better or LITR 3233 with D or better or LITR 3333 with D or better or LITR 4333 with D or better or LITR 5133 with D or better or LITR 7003 with D or better )
Level: Upper
Gen Ed - Humanities, Liberal Arts and Science, Upper Level
This course will trace the evolution of Native American literature from oral tradition to written narrative. Students will analyze Native American texts for their narrative techniques, historical and cultural significance, themes, symbols, as well as their place in the American literary tradition. Course texts will include clips of oral storytelling, a selection of Native American myths, documentaries, nonfiction, fiction, and feature films produced by Native Americans. In addition, the course will investigate the myths and realities of reservation education, alcoholism, suicide, the workplace, healthcare, Hollywood portrayals, family structures, and intercultural relations. Students will be required to write a personal reflection paper, research papers on the readings/films, and a revision of one of the essays. Students must demonstrate the ability to write analytically and coherently, in ways appropriate to the discipline, and they must display the ability to revise and improve their writing in both form and content.

LITR - 7023 Alternate World Literature, 3.00 Credits
Prerequisite(s): COMP 1503 with D or better and ( LITR 2603 with D or better or LITR 2343 with D or better or LITR 2503 with D or better or LITR 2703 with D or better or LITR 2813 with D or better or LITR 2903 with D or better or LITR 3233 with D or better or LITR 3333 with D or better or LITR 4333 with D or better or LITR 7003 with D or better or LITR 7013 with D or better )
Level: Upper
Gen Ed - Humanities, Liberal Arts and Science, Upper Level
This course will trace the evolution of Native American literature from oral tradition to written narrative. Students will analyze Native American texts for their narrative techniques, historical and cultural significance, themes, symbols, as well as their place in the American literary tradition. Course texts will include clips of oral storytelling, a selection of Native American myths, documentaries, nonfiction, fiction, and feature films produced by Native Americans. Students will be required to write a personal reflection paper, research papers on the readings/films, and a revision of one of the essays. Students must demonstrate the ability to write analytically and coherently, in ways appropriate to the discipline, and they must display the ability to revise and improve their writing in both form and content.

LSCM - LOGISTICS & SUPPLY CHAIN
LSCM - 7003 Log, Warehousing, Invt, Distro, 3.00 Credits
Prerequisite(s): ( BUAD 1513 with D or better or TMGT 7153 with D or better ) and BUAD 7003 with D or better
Level: Upper
Upper Level
This course is an introduction to logistics as part of the supply chain process. The course will focus on the inbound and outbound logistics activities - inventory, warehousing, packaging, transportation management - that ensure the customer receives the desired product at the right time and place with the right quality and price. Students will apply learning to case studies focusing on organizational and managerial issues in logistics.

LSCM - 7113 Enterprise Resource Planning, 3.00 Credits
Prerequisite(s): ( BUAD 3153 with D or better or TMGT 7153 with D or better ) and BUAD 7003 with D or better and LSCM 7003 with D or better
Level: Upper
Upper Level
This course focuses on literature set in other worlds, including alternate realities, possible universes, and imaginative realms. To discover new perspectives and deepen understanding of their own reality, students will critically analyze the extrapolation and adaptation of human life into other worlds and vice versa. Selections may include films, video games, novels, plays, poems, and short stories.
MATH - 1043 Pathways Fundamentals*, 3.00 Credits
Prerequisite(s): ( BUAD 3153 with D or better or TMGT 7153 with D or better ) and BUAD 7033 with D or better
Level: Upper
Upper Level
Supply chain management (SCM) is a system approach to managing the entire flow of information, materials, and services from raw materials suppliers through operations facilities and warehouses to the end customer. This course is an introduction to, and application of, theoretical approaches and practices to managing a global supply chain. Course focus will be on managing material and information outside of the factory walls including aspects of product design collaboration, demand planning and forecasting, inventory management and deployment, understanding and designing distribution channels, procurement in global economy, general logistics, and career opportunities. This course stresses the need to identify and maintain customer value throughout the entire process. Students will learn how supply chain strategies support corporate strategies.

MATH - 1004 Mathematical Concepts*, 4.00 Credits
Prerequisite(s): MATH 1044 with C or better
Level: Remedial
Quantway 1 Comparison, Remedial
This course will introduce the students to the following topics: order of operations, operations on real numbers, simplifying algebraic expressions, integer exponents, solving linear equations in one variable, graphing linear equations in two variables, and applications such as geometry and modeling. Emphasis is placed on reviewing basic arithmetic skills and elementary algebra topics. Development of arithmetic skills throughout the semester is essential, therefore students will not be allowed to use calculators. Students will work on the development of thinking skills through creative problem-solving, writing to explain methods and solutions to problems, and collaborative learning. NOTE: This is a remedial course; it will not satisfy any graduation requirements. A grade of C or better is required to register for any subsequent math course.

MATH - 1014 Algebra Concepts, 4.00 Credits
Prerequisite(s): MATH 1004 with C or better
Level: Lower
Liberal Arts and Science
This course is intended for students who need more preparation to be successful in College Algebra or other courses of that level. Topics covered include: review of first degree equations, systems of equations and inequalities, graphing, polynomials, factoring, radicals and rational exponents, quadratic equations, rational expressions, relations and functions and an introduction to triangle trigonometry. This course is also designed for students who did not complete Algebra II/taking high school. Students cannot receive credit for MATH 1014 if they have credit for MATH 1033, 1034, 1054, 1063 or MATH 1084. Emphasis will be placed on problem solving. A graphing calculator is required. Students cannot receive credit for MATH 1033 if they have credit for MATH 1034, 1054, MATH 1063, MATH 1084, or any course for which MATH 1063 or MATH 1084 are prerequisites. A grade of C or better is required to take MATH 2043, College Trigonometry.

MATH - 1033 College Algebra, 3.00 Credits
Prerequisite(s): MATH 1014 with C or better
Level: Lower
Liberal Arts and Science
This course includes topics such as polynomials, radicals, exponents, coordinate geometry, rational expressions and equations, and solutions to linear and quadratic equations. Students are introduced to the concept of functions and their graphs. Additional topics may include conic sections, matrices, variation, and nonlinear inequalities. Emphasis will be placed on problem solving. A graphing calculator is required. The course is designed to give students additional time above that allotted in MATH 1033 working on mastery of concepts and skills in the student learning outcomes. Students cannot receive credit for MATH 1034 if they have credit for MATH 1033, MATH 1054, MATH 1063, MATH 1084, or any course for which MATH 1063 or MATH 1084 are prerequisites. A grade of C or better is required to take MATH 2043, College Trigonometry.

MATH - 1034 Pathways Fundamentals*, 3.00 Credits
Level: Remedial
Quantway 1 Comparison, Remedial
Pathways Fundamentals is a remedial mathematics course paired as a corequisite with either MATH 1103 or MATH 1054 or MATH 2043. The course is designed to allow for just-in-time remediation of topics essential to the successful completion of the corequisite courses. The lessons within the course follow the pedagogy of the Pathways courses with the primary focus on discovery-based and collaborative learning. The course will include content-based material (either quantitative reasoning or statistics).

MATH - 1054 Precalculus, 4.00 Credits
Level: Lower
Liberal Arts and Science
This course is designed primarily for the student who needs a foundation in algebra and trigonometry for the study of calculus. The concept of function and graphical representation of functions is stressed. Topics covered include: real numbers; algebra of real numbers including equations and inequalities; functions and their graphs including polynomials, rational expressions, logarithmic and exponential, trigonometric, algebra of the trigonometric functions including identities, equations, polar coordinates, complex numbers, systems of equations. Students may not earn credit for this course and for MATH 1053 or MATH 1033 or for MATH 2043. Students cannot receive credit for MATH 1054 if they have credit for MATH 1063, MATH 1084, or any course for which MATH 1063 or MATH 1084 are prerequisites.

MATH - 1063 Technical Calculus I, 3.00 Credits
Prerequisite(s): MATH 1014 with C or better and MATH 2043 with D or better or ( MATH 1034 with C or better and MATH 2043 with D or better ) or ( MATH 1054 with D or better and MATH 2043 with D or better )
Level: Lower
Gen Ed - Mathematics, Liberal Arts and Science
This course includes a review of functions, an introduction to the concept of limits, and a study of the techniques of differentiation and integration of algebraic functions with applications to the various technologies. A graphing calculator is required. Credit for MATH 1063, Technical Calculus I will not be allowed if student receives credit for MATH 1084, Calculus I.

MATH - 1084 Calculus I, 4.00 Credits
Prerequisite(s): MATH 2043 with D or better or MATH 1054 with D or better
Level: Lower
Gen Ed - Mathematics, Liberal Arts and Science
This course is designed for the student intending to continue his/her education in mathematics, science or engineering. The course includes a thorough treatment of limits leading to the Limit definition of the derivative and definite integral. Properties and rules to differentiate and integrate algebraic and transcendental functions and numerous applications of the derivative and integral will be studied. A graphing calculator is required. Students cannot receive credit for both MATH 1063 and MATH 1084.

MATH - 1103 Quantway Core, 3.00 Credits
Corequisite(s):
Level: Lower
Gen Ed - Mathematics, Initial College-level Math, Liberal Arts and Science
Quantway Core focuses on math for everyday life. It integrates fluency with numbers, proportional reasoning, data interpretation, algebraic reasoning, modeling, and communicating quantitative information. Mathematical concepts are investigated through group problems and class discussions based on real-life contexts of citizenship, personal finance, and model literacy. A grade of C or better is required to register for any subsequent math course. The course prepares students to take college level non-STEM courses in mathematics, such as MATH 1014, MATH 1113, MATH 1114, MATH 1123 or MATH 1323.

MATH - 1113 Statistical Concepts, 3.00 Credits
Prerequisite(s): MATH 1004 with C or better
Level: Lower
Gen Ed - Mathematics, Initial College-level Math, Liberal Arts and Science
This is a 3 credit, one-semester course which provides an introduction to and understanding of the basic concepts of statistics. Actual computation will be minimal; computers will be used whenever calculations are necessary. Emphasis will be placed on the meaning of statistical results. Content will include sampling, experiments, measurement, organizing data, and statistical indices. Optional topics include probability, time trends, survey design and basic inference concepts.

MATH - 1114 Quantway II, 4.00 Credits
Prerequisite(s): MATH 1104 with C or better or MATH 1143 with C or better or MATH 1014 with C or better
Level: Lower
Gen Ed - Mathematics, Liberal Arts and Science, Quantway 2
This course uses mathematical and statistical reasoning in everyday life decision-making. The course integrates percentages, probability, mathematical modeling, and statistical thinking within quantitative literacy. This is achieved through hands-on, collaborative learning with a focus on medical, financial and citizenship real-world examples. A student may not receive credit for MATH 1114 if they have already received credit for MATH 1323.

MATH - 1123 Statistics I, 3.00 Credits
Prerequisite(s): MATH 1003 with C or better or MATH 1044 with C or better or MATH 1104 with C or better
Level: Lower
Gen Ed - Mathematics, Liberal Arts and Science
This course is the first of a two semester sequence in statistics. It covers mainly descriptive statistics, probability concepts, and inferential concepts. Statistical indices. Optional topics include probability, time trends, survey design and basic inference concepts.

MATH - 1143 Liberal Arts Math I, 3.00 Credits
Prerequisite(s): MATH 1004 with C or better
Level: Lower
Gen Ed - Mathematics, Liberal Arts and Science
This is a one semester course whose basic objective is to develop an interest and appreciation for mathematics in students with little background in the subject. Included are topics from the following areas: Problem Solving, Inductive Reasoning, Estimation, Sets, Consumer Math, Metric System, Algebra, and Geometry. The course integrates topics from the following areas: Linear Equations and Inequalities, additional topics in Consumer Mathematics, Probability, Statistics, Number Systems, Number Theory, and Voting Methods.

MATH - 1203 Statway Core, 3.00 Credits
Corequisite(s):
Level: Lower
Gen Ed - Mathematics, Initial College-level Math, Liberal Arts and Science
Statway Core is the first course in the two-semester Statway course sequence. The Statway Core course focuses on math for everyday life. It integrates fluency with numbers, proportional reasoning, data interpretation, algebraic reasoning, modeling, and communicating quantitative information. Mathematical concepts are investigated through group problems and class discussions based on real-life contexts of citizenship, personal finance, and model literacy. A grade of C or better is required to register for MATH 1203.

MATH - 1204 Technical Calculus II, 3.00 Credits
Prerequisite(s): MATH 1054 with D or better
Level: Lower
Gen Ed - Mathematics, Liberal Arts and Science
Technical Calculus II is the second course in the two-semester sequence that is intended for students majoring in science and technology. The course includes a review of differentiation and integration of algebraic and transcendental functions with applications. A graphing calculator is required. Credit for MATH 1204, Technical Calculus II will not be allowed if student receives credit for MATH 1208, Calculus II.
MATH - 2163 Discrete Mathematics, 3.00 Credits
Prerequisite(s): MATH 1204 with C* or better
Level: Lower
Gen Ed - Mathematics, Liberal Arts and Science
This course is the second in the two-semester Statistics course sequence. The Statistics course sequence is recommended for students enrolled in degree programs that require no math beyond college level statistics. Both courses in the sequence, Statway I and Statway II, must be taken to receive credit for college level statistics. Students will use mathematical and statistical tools to explore real-life data in a participatory learning environment. Statway II topics include sampling distributions and the Central Limit Theorem, confidence intervals, hypothesis testing, ANOVA and Chi-Square tests, and statistical models. This course requires the use of statistical technology.

MATH - 1323 Quantitative Reasoning, 3.00 Credits
Prerequisite(s): MATH 1014 with D or better
Level: Lower
Gen Ed - Mathematics, Liberal Arts and Science
This course is designed for technical curricula where quantitative reasoning is required. The course content includes critical thinking skills, arithmetic and algebra concepts, statistical concepts, financial concepts, as well as numerical systems and applications. A scientific calculator is required.

MATH - 1423 Explorations in Geometry, 3.00 Credits
Prerequisite(s): MATH 1014 with D or better
Level: Lower
Applied Learning-Creative Work, Gen Ed - Mathematics, Liberal Arts and Science
The content of this course will apply geometrical truths in a variety of contexts, including knots, tessellations and graph theory. In, probability, will cover and binomial probability of Gestalt perceptual properties, the exploration and creation of models of geometric art from other cultures, and any additional material deemed suitable by the instructor. The material will involve experimentation by the student in a geometric forum to discover or verify properties of 2- and 3-dimensional objects and patterns. AutoCAD and 2- and 3-dimensional modeling tools will be used extensively to enhance spatial intelligence skills and awareness of properties. Students will learn to analyze designs by identifying their geometric component parts and create designs by combining geometric shapes. They will identify the rules used in creating the design and will create new designs by varying some of those rules.

MATH - 2043 College Trigonometry, 3.00 Credits
Prerequisite(s): MATH 1033 with C or better or MATH 1034 with C or better
Level: Lower
Gen Ed - Mathematics, Liberal Arts and Science
This course incorporates trigonometric functions and their properties with the study of identities, formulas, equations, and graphs. Also included are the study of right and oblique triangles using the law of sines and cosines with emphasis placed on contextual applications and problem solving. Exponential and logarithmic functions with related problem solving are included. A graphing calculator is required. Students cannot receive credit for MATH 2043 if they have credit for MATH 1054, MATH 1063, MATH 1084, or any course for which MATH 1063 or MATH 1084 are prerequisites.

MATH - 2074 Technical Calculus II, 4.00 Credits
Prerequisite(s): MATH 1084 with D or better or MATH 1084 with D or better
Level: Lower
Gen Ed - Mathematics, Liberal Arts and Science
A continuation of MATH 1063 with further study in differentiation and integration of both the algebraic and transcendental functions. Applications will be included in each topic. An introduction to Matrix Algebra may be included. Graphing Calculator required. Student cannot receive credit for MATH 2074 if they have received credit for MATH 1084.

MATH - 2094 Calculus II, 4.00 Credits
Prerequisite(s): MATH 1084 with D or better
Level: Lower
Gen Ed - Mathematics, Liberal Arts and Science
This course is designed as a continuation of MATH 1084 with a concentrated study of integration techniques along with applications. Applications include calculating areas and volumes, and arc length. The course involves the methods of integration and applications as they apply to both the algebraic and transcendental functions. Infinite series and Taylor series will be included. A graphing calculator is required. Student cannot receive credit for both MATH 2094 and MATH 2074.

MATH - 2124 Statistical Methods & Analysis, 4.00 Credits
Prerequisite(s): MATH 1033 with C or better or MATH 1034 with C or better
Level: Lower
Gen Ed - Mathematics, Liberal Arts and Science
This is a one-semester, non-calculus based course, which covers descriptive as well as inferential statistics. Included are topics on collecting, organizing, and summarizing data. Other topics include correlation and regression, probability distributions, normal approximation to the binomial, central limit theorem, confidence intervals, hypothesis testing, and nonparametric statistics. Students cannot receive credit for both MATH 2124 and any of the following: MATH 1113, MATH 1123, MATH 2133, and MATH 7123.

MATH - 2133 Statistics II, 3.00 Credits
Prerequisite(s): MATH 1123 with C or better or MATH 1204 with C* or better
Level: Lower
Gen Ed - Mathematics, Liberal Arts and Science
This course is a continuation of MATH 1123 emphasizing probability distributions with the prediction and analysis of inferential statistics. The normal distribution with applications and the Central Limit Theorem are covered or reviewed. Inferential statistics are introduced with confidence intervals, and hypothesis testing as applied to the mean, standard deviation, and proportions. Use of calculators and computer statistical packages for analysis is introduced.

MATH - 2163 Discrete Mathematics, 3.00 Credits
Prerequisite(s): MATH 1033 with C or better or MATH 1034 with C or better
Level: Lower
Gen Ed - Mathematics, Liberal Arts and Science
This course is designed for Information Technology and Mathematics and Science students. The course will introduce and discuss the following topics: functions, relations, sets, logic, counting methods, methods of proof, network graphs and trees, algorithmic analysis, complexity and computability, and matrices. A graphing calculator is required.

MATH - 2900 Directed Study, 1.00 TO 4.00 Credits
Level: Lower
Liberal Arts and Science
A student may contract for one to six credit hours of independent study through an arrangement with an instructor of mathematics. The student and instructor will develop a course of study which must be approved by the department chairperson and the school dean. The instructor and the student will confer regularly regarding the student's progress.

MATH - 3003 Linear Algebra, 3.00 Credits
Prerequisite(s): MATH 1084 with C or better or MATH 1063 with C or better
Level: Lower
Gen Ed - Mathematics, Liberal Arts and Science
This course is an introduction to linear algebra. Topics covered include solutions to systems of linear equations, linear independence, matrix algebra, vector spaces, eigenvalues and eigenvectors. Students will learn how to use technology (e.g. calculators, MAPLE, MATLAB, or Mathematica) to perform required tasks.

MATH - 4900 Directed Study, 1.00 TO 6.00 Credits
Level: Lower
Liberal Arts and Science
A student may contract for one to six credit hours of independent study through an arrangement with an instructor who agrees to direct such a study. The student will submit a plan acceptable to the instructor and to the department chair. The instructor and student will confer regularly regarding the progress of the study.

MATH - 5023 Math Foundations Cryptography, 3.00 Credits
Prerequisite(s): MATH 1084 with D or better
Level: Lower
Liberal Arts and Science, Upper Level
This course is designed to develop the mathematical skills that a student would need in order to analyze and implement historical and modern day cryptography. Historical cryptography will include discussion of the following ciphers: shift, affine, block, substitution, Vigenere, Playfair, ADFGX, binary and ASCII. Modern day cryptography will include discussion of: DES, AES, RSA and Elliptic public key encryption. Applications of modern day cryptography will include digital signatures and e-commerce. Maple software will be used to perform encryption and decryption. Prerequisite: MATH 1084 or permission from instructor.

MATH - 6104 Multivariate & Vector Calculus, 4.00 Credits
Prerequisite(s): MATH 2094 with D or better or MATH 2074 with D or better or MATH 6114 with D or better
Level: Upper
Liberal Arts and Science, Upper Level
This course is designed as a continuation of Integral Calculus. Topics will include: parametric equations, polar, cylindrical and spherical coordinate systems, vectors and vector valued functions, functions of several variables, partial derivatives and applications, multiple integrals, and vector analysis. This course includes Green's theorem, Stokes' theorem, and Gauss' theorem. The course will include several major projects outside of class.

MATH - 6114 Differential Equations, 4.00 Credits
Prerequisite(s): MATH 2094 with D or better or MATH 2074 with D or better
Level: Upper
Gen Ed - Mathematics, Liberal Arts and Science
This is the beginning study of the solution of differential equations with emphasis on both analytic and numerical solutions. Topics include first and second order differential equations and their solutions, series solutions, Laplace transforms, linear equations of higher order, numerical solutions or ordinary differential equations using Euler's method, and the use of Eigenvalue methods to solve linear systems. In addition, this course emphasizes the development of differential equations as mathematical models for a variety of practical applications. The course will include several major projects outside of class.

MATH - 7113 Economic Analy for Engr Tech, 3.00 Credits
Prerequisite(s): MATH 1063 with D or better or MATH 1084 with D or better
Level: Upper
Gen Ed - Mathematics, Liberal Arts and Science
This course covers basic pricing formulas, cost estimation techniques, present economic studies, time-value of money, evaluating a single alternative, comparison and selection among multiple alternatives, and depreciation.

MATH - 7123 Statistics for Engr Tech & Sci, 3.00 Credits
Prerequisite(s): MATH 2074 with D or better or MATH 2094 with D or better
Level: Upper
Gen Ed - Mathematics, Liberal Arts and Science
This course offers the theoretical basis for probability and statistics related to engineering applications. Topics include data analysis techniques, correlation and regression, probability, probability distributions, confidence intervals, hypothesis tests concerning means and standard deviations. Graphing calculators are required. Computer applications may be included.

MATT - MACHINE TOOL TECHNOLOGY

MATT - 1610 Basic Industrial Machining, 4.00 Credits
Level: Lower
Course Fee $199.00
This introductory course is designed to instill safe shop methods and procedures along with the proper and safe use of all equipment associated with Machine Tool Technology. Also incorporated in this introductory course is the proper use of basic measuring tools and hand tools. Students will be instructed in the proper operation of the power saw, drill press and pedestal grinder.

MATT - 1014 Industrial Machining I, 4.00 Credits
Level: Lower
Applied Learning-Practicum
Students will be instructed in the proper operation of power Basic lathe operations will be presented. The student will demonstrate their proficiencies on this equipment by producing specifically assigned projects.
MECH - 1203 Materials Science, 3.00 Credits
Level: Lower
Applied Learning-Practicum, Course Fee $37.00
This course is a first semester, freshman level course. It is a broad introductory study of the basic characteristics of engineering materials. The course will emphasize the selection of metals, plastics, ceramics, and composites for mechanical design purposes. The relationships of structure, material properties, and material selection to the design/manufacturing process will be emphasized. The study will be enhanced by laboratory experience where the student will study mechanical testing equipment as well as chemical, mechanical and heat treatment effects on important material properties. The course will include the study of such areas as corrosion, strength, rigidity, wear resistance, thermal expansion, plasticity and plasticity principles of the common engineering materials. The course includes the use of equipment such as mechanical testing, light microscopes, electron microscopes, metallograph, furnaces and controllers. Data interpretation is also an important emphasis. The students also have substantial preparation work for the weekly labs.

MECH - 1603 Graphics/CAD, 3.00 Credits
Level: Lower
Applied Learning-Practicum
Graphics/CAD involves the visualization, sketching, and geometric construction of mechanical components. Students will layout and create 2D working industrial drawings that adhere to industry standards. This course will illustrate CAD drawing construction techniques that implement graphical communication through the use of the alphabet of lines, orthographic projection, section views, auxiliary views and the creation of assembly and detail mechanical components. This course will also use the ASME Standard Y14.5M-1994 for Geometric Dimensioning & Tolerancing to facilitate the communication of geometry requirements for associated features on detail components and assemblies.

MECH - 1663 Manufacturing Processes, 3.00 Credits
Level: Lower
Applied Learning-Practicum
This course is an introduction to 3D solid modeling techniques utilizing feature-based, constraint-based parametric design. This course encourages the student to visualize parts in their intended smart home, students will identify and specify system input and output design. The use of design intent will help in the arrangement of assemblies, parts, features, and dimensions to meet design requirements.

MECH - 2543 Advanced CAD Applications, 3.00 Credits
Prerequisite(s): MECH 1603 with D or better
Level: Lower
Advanced CAD is a continuation of the basic drafting standards and techniques facilitated through the course pre-requisite, MECH 1603. Delving into other mechanical drafting disciplines, this course will help students develop additional skill sets required in a variety of other mechanical fields. This course will cover, but not be limited to, machine design, weldments, structural steel, process piping, and pressure vessels. The major emphasis of this course will be the creation of working industrial drawings for fabrication and/or successful integration into a mechanical assembly. The following standards will be used: ASME Sec. VIII, Div. 2: Pressure Vessel Code, ASME Y14.5M-Geometric Dimensioning & Tolerancing, ASME B31: Standards of Pressure Piping, ANSI B4.1: Limits and Fits, ASNC: Standard Structural Steel Construction.

MECH - 3124 HVAC Systems, 4.00 Credits
Level: Lower
Applied Learning-Other
This course introduces the student to the fundamental principles of heating, ventilation and air conditioning systems. Topics include psychrometric principles and processes, equipment selection, heating and cooling load calculations and heating system principles including forced warm air, hot water, electric and steam systems, and geothermal heating and cooling systems. Weekly laboratory experiences address topics with organized experiments and applied projects.

MECH - 3203 Computer Aided Manufacturing, 3.00 Credits
Prerequisite(s): MECH 1603 with D or better
Level: Lower
This course is a study of Computer Aided Manufacturing (CAM) using software, programming languages and methods to produce Computer Numerical Control (CNC) machining programs. CAD software is used to develop detailed drawings of student projects. Laboratory exercises include programming, machine tool setup and machine operation. Communication between the student laptops and the machine tools using current communication protocols is also studied.

MECH - 3223 Mechanical Design Principles, 3.00 Credits
Prerequisite(s): MECH 4003 with D or better
Level: Lower
Applied Learning-Other
This course will emphasize the application of mechanical design for industrial machinery. The lecture material for this course will be enhanced through a laboratory experience using design techniques that include the creation of working industrial drawings, parametric, driven spreadsheet solutions of design problems, and component sizing and dimension determinations. The course will include the study of mechanical power systems such as gears, trains, belt and chain drives, linkages, clutch-coupling brake components, torque transmission devices, shaft and component design calculations. The techniques of component design will also include the extensive use of online database information, standards and manufacturer specifications. At all times in this class, the design and development for manufacturability will be paramount.

MECH - 3334 Statics, 4.00 Credits
Prerequisite(s): ( MATH 1054 with D or better or MATH 2043 with D or better or MATH 1063 with D or better or MATH 1084 with D or better ) and ( PHYS 1024 with D or better or PHYS 1044 with D or better or PHYS 1064 with D or better )
Level: Lower
Applied Learning-Other
This course is a study of introductory mechanics through the application of the principles of statics. Students will focus on the equilibria of particles and rigid bodies in two and three dimensions. Additional topics include center of gravity, centroid of structures, friction, area and mass moments of inertia. The course will also emphasize the importance of problem-solving in statics by using algebraic and trigonometric computations.

MECH - 3643 Manufacturing Management, 3.00 Credits
Level: Lower
This course supplements the study of manufacturing processes with emphasis on techniques, processes and factors that contribute to manufacturing management decision making. Previous manufacturing process exposure is desirable but not essential. Selected topics to be discussed include: motion and time study, engineering economics, project planning and scheduling, Computer Integrated Manufacturing/Management (CIM), Just in Time (JIT) planning strategies, Total Quality Management (TQM), Statistical Quality Control (SQC), and other manufacturing policies and strategies.

MECH - 4003 Solid Modeling, 3.00 Credits
Level: Lower
Applied Learning-Practicum
This course is designed to give the student the knowledge and vocabulary to generally comprehend the complex inter-related design and manufacturing functions that must be accomplished to produce the end product. The processes covered include the making of iron and steel, casting, plastics production, hot and cold forming, machining, fastening, non-traditional machining, grinding, etc. Equipment covered in the lab include: lathes, grinders, milling machines, band saws, drill presses, precision measurement devices etc. As time or student experience permit, the topic of basic C.N.C. machine operations and programs may be introduced. Safety and proper manufacturing procedures will be emphasized.

MECH - 4134 Intro. to Renewable Energy, 4.00 Credits
Prerequisite(s): MATH 1043 with D or better or MATH 1064 with D or better or MATH 1084 with D or better )
Level: Lower
Applied Learning-Practicum
Generation, students will learn the fundamental renewable energy options available for learning lab project. After a review of energy and power and the current state of energy law to examine a variety of problems.

MECH - 4121 Geo. Dimension and Tolerancing, 1.00 Credit
Prerequisite(s): MECH 1663 with D or better and MECH 3334 with D or better and MECH 4124 with D or better
Level: Lower
Geometric Dimensioning and Tolerancing (GD&T) is a language of symbols used to describe a part's nominal geometry and the allowable tolerance for variation. Permissible variations in manufactured components are communicated between the design engineer and the manufacturer using standard GD&T symbols. These variations may relate to form, profile, radial relationship to an axis, orientation of one feature to another, or location of features. Application of all symbology and proper interpretation will be stressed.

MECH - 4124 Geo. Dimensioning&Tolerancing, 4.00 Credits
Prerequisite(s): MECH 1603 with D or better and MECH 4003 with D or better and MECH 3223 with D or better and MECH 1663 with D or better
Level: Lower
This course covers Geometric Dimensioning and Tolerancing (GD&T) which is a language of symbols used to describe a part’s nominal geometry and the allowable tolerance for variation. Students will examine permissible variations in manufactured components which are communicated between the design engineer and the manufacturer using standard GD&T symbols. These variations may relate to form, profile, radial relationship to an axis, orientation of one feature to another, or location of features. Application of all symbology and proper interpretation will be stressed.

MECH - 4134 Intro. to Renewable Energy, 4.00 Credits
Prerequisite(s): MATH 2043 with D or better
Level: Lower
This course is a survey of current and future energy generation with a semester-long applied learning lab project. After a review of energy and power and the current state of energy generation, students will learn the fundamental renewable energy options available for power generation. The course is organized by renewable energy technology, and the basic engineering design and implementation considerations for each technology will be discussed. In the laboratory component of this course, students will produce and test a simulated, energy efficient smart home. Students will identify and specify system input and output components that are compatible with renewable energy systems. They will then install and wire components. Finally, students will optimize the simulated smart home for energy efficiency with a programmable microcontroller.

MECH - 4204 Industrial Automation, 4.00 Credits
Prerequisite(s): MECH 4523 with D or better and ( MATH 2043 with D or better or MATH 1054 with D or better or MATH 1063 with D or better or MATH 1084 with D or better)
Level: Lower
Applied Learning-Practicum
In this course, students will learn about a manufacturing process line, understanding of the basic elements underlying mechatronics systems. Students will study the details of sensors and actuators. Hands-on connections and assemblies are required. Programmable logic controllers will be programmed for the task. Electromechanical and pneumatic actuators will be used. Students will learn about the programming and networking of controllers to create sequential operations and measurement instrumentation. The course is predominantly laboratory time. Study materials will come from manufacturer's specifications and laboratory training manuals.
This course emphasizes techniques, processes, and factors that contribute to manufacturing process and operation success. Selection of topics to be covered: 6 sigma DMAIC, KAIZEN, 5S, work flow and project planning and scheduling. Computer Integrated Manufacturing/Management (CIM), Design for Manufacturing (DFM), Just In Time (JIT) manufacturing strategies, Statistical Process Control (SPC), Quality Assurance Control (QCQ), and other potential management policies and strategies. Students will complete a department designated professional project.

**MECH - 7114 Applied Thermodynamics, 4.00 Credits**
Prerequisite(s): MATH 2074 with D or better or MATH 2094 with D or better
Level: Upper
Level: Upper

This course covers the basic concepts of thermodynamics including proper evaluation of ideal gases and compressible substances. Theory and application of the first and second laws of thermodynamics relating to pumps, compressors, turbines, heat exchangers; power cycles-Carnot, Rankine; refrigeration cycles-vapor compression, heat pump are covered. Problem-solving skills are applied to ideal as well as actual cycles. Basic principles of energy conversion, energy conservation, efficiencies and environmental impacts are explored.

**MECH - 7153 Fluid Power Systems Design, 3.00 Credits**
Prerequisite(s): (MECH 4523 with D or better or ELET 4143 with D or better or ELET 6143 with D or better ) and ( MECH 2603 with D or better or MECH 3113 with D or better or MECH 3334 with D or better )
Level: Upper
Level: Upper

Applied Learning-Practicum, Upper Level

This is an upper level design course for all aspects of fluid power systems. Both hydraulic and pneumatic systems are covered. Topics covered in this class include hydraulic circuits, hydraulic power systems, hydrostatic transmissions, and electro-hydraulic control systems. Emphasis will be placed on system design and hydraulic and pneumatic component specification. The course prepares students to sit for the Hydraulic Specialist industry certification examination hosted by the National Fluid Power Society.

**MECH - 7223 Energy Systems, 3.00 Credits**
Prerequisite(s): MATH 2074 with D or better or MATH 2094 with D or better
Corequisite(s): MATH 2074 with D or better or MATH 2094 with D or better
Level: Upper
Level: Upper

Applied Learning-Practicum, Course Fee $76.00, Upper Level

This course is designed to provide a valuable experience in the areas of microfabrication and MEMS (micromechanical systems) technology and respond to calls from industry to provide undergraduate students with more multidisciplinary experiences. The course provides a comprehensive introduction to technology of miniaturization and its application. Methods and tools to create miniature electromechanical architectures are discussed. Students will gain hands-on experience required in standard microfabrication industry and learn basics of design, fabrication, and characterization of MEMS devices. The course is ideal for junior and senior undergraduate students who are looking to perform senior projects in this field, find a career in the microfabrication industry, or pursue graduate studies in MEMS.

**MECH - 7603 Heat Transfer, 3.00 Credits**
Prerequisite(s): MECH 7114 with D or better and MATH 6114 with D or better and MECH 6334 with D or better
Level: Upper
Level: Upper

This course is a study of the physical effects of heat transfer phenomena including conduction, convection, and radiation. This will include the concepts of control volume analysis, conservation laws of mass, momentum and energy, steady state and transient conduction, laminar and turbulent convection, and phase change. A wide range of engineering problems will be presented to the students for solution using algebraic, differential and/or finite-difference methods. The heat transfer process will be directly applied in the design and analysis of thermal energy systems.

**MEDR - HEALTH INFO TECH**

**MEDR - 1114 Intro to Health Info Management, 4.00 Credits**
Prerequisite(s): COMP 1503 with C or better " and ( BIOL 1114 with C or better " or BIOL 1404 with C or better )
Level: Lower
Level: Lower

This is a lecture- and lab-based online course that covers the study of health record content, documentation, compliance with regulations and standards; the role of HIM professionals; data integrity, storage and retrieval, and destruction; release of information, privacy, confidentiality, and HIPAA; legal and ethical issues related to healthcare documentation; the principles to the practice of HIM; primary and secondary use of data; and healthcare organizations and delivery systems.

**MEDR - 1132 Essentials of Pharmacology, 2.00 Credits**
Prerequisite(s): MEDR 1133 with C or better "
Level: Lower
Level: Lower

This is a lecture-based online course for those entering a health care profession, and it covers the study of basic concepts and terminology associated with medication, function, interaction, and administration. Core concepts in pharmacology are introduced, including medication, consumer safety and drug regulations, sources and bodily effects of drugs, medication preparation, abbreviations and systems of measurements, responsibilities, and principles of drug administration. Students also identify diseases associated with certain medications as well as medications that would be prescribed for certain diseases. Commonly used drugs are organized according to classification, and each classification is described along with characteristics of typical drugs, purpose, side effects, cautions and interactions. Patient education for each category is included.
MEDR - 1133 Medical Terminology, 3.00 Credits
Level: Lower
This is a lecture-based course offered in both traditional on-campus and online formats that includes the study of body systems and functions, including the structure, meaning, and use of medical terms related to diseases and operations of the human body. Body systems studied include integumentary, musculoskeletal, nervous, sensory organs, endocrine, cardiovascular, respiratory, reproductive, genitourinary, and digestive. Units on psychology and pharmacology (drugs) are also covered. Students also learn how to use and maintain various electronic applications and systems for health care professionals. The course is designed to provide students with a professional practice experience (PPE) that includes supervised practical application at a healthcare facility. Health Information Technician (RHIT), or other qualified personnel to whom they are assigned. The PPE is designed to enable students to obtain actual practice experience in theoretical and application-based procedures previously studied. Students will complete a maximum of 80 unpaid hours on site. Students will be required to complete weekly logs, discussion board postings of their experience, and submit a completed student handbook along with a final project at the end of their PPE. If a student is not able to be placed at a healthcare facility, remote projects/assignments may be substituted and are supervised by the accepting professional practice site. Additional internet-based laboratory projects/assignments to meet course objectives are assigned and evaluated by college faculty to stimulate professional practice experience as needed.

MEDR - 4411 Health Informatics Tech Seminar, 1.00 Credit
Prerequisite(s): MEDR 1114 with C or better and MEDR 1223 with C or better and MEDR 1234 with C or better and MEDR 1244 with C or better and MEDR 4514 with C or better and MEDR 4312 with C or better and MEDR 4322 with C or better
Level: Lower
This is a lecture-based online course that includes content new to the health information management (HIM) profession and to which students did not receive instruction in previous courses. Examples of such content include, but is not limited to, new and revised coding classification systems, federal and state statutes (laws) and regulations, information technology initiatives, and so on. Appropriate preparation for taking the Registered Health Information Technician (RHIT) exam is integrated throughout the course, during which students will complete practice exams in HIM content areas and interact with the instructor(s) in discussion board forums to receive clarification about concepts and study techniques. This course should be taken in the student's last semester of study.

MEDR - 4123 Leadership in Health Info Tech, 3.00 Credits
Prerequisite(s): MEDR 3414 with C or better and MEDR 4514 with C or better
Level: Lower
This is a lecture-based online course that includes a study of leadership concepts and their application to health information technology. This course will provide students with a professional practice experience (PPE) that includes supervised practical application at a healthcare facility. Health Information Technician (RHIT), or other qualified personnel to whom they are assigned. The PPE is designed to enable students to obtain actual practice experience in theoretical and application-based procedures previously studied. Students will complete a maximum of 80 unpaid hours on site. Students will be required to complete weekly logs, discussion board postings of their experience, and submit a completed student handbook along with a final project at the end of their PPE. If a student is not able to be placed at a healthcare facility, remote projects/assignments may be substituted and are supervised by the accepting professional practice site. Additional internet-based laboratory projects/assignments to meet course objectives are assigned and evaluated by college faculty to stimulate professional practice experience as needed.

MEDR - 4124 Insurance&Reimbursement Process, 4.00 Credits
Prerequisite(s): MEDR 1114 with C or better and MEDR 1223 with C or better and MEDR 1234 with C or better and MEDR 1244 with C or better and MEDR 1254 with C or better and MEDR 4214 with D or better and MEDR 4514 with D or better and MEDR 1114 with C or better and BIOL 2214 with C or better and BIOL 4403 with C or better and MEDR 3414 with C or better
Level: Lower
Applied Learning-Practicum, Clinical Liability Insurance
This course will provide students with varied opportunities in HIM through a professional practice experience (PPE) that includes supervised practical application at a healthcare facility. Health Information Technician (RHIT), or other qualified personnel to whom they are assigned. The PPE is designed to enable students to obtain actual practice experience in theoretical and application-based procedures previously studied. Students will complete a maximum of 80 unpaid hours on site. Students will be required to complete weekly logs, discussion board postings of their experience, and submit a completed student handbook along with a final project at the end of their PPE. If a student is not able to be placed at a healthcare facility, remote projects/assignments may be substituted and are supervised by the accepting professional practice site. Additional internet-based laboratory projects/assignments to meet course objectives are assigned and evaluated by college faculty to stimulate professional practice experience as needed.

MEDR - 4312 HIM Operations PPE, 2.00 Credits
Prerequisite(s): MEDR 1114 with C or better and MEDR 1223 with C or better and MEDR 3414 with C or better and MEDR 4214 with D or better and MEDR 4514 with D or better and BIOL 1114 with C or better and BIOL 2214 with C or better and BIOL 4403 with C or better and MEDR 3414 with C or better
Level: Lower
Applied Learning-Practicum, Clinical Liability Insurance
This course will provide students with varied opportunities in HIM through a professional practice experience (PPE) that includes supervised practical application at a healthcare facility. Health Information Technician (RHIT), or other qualified personnel to whom they are assigned. The PPE is designed to enable students to obtain actual practice experience in theoretical and application-based procedures previously studied. Students will complete a maximum of 80 unpaid hours on site. Students will be required to complete weekly logs, discussion board postings of their experience, and submit a completed student handbook along with a final project at the end of their PPE. If a student is not able to be placed at a healthcare facility, remote projects/assignments may be substituted and are supervised by the accepting professional practice site. Additional internet-based laboratory projects/assignments to meet course objectives are assigned and evaluated by college faculty to stimulate professional practice experience as needed.

MEDR - 4422 Coding PPE, 2.00 Credits
Prerequisite(s): MEDR 1114 with C or better and ( MEDR 1114 with C or better and MEDR 1223 with C or better and MEDR 3414 with C or better or MEDR 1114 with C or better and MEDR 1223 with C or better and MEDR 2214 with C or better and MEDR 4111 with C or better and BIOL 1114 with C or better and BIOL 2214 with C or better and BIOL 4403 with C or better ) and BIOL 1114 with C or better and MEDR 4322 with C or better
Level: Lower
Applied Learning-Practicum, Clinical Liability Insurance
This course is designed to provide students with a professional practice experience (PPE) that includes supervised practical application at a healthcare facility. Health information management department to provide coding opportunities utilizing ICD-10-CM/PCS, CPT and HCPCS level II codes. On site at the healthcare facility students will be under the supervision of a qualified Registered Health Information Administrator (RHIA), Registered Health Information Technician (RHIT), or other qualified personnel to whom they are assigned. The PPE is designed to enable students to obtain actual practice experience in theoretical and application-based procedures previously studied. Students will complete a maximum of 80 unpaid hours on site. Students will be required to complete weekly logs, discussion board postings of their experience, and submit a completed student handbook along with a final project at the end of their PPE. If a student is not able to be placed at a healthcare facility, remote projects/assignments may be substituted and are supervised by the accepting professional practice site. Additional internet-based laboratory projects/assignments to meet course objectives are assigned and evaluated by college faculty to stimulate professional practice experience as needed.

MEDR - 4514 Alternate Care Hlth Info Mgmt, 4.00 Credits
Prerequisite(s): MEDR 1114 with C or better and MEDR 1223 with C or better and MEDR 1234 with C or better and MEDR 1244 with C or better and MEDR 1254 with C or better and MEDR 4514 with C or better and MEDR 1114 with C or better and BIOL 1114 with C or better and BIOL 2214 with C or better and BIOL 4403 with C or better
Level: Lower
Applied Learning-Practicum, Clinical Liability Insurance
This course should be taken in the student's last semester of study. This course should be taken in the student's last semester of study.
MKTG - 1033 Advertising Principles, 3.00 Credits
Prerequisite(s): MKTG 2073 with D or better
Level: Lower
Students will learn the uses and power of advertising and how to apply these concepts to daily business. Students will get a basic understanding of advertising concepts and how to apply them to various media. Utilizing good design and marketing techniques, students will analyze and create advertisements for business use.

MKTG - 1063 Principles of Sales, 3.00 Credits
Prerequisite(s): MKTG 2073 with D or better
Level: Lower
This course examines the principles and methods of sales with respect to the salesperson, their company, products, and customers. Emphasis is placed on the selling process: prospecting, pre-contact, approach, presentation, trial close, meeting objections, and closing. Students will design and implement an industrial sales presentation.

MKTG - 2073 Principles of Marketing, 3.00 Credits
Level: Lower
Applied Learning-Practicum
Principles of Marketing introduces students to the field of marketing. The course emphasizes marketing functions and institutions as they pertain to the product, price, place, and promotion aspects of bringing goods and services to the consumer. Students learn how to evaluate marketplace potential and risk of delivering marketing offerings with meaningful customer value. Students will participate in classroom presentations, discussions, team problem solving and analysis of real-life marketing situations. The creation of a comprehensive marketing plan will be required.

MKTG - 3153 Web Design & Marketing, 3.00 Credits
Prerequisite(s): MKTG 2073 with D or better
Level: Lower
The course will examine the uses and power of the Internet, web pages, and e-commerce and how to apply these concepts to daily business. Integration of marketing and web design techniques will be utilized in the creation of effective web pages.

MKTG - 6003 Strategic Marketing, 3.00 Credits
Level: Upper
Upper Level
Strategic Marketing provides students with an overview of the marketing discipline and a framework that presents marketing as a value creation process. Participants learn how to evaluate marketplace potential and risk from the perspective of the entity’s unique ability to develop and deliver goods and services of meaningful customer value. Students participate in classroom presentations, discussions, team problem solving, and in-depth analysis of a series of real-life marketing situations with a diverse range of entities and industries. The course explores the principal concepts and tools of contemporary marketing management, from market segmentation and product positioning to the design of distribution channels, marketing communications strategy, in order to maximize the value delivered to customers. A Strategic Marketing Plan will be required. Civic Engagement Intensive (CEI) sections exist.

MOTO - MOTORCYCLE/POWER SPORTS

MOTO - 1003 Intro to Shop Service Basics, 3.00 Credits
Level: Lower
Applied Learning-Practicum
This course will familiarize the student with the general operation of a motorcycle and powersports repair facility. Topics will include: typical business operating procedures, safety, tools, equipment, and hazardous materials.

MOTO - 1005 Basic Electrical Systems, 5.00 Credits
Level: Lower
Applied Learning-Practicum
This course will introduce the students to electrical fundamentals including circuit designs and circuit calculations. Common electrical components, operation, and testing will also be included.

MOTO - 1015 Welding & Fabrication, 5.00 Credits
Level: Lower
Applied Learning-Practicum
This course will familiarize the student with all common welding and fabrication techniques, using a variety of equipment including oxy-acetylene torches, arc welders, M.I.G. welders, T.I.G. welders, plasma cutters, metal breaks, and metal sheers.

MOTO - 1025 Brake Systems, 5.00 Credits
Level: Lower
Applied Learning-Practicum
This course will cover brake systems used on all types of motorcycles and powersport vehicles. Topics covered include: component identification, hydraulic principles and component operation including anti-lock brakes; diagnosis and service of brake systems.

MOTO - 2005 Starting & Charging Systems, 5.00 Credits
Level: Lower
Applied Learning-Practicum
This course will cover starting and charging systems used on all types of motorcycles and powersport vehicles. Topics covered include: starter types, alternator/generator types, system wiring, testing, and diagnosis.

MOTO - 2013 Inspection & Preventative Mntn, 3.00 Credits
Level: Lower
Applied Learning-Practicum
This course focuses on NYS vehicle inspection and vehicle maintenance related to the motorcycle and powersports industry.

MOTO - 2015 Suspension & Steering Systems, 5.00 Credits
Level: Lower
Applied Learning-Practicum
This course will cover suspension and steering systems used on all types of motorcycles and powersport vehicles. Topics covered include: component identification, operation of suspension and steering systems; wheel alignment principles, measurement, and adjustments; diagnosis of steering and suspension concerns; steering and suspension component removal and replacement.

MOTO - 2035 Fuel & Ignition Systems, 5.00 Credits
Level: Lower
Applied Learning-Practicum
This course will cover ignition and fuel systems used on all types of motorcycles and powersport vehicles. Topics covered include: carburetion, fuel injection, points type ignitions, and electronic ignition.

MOTO - 3003 Diesel Engines, 3.00 Credits
Level: Lower
Applied Learning-Practicum
This course will cover diesel engines used on all types of power sports vehicles. Topics covered included: engine operation, fuel systems, diagnosis, and service procedures.

MOTO - 3005 Two & Four Stroke Engines, 5.00 Credits
Level: Lower
Applied Learning-Practicum
This course will cover the air and liquid cooled engines and transmissions used on all types of motorcycles and power sports vehicles. Topics covered include engine operation, transmission and clutch operation, diagnosis, and service procedures.

MOTO - 3010 Adv Engines & Transmissions, 10.00 Credits
Level: Lower
Applied Learning-Practicum
This course will cover the air and liquid cooled engines and transmissions used on all types of motorcycles and power sports vehicles. Topics covered include engine operation, transmission and clutch operation, diagnosis, and service procedures.

MOTO - 3023 Final Drive Systems, 3.00 Credits
Level: Lower
Applied Learning-Practicum
This course will cover all types of motorcycle and powersport vehicle drive systems. Topics covered include drive system types, operation, diagnosis, and service procedures.

MOTO - 3035 Drive Systems, 5.00 Credits
Level: Lower
Applied Learning-Practicum
This course will cover all types of motorcycles, power sport, and marine vehicle drive systems. Topics covered include: Drive system types operation, diagnosis, and service procedures.

MOTO - 3045 Adv Fuel and Exhaust Systems, 5.00 Credits
Level: Lower
Applied Learning-Practicum
This course will cover fuel and exhaust systems used on all types of motorcycles and powersport vehicles. Topics covered include intake, fuel and exhaust systems, forced induction, diagnosis, and service.

MOTO - 4005 Advanced Drivability, 5.00 Credits
Level: Lower
Applied Learning-Practicum
This course will cover the use of technologies and procedures to diagnose and repair drivability concerns. Instruction will focus on the use of various types of test equipment available to assist in the diagnosis of problems found on motorcycles and powersport vehicles.

MOTO - 4015 Advanced Electrical, 5.00 Credits
Level: Lower
Applied Learning-Practicum
This course will cover the use of advanced technologies and procedures to diagnose and repair electrical components. Instruction will focus on the use of various types of test equipment and tools used to diagnosis all electrical systems used on modern motorcycles and powersport vehicles.

MOTO - 4023 Exhaust & Induction Systems, 3.00 Credits
Level: Lower
Applied Learning-Practicum
This course will cover exhaust and induction systems used on all types of motorcycles and power sport vehicles. Topics covered include: exhaust, intake, and forced induction; diagnosis and service.

MOTO - 4025 Advanced Applications, 5.00 Credits
Level: Lower
Applied Learning-Practicum
This course focuses on repair facility management practices. Paperwork processing, employee and customer relations are included.

MOTO - 4043 Advanced Applications, 3.00 Credits
Level: Lower
Applied Learning-Practicum
This course focuses on repair facility management practices. Paperwork processing, employee and customer relations are included.

MOTO - 4055 Adv Chassis and Suspension, 5.00 Credits
Level: Lower
Applied Learning-Practicum
This course will cover all types of motorcycles and powersport vehicle chassis and suspension systems. Topics covered include: chassis design, and rear suspension types, operation, diagnosis, and service procedures. Wheels and tire replacement and repair will also be included.

NASC - NATURAL SCIENCE

NASC - 1001 Astronomy Laboratory, 1.00 Credit
Level: Lower
Liberal Arts and Science
This laboratory course is designed to accompany NASC 1003 for the student who wishes a laboratory component to astronomy. It will cover many of the same topics as the astronomy course but using a laboratory setting including the use of a telescope, computers, graphing, and various measuring instruments, and astronomical charts.
NASC - 1003 Astronomy I, 3.00 Credits
Level: Lower
Gen Ed - Natural Sciences, Liberal Arts and Science
This course is an introduction to the physical universe and is designed to familiarize students with the expectations of the nursing program. It covers basic topics in physics, astronomy, geology, meteorology, environmental science, development. The course covers basic topics in physics, astronomy, geology, meteorology, environmental science and earth science. The nature and practice of science will be also discussed.

NASC - 2003 Astronomy II, 3.00 Credits
Level: Lower
Gen Ed - Natural Sciences, Liberal Arts and Science
This course is a survey of the fundamentals and applications of the physical and earth science. The course will introduce advanced topics from the fields of astronomy and cosmology. Emphasis will be placed on scientific process and critical thinking. This course is suitable for science majors or as a science elective. Topics to be covered are: stars, galaxies, evolution and cosmology. An optional laboratory course will be offered.

NASC - 6003 Topics in Sustainability, 3.00 Credits
Prerequisite(s): MATH 1023 with C or better and BIOL 1104 with D or better or BIOL 1304 with D or better or BIOL 2904 with D or better or BIOL 1404 with D or better or CHEM 1003 with D or better or CHEM 1004 with D or better or BIOL 1104 with D or better or PHYS 1024 with D or better or PHYS 1044 with D or better or PHYS 1064 with D or better
Level: Upper
Upper Level
In this course, students will apply quantitative reasoning and qualitative reasoning to a variety of areas to relate to sustainability: the goal of meeting the needs of the present while maintaining the ability of the future to meet its needs. Students will establish ways in which these areas relate to the three pillars of sustainability: environmental, social and economic. Emphasis will be placed on the recognition of coping with potential conflicts and issues involved with efforts to achieve sustainable goals.

NURS - NURSING
NURS - 1011 NURS Living Learning Comm I, 1.00 Credit
Level: Lower
Pass/Fail
Nursing Seminar: Conceptual Skill Building is the beginning foundation of concept based learning in nursing. The course content includes the concepts of critical thinking, observational skills, caring, and recognizing self-confidence. Emphasis is placed on individual skill building and enhancing self-confidence. The student is also introduced to the development of an individual portfolio to assist in meeting professional goals and to reflect on accomplishments. Engagement in the college culture will be explored through designated living areas, planned tours of college resources, and increased faculty contact during engaging concept-based learning activities. Conceptual skill building and self-development skills will facilitate student transition into a healthy lifestyle and reduce stress while participating in the Associate Degree Nursing program.

NURS - 1055 Nursing 1, 5.00 Credits
Prerequisite(s): BIOL 1404 with C+ or better * Corequisite(s): BIOL 1404 with C+ or better
Level: Lower
Nursing 1 is the foundation course in the nursing curriculum. It contains the concepts of knowledge and skills considered fundamental to subsequent nursing courses. Emphasis is placed on the development of basic nursing skills and caring for individuals with respiratory, cardiovascular and gastrointestinal problems. The course prepares students for the development of basic nursing skills and caring for individuals with respiratory, cardiovascular and gastrointestinal problems. The course continues to develop skills in assisting clients with major health concerns. Observational experiences include rotations to obstetrics, operating and recovery rooms.

NURS - 1108 Nursing 1, 8.00 Credits
Level: Lower
Applied Learning Clinical Lab, Clinical Liability Insurance
Nursing 1 is the foundation course in the nursing curriculum. It contains the concepts of knowledge and skills considered fundamental to subsequent nursing courses. Emphasis is placed on the development of basic nursing skills and caring for individuals with respiratory, cardiovascular and gastrointestinal problems. The course prepares students for the development of basic nursing skills and caring for individuals with respiratory, cardiovascular and gastrointestinal problems. The course continues to develop skills in assisting clients with major health concerns. Observational experiences include rotations to obstetrics, operating and recovery rooms.

NURS - 1133 Nursing 1 Lab, 3.00 Credits
Prerequisite(s): BIOL 1404 with C+ or better Corequisite(s): BIOL 1404 with C+ or better
Level: Lower
Applied Learning Clinical Lab, Clinical Liability Insurance, Course Fee $17.00
The development of basic nursing skills begins in a structured campus laboratory setting and continues in the clinical lab. The course develops beginning skills in assisting clients with major health concerns to meet their basic needs.

NURS - 2001 Seminar in Nursing II, 1.00 Credit
Level: Lower
Clinical Liability Insurance
This course is designed to familiarize students with the expectations of the nursing program. It is an elective course to be taken by interested students the semester before their first nursing course. The objectives focus on an overview of the philosophy of nursing, theoretical, and practical applications of nursing process concepts, and roles of the nurse. Classroom discussions, observations of actual nursing classes and field trips are planned to enhance the student's awareness of the expectations of the nursing program.

NURS - 2011 NURS Living Learning Comm II, 1.00 Credit
Level: Lower
Pass/Fail
This course is the expansion of Nursing Seminar-Conceptual Skill Building I, which enhances concept based learning in nursing. It contains the concepts of critical thinking, observational, listening, and psychomotor skills. Emphasis is placed on individual self-development, caring and team skill building. The student will develop an individual portfolio to assist in meeting professional goals and reflection on accomplishments. Engagement in the college culture will be explored through participation in a variety of events, presentations, and through off site cultural engagement. The student will implement stress reduction exercises. Conceptual skill building, self-development skills, and team building will promote student transition into a healthy life style and reduce stress while participating in the Nursing Program.

NURS - 2055 Nursing II, 5.00 Credits
Prerequisite(s): BIOL 1404 with C+ or better and NURS 1055 with C+ or better and NURS 1133 with C+ or better or NURS 1133 with C or better and NURS 1055 with C+ or better and BIOL 1044 with C+ or better and BIOL 2504 with C+ or better
Corequisite(s): BIOL 1404 with C+ or better and NURS 1055 with C+ or better and NURS 1133 with C+ or better or NURS 1133 with C or better and BIOL 1044 with C+ or better and BIOL 2504 with C+ or better
Level: Lower
In Nursing II, the student uses the nursing process to assess, plan, implement, and evaluate nursing care of clients with major health concerns. The course prepares students to provide nursing care to clients with acute and chronic medical conditions. Emphasis is placed on individual needs and how these impact the client's physical and emotional state and level of development. The student uses a variety of methods to acquire competence in learning objectives and demonstrates proficiency in their responsibility for learning.

NURS - 2133 Nursing II Lab, 3.00 Credits
Prerequisite(s): NURS 1055 with C+ or better and NURS 1133 with C+ or better or NURS 1133 with C or better or BIOL 1044 with C+ or better and NURS 1118 with C or better and BIOL 1044 with C+ or better and BIOL 2504 with C+ or better
Corequisite(s): NURS 1055 with C+ or better and NURS 1133 with C+ or better or NURS 1133 with C or better or NURS 1118 with C or better and BIOL 1044 with C+ or better and BIOL 2504 with C+ or better
Level: Lower
Applied Learning Clinical Lab, Clinical Liability Insurance, Course Fee $14.00
The development of basic nursing skills continues in a structured campus laboratory and clinical setting. The student is expected to demonstrate and acquire competence in learning objectives and demonstrates proficiency in their responsibility for learning.
The students will learn about the history of Ireland’s healthcare system and the variety of Level: Upper and/or vulnerable populations. Students will present information on the importance of will be addressed. Lastly, the concept of social justice will be explored relative to undeserved workforce and workplace policy development, advancement of the profession, and advocacy broad professional perspective for the expanded role of the baccalaureate prepared nurse. Aspects of inquiry and ways of knowing are explored, relative to selected ethical dilemmas or

In Nursing IV, the student synthesizes the nursing process to assess, plan, implement, and evaluate nursing care to clients with major health concerns that are studied to include critical care topics building on prior knowledge. The student uses a variety of methods to acquire competence in learning objectives and demonstrates proficiency in their responsibility for learning.

In Nursing IV, the student increases skills in applying the nursing process to a group of clients with chronic and/or critical health problems. The student develops his/her professional role as a leader and manager and is prepared for the transition from student to graduate. Nursing IV involves the student in specialty areas such as Emergency Department and Intensive Care Units. The student develops the role as a professional, the student participates in a group leader rotation. Clinical experiences include a variety of settings, including a pediatric experience and a preceptorship. Students continue to focus on prevention and health education in the clinical and community settings. In the clinical lab, the student cares for a group of clients with more critical and complex situations. The student will demonstrate proficiency in critical thinking in applied learning environments.

In Nursing IV, the student increases skills in applying the nursing process to a group of clients with chronic and/or critical health problems. The student develops his/her professional role as a leader and manager and is prepared for the transition from student to graduate. Nursing IV involves the student in specialty areas such as Emergency Department and Intensive Care Units. The student develops the role as a professional, the student participates in a group leader rotation. Clinical experiences include a variety of settings, including a pediatric experience and a preceptorship. Students continue to focus on prevention and health education in the clinical and community settings. In the clinical lab, the student cares for a group of clients with more critical and complex situations.

In Nursing III, the student applies the nursing process to assess/analyze, plan, implement, and evaluate care to clients with major health concerns that are studied to include critical care topics building on prior knowledge. The student uses a variety of methods to acquire competence in learning objectives and demonstrates proficiency in their responsibility for learning.

In Nursing III, the student applies the nursing process to assess/analyze, plan, implement, and evaluate care to clients with major health concerns that are studied to include critical care topics building on prior knowledge. The student uses a variety of methods to acquire competence in learning objectives and demonstrates proficiency in their responsibility for learning.
PHIL - 1073 Problems of Philosophy, 3.00 Credits
Prerequisite(s): GEN ED - Humanities, Liberal Arts and Science
This course has a three part structure: 1. Logic. At root, critical thinking is the ability to reason; to think logically. Students will learn core concepts such as validity, soundness, logical form, and informal fallacies. 2. Applied Argument Construction. Students will learn to construct and critique ordinary and scientific arguments, both in written and oral form, using the logical principles learned in the Logic component of the course. 3. Alternative Reasoning Methods. Students will be encouraged to identify and examine arguments based on cultural background, gender, religious convictions, requirements of classical logic. Students will be encouraged to identify and examine such arguments. The purpose of this examination is not to validate or endorse alternative reasoning methods, but to encourage students to talk with each other about the difference and similarities in the ways they make judgments and other factors. Writing is continued in assignments related to readings, class discussions, and lectures.

PHIL - 2013 Critical Thinking, 3.00 Credits
Level: Lower
Gen Ed - Humanities, Liberal Arts and Science
Ethics is a course designed to inquire into the nature of values and how we acquire them. It studies some major ethical systems derived from such values that have been used to evaluate man’s conduct. It encourages students to discuss theories as applied to existing moral dilemmas. Writing is continued in assignments related to readings, class discussions, and lectures.

PHIL - 6003 Professional Ethics, 3.00 Credits
Prerequisite(s): GEN ED - Humanities, Liberal Arts and Science
This course will introduce students to historical ethical foundations that will serve as frameworks for discussion, activities, and projects. Students will examine how to manage relationships both internal and external to the workplace, determining how best to manage those relationships despite changes such as privacy and conflict of interest. In addition to determining how to resolve workplace conflict ethically and justly, students will assess the difficulties and conflicts that may arise between individuality and workplace standards. Through engagement with practical ethical problems, students will also learn to recognize, analyze, and apply environmental, cultural, and corporate social responsibilities. Course knowledge will culminate in each student’s development of a statement of professional ethics, which will function as an ethical cornerstone in each student’s career path.

PHYS - PHYSICS

PHYS - 1044 College Physics I, 4.00 Credits
Prerequisite(s): MATH 1033 with D or better or MATH 1043 with D or better or MATH 1054 with D or better or MATH 1064 with D or better
Applied Learning-Other, Gen Ed - Natural Sciences, Liberal Arts and Science
This is the first semester of a two-semester physics sequence, which is appropriate for Liberal Arts students or technical students who plan to pursue a four year degree in the biological sciences. In this course, students will learn how to explain natural phenomena both qualitatively and quantitatively. Problem solving skills are emphasized. Topics include: motion, force, energy, collisions, rotational motion, and fluids. Students will do some open-ended labs where they will create a model of the experiment, design and run the experiment.

PHYS - 1045 College Physics II, 4.00 Credits
Prerequisite(s): PHYS 1044 with D or better
Applied Learning-Other, Gen Ed - Natural Sciences, Liberal Arts and Science
This is the second course in introductory physics for engineering students. The topics covered include: simple harmonic motion, waves, heat, light, electricity and magnetism. Problem solving is stressed. The course includes a weekly lab covering the topics listed for this course and a laboratory component which will function as an ethical cornerstone in each student’s career path.

PHYS - 2023 General Physics II, 3.00 Credits
Prerequisite(s): PHYS 1024 with D or better
Gen Ed - Natural Sciences, Liberal Arts and Science
This course is the second course in introductory physics for engineering students. The topics covered include: wave motion, sound, electrostatics, current, electricity, electric circuits, magnetic effects, light and illumination, reflection, refraction, mirrors, thin lenses, dispersion, interference, and diffraction. Laboratory work is also included covering many of these topics.

PHYS - 2044 College Physics II, 4.00 Credits
Prerequisite(s): PHYS 1044 with D or better
Applied Learning-Other, Gen Ed - Natural Sciences, Liberal Arts and Science
This is a continuation of PHYS 1044. It is appropriate for a Liberal Arts or technical student who plans to transfer into a four-year program in engineering, mathematics, or some of the natural sciences. The topics covered include: measurements, vectors, kinematics, dynamics, work and energy, impulse and momentum, rotational kinematics and dynamics, including energy and momentum principles, for single and multiple particle systems and rigid bodies. In addition the laboratory component of this course will be used to expose students to activities that will require them to apply the knowledge they have learned to design experiments, collect and analyze appropriate data and then interpret the results in such a way as to demonstrate their understanding of the concepts being covered.
This course allows students who have successfully completed a previous course in psychology to continue study in that subject. A student may contract for one to four credit hours. However, directed study may be contracted by a student only with the approval of the directing instructor and the department chairperson.

**PSYC - 5013 Counseling Theory, 3.00 Credits**
Prerequisite(s): PSYC 1013 with D or better
Level: Upper
Liberal Arts and Science, Upper Level
This course provides students with an overview of historical and contemporary psychological approaches to helping. Topics will include theories of counseling, cultural issues, professional concerns and ethical standards of the field. The course will also address issues related to the historical and theoretical bases of crisis intervention.

**PSYC - 5053 Social Psychology, 3.00 Credits**
Prerequisite(s): PSYC 1013 with D or better
Level: Upper
Liberal Arts and Science, Upper Level
The course examines social psychology - the scientific discipline which studies the psychology of the individual in society. It focuses on the individual during social interaction and societal influences. Among topics considered are attitude change, person perception, attribution theory, verbal and nonverbal communication, conformity and nonconformity, aggression and affiliation, stereotypes and prejudice, social justice, and interpersonal attraction.

**PSYC - 5093 Health Psychology, 3.00 Credits**
Prerequisite(s): PSYC 1013 with D or better
Level: Upper
Liberal Arts and Science, Upper Level
This course examines personal health, psychological factors that influence health, and health behavior. Topics include stress management, coping with illness, and cultural influences on health-related behaviors. The focus is on understanding the psychological aspects of health and disease, as well as the impact of psychological factors on physical health. Additionally, the course will cover the role of psychological factors in the development and management of chronic illnesses and disabilities.

**PSYC - 5103 Industrial/Organizational Psychology, 3.00 Credits**
Prerequisite(s): PSYC 1013 with D or better
Level: Upper
Liberal Arts and Science, Upper Level
This course examines personality development, types of personalities, and personality disorders. Students analyze the relationship between personality and several factors including culture, gender, and motivation. Critical examination and analysis of different personality theories will help students understand their own personality.

**PSYC - 5303 Autism Spect. Related Disorder, 3.00 Credits**
Prerequisite(s): PSYC 1013 with D or better
Level: Upper
Liberal Arts and Science, Upper Level
This course will cover the early history of ASD and related disorders, diagnosis, and treatment of autism; current classification and diagnostic issues and techniques; epidemiological and etiological issues; major neurological and psychological theories of ASD; current approaches to intervention; and current ASD research.

**PSYC - 6103 Family & Intimate Rel Violence, 3.00 Credits**
Prerequisite(s): SOCI 1163 with D or better or PSYC 1013 with D or better or HUSR 2083 with D or better
Level: Upper
Liberal Arts and Science, Upper Level
This course will examine theory, research, and interventions in autism spectrum disorders (ASD) and other related disorders, such as Asperger's Syndrome, Rett Syndrome, Pragmatic Developmental Disorders, or Childhood Disintegrative Disorder. Some of the topics that will be covered include the early history of ASD and related disorders, diagnosis, and treatment of autism; current classification and diagnostic issues and techniques; epidemiological and etiological issues; major neurological and psychological theories of ASD; current approaches to intervention; and current ASD research.

**PSYC - 7003 Working w/Diverse Populations, 3.00 Credits**
Prerequisite(s): PSYC 1013 with D or better
Level: Upper
Liberal Arts and Science, Upper Level
This course will examine and promote understanding, sensitivity, awareness, and knowledge of diversity. Students will learn about various cultural, socioeconomic, and historical factors that contribute to diversity, as well as the challenges and opportunities that arise from these differences. The course will also address ways to manage or reduce its negative consequences and how to evaluate research in health systems and health policy perspective. Topics such as the global impact of disease, theories of health-related behavior change, stress, coping, communicable and chronic diseases including cancer, cardiovascular disease, HIV, chronic pain management and the placebo effect will be covered. Strategies for individual and community health advocacy will also be discussed.
COURSE DESCRIPTIONS

PSYC - 7103 The Psychology of Killers, 3.00 Credits
Prerequisite(s): PSYC 1013 with C or better
Level: Upper
Liberal Arts and Science, Upper Level
This course examines the psychological factors that are unique to mass murderers and serial killers. This course will examine what accounts for that violent rage that is unleashed against other human beings who are simply in the wrong place at the wrong time. To what extent might familial or sexual forms of violence be caused by general or neurological deficiencies, a history of childhood neglect and abuse, or a socialization of hatred toward others? At what point in the psychological evolution of a killer might that person be considered "crazily insane"? Using a case study approach drawn from readings, film, and television, students will explore the "dark side" of human psychology in order to understand why these killers kill.

RADT - 1003 Radiation Physics, 3.00 Credits
Prerequisite(s): RADT 1004 with D or better
Level: Lower
This course is designed to provide a basic knowledge of the principles of physics as it pertains to radiation. The x-ray circuit, radiographic equipment, diagnostic x-ray tubes, fluoroscopy units, and an overview of quality control will be discussed. Additionally, this course provides fundamental principles of radiographic exposure. Principles of exposure and image production including exposure factors, receptor exposure, differential absorption, spatial resolution, shape distortion, magnification, beam restriction, beam filtration, scatter radiation, grids and exposures factors will be discussed. Digital image acquisition and processing, image acquisition errors, quality management, image display and data management will also be covered.

RADT - 1004 Fundamentals of Radiologic Sci, 4.00 Credits
Prerequisite(s): RADT 1004 with D or better
Level: Lower
This course is designed to provide a general overview of the study of radiologic science and the role it serves in the health care delivery system. Several key topics in imaging including introductory principles of radiography, the health care environment, understanding orders and diagnostic reports, hospital organizations, and radiology organizations. The course will also include a dialogue of medical legal ethics and the radiographer's role in making ethical decisions. Pharmacology and venipuncture topics such as drug nomenclature and classification, general pharmacologic principles, contrast agents, routes of administration, and drug categories relevant to radiography will be discussed. Patient care topics including transfer techniques, patient history and vital signs, infections control, sterile techniques, medical emergencies, and professionalism and communication in patient care will be presented. Finally, cultural awareness and the radiographer's role in multicultural health care setting will be discussed.

RADT - 1013 Fundamentals of Radiologic Sci, 3.00 Credits
Prerequisite(s): RADT 1003 with C or better
Level: Lower
This course provides a general overview of the study of radiologic science and the role it serves in the health care delivery system. Several key topics in imaging including introductory principles of radiography, the health care environment, understanding orders and diagnostic reports, hospital organizations, and radiology organizations. The course will also include a dialogue of medical legal ethics and the radiographer's role in making ethical decisions. Pharmacology and venipuncture topics such as drug nomenclature and classification, general pharmacologic principles, contrast agents, routes of administration, and drug categories relevant to radiography will be discussed. Patient care topics including transfer techniques, patient history and vital signs, infections control, sterile techniques, medical emergencies, and professionalism and communication in patient care will be presented. Finally, cultural awareness and the radiographer's role in multicultural health care setting will be discussed.

RADT - 2003 Radiobiological Protection, 3.00 Credits
Prerequisite(s): RADT 1003 with C or better
Level: Lower
This course establishes a knowledge of atomic structure and terminology. Principles of ionizing radiation including basic interactions of radiation and matter, radiation quantities, units and dose limits for exposure, radiation protection for patients and employees as well as radiation monitoring devices are all discussed. In addition, this course will provide an overview of the principles of the interaction of radiation with living systems. Radiation effects on molecules, cells, tissues and the body as a whole are presented. Factors affecting biological response are presented, including acute and chronic effects of radiation.

RADT - 2013 Radiographic Exposure & Quali, 3.00 Credits
Prerequisite(s): RADT 1004 with C or better and RADT 1003 with C or better and RADT 2014 with C or better
Level: Lower
This course is designed to provide fundamental principles of radiographic exposure. These principles include the radiographic factors; density, contrast, recorded detail and distortion that affect and influence the radiographic image and the technique compensation necessary to produce a diagnostic image as these factors change. Digital image acquisition and film screen imaging as well as film processing are also discussed. The fundamental criteria of image analysis and evaluation of quality diagnostic imaging are emphasized.

RADT - 2021 Radiographic Procedures I, 1.00 Credit
Corequisite(s): RADT 1001 with C or better
Level: Lower
This course provides the theoretical basis for performing radiographic procedures with specific patient positioning instruction in the laboratory. Standard terminology for positioning and will be discussed. The examination protocols and imaging evaluation for the thoracic cavity, abdominal cavity, upper extremities and lower extremities will be introduced. The laboratory setting will reinforce the theoretical foundation of the lecture through demonstration, role playing and skill practice in the laboratory. Image analysis will be included and require problem solving and critical thinking skills to evaluate diagnostic quality of the images obtained in the laboratory.

RADT - 2023 Radiographic Procedures I, 3.00 Credits
Corequisite(s): RADT 1001 with C or better
Level: Lower
This course provides the theoretical basis for performing radiographic procedures with specific patient positioning instruction in the laboratory. Standard terminology for positioning and will be discussed. The examination protocols and imaging evaluation for the thoracic cavity, abdominal cavity, upper extremities and lower extremities will be introduced. Image analysis will be included and require critical thinking skills to evaluate diagnostic quality of the images obtained in the laboratory.

RADT - 2041 Radiology Clinical I, 1,00 Credit
Prerequisite(s): RADT 1001 with C or better
Level: Lower
Applied Learning-Practicum, Clinical Liability Insurance
This course is designed to provide an introduction to the radiology department and patient care setting. The students will be taught the basic skills necessary for a professional healthcare worker and will achieve competency in required diagnostic procedures established for the Radiologic Technology Program. Performance assessment in the clinical setting will provide the foundation to build clinical skills necessary to be successful in the field. This clinical experience consists of 120 hours, which will be completed 8 hours per week for 15 weeks.

RADT - 2044 Radiology Clinical II, 4,40 Credits
Prerequisite(s): RADT 2003 with C or better and RADT 2023 with C or better and RADT 2024 with C or better
Level: Lower
Applied Learning-Practicum, Clinical Liability Insurance
This course allows for the continued progression of skills in the clinical setting. Procedural competence and the acquisition of additional proficiencies in radiography is the focus of this clinical experience. Continued assessment of learning and proficiency is conducted using summative competencies and intermediate level learning objectives during the clinical rotation. This clinical experience consists of 480 hours, which will be completed 40 hours per week for 12 weeks.

RADT - 3011 Radiographic Procedures II Lab, 1,00 Credit
Prerequisite(s): RADT 2023 with D or better and RADT 2021 with D or better
Corequisite(s): RADT 2023 with D or better and RADT 2021 with D or better
Level: Lower
This course will provide the theoretical basis for performing radiographic procedures with specific patient positioning instruction in the laboratory. The examination protocols and imaging evaluation for the cranial, fluoroscopy procedures, special procedures, and urological procedures will be introduced. The procedural considerations for contrast studies and patient education and instruction will be discussed. The laboratory setting will reinforce the theoretical foundation of the lecture through demonstration, role playing and skill practice. Image analysis will be included and require problem solving and critical thinking skills to evaluate diagnostic quality of the images obtained in the laboratory.

RADT - 3013 Radiographic Procedures II, 3,00 Credits
Prerequisite(s): RADT 2023 with D or better and RADT 2021 with D or better
Corequisite(s): RADT 2023 with D or better and RADT 2021 with D or better
Level: Lower
This course will provide the theoretical basis for performing radiographic procedures with specific patient positioning instruction in the laboratory. The examination protocols and imaging evaluation for the cranial, fluoroscopy procedures, special procedures, and urological procedures will be introduced. The procedural considerations for contrast studies and patient education and instruction will be discussed. Image analysis will be included and require problem solving and critical thinking skills to evaluate diagnostic quality of the images obtained in the laboratory.

RADT - 3014 Radiographic Procedures II, 4,00 Credits
Prerequisite(s): RADT 2014 with C or better and RADT 2013 with C or better
Level: Lower
Applied Learning-Practicum
This course provides the theoretical basis for performing radiographic procedures with specific patient positioning instruction in the laboratory. The examination protocols and imaging evaluation for fluoroscopy, the skull, special views of the upper and lower extremities, special views of the spine, bone surveys, arthograms, pediatric and geriatric procedures, and trauma radiography will be introduced. The laboratory setting will reinforce the theoretical foundation of the lecture through demonstration, role playing and skill practice. Image analysis will be included and require problem solving and critical thinking skills to evaluate diagnostic quality of the images obtained in the laboratory.
RELG - 7003 Faith and Compassion: Exploring World Faiths, 3.00 Credits
Prerequisite(s): RELG 2014 with C or better and RELG 3043 with C or better
Level: Lower
This course provides a comprehensive understanding of the current image analysis and digital imaging guidelines for radiographic imaging and interventional positioning. Included are the importance of optimal imaging standards, discussion of a problem-solving technique for image evaluation and the factors that can affect image quality. Actual images will be critiqued for analysis. Additionally, this course will discuss and observe pathologic conditions as they relate to radiology with an emphasis on radiographic appearance of disease and impact on exposure factor selection.

RADT - 3024 Diagnostic Imaging II, 3.00 Credits
Level: Lower
This course provides a foundation in ethics and law related to the practice of medical imaging. In addition, accreditation, regulatory agencies, professional credentialing, professional organizations and professional development and advancement will be discussed. Students will examine a variety of ethical and legal issues for radiography. The course will also revisit the professional responsibilities of the radiographer.

RADT - 3043 Radiology Clinical III, 3.00 Credits
Prerequisite(s): RADT 2044 with C or better and RADT 4023 with C or better
Level: Lower
Applied Learning-Pacticum, Clinical Liability Insurance
This course provides ongoing experience in the radiology department clinical setting allowing implementation of advanced learning objectives and skills. This course allows for the continued progression of skills in the clinical setting. Procedural competence and the acquisition of additional competencies in radiography is the focus. Continued assessment of learning and proficiency is conducted using summative competencies and advanced level learning objectives. This clinical experience consists of 360 hours, which will be completed 24 hours per week for 15 weeks.

RADT - 4003 Intro to Adv Diagnostic Imag, 3.00 Credits
Prerequisite(s): RADT 3023 with C or better and RADT 4023 with C or better
Level: Lower
This course introduces the many advanced imaging modalities that are included in the radiology department. Computer tomography (CT) and its operation is discussed along with departmental archival systems and digital medical image storage. The course then introduces basic mechanisms of image acquisition, basic operating principles and applications for the advanced imaging modalities of magnetic resonance imaging (MRI), nuclear medicine, positron emission tomography (PET) and single-photon emission computed tomography (SPECT) imaging, ultrasound, radiation therapy and interventional radiology including arteriograms, cardiac angiography and venograms.

RADT - 4013 Prof Development in Imaging Sc, 3.00 Credits
Level: Lower
This course is an overview of the radiographer’s continued professional development. The course is designed to encourage active participation in professional organizations and a development of lifelong learning. The course will culminate in a senior research project and presentation on a topic within the field of radiologic science and imaging.

RADT - 4023 Diagnostic Imaging II, 3.00 Credits
Prerequisite(s): RADT 3023 with C or better and RADT 3043 with C or better
Level: Lower
This course provides an overview of the functional imaging equipment components, operational principles and clinical applications of conventional and digital fluoroscopy systems. Emphasis will be given to dynamic imaging of various body systems and its use in advanced interventional procedures. Imaging system quality assurance and quality control procedures are also introduced as each relates to imaging equipment and patient safety.

RADT - 4043 Radiology Clinical IV, 3.00 Credits
Prerequisite(s): RADT 3043 with C or better
Level: Lower
Applied Learning-Pacticum, Clinical Liability Insurance
This course is designed to allow for expanded experience in radiology by implementing advanced interventional procedures. Imaging system quality assurance and quality control procedures are also introduced as each relates to imaging equipment and patient safety.

SOCI - 5023 Research Methods, 3.00 Credits
Prerequisite(s): MATH 1123 with D or better or MATH 1113 with D or better or MATH 2124 with D or better
Level: Upper
Liberal Arts and Science, Upper Level
This upper-level course focuses on the how and why of doing research in the social and behavioral sciences, including evaluation research. The research techniques used by human services practitioners and social and behavioral scientists are emphasized including correlational and experimental methods. Ethical ways to conduct research and to build knowledge through research are examined. Writing in professional formatting style is stressed, as is understanding the parts of a journal article, the methods utilized within those professional journal articles, and how research is disseminated at professional conferences.

SOCI - 5033 Soc. Life & Vsn. of the Futu, 3.00 Credits
Prerequisite(s): SOCI 1163 with D or better
Level: Upper
Liberal Arts and Science, Upper Level
This course teaches sociological thinking by examining our world and visions of future social life. Concepts and themes from the social sciences will be mapped to representations of future social life as students develop their sociological understanding. Students will think critically about modernization, social change, the relationship between self and society as well as the intersection of class, race gender and sexuality in our contemporary social life. Dystopian and utopian visions of the future will provide fruitful "counterfactuals" to compare with current and historical lived experiences.

SOCI - 5213 Science, Technology & Society, 3.00 Credits
Prerequisite(s): HIST 1113 with D or better or HIST 1143 with D or better or HIST 2153 with D or better or PLSC 1043 with D or better or SOCI 1163 with D or better
Level: Upper
Gen Ed - Social Sciences, Liberal Arts and Science, Upper Level
This course is a survey of the growth of science and technology and their impact upon society as a whole with primary emphasis upon the United States. Major concentration is on the period since the mid-nineteenth century emphasizing the intellectual climate leading to and resulting from scientific and technological changes and the influence of these developments upon industry, government, education, agriculture, ecology and other areas.

SOCI - 5233 Gerontology-Sociology of Aging, 3.00 Credits
Level: Upper
Gen Ed - Social Sciences, Liberal Arts and Science, Upper Level
This course provides an overview of the sociological, psychological, physical and cultural aspects of the aging process. It will review demographic trends, theories and contemporary issues for this student. The course will also provide students with the opportunity to explore their views and attitudes on aging. Students will complete a research paper that examines the implications of the aging population on the student's intended major.

writing assignments will further develop the student's writing, interpretation, critical thinking, and information literacy skills. This course is particularly useful for individuals preparing for helping professions.
COURSE DESCRIPTIONS

SONO - 2023 Sonographic Procedures I, 3.00 Credits
Prerequisite(s): SONO 2013 with D or better or SONO 2103 with C or better
Level: Lower
Upper Level
This course examines the evolution of the sonographic system and the transformation of the sonographic system within the United States. This course is a critical analysis of the sonographic system in the United States - its components and functions. Students will evaluate the evolution of sonography, present legal cases, and evaluate the role in the health care delivery system. Several key topics in imaging including introductory principles of sonography, discipline terminology, sonography specialties and careers in the profession will be explored. This course includes historical and ethical views of sonography in the development of ethical decision making. Case topics including transfer techniques, patient history and vital signs, infection control, sterile techniques, medical emergencies and basic pharmacology will be presented. Finally, cultural awareness and the sonographer's role in a multicultural health care setting will be discussed.

SONO - 2023 Sonographic Procedures II, 4.00 Credits
Prerequisite(s): SONO 2013 with C or better or SONO 2103 with C or better
Level: Lower
Applied Learning-Clinical Plcm, Clinical Liability Insurance
This course provides the theoretical basis for performing sonographic procedures with specific patient scanning instruction in the laboratory. The examination protocols and imaging evaluation for the pelvic female organs; first, second, and third trimester Obstetrical; Carotid, Peripheral Arterial and Venous Vascular scanning will be introduced. The laboratory setting will reinforce the theoretical foundation of the lecture through demonstration, role playing, and skill practice in the laboratory. Sonographic image analysis will be included and require problem solving and critical thinking skills to evaluate diagnostic quality of the images obtained in the laboratory.

SONO - 2023 Sonographic Procedures III, 3.00 Credits
Corequisite(s): Level: Lower
This course provides the theoretical basis for performing sonographic procedures. The imaging evaluation for the abdominal organs, pelvic cavity and organs, and superficial small parts such as thyroid and scrotum will be introduced. This includes the disease process for each organ and system with application to the sonographic and Doppler patterns. Sonographic image analysis will be included and require problem solving and critical thinking skills to evaluate diagnostic quality of the images obtained in the laboratory.

SONO - 2024 Sonographic Procedures I, 4.00 Credits
Level: Lower
Applied Learning-Practicum
This course provides the theoretical basis for performing sonographic procedures with specific patient scanning instruction in the laboratory. The examination protocols and imaging evaluation for the abdominal organs, pelvic cavity and organs, and superficial/small parts such as thyroid will be introduced. The laboratory setting will reinforce the theoretical foundation of the lecture through demonstration, role playing, and skill practice in the laboratory. Sonographic image analysis will be included and require problem solving and critical thinking skills to evaluate diagnostic quality of the images obtained in the laboratory.

SONO - 2024 Sonographic Procedures II, 4.00 Credits
Prerequisite(s): SONO 2013 with D or better
Level: Lower
Applied Learning-Practicum
This course is designed to encourage active participation in professional organizations and a development of lifelong learning. The course will culminate in a senior research project and presentation on a topic within the field of radiologic science and imaging. Students will be expected to prepare for the Registry Exam(s).

SONO - 2024 Sonographic Procedures III, 3.00 Credits
Prerequisite(s): SONO 2013 with D or better and SONO 3013 with D or better
Level: Lower
Applied Learning-Clinical Plcm, Clinical Liability Insurance
This course allows for the continued progression of skills in the clinical setting. Procedural competence and the acquisition of additional proficiencies in diagnostic medical sonography are the focus of this clinical experience. Continued assessment of learning and proficiency is conducted using summative competencies and initial and intermediate level learning objectives during the clinical rotation. This clinical experience consists of 40 hours per week for the duration of the course offering (minimum of 150 hours required). Clinical schedule will be appointed based on availability of affiliated clinical site.

SONO - 3016 Sonography Clinical I, 3.00 Credits
Prerequisite(s): SONO 2016 with C+ or better or SONO 3023 with C+ or better
Level: Lower
Applied Learning-Clinical Plcm, Clinical Liability Insurance
This course provides the theoretical basis for performing sonographic procedures with specific patient scanning instruction in the clinical setting. The examination protocols and imaging evaluation for the abdominal organs; first, second and third trimester Obstetrical; Carotid, Peripheral Arterial and Venous Vascular scanning will be introduced. The laboratory setting will reinforce the theoretical foundation of the lecture through demonstration, role playing, and skill practice in the laboratory. Sonographic image analysis will be included and require problem solving and critical thinking skills to evaluate diagnostic quality of the images obtained in the laboratory.

SONO - 3031 Sonographic Procedures II Lab, 1.00 Credit
Prerequisite(s): SONO 2023 with D or better or SONO 2024 with D or better
Level: Lower
This course provides the theoretical basis for performing sonographic procedures with specific patient scanning instruction in the laboratory. The examination protocols and imaging evaluation for the pelvic female organs; first, second, and third trimester Obstetrical; Carotid, Peripheral Arterial and Venous Vascular scanning will be introduced. The laboratory setting will reinforce the theoretical foundation of the lecture through demonstration, role playing, and skill practice in the laboratory. Sonographic image analysis will be included and require problem solving and critical thinking skills to evaluate diagnostic quality of the images obtained in the laboratory.

SONO - 3032 Sonography Clinical II, 4.00 Credits
Prerequisite(s): SONO 2024 with D or better or SONO 2023 with D or better
Corequisite(s): SONO 2024 with D or better or SONO 2023 with D or better
Level: Lower
Applied Learning-Clinical Plcm, Clinical Liability Insurance
This course provides the theoretical basis for performing sonographic procedures. The examination protocols and imaging evaluation for the pelvic female organs; first, second, and third trimester Obstetrical; Carotid, Peripheral Arterial and Venous Vascular scanning will be introduced. Sonographic image analysis will be included and require problem solving and critical thinking skills to evaluate diagnostic quality.

SONO - 3034 Sonographic Procedures II, 4.00 Credits
Prerequisite(s): SONO 2013 with D or better
Level: Lower
Applied Learning-Practicum
This course provides the theoretical basis for performing sonographic procedures with specific patient scanning instruction in the laboratory. The examination protocols and imaging evaluation for the pelvic female organs; first, second and third trimester Obstetrical; Carotid, Peripheral Arterial and Venous Vascular scanning will be introduced. The laboratory setting will reinforce the theoretical foundation of the lecture through demonstration, role playing, and skill practice in the laboratory. Sonographic image analysis will be included and require problem solving and critical thinking skills to evaluate diagnostic quality of the images obtained in the laboratory.

SONO - 3035 Sonography Clinical III, 4.00 Credits
Prerequisite(s): SONO 3024 with C+ or better
Level: Lower
Applied Learning-Clinical Plcm, Clinical Liability Insurance
This course allows for the continued progression of skills in the clinical setting. Procedural competence and the acquisition of additional proficiencies in diagnostic medical sonography are the focus of this clinical experience. Continued assessment of learning and proficiency is conducted using summative competencies and initial and intermediate level learning objectives during the clinical rotation. This clinical experience consists of 40 hours per week for the duration of the course offering (minimum of 180 hours required). Clinical schedule will be appointed based on availability of affiliated clinical site.
SPCH - 5003 Mediated Argu. in Pub. Spheres, 3.00 Credits
Prerequisite(s): SPCH 3031 with D or better and SPCH 3033 with D or better
Corequisite(s): SPCH 3031 with D or better and SPON 3033 with D or better
Level: Lower
This course provides students with specific patient scanning instruction in the laboratory. The examination protocols and imaging evaluation for the breast, superficial tissues, musculoskeletal, GI tract, interventional, and pediatric scanning will be introduced. The laboratory setting will reinforce the theoretical foundation of the lecture through demonstration, role playing, and skill practice. Safety of patient with regard to biologic effects and quality control will be introduced. Sonographic image analysis will be included and require problem solving and critical thinking skills to evaluate diagnostic quality of the images obtained in the laboratory.

SPCH - 4034 Sonographic Procedures III, 4.00 Credits
Level: Lower
Applied Learning Practicum
This course provides the theoretical basis for performing sonographic procedures with specific patient scanning instruction in the laboratory. The examination protocols and imaging evaluation for the breast, musculoskeletal, GI tract, interventional, and pediatric scanning will be introduced. This includes the disease processes for each organ/organ system with application to sonographic and Doppler patterns. Sonographic image analysis will be included and require problem solving and critical thinking skills to evaluate diagnostic quality.

SPAN - SPANISH
SPAN - 1203 Spanish I, 3.00 Credits
Level: Lower
Gen Ed - Foreign Language, Liberal Arts and Science
This course focuses on developing the student’s ability to speak, to write, and to read Spanish. Additional emphasis is given to learning about the diverse cultures of the Spanish-speaking world. Instruction centers on oral communication, grammar (especially formation of verbs), and cultural awareness. Writing is continued in assignments related to readings, class discussions, and lectures.

SPAN - 2203 Spanish II, 3.00 Credits
Prerequisite(s): SPAN 1203 with D or better
Level: Lower
Gen Ed - Foreign Language, Liberal Arts and Science
This second semester course is designed to suit the needs of persons who wish to learn to communicate orally in the Spanish language for purposes of travel, business, personal pleasure, and academically. The student’s listening, speaking, reading and writing skills in Spanish will be further developed.

SPAN - 4900 Directed Study, 1.00 TO 6.00 Credits
Level: Lower
A student may contract for an independent study through an arrangement with an instructor who agrees to direct such a study. The student will submit a plan acceptable to the instructor and the departmental chairperson. The instructor and student will confer regularly regarding the process of the study.

SPCH - SPEECH
SPCH - 1083 Effective Speaking, 3.00 Credits
Prerequisite(s): COMP 1503 with D or better
Level: Lower
Gen Ed - BC-COMP503/SPCH1083, Gen Ed - BC-COMP503/SPCH1083, Liberal Arts and Science
This course deals with preparing, presenting, and critiquing the basic speech types: reporting, demonstration, and argumentation. Special attention is given to collecting, selecting, and arranging of material; to presenting and delivering; and to active listening and critical evaluating. The course stresses principles of interpersonal and intercultural communication and provides a basis for the understanding of speech through utilizing various media. The course is designed to help students obtain the speaking skills with which to respond to various oral communication situations encountered throughout college and in professional, civic, and social areas both before and after graduation. Students will be required to deliver presentations to a live audience of mature adults in both traditional and online classes.

SPCH - 4003 Intercultural Communication, 3.00 Credits
Prerequisite(s): COMP 1503 with D or better and SPCH 1083 with D or better
Level: Lower
Gen Ed - Humanities, Liberal Arts and Science
This course is a study in the theories and applications of Intercultural Communication. Students will investigate how culture shapes communication norms and analyze the verbal and nonverbal communication styles of various cultures. The course will also focus on the causes of and effective responses to intercultural conflict. Emphasis will be placed on applying intercultural competency to practical contexts.

SPCH - 5003 Mediated Argu. in Pub. Spheres, 3.00 Credits
Prerequisite(s): SPCH 1083 with D or better
Level: Upper
Gen Ed - Humanities, Liberal Arts and Science
This course is a study in argumentation in public spheres with a focus on emergent media. Students will develop skills in advanced argument creation, engage in criticism of media artifacts, and understand the history of mediated argumentation in public spheres. Readings will be drawn from academic, professional, and popular criticism of the evolving landscape of public sphere argumentation. Emphasis will be placed on crafting and critiquing effective and sound oral, visual, and procedural arguments. The course culminates in a final project asking students to evaluate established schools of media criticism, rhetorical criticism, and public sphere theory by debating their efficacy in infusing public argumentation in emergent and new media environments.

SPCH - 5083 Communication in the Workplace, 3.00 Credits
Prerequisite(s): COMP 1503 with D or better and SPCH 1083 with D or better
Level: Upper
Gen Ed - BC-COMP1503/SPCH5083, Gen Ed - BC-COMP503/SPCH5083, Liberal Arts and Science, Upper Level
The class is designed to give students the opportunity to obtain the communications skills encountered throughout college and in their personal and professional lives. Special attention is given to the theory of organizational communication, basic communication skills, interpersonal communication, employer-employee relations, group communication, and presentational speaking.

SPCH - 6083 Interpersonal Communication, 3.00 Credits
Prerequisite(s): SPCH 1083 with D or better
Level: Upper
Liberal Arts and Science, Upper Level
This course will cover the study and application of the techniques involved in effective interpersonal communication. Text, lecture, and outside reading will cover the theories and concepts of verbal, vocal, nonverbal, and listening as they relate to communicating in interpersonal contexts. Specifically, the course will address such topics as validation, listening, self-disclosure, conflict resolution, problem solving strategies, and electronic communication. Class participation, group participation, public speaking, and scholarly writing are required of all students.

SPMG - SPORT MANAGEMENT
SPMG - 1123 Intro to Sport Management, 3.00 Credits
Level: Lower
This course is an investigation of the scope of the sport industry, which is a growing major business enterprise in the United States and in much of the world. The course is designed to provide an overview of sports administration with an emphasis on management principles and career opportunities. The various functions of effective management, and the skills, attributes and roles required of the sport manager are discussed. Attention will be focused on how the managerial process relates to sport organizations and the products they provide. Students will become acquainted with career opportunities in the sport management field.

SPMG - 2003 Sport in Society, 3.00 Credits
Prerequisite(s): SPMG 1123 with D or better
Level: Lower
This course provides an in-depth examination of sport in society, particularly in the United States. A review of the role of sport participants, spectators, and the media on society is included. Various organizational levels of sporting opportunity and sporting behavior, including sport ethics, resulting from the influence of society will be covered.

SPMG - 2013 Sport in Europe Soc Study Abroad, 3.00 Credits
Level: Lower
This course provides an in-depth examination of sport in society, globalization of sporting culture, and an understanding of the European model of sport. A review of the role of sport participants, spectators, and the media on society is included. Various organizational levels of sporting opportunity and sporting behavior, including sport ethics, resulting from the influence of society will be covered. Within this course, students may partake in a study abroad opportunity in Europe.

SPMG - 3001 Field Experience I, 1.00 Credit
Prerequisite(s): SPMG 1123 with C or better
Level: Lower
Applied Learning-Internship, Pass/Fail
This course encompasses a semester of supervised, hands-on experience working in the field of sport management. A minimum of 45 hours of work throughout the semester is required.

SPMG - 3013 Sport Communication, 3.00 Credits
Prerequisite(s): COMP 1503 with D or better and BUAD 2033 with D or better and SPMG 1123 with D or better
Level: Lower
This course is an introduction to the study of policies and procedures utilized in dealing with communication issues occurring within the sports industry, including print and electronic media, the internal and external constituencies to be served, and the development of specific forms of communication approaches. Heavy emphasis will be placed on the practical as opposed to the theoretical, as well as, a thorough understanding of the unique aspects of communication in sport.

SPMG - 4001 Field Experience II, 1.00 Credit
Prerequisite(s): SPMG 1123 with C or better and SPMG 3001 with D or better
Level: Lower
Applied Learning-Internship, Pass/Fail
This course encompasses a semester of supervised, hands-on experience working in the field of sport management. A minimum of 45 hours of work throughout the semester is required.

SPMG - 4013 Sport Law, 3.00 Credits
Prerequisite(s): SPMG 1123 with D or better and ( BUAD 3043 with D or better and BUAD 7023 with D or better )
Level: Lower
This course is designed to expose students to the legal environment within which sport management professionals function. It focuses on sport’s relationship with government agencies (public law issues) as well as other businesses, consumers, suppliers, etc., (private law issues). It is intended to better equip the sport business manager for decision making by exploring the legal issues involved in contracts, torts, business organizations, employment law, risk management, intellectual property law and Constitutional Law. Legislation specifically related to sport will be highlighted. A variety of specific problems for the business of sport, found within the law will be examined and analyzed through case briefs and history of research projects and advocacy exercises. Students will have an opportunity to explore law-related topics of particular interest to themselves with oral presentations to the class.

258
COURSE DESCRIPTIONS

SPMG - 4123 Sport Facility Management, 3.00 Credits
Prerequisite(s): SPMG 1123 with D or better
Level: Lower
This course investigates the elements, issues, and problems that shape the planning and management of sport facilities and events. Similarities and differences of facility types, reasons for development, terminology, types of events held, service contracts, financial operations, marketing and economic impacts are some of the issues covered. Building revenues from the sport facility, even services, and financing sources are all critical to the successful management of the multi-million dollar facilities that house today's major sport events. Course content will include lectures, guest speakers, and group discussions. In order to pass this course, students must complete an end-of-program exam hosted by an external vendor.

SPMG - 5003 Sport Business and Finance, 3.00 Credits
Prerequisite(s): SPMG 1123 with D or better and ACCT 1124 with D or better
Level: Upper
Upper Level
This course is a focus on business topics as they relate to the fiscal and budgetary control of public and private sport organizations, leagues, and facilities. Topics include sources of funding, budgeting and revenue, the implementation and use of an economic impact analysis, and a review of budgeting and financial statements.

SPMG - 5013 Sport Communication, 3.00 Credits
Prerequisite(s): SPMG 1123 with D or better and COMP 1503 with D or better and BUAD 2033 with D or better
Level: Upper
Upper Level
This course will examine the elements of the marketing mix from that perspective. Major topics include the theoretical, as well as a thorough understanding of the unique aspects of communication in sport.

SPMG - 5023 Principles of Coaching, 3.00 Credits
Prerequisite(s): SPMG 1123 with D or better
Level: Upper
Upper Level
This course exposes students to the study of administrative and strategic behaviors of coaches and athletes in various athletic and competitive environments that sets the tone for successful organizations, its impact on athletic performance, and how to facilitate solutions to problems that may arise. The course will include, but not be limited to, the study of different theoretical and applied topics such as planning, organizing, coaching principles, and practices.

SPMG - 5033 Ethics and Leadership in Coaching, 3.00 Credits
Prerequisite(s): SPMG 1123 with D or better
Level: Upper
Upper Level
This course helps students learn and practice the disciplines needed to advance their ethical and leadership abilities as a sport coach. It explores the nuances needed to assist athletes to understand the ethical values of sport and help them to become leaders. Topics include but are not limited to sportsmanship, ethical values, gambling, performance enhancing substances, race and gender issues, and leadership development techniques specific to sport applications.

SPMG - 5900 Directed Study, 3.00 Credits
Level: Upper
A student may contract for one to six credit hours of independent study through an arrangement with an instructor who agrees to direct such a study. The student will submit a plan acceptable to the instructor and to the department chairperson. The instructor and the student will confer regularly regarding the progress of the study.

SPMG - 6003 Sport Marketing, 3.00 Credits
Prerequisite(s): MKTG 2073 with D or better
Level: Upper
Upper Level
This course is designed to be an examination of the unique nature of Sport Marketing. This course will examine the elements of the marketing mix form that perspective. Major topics include an overview of the sport market, the critical nature of market research and market segmentation, developing an understanding of the special nature of the sport product, pricing within sport marketing, the role of promotion in the sport market, and the theory of "place" in sport. Students will be responsible for designing, implementing and evaluating a sport marketing research plan.

SPMG - 6013 Licensing and Endorsements, 3.00 Credits
Prerequisite(s): SPMG 1123 with D or better and SPMG 6003 with D or better
Level: Upper
Upper Level
This course covers the details involved in the development of a corporate licensing program, as well as the licensing of intellectual property from corporations. The student will be exposed to the necessary details of becoming a licensee or licensor. Product value, agreements, endorsements, royalties, enforcement, and legal issues will all be included.

SPMG - 6023 Event Promotion and Sales, 3.00 Credits
Prerequisite(s): SPMG 1123 with D or better and SPMG 4123 with D or better
Level: Upper
Upper Level
This course is a comprehensive review of the skills and tasks required to successfully sell a sporting event to the consumer. Creating an effective sales culture, examining incentives for sport consumers, sales management and servicing, and the role of technology in sport promotion and sales are included. Additionally, this course explores sales training, the art of ticket sales, customer retention, branding, and sales risk management.

SPMG - 6033 Sponsorship, 3.00 Credits
Prerequisite(s): SPMG 1123 with D or better and SPMG 6003 with D or better
Level: Upper
Upper Level
This course is a study of corporate sponsorships. Topics will include acquisition, service, sponsor and property objectives, rights, negotiations, sponsorship evaluations, contracts, proposals, and presentations.

SPMG - 6043 Sport Law, 3.00 Credits
Prerequisite(s): SPMG 1123 with D or better and ( BUAD 3043 with D or better or BUAD 7023 with D or better )
Level: Upper
Upper Level
This course is designed to expose students to the legal environment within which sport management professionals function. It focuses on sport's relationship with government agencies (public law issues) as well as with other businesses, consumers, suppliers, etc. (private law issues). It is intended to better equip the sport business manager for decision making by exploring the legal issues involved in contracts, torts, business organizations, employment law, risk management, intellectual property law and Constitutional Law. Legislation specifically related to sport will be highlighted. A variety of specific problems for the business of sport, found within the law will be examined and analyzed through case briefs and studies, research projects and advocacy exercises. Students will have an opportunity to explore law related topics of particular interest to themselves with oral presentations to the class.

SPMG - 7001 Pre-Internship Seminar, 1.00 Credit
Prerequisite(s): SPMG 1123 with D or better
Level: Upper
Upper Level
This course is a focus on the development, analysis, and pursuit of internship and career goals. Emphasis is placed on the development of a professional portfolio, including covering letters, resumes, and basic interviewing techniques. Related issues, professional ethics, and etiquette will be explored.

SPMG - 7013 Sport Management Capstone, 3.00 Credits
Level: Upper
Applied Learning-Creative Work, Upper Level
This course is designed to expand knowledge and understanding of large-scale events and sport organizations through concentrated research that culminates in a senior research project. This course is designed with a two-part focus. The first half of the course will emphasize Sport Management scholarly research through a review of literature. The second half of the course is focused on a hands-on learning approach and application of scholarly research. This culminates in a capstone project, providing unique and innovative solutions to a sport organization.

SPMG - 7023 Strategic Mgmt in Sport Organiz, 3.00 Credits
Prerequisite(s): SPMG 1123 with D or better and BUAD 3153 with D or better
Level: Upper
Upper Level
This course is a study of the administrative structure of sport organizations including those operating at a local, national, and international level. Emphasis will be placed on existing structures and how best to function within each to accomplish objectives.

SPMG - 8112 Internship, 12.00 Credits
Level: Upper
Applied Learning-Internship, Pass/Fail, Upper Level
A work experience designed to assist the student in making the transition from the classroom to a segment of the sport management field. The internship permits a degree of independence and an element of learning that is not possible in a conventional classroom. The intent of the internship is to provide each student with an experiential learning opportunity as a pre-professional in sport management. Students will complete supervised field work in a sport management segment, that segment to be determined mutually by the Internship Coordinator and the student. Each student will have a planned program of educational objectives approved by the student, Site Supervisor, and Internship Coordinator. A written paper, and a public, oral presentation, along with a journal of work activities and experiences, will be required. The final grade will be determined by the Internship Coordinator and the Site Supervisor.

TMGT - TECHNOLOGY MANAGEMENT

TMGT - 5900 Directed Study, 1.00 TO 6.00 Credits
Level: Upper
Pass/Fail, Upper Level
A student may contract for one to six credit hours of independent study through an arrangement with an instructor who agrees to direct such a study. The student will submit a plan acceptable to the instructor and to the department chairperson. The instructor and the student will confer regularly regarding the process of the study.

TMGT - 7003 Managing Tech & Innovation Cap, 3.00 Credits
Prerequisite(s): TMGT 7153 with D or better or BUAD 3153 with D or better
Level: Upper
Upper Level
This course is an application of theoretical approaches to technology management and innovation. Major concepts, tools, and processes will be explored through lecture, readings, and case study applications. Major topics include technology innovation, the assessment of technology and the importance of technology forecasts. Students will learn how to manage innovation strategy, technological evolution, and organizational context for technology management. Additional topics will also include strategic actions required by business, developing a firm's organizational innovation capabilities, creating and implementing a development strategy, new product development, and challenges to managing innovation. Students will learn about the latest technology methods of AI/AR/VR and be able to apply them through a hands on, team-based PBL simulation.

259
This course deals with understanding management concepts and functions of encouraging empathy, leadership, and creativity; finding shared visions, norms, and values; setting information and power; and encouraging teamwork and participation. The concepts of planning, organizing, leading, and controlling are explored to show how these basic principles can be used to create a healthy and thriving environment in today’s global environment of business and technology.

This internship is designed to assist the student in making the transition from the classroom to industry. This integration of work allows a degree of independence and an element of learning that is not possible in a conventional classroom. The intent of the internship is to provide each student with an experiential learning opportunity in a management situation as a pre-professional supervisor or manager. Students will complete supervised field work in a selected business, industry, government or educational setting. Students carry out a planned program of educational experiences under the direct supervision of an owner, manager, or supervisor in their technical field or professional area. The interns will also be supervised by a faculty member who serves as the Internship Coordinator. Written reports, weekly journals of work activities and experiences, and self and supervisor evaluations are required. Evaluation will be based on the quality of experiences gained from the internship and student work performance.

This internship is designed to assist the student in making the transition from the classroom to industry. VETS - 3013 Animal Parasitology, 3.00 Credits
Prerequisite(s): VETS 1203 with C or better and VETS 3003 with C or better and VETS 1214 with C or better
Level: Lower
Applied Learning-Practicum
Parasitology is a multidisciplinary approach to the study of internal and external parasites of companion, exotic and farm animals. This course will integrate the student's knowledge of anatomy and pharmacology while providing the student the opportunity to understand life cycles, diagnostic protocol, control and treatment of the most common internal and external parasites. The course will also develop the student's understanding of how to appropriately provide both verbal and written communications for the client concerning management, prevention and potential zoonosis of the common parasites. The laboratory will emphasize the common techniques used to identify the parasites of companion, laboratory and farm animals.

VETS - 3022 Anesthesia & Surgical Nsg I, 2.00 Credits
Prerequisite(s): VETS 2014 with C or better and VETS 3003 with C or better and VETS 3013 with C or better
Level: Lower
Applied Learning-Practicum
This course will provide the student the opportunity to gain an initial understanding of the principles of veterinary anesthesia and veterinary surgical nursing. The students will be introduced to the currently used veterinary anesthetic drugs and their effect on the animal by utilizing their knowledge of the normal anatomy, physiology as a basis for understanding. In the laboratory the student will be given an introduction to the technical skills needed to preanesthetize, anesthetize, maintain and recover the animal patient, by utilizing current appropriate anesthetic agents, equipment, and protocols. The students will also learn to use critical thinking skills in gaining an understanding of how anesthetic monitoring equipment will be used to evaluate the surgical patient during the anesthetic period. The students will also be introduced to surgical nursing skills including preoperative management of surgical patients, assisting veterinary surgeons, prepping surgical patients, learning and practicing aseptic techniques, IV fluid support, anesthesia, and providing postoperative patient and incision care. The dog and the cat will be the surgical patients providing educational support in this course. Students will perform pre- and postoperative assessments of surgical patients outside of class time as well as one week of assigned kennel duty.

VETS - 3023 Radiography, 3.00 Credits
Prerequisite(s): VETS 2014 with C or better and VETS 1203 with C or better and VETS 1214 with D or better and VETS 3013 with C or better
Level: Lower
Applied Learning-Practicum, Course Fee $24.00
In this course students will examine body systems using radiographic and ultrasound procedures as tools in the evaluation of animals for the diagnosis and prognosis of numerous traumas, diseases, and illnesses. The course integrates the production of the radiograph and its clinical use as it relates to the evaluation of healthy and ill animals. In the laboratory, students will utilize animal models, inanimate objects and living animals to perfect their understanding of patient positioning, radiographic exposures and film-developing techniques. Emphasis is placed on safely producing diagnostic quality radiographs using both conventional and digital radiographic techniques, as well as providing the basic skills in the set up and operation of an ultrasound unit.

VETS - 3024 Clinical Laboratory Techniques, 4.00 Credits
Prerequisite(s): VETS 2014 with C or better and BIOL 2524 with C or better or VETS 3012 with D or better *
Level: Lower
Applied Learning-Field Study, Course Fee $108.00
This course introduces laboratory techniques performed in veterinary offices and clinics. Examination and testing of blood, feces, urine, and exudates are performed for diagnostic and prognostic purposes. Lectures deal with testing theories and relevance to animal health and disease. Laboratories develop skills necessary to maintain a safe laboratory working environment, institute quality control programs, collect, process, store, and transport clinical biohazard specimens. Major emphasis of the course is development of skills necessary to operate and maintain clinical analyzers, accurately perform laboratory tests, interpret, and report laboratory results on clinical specimens.

VETS - 3103 Path & Pharm of An. Disease I, 3.00 Credits
Prerequisite(s): VETS 1214 with D or better and VETS 4014 with C or better
Level: Lower
Applied Learning-Practicum
This course will combine pathophysiology and pharmacology in a comprehensive method of presenting information about animal disease and treatment. This course is the first of a series of two courses that cover this expansive topic. This second course will continue with the presentation of the pathophysiology of disease and the pharmacologic treatment of that disease. Pathophysiology will be presented by a combination of systems and species approaches and include coverage of all the small and large animal species that are typically treated by the veterinarian / veterinary technician team. Emphasis will be given to disease that is more likely to be encountered in routine veterinary practice.

VETS - 3204 Farm Animal Management, 4.00 Credits
Level: Lower
Course Fee $33.00
Applied Learning-Practicum
This course is designed to provide the student insight into the behavior, care and management of farm animals. Dairy cattle, horses, sheep, swine, goats and other animals will be discussed. Emphasis will be placed on the practical aspects of veterinary nursing such as proper handling, restraint, evaluation, medication, treatment, and examination procedures that apply to farm animal species. Characteristics of the major breeds, terminology, disease control measures, housing, and basic management practices will also be covered. Additional farm experiences outside of regularly scheduled classes will be required for successful completion of this course.

VETS - 3301 Veterinary Technology Precept., 1.00 Credit
Prerequisite(s): VETS 2014 with C or better and VETS 1203 with C or better and VETS 3013 with C or better and VETS 3003 with C or better and VETS 3004 with C or better and ( VETS 3204 with C or better or ANSC 1204 with C or better ) and VETS 1214 with D or better
Level: Lower
Applied Learning-Practicum, Clinical Liability Insurance, Pass/Fail
The American Veterinary Medical Association and the Committee on Veterinary Technician Education require that every student in Veterinary Technology complete a 240-hour preceptorship under the direct supervision of a licensed veterinary technician or a veterinarian. These preceptorships are completed off campus in private veterinary practices or other venues where the supervisory requirements can be met. Students will gain experiences in real clinical settings in veterinary medicine and develop an appreciation for the role of a veterinary technician in clinical practice or other venues.

VETS - 4013 Laboratory Animal and Exotics, 3.00 Credits
Prerequisite(s): VETS 1203 with C or better and VETS 2014 with C or better and VETS 3003 with C or better and VETS 3013 with C or better
Level: Lower
Applied Learning-Practicum
This course is designed to provide the student with basic knowledge and understanding of research facilities and their function. Students will be instructed in the care and handling of small animals used in the research laboratory. Emphasis will be placed on species differences, housing requirements, and laboratory techniques applied in animal research and pharmaceutical facilities. Animal handling, observation and management time will be provided in the laboratory time as well as during assigned vivarium duty.

VETS - 4202 Small Animal Nutrition, 2.00 Credits
Prerequisite(s): VETS 1203 with C or better
Level: Lower
This is an introductory course for students accepted in the veterinary technology program, providing identification and function of nutrients, understanding pet food labels, and applications for wellness, life stage, and therapeutic nutrition (prescription food) for dogs and cats. The course will utilize an interactive Internet connection in the classroom.

VETS - 4203 Patho & Pharm of An. Disease II, 3.00 Credits
Prerequisite(s): VETS 1214 with D or better and ( VETS 2014 with C or better and VETS 3013 with C or better )
Level: Lower
Applied Learning-Practicum
This course will combine pathophysiology and pharmacology in a comprehensive method of presenting information about animal disease and treatment. This course is the second of a series of two courses that cover this expansive topic. This second course will continue with the presentation of the pathophysiology of disease and the pharmacologic treatment of that disease. Pathophysiology will be presented by the combination of systems and species approaches and include coverage of all the small and large animal species that are typically treated by the veterinarian / veterinary technician team. Emphasis will be given to disease that is more likely to be encountered in routine veterinary practice.

VETS - 4302 Pharmacology for the Vet Tech, 2.00 Credits
Prerequisite(s): VETS 2013 with C or better or VETS 2104 with C or better
Level: Lower
This course will review and consolidate information on pharmacology that is touched upon in other Veterinary Technology courses and add additional topics in pharmacology to provide the student with a comprehensive and organized overview of veterinary pharmacology.

VETS - 4403 Veterinary Practice Essentials, 3.00 Credits
Prerequisite(s): VETS 1203 with C or better
Level: Lower
Applied Learning-Practicum
This course is designed to prepare students to more easily transition from the academic environment to the veterinary practice environment. The course will provide practice management techniques to the student with a broad background in the skills needed to manage a practice from day to day. Instruction will include but be not limited to discussion of inventory control, fee structure, profit and loss statement analysis, human resource management, effective leadership, team building, important customer service. Communication skills are critical in veterinary medicine – both technician to client and technician to fellow veterinary professionals. Communication styles and application of communication skills will be reinforced throughout this course segment. Student communication skills will be strengthened in this course through interactive scenarios that discuss difficult practice situations like dismissing employees and counseling clients about euthanasia. The final segment of the course will include perfecting interview skills and creating or enhancing professional resumes. The course will also allow students to explore alternative career tracks in veterinary technology including clinical specialization. This segment of the course will also cover mental health issues in the veterinary profession. This course will help students make those choices that enhance balance of life and work and lead to job satisfaction and healthier lives.

VETS - 4900 Directed Study, 1.00 TO 4.00 Credits
Prerequisite(s): VETS 2014 with C or better and VETS 2104 with C or better
Level: Lower
Applied Learning-Practicum
This course will provide students an opportunity to pursue an independent study in an area of interest. In consultation with an instructor, the student will develop a plan acceptable to the instructor and to the department chairperson. The instructor and student will confer regularly regarding the process of the study.

WELD - WELDING
WELD - 1104 Intro Shielded Metal Arc Weld (SMAW), 4.00 Credits
Prerequisite(s): Applied Learning-Practicum
Applied Learning-Practicum
This course provides the student with an introduction to shielded metal arc welding, welding safety and power sources. Through hands-on technical training, the student will develop the skills necessary to make quality fillet welds on mild steel using the shielded metal arc welding process in all positions and on varying plate thickness.

WELD - 1105 Int Shlded Metal Arc Weld (SMAW), 5.00 Credits
Prerequisite(s): Applied Learning-Practicum
Applied Learning-Practicum
This course provides the student with a thorough technical understanding of shielded metal arc welding (SMAW), carbon arc cutting, welding and cutting safety power sources and electrodes. Through hands-on technical training, the student will develop the skills necessary to make quality groove welds on mild steel in all positions, and on varying plate thickness.

261
WELD - 1204 SMAW I: Carbon Arc Cutting & Gouging, 4.00 Credits
Level: Lower
Applied Learning-Practicum
This course provides the student with a thorough technical understanding of shielded metal arc welding (SMAW), carbon arc cutting, welding and cutting safety, power sources, and electrodes. Hands-on technical training will develop skills necessary to make quality groove welds on mild steel in all positions and on varying plate thickness. Carbon arc skills will include cutting and gouging of mild steel.

WELD - 1205 Shielded Metal Arc Weld I, 5.00 Credits
Level: Lower
Applied Learning-Practicum
This course provides the student with a thorough technical understanding of shielded metal arc welding (SMAW), carbon arc cutting, welding and cutting safety, power sources and electrodes. Hands-on technical training, the student will develop skills necessary to make quality groove welds on mild steel in all positions and on varying plate thickness.

WELD - 1715 Gas Welding & Plastic Cut, 5.00 Credits
Level: Lower
Applied Learning-Practicum, Course Fee $118.00
This course teaches the teacher the fundamental skills of brazing, gas welding, gas cutting, and plasma processes used in industry. Major topics include principles of operation; component identification; equipment set up; minor repairs; process variables; and manual and semi-automatic performance exercises.

WELD - 1723 Welders Calculations I, 3.00 Credits
Level: Lower
Basic mathematical functions used by the welder in the performance of their duties will be the subject of this course. Mathematical operations such as manipulation of fractions, decimals and percentages converting between the two and into the metric system, will be taught and along with calculating perimeter, volume, weight and bend calculations will be taught in this course.

WELD - 1724 Gas Welding/Cutting & Plasma Cutting, 4.00 Credits
Level: Lower
Applied Learning-Practicum, Course Fee $118.00
This course is designed to teach the student the fundamental skills of oxy-fuel and plasma processes used in industry. Major topics include principles of operation, component identification, equipment set up, minor repairs, process variables, and manual and automatic performance exercises. Laboratory exercises emphasize technique and skill development.

WELD - 1728 Arc Welding, Crbn Arc Cncr Gauging, 8.00 Credits
Level: Lower
Applied Learning-Practicum
This course provides the student with a thorough technical understanding of shielded metal arc welding, carbon arc cutting, welding and cutting safety, power sources, and electrodes. Hands-on technical training will develop skills necessary to make quality arc welds on mild steel, in all positions and on varying plate thickness. Carbon arc skills will include cutting, gouging, and weld washing of mild steel.

WELD - 1733 Blueprint Reading, Insp & Test, 3.00 Credits
Level: Lower
Course Fee $22.00
This course provides the student with a thorough technical understanding of blueprint reading for welders; and welding symbol interpretation and application. The study of joint design and weldment inspection will be performed by testing, and evaluation of completed weld specimens using various metal and weld testing techniques; both destructive and non-destructive.

WELD - 2715 Shielded Metal Arc Welding I, 5.00 Credits
Level: Lower
Applied Learning-Practicum, Course Fee $118.00
This course provides instruction on the welding processes used in industry that are in high demand, including flux cored arc welding and shielding metal arc welding. All processes, positions, and joint types studied will be in accordance with the American Welding Society specifications.

WELD - 2725 Gas Metal Arc Welding I, 5.00 Credits
Level: Lower
Applied Learning-Practicum
This course presents one of the most popular welding processes in industry today. Gas metal arc principles are emphasized with students learning applications and operating techniques pertaining to semi-automatic wire feed welding. Special attention will be placed on penetration, metal transfer, gas shielding and equipment set up for gas metal arc welding.

WELD - 2733 Tolerancing & Working Drawings, 3.00 Credits
Level: Lower
This course is designed for the welding student to understand the typical working drawing and any tolerances that may apply. These tolerances include unilateral, bilateral and geometric tolerances. The importance of accuracy and proper orientation of weldments will be stressed. This application will address all possible tolerancing and drawing applications the student will need to be effective as an industrial welder.

WELD - 2735 Gas Tungsten Arc Welding I, 5.00 Credits
Level: Lower
Applied Learning-Practicum
This course provides the student with a thorough technical understanding of gas tungsten arc welding, welding safety and arc characteristics. Hands on technical training will develop the skills necessary to make quality gas tungsten arc welds on mild steel, stainless steel and aluminum using both direct and alternating current. Certification documentation for the student will be performed for all welding processes with special attention placed on code conformance and welding procedure development.

WELD - 3005 Shielded Metal Arc Welding II, 5.00 Credits
Prerequisite(s): WELD 2715 with D or better
Level: Lower
Applied Learning-Practicum, Course Fee $118.00
This course covers safety standards and performance of shielded metal arc welding (SMAW II). Students will learn and apply OSHA standards. SMAW II theory will also be covered. Students will be performing groove welds in preparation for the required 6G qualification test.

WELD - 3015 GMAW II, FCAW II, 5.00 Credits
Prerequisite(s): WELD 2715 with D or better and WELD 2725 with D or better
Level: Lower
Applied Learning-Practicum
This course covers the practice and proper use of protective clothing, equipment, and hand tools for the safe use of constant voltage welding equipment. Students will learn to make adjustments and repairs to equipment according to manufacturer’s recommendations. Proper set up, operation and theory will qualify the student for certification in gas metal arc welding of steel, in the short arc, spray, and globular modes of metal transfer. Qualification testing (AWS EG3.0-96) will be also performed in dual shielded flux cored arc welding.

WELD - 3025 Gas Tungsten Arc Welding II, 5.00 Credits
Prerequisite(s): WELD 2735 with D or better
Level: Lower
Applied Learning-Practicum
Students will learn setup and operating procedures, gas cylinder handling, flow meter and torch operations for welding carbon steel pipe and tubing. The course will also cover the various methods of testing and inspection of welds. All position qualification testing will prepare students for welder certification testing (AWS EG3.0-96).

WELD - 3813 Meturgy, Codes, Certs & Insp, 3.00 Credits
Level: Lower
This course will cover the principles related to welding metallurgy, the properties of carbon steel metals, and the residual stress and distortion caused by the welding process. Students will learn setup and operating procedures, gas cylinder handling, flow meter and torch operations for welding carbon steel pipe and tubing. The course will also cover the various methods of testing and inspection of welds. All position qualification testing will prepare students for welder certification testing (AWS EG3.0-96).

WELD - 4013 Senior Project, 3.00 Credits
Level: Lower
Applied Learning-Creative Work
This course is designed as a capstone project to verify a student's ability in all aspects of welding. The student will be required to identify a need for a new product or improvement on an existing product. After identification, the completion of the project will occur with minimal instructor guidance. This will allow the student to demonstrate their ability to perform independently. Upon completion, the student will demonstrate the functionality of their project in the form of a formal presentation. This will be a functional model of the student's own design.

WELD - 4425 GMAW III A GTAW IV, 5.00 Credits
Prerequisite(s): WELD 3015 with D or better and WELD 3025 with D or better
Level: Lower
Applied Learning-Practicum, Course Fee $118.00
This course will cover the safety inspections of the GMA and GTA welding equipment and accessories. Students will be able to make minor repairs to the equipment and accessories, which will include the changing of wire electrodes and cable liners. Students will learn to perform the setup for welding equipment for making external repairs to the equipment, and in effect procedures in the use of the equipment. Set up and safe operations will be taught for the pulsed transfer method of welding. Students will perform welds on aluminum pipe.

WELD - 4435 Gas Tungsten Arc Welding III, 5.00 Credits
Prerequisite(s): WELD 3025 with D or better
Level: Lower
Applied Learning-Practicum
This course covers the safety inspections of welding equipment and accessories. Students will be able to make external repairs to the equipment and accessories. Students will also learn setup and operation of the GTA equipment for stainless steel pipe/tubing. Students will execute corrective actions to repair surface flaws on welds and base metals and perform 2G and 5G performance qualification tests on 300 series stainless steel pipe/tubing using stainless steel fillers. Pipe welding using GTA process will be stressed. Students will be required to take the exams for Level II AWS certification.

WELD - 4445 Welding Fabrication, 5.00 Credits
Level: Lower
Applied Learning-Practicum
This course will be conducted as though the student were employed in an actual work environment. The student will perform all necessary work in the fabrication of various parts. Safe and proper set up and use of appropriate equipment for various applications will be expected. Along with the setup and use of equipment, the student will be required to generate and apply weld process sheets, and inspect each weld using industrially accepted inspection processes. The student will perform various duties common in industry today, as well as apply any certifications, codes, and standards that must be met for qualifications. They will perform visual examinations and complete inspection records and reports.

WELD - 4900 Directed Study, 1.00 TO 5.00 Credits
Level: Lower
A student may contract for one to five credit hours of independent study through an arrangement the instructor agrees to direct such a study. The student will submit a plan acceptable to the instructor to the department chairperson. The instructor and student will confer regularly regarding the process of the study.

WGST - WOMEN AND GENDER STUDIES
WGST - 1003 Intro to Women/Gender Studies, 3.00 Credits
Level: Lower
Liberal Arts and Science
This course explores critical questions about the meaning and role of gender in society. The course will expose the students to diverse values, perspectives and backgrounds relating to gender and sexuality. Cultural and societal constructs and influences will be examined as they relate to gender. The course will focus on how gender, sex, race, sexual orientation, class and age influence individual attitudes and society's views.
